He said, "This is your experience. In any case, this is your experience, your incarnation, and you decide how to live it and where to direct the energies that the Creator of the Universe gives you. I cannot condemn you and I cannot praise you. In any case, this is your experience and your responsibility to your disembodied part and to the level where, as a result of everything, you will end up, where you will end up." I understood these words.

I want to say that every minute while I remain on Earth or on Futissa, all my thoughts will be aimed at cleansing your noosphere, wishing you peace, freedom from all beliefs that limit you, from xenophobia and hatred, first of all, towards yourself , and to those around you.

1:38:35 Appeal from Griar Murati to all humanoids.

Irina: Remember (I want to appeal to everyone now), no matter how another person behaves, he has the same red blood as you. And red represents the color of the first chakra – vitality. This means that every person strives for life just like you. Human life is priceless. In any case, human life is the main priority.

And about the proposal for a retreat, for me to come to you in the Astral Plane. Yes, I am

ready to come to you and give a variety of answers, as well as teach some specific courses or articles, or anything else on issues of crisis psychology, conflictology, partial criminology and sociology, if this is in demand. In any case, I will maintain communication with you, regardless of whether I leave the incarnation or remain in it, since I am immortal.

Maxim: I know that Irina often gets in touch with you.

Guys, follow the information on VKontakte, because there we post information about Griar. Irina contacts him almost every other day or every day and describes what is happening to him.

Irina: (Griar Murati) I have already applied through Ashtar, but I want to tell you about this. I appeal to those representatives of Futissa, the Galactic Federation of Light - in general, to representatives of the Interstellar Union who wish, perhaps, to repeat my action. I will neither convince you nor dissuade you - it will be only your choice. But before you take this step, you will need to weigh everything and prepare for any reaction.

I'm not an advisor here. The only advisor is your heart.

1:40:51 Griar Murati about astral help and his fears.

Maxim: Grear, please tell me, after we have covered the situation, do earthly people, contactees, come to you for astral contact?

Irina: Yes.

Maxim: Have a lot of people started coming out? Because, let's say, Era writes. She is directly interested in whether the microelements that you were offered in the Astral, which are missing for proper nutrition, are suitable for you?

Irina: Yes, there are. I really thank the contactees and their supervisors. Plasmoid civilizations are also coming - already of the terrestrial type, and solar plasmoids have come. We exchanged energies. And, naturally, plasmoids of the Galactic Federation of Light, including the Light Network of the Galaxy. And even representatives of the planet Gihor came.

They create certain subtle-material copies of the microelements I lack. And together with my meditations and the substances that exist, and some knowledge about the internal transmutation of elements in cells, I can exist. I am grateful to you all!

Maxim: We are grateful to you! We are ready to support you. We are ready to carry information and try to somehow convey it to our people. But I'm afraid that we still won't reach the higher ranks.

Irina: I am not afraid of disincarnation. I fear that the truth that many people now feel will be buried under the bustle of their everyday affairs. This is worse than disincarnation! Because disembodiment is common and divine, and the fact that a person leaves the true Light then brings him suffering and the consequences that you see on Earth, because of which I came.

Maxim: Thank you, Grear!

01:43:05 Ashtar Sheran about the quality of information from contactees.

Maxim: Question for Ashtar. A very difficult situation with contactees. Many of them say they are in contact with you. But in reality, the information varies greatly. How can we, earthlings, understand whether you are transmitting this information or not?

Irina: (Ashtar Sheran) Of course, you can ask me. The fact is that Irina told me about some differences in the information that I give her and that other contactees receive. It may vary for various reasons.

First reason. My image can be taken by various beings, including those of the subtle material plane. Or even representatives of my civilization can call my name. But due to the difficulties of perceiving foreign, including alien, words through a mental connection (Griar has already spoken about this), contactees perceive his name as Ashtar Sheran, since they have the vibrations of my race. This is the first reason.

Maxim: As I thought, other plasmoid civilizations might come and introduce themselves as you?

Irina: And humanoids from his race. There are also contact specialists there.

(Ashtar Sheran) And the second reason: they can really contact me, but perceive the information in their own manner, in their own language. Transfer and add. Not to add – I don't call it distortion. Color it with your personal attitude, your personal coloring. More or less this happens with all contactees, because the contact goes through certain areas of the brain associated with speech, memory, etc. In any case, the information even from one curator will differ somewhat depending on the contactee.

Maxim: Yes. It all depends on what note, what emotions the contactees are on. If they are based on anger, hatred and resentment, then, accordingly, they will come into contact with low-vibration entities.

Irina: (Ashtar Sheran) It also depends on the emotional mood at the moment. It happens that the contactee has an imbalance. This disrupts the purity of the spiritual channel, and those high-vibration answers and words that I convey are lost in the stream of negative thoughts. And the contactee receives this information, but since his mood, his heart is in tune with other thoughts, he throws away mine and takes his own.

Maxim: Yes, he takes his thoughts.

Irina: This can happen consciously and unconsciously.

Maxim: Guys, really listen to your hearts!

Irina: How to tell the difference? You read this. And just ask, could I say that? You can talk yourself. Including many of you, we meet on Sundays, when you fly to my ship with Irina. I see many of you. You can ask me any question.

01:46:42 Raom Tiyan and Ashtar Sheran about conflicts among contactees.

Maxim: Many more are trying to build their importance by saying that Irina says something wrong. I know this for sure.

Irina: Raom Tiyan is also greeting everyone now.

(Raom Tiyan) I know what this is about. I want to say that when a contactee bases his contact on refuting the contact of another contactee, this indicates that he is influencing, trying to create a certain image among precisely those people who receive information from this contactee. In order to discredit him in order to take his place.

Maxim: Yes. Very often people who are engaged in commercial activities engage in discrediting. In terms of Earth, this is considered normal for them.

Irina: (Raom Tiyan) I say and have always told all contactees that if you do not agree with the information of another contactee (it seems untruthful and unethical to you), then in any case this is the perception of this contactee! And a special (especially in front of cameras) conflict about the fact that this is wrong, and your “right” will only discredit, first of all, yourself. Anyone who takes the position of a critic, a judge, lowers his vibrations, and even lower than the one who may have conveyed incorrectly.

Maxim: Especially those people who graduated from our project use the names of our curators and try to discredit our project.

Irina: You can talk about a specific contactee. The fact that “this is your opinion”, that she or he conveys how you understand this question, simply in the context of the conversation. But when contactees are specifically checked in a certain way, this indicates a desire for conflict, unfortunately. And even when other contactees invite me to such contacts (to analyze what I said to whom), I refuse. This is Raom Tiyan's opinion.

(Ashtar Sheran) Yes. I can come at the request of the contactee, say something that another

contactee said. But I also think that, in any case, publicity is inappropriate here. This lowers the vibrations of people who begin to become disillusioned with the idea of contact as such.

Maxim: Yes. Therefore, by focusing on recruiting an audience, on forming an opposing opinion, and earning money, they kill all faith in other contactees and in themselves, too.

Irina: (Ashtar Sheran) The fact is that this can give rise to condemnation. If you are a contactee and you are making a video in order to sort out the contacts of another contactee, emphasizing that you have different information (any, we are not talking about specifics right now), then you must understand what image you are creating (yours and the other contactee) in front of the audience.

In any case, this image carries (if a person who trusts another contactee looks at it) disappointment, for example, in you or in him. This is already a low vibration that will go to your egregor - not to his! He watches YOUR videos. And if he trusts you and hears that the contactee you are talking about translated the information incorrectly (either he made it up entirely, or something else, or was led by the intelligence services - whatever) and thinks about it with you, he will believe you, the energy of condemnation can be born from it. Feeling judged by the contactee you are talking about. Which, again, will not go to his egregor, but to yours! Because it is included in your egregor when it hears you, sees you, experiences certain feelings for you: the desire to watch, for example, your video.

If you understand that the information is very different (and you have a single audience), and people have a question (this really happens, I know, and has already happened to other contactees more than once), publicity here will harm, first of all, you, and not the contactee you were talking about. If you are so tormented by this question that it throws you off balance, you can, without any publicity, contact the contactee whose contact transfers confuse you. And harmonize this issue with his Higher Self, with his Higher Self and with his curators.

Maxim: Guys, thank you very much for supporting the project!

Irina: It was Ashtar who spoke.

Maxim: I thank Ashtar, and Raom Tiyan, and MidgasKaus, and LiShioni, who said nothing, and Griar, of course, thank you!

Grear, you certainly surprised me with your incarnation! I think we'll talk about this later.

Yes, guys, thank you all very much! Thanks for watching! Thank you for your trust! And even if you hear someone saying something wrong, don’t judge! Just accept this as the perception of another contactee.

Irina: I also want to thank everyone. And say a few words personally from myself, from Irina Podzorova, from my Spirit, from my Higher Self.

This situation with Griar has been going on for a week now, which you all know about, and which is happening in our chats. I wanted to appeal to everyone who can hear me now. It doesn't matter what country you live in – I appeal to everyone, it doesn't matter.

I don't care what country you live in, what language you speak, what you believe. I am only interested in helping you move from a lower vibrational state to a higher one. From hatred - to Love, from unbelief - to faith. I have already spoken about this several times.

I want to say: I never had a goal to sow any negative feelings of resentment and hatred towards any state, be it Ukraine, be it America, European countries, China and others. I love all people of all nationalities, all professions. Intelligence agencies, presidents - all divine children. I send everyone the Light of my Love! I repeat once again: I am against any military action! It's my personal opinion. Anyone, for any reason! Everything must be resolved peacefully. I send everyone the Light of my Love!

April 30, 2023

Conference participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

Griar Murati is a representative of the planet Futissa and the Intergalactic Federation of Light, one of the leading biologists, sociologist, crisis psychologist, studies the psychology of society;

Ashtar Sheran - head of the space fleet of the Galactic Federation of Light;

Raom Tiyan - representative of the planet Burhad, a specialist in energy interactions in the environment of the material and Spiritual world and transformations of various energies;

Archangel Metatron - representative of the Spiritual world, Head of the Council of Hierarchs of the Milky Way Galaxy, curator of the territory of the United States of America;

MidgasKaus - representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms, curator of the Cassiopeia project;

LiShioni is a representative of the planet Shimor, a sociologist, a specialist in the astral world and its interactions with the material world, curator of the Cassiopeia project.

#481 Who created us? Alien human DNA. Alien answers. Cassiopeia Irina Podzorova.

https://blog.cassiopeia.center/kto-nas-sozdal-inoplanetnaya-dnk-cheloveka-otvety
https://www.youtube.com/watch?v=pnEAuK0QInY

00:00 Start of video.

00:18 Background.

Voice-over: In the summer of 1999, a 13-year-old girl Irina Podzorova from the village of Peski near Voronezh agreed to take a short trip on a triangular-shaped ship with aliens from the constellation Cassiopeia.

Since then, for more than 20 years, representatives of the civilizations of the Interstellar Union of our Galaxy, which includes 116 of the 727 intelligent races present in it, have regularly come into contact with it.

01:52 The emergence of the material world.

(Fragment from video #59 Twelve questions and answers that changed more than one fate. https://youtu.be/Blp-nEJsD20 01:06-13:48)

Irina: Our race on Earth was created by three civilizations. The planet was discovered 5 million years ago by astronauts from the planet Tumesout (all names are in Daraal language, because I am a Daraal contactee), which is located in the constellation Orion (the star Pi) at a distance of just over 1000 light years from Earth. We were there with Kirkhiton during physical contact in September 2018. I have notes - I kept a diary and can provide all the materials on the planet Tumesout.

The inhabitants of Tumesout look like people of Slavic appearance, only they are giants: their height is usually from 5 to 8 meters. They are much taller than Kirchiton and especially me.

On our planet, when the Tumesoutians discovered it, there was life, there were animals, but there were no intelligent people.

The goal of the Tumesoutians is to spread intelligent life throughout the Galaxy; they consider this their mission. And their closest partners in this mission are aliens from the planet Burkhad. It is located in the constellation Cygnus (670 light years from the Sun). Burkhad is the most important planet of the Interstellar Union, which includes 116 planets (including Daraal, Esler, Tashig, Tumesout, there are many of them). The land is not included there yet.

The Burkhadians and Tumesoutians decided, after seeing our animals, namely the ancient primates (similar to our monkeys, but larger), to do experiments with these primates, combining their genetic material with their own in order to breed an intelligent creature.

Why did they decide to do this? Because it was connected with their religious worldview. Their ideas about a higher mind, about God, do not conflict with science (unlike our order). These are two parts of a single science about the Universe. They believe that God created the material world to embody the intelligent Spirits he created and achieve their goals. In the Spiritual world we can only dream, create some images, and we can achieve goals only in the material world. Therefore, God created us at the beginning, all Spirits, then the material world. According to their ideas, intelligent Spirits, including me, and you, Sergey, and you, Maxim - we were all created before the creation of the material world, we just don't remember this. They are sure of it.

The material world was created on the planets gradually. Galaxies were formed. On the planets on which life was possible, evolution took place, but not randomly, but directed by His Divine Spirit. All substances were combined in a certain way so that an organic substance was obtained, then a compound, the first cell and so on. This all happened, but not by chance - this is called the directed evolution of the development of life. Then the first animals emerged and began to develop on some planets. Their central nervous system developed.

The fact is that the rational Spirit cannot incarnate in everyone. He needs a certain amount of brain development so that the Spirit can act through him (e.g., talk, think, think). A rational Spirit cannot incarnate into a cat or a dog, because it cannot speak or think. Not every nervous system is suitable for connection with an intelligent Spirit. In the Daraal language, the intelligent Spirit is called "limis".

And when the animals living there on the planets reached such a threshold of development that it was possible to incarnate, then the limis incarnated. For the first time this happened in the Universe not in our Galaxy. Then (several hundred million years ago) this happened in our Galaxy, including on the planet Tumesout. This was the beginning of their civilization. They began to develop, multiply, technical development began, they went into space, made various discoveries, then interstellar flights began.

08:59 The emergence of intelligent life on Earth.

Irina: 5 million years ago the Tumesoutians discovered our planet and decided that if there are primates on Earth whose development is quite a bit lacking to embody an intelligent Spirit, then they can be helped by giving them genetic material to breed hybrids, so that from the Spiritual world they can as many Limis Spirits as possible were able to incarnate. They consider this their mission.

Interlocutor: We are genetic material for them, and they experiment on us.

Irina: Yes. We are hybrids. Then the Tumesoutians and Burkhadians were joined by a third civilization from the constellation Canes Venatici - the planet Selbet. Humanoid civilizations are sometimes human-like, but sometimes they are not, if the inhabitants of Burkhad and Tumesout look like people (anthropomorphic, human-like). then the inhabitants of Selbet are cold-blooded, similar to our lizards, only they walk on two legs. These are oviparous reptiles. Selbet also decided to participate in this hybrid breeding experiment.

They initially had disputes among themselves, because the Selbetians wanted intelligent reptilians to be created on Earth from our animals. But the Burkhadians and Tumesoutians were against it, also due to poor gene compatibility. The debate was about whose genes we should have more of. Then experiments began, and about 3 million years ago the first people appeared. Intelligent Spirits—limis—embodied in them. Unlike primates, humans did not have hair, they walked upright, without a tail. Hybrids have already been created.

Millions of years later, the Tumesout people came into contact with Moses (a biblical character), he really existed, he was a contactee from the planet Tumesout. He lived about 4 thousand years ago. The Tumesoutians told him in simple mythological form what was happening. They had contact on the mountain on which the alien ship was landing, all this is described in the Bible in the Old Testament. He, of course, could not understand much, because he did not know that Space and other planets existed. There was no such technological development then, so for him everyone who descended from the sky was gods for him. The aliens did not convince him of this, believing that it was easier to give knowledge to primitive, undeveloped people in a mythological form.

They told Moses how man was created. The Bible says that the Lord God created man from the dust of the ground and breathed into his face the breath of life, and man became a living soul. Knowledge is encrypted here. The dust of the earth is the genetic material of primates. Ashes represent undeveloped life. He blew in the breath of life - a combination of genetic materials.

There is little Selbet genetic material in us. But in some genetic diseases, such as ichthyosis (scales in humans), these genes are expressed. This is a reptilian gene.

14:28 Civilizations of the dense material world.

(Fragment from video #33 God, Krishna, Soul, reincarnation, aliens: dialogue between Irina Podzorova and Hare Krishna. https://youtu.be/5fkvTbyDrEk 37:32 - 46:51)

Irina: These were representatives of Burkhad, which is located in the constellation Cygnus. Representatives of Tumesout, which is located in the constellation Orion. And representatives of Selbet from the constellation Canes Venatici.

Alexander: This was given by their total experience.

Irina: The fact is that in fact, other civilizations also participated both technically and by providing material resources. But genetically, in addition to the earthly primates, only these three civilizations participated in your creation. The genes of all three in different proportions were placed into the DNA of these primates until a creature was born that could embody, as I said, the intelligent first Spirit.

What can I say about the representatives of Burhad, Selbet and Tumesout? In the Galaxy they belong to the representatives of anthropomorphic civilization.

Alexander: What does this mean?

Irina: Anthropomorphic civilizations have a biological development of the body similar to earthlings in that they have a body shape, height, basic metabolism, warm-bloodedness, childbearing, and so on, similar to your race.

Alexander: Are they representatives of the material world?

Irina: They are representatives of the dense material world, not plasmoids. Representatives of Tumesout and Burkhad are representatives of anthropomorphic civilizations, and their genetics are in total greater in representatives of your race. They differ somewhat from each other, but these differences are not significant. Representatives of the third civilization, called Selbet, belong to the representatives of the reptilian civilization.

Alexander: They still exist.

Irina: Yes. What is a reptilian civilization? This is a civilization that, unlike anthropomorphs, has a different biological development cycle that resembles the forms of your earthly reptiles. This is composure. Often there is not a live birth, like yours, but the laying of eggs. And a body structure reminiscent of your reptiles. And also a special structure of the brain, which, of course, determines the special image of the incarnate Spirit.

As you know, the incarnate Spirit in its manifestations depends on the forms of the material body into which it finds itself. From receptors, hormones, from everything that he acquired. We prefer to use the word "humanoid" in a broader sense. In our understanding, a humanoid is any Spirit embodied in a dense material body. I want to emphasize that we also call not only anthropomorphs, but also reptilians, insectoids and others humanoids.

Alexander: Are these living beings living in the material world?

Irina: In the dense material world, which have different body shapes. And this body shape depends, naturally, on genetics and their DNA. Metabolism, organs of perception, and so on are arranged in a certain way.

Humanoids come in anthropomorphic, reptilian and some other forms. And you are a hybrid of three types of organisms: 2 anthropomorphs, 1 reptilian and that earthly primate who did not belong to any of them, because he was not an intelligent form.

19:20 Differences between earthlings and aliens, the creators of the earth's race.

Alexander: How different is our human form from the form from which the genome was originally taken?

Irina: You have the least differences with the representatives of Burkhad. There are differences, mainly in the external structure of the body: they are taller, for example, due to the fact that the gravity on their planet is somewhat less. They have a different skin color: from your point of view, it will be white because there is a different radiation from the star. They have less variety in eye and hair color. They have hair (unlike many non-anthropomorphs), but the color is mostly a light shade due to not having enough of the protein that creates your darker color. And there are differences in metabolism, but they are not significant, they are accustomed to more oxygen.

Alexander: Compared to them, do we have less oxygen?

Irina: Yes, there is less oxygen on Earth, but they can exist quite comfortably on this amount, but they will feel approximately the same as you do in the highlands. They can adapt, but it takes time.

The Tumesout people are more different from you. Firstly, by height: they also have very low gravity, and their height, if measured in your units, is from five to eight meters. Basically, the body structure is similar to yours, their skin color is close to the Slavic type, and dark hair is often found.

I have already said how reptilians differ. This is cold-bloodedness, a different brain structure, methods of reproduction, skin color, and so on.

From each of these creatures, a certain number of genes were introduced into the genotype of the originally created person (later changes were made). Most of the primate genes were left behind - 45 percent, because the conditions of existence on this planet did not allow a smaller percentage.

Alexander: We have a lot of differences from everyone else. Who finally put it all together?

Irina: Those scientists who worked with representatives of the planets Burkhad, Tumesout and Selbet. But other representatives of the Interstellar Union also helped them, but only as scientists, organizers, suppliers of material resources, they did not participate genetically.

The primate genotype was left in you for 45 percent in creating the future hybrid, the Burkhad genotype was added by 35 percent, the Tumesout genotype was added by 15 percent, and the smallest part was added by the reptilian genes by 5 percent.

23:48 The composition of the genetics of earthlings. The reason for aliens' interest in Earth.

(Fragment from video #18 Who created man? The history of our civilization and planet Earth. Is the tempting serpent a reptilian? https://youtu.be/z2oBrdqnTQ4?t=696 11:36 - 20:32)

Irina: About 5 million years ago, our planet was discovered by astronauts from a planet called Tumesout. It is located 1050 light years away in the constellation Orion. When they discovered it, there was already biological life here: plants, animals, mammals, among which the closest to us were primates, similar to modern chimpanzees, but taller and with a different body structure.

At first, representatives of Tumesout gave natural evolution on Earth the opportunity to develop independently. So that intelligent creatures develop from these forms of primates through natural selection. But in 2 million years this, unfortunately, did not happen. 3 million years ago, specialists from Tumesout began an experiment whose goal was to create a hybrid from terrestrial primates by combining their genetic information with their own.

To help in this experiment, they attracted 2 more civilizations: representatives of the planet Burkhad from the constellation Cygnus and representatives of the planet Selbet from the constellation Canes Venatici, as biologists. These 3 civilizations participated in the creation of our species. This happened 3 million years ago.

By this time, the Interstellar Union had already formed in our Galaxy. It currently includes 116 civilizations out of 727 intelligent humanoid civilizations living in our Milky Way Galaxy. All civilizations with which I come into contact are also part of the Interstellar Union. I am in contact with representatives of the planet Daraal and the planet Esler. These are not our creators, but they are also part of the Interstellar Union.

Now a representative of our creators, Raom-Tiyan from the planet Burkhad, is also present here at the conference. Now it is the capital of the Interstellar Union, located in the constellation Cygnus at a distance of 670 light years from Earth.

3 million years ago they began experimenting with introducing genetic material in different percentages into the nuclei of primate cells. And they watched what kind of creature would be born.

They needed a creature whose nervous system would allow it to connect with an intelligent Spirit. As a result, the first man emerged from a monkey 3 million years ago.

The original percentages in human genes were:

-45% - primate genes;

-35% - Burkhadian genes;

-15% - genes of Tumesoutians;

-5% - genes of Selbet people.

How do they look? The inhabitants of the planet Tumesout (they discovered us) look like our European-type people, but are from 5 to 8 meters tall. I was on Tumesout.

Maxim: The entrances to the pyramids were created for the Tumesoutians. Once upon a time, earthlings were together with alien civilizations and tried to live and develop together. Tumesoutians are from 5 to 8 meters tall, they are giants. Therefore, no one can understand how the pyramids and other architectural structures were built, using what technologies. They don't tell us about this. The Tumesoutians are part of the Interstellar Union and have high technology in terms of construction, race development, genetics and much more.

Irina: Representatives of the planet Burkhad also look like us, that is, they are a warm-blooded anthropomorphic type. How are they different from us? They are between 2 and 2.8 meters tall, with white skin, often blue eyes and blond hair.

Maxim: This is what we call in history the Aryan race. This is what Hitler was going for, dreaming of cleansing the world and leaving only the Aryan race. His goal is not completely clear; later, during contacts, I will ask about Hitler’s true goal, what did he want to do?

Irina: Representatives of the planet Selbet from the constellation Canes Venatici are humanoid creatures, but of the reptilian type. They are cold-blooded, oviparous, similar to our reptiles. They are intelligent, walk on two legs, are two meters tall, look like our lizards, have a triangular-shaped face, covered with scales, and four webbed fingers on their hands. Reptilian type. We have 5% of their genes, since they also wanted to participate in our creation.

When representatives from the Interstellar Union first discovered planet Earth, they were very interested in it because of the amount of diversity of life on it, making it one of the unique planets in our Galaxy. There are few places where there is such diversity. For this reason, they wanted the resulting hybrid to have their genes. They believed that the more genes they had, the greater the amount of their energy that would be contained in this creature. They were interested in us carrying their energy too. Thus, the first creature was created.

August 16, 2022

Fragments from various videos

Participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Maxim Rusan is the project manager and the Center for Spiritual and Physical Development “Cassiopeia”.

October 12, 2023

#483 Live broadcast with the Spirit of Matrona of Moscow.

https://blog.cassiopeia.center/pryamoj-ehfir-s-duhom-matrony-moskovskoj
https://www.youtube.com/watch?v=f3LQFQ0_hs0

00:00 Start of video.

00:06 “OM tea Cassiopeia.” Wish fulfillment bracelets.

Maxim: Dear friends, hello everyone! We have a small incident here: for some reason, on our central channel “Cassiopeia” we were forbidden to conduct live broadcasts, without even telling, without explaining the reason, without issuing any strike. I don’t know what’s going on, but someone is clearly stopping us from conducting this broadcast, and in general from conducting live broadcasts.

We didn’t go on these live broadcasts for a very long time; at that time we were on retreats with Irina in Kazan, Novosibirsk. Hello huge Kazan! A huge hello to Novosibirsk! You guys are awesome, it was great working with you! In general, a wonderful atmosphere, wonderful cities, wonderful people! Yes, thank you, there is sound. Hello everyone again!

But nothing happens for nothing, I still propose to “blow up” YouTube, “blow up” our new channel. Please like, repost, share this video, because today’s live broadcast is completely unique, we have been waiting for this broadcast for a very long time. We tried for a very long time to get permission for it from the Spiritual World, from our interstellar friends. So let's go to Zen, for sure. At Zen, I hope they won’t block us. Let's find out all the circumstances.

By the way, I want to say a huge thank you to everyone! We never accounted for your gifts that you sent to Irina. All your money went to Irina’s dental clinic. We decided to go after what she eats. The remaining funds will be used for a personal trainer for Irina.

Irina ordered part of the funds to be sent to children's hospices and boarding schools. We will try to distribute the remaining funds equally among those who really need it. Therefore, thank you all so much for the gifts you gave for Irina's birthday.

"Will there be a retreat in Omsk?" Yes, someday it will. By the way, the next big retreat (we haven't agreed on all the details yet) will be in Nalchik. This is Kabardino-Balkaria. But it's a secret! I told you this in confidence, so that later you would find out.

And the most important news in general that we have is that the Eksmo publishing house has finally published Irina's book "The Diary of a Contactee." In general, this book will contain simply a huge amount of information: everything about our structure of the universe, everything about the representatives of the Interstellar Union, our real history and much more. This is the very first book. We tried to put as much information as possible into it. In general, the book will be just a "bomb"! The pre-order link is below, under this video.

Guys, we don't do pre-orders, this is not our structure. You immediately pre-order from Read-Gorod, from the Eksmo publishing house. We didn't set any prices or anything. They did everything themselves.

Yes, 758 people are watching us. Guys, like, share this video, subscribe to this spare channel. It's called Cassiopeia Meditation. Most likely, we will sometimes conduct live broadcasts on this channel, because here we have neither strikes nor blocks. The link to this channel will also be under this video, because we will later transfer it to our main channel. I think the video will be very interesting.

A huge number of different movements went into our project. Our project is already large in itself, and includes subprojects. One of the subprojects is "Cosmohealing". Now, in the near future, in Samara, in the Zhiguli Mountains, at a wonderful tourist center, we will conduct our healing retreat with a large number of masters, but under the leadership, of course, of Guzel Malyarova. There will be her students, students who attended our schools. See the link under this video, there is also a link to record.

There were no broadcasts for three weeks, and, of course, there was a huge amount of fresh news and new information. You know, we have been thinking for a very long time about what we could add to the probiotics that we already have. There are a huge number of reviews on them, the reviews are simply wonderful! And we finally developed a formula that we called "OM Tea Cassiopeia." This is a tea for cleansing the entire lymphatic system, a tea for raising Qi energy. This is the old Vedic composition, which was modified by our interstellar friends for our reality, for our moments. We gave this tea a try at retreats and received feedback. The reviews are great, of course. Therefore, if you want to try what it is: in order to cleanse the lymphatic system, order it.

By the way, I forgot the most important thing. This OM tea works with all tumors and all cancer diseases. I'm not kidding! There's an interesting lineup there. We spent a very long time trying to achieve the correct consistency, the correct drying, because everything that was done did not carry the energetic message that we have now achieved. And now they have already begun to produce it, you can order it.

“Where to order?” There is a link under the video, under this video in the descriptive part, there is OM tea and Cassiopeia probiotics. We have it all on one website, we present there all our products that we produce. Everything that comes from the sale of products also goes to the development of the Center. This is, I would say, a small commercial project that helps the development of our Center, our various directions, and masters. So be sure to try it! But I’ll warn you right away: you can’t drink it in the evening, you can drink it in the morning and during the day, because it accelerates the energy very strongly. Therefore, be careful with night OM teas, because then you may not fall asleep all night!

And for those who have some kind of cancer problems, for those who have tumors - of course, it will help a lot. Together with probiotics, we have a structure that helps restore biological processes at the physical level.

Plus, our masters, our Centers began to conduct training in our Voronezh Center. And one of the very highly qualified masters of regressive hypnosis (this is Irina Arsenyeva, she is the head of our Novosibirsk Center “Cassiopeia”) will come to Voronezh and will conduct training in regressive hypnosis. By the way, you can watch a video on regressive hypnosis on our main channel “Cassiopeia” with Irina in the near future, it should be released tomorrow or the day after tomorrow, and you will understand everything yourself.

Interesting composition of the tea: specially dried carrots, turmeric - in general, a very interesting composition. You can familiarize yourself with this composition by clicking on the link below this video, in the descriptive part, to understand what it is.

I'll continue. Regressive hypnosis training. There was a conference with LiShioni, very interesting, it will now be released on our channel in the near future. You will see and feel everything there yourself. We do not shy away from regressive hypnosis; there are very highly qualified masters in the Cassiopeia project. Therefore, we are waiting for you all to attend training. The link to record is also in the descriptive part, under this video.

I have provided a link under this video, where you can get acquainted with all the subprojects of Cassiopeia, with all the sites, chats, and calculations. There is a single multi-link, it’s Taplink’s. You can follow this link and get acquainted with our entire project, subscribe to chats, participate in various discussions and debates. We have very interesting debates in our chats, very interesting people join us - ufologists, regressologists, tarologists. The chats are filled with life, you can participate in the life of the Cassiopeia project.

Let's move on to the most important thing. Today we have a live broadcast with Matrona of Moscow, with blessed Matrona. I want to invite, as always, our Scarlet Flower, our Gold of the Party, as I call her - Irina. Irishka, have a seat!

Irina: Hello, dear friends, hello everyone!

Maxim: Hello everyone.

Irina: What can I say. Very interesting. It is now clear to me that all this is not accidental: so

that you learn about this channel too. Because I specifically looked and checked: our main channel did not receive any warnings, and not a single video was blocked there.

Maxim: By the way, they write to us, Irina, remember, at retreats we teach how to make wishes correctly, and we give out special magic bracelets. I have a lot of feedback about fulfilled wishes. And even here there is a person in the chat who has made this wish come true. Guys, go ahead, come to the retreats!

I forgot to tell you the interesting news that Irina no longer accepts appointments in the general queue. Irina now accepts and conducts personal receptions only for those who come and study at retreats. I believe that the first priority is to give a personal reception to those people who have undergone at least some minimal training and already understand what it is. So that you can drive other people.

Yes, I warmed a chair for Irina. Irina, did I at least warm up a chair for you?

Irina: Yes, the heating was turned off in August, although the chair was heated.

Maxim: Guys, I forgot to show you, I'll show you now. We were in the Temple of All Religions. Look what they gave us (the caretaker of the Temple who is there). This is Saint Matrona. And precisely because we were given this icon, it seems to me that we were even given permission to broadcast with it.

This is Kazan, the Temple of all religions. This is the most wonderful place! I definitely recommend everyone to go there. There is the caretaker of the Temple - he paints the icons himself, he completely creates the entire Temple. There are different religions gathered there. In general, cool, cool!

Irina: Thank you all! Hello, Novosibirsk! He writes that he was on a retreat. Congratulations, Nadezhda, that you have your own apartment!

Maxim: Could you make such wishes? Nadyusha, I congratulate you on your apartment. Congratulations to everyone who had their wish come true with magic bracelets! We are waiting for you at our retreats. We will tell you the technique for making any desire come true.

Irina: "Where can I buy bracelets?"

Maxim: You can only take the bracelet at the retreat. We hand them out there and tell them what to do with them, with these magic bracelets. We give them there.

Matrona, I greet you!

14:48 Introduction of participants.

Irina: Hello, dear friends, I am a contactee with extraterrestrial civilizations, and I also have work such as contact with the Spiritual world. And today is just one of those sessions. At your numerous requests, we invited the Spirit of a man to come to us, who was known in his last incarnation on Earth as Matrona of Moscow. She will now tell about herself. She is also waiting to communicate with you, and is very glad that we have found such an opportunity.

She says: “I greet you, my dear children of God! And indeed, if this video is shown not on the main channel, but on an additional one, this is a sign for you to pay special attention to this channel. This means there are a lot of videos here that are useful for the Soul.”

Maxim: We conduct live broadcasts here, we have “Cassiopeia Meditations”. We conduct very interesting live broadcasts here.

Matrona, please tell me how I can contact you?

Irina: Matryona.

Maxim: Matryona, right?

Irina: Yes, you can call it that way.

16:30 Spirit of Matrona about her spiritual level.

Maxim: Matryona, please tell me, what spiritual level are you at now?

Irina: 21.

Maxim: Twenty-first spiritual level?

Irina: Yes.

Maxim: Can you describe what is happening around you at this level? How do you feel there? What do you see, how are you there, where are you there?

Irina: I am not alone, but with other Angels. Together we mentally built a house (shows a house that looks more like a white temple with domes, there is Light inside it, they create objects, they can create images similar to icons of saints, but these are not icons of saints, but

mental images that are needed in order to with their help to communicate with Spirits on other levels). I communicate with other Angels, and meet and accompany them to the embodiment of Spirits. This is my ministry now.

Maxim: Thank you, Matryona.

17:43 Spirit of Matrona about incarnations on Earth.

Maxim: Please tell me, have you had any other significant incarnations on our planet?

Irina: Significant for my spiritual development and awareness of the Divine Light within myself?

Maxim: Yes.

Irina: There was an incarnation into Veronica, which took place during the time of Jesus Christ.

Maxim: Veronica? And who is it?

Irina: This is the woman in whose body I was embodied. She received healing from Jesus Christ from a serious illness (shows a picture of how it happened).

Maxim: Interesting. I understand. Tell me, please, did you have any other incarnations after leaving planet Earth?

Irina: Before the incarnation of the woman we are talking about now, before my last incarnation, I had an incarnation on Earth, at the ninth density level.

Maxim: Is this an earthly plasmoid?

Irina: Yes.

Maxim: What were you doing?

Irina: I was working on the correct ratio of soil particles, this is the work of the Spirit of the Earth.

Maxim: Thank you. Tell me, please, before this, what kind of incarnation did you have, where did you incarnate?

Irina: Before incarnating into a plasmoid, I incarnated not in the Milky Way Galaxy, but in a Galaxy that is fifteen million years away from it, in a young civilization. I was there, speaking in earthly language, the main priestess of the temple, who managed the sacrifices to the gods.

Maxim: How interesting.

Irina: Shows some creatures with long elongated faces, dark green in color, with long fingers that curl up.

Maxim: Interesting.

Irina: This is not in our Galaxy.

Maxim: It's clear, they don't relate in any way to our Interstellar Union, to our friends?

Irina: No, they don't even know about your Galaxy. Moreover, at the time when I incarnated there, there were no physical space flights yet.

Maxim: They ask: "Matrona, please clarify, is Veronica even in the Bible, is she mentioned somehow?"

Irina: Yes, it is mentioned how the one who approached the Lord Jesus Christ, touched His clothes and received healing. I am the woman to whom Christ said that "my faith has saved me." I am the Soul who heard from the Teacher that my faith saved me.

Maxim: Thank you.

21:03 The Spirit of Matrona about the date of birth on Earth and the cause of blindness.

Maxim: Matrona, please tell me, there are versions that you were born in 1881 or 1883. In what year were you born as Matrona?

Irina: I was born in early November 1885.

Maxim: 1885?

Irina: So I saw the number, it shows "five" at the end.

Maxim: Oh, how interesting! It's even strange. Matrona, please tell me, how did you become blind?

Irina: I haven't seen the physical world in this body since birth.

Maxim: Were you already born blind?

Irina: My body was born, and it did not actually have a visual apparatus.

Maxim: Tell me, please, was this incarnation chosen by you, yourself?

Irina: There was such an option. This happened due to the fact that my energies as a Spirit, which was in the embodiment of a subtle-material being for a long time, could not tune in to the visual apparatus of the physical body, due to some incompatibility with the etheric and astral fields of the mother.

Maxim: Please tell me, is there any spiritual reason for your blindness? I understand that the etheric matrices did not combine, but there must be some kind of spiritual reason?

Irina: The spiritual reason for my choice of such an incarnation, do you mean? With such a probability?

Maxim: Not your choice. And when you were already born blind, does it turn out that there is some kind of spiritual reason for the fact that you were born blind?

Irina: I was born physically blind, knowing that such a possibility existed, but it was not one hundred percent (Shows that there was a chance that everything would be fine with your vision). But I knew about this possibility.

The spiritual reason for my choice to incarnate in such a body, my life's task of incarnation was to show people by my example how to help people in a body of this type, and to protect them from despondency. Even those who see with both eyes, but at the same time do not want to change anything in themselves and in others. An example is this.

Maxim: I understand.

24:06 The Spirit of Matrona about her healing gift, about curators.

Maxim: Tell me, please, how did your healing gift and the gift of predicting the future appear?

Irina: He was with me from birth, strengthened in me by a part of my spiritual Higher essence that did not enter the body. And it was also strengthened by contact with those subtle-material beings who accompanied me in the physical world and were, as you say, my relatives in that subtle-material world from which I came out of incarnation before being born in a physical body. They were with me, surrounded me, my cradle and gave me energy (shows different flows of energy). And these energies had healing properties.

This has been the case since birth. And when I became a teenager, other subtle beings also came - from other planets, from other stars (shows that from other stars), from the Sun. And a little later I began to consciously communicate with Archangel Michael.

Maxim: Are your curators and mentors subtle-material entities on earth, subtle-material entities from different star systems? From the Spiritual world did you communicate with Archangel Michael?

Irina: Yes, I talked to him. And she also talked, this was later, when she was an adult (she shows the icon: Theotokos, she communicates with her).

26:10 Spirit of Matrona about the vision of people and the world.

Maxim: Listen, please tell me, how did you even see the world when you were born blind? Did you look at people with your hands? Have you seen people in general, what they look like?

Irina: Not physically.

Maxim: Energy?

Irina: I saw (shows an image: an image of an object or person appears in her head, but it is not like a physical object, but like a colored spot or crystal, from which thorns or thorns stick out like thorns - energy channels look like that).

She saw subtle bodies. Shows the images that she saw.

For example, I could see a flying bird as a ball. It was not in the eyes that the image appeared, but in the mind (shows a flying egg-shaped ball, it shimmered with some kind of (I won't name that color) light green, closer to yellow, and pulsated).

Maxim: It turns out that, without seeing since childhood, you have seen on the energy level, do I understand correctly?

Irina: Yes, this is how my Soul adapted to life in this world without the possibility of vision. Because from birth I did not know the images that could be "imprinted" in my eyes.

28:03 Spirit of Matrona about the healing process.

Maxim: Listen, you were involved in getting rid of various diseases. What did illnesses look like on the energy level when the person arrived?

Irina: Like dark spots. I saw their spiritual reasons (shows) - what they wanted to hide. I saw it as dark spots that distort the physical body - their sins: sinful will, desires, and thoughts.

Maxim: Listen, please tell me, how did you get rid of these dark spots then? Can you describe the image of how you got rid of these stains, and how the person later did not get these stains back?

Irina: At that time, at my level of awareness, explain it, or how do I understand it now? How did I understand then?

Maxim: How did you understand this then?

Irina: I understood that I was praying for the salvation of a person's Soul - that his illness would serve him for the good of his Soul, or that it would be healed if it was not for the good of his Soul. It was a prayer. I believed that everything was from God, even illnesses. Nothing can come from God, because the whole world is filled with his Spirit. The Holy Spirit permeates every cell of the body, and if a disease has developed there, then this is a sign for a person that he has fallen away from the Holy Spirit. That's how I understood it then.

Maxim: And when you delivered them from illness, how did you return them to this Holy Spirit?

Irina: I prayed to God to send His Holy Spirit and heal. This was such a prayer. When I prayed, I imagined these dark spots disappearing.

Maxim: I see. The prayer had an effect on some, but on others it did not, do I understand correctly?

Irina: If a person corrected his life and strived for God, then these energies (as you now say, "Spirit"; I said "Soul, Spirit", you say "energies"), they restored his body. And if not, then it could even get worse for him - from incompatibility.

Maxim: Tell me, please, how do you now see this action at the level where you are in the Spiritual world? What's happened?

Irina: And now I see that in this prayer, when I turned, and in this healing, I was not the only one acting, but four parties were acting at once: myself, the Soul of the patient, the subtle-

material essence that is around us, and Archangel Michael as a representative of the Heavenly Father. He is endowed with His energy, Divine. He is the closest from level 24.

Maxim: This is such a harmonious, multifaceted work from all sides, right?

Irina: All this work was carried out by energies, four sides: four sides of the cross, and in the middle was this disease. And, if all four sides came to harmony with each other, then the disease was healed.

Maxim: Thank you, Matryonushka.

32:17 The Spirit of Matrona about predictions of the future.

Maxim: Tell me, please, how did you predict the future?

Irina: I had visions, it was not in the body.

Maxim: What about?

Irina: When I left my body (shows how a bird with white wings, similar to an Angel, rises from her head, looks: the room, then the room disappears, turns into white light). And I understood that the Holy Spirit was lifting me into the Kingdom of Heaven (at the level of understanding). I thanked God for this.

Shows. It conveys images very well, even conveys sensations.

Maxim: I think so.

Irina: Smiling. He says: “Yes, imaginative thinking is very developed, by the way. This is because I spent my last life without physical impressions, so my images are very vivid.”

Maxim: I understand, Matrona.

Irina: I replaced it, my physical reality. Therefore, this ability remains now (shows how she ascended to the Kingdom of Heaven, how the Angels sang there, stood with trumpets, Archangel Michael was nearby). And I turned to him or to God, simply to Jesus Christ - with a request to reveal to me the fate of a person or the fate of a people. Most often, Archangel Michael shook his finger and said: “You worry about vanity!”

Maxim: Are you worried about vanity?

Irina: Shows how she looks at him, and he is such a young man, he has huge wings, and everything shines.

Maxim: A young man, huge wings and everything sparkles, right? What's your height?

Irina: She stands in front of him and reaches up to his chest. High.

Maxim: It turns out he came in this way, right?

Irina: Yes, and when I freed myself from the shackles of the flesh, he took me by the hand, and we flew towards the Light, into the Kingdom of Heaven. And I asked him not to bring me back. And he said that it was “not the time” for the death of my body, that they were waiting for me on Earth, and brought me back. And when I asked him about the future, he shook his finger and said: “Again, Matryona, you are worrying about vanity!”

And I asked him with tears to reveal this to me, to help people change, if possible, if by the will of God, a future that could bring suffering. I wanted all people to be happy, so I asked him for it. And he told me: “Turn around.” I turned around, and in a huge cloud of white light, which was even painful for my eyes to look at, I saw images of the future appear.

Maxim: Did you convey these images to the person?

Irina: I looked at them with all my eyes, as if I was transported there myself. And then she came into the body, accompanied by Archangel Michael, immediately remembered and began to tell. But now I understand that I forgot a lot and did not transfer everything, not all the information.

Maxim: Thank you, Matrona! Tell me, please, but now, at the level where you are, do you still have the ability to look into the future?

Irina: Yes, I can look at the Time Tape.

36:54 The Spirit of Matrona about her immobility and levels in the Spiritual world.

Maxim: Great, then at the end of the broadcast I will ask a very interesting couple of questions that will relate specifically to our future. But that will come later.

Please tell me, was there a situation in your life when your legs gave out and you even stopped walking. But this situation was not easy. You were in church and said that you would walk past some woman, and this woman would influence you, but your legs would give out. Was it really like that?

Irina: No, it wasn’t like that.

Maxim: How was it, what kind of situation was this?

Irina: It was not in church, but after church, after visiting the temple.

Once again, after visiting the temple, in which I prayed to the Lord for the healing of the people who came to me (shows a line of people), I also asked to soften the hearts of my parents: they disapproved of my activities, not to mention classes, but to the fact that people go. This irritated them. And when I prayed, at that moment I allowed in my heart a feeling of pride towards my parents, that they could not - that through their prayers healing was not accomplished, but through mine it was.

Maxim: Was there jealousy?

Irina: I had such a thought, and instead of driving it away, I lingered on it - that they are not worthy to forbid me anything in my life, because they do not have such spiritual gifts. This thought just flashed by, but I lingered on it, and my heart liked it. But I didn’t understand it then, didn’t notice it, didn’t realize it. And when I came home, came on my own feet, went to bed, I received consolation from the Holy Spirit. And the next morning I couldn’t get up.

And when I began to pray to God to get up, I fell into a state of unconsciousness, like a doze, and saw that Archangel Michael came down to me through the ceiling and said that you will have more humility when you need the care of other people. It is in the care of other people who will help you. That's how I lost the ability to move on my own. And people came to me. And if I needed to move somewhere, they carried me in their arms.

Maxim: Somehow harsh.

Irina: No, if this had not happened, there was a high probability that that thought would have sunk deeper into my heart and turned into a feeling of spiritual pride. Which would reset all my achievements, and I wouldn't be at level 21 now.

Maxim: Thank you, I understand.

Irina: After leaving the incarnation, when I found out about this, connecting with my main part of the Light and talking with Heavenly Father (he showed me all the options for my life), I thanked Him with all my Soul and with spiritual tears for this mercy that He sent to me in connection with the deprivation of physical movements. Deprivation of physical movements helped me significantly increase my spiritual level: from the eighth level, from which I incarnated, I went to the 21st.

42:00 The Spirit of Matrona about her contactees.

Maxim: Thank you, Matryona. So people ask: have you had physical contact with extraterrestrial civilizations?

Irina: No, it wasn't.

Maxim: It wasn't, right? How to determine that you are the curator of a person on this planet? People ask, they say that you supervise some contactees. How to determine what exactly you are?

Irina: I have my wards. I, like an Angel, come to them and show them the image of my past body so that they recognize me, if they know me, of course. I supervise a few people; I have 125 contactees on Earth. These are mainly healers who engage in spiritual healing, and there are also doctors who conduct ascetic activities among the sick. This activity is related to helping patients, regardless of their social, financial and any other situation.

43:18 The Spirit of Matrona to help those who pray.

Maxim: Thank you. Tell me, please, are you now following our Christian religious egregor?

Irina: Yes, I am in that part of it that is in the world of disembodied Spirits, because in the churches of the Orthodox Church prayers are offered to me, and it all goes through the egregor. These prayers in the form of information and in the form of energies come through the egregor to me. This, in turn, strengthens the egregor itself with light energies. And this makes my heart happy, because I understand that every prayer is an increase in the spiritual qualities, or, as you say, the vibrations of the person who does it sincerely, with Soul, with Love. But I am not happy with the prayers of those people who are looking for me simply as a means of physical healing, but do not change their lives.

Maxim: Please tell me, do you hear everyone who prays to you?

Irina: This cannot be called a rumor, I feel it. Yes, everyone (images in front of her pass of those who are standing in prayer).

Maxim: And you help everyone, who prays to you?

Irina: Yes, I help everyone, but in different ways, depending on what a person actually needs. And a person may need something he doesn't even think about. And what he thinks about can be harmful to him.

Maxim: You said that people should come to your grave, so that you could hear them, and pray at your grave. In order for you to hear them, do you only have to come to the grave?

Irina: That's how I understood it then. In our village, where we lived, my parents, and brothers, and all relatives and friends went to the graves of their ancestors. And I understood that the Souls of the dead heard there - because through the place where the body lies, it is easier for the Souls to hear the living.

Once here, I understand that the main thing is not the location, but the

mood of the heart for those spiritual energies, for those spiritual vibrations that I have. If you become like me in my worldview, character, and love me and pray to me, then our spiritual hearts will unite, no matter where you are. Because the Spiritual world is limitless, it does not have a specific location in the physical world. It's like air that occupies the entire room. At the same time, the room is precisely all parts of the material world.

And the material world, like this, is surrounded and permeated by the Spiritual world. And all the Spirits that are in the Spiritual world, one might say, according to your materialistic, material perception, will instantly be near you when you tune in to them. They don't end up there, it's you who tune in to them.

47:30 Spirit of Matrona about personal relationships.

Maxim: Thank you. Tell me, please, did you have any man who loved you, and whom you loved?

Irina: What kind of love do you understand?

Maxim: Spiritual and, probably, physical.

Irina (Matrona): I didn't have physical contacts with men, but spiritual contacts, yes. I had spiritual brothers and sisters who loved me and whom I loved, and we prayed for each other. But there were also many who only needed a miracle from me. But they could not love anyone, because in their hearts there was a piece of ice instead of the fire of Love.

Maxim: I understand. Since we are talking about brothers, there is a question, how did you react to the fact that your brother betrayed you? Brother!

Irina: Are you talking about Mikhail?

Maxim: Yes.

Irina: I forgave him. He did this because he believed Lenin, and Dzerzhinsky, and Plekhanov, and not God.

Maxim: It was such a time then.

Irina (Matrona): I forgave him, and we met here.

Maxim: What level is he at?

Irina (Matrona): On the fifteenth now.

Maxim: Great. And what did he say to you when we met?

Irina: He (shows a picture) fell at my feet and said: “Angel, forgive me for depriving you of my care and kicking you out of the house! I was afraid that I would be shot because of you, and the fear for my physical body overcame my Love for you.”

49:50 Spirit of Matrona about relations with the state.

Maxim: Were you persecuted at that time?

Irina: Yes, they wanted to send me to an institution for sick people and lock me away from all visitors. It’s like going to a hospital, but it’s not a hospital, but where they are guarded.

Maxim: Why didn’t it work?

Irina: Because it was not pleasing to God. God stopped them.

I remember a young man (shows his image, but she already perceived this image after leaving the incarnation). And then I saw him as just a small speck of Light, surrounded by a huge black clot of anger, fear

and disappointment. It was a policeman, your law enforcement officer. Not a policeman, but who were there then – a commissar.

This was already in Moscow, when I was in Moscow, before the war with the Germans. And he came and went into the apartment where I lived with good people. And I understood that if he took me now, they too were doomed. Perhaps to prison, perhaps to execution, as an unreliable element of society. And they had children, they were doomed to an orphanage and to the development of their Soul in conditions of the malice of the state and disappointment in God.

So when he came in, I wasn't afraid for myself. I prayed to God that He would not allow the little Souls, who were not guilty of anything before me or before Him, to be violated. And it was a heartfelt prayer, but very, very deep, and in a moment a lot of thoughts flew before me. And the last word that I mentally said to God then: "Take me, if you want, to yourself, but don't let injustice happen, cruelty against innocent children. They love you after all. I told them about You." "Don't let your justice be violated, God!" – I said so in my heart.

When I said that, a vision appeared before me. I saw a circle of Light (shows a person - she saw it as a circle of Light, because she did not know the images of what people look like). I realized that this circle of Light is related to the person who entered me. I asked the Lord what this vision meant. Thoughts came to me: "Speak, just allow yourself to speak, and the Holy Spirit will speak through you." I allowed myself to say whatever I wanted, and I was surprised to hear my lips say in relation to that man: "Go and save your wife! I'm not going anywhere from you. I'm sitting on the bed without legs. Go and save your wife before it's too late!" He left and never returned.

Only after leaving the incarnation did I know, the Holy Spirit revealed to me, that his wife was in danger of fire and death in her house at the moment when her husband came to me. And when he came home, he saw that a kerosene lamp had overturned, and his wife was lying on the bed in her sleep, and the fire was already approaching her. Suffocated in smoke. And he took her to the hospital and saved her. And when he came to work the next day and was told to pick me up, he refused to do so, and he was fired for it, and then subsequently sent to prison. But no one else was sent to my apartment.

56:18 Prayer connection of the Matrona Spirit with Maxim and Irina.

Maxim: Yes, Matronushka, by the way, I read: a lot of people thank you for your help. And I also want to thank you personally, because I also prayed to you when I was very sick. And I felt that you were helping me.

Irina: I recognized you, and did you recognize me?

Maxim: Of course.

Irina: You and I also met.

Shows how you are in a state outside the body, and along some wide corridor, a dark corridor, and a white figure is walking towards you.

This was while you were sleeping.

Maxim: I prayed to you a lot.

Irina: She now shows that you had contact.

Yes, by the way, I prayed to you too. When I went to the Orthodox Church, I remember that I was asked to participate in the reading of the akathist to you.

I once came to church (I was then, I don't know, twenty years old) for a holiday, and one grandmother asked me to participate in the reading of an akathist for her sick granddaughter: she got sick and ended up in the hospital. And we all read the akathist together in church - there were about fifteen people there, I don't remember who now. We all read aloud together, prayed, and then she told us that a few days later her granddaughter was discharged from the hospital, and that even the doctors themselves did not expect it. It was like that, yes.

Maxim: Thank you very much, Matryonushka!

Dear friends, be sure to subscribe to this channel later, the link will be below. When we transfer this video to our main channel, the link to this channel, where we can and will conduct live broadcasts, will be under this video.

Thank you very much!

Irina: Thank you.

58:33 Spirit of Matrona about canonization.

Maxim: Matronushka, please tell me, John of Kronstadt called you his successor, the eighth pillar of Russia. What does it mean?

Irina (Matrona): We later communicated with him when he left for the Spiritual World. He saw an Angel in me, and saw the version of the future that is happening now - about Christian church veneration. That the queues for my body, which is now in Moscow, will not stop for many years.

Maxim: I understand. Please tell me, do you think exhuming your body and transferring your body to a silver coffin is normal?

Irina: In the tradition in which this happens, yes, this is a sign of recognition that the grace of the Holy Spirit spreads through my body, as through a holy person. My prayers for people were recognized by the Higher Church Commission for Canonization.

This did not happen by chance, but because our Lord Jesus Christ, who is the true Head of the Church (not the church as an organization, but the Spiritual family, the Heavenly Church, the so-called, or, as you call it, egregor), He approved my canonization as a means so that people's faith increases, and not just in me or in Christ, but in themselves. Because only those who truly believe in this are healed, and, as I already said, change their lives.

1:01:07 Spirit of Matrona about the essence of healing.

Maxim: Thank you. Is it true that when you were healthy and alive, you received 40 people a day?

Irina: I actually read the akathist not to Maxim, but to Matrona. I talked about this. I just turned to Matrona.

Maxim: It’s too early for me to read Akathists.

Irina: Question again.

Maxim: Is it true that you received forty people a day and healed them?

Irina: There have been more. They knocked on the door and window, even when everyone was going to bed in our small shack.

Maxim: Thank you. So people ask, what does it mean if you yourself come in a dream and show your image?

Irina (Matrona): It could be me, or it could be another of your curators and teachers who took my image so that it would be easier to communicate with you through the images of your consciousness.

Maxim: Thank you. Does the chapel at your grave have healing powers?

Irina: It is not material objects that have healing power, but the spiritual values and meanings that people put into them. Matter is only a conductor of the Spirit. If you start to think the other way around, then matter attracts the Spirit, and automatically an anti-Christian, anti-spiritual system of priorities develops in your consciousness, in which the Spirit is controlled by matter, and is not its owner, manager, filling with grace.

Maxim: Matronushka, now even on air a huge number of people are contacting you.

Irina: (Matrona) I feel it now from the screen, through Irina, through the contactee, who, by the way, incarnated from the level where I am now, and in the Spiritual world we communicated, were on the same level. And now through her I am sending you the Light of my Soul and I feel how she also sends you the Light of her Soul, and Maxim also sends it.

Maxim: Listen, I just remembered! I just read a message that you loved fresh flowers. And I picked a huge beautiful bouquet for you in a flower shop when I went to you to pray. I remember now, this is a beautiful bouquet of different, different, different, different flowers, and something else. That's right, I even have photos of this bouquet on my phone, I've photographed it for the rest of my life.

Irina: (Matrona) Interesting (smiles). I felt your Soul blossom!

Maxim: Now, I saved it for the rest of my life, here it is.

Irina: Wow, how beautiful!

Maxim: I saved it. It was December 24, 2014, I kept it forever because I collected it and loved it.

Irina: (Matrona) When you were picking flowers, did you think that we would communicate with you?

1:04:49 Spirit of Matrona about Stalin's condition at the beginning of the war.

Maxim: No, I didn't even think about this at all. What an interesting thing!

Further. There were persecutions, we have already passed this point. Tell me, please, is it true that Stalin himself personally came to you?

Irina: No, he didn't come, I came to him, and then without a body.

Maxim: Didn't you come in person?

Irina: Archangel Michael and I visited him. He was very afraid when the war started. They were in his spiritual space.

Maxim: They say that Hitler came to you.

Irina: No. We have not met.

Maxim: Thank you very much. There is a version that representatives of the Russian Orthodox Church made a lot of money from you. Such as the family of Mother Superior Feofania. Was there such a thing?

Irina: Abbess is the abbess of the monastery. I really love the monastery and its servants, where my body lies. This is a very bright space.

Did you earn it? I believe that they made money not from me, but from what they themselves did: from the fact that they told people about me, from the fact that they even prayed. This is not "earning money", but an exchange of energies, as you say. The grace that was given is a natural consequence of their prayers.

She doesn't consider it "earning money" and was even a little surprised now.

1:07:18 Spirit of Matrona about the reasons for recovery.

Maxim: I'm sitting and I have this bouquet in my head, and I think: "How did I forget about it?!"

Irina: She says: “You mentally gave it to me just now.”

Maxim: How did I forget about him? My health was really very bad. I no longer knew who to turn to. I remember that after this treatment I immediately felt that I was getting better.

Irina: Because you were ready to change.

Maxim: Yes, even then I was ready to change.

Irina: And the willingness to change in you was caused precisely by the illness that you had.

1:07:52 The Spirit of Matrona about the tasks of her incarnation.

Maxim: That's right. Tell me, please, what kind of tasks did you have on this Earth, and did you fulfill your tasks?

Irina: I planned to rise from the eighth level to the fifteenth, this was the plan I assigned myself.

When we go to incarnation, we create for ourselves a chain of events that we must go through, and the result that we must achieve in order to reach the goal for which we conceived all this in the first place. And I had the number of levels that I planned to go through, seven. And I went further, got to the twenty-first level. So yes, I fulfilled the purpose of my incarnation and accomplished more than I planned.

But I did not do this myself, but only thanks to the help of God and the help of every person who met along my path, and, of course, the help of my curators and mentors, Archangel Michael. And thanks to the help of all my enemies who persecuted me and wanted to harm me. This is also their help: their actions helped me begin to pray for them and develop unconditional Love in myself, regardless of their attitude towards me, and this also increased my level.

1:09:50 Spirit of Matrona about a single faith and freedom of the Spirit.

Maxim: Matrona, please tell me, will there come a time on Earth when there will be a single faith on the entire planet?

Irina: Should I see the future?

Maxim: I have more questions for you about the future.

Irina: United faith? There is such a possibility, but only if a system of mind control is introduced on your planet.

Maxim: From consciousness or behind consciousness?

Irina: Mind control.

Maxim: Oh, why do you need this then!

Irina: Faith is a matter of the heart, and it is different for you, because there are different Souls and different tasks for the Souls. In order for there to be a single faith, it is necessary to change either the Souls that come here (and then there will be no need for incarnation here at all, as a springboard for development), or it is necessary to change the body through which the Soul manifests itself.

How can you change your body so that everyone has the same faith? By changing the characteristics of the physical brain through which consciousness manifests itself, so that those thoughts that come from the Soul are inaccessible to cognition through the brain. It is quite possible. There are civilizations in the Universe that achieve this using different methods - electronic, chemical, their combination and energy. But the freedom of the Spirit is suppressed there until it leaves incarnation.

1:11:47 Spirit of Matrona about the end of the Russian-Ukrainian conflict.

Maxim: I understand, I don’t want a single faith then. Can you say when hostilities between Russia and Ukraine will end?

Irina: When will hostilities between Russia and Ukraine end? I need to look into the Timeline, to do this I need to redirect my consciousness from the material world to the spiritual one. It will take some time.

Maxim: Guys, the broadcast is on, don’t worry, it’s not frozen.

Irina: We're waiting for her to look.

Maxim: Yes, otherwise they will say: “The broadcast is frozen.”

Irina: She shows me images: a huge tree with branches coming out of it. And these twigs are not just twigs, they seem to have pictures drawn on them that change quickly. She looks there. He says: “It is very difficult to record changes on the Time Tape to physical time, which is indicated in years, months and days. Because there are no such indicators written on the Time Tape. There is no such calendar."

Maxim: Guys, it doesn’t matter - “Matrona” is written on the icons, she asked to be called “Matrona”. I think that she is not offended by “Matrona” either.

Tell me, please, Matryona, if they call you “Matrona,” is there nothing terrible about that?

Irina: No, you can call her “Matrona” if you want.

Maxim: So there is no distortion in this?

Irina: She smiles and says: “If the Angels paid attention to one letter in the name, we would not only have wars in the angelic world, but we would not be able to exist there at all.”

Maxim: I understand, thank you, Matryona. Tell me, please, about the end of hostilities between Russia and Ukraine?

Irina: She looks now and says: “I see this ending.” But it must fix it, and there is not one ending option, but twenty-two options at this point in time in which we are now. This day, the situation there has not yet changed.

If we record the moment, there are now twenty-two options for ending this conflict. They are all different, with different consequences and in different time frames. If we talk about the most likely...

Maxim: At this moment in time, here and now.

Irina: At this point in time, here and now, the cessation of the military conflict (by cessation I mean not just a temporary truce, but a complete cessation of any aggressive actions on both sides), if we talk about such a cessation, then I see the most likely thing for the present the point in time is mid-March 2023. This is a complete cessation, perhaps a truce, and then a resumption again.

Maxim: And then resume again?

Irina: Truce, renewal, but in March 23rd a complete cessation.

But you can bring this date closer or further by your actions. People who are incarnated in these countries can influence the process. First of all, they can change it, and secondly, Spirits embodied in other countries, if they want, can also change it with their actions.

You can bring this date closer. In order for you to get closer, you need to continue your actions. I have already heard from other Angels, from Archangel Michael (I communicate with him, he comes to me on the 21st level), and I know that on your channel spiritual actions are carried out, which you call meditations, about the direction of the “image of the world”. Now, if you continue to do this all together, if there are more such people, their number will increase - there is a great chance to bring this date closer along the Timeline. And if you

spread anger and hatred in these two countries, among the people of these countries, there is a possibility that it will become distant. Everything depends on the choice.

Maxim: Thank you Matronushka!

Irina and I will talk now, the next meditation we will probably conduct is for peace, for the end of the war in the near future in the Telegram chat, on the YouTube channel. We will take a look and give you an informational message. Can you be nearby and help Irina create a field for prayer?

Irina: Yes, of course. I will also ask Archangel Michael, as well as the Mother of God, as the curator of the Russian egregor, and Olga and Vladimir, as the curators of the Ukrainian egregor, as well as Archangel Metatron, as the curator of the American egregor and, in general, the Lord of karma of the Milky Way Galaxy. I can ask them to attend this meditation, in our common spiritual space, and direct the Light to heal this difficult situation in the hearts of people first of all.

Maxim: When do we have meditations, on Fridays?

Irina: Yes.

Maxim: On Friday we will do meditation.

Irina: If you want, I can do it.

1:19:25 Spirit of Matrona about future incarnations and personal communication with God.

Maxim: Yes, I think: I want it, and many people want it. Tell me, please, you are now in the Spiritual world, you are not embodied, right?

Irina: No.

Maxim: If you wanted to incarnate, where would you incarnate?

Irina: On my beloved Earth.

Maxim: Really, on your beloved Earth? On no other planet, only on Earth?

Irina: Yes, I really love the Earth and I really love this world and the people who live here, and I really love Demeter, who is the patron of the Earth in the subtle world, the world of energies. We communicate with her too. I would choose to incarnate on Earth. But if God, my Heavenly Father, through my Consulting Angels or Himself, tells me that my presence is necessary on some other planet or in another world, I am ready for it. I will fulfill His will, because I understand that I am a part, and without the whole I am just an atom, I cannot exist, I will lose myself as a person.

Maxim: I want to ask you. You said: God either through Consulting Angels or personally. What does God's personal conversion mean?

Irina: This is mental contact with Him, when you ask Heavenly Father - He reveals His will to you. Any Spirit is capable of this, not just an Angel. If you sincerely turn to God, He will reveal His will. And through the Consulting Angels, this means that the words of the Consulting Angels agree with the will of God; after all, they are specially trained, if you can call it that in an earthly way, in order to convey the will of God specifically in matters of incarnation.

1:21:45 Appeal of the Matrona Spirit to people.

Maxim: Matronushka, we are already approaching the end of the broadcast, I would like to ask you to address the people who are watching us. What would you like to say from the Spiritual world to the people on this planet who are watching us?

Irina: Thank you for this opportunity.

My dear brothers and sisters, I love you all very much. Despite the fact that I was a believer in God on Earth, I was still afraid of physical death in my soul. The unknown scared me. What scared me most was that I would find myself unworthy of the Kingdom of Heaven.

I am addressing you from here. This is real life here. Here you understand many things, states and meanings that passed by the mind in the earthly world. So I ask you to love everyone, every person you meet along the way. And don't judge anyone hastily. While you are in the body, you cannot look into the heart of another person and find out his true desires and intentions. Condemnation, irritation and anger - they will cause you suffering due to distance from Divine Grace.

I wish you happiness, spiritual growth and the fulfillment of all your bright desires, of course. I wish you all healing of your physical and mental ailments, and most importantly, healing of the sinful nature of your hearts, which do not allow you to merge with God in a single will and consciousness.

Maxim: Thank you, Matryona!

Guys, I want to remind you to watch the broadcast from the very beginning. Below this video, in the descriptive part, there are a very large number of links: you can pre-order the book, visit a healing retreat in Samara on the Zhiguli Mountains, order OM tea and probiotics, learn regressive hypnosis at the Voronezh center.

No, it’s still too early for the retreat in Nalchik, but there is already information.

And there is a link to all our projects, it’s called a “multi-link” - using it you can find chats, information, and not lose us. And under this video there will be a link to our channel, where we are currently broadcasting live.

Subscribe, like, share this video! Let's not give Youtube the opportunity to block us until the end, because live broadcasts on the main channel were blocked for us.

See you again! Hugs to everyone, a huge hello to everyone! We'll definitely see you at the retreats!

Irina: Thank you everyone. See you again!

Maxim: Bye everyone.

Conference participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Maxim Rusan - head of the CASSIOPEA project and the Center for Spiritual and Physical Development;

Disembodied Spirit of the Holy Venerable Matrona of Moscow.

#484 Regressive Hypnosis. Reincarnation, healing of psychological trauma, fullness of life.

---

https://blog.cassiopeia.center/regressivnyj-gipnoz-reinkarnaciya-iscelenie-psihol
https://www.youtube.com/watch?v=IGI9FxW8s7A

00:00 Start of video.

00:18 Background.

Voice-over: In the summer of 1999, a 13-year-old girl Irina Podzorova from the village of Peski near Voronezh agreed to take a short trip on a triangular-shaped ship with aliens from the constellation Cassiopeia.

Since then, for more than 20 years, representatives of the civilizations of the Interstellar Union of our Galaxy, which includes 116 of the 727 intelligent races present in it, have regularly come into contact with it.

01:15 Information range of contactee I. Podzorova.

01:52 Introduction of participants.

Irina: Hello, dear friends! My name is Irina Podzorova, I am a contactee with extraterrestrial civilizations, and today our curator, a specialist in astral interactions from the planet Shimor, whose name is LiShioni, is present with us. Today we will talk about a very interesting and important science called regressology. This is esoteric science. I present to you a regressologist and psychologist, the head of the Novosibirsk Cassiopeia Center, Irina Arsenyeva.

Irina Arsenyeva: Hello everyone! LiShioni, thank you for coming to the meeting.

Irina: So, Irina, do you have any questions? Introduce yourself and tell us about yourself.

Irina Arsenyeva: Okay. I have been working as a psychologist and psychotherapist for more than eight years and I realized that sometimes we need methods that can reach deeper into some kind of trauma. Because I was faced with the fact that there are very deep traumas coming from past lives. I had to learn this.

Some points were given to us when they taught hypnosis, because I am also a certified hypnologist. But now I use a method that is not associated with hypnosis, but is associated with immersion in a meditative state. In order for a person to go through things more gently, he gets into these situations in order to work them out.

And so we decided that Cassiopeia and I could also organize such a project so that people could learn regressive hypnosis, regressive immersion. Let's say, immersion in past lives.

Today we would like to ask you questions that are asked by people who are very interested in this topic. We will be gratefully awaiting your answers.

Irina: Thank you!

(LiShioni) I salute you! Okay, I'm ready to answer questions, you can ask.

04:09 Regression among aliens.

Irina Arsenyeva: Okay. Here on Earth, this method of regression therapy, immersion in past incarnations, is used to heal various traumatic memories. This method helps to understand the causes of events, dreams, fears, phobias, diseases, and heal them. In fact, you can solve many issues using this method or realize your purpose, the mission of your Soul. But in what life situations do your Shimorians turn to you as a specialist, what issues do you solve when you plunge into the memories of past lives?

Irina: (LiShioni) Our school education system includes a compulsory subject called “Spiritual Psychology” or “Psychology of the Spirit.” Within this subject, all children are taught in theory and practice to connect with their Higher Self. The Higher Self of each incarnated Spirit works in contact with the embodied Self, the Soul of that humanoid. Including it itself conducts regression, as you call it, at the request of the humanoid from Shimora.

The answer to this question: we do not have a special profession like yours - a regressologist. We simply have a specialist, a master in the Spiritual world, if you can call it that, or in interaction with the Spiritual world, in your opinion. In Russian it would be “a specialist in astral interactions.” It’s just that our World of disembodied Spirits, the Astral World, and the Divine World are not so divided. We understand all this

as separate areas of a single world. Therefore, my profession can also be called “a specialist in the study of the Spiritual world and its influence on the material world.”

I did not teach at school, because in order to be able to teach our children at school, you also need to have a pedagogical education, a special skill in working with children. But I know the programs in which children are trained, I studied myself. And I can say that in contact with the Higher Self, any Shimorian can find out for himself any moments of past incarnations, stay in the Spiritual world, and also find out those experiences that, as you said, negatively affected his perception in the current life. We usually call them “karmic knots,” but this is again a translation into Russian.

This is called a little differently, but the closest adequate transmission into Russian through a contactee is “karmic knots.” These are some events and situations that gave rise to a decrease in spiritual vibrations in a past life and were not harmonized by the Spirit before leaving incarnation. They pass in the karmic or causal body, that is, in one of the areas, so to speak, of the memory of the Spirit into the next incarnation in the form of its unresolved spiritual tasks. And all this can be seen and understood in contact with the Higher Self.

Shimorets also have the free choice to raise or lower their vibrations. If he lowers his vibrations and creates an energy block that blocks the opportunity for him, makes it difficult or completely impossible for him to communicate with his Higher Self, with his Light, then he may need the help of a spiritual guide. But this happens quite rarely, because there are special energy techniques for clearing blocks. There are even (shows) such special devices - cameras where a person enters, sits down and the device creates such vibrations that affect the subtle structures of the etheric field, destroying the created grid that contains the negative (now, at least, that’s how I perceive the image).

You asked a question about who does the regression. The man himself, the humanoid himself, if he wishes, he can ask his Higher Self about his past life. But the answer will be given only if it is useful for spiritual development, and within this framework.

Irina Arsenyeva: Okay. Thank you. I appreciated the Higher Self

method. I came and studied with Irina at the Center. When working with the Higher Self, people often fall into past life events. A very interesting effect occurs.

10:04 Perception of past incarnations by the Spirit in incarnation. Ahamkara.

Irina Arsenyeva: Okay, this is a question. Some people think when they come to regression, especially for the first time, that they are fantasizing, that it is not true. What do you recommend: how to distinguish fantasy from reality and accurately understand that we receive information specifically about other incarnations of the Soul?

Irina: Do you understand what's the matter? Information about other incarnations of this Spirit is stored in that area of the Spirit's memory, which is located in the vibrations of the state of the Higher Self. This memory does not exist in the incarnated part, in the Human Soul. This memory of past incarnations is not in the part of consciousness occupied by the physical brain. Because this body, this brain did not experience these events. We experienced other bodies through another brain, through another consciousness, through another perception of consciousness, to be more precise. That is, even the organs of perception could be different, the language in which this creature thought could be different, even the type of body could be different - thin or dense.

These memories, which come from the Higher Self, descend through the spiritual channel into the human consciousness, fall from the disembodied part of the Spirit to the embodied part.

What happens to these memories? They transform, undergo a metamorphosis, which is called "retransmission of these memories through the figurative understanding and memory of the person himself in the body." In any case, he will be able to remember this at his level through those images and understanding that are close to him - he will not be able to directly perceive that experience without having that body. And in some way it will be included, I would not even call it imagination - but such an automatic ability of consciousness, or rather self-awareness, like ahamkaras.

This is such a term, it should tell you: this is a part of consciousness aimed at the Spiritual world, at oneself. This is the ability of the Soul's self-consciousness to produce a metamorphosis of unknown images, unknown phenomena, even unknown letters (LiSioni), already into the familiar through memory. This is not called imagination. Imagination or fantasy is the creation of new images. But here new images are not created, here the so-called rewriting occurs. This is very reminiscent of the transcription that occurs in every cell of the human body, when genetic information is rewritten from DNA to RNA (if anything is clear).

Irina Arsenyeva: Great! I understood.

Irina: I think you understand what he's talking about.

Irina Arsenyeva: Yes, yes. Great! Thank you!

13:51 Source of answer to the request about past incarnations.

Irina Arsenyeva: There are a lot of rumors around regressive immersion in past lives, some people are even afraid. I want to ask a question. I think LiScioni certainly knows the answer. Is it true that our mentors are involved in the process of immersing a person in past life memories? What exactly do they select and show us that past life, which is the cause of some of a person's troubles in life?

Irina: In ninety percent of the cases of regressions that I have studied - be it of people on Earth, or Shimorians, or representatives of any other race - memories are selected and selected by the Higher Self. And at the same time it may itself be in contact with mentors, with Consulting Angels, but it may and not be there. Everything depends on the level of the Higher Self, where the Spirit itself is located, the person himself is located - on the spiritual level, I mean.

And everything also depends on the request of the person himself: what he wants to see, in what form and why he needs it. Most often, the Higher Self shows this itself, but it can also attract consulting Angels, who, by the way, always practically know that a person has requested regression - by the changed vibrations of the Spirit itself.

Irina Arsenyeva: Great! That's how it feels. Okay, great!

15:27 The need to block the memory of the embodied part of the Spirit.

Irina Arsenyeva: Many people ask me this question. Somehow I answer, and Irina answered this question in Novosibirsk. But it exists, we ask it anyway. Please tell me, LiShioni, when a person is born, he does not remember anything. And on Shimora, when people are born, do they also not remember their past lives? And what is this forgetting mechanism for?

Irina: Of course, the mechanism of so-called forgetting, or, as we call it, “blocking the memory of the embodied part of the Spirit,” arises every time during the transition from the Spiritual world to the material. To any material world, in any Galaxy, on any planet, at any density level. This is also typical for plasmoids. And believe me, it is very strange for a plasmoid, say, of the 17th density level, who lives on the Sun, to remember its earthly experience of the 3rd density level. This plasmoid will be absorbed by its unusual memories, and from this absorption it will not be able to perform its functions.

Can you imagine that a solar plasmoid can have a body similar to lightning (shows a zigzag), hundreds of kilometers in size - hundreds of kilometers of various colors (shows multi-colored lightning, where one color turns into another). He does not have the limbs you are used to: no arms, no legs, no head. He looks with his whole body. And suddenly he remembered his incarnation in the human body.

Irina Arsenyeva: I can imagine!

Irina: For full adaptation, adaptation to the world where the Spirit incarnates. To the country where he incarnates, to the planet, to the level of density. Finally, to the family, to the environment, to the language where it is embodied, all other memories are blocked. Memories of being in the Spiritual World are also blocked. This happens simultaneously with the activation of the instinct of self-preservation after conception, before the Spirit enters the body. Before the final entry of the Soul into the body, that is, part of the Spirit. For earthlings, this occurs in the seventh week of pregnancy.

If the memory of reincarnation is blocked earlier: before the transition to the material world and before being endowed with the subtle pranic shell of the Soul, then the memories of being in the Spiritual world remain until the Soul is completely immersed in the body. This happens simultaneously with the activation of the instinct of self-preservation - so that the instinct of self-preservation and the absence of memory of the Spiritual world can preserve the embodied being in the body in case of any difficulties or troubles in the material world. So that he doesn't leave him.

Irina Arsenyeva: Everything is for our good, I understand. Thank you!

Irina: (LiShioni) Irina, as a psychologist, you are well aware of the problems of suicidality, which are especially acute among children and adolescents, and among addicted people, and the mentally ill.

Irina Arsenyeva: Yes.

Irina: So this suicidality is expressed in difficult situations, of course, subjectively difficult situations, even when the memory of the Spiritual world is blocked and the memory of previous incarnations is blocked. Still, some Spirits overcome their instinct of self-preservation. Can you imagine what would happen if everyone remembered what it was like to be in a state of eternity?!

Irina Arsenyeva: Everyone would pack their bags and rush there.

Irina: (LiSioni) Absolutely right (smiles).

Irina Arsenyeva: Very good, I like the answers, they are so clear. Thank you, LiShioni.

Irina: Interesting?

Irina Arsenyeva: Yes, very interesting, so competent. Specialist - what can I say.

20:15 Contract with “dark forces”.

Irina Arsenyeva: Interesting, like on Shimora. It happens to us that people are faced with such phenomena as oaths, vows given in past lives, some kind of contracts, agreements, for example, with dark forces that can still influence. How do you work with this? Have you encountered this? How do you stop these contracts? And is it necessary to do this at all?

Irina Here our terminology slightly differs. What do you call a contract?

Irina Arsenyeva: That’s what they sometimes call it. A person, for example, wanted power in a past life. He goes and signs a contract with the dark forces that he receives power and gives something away.

Irina: Who are the dark forces, from your point of view?

Irina Arsenyeva: That's what people say. I understand, I have already been taught in Cassiopeia, that there is no concept of “dark forces”, there are low-vibration Spirits.

Irina: Do I understand you correctly? Am I asking these questions now to understand better myself?

I studied, of course, earthly esotericism, including regressology. But the fact is that not all regressologists use the same terminology as you just said. Some have it, some don't. And those who use it also understand these terms differently. I want to give both for you, and for your experience, and for all viewers of Cassiopeia, an unambiguous answer that will not be understood somehow in its own way, so that my words could be distorted.

So I'll ask you again. Do I understand correctly that by “contract with dark forces” you mean a certain agreement on the assistance of low-vibration Spirits, or disembodied Spirits at demonic levels, or low-vibration plasmoids in achieving some personal goals of a person who was either in this life or in the past life, and on which they spent their

energy?

Irina Arsenyeva: Yes.

Irina: So you think that this person has a debt to these entities?

Irina Arsenyeva: No, I don't think so, but sometimes this comes up in a person. A person, as you say, perceives information from a past life, then transfers it into his images, as they go for him. And he had images that he had signed a contract with someone, and now he was worried that he had given away part of his Soul or something else.

Irina: I understand what you are talking about. There are such archons, there are such demons and low-vibration plasmoids that really create (shows like a movie) such a view, such a picture, such an image for a person that they do something for him in order to help him. But they just tell him about it. And the archons can look into the Future Time Tape for some period. They can see one of the options - the most likely one for him - in the Timeline and those actions that will lead him to success in one direction or another. They are more likely to bring you, but it is not guaranteed.

And they, being in the Spiritual world, can prompt a person mentally or through contactees (usually called in this case magicians or sorcerers) certain steps. They can create some events in the material world, but not in the same way as, for example, Angels: the higher the vibrations, the more energy. But, nevertheless, they exaggerate their help, even if the person has achieved the goal that they promised him. They exaggerate their assistance in this matter and tell him that he now has a debt that must be paid in the form of energy.

Irina Arsenyeva: Yes.

Irina: This is used by both archons and demons, and other Spirits of the 4th, 3rd level. Usually archons use this - Spirits of the 6th level. This is also used by plasmoids, already embodied Spirits who have lowered their vibrations and switched to a parasitic lifestyle.

Often demons, disembodied and low-vibration plasmoids act in alliance, helping each other, contacting each other. And each side has its own interest there. The demon's interest is self-affirmation and lowering a person's vibrations to his level, in order to be more confident in himself, in his choice to reject God. And the goal of low-vibration plasmoids is more pragmatic. This is energy. Energy charged with certain low-vibration feelings, emotions and thoughts of a person who has fallen into this artificially created bondage.

A person is told that he owes these forces, so that he feels fear and guilt. This will be the power supply for the plasmoids. A person lowers his vibrations from these energies. If he lowers his vibrations to the level of the archon himself, then the archon will feel more self-confident. He will have the joy that he has achieved his goal and led another one away from the divine path.

And a special egregor is also being developed, which is usually called in spiritual teachings - "egregor of black magic practices" or "satanic egregor", that is, the egregor of Satanists. This is an egregor, which is at low vibrations, in which all the energies of thoughts, feelings and desires of people who are at low vibrations accumulate. These energies were not absorbed by the plasmoids; they remained for the egregor. They also have their own specific agreements: how much plasmoids can absorb, and how much goes to the egregor.

The egregor has certain guardians, these are the Archons. The Archons in this case are interested in promoting the ideas of their egregor. Information about the sale of the Soul, about agreements, about contracts - it is recorded on etheric, even non-ethereal matrices. The egregor itself is in the Astral, but since the Astral permeates the material world, including all levels of density, the information of the egregor is recorded on very thin etheric matrices. What you call "Akasha". That is why they are called "Akashic Chronicles".

In the Akashic Chronicles of the black magic egregor it is written exactly about what you just asked about, about all these contracts. There it is presented as reality. A person who may have heard the information of this egregor may begin to interpret the event of his past life in this way, although something completely different happened there.

In order to prevent this from happening, and to prevent a person from falling under the influence of a black magic egregor and not becoming a donor of its essence, it is always necessary to ask the Higher Self about the truth of this information. If the truth is confirmed, it means asking why you showed me this now, and what I need to correct here.

And the regressologist who conducts the session should always remember that in any case, all information is given in images. Images that are known to man himself. And translating the experience of life in other bodies, especially on other planets, into words that are known to a person from life, from books, from films can actually be very difficult, because a lot of things are distorted. It is distorted not in the sense that it becomes untrue, but it becomes information that is not the same as it was originally. It passes through memory, I would not even say through consciousness - through the memory of an already embodied Soul.

Why does it pass through the memory of the embodied Soul? Because it is impossible for it to pass in another way - through the human speech organs - until it passes through the brain. First it passes through the brain, where the consciousness and memory of the embodied Soul are located. There, information received from the Spiritual world takes on forms accessible to the consciousness of the Soul. As with any type of contact, this happens.

Irina Arsenyeva: Got it.

Irina: Do you understand what he's talking about?

Irina Arsenyeva: Yes, I understand what he is talking about. Thank you, LiShioni.

I understand him. Great. To this question, he, of course, opened my eyes for some moments, because these things were given to us a little differently, thank you, LiShioni.

31:06 Low vibration levels of the Spiritual world.

Irina Arsenyeva: Okay. Interest Ask. We will probably touch on something dark magical, but maybe not.

I have had several people in my practice who remembered themselves in the space between lives, when, because of their unrighteous life, they ended up in low worlds, on low levels. It is clear that their consciousness interprets that this is complete darkness, they are treated poorly there, they are tortured there. In general, their memories are not very good. Moreover, they remember this without immersion, for real. The space there was so bad for them that they still remember it.

We had such a person in Russia - Nikolai Levashov. He and Svetlana Levashova wrote in their books that at these low levels the Spirit that gets there can generally die. Low vibrational entities can tear it into pieces and destroy it. Is this true or speculation?

Irina: At low levels, if you mean the world of disembodied Spirits, and not plasmoid Worlds?

Irina Arsenyeva: Yes, unincarnated Spirits.

Irina: If you mean exactly the low vibration levels from 1st to 6th, the Spirits located there are (not all, but many of them) very aggressive. Due to internal aggression, which the Spirits were unable to harmonize in the incarnation in which they reached this level, they naturally come out with this aggression. It does not disappear anywhere for them, but is already directed against Spirits living on the same level where the Spirit itself lives. It happens that he begins (shows) to organize, I would not call it wars. It is impossible to kill there because the Spirit is immortal. But he can create the appearance of an attack, the appearance of war, even create a weapon for himself mentally.

Just as mentally Spirits at middle levels create houses for themselves, and at high levels - beautiful temples, so at low levels the Spirit, using the same gift of God, the creative principle, creates weapons for itself. It is quite dense at his level, and he can attack other Spirits. It cannot kill, but by striking or using this weapon on the spiritual body of another demon who is there, if that demon believes that he is actually being hit,

he may feel pain. There the Spirit itself does everything mentally. If the Spirit at the same time thinks that he is stronger, and he will have more energy, experience and awareness (the most important thing there is awareness), then he will be able to put up a defense and will not feel anything.

It is impossible to kill him in any case. You can inflict pain, carry out various tortures, if you create such an environment, as various sadists do. If the Spirit, who has less awareness, puts the thought into his mental field that he is in a physical body, then he will believe in it and feel everything.

In this case, his sensations will even be more acute than on Earth, because the possibilities of the spiritual body to transmit sensations are actually limitless. And there it is impossible to lose consciousness, even let alone die. If in the physical body you can lose consciousness from pain, from painful shock, then in the spiritual body this possibility is excluded. There you can get out of this state only by increasing awareness and understanding that all this happens in the Spiritual world, which means nothing can be damaged: no instruments of torture, no weapons can damage the spiritual body, everything is done only by faith.

But it can be very difficult to believe that this is unrealistic with low awareness and with vivid pictures of blood, pain and torment that such sadistic demons broadcast.

Irina: He shows me such pictures. I see Irina is not smiling, isn’t it funny anymore?

Irina Arsenyeva: I listen, I listen carefully, I think along the way, I connect with what LiSioni tells me.

Irina: Does he explain everything clearly?

Irina Arsenyeva: Thank you, everything is clear. I now understand why some who end up there actually experience this. He explained everything, laid it out in detail. It is clear that whoever calls out to the

Angel there receives help.

Irina: If the Spirit calls out to its Consulting Angel, the Consulting Angel will hear it and come.

I will add that time, as in the material world, does not exist there. But there exists subjective time, which is measured by the speed of thought processes and the sequence of emotional-sensual-volitional processes in the Spirit, in self-consciousness and in the spiritual mind of the Spirit. And therefore, some subjective time may pass between the call and the arrival of the Angel, because the Angel can send a phantom if at that time he himself is engaged in the incarnation of some other Spirit (usually the Consulting Angel has several wards).

He can send his phantom. And in this case, when an Angel appears in hell, so to speak, in the low-vibration world, he lowers his vibrations for this. But not in the sense that he becomes evil, but in the fact that he does it artificially in order to stay in the low-vibration world. This may cause him some inconvenience, the lower the level of this demon, the greater. He just gets a feeling from low vibrations (shows), as if something is squeezing his body and scratching him.

Irina Arsenyeva: Unpleasant sensations, I understand.

Irina: But when he appears there, demons from his Light usually scatter to the sides (shows) and cover themselves with their hands. Because when a demon looks at an Angel, he has a feeling that through his eyes this Light, white Light penetrates into the very heart of this demon and begins to burn there.

Irina Arsenyeva: Yes, exactly, that’s what the immersion shows when we do it – that it just burns them so much that they can’t stand it.

Irina: Like fire.

Irina Arsenyeva: Like fire, yes.

Irina: Moreover, the Angel knows about this and, of course, tries not to approach them unnecessarily, so as not to increase the torment.

Irina Arsenyeva: I see. Thank you. I'm sitting, putting things in order – LiShioni is laying out some cubes in my head. Fine.

39:13 How to distinguish physical, astral and mental contacts?

Irina Arsenyeva: In Novosibirsk, I wrote to the girls in the group, do they have any questions? And here's a question from a girl. How can one distinguish between physical contact and astral contact, except by asking the Higher Self through regression?

Irina: Not with the help of regression, but simply ask the Higher Self what the contact was.

Can be distinguished by actions before contact. If you are walking somewhere down the street and left the house, you were not at home and had contact somewhere outside the house, and in a deserted place, then it was most likely physical contact. If you remember that you went to bed and made contact, this is astral contact. Or, if, for example, you are in a crowded place, you sat down somewhere, and you saw someone and came into contact - this is also astral contact. Because your astral body has left the physical.

But the most accurate way would be to ask the Higher Self about this by asking a simple question: "The contact that I had, was it physical, astral or mental?" It can be mental or mental. There are indirect signs. It happens that a person in astral contact begins by leaving the house and going somewhere, but he is already doing this in the astral body. And if a person lives alone, he has no one to confirm whether he left home or not, physically, I mean. Such cases happen, so it is best to ask the Higher Self.

Irina Arsenyeva: Still with the Higher Self, I understand, thank you.

41:18 The spiritual reason for the creation of the world.

Irina Arsenyeva: The girl asked me a question. Since they asked, that means I'm passing it on to LiShioni. Everyone knows that God hears everything, knows everything. Why then create egregors and planets? What is all this for if there is a part of God in every being? He is absolute. Why does God the Absolute need all our incarnations, why are these tests and games?

Irina: The world was created because of Love. So that Heavenly God, Father can give his Love to all worlds and spaces. In order to have someone to give it to, he created material worlds. But first he gave birth to his children - the bearers of his Love - and then created material worlds so that they could manifest it in material worlds and build their own worlds, densifying them more and more. Until it finally comes to the physical world.

The denser the matter, the greater the distance in vibration from the Spiritual world, the more matter can influence the Spirit, somewhat, one might say, not by closing, but by drawing the Spirit's attention to itself. And this can lead to oblivion of the Divine Light. But this is not in order to create some tests for the Spirit, but so that through the material world, through more and more dense forms of the material world, it realizes the same Light of God that is everywhere.

For example, in the physical world we see Galaxies, stars, and other luminous objects that remind us of the Light of God in this physical dense world. And we see from our planets how the stars form constellations, showing us that it is better for intelligent Spirits to stick together in order to create some kind of business, how the stars gather into constellations so that, for example, the path of a traveler can be read from them.

Do you understand this image?

Irina Arsenyeva: Yes. He speaks beautifully.

Irina: (LiShioni) These are simply the analogies that arise when looking at the material world.

Just as light is structured in the form of stars, which are the centers of their star systems, so the Sun is the center of the solar system. Why is the Sun at the center of the solar system, and why is our star at the center of our system? In order to give the Spirits living at the third level of density in the physical world an understanding that God is at the center of everything. The Sun is the visible manifestation of Divine Light in the physical world.

You even open the textbook, one might say, of our “Natural Studies” for the first grade - an analogue of your “Natural Studies” (we call it “Study of the Physical World”). And already in this textbook it is written - imagine that for your children in natural history textbooks it will be written: “The Sun is a visible manifestation of the Divine-Spiritual Light in the physical world.” Every child here knows about this.

How do you like this textbook?

Irina Arsenyeva: Very good textbook! I think when will we have this? Otherwise we are completely materialists, without Spirit, without Soul. Without knowledge of this, in fact, a person cannot.

45:39 The meaning of the word “materialist”.

Irina: Do you know the true, undistorted meaning of the word “materialist”?

Irina Arsenyeva: Tell me.

Irina: A materialist is a Spirit who has completely limited his perception only to the material world and explains various spiritual phenomena by the phenomena of the material world, changes in the matter of his body and the world around him. A materialist, seeing perhaps one tenth of a percent of the real world, considers this one tenth of a percent to be the only reality. The true meaning of the word materialist is a person who has the fear of expanding his perception.

Irina Arsenyeva: To the point, right to the point!

Irina (LiShioni): A person who has a fear of expanding his perception. Usually this fear arises for a reason, but it is a defense mechanism that appears as a result of those choices in past incarnations that led to a decrease in vibrations. In past lives this was associated with self-flagellation and feelings of guilt. And until the Spirit forgives itself for this and works it out within itself, it will not allow itself to expand the boundaries of its perception beyond the boundaries of the physical world.

Do you understand what he's talking about? I can't figure anything out anymore.

Irina Arsenyeva: I understand everything. Thank you.

Irina: You see, LiSioni says: "I look through the contactee. Irina, there is so much Love in your eyes now."

Irina Arsenyeva: Yes? Great. Thank you.

Irina: How do you feel?

Irina Arsenyeva: My whole body is warmed up, there is a strong warming up, my heart is opening - I don't really know, it will probably soon be the size of a room.

Irina: I feel it. What do you think of his energy?

Irina Arsenyeva: Very good. Great.

Irina: (LiShioni) I remember I was at your conference with Metatron. What energy he has! And you reacted to him too.

Irina Arsenyeva: Yes. Metatron too. In general, I really love all this high-vibration stuff, I'm immediately drawn to them.

Irina: This suggests that the mission of your incarnation is to help others raise their vibrations.

Irina Arsenyeva: I know, thank you. LiScioni confirmed again. This is true. I constantly work with people, constantly teach something. And now we decided to make a course like this here in Cassiopeia.

Irina: (LiShioni) I understand that you want the last word or wish from me?

Irina Arsenyeva: Yes, blessings.

Irina: Blessing is a good word. Previously, a blessing was called a good word, the instruction of a teacher, which he gave at the end of a lesson.

49:49 Blessing from LiShioni.

Irina: My dear spiritual brothers! We are children of one Father, despite the fact that we are on different planets. And I cannot call myself your teacher, because we all learn from each other here, we are each other's teachers. But I am a teacher in the sense that I was now answering questions, that is, I was giving information. And having found myself in this place of honor, I want to remind you that the conditions for the personal happiness of each of you who watches this video, and the conditions of Love for you, are only the happiness that you find in yourself, and the Love that you spread on others. The more Love and happiness, kindness and joy you spread in the world around you, the more the same energies from the Universe, from the world, will be attracted to you.

I know that many, when they begin to follow the spiritual path, on the contrary, their temptations intensify, the darkness thickens around them. But this is not because you are doing something wrong, but because your mentors, seeing that you have taken the path of raising your vibrations, create such events and send you the lessons that you need to go through to move to the next stage. And when you cross over, it will be what in Christianity is called the Resurrection, the

Resurrection of your Spirit to life in God, transformation, and in esotericism - “a small quantum transition of your body and consciousness to another level of reality.” And I wish each of you to experience enlightenment in the Light of Love, I send you the Light of my Love!

Irina Arsenyeva: Thank you, LiShioni!

Irina: How do you feel?

Irina Arsenyeva: The flow has intensified, I am also sending him my Love.

Irina: He stood up and moved his hands like this.

I thank and accept, love and bless! LiShioni, thank you! Thank you, dear viewers, for watching our video. I hope it will help you find all the answers not in us, but in you - in yourself, in your heart. Always compare the answers you received from the outside world with the Light of truth that is in your heart. I thank you, dear friends, see you soon!

53:00 Course of regressive immersion into past incarnations at the Cassiopeia Center.

Irina Arsenyeva: I wanted to say that we invite everyone to training in immersion into past incarnations, which will be held in Voronezh, at the Cassiopeia Center, in our new Cassiopeia center from September 19 to 25. This will not be online learning – it will be live. We will study with you for a week. In seven days you will go through an interesting path that will help you learn the technology of successful immersion into past lives, you will participate in live demonstrations with participants, and train with each other so that you will learn in practice how to do immersion into past lives under our supervision. To find some karmic knots there and untie them in the end.

For those people who need this practically - let's say they work, and they need to provide people with some kind of psychological help - this

method is very suitable. We will have different exercises, the theory is good, we will analyze a lot of things with you. Irina will come to us, she will tell us from the point of view of the Interstellar Union, alien civilizations, she will give us a lesson. Yes, Irina, will you come to us?

Irina: Of course. We will come together with MidgasCaus and LiSioni.

Irina Arsenyeva: Great.

We'll give you everything: a dive plan – how to do it, how to untie karmic knots, how to work. Let's talk about the structure of our consciousness - how to activate talents, how to dive into fears, deal with these fears; how to contact a mentor is another such method. We will work on this in practice, for seven days. There will be questions and answers at the end. Then I will meet with you again, we will have two meetings at the end. I will also help you and answer your questions that arise after the training. We will issue certificates for completing the course of regressive immersion into past incarnations.

The link will be under this video, you can click on the link, go in, read everything. Perhaps you will have some questions when you read and find out more information about this. You can ask questions about training by phone, also known as WhatsApp: +7 953 868 8031. There are not many places, we are recruiting approximately 19 people for the group. You will live in the Center and meet Irina. We will practice there with you in order to learn this method. I invite everyone, come.

Irina: Thank you, Irina. Indeed, come to our Center in Voronezh, feel the energy here, the atmosphere created by all of us and all the visitors to our Center. I invite you, welcome to us. See you.

Irina Arsenyeva: See you later.

August 24, 2022

Participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Irina Arsenyeva – psychologist, regressologist, hypnoanalyst;

LiShioni is a representative of the planet Shimor, a specialist in the astral world and its interaction with the material world.

#465 Live broadcast with Archangel Metatron. Part 3.

https://blog.cassiopeia.center/pryamoj-efir-s-arhangelom-metatronom-chast-3
https://www.youtube.com/watch?v=yBgFJcaMPAQ

00:00 Start of video.

00:03 Graduates of the Cassiopeia project and medical activities.

Maxim: Dear friends, hello everyone! We had some minor technical difficulties. I hope this is not due to the arrival of a highly spiritual personality. We will have a wonderful broadcast today. Archangel Metatron has already visited us twice. And both times, even me, an experienced person who has been communicating with aliens and the Spiritual world for two years, was still greatly surprised by his answers. I understand that his answers will surprise you too.

Blurry why? I do not know why. Most likely, YouTube probably sets some restrictions regarding the broadcast, regarding the program. Although it’s blurry, it’s there, and it’s good that at least this broadcast started working.

Archangel Metatron will be present today. We called the video "Archangel Metatron, part 3." But before we move on to Archangel Metatron, I would like to inform you one more time.

We will have an offsite event for the entire Wellness Center with a full training retreat, with the issuance of certificates and the completion of the first stage of training for the Higher Self. This is a Kazakhstan retreat, the city of Almaty from the 7th to the 14th. To sign up for the Kazakhstan retreat, you can see the link under this video, but you can also call the phone number, this is just for those who cannot use the links, +7 (988) 910-00-40. The specialist's name is Elena, she can

answer all your questions.

Yes, it's obvious that something is working, something is jamming us, and it's not just like that. Therefore, we will continue under the conditions in which it is possible. Thank God this is possible.

We thought for a very long time about how to properly raise one very interesting topic. In general, we have small incidents. Transformations with people who participated in our projects. In no case do I want to say anything bad about people, but as the project manager, I am obliged to warn you.

Dear friends, some contactees began to transmit information from MidgasKaus from the planet Esler, make diagnostics, and prescribe medications after these diagnostics. I'll tell you right away that the Cassiopeia project does not conduct any diagnostics. Irina did it before. But we heard the people, I read the legislation. I realized that we have neither medical education nor medical licenses, so the Cassiopeia project stopped making diagnostics. Especially with the prescription of medications.

We asked MidgasKaus whether he personally prescribes these drugs and makes these diagnostics. He said that yes, he helps make diagnoses, but he does not prescribe any medications. Therefore, please be careful when communicating with contactees, especially those who left our project, do diagnostics and, especially, prescribe medications. This is prohibited for people who do not have a medical education and a medical license.

The Cassiopeia project does not bear any responsibility for people from the project who completely violate our Russian legislation. And even more so, we ask these people to leave the projects. Maybe they hold some kind of grudge against us, maybe they do this on purpose. But it is very difficult for me to see when people leave the spiritual project that we are trying to do and begin to engage in purely commercial activities, making money by presenting spirituality, coming up with various schemes.

So guys, please be careful. If you suddenly doubt the qualifications of

a specialist or understand that the specialist does not provide reliable information, you can always contact our project. Go to the site, call the administrator and check with the administrator whether this specialist is a specialist of the Cassiopeia project and whether he has the right carry out any kind of diagnostics, prescribe, implement, God forbid, some other treatment. The Cassiopeia project, as a health project, does not deal with treatment, it deals with recovery.

We are planning a trip. Apart from Kazakhstan, I'll tell you a secret, we haven't given this information yet. We are planning a trip to Kazan and Novosibirsk. But more on that later. We will inform you after the trip to Kazakhstan when we arrive. Therefore, Kazan and Novosibirsk, get ready, wait for the message. We will definitely come with a training seminar and retreat. We will try to bring specialists from the Wellness Center.

I give the floor to our wonderful contactee, Irina Podzorova, who will also say a few words about the situation that arises on the Internet. Why did this topic come up at all? Because people want to somehow express themselves, but they cannot do this themselves and use the names of very dear interstellar friends to us. And by giving incorrect diagnoses, especially by making any prescriptions, they discredit their name. Mid is here, right?

Irisha, have a seat. Let Mead himself speak then.

Irina: Mead is here with Metatron. Hello, dear friends!

07:33 Introduction of participants. About diagnostic methods.

Irina: Good evening, dear friends! My name is Irina Podzorova. I am a contactee with extraterrestrial civilizations.

Today we have with us: LiShioni from the planet Shimor, a specialist in astral interactions, MidgasKaus from the planet Esler, a biologist, psychologist, specialist in alien civilizations, and with us a representative of the Spiritual world, Archangel Metatron, who is the Chief Hierarch of the Milky Way Galaxy on the Spiritual level. He

controls the embodiment of all Spirits in our Galaxy on all planets, stars and at all levels of density. As he already explained, he is now out of incarnation, that is, in the Spiritual world.

08:28 Diagnostics and prescriptions of MidgasCaus.

Irina: Regarding the situation with diagnostics. Mid welcomes everyone. (MidgasKaus) I greet everyone and remind you that I have an agreement with Zaliatar

Zaliatar is also a representative of an alien civilization from the Pleiades constellation, with whom I contacted, and who is a Spiritual healer on his planet. He met MidgasCaus.

(MidgasCaus) Zaliathar and I agreed that when a person deals with a physical illness, it is necessary to first find out its spiritual cause through the Higher Self. You must ask your Higher Self, your Spiritual Light, what is the spiritual cause of this illness, and how it can be eliminated. And only after eliminating the spiritual cause, as far as this is, of course, possible (there are different reasons), I told Irina that after eliminating the spiritual causes of the disease, I am ready to continue the same diagnostics with the prescription of specific drugs, but only if, of course, this does not contradict the law of that the country where she lives. Because I have no intention of endangering her in any way. And we also had a conversation when people gave informed consent, understanding that Irina does not have a medical education, to a video camera. And after the Higher Self, I did them.

This was our practice.

But I emphasize that due to the fact that Irina carried out these diagnostics with me for quite a long time, and I recommended to her how to write them down correctly, and recommended that she study and replenish her mental field of a medical nature, so that I could correctly convey through her .

For this reason, I inform you that I will agree in the future to transmit this kind of information (if necessary and in complete security), only

through the contactee Irina Podzorova. My other contactees, who tried and tried to do this, were unable to convey correctly what I told them, especially in terms of prescribing specific medications, as well as their dosages, which is a very important point for people's health.

Maxim: Yes. Dear friends, I also want to clarify that we have stopped this practice in principle. We try not to do this, but if suddenly any doctors who are interested in esotericism have a desire to see how this diagnosis is carried out, how the prescription is carried out, we are ready, for the sake of the experiment and the opportunity to confirm this contact, to conduct such a diagnosis. Moreover, we are ready to spend it with absolutely any person. You can take a person who has a medical card with a doctor's diagnosis. Carry out a diagnosis and ask MidgasCaus, in the presence of a doctor, to prescribe our medications, according to our vibrations, for everything else.

Irina: Only he emphasizes that the person himself must agree and understand that it is not me who is doing this, but an alien specialist.

Maxim: This is clear.

Irina: They are already ready to cooperate.

Maxim: Guys, we don't do this now, because it's quite slippery.

Irina: I have already written a lot of diagnostics. I want to emphasize that diagnostics are carried out at the energy level, through the Astral. Those who went through it know. Sometimes medications are necessary, but not always (he may not see any pathology and may not prescribe anything). It happens that he prescribes herbs or medications in certain dosages.

I must say it as it is, that for some diseases he may prescribe drugs that are not included in the treatment complex according to our medical rules, because they have their own ideas. This is an alien civilization that has its own ideas about our body. Moreover, he always emphasizes that he always recommends these drugs by vibration. That is, what suits one person with his illness may not suit another,

although his diagnostic result will be the same, and the medications may be completely different.

Maxim: Yes, I was personally present at these diagnostics. And he did diagnostics for me. I, of course, read it with my mouth open and did not understand how aliens could even know what I had inside. And even more so, prescribe some kind of, relatively speaking, treatment.

But I say again that we are ready to do this for experimental purposes. And if someone tells you that MidgasCaus will do diagnostics and prescribe medications, this is a lie. Please do not trust these masters and carefully watch what they say. And be sure to contact our website with access to the administrator and provide this information.

Irina: He conveyed through me and says again that if in the future he is asked to do this, he will agree to do it only through me.

(MidgasKaus) I will be ready to do this through another contactee only if he has a medical education, that is, if he is a doctor.

Maxim: Yes. Therefore, dear doctors, come to the school of contactees. We will set up contact for diagnostics with the consent of MidgasCaus and all our health structures.

"Our pharmacists are the best." I agree.

Thank you very much, sorry for such a long introduction, but it had to be. We should have warned you that people are leaving our project and starting to do nonsense.

Irina: No. Metatron is not shocked. Why is he shocked? He listens with interest.

Maxim: He listens with great interest to how earthly, highly spiritual people behave, especially those who come out of our projects.

Well, are you ready?

Irina: Yes.

16:30 Changeability of the laws of the Universe.

Maxim: Archangel Metatron, I greet you. In the question-answer chat, I collected, in my opinion, very interesting questions that we have not yet answered. If there was a question that we had already answered, then I simply skipped it. Therefore, we recommend that if you haven't seen your question, we recommend that you review the first two parts: Metatron, the first part of the broadcast, Metatron, the second part of the live broadcast.

So, please tell me, are the laws of the Universe adjusted during the Manvantara, or are they immediately formed upon its appearance?

Irina: (Archangel Metatron) You know, Maxim, the laws of the Universe can be understood as the laws of the physical Universe, the laws of the subtle worlds, the laws of social formation.

There are unchanging laws, for example, the law of gravity for the physical Universe. And there are laws that can be changed, for example, the laws of the construction of civilizational egregors and their manifestation in the material world. It depends on the law. There are laws that can be changed, and there are laws that cannot be changed.

Maxim: How do you understand whether a law is changeable or unchangeable?

Irina: That you and your part of the embodied Spirit lives in the physical Universe. For her, unchangeable laws are everything that is connected with the laws of physics and chemistry, that is, the laws of the structure of matter of the world where you are. And everything that concerns the laws of society, they are changeable.

Maxim: Got it. That is, social and moral laws are changeable. And fixed material ones for the formation of material worlds, substances of energy in space, they are unchangeable in the Manvantara.

Irina: For example, if 1 liter of water is attracted to the earth on Earth with a certain force, then on another planet, even in another Galaxy, but with the same mass as the Earth, this liter of water will be attracted with exactly the same force. This is a constant value for a planet with the same mass. And social laws change for each society depending on the general Spiritual level of its beings who are embodied there, and on their level of awareness.

Maxim: Okay. I understand.

19:25 Helping an alcoholic overcome addiction.

Maxim: You know, when I was selecting questions, I came across one very interesting one. He is worldly. But I'm wondering how you can answer it. How to help a person who drinks alcohol and cannot stop and quit?

Irina: He answered about alcohol and how to quit it yourself. How can I help a person here?

Maxim: Yes. How to help a person stop drinking alcohol?

Irina: How to help a person stop drinking alcohol. I understood.

(Archangel Metatron) A person who wants to help his neighbor stop drinking alcohol needs to harmonize within himself. Talk to your Higher Self, first calm down, forgive this person. And find out for yourself whose goal it is for him to stop drinking alcohol, yours or his? This is the first thing to do.

If your goal, but it does not coincide with his goal, then you must honestly admit that you cannot help him without his desire. And if this goal coincides with his goal, that is, he also wants to quit alcohol, but

cannot, then you can help him. As I already said, the greatest help that can be from you is to help him connect with his Higher Self, and find out the reasons (blocks) that caused him to block the Divine Light in his spiritual heart, and his body's active desire to enjoy alcohol . This already caused biochemical changes in his brain.

You need to understand that this person may sincerely want to quit alcohol, but may not believe that this is possible. He may become depressed because without alcohol he may feel physically ill (like an illness), because he has changed his biochemical metabolism, and he may not believe that returning to normal life without alcohol is possible for him. Although he may want to stop drinking.

In this case, it is necessary to tell the person the truth, how the Spirit tuned his body and rearranged the metabolism so that it worked in a normal mode only with the presence of alcohol; restructuring in the opposite direction is also gradually possible, it is always possible. It is necessary to tell a person the truth that this restructuring of his body will happen gradually. As the natural filters of his body, his blood, lymphatic system and the endoplasmic reticulum of each of his cells are cleansed of those enzymes that contributed to the processing of alcohol, he will be freed from his mental attraction to it.

Maxim: Thank you. Quite detailed. I realized that in any case we identify the spiritual cause, and then we work with the physiological dependence.

Irina: If a person made it clear that the goal of quitting alcohol is not his, he said clearly and clearly that he does not want to leave it, the loved one who is next to him must admit that this is his full right to this life. Give him freedom of choice, but at the same time give him the opportunity to experience all the consequences of his choice, and not experience them for him.

23:51 Perception by the incarnate part of the Spirit of the disembodied Spirit. Activities of Archangel Metatron in the Spiritual World.

Maxim: After watching the two previous broadcasts, people ask the following question: what are you doing in the Spiritual World now?

Irina: Actually there was a question.

Maxim: How can we feel you in the Spiritual world? Let's probably do it like this.

Irina: Feel it?

Maxim: Yes, what do you do, and how can we feel you?

Irina: The part of the Spirit that is in the physical world can feel the disembodied Spirit nearby if it directs its attention (the flow of its perception) from the physical body to the spiritual channel, which is located above the top of the head. That is, it will concentrate on the top of the head. Next, you need to direct your spiritual gaze around yourself, as if to examine yourself in the Spiritual world (shows). It is like an expansion of the spiritual channel, and from this the ability of perception begins to perceive spiritual beings. But you must understand that you will not see the disembodied Spirit the way you see with physical eyes. You will see his image inside your consciousness. This is because he does not have a physical body from which to reflect the physical light that is visible on the physical level.

As for what I do. I have a lot of contactees to whom I convey information and help them come to the Light in their Soul. They are not only on Earth and not only in this Galaxy (he sends phantoms.) I also train many angelic consultants and arhats who are responsible for the events taking place in the Milky Way Galaxy and supervise the deployment of the Time Tape in different worlds. I convey to them information from the Divine Source, as from Heavenly God the Father, on how to do this more effectively and with greater awareness and understanding of the laws of God.

26:23 Probability of nuclear war on Earth in June 2022. Features of Sanskrit.

Maxim: According to the latest information, at the time when we gave it, the probability of war was 17%.

Irina: Yes.

Maxim: Has the likelihood of this war increased over the past 1.5-2 months?

Irina: Today, we will look at the probability of a nuclear war today, and in what period? For a year?

Maxim: For the next year.

Irina: Then I said for a year. If you look now, the probability of a nuclear war in the next year, if you look at the Time Tape, is 22%.

Maxim: Wow. We increased by 5%. How interesting.

Irina: There are reasons there.

Maxim: I understand. What language on Earth is the most informative for conveying images?

Irina: The most informative language?

Maxim: Yes. What do you think is the most informative language on Earth for conveying images?

Irina: I think Sanskrit. There are many words there for conveying spiritual knowledge and images as well.

Maxim: Sanskrit?

Irina: Yes. (Archangel Michael) Sanskrit names all feelings, all their shades, all facets of the Soul and all parts of the Spirit.

Maxim: I didn’t even know about it. I understand. Thank you I even read what Sanskrit is.

28:08 Archangel Metatron on the impact of war on the quantum transition.

Maxim: What is happening now with the quantum transition on the planet, and is the war affecting this transition?

Irina: Yes, the war is reflected in this transition. Not only the war itself, but the reaction. Not only the war itself, military operations, certain battles are reflected in the quantum transition. War slows down the transition, slows down the impact of increasing vibrations of quanta on physical reality.

But the quantum transition is also slowed down by the reaction of intelligent Spirits, that is, earthlings, to this war. And earthlings are not only at the third density level. Plasmoid civilizations, which are located in the space where these hostilities take place, also react to large emissions of the Life Force of people who suddenly lose their incarnation. And because of this, some of them take energies into themselves, this reduces their vibrations, and this also slows down the quantum transition.

Maxim: Thank you.

29:30 Archangel Metatron on the essence of the quantum transition.

Maxim: Please tell me, many of our contactees, esotericists, energy practitioners say that there is a quantum transition and a transition to a new dimension. And many people on this planet will remain in the old dimension, few will end up in the new one. How can this be explained?

Irina: This can be explained by a difference in worldview. What you call a new worldview, which some people will move into, in the terminology of the Spiritual world, this means a new perception of reality, which will change for them the perception of the dimension of the Universe where they are. And the fact that some people will remain in the old

dimension means that they will remain in the old worldview, that is, they will not expand the boundaries of their consciousness. And for them there will be the same three-dimensional world, that is, only the material world will be reality.

Maxim: That is, we will not move into any other reality from each other. We will remain in the same reality with different levels of perception of awareness of this reality. I understand correctly?

Irina: Let's just move on from a worldview.

Maxim: Worldview. And physically we will see and feel each other.

Irina: Yes. Physically you will see each other, just as we see each other. We see each other on a spiritual level. But we may have different worldviews. Even angels may have different worldviews in terms of understanding the purpose of incarnations, in terms of understanding who God is, in terms of understanding how to convey knowledge to the incarnated Spirits.

This is called a new dimension because the expansion of consciousness and the acquisition of cosmic consciousness allows one to see and feel not only the material world, not only the physical world, but also all the subtle worlds, their aggregates and the Spiritual world. This is also different, this is also new. Like another dimension, new? For some people it is new. But for me it's a different dimension. The physical world is another dimension for me, the subtle world is another dimension, but they are not new to me.

Maxim: I understand.

32:40 Archangel Metatron about the life thread.

Maxim: You know, we very often say that every person has a Life Thread. Could you tell us in more detail what it is, what it looks like, and how it is formed?

Irina: A vital thread is an energy cord or an energy thread, or an energy beam (it looks more like a cord, because the beam is straight, but the thread is not). This thread was initially formed by the energies of the etheric plane of the Spirit that is about to incarnate. As you remember, the Spirit that goes for incarnation separates a certain percentage from itself for incarnation into a body on a particular planet. Consulting angels (guide angels also help them) dress him in a special pranic shell. And prana is one of the types of ether, that is, subtle energy.

From this pranic shell, when the Spirit introduces its Life Force into the first cell of its body, the primary Life Thread is already formed. What does the Life Thread connect? This is a channel of communication between his first body cell and himself, who is still outside the body.

For earthlings, in the seventh week of pregnancy, the Spirit itself enters its body, that is, the fetus that continues to form. In 90% of cases, while he is in the physical body, his Life Thread is coiled in the form of a spiral and is located in this image, in this form in the third energy center.

Maxim: That is, the Life Thread, relatively speaking, begins from the third energy center. Yes?

Irina: Yes. And when the Soul - this embodied part of the Spirit - leaves this physical body to temporarily enter the astral space, then the Life Thread unfolds behind it. This Life Thread is needed in order to unhindered the return to the physical body, either if the Spirit desires to return, or in case of danger to the body. If something threatens the body, it will wake up, that is, it will give a signal along the Life Thread, and the Spirit will return to ensure safety.

The life thread, since it consists of subtle energy, can visit the Astral. The astral body can visit any worlds, because the Life Thread cannot be interrupted; it can stretch to an infinite distance. In the Spiritual world there is no distance in the earthly sense, there is a difference in vibration. So this Life Thread can stretch and contract. Along this Life Thread, when the Soul has already gone on an astral journey, consciously or unconsciously (sleep, trance, hypnosis, fainting, and so on), in any case, when the Soul is not in the body, through this Life

Thread the Soul and the body continue to exchange energies.

Maxim: Tell me, please, could someone purposefully damage this Life Thread?

Irina: Theoretically, it can, but there is a special protector for this - the Guardian Angel. But when you try to do something with the Life Thread, damage it in any way, instinct is triggered, and the Spirit comes back. There is such a mechanism.

Maxim: Relatively speaking, can you try to harm the Life Thread when a person is in the Astral Plane, in a dream?

Irina: In a dream, in the Astral plane, you can try to tear it or cut it, but it won't work. Firstly, the Spirit will return from the touch of a being to whom it did not give access, it will be a different vibration. And secondly, it is impossible to break the Life Thread without permission, without sanction from those consulting angels who gave the pranic shell for incarnation, because they put a certain code into it, which no one can crack.

Maxim: Thank you! Dear friends. If you like our broadcasts, if you want to support our project not financially, but morally, you can click like and share this video. Last time we broadcast with Stepan Bandera, we took 36th position in the overall YouTube rating. Why? Because people liked, shared this video and shared the link to this video on social networks. And, accordingly, a huge number of people saw us, they began to watch us and ask questions.

We now have people who have nothing to do with esotericism. So it was very interesting. Thank you very much for your support, for your likes, for watching us, and trying to support the "Cassiopeia" project with all your Soul, and not only with your Soul, I feel it, I feel it, I understand it. Thank you very much!

Let's move on.

40:37 Archangel Metatron about mirrors.

Maxim: Is it true that mirrors are an exit to another world?

Irina: They can be portals if a special thin ethereal matrix of the portal is installed in them, which can lead to another world in density. There are plasmoid civilizations that prefer mirrors for their portals, because they reflect not only objects, but also energies. And they use this property of reflection to strengthen the portal, that is, they spend less of their energy on its creation and on throwing the astral or subtle body that has fallen into this portal.

Maxim: Why do we cover mirrors at funerals?

Irina: Should I tell you where the custom came from?

Maxim: Yes, people are interested, they ask questions. Why do we cover mirrors at funerals?

Irina: In general, the custom appeared not because of the person who died, but because of the peculiar care of living relatives for themselves. Because someone who has lost a relative may be in a state of grief. And in this state they become accessible to low-vibration, parasitic plasmoids. Since a mirror reflects not only objects, but also energies, if a person in such a state looks into the mirror, a negative plasmoid (which is nearby) can cause a vision in this mirror. It will be easy for him to reflect these energies so that through reflection they enter the eyes of a given person with the necessary frequency for him to see it. This is easier to do with a plasmoid than directly in the air. The custom arose precisely because of the property of reflecting energy.

Maxim: That's it, I heard.

Irina: To prevent plasmoids from frightening some people, this custom appeared.

Maxim: So that people feel more comfortable and do not attract low-vibration, destructive plasmoids to themselves through these portals.

Irina: People can attract them anyway. But, if the plasmoid is in a room without mirrors or with a closed mirror together with a person in severe grief or sadness, it will be more difficult for him to scare and carry out a negative energy exchange with him.

Maxim: Now some scientists have come to the point where they make mirrors of a special shape. And these mirrors, as they say, rearrange the energy in space, slow down time in it. Is it really possible, with the help of reflective elements, relatively speaking, metal mirrors, to change energies, reflect, retransform energies in space?

Irina: Not with the help of the energies themselves, but with the help of certain plasmoid civilizations that are attracted to not just mirrors, but special forms of mirrors, special forms of premises. And plasmoid civilizations can create portals there. And these some plasmoids can influence space and those energies that you call time (that is, the flow of change in material particles), in this way.

Maxim: Interesting. There is something to think about. A lot depends on who makes these mirrors?

Irina: Yes, a lot depends on who makes these mirrors and with what intention. And his intention, his purity of his Spiritual heart are visible in the Spiritual world and in all subtle worlds. This is how his manipulations are visible, his intention, why he does it.

Maxim: The purpose, why he is doing this. It charges, opens portals, attracts plasmoid civilizations that will work for its purpose.

Irina: You can even make this mirror and put it in a certain place. Perhaps this idea was already sent to him by the curators of the plasmoid

Maxim: Got it.

45:36 Archangel Metatron about sacred numbers.

Maxim: We had scientists, many of them endow the numbers with very strong sacred energies: 3, 6 and 9. Please tell me, can you explain what their sacredness is?

Irina: For me, any number is a special sacred energy, which is expressed as a symbol. What exactly is the sacredness of 3, 6 and 9 for these people? Each person puts something of their own into these numbers. But exactly at 3, 6 and 9?

3 – if we take the paradigm of Christianity, then this is the number of the Trinity. If we take the total world number, then 3 is a number symbolizing energy and activity. And the number 3 always symbolized the manifestation of Divine energy in the material world, from which strength was born. That is, God + matter, 1 is God, 2 is matter, and 3 = God + matter, that is, some activity has appeared. And 6 is double 3. And 9 is triple 3, that is, it is three taken three times.

And for this reason, these numbers are sacred. You can say:

- Three is the power of God in action;

- Six is the power of God in action, doubled, and in the general understanding of the Universe, in the Spiritual world, six is precisely Divine Love;

- Nine is God's power in action three times, and this symbol represents the Absolute Mind, the completion of everything, like the Absolute: 1 is the beginning of everything, and 9 is the completion of everything.

Maxim: Completion of the cycle, transition to a new cycle.

Irina: 1 and 9 - these numbers are identical to each other, because the circle has been completed.

Maxim: As I understand it, if we talk about the numbers 3, 6, 9, then we can give a very large number of examples and explain the structure, why they are sacred. Thank you very much, I understand.

48:42 Archangel Metatron on awareness.

Maxim: Is it necessary for all people on the planet to awaken, that is, to be conscious, bright, peaceful, and to be in different states of development?

Irina: The very word “awareness”, awareness in the Light of Love, replaces necessity with the expression “voluntary adherence to the Law of Love”. This means that what is necessary for each person, he decides for himself, but he himself is responsible to himself and to the Heavenly Father, from whom he was born, for his understanding of necessity. We can, I - as an Archangel, you - as high embodied Souls, we all together can, as much as we wish, other people to recognize the Light as necessary. But whether they recognize it as necessary is only their choice and their right to this choice.

Maxim: Thank you. Please tell me what wearing your Metatron's Cube amulet around your neck gives a person.

Irina: With what consciousness he wears it.

Maxim: It all depends on what kind of self-awareness he has endowed him with and understands why he needs it?

Irina: If he carries with love for me, and shows this love for me in communication, in the real world, then this Metatron's Cube helps him connect with me. If he wears it simply so that I protect him from evil, from some kind of negativity, but at the same time he leads a life far from the laws of Love, then this protection will not work, because the goal of my activity is not to protect people from the consequences of their choice.

Maxim: Very well explained, thank you.

Irina: Interesting.

Maxim: Yes, everything is quite clear. My goal is not to shield people from the consequences of their choices. Great. I'll probably say that from now on.

51:36 Archangel Metatron about his incarnations.

Maxim: Tell me, please, what did you do in the last Manvantara? Or do you have no concept of the past, the former?

Irina: I can remember. I also went through incarnations.

Maxim: What incarnations did you go through?

Irina: In the last Manvantara, if what is now called the density level, there were only 13 density levels.

Maxim: Only 13?

Irina: Yes. There was a density level similar to physical matter. But this Manvantara itself was short. I spent 87 incarnations there. I have incarnated in different physical worlds and in different subtle worlds, and almost always fulfilled my task of incarnation and carried the Light.

Maxim: There was no such thing that you dropped to a very low level somewhere.

Irina: No, it wasn’t.

Maxim: Tell me, please, have you often incarnated on our planet Earth?

Irina: He already answered.

Maxim: From what period of time: from the formation of humanity until

today, how many incarnations have there been? People ask, they are interested.

Irina: Considering plasmoid incarnations, I have incarnated on Earth 10 times.

Maxim: What about dense materials?

Irina: Four.

Maxim: Thank you. Tell me, please, how do you choose people to supervise?

Irina: By vibrations and if there was such an agreement in the Spiritual world.

53:57 Archangel Metatron about his desires.

Maxim: Interesting question. He treats you personally. Tell me please, do you have dreams and what do you dream about?

Irina: Dreams are ideas about the future. I have wishes and dreams. I dream of being, together with other Spirits, constantly in the Light, so that all Spirits understand the importance of this. To convey, not to instruct the Spirit, but to properly convey to your contactees and to other people who listen to these contactees, how important it is to remain in the Light all the time to fulfill the goal of incarnation. After all, I am engaged in all matters on the material levels of the Milky Way Galaxy, so, naturally, all my dreams are connected with the development of the Spirits of this Galaxy.

Maxim: Thank you.

There are three more questions. I spy on you guys on YouTube, what you write. Now we will finish the Question and Answer. Live", we have a chat on Telegram, by the way, the link to this chat is under this video.

All the questions that I voiced today, I selected from the “Q&A” chat. Live". Therefore, you can go to this chat and subscribe. And when we broadcast, we do surveys specifically related to live broadcasts, or provide information. Therefore, subscribe to “Question and Answer. Live broadcast”, and your question will definitely be heard live.

56:02 Archangel Metatron on the aging of physical cells.

Maxim: Tell me, please, is it possible to slow down the aging of physical cells?

Irina: It is possible, if you believe in it and direct etheric energy to it, that is, to delay the execution of the genetic program. The rate of aging is recorded in cells at the DNA level, and it is individual. Of course, this can be slowed down and accelerated. To do this, you need to either activate or slow down the activation of this program in the DNA of every human cell. Because the launch of processes in the physical body, starting from the synthesis of the simplest enzyme and ending with such a complex process as aging, starts at a certain moment due to the fact that the body tracks its location in time according to biological rhythms. And as soon as these rhythms come to the point where it is written into the DNA to “start launching the aging program,” it automatically starts.

Naturally, you can block it for some time or slow down its deployment, but you need to believe in this, because faith will help direct the etheric energy into the cells of the body to slow down or block the activation of this program. But here you need to understand that any choice has its consequences. Also here, you simply cannot direct your vital energy to something else. You may have less energy for other things. Because those etheric forces, vital forces that a person can collect in one incarnation, although they are very large, are not infinite. Because a person has a certain volume of the aura, a certain volume of the etheric body. And even a completely clean person, free from blocks and negative attachments, can accumulate a limited amount of energy. Of course, you can ask your curators to share their power so that you can slow down your aging. The question is what they will tell you. You can ask. They will most likely ask what you need it for.

Maxim: I understand. I thank you.

59:00 Archangel Metatron about the general galactic astral background and the likelihood of a change in the Earth's magnetic poles.

Maxim: Are there civilizations that have 84 astral energy levels?

Irina: 84 is for the entire Galaxy.

Maxim: Is this for the entire Galaxy?

Irina: Around the Galaxy, built into the Milky Way Galaxy itself, not on any planet, but on the Galaxy in general, the astral world is superimposed. And the Galactic Astral World has 84 floors.

Maxim: This cannot be called civilization, can it be called general?

Irina: The general galactic background, we call it the general galactic astral background.

Maxim: Oh, how interesting, even the question is so interesting. I didn't even think that there could be such an answer to it. 84 astral levels do not belong to civilization, but to the general galactic background.

Irina: Yes.

Maxim: What is the probability of a change in the magnetic poles of our planet?

Irina: They have already changed several times.

Maxim: Did the revolution of the Earth take place on the physical level?

Irina: Physically, no. The magnetic poles simply changed, the charges

of the magnetic fields changed.

Maxim: What is the probability of the next pole change?

Irina: For how long?

Maxim: For the next 10 years.

Irina: He'll look now. Looks. I now felt him turn, and the Time Tape appeared above my head. He turns it on.

Maxim: Interesting

Irina: 8 percent.

Maxim: And for the next 100 years?

Irina: 65 percent.

Maxim: Thank you. I heard you.

1:01:00 Archangel Metatron about generations of earthlings and the meaning of their lives.

Maxim: What do you think is the main meaning of life on our planet?

Irina: But if we take it exactly at the level of third density?

Maxim: Yes.

Irina: Because here the meaning of life is somewhat different, for some it is the construction of the biosphere.

Maxim: Let's go to the third level of density of our material world. What is the meaning of life in general?

Irina: The meaning of life for Spirits embodied at the same level of density on the same planet may vary depending on generations.

For your generation that lives now. We call a generation those Spirits who came into embodiment at the same time and coexist at the same time. These are people of different ages, but of the same generation. For example, now there is a certain number of Spirits at the physical level of density on Earth from a baby to an old man, and we consider all of this to be one generation. But it, naturally, is constantly changing, but in any case, if translated into earthly language, into earthly time, then the time of one generation is approximately 40-43 years.

For your generation at the third level of density, the meaning of life is in realizing the value of your life, the value of the life of another person and in overcoming selfish accumulation programs, overcoming fears, openness to the world, overcoming fears of equal energy exchange. Many Spirits come here with original karmic fears. They have a conflict between such concepts as how much energy in any form to take from the world, and how much energy to give. And overcoming this conflict is one of the tasks of this generation of Spirits.

Maxim: Thank you.

Irina: The meaning of this task.

1:03:50 Wishes of Archangel Metatron to the rulers of planet Earth.

Maxim: There is not even a question. What would you like to wish to all our rulers on our planet? Precisely to the rulers, Metatron.

Irina: My dear Divine Souls, you became rulers over your people only thanks to your angels and mentors, who allowed you to pass all the tests, of which there were quite a lot in your life before your most important position, which you are currently in. But this top position is not forever. You must understand that the measure of your

responsibility is equal to the measure of your power. You are responsible not only for yourself, but also for every person who is embodied in the space over which your power is extended. You are responsible for his well-being, for the level of his vibration in the understanding that you have the power with your mental attitudes, carried out through your imperious orders, to both push society towards development and lead it into the pit of degradation. Both are your right. This right is inalienable, as is God's Love for each of you.

But the measure of responsibility that you have implies a greater likelihood of the formation of karmic knots if you choose a path outside the Light of God, which will be reflected in your Spiritual level and your possible future incarnations if you decide to incarnate again. Before you make any decision, even the most insignificant by the standards of your materialistic mind, look first into your heart. Ask yourself: "Would I want to be among this people as a simple citizen, not vested with power, if the ruler of this people were the same as me, promulgating the same law that I want to promulgate now?"

If you issue an order that may affect the timing of the incarnation of other Spirits, which may contribute to the removal of your brothers and sisters from incarnation in other bodies, ask yourself the question of how you would feel in the place of the mother of that young man who will be taken out of incarnation by the soldiers, subject to your signature. I wish you peace and Love, and the correct answer to the question you asked. Good luck to you!

Maxim: I thank you, Metatron.

As I understand it, he spoke through you just now, Irina? We're live. What was it? Did you give him permission to speak through you?

Irina: Yes.

Maxim: Cool. Guys, thank you very much for this broadcast!

Irina: Yes.

Maxim: We didn’t plan this, I’ll be honest. We had no such plans, so I think that you now felt how I also once personally communicated with Mirakh Count. Now you have communicated personally with Metatron.

Irina: I don’t know what he wished for you, but I can’t say that this is an astral journey, I just went out into the Light. I didn't hear anything.

Maxim: Let's meet on this good note, guys.

Irina: In any case, I’ll listen to it now.

Maxim: Guys, we’ll meet in Kazakhstan. I didn’t expect it myself, so I even wanted to turn off the broadcast for a while.

That's it guys, bye everyone, see you again on new broadcasts!

June 26, 2022

Conference participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

Archangel Metatron – Head of the Council of Hierarchs of the Milky Way Galaxy, Hierarch of the Spiritual World;

LiShioni is a representative of the planet Shimor, a specialist in the astral world and its interactions with the material world;

MidgasKaus is a representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms.

#299 Judaism. How did Moses receive the Torah? Who is Yahweh? Ten Commandments. Your God is my God. Channeling

https://blog.cassiopeia.center/iudaizm-kak-moisej-poluchil-toru-kto-takoj-yahve
https://www.youtube.com/watch?v=bIpI1BHi0SA

00:00 Start of video

00:20 Introduction of participants.

Vladimir: Dear friends, hello! My name is Vladimir. We continue our series of interesting conversations related to the most famous, largest spiritual religious egregors on planet Earth. Today we have our second meeting on the most important ancient spiritual egregor, a spiritual tradition called Judaism. Our guests today are our conference participants Alexey, who was already there last time, and David, his colleague and colleague, they drew up questions together, they are in Israel. Hello, dear ones! What city exactly are you in in Israel?

Alexey: Hello! In the hero city of Bat Yam.

Vladimir: Hello Bat-Yam! And naturally I would like to introduce our esteemed unique contactee Irina Podzorova, without whom today, of course, this conversation would be completely impossible. Hello, Irina! Please introduce to us who will be with us today in the astral body to answer the questions of our Israeli friends.

Irina: Hello, dear viewers! Hello, Vladimir! Hello, Alexey! Hello David! I am very glad to see you all! My name is Irina Podzorova, I am a contactee with extraterrestrial civilizations, today a representative of the planet Burkhad is present with me, his name is Mirakh Count, he is known in Christian and Jewish religious egregors as Archangel Gabriel.

This is the same person, I want to remind you that he is embodied and is now incarnated in a physical body on the planet Burkhad in the Cygnus Constellation. He was also incarnated during the famous events with Jesus Christ two thousand years ago in this same body, the period of his incarnation, his life did not end, because they live there much longer than we do. He greets everyone and says: “Despite the fact that I am incarnate, this does not prevent me from being the curator and guardian of religious egregors on planet Earth and not only, because I can leave the body, and also send phantoms if the egregor needs it , set something up, bring information, and so on.”

03:09 With whom did Abraham make an alliance? Number of person.

Alexey: First question. A very famous thing in Israel. Usually the letter gay ((ה', that is, the number 5 symbolizes the addition of the letter “gay” in the name of Abraham is added to all names. First there was Abraham, and then after the rite of circumcision he became Abraham. What meaning does the letter in the name carry, and what kind of union does he concluded and with whom?

Irina: This letter is also contained in the name of God. This symbolizes contact with God. Moreover, the number 5 symbolizes man, human qualities, it is the number of human civilization. And this letter symbolizes contact with God. Why after circumcision? I won’t remind you again, you and I have already discussed the topic of why the circumcision ritual was introduced. Within the framework of the egregor, this symbolized the dedication of the body, soul and Spirit to God. That's why this letter was added.

Vladimir: Who were we talking about when the Torah says that an alliance was concluded with God or with someone else?

Irina: With whom was the alliance concluded? Mirach Count, with whom was the alliance that is described in the Torah made? The alliance was concluded simultaneously with God as the Heavenly Father, with the Creator of the Universe, the alliance as an agreement to fulfill the Commandments, and on the other hand, it promised protection and assistance in Spiritual development. And the union, since the aliens were messengers of God.

I want to remind you that Yahweh is still Jesus incarnate, that is, the Spirit who has already become known as Christ, Mashiach, the Firstborn Son of God. I want to emphasize that he did not distinguish himself from God, he said: “I am one with the Father,” and when he flew in the body of a Tumesoutan to Earth to Abraham and to his descendants, to his children, he also did not distinguish himself from God, he acted on behalf of God. He acted and acts in the interests of the Divine mind. Therefore, at the same time there was an alliance with aliens. But it is temporary, in the sense that this is the construction of an egregor for its further incarnation on Earth, and also after incarnation, so that this egregor continues to raise the vibrations of everyone, not only Israelis, but all people who match its vibrations and agree enter this religion. That is, a union with God, as His Firstborn Son, and with aliens as material carriers of this Divine power.

06:50 Names of God.

Alexey: Thank you. I need to read the next question, it’s probably a little long, but it’s a continuation of the answer. The Torah mentions several names of God: Elohim, Yutke Vavke (Yahweh יהוה - pronounced this way so as not to mention the name of God), Bore Olam, that is, the Creator of the World, Hashem, when the word Elohim is mentioned in the text, the interpretation of the speech is about the mention of Judgment - Bemuvan Din . When mentioning Yutke Vavke, Yahweh, we are talking about the understanding of the mercy of Hessed.

What is the essence of using different names, or are we talking about different Spiritual entities or the manifestation of different Spiritual energies of the Spiritual world? For example: in the ten commandments, in the first commandment, the second, the third, the name Elohim and Yahweh are mentioned as God and the name, and if we literally translate the commandment itself, Anokhe Yahweh ..., I

translate into Russian: “I am the God of Yahweh, who brought you out of the land of Egypt from the house of slaves."

The word Elohim in Hebrew means God, it is plural, but if it is singular, then El. El, Elim - this applies more to the pagan Gods. Also in the prayers before the Jewish New Year, the prayer for forgiveness mentions a request that sounds like this: “Aneinu Elohei amerkava” - literal translation: “Answer us, God of Merkabah.” Question: who are we talking about, who are we addressing?

Irina: Come on, we’ll still talk about the same issue, I, for example, am already a little...

Vladimir: It is necessary to pose the questions more specifically or break them down into several, because there has already been a long story. You need to very clearly pose either one question or several, but first start with one.

Alexey: Okay. There are several names of God mentioned in the Torah. There is Elohim, Yahweh, Bore Olam, Hashem. When the word “Elohim” is mentioned in the text, we are talking about the understanding of Judgment - Benuvam Din, as interpreted by the sages. When mentioning Yutke Vavke, Yahweh is talking about the understanding of the mercy of Hessed. What is the essence of using different names, or are we talking about different energies of the Spiritual world and manifestations?

Irina: Do I understand the question correctly: what is the reason for mentioning different names of the same God?

Alexey: Yes. One could say so.

Irina: There are other names: Adonai, for example, is also Sabaoth, and they also called God, and Elohim, and not only El, called the pagan God, but the pagan gods were also called Elohim, if it was plural. And there is a place when, for example, the Israeli people draw up an agreement with the goyim, with pagan peoples, with some neighboring living peoples who had other gods and in the Bible, for

example, there is a lot of this in the Book of Judges, in the Books of Kings, when an agreement is drawn up, for example, on common borders. King David often drew up such agreements, then in that part of the Bible where the chronicles of ancient kings are often mentioned such a thing is that, for example, such and such a people swears there by Dagon or their God Baal not to violate the borders. And the Israeli people there swear by their God Yahweh not to violate the borders. In the Russian Bible it was translated “by the Lord his God.” In the original Hebrew, “Yahweh his God.”

In the Hebrew Bible we read: “The Philistines came and swore by Dagon their Elohim that they would not trespass,” and, accordingly, the children of Israel swore by Yahweh their God that they would not trespass. For those Jews who lived in those days, they also called the gods of other nations Elohim. Why? There is nothing surprising in this, because it was “mighty” in the language of the ancient peoples, but the original name in the proto-language is “The Highest One Who Came from Heaven.”

As you understand, other nations could very often deify representatives of plasmoid civilizations, who also descended from the sky, that is, in the vision of a priest, a ventriloquist, they appeared in the form of pillars of light, some powerful Spirits with animal heads, so almost all over the Earth there are images Gods have horns and hooves. Your scientists say that this is a cult of totemism, but the cult of totemism itself came from contacts. And all this was called Elohim.

And for what reason are there different names for one God? Because it is impossible to designate even a small part of his qualities with one name. Therefore, the one who came into contact with God in his soul expressed it in his own way: strong, powerful, omnipotent, for example. Even the same person in different states of his consciousness could call God differently, for example, the Lord is my witness, the Lord is my strength, even Abraham had several such moments when he called God differently while talking with him , he called Yahweh, who appeared to him, differently.

Accordingly speaking, from these names, even when he called in any locality, that “here appeared the Lord who helped me” or “The Lord who guided me.” He placed memorial stones in these places, and then cities grew there with this name in their names.

I want to say that the word “name” in Russian is not identical to what it means in Hebrew or Greek. In Russian, a “name” is simply a written name that means a specific person, it is just a symbol.

In Hebrew and Greek, this is not just a symbol, but denotes the entire set of personal vibrations and characteristics of the one who is called by name, that is, it is such a vibrational characteristic, the name of the essence, the essence. I would translate Kaeye not as “name”, but as “essence”, this is closer.

Since God’s totality is infinite, that is, any energy is a manifestation of his energies, therefore he has an infinite number of names. The ones you just named are some of the possible interpretations, but you can call it “God is love”, “God is light”, “God is the way” and so on, and all this will be correct.

Vladimir: Thank you.

16:05 Origin of the name Israel.

Alexey: The origin of the name Israel, after all they call Israel, another meaning is Yashavke “Straight as God.” How he fought the Angel, who he actually fought and why he got that name?

Irina: Do you mean Yakov now?

Alexey: Yes.

Irina: It was a contact in the Astral with a very strong high-vibration plasmoid entity, if you mean this particular contact, but it was sanctioned by Yahweh, by his curator, who was from Tumesout. And this was done so that he could transmit information from plasmoid civilizations too, in other words, to make him a universal contactee.

But he was not attuned to the vibrations of this plasmoid entity - it was of the 29th density level, and therefore his contact was accompanied

by damage from this energy. They exchanged energies, and this plasmoid entity responded specifically, you know that there are plasmoids that are responsible, for example, for a specific area. And this plasmoid entity of the 29th density level, naturally, for him was also Elohim, El.

At that time she was responsible for the territory of Mesopotamia, and came into contact; he was not only asleep, but in an altered state of consciousness. He went into the Astral and came into contact with her. She conveyed information to him about which lands were fertile, where it was better to graze cattle, where the boundaries of the campaigns were, where it was better to get water - all this in the form of images, what this plasmoid knew, he gave it to him.

His curator Yahweh was also in astral form, or rather, even in the form of a phantom, he was next to Yakov, and it so happened that when they exchanged energies through an energy connection through the astral body, this plasmoid energy entered his etheric and physical bodies, like up the steps. His etheric body was not ready. It did not match the vibrations a little, and was slightly damaged in the area of the first chakra, and therefore when he came to his senses, he walked with difficulty for several days, only with support, in other words, he had pain not only in his legs, he also had backache. This energy harmed him a little, this really happens, misaligned contact, but it happened once.

And for what reason, after this contact, not immediately, but a few days later, Yahweh Israel gave him this name, this means that he made it clear to him that he had moved to a new level of contact, to a new level of consciousness, and he is now the “Giving birth people” , that is, it’s something like “Giving Birth Creator.” It was after this contact, after he recovered (it took him three or four days), that he became ready to conduct through himself, so that Spirits would incarnate through him, and not only through him, and so that he could give them the appropriate energy and education, those Spirits who will later be the ancestors of individual tribes.

That is, a lot of strength was invested in the ancestors of your people, as in those who could later create this egregor. The fact is that the creation of an egregor of a people is somewhat similar to the creation of a religious egregor, but differs in that there the transfer of this

energy occurs not through egregorial initiation, but through the birth of a son by a father, and so on.

Therefore, in order for this people to be strong and united, such a special energy is transmitted so that they can hold on to each other and build their own specific structure. That is, he was given the task of creating the people. And the contact was with a strong plasmoid, but in the presence of Yahweh.

Alexey: And then what was the story with the spear or the arrow, that he was hit in the thigh, and since then this muscle, which is considered non-kosher, has been cut out of the meat?

Irina: The fact is that in the etheric body there are energy channels that go along the arms and legs. He was damaged in the area of the first chakra, but it was conveyed this way later, when Moses was already writing. For what reason? To give an understanding of how much the energy exchange with God, with a high-vibration plasmoid can influence.

Why is it cut out? As a sign of memory. In your religious egregor there are many food regulations as a sign of memory of some event. And even those institutions that have lost their relevance due to the fact that, for example, the climate has changed or in the territory where you live, those animals may not be found, but they are considered favorable for use as a sign of memory of that period of your people when this law.

24:20 Judaic commandments related to nutrition.

David: Our food is based on keeping the commandments. One of the commandments causes a lot of discussion: “Do not boil a lamb in its mother’s milk”, in the book of Exodus 23 verse 19, the book of Exodus, also 34 verse 26 and the book of Devarim 14 verse 21.

What is the meaning of the commandment? Is it relevant today? If you prepare a dish from beef brought from Argentina with goat cheese or chicken with cheese, then as far as I know, today among the peoples

who surrounded the Jews, at one time it was customary to make a sacrifice to the gods by boiling lamb in their mother's milk.

And the verse, which is mentioned in two books and in three places, is interpreted by the sages as one cannot eat, one cannot have pleasure, one cannot cook. Also, the verse has nothing to do with lamb meat, that is, "reptile"; in his works, the Rambam decreed a ban on any consumption of meat with milk, since the prohibitions elevated the law of the Torah, is that so? What is the meaning of "do not boil lamb in mother's milk"?

Irina: It was written there, not in the milk of the female of this species, it was written "in the mother's milk", do not boil a lamb in its mother's milk, so there was a purely energetic meaning embedded in this commandment for the reason that every animal soul, a mammal, is charged by milk its energy suitable for her baby. This applies not only to animal souls, it also applies to intelligent Spirits who are embodied in the body of mammals.

And this subtle substance in milk is a subtle vital force, like a type of prana, it is most suitable in vibration for this child. So this is laid down precisely by plasmoids, nature, natural instincts. If you boil a baby in mother's milk, then this meat acquires properties that are destructive to human energy, because mother's milk should nourish it, build its proteins. And when you heat it to a boil, it begins to denature the proteins, destroy its body. The energy that is in mother's milk, on the contrary, strives to build, and an energetic contradiction occurs.

And such meat becomes harmful to energy, weakens the aura, the vitality of the person himself. A person can use it, but he will need to spend part of his energy in order to later restore his energy, his vital etheric body. That is, it will take more energy to digest such meat, and it will give less strength. It was a purely energetic meaning, very similar to the commandment not to wear clothes made of two different materials.

David: It's called Shehnaz.

Irina: The energetic meaning was also meant. When clothes are made

of the same material, the aura is more consistent. You, of course, will ask: why then did this not matter to other nations? Because your people and religious egregor were being formed, energetically strong people were needed who could pass this on, that is, all the conditions were created so that you did not waste energy on some side things that could have been avoided.

30:05 The commandments of Judaism about nutrition. Expanding commandments. Sacrifices to Moloch.

David: Then I have the next question. It turns out that since it is impossible to boil a lamb in mother's milk, we see that when the three Angels came to Abraham to inform him that he would have a son, he fed them both meat and milk. We can see this in the book "Genesis" 18-8, this is the book of Genesis 18, verse 8, and God's Angels ate both meat and milk. The Jewish religion says: you cannot eat meat with milk, you can eat milk, wash your mouth and then eat meat, but if you eat meat, you must wait six hours and only then drink milk. Is this somehow connected with energy and with some prohibitions that were transmitted by the Almighty?

Irina: Abraham put food on the table for the Angels, that is, the messengers of God, accordingly speaking, these were representatives of the planet Burhad, I want to say that since they do not have enzymes for digesting animal proteins, before consuming these products, they used special capsules that contain these enzymes in the required quantities.

They take these capsules with them to those planets where animal protein is absorbed. This is just for such cases when you need, for example, to take part in a ritual dinner, and there they had not just a conversation, but in the form of a ritual dinner, a lot of important things were said about the Law, about fulfilling the Commandments and about the birth of children, and so on Further.

Eating meat with milk in itself does not cause energy harm if the person is healthy. But that prohibition about not consuming dairy and meat is based on the word specifically about a kid and meat, there were further regulations there, but in any case it does not have such a meaning, and especially did not have such a meaning for Abraham,

everyone his children. They could easily eat cheese and dried meat. They dried the meat, they show me how they made the plates.

Vladimir: Does this mean that this ban was based on the fact that it was said “do not boil a kid in its mother’s milk,” and then this spread by inertia to any milk and meat in general?

Irina: Some people, having read this commandment, believed that in general consuming dairy and meat is harmful. This is very similar to how, for example, modern Orthodox priests or people recognized by the Holy Fathers, having read in the Bible that sorcerers will go to hell, prohibit extrasensory perception, that is, they say: “Psychics are also sorcerers,” since they are also what Something they do there with their hands is invisible, incomprehensible, which means they must go to hell. And that’s why hypnotists and sorcerers are prohibited - this is called a broad interpretation of a certain commandment, and this is very common in all religions.

We treat this with understanding and respect, but in any case it will be better for your development if you pay attention to the very meaning of the words. Because if God wanted to give the commandment in an expanded sense, he would have said that dairy and meat are forbidden to be consumed together. And what then is the point of saying “do not boil a kid in its mother’s milk” if it is generally prohibited? If eating this is prohibited, then it would be easier to prohibit combining these products altogether, and then it would never even occur to anyone to cook anything.

David: As far as I know history, this ritual of boiling lamb in mother's milk was very popular among those nations that surrounded the children of Israel, and God always said that the children of Israel should not imitate those nations, and accordingly he forbade them to do it, so that they do not become the same as the peoples who surround them.

Irina: The fact is that they boiled the cubs in mother’s milk precisely because of the establishment of plasmoids, which liked the energy that was released at that moment, but it was not useful for humans. There are plasmoids that enjoy, feed on and enjoy the energy that is released when killing living beings.

Vladimir: That is, they essentially enjoy the conflict of energies.

Irina: Yes, these enjoyed the conflict of energies, others enjoyed when an animal or person was killed, there were human sacrifices very often among the nations surrounding Israel.

Why? Because it was believed that a person contains this energy more than an animal, he is more valuable, and so on, and therefore, naturally, they always tried to give the most valuable things to God, they believed in him, in his help, they loved him, even such as Moloch. Naturally, they tried to give him the most valuable thing - their children. They even got to the point, as you know, that they didn't just cut off the child's head so that the energy would come out of him and be absorbed by the plasmoid, no, this was not enough for the plasmoids. They were already so fed up that they came up with the idea of lighting a fire inside the statue of Moloch, it became red-hot metal, and placing a living child in his arms. All this time, while he wriggled and fried there, the plasmoids rejoiced and absorbed his energy. There was such a custom, and by the way, it was also prohibited to the Israelis. That is, the Israelis at some point tried to repeat this custom after them, it seemed logical to them, this is God, and I gave him the most valuable thing, my child, this is how much he will give me in return, that is, some kind of trade was obtained.

Vladimir: I want to return to that important point once again. And to say this again, and I really heard in this a logic that was completely obvious to me, that if we were really talking about banning the combination of dairy and meat products, then it would have to be said about it, it would be logical.

And then there was no need to talk about the story of boiling a kid in mother's milk separately, and it would have been clear that they couldn't be combined. But the fact that this was not talked about suggests that this was the main commandment, and then for various reasons it was expanded to any combination of milk and meat.

Irina: In the surrounding peoples there was even such a thing: as soon as a goat or cow gave birth to a baby, after they had been milked for the first time, the baby was slaughtered, cut into pieces, boiled, then it

was all distributed to everyone who was present in this ritual, and to those too the energy became weakened. And the animal that was left without a cub was waiting for him, it was attached to him, yearning. This is the animal soul, it also yearns. And these plasmoids also fed on the animal's melancholy, that is, there was a whole conveyor belt for transmitting such emotions.

Vladimir: Let's call everything by its proper name: there was a conveyor belt of vampirism, that is, they were fueled by this energy of suffering, they vampirized to the fullest extent, well, without any assessments, just as it is, so it is. The donors were these suffering intelligent or animal Spirits, and the plasmoids that were not too highly vibrational were fed, and people, out of their ignorance, organized all this. Here's the situation.

Irina: But they also received from them certain things that this plasmoid could give, but only if, of course, the plasmoid wanted to fulfill this promise. Perhaps, on the contrary, he did not fulfill it in order to plunge the person into anger.

Vladimir: I see. We just said an important thing, some may like it, and some may not, but in essence we just said that boiling some animal in its mother's milk really causes energetic destruction, weakening of the energy, auras of that, who will eat this meat is understandable.

But if you simply combine dairy and meat products, then there is no other harm except purely believing in it, if you believe in it that there will be harm, then there will be harm. There is no harm here other than religious aspects. What we actually said just now, did I understand correctly?

Irina: Yes, everything is correct, Vladimir said everything correctly, conveyed my thought very well. I want to once again say to those involved in the Jewish egregor who are present here that this would be a mention of not boiling a kid in mother's milk, if there was a prohibition not to eat dairy with meat, it would be so meaningless if, for example, they wrote on one page "We forbid you to eat pork," and three chapters later or in another book it would be written "We forbid you pork tongue and lard."

Vladimir: That is, there is no longer any need to talk about the private when there is a general ban.

Irina: If it said, for example, “we forbid you pork meat, except for such and such parts,” tongue, lard, and so on, it would be understandable, but if we first forbid you the whole pig, and then there’s also the additional language, then it’s already somehow strange.

David: A fish, for example, that has scales and fins can be eaten, but one that does not have one of the two cannot be eaten. Very clearly defined.

Vladimir: Please comment on the fish.

Irina: Only the word “fish” does not actually mean all sea animals. There are indeed fish that have skin instead of scales, and they were prohibited, I will now explain. Some fish of the same species that were found in the Mediterranean Sea were dangerous because they had poisonous organs, and since these species were similar, people could get confused and poisoned.

The situation is correspondingly similar with the pig and with all predatory animals. Predators were also prohibited as food, such as wolves, dogs, and so on. The pig was banned because it is an omnivore. This was mainly due to the high prevalence of trichinosis. This is the first point.

Since it was a very hot climate, trichinosis did very well, these are small larvae in the muscles, and in order to kill this infection, these parasites needed two hours of treatment at boiling temperature. As you know, the contemporaries of Moses and even David cooked not with gas or electricity, but with fires; it was very difficult to cook this meat safely for two hours; you would have to store a lot of firewood. And if your curators allowed you to eat pork, but commanded you to cook it for two hours, then I assure you, no one would comply with this, and everyone would simply become infected. It greatly suppresses the immune system, causes allergic reactions, and reduces the ability to resist cancer. This was done mainly for the sake of your health.

Alexey: Today there are no problems, the meat is stored in the refrigerator and checked by veterinarians.

Irina: Yes, today it is checked, but in ancient times everything was different, whoever kept the cattle used it, and even now there are people who keep it for themselves, of course, they can inspect it themselves, but you know, you may not see everything , they can be hidden, usually they can be seen with the naked eye if there is a strong infection, but you need a microscope to look at them, and not everything is taken to the laboratory. Some simply consume from their own backyard or simply sell to others, not from the meat market, but from the backyard; this, at least in Russia, is very common. They are also at risk.

Vladimir: That is, if you eat pork and do not believe that it will be bad, and it will not be infected, and the person is at high vibrations, then he will not lower his vibrations and will still be able to go to heaven after death, even though ate pork.

Irina: I want to say that if a Jew eats pork, this does not mean that he will not go to heaven. It is the hygiene ban that is based on physical health. I want to say that, for example, lard without streaks of meat is absolutely safe, that is, in terms of trichinosis, it can be eaten.

Why didn’t they tell you about lard then? I will also explain this that you can eat lard. Because Yahweh and all his Angels understood perfectly well that no one would keep pigs just for the sake of lard. Just to keep a pig for eight, nine months, a year, then slaughter it, cut off the fat from it, and give the rest to the dogs, no one would do that. Who would feed a pig grain and then throw it away? Either you ate it yourself, or you would sell it, spreading the infection. I repeat once again, then there were no such developed stores and markets as there are now; most were kept for themselves.

Alexey, David: Thank you for your answer.

47:45 What did Moses do on Mount Sinai? Making the Tablets of the Covenant. Appearance of Yahweh.

Alexey: How did Moses receive the Torah, and in what form? What did he record on when he was at Mount Sinai? There is no mention in the Torah, but only that he received it, this is the book of Exodus, chapter 19, “Sefer shmob parekyu ted.” What did Moses do on the mountain for forty days twice?

Irina: He was not only on the mountain these forty days, he traveled on a ship to different planets. He was shown the Moon, bases in the solar system, the satellites of Saturn, Tumesout, Burkhad. And all this time he gained knowledge. Not only did Yahweh talk to him, but representatives of Burkhad also talked to him, explained to him the structure of the Universe, and also told him about plasmoid civilizations and their role for life on Earth. They also told him about the Galaxy in a form that was accessible to him, saying that the stars you see are very large suns.

But he considered this sacred knowledge, not accessible to everyone. And these commandments that they gave him, the ten main, very first commandments, from which all the others then proceeded, they took two smooth stones, right from the same mountain, but they made them smooth. That is, they polished it with a special beam, which made the surface layer of molecules uniform so that there were no protrusions. And then, using a special beam that can cut stones, the Tumesout aliens turned it on at low power, first spoke the commandment to Moses in a voice and explained its meaning, because some words could be interpreted in different meanings, and then directed the beam at the stone. He hung in the air, held in an anti-gravity field, and a beam of bright purple color was aimed at him, which passed along the stone, and words were carved there.

Vladimir: Engraving was essentially engraving on stone with a beam.

Irina: Then they asked him if he had any questions. If he had no questions, they moved on to the next one; if he had questions, they answered him, there were three of them: Yahweh was there and two more representatives of Tumesout, his friends.

Vladimir: What exactly did Yahweh look like? Can you describe how Moses saw him?

Irina: He didn’t see him, he saw a white light, like a curtain, it didn’t appear to him at that time, there was just a voice that told him: “Come here,” he only saw when he was flying, Burkhadians, representatives of Disaru, he was with them contacted like with angels.

Vladimir: What did Yahweh really look like in his physical body then?

Irina: But he is tall, like a lamppost.

Vladimir: How many meters approximately?

Irina: He was 12 meters 88 centimeters. Tumesout stood between four and eight meters, and Yahweh was much taller than average. He was taller than all the Tumesoutians who were nearby. There were 9-10 meters there, but there was no 12-meter one.

He had dark hair, huge dark blue eyes, and at the same time, when they look, the pupil dilates and they become dark. A straight nose, a straight chin, skin like a European, but a little darker, closer to brown.

Vladimir: It’s not even a lamppost, it’s a multi-story building, right? For five floors and above. A seven-story building, probably.

Alexey: You can’t invite him to visit us, there’s nowhere to put him.

Irina: He is now in a different body.

Vladimir: Now he is in the body of Jesus, we understand. Then Yahweh was Jesus incarnate. Let's continue then. Thank you.

54:10 Oral Torah. Mount Sinai in the Spiritual World.

Alexey: What is the oral Torah?

David: Who gave it to you?

Irina: The Oral Torah is given continuously. This is the Divine law that is laid down in the heart of everyone in the form of a natural moral law or the image of God that is in you. Why oral? Because it can be manifested in the material world through the mouth. But oral is only one side of this Torah.

The Torah, the universal law, is still transmitted through hands, which manifests itself in the world through actions. Near Mount Sinai there were also present from various past and future souls of Jews, this is actually not just like that. This is a view from the Spiritual world, what you just said is not a view from the material world, when we are here and now, but in the Spiritual world this happened outside of time, that is, in the Spiritual world it is happening now.

Every person can come into contact with a Jewish religious egregor. To tune in to this time and get to this mountain at the exact moment when the Torah was transmitted, that is, to be a direct witness, but he will see it not physically, but in energies, he will see not physical objects, but reflections of energy from real objects, because that this will happen in the Spiritual world. In any case, it will be natural, through his perception, but he will be present there, because the Spiritual world is embedded in the physical, just as the air permeates a room.

Therefore, around Mount Sinai and in it itself there is also a Spiritual world, it is embedded in it, and you can be present there, they are just different dimensions. This is what was meant when “all the souls of the Jews were present”, it was meant that everyone can be present in this Spiritual body when they desire it and immerse themselves in the appropriate prayer to God and a state of contemplation.

Vladimir: You can go further, right? Thank you. Next question.

57:30 Giyur.

David: A question that is connected with Giyur, that is, the transition to the Jewish egregor. The theme of a non-Jew's conversion to Judaism

is sharply posed in our days. Great efforts are made to verify Jewishness by religious authorities. But from the Torah we can notice that the wives of the forefathers were not from the people of Israel. In order to accept Judaism, it was enough to say the phrase “Amha ami velho eha Eloghai,” that is, “Your people are my people. Your God is my God." Why have modern transition requirements changed so much, and what are the reasons for the tightening of the rules?

Irina: Modern Jewish religious bodies in this case are fulfilling the task of your political elite, the political task of preventing certain people from entering your country who will become citizens of your state without actually accepting your religion, in this case this is such a defensive reaction.

David: But the fact is that the adoption of religion is studied today by "Hallah". What is "Gallah"? In the Torah itself, in the Pentateuch, or even in the Tanakh itself, there is no such word “Hallakha” anywhere, and basically the entire Giyur exam takes place according to the oral Torah, the laws of which were given by Rambam, Rabbi Shimon Bar Yochai and others.

Who are these people, and why should we put them on the same level as we put God today? Why do we live according to their laws, and not according to the laws that are written in the Pentateuch?

Irina: Because the law that was in the Pentateuch was given for that time. Now your political, religious and global situation has changed compared to the time four and a half thousand years ago. And that is why, as you know, after the Second World War, the Jews were almost immediately given the opportunity to gather in a separate state. This was a step that was progressive for your people, but it was somewhat unexpected and undesirable for some peoples who lived in that territory. And, of course, there was and is a conflict of interest, and therefore the territory that the United Nations allocated for Israel was limited to certain limits, and therefore a law was passed stating that those Jews who profess the religion of their fathers would be accepted into the new state.

That person from the goyim who accepted Judaism became the right to move first of all to your state, and a certain space should have been

ready for him. In order to somewhat limit the flow of those who want to live with you from other nations, this law was adopted so that people study the oral Torah, the writings of rabbis, study longer, there is more material, more such subtle passages that are difficult to remember. This is a temporary measure precisely because of the political situation, and in general, acceptance into Judaism itself is accomplished only by the belief that Yahweh is God, Moses is a prophet, and it is necessary to keep all the commandments.

1:02:35 Recommendations from Mirah Count (Archangel Gabriel) to the peoples of the countries participating in the Arab-Israeli conflict.

Vladimir: Thank you very much. Now I want to ask one question in context. And please tell me, Mirakh Count, can you give, my only request is not very long, not very long, but still some recommendations: we know about the constant conflict between Jews and Arabs in and around Israel, and now , including, we know, there were rocket attacks. Can you give any recommendations: what to do in this situation, is it possible to somehow resolve it and how exactly? In this case, we are talking with representatives of the Jewish egregor, but I think everyone will hear this.

Irina: The peoples of all countries participating in the conflict are interested in its speedy resolution. It is the people, not the rulers. Because war always means hunger, devastation, destruction, tears and pain for all participants in the conflict. And all that is needed to resolve this conflict for many centuries is the religious and political leaders of all countries: authoritative representatives of the Arabs and representatives of Israel, as well as representatives of the major states of the Earth, who will be mediators, must gather for a meeting at which the issue will not be resolved. about the land that is already Israeli, and about those people who are suspended in the air, and Israel does not take them and the Arabian countries do not take them, they have been in such a legal vacuum for many generations.

This situation has developed due to some short-sighted decision of all participants in this conflict, carried out earlier. And now a fair solution will ensure a solution to this conflict. And only the distribution of these residents across all countries can be fair. But the government of Israel, the governments of Arabian countries, other helpers who are ready to help, must be willing to provide them with any territory for free, since

they do not have money to buy, they are refugees, just at their own expense, naturally not at the expense people who already live in this territory, but for the state.

In order to resolve the conflict, this is the first goal, and the second goal is to create an image of a fair, religious, pious state where every soul is valued. That is, simply collect, count those people who remained on the territory of Israel, but outside the legal framework, and simply distribute them not only in Israel, of course, necessarily taking into account their desires, all this should be harmonious, all parties should participate in this, and offer your help.

Only then will the mutual anger of people towards each other gradually decrease, because this mutual aggression initially occurred because of the issue of territories, only then because of the issue of different religions. First, it is the territorial issue that needs to be resolved. And we can simply help those people and their children who exist now to find their own housing, the opportunity to work, provide for themselves, provide medical care, and so on.

He says that the Arabs who are in Israel have nowhere to go. There they have some empty space left, and no one takes them. But the territory itself is Israeli, and they believe that it is theirs, they just need to be distributed among all neighboring countries.

Vladimir: The idea is clear.

1:08:35 Eleven tribes of Israel.

Alexey: In Hebrew, the word “Jew” sounds like “Ivri” from the root “Avar”, that is, “passed over” or “past”, we are most likely talking about Abraham, who came to the Land of Canaan in the city of Hem, the book of Genesis. It is interpreted as having crossed the river into the land of Canaan. Another word that is used in English is Judi, just like in Hebrew, but this word is also the name of the Jewish faith.

The Jews are the inhabitants of the kingdom, that is, the Jews are the people who are the inhabitants of the Kingdom of Judah, and their

descendants underwent the rite of initiation into the religion and then followed the rules. There were also eleven other tribes that also kept the Law. There is only one knee left that we know about, and others still sometimes talk about them. Where did those eleven tribes go, and who are they?

Irina: It seems to me that I have already answered this question. The tribe itself consists of people, and it cannot disappear anywhere, its descendants cannot disappear, or more precisely, the descendants of these peoples, tribes, tribes live in the nations surrounding Israel.

But now it is very difficult to trace the genealogy of each of them. Because after the division of the kingdom of Israel, representatives of these tribes left, gradually wandered further and further from their homeland, their children even further, and now their genes, if we are talking about genes now, are scattered in 25 percent of the same Palestine, Syria, and so on . They went to the southwest, towards Egypt, a smaller part towards the Arabian Peninsula, some with caravans of merchants went towards China. There was already such communication with China, and further north. Where are they? These tribes no longer exist, but their descendants exist.

Alexey: That is, they exist, but they are already different peoples and have not retained their identity.

Irina: Yes, of course, they left, and their children did not keep the memory of this people, and, naturally, they began to be called representatives of the peoples where they came. This happened, for example, with the Aryans, who from the territory of the Russian Plain moved south, southeast to the territory of Hindustan, mixed there with local Dravidian tribes and began to be called Indians, although they are Slavs, or rather Proto-Slavs in origin. It happens often.

Or the same thing when representatives from Spain, Portugal, Italy, and Great Britain moved to the American continent. At first they formed some colonies of their own state. But then their children and grandchildren gradually mixed with the local peoples who lived there many millennia before their landing. Joint offspring were formed. A state was formed that began to consider itself identical to itself. No longer to those peoples who came originally, but to the indigenous

peoples who live on this continent. This happens quite often.

1:13:15 Book of Zohar.

Alexey: I want to ask a question about Jewish mysticism, which some accept and some do not, the book of Zohar, the basis of Kabbalah itself, written in Aramaic. What information does this book carry, having 16 volumes?

I'll tell you a little background on how it was written. Its author is Shimon bar Yochai, as it is written, he is called Rashbi. By the way, there was an event on our holiday when we went to pray, and a great tragedy happened there, people died.

Kabbalists explain this book as a more detailed interpretation of the Torah; in the Middle Ages, Ari Yitzchak Luria also wrote a treatise as a continuation of the works of Rashbi, and in the twentieth century these texts were already translated from Aramaic into Hebrew “Rabbi Ehuda Levi Ashlah Baal Sulam.”

Question: is the study of the Book of Zohar relevant today, how can it help people in spiritual development using the meditation and breathing practices that they use?

Irina: He says that this book has more than one author. It was collected by several authors of older oral tales. At first it was transmitted orally, and then it was written down, and at different times. The meaning of this book is that in every symbol, letter, number there is a Divine meaning. Symbolism is very common in earthly religions; through a symbol you can access the type of real divine energy that it denotes.

Who is it suitable for? It is suitable for people with a certain symbolic type of thinking, with a large percentage of figurative thinking, naturally, Zohar, Kabbalah is suitable for those who follow the path of mysticism not just as a rite, with the help of some rituals or the fulfillment of religious instructions, but who need a symbolic description . There are personality types on Earth who need this, and for such it is

useful. If you do all this with faith, with love for God, with faith in these ways, and, naturally, without judging other paths that other people may choose.

Vladimir: Thank you very much! And then let us now give Mirakh Count the opportunity to tell us whatever he wants, to convey any message from him to representatives of the Jewish spiritual egregor and simply to all Jews.

1:16:30 Message from Archangel Gabriel - Mirakh Counta.

Irina: My dear brothers and sisters, I convey to you the Light of my love! Remember that your Guardian Angels, God's messengers and bright Spirits are always next to you, but they do not come to you when you do not want them, so as not to violate your freedom. They come closer to you when you pray to God, when you ask them for help, they send you their Light of love so that you are stronger, wiser, and so that you go through this path of life with benefit for yourself and for others.

I want to wish you that every day of your incarnation on Earth brings you not only the light of the Sun, but also the discovery of a new facet of the Divine Light in yourself and the ability to carry this Light to every soul you meet on your way, because it is precisely the shortage of light that is now observed on Earth, and you really need it during this important period of worldwide quantum or energetic transition into new vibrations. Keep it within yourself and increase it, and then you will enter the joy of your Lord, that is, you will be in His energies.

Vladimir: Thank you very much! I want to thank Mirakh Count for, in my opinion, the most powerful and important information that he conveyed to us in answering all our questions. Thank you very much, Mirah Count - Archangel Gabriel! Thank you very much, Alexey, David for the very interesting questions, thanks to which such interesting answers became possible, you prepared very seriously, this is quite obvious, thank you very much for your participation!

David: Thank you for the opportunity to ask these questions, you answered questions that have interested us for a very long time. Thank you, your curators, who gave you the opportunity to answer these

questions for us!

Irina: Okay.

Vladimir: Well, friends, all the best! See you again on air!

Irina: See you again!

July 2, 2021

Conference participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Mirakh Count - Archangel Gabriel - representative of the planet Burkhad, disciple of Jesus Christ, guardian of the Christian egregor;

Vladimir Goldstein - administrator of the Cassiopeia project;

Alexey is a guest from Israel;

David is a guest from Israel.

Video in text
November 8, 2023

#486 Live broadcast with the main curator of the project – Archangel Gabriel (Mirah Count)

https://blog.cassiopeia.center/pryamoj-ehfir-s-osnovnym-kuratorom-proekta-arhange
https://www.youtube.com/watch?v=lW9goRtFi7Q

00:00 Start of video.

00:03 Principles for posting videos on the Cassiopeia channel.

Maxim: Dear friends, hello everyone. I'm starting this broadcast again, as always. Forever yours - Rusan Maxim Sergeevich, head of the Cassiopeia Project. We've had another week of training. And we have a lot of new interesting news for you.

The first news will probably make few people happy. I, as the head of the Project, decided to remove two videos from our channel: the first is “Prince Vladimir”, the baptist of Rus' and “Stepan Bandera”. I immediately want to apologize to all our viewers for trusting us and watching this video.

But, in connection with changes in our Russian legislation, in connection with the tightening of the fight against extremism and the justification of fascism, I, as a lawyer, after consulting with my friends, still decided not to risk the entire project and remove these two videos from our channels. I hope you understand.

No one had any influence on me. I made this decision on my own because I thought there were extremist notes in this video. Plus, when Stepan spoke, he never apologized, he made excuses. Our state, unfortunately, does not yet perceive esotericism as science, so although the information was transmitted by Stepan Bandera, it turns out that for our state, the information was transmitted by Irina.

This circumstance may affect our project. Irina conveyed the words of Stepan Bandera, who justified his actions, which could be equated to the justification of fascism, Nazism and much more. Therefore, I decided to remove these two videos.

Where's the sound? No sound? How can you hear me, people? Everything is. I understand, thank you very much. Thanks a lot. I just

thought there was no sound.

So the news is, of course, not very good. Indeed, the videos were very open, very frank. They were transmitted by the Spirits who participated in those events.

Why did you remove “Prince Vladimir”? You know, to be honest, there is a very large amount of information there, which, I believe, greatly discredits the honor of a person who was elevated to the ranks of Saints by our Russian Orthodox Church.

And I, as the Project Manager, also made this decision. I am baptized, Orthodox by faith, so I considered these videos undesirable on our channel. And I am confident that this step will protect our entire project from possible destructive influences from our law enforcement system, our structures. Therefore, once again I apologize to all our viewers, but, as a lawyer, I realized that this needs to be done.

04:01 Specialists from the Center for Spiritual and Physical Development “Cassiopeia”.

Maxim: Let’s move on to the good news. From September 19 to 25, our Center for Spiritual and Physical Development “Cassiopeia” will have a very interesting program on teaching regressive hypnosis. We made a decision because we realized that the Cassiopeia Project needed to provide not only information from representatives of the Interstellar Union, but also from highly qualified masters who have long been studying various areas, including regressive hypnosis, who have a large number of certificates.

One of the managers of the Cassiopeia Center branch will conduct training in regressive hypnosis. The program is cool, harmonized with the information of the Interstellar Union. You will be taught by a cool teacher who conducts regression sessions. She studied with many masters. The first link is under this video. From September 19 to 25 – Regressive hypnosis training program at our Cassiopeia Center.

Everyone is waiting for information about our retreat for the entire

Cassiopeia Project command staff. It was announced that this was Nalchik. But we had to change our plans. Our curators and mentors did not allow us into Nalchik, probably for reasons. The retreat of the Cassiopeia Center will take place in Krasnodar from September 27 to October 3. The entire staff of our center:

Nadezhda Viktorovna, a highly qualified specialist with a medical education, will conduct testing using Oberon equipment.

Ilya Alexandrov – my assistant, assistant manager, wonderful project master and head of the “Mental Healing” project will conduct classes. Ilya will also conduct diagnostics using the Crownoscope and Aurabook. What it is? You can read on our website of the wellness center.

Alexey is a visceral massage therapist. You will be treated using three visceral massage systems.

Yulia will take a bioenergy massager. In the Cassiopeia Project, we have a technique for accessing the Higher Self of those whom nothing takes. There are also those who want to do this, but cannot. Julia does this through bioenergy massage. Biocurrents are directed to blocks on the physical level, removes these blocks and brings a person to the Higher Self.

The link to the retreat and registration in Krasnodar is under this video. The second link is in the descriptive part. You can go to this link, we are already registering people. We are waiting for you in Krasnodar. There will be a cool, cool retreat for the first stage of the Cassiopeia Project with all the center staff. Guys, we are waiting for everyone in Krasnodar. Therefore, sign up. See you there.

08:10 Introduction of participants.

Maxim: Today's broadcast. We wanted to invite Nostradamus. When a request was made, it turned out that Nostradamus was currently incarnated on the planet of the Order of Six. These are reptilians who interact on the astral plane with people and destructively set them up

for self-destruction. Nostradamus, unfortunately or fortunately, is now embodied there. We didn't risk broadcasting without his consent, because the information would be distorted.

We decided to invite our main Curator of the Cassiopeia Project, Mirakh Count, a representative of the planet Burkhad (Burkhad is one of the planets of our creators), who in our Christian religious egregor is described as Archangel Gabriel, to the broadcast.

I give the floor to our wonderful Irishka, our "gold of the party," our "scarlet flower." And I'll probably play the role of a monster for now. Have a seat, Irisha.

Irina: Good evening, dear friends. Hello. I welcome everyone.

I congratulate you on the feast of the Dormition of the Blessed Virgin Mary.

Maxim: Yes, by the way, I also congratulate you on the feast of the Dormition of the Blessed Virgin Mary.

Irina: We are starting the broadcast.

Today we have with us the Curator of our Project and the patron of the egregor "Cassiopeia" (this is already a separate egregor, although it is three years old, it is quite powerful) Mirakh Count from the planet Burkhad. On Earth he is better known by his Spiritual name - Archangel Gabriel. He has been embodied on the planet Burkhad for more than six thousand years and, among other things, oversees our project.

Greetings.

Maxim: Mirakh Count, I greet you. I will call you Mirakh Count. I'm more used to it this way.

Irina: Okay.

Maxim: I remember our first meetings and acquaintance, approximately three years ago.

Irina: Yes.

Maxim: After talking with you for a long time, I asked you to shoot a video and answer our questions. In that video you introduced yourself by your Spiritual name. I was in shock. This was not clear to me. I could not compare: what does Archangel Gabriel have to do with it and what does Mirakh Count from the planet Burkhad have to do with it.

Irina: When you asked, he answered: “Archangel Gabriel.” And you asked: “Who?”

Maxim: Yes, I asked: “Who?” and turned off the camera. I remember this for sure. For a long time I was worried about how we would be treated with this information.

I thank you for your support, for your help in the formation of the entire egregor. I consult with you a lot. You give me good, practical instructions that I try to follow. Of course, I understand that I don’t always do what I need to do, but I try as best as possible for me.

Irina: You and I incarnated together, and so did Irina.

Maxim: I already understood that one big gang is climbing all over the Galaxy.

Mirah Count, I want to ask the first question.

Yes, by the way, dear friends, you can write your questions here on YouTube. We have a “Question and Answer” chat, live broadcast. I will also peek into this chat. Maybe there will be interesting questions there.

12:50 Archangel Gabriel about the Feast of the Dormition of the Blessed Virgin Mary.

Maxim: The first question, the answer to which I would like to know. Today is the great feast of the Dormition of the Blessed Virgin Mary. Please tell me why it is called “The Dormition of the Virgin Mary”, and why is this holiday famous? Why was it made a holiday, what happened on this day?

Irina: Yes, indeed, it’s a holiday. The word “Assumption” in the old Church Slavonic language meant the transition to the Spiritual world. A holiday is a significant event. This holiday celebrates the event when the mother of Jesus Christ, who is called Mary the Mother of God in the Christian religious egregor, left the earthly world. This is how it is celebrated in Christianity.

In fact, something else happened. Mary, who is called the “Most Holy Mother of God,” on this day (she was already of a venerable age, but did not lose her sight, hearing and clear mind), left her physical body on this day, but her connection with it was not interrupted. She fell into what you call a coma. Her breathing and heartbeat were practically not recorded, but, nevertheless, she was alive.

This state lasted (shows) five days. In this state, she met her son, his phantom, in the Spiritual World. They agreed that his mother, the Mother of God, would not interrupt her life thread, would return to her body with his help and move to the planet Burkhad, where her son was already located by that time.

I myself participated in this operation, and I remember it very well. By that time, her body was in the cave (shows the cave). People buried her, considering her dead, because she did not move. They checked if she had any signs of life, but did not notice any breathing. This happened often before. When we flew after her, there was no one around the cave where her body lay. We entered the cave, moving the stone (shows) with an anti-gravity beam.

Maxim: She was also buried in a cave, which was covered with stone?

Irina: Yes. There was such a custom. Many famous rich people were buried this way in that country. In this case, her funeral was paid for by the disciples of Jesus, who collected an offering.

We took her onto the ship, brought her to the planet Burkhad and there we began restoring her body. She did not have a lesion, but low energy in the vital organs due to age. There were no serious illnesses. I participated in the medical examination and restoration of her body. Despite his age, there were no serious pathologies. She lived for about three hundred more years using technology on the planet Burhad. Then she came out of incarnation.

Maxim: She lived with her son Jesus, it turns out?

Irina: On his island (shows) Maria had a separate room, a separate house, white.

Maxim: She was incarnated for another 300 years?

Irina: More precisely, 297 earth years.

Maxim: Who made the decision for her to come out of incarnation?

Irina: She herself.

Maxim: She herself?

Irina: Yes. She said that she now needs to be in the Spiritual World. From there she will be able to take more care of the already well-formed Christian religious egregor. One of the eras of persecution of Christians, whom she perceived as her beloved children, was beginning.

Maxim: Thank you.

18:28 Archangel Gabriel about his incarnations.

Maxim: Archangel Gabriel, please tell me, you are incarnate now, right?

Irina: I am in embodiment.

Maxim: Why do they call you “Archangel”?

Irina: Because I'm on level 23.

Maxim: Is your Higher Self, your Spiritual Self, at level 23? How to explain this? How is this correct?

Irina: And my Higher Self and I.

Maxim: Your Higher Self and you.

Irina: Yes, we are one with him. But, we can say that now some part of my Higher Self has moved to the 24th level, because I am in the transition to it. When I leave the incarnation, my level will be the one that I have reached by that moment. But now I'm at level 23. Incarnated on the planet Burkhad from the 16th.

Maxim: From level 16?

Irina: Yes. It was 6026 years ago (shows the number 6026).

Maxim: Valery, if you write that I’m ruining everything, then clarify that I’m ruining everything. I'm trying to ask questions.

Mirah Count, please tell me, have you ever incarnated on Earth?

Irina: Yes. I have incarnated on Earth 32 times, but at different density

levels.

Maxim: Incarnated on Earth 32 times?

Irina: At different levels of density. If we take the physical plane, I incarnated 3 times. But this was before the war.

Maxim: Before the war 12 thousand years ago?

Irina: Before the war, 12 thousand years ago, I incarnated on Earth, for three million years.

Maxim: Please tell us who and where did you incarnate?

Irina: I incarnated into Teraxis. This was a man who lived about 600 thousand years ago. He was a city builder, an architect, on the territory of your Kola Peninsula. This was on the site of the Arctic Ocean. There used to be a lithospheric plate there, it sank later (the Kola Peninsula is part of it), there was no ocean. I lived there.

Maxim: And the second incarnation on Earth in dense material form?

Irina: The second incarnation on Earth was approximately 210 thousand years ago. I incarnated as a girl who lived in the area where the peak of the Himalayas is now located. Then the mountains were much lower (shows), like hills. They rose due to the impact on the core of Selbet's special weapon, which destroys the cores of planets. This girl (shows) lived among nature and carried water in a jug.

Maxim: And the third incarnation?

Irina: And the third incarnation was literally before the war. I didn't see the war. A little over 13 thousand years ago. I was incarnated in the city you call Atlantis. I lived a fairly long life, about two hundred years at that time. He was a priest who served the gods (shows how he lights some incense, he has a beard).

Maxim: I understand. What about your previous incarnation? Are you now 6 thousand years old by our earthly standards?

Irina: Yes.

Maxim: Where was your previous incarnation?

Irina: I was incarnated on Venus at the 19th density level.

Maxim: On Venus at the 19th density level?

Irina: (Archangel Gabriel) I participated in the cleansing. This happened about nine thousand years ago after the war with Selbet. At the 19th level of density, I participated in the primary cleansing of the planet's atmosphere by influencing the elements that caused degradation of the atmosphere (deterioration of its quality for living organisms), by directing ethereal energies to these elements, which disassembled these atoms into quanta.

Maxim: Please tell me, during the war 12 thousand years ago, where were you incarnated?

Irina: When there was a war 12 thousand years ago, I was not incarnated.

Maxim: Have you been to the Spiritual World?

Irina: Yes.

Maxim: Did you look from the outside, from the point of view of the Spirit from the Spiritual world? Yes?

Irina: (Archangel Gabriel) Yes, because he was not incarnated.

I learned about this from the Spiritual world.

Maxim: Thank you.

I'll ask you more personal questions because people are interested. Please tell me if you have a family, children.

Irina: Yes. I have a family, a wife. We have been living with her for about four thousand years (shows). We have four children. These are Spirits who agreed to incarnate through us.

Maxim: I see.

24:40 Archangel Gabriel about Jesus Christ.

Maxim: Please tell me, when Christ came to incarnate, did you know in the Spiritual world that he would come to Earth, and you would help him?

Irina: Yes, I knew. I knew him for a very long time (shows). If you look from the position of the Spiritual world, I have been familiar with him for eternity, I knew him. When he incarnated on the planet Tumesout, I already communicated with him. I communicated with him (shows) from the Spiritual world.

At first I communicated with him from the Spiritual world. When he incarnated on the planet Tumesout (this happened about five thousand years ago), I was already incarnated on Burkhad and flew to him.

25:47 Archangel Gabriel about the egregors of various religions.

Maxim: Tell me, please, what was the purpose of the formation of the Christian religious egregor?

Irina: Raising the vibrations of the planet by raising the vibrations of

people who become Christians through the Christian religious egregor. Spreading the pure energy of the Love of Jesus Christ to Christian believers through the sacrament of confession and communion. This increases the vibrations of not only the Spirit, but also the body. As I said, under the guise of bread and wine, energetically a person takes into himself the blood and flesh of Jesus Christ, who is on Burkhad and constantly raises his vibrations in order to help a person dissolve blocks in the astral and etheric body and their traces in the physical body. To transform the body. It is taken into the digestive tract, everything is distributed through the blood (shows).

Maxim: Interesting question. Who is Archangel Gabriel related to John the Baptist?

Irina: We are all spiritual brothers (Archangel Gabriel). John the Baptist, as has been said many times, is the Archangel Michael.

Maxim: They write that the body of the Virgin Mary disappeared from the cave five days after it was placed there.

Irina: He was just talking about this. They took her to Burhad.

Maxim: So they took Jesus Christ. Do I get it right?

Irina: Yes. Only the goals were different. Jesus Christ had the goal of completely restoring his body, resurrecting it.

His life thread was severed, unlike Mary. In order to return to his body (he was able to do this with the help of his divine energy), he had to change the information in the DNA of every cell of his body, making him immortal. The body is not destroyed by age or disease. It's all turned off for him.

Maxim: Tell me, please, how many Archangels are there in the Spiritual World?

Irina: Very, very much. Millions, considering that Archangels are called

Teachers of Angels or Mentors of Angels from the 22nd, 23rd and 24th levels. As I said, above the 24th they continue endlessly.

Maxim: I understand.

Tell me, please, they ask, is it possible for Muslims to contact Archangel Gabriel, and did you participate in the formation of the Muslim egregor?

Irina: Yes, of course. I know the creators of the Muslim religious egregor well. Although I am not its direct curator, many Muslims turn to me. It depends on the person's faith. If he loves me and sends me the Light of Love, then he tunes in to my wavelength, regardless of faith.

Maxim: They write to us that we have prepared questions. No, guys, the questions are not prepared. Look here. Do you see the piece of paper I'm trying to write on? No questions. I didn't prepare for this broadcast. I repent. I admit that I should have prepared, but I didn’t prepare. I try to improvise, understanding what questions people will be interested in. I read your questions that you ask here on the YouTube channel, in the Telegram chat “Question and answer. Live". Don't worry, the broadcast is not prepared.

30:19 Archangel Gabriel about earthly time.

Maxim: Gabriel, please explain. Is earthly time energy? If yes, what kind of energy is it?

Irina: Not so much energy as the flow of changes in the energy of all earthly elements and the forms of their movement relative to each other. This is a change in energy.

Maxim: This is a change in energy, a flow of energy change.

Irina: And not just one local change in energy, but a stream of these changes that goes from the past to the future.

Maxim: Guys, about the three days of darkness. If you want a scare, listen up. And be afraid, wait for three days of darkness? Of course, wait.

31:10 Archangel Gabriel about contacts with young civilizations.

Maxim: Archangel Gabriel, please explain: many say that there will soon be three days of darkness. How can you, for your part, explain this information? Three days of darkness are predicted.

Irina: On my planet Burkhad, I am a sociopsychologist and political scientist. A specialist in building religious egregors in the worlds of young civilizations. A young civilization is considered to be one that has not crossed the threshold of getting rid of violence by intelligent beings against each other.

Therefore, I know very well that words such as “three days of darkness” or some other expressions convey certain images. These images almost never have their literal meaning.

In this case, pay attention to the word "three". Three days of darkness: what is meant here is that the person to whom this information was transmitted (a certain contactee received this) was warned by the curators that there might come a time in his future when events around him could lower his vibration, because that he perceives everything in a negative sense. The word "three", the number - 3, means action. Essentially, he was told: “Be careful that your actions are not shady.” And he perceived this as “three days of darkness.”

Maxim: I understand. Thank you, Archangel Gabriel.

Irina: Yes. Nice image.

Maxim: That's a good question. Is there a ban on transmitting information to earthlings?

Irina: There is an agreement, a Code of relationships with young races

and with contactees, if we are talking about the Interstellar Union and the Galactic Federation of Light, which have long been guided by this Code, an agreement. The Code prohibits transmitting information that could negatively affect the contactee, his environment or the entire earthly civilization as a whole.

For example, it is prohibited to transmit information about any technologies for which this civilization is not ready. It can fall into the wrong hands and cause harm to the contactee.

You also cannot transmit information that will in any way discredit the contactee in the eyes of people.

It is also considered incorrect to convey information to the contactee about other contactees with the Interstellar Union or with other civilizations, regarding who they are in contact with and what kind of information this is, without asking the contactees themselves.

Maxim: Relatively speaking, there are prohibitions, but they are regulated by the safety of the contactee himself.

Irina: The safety of the contactee himself, as well as the laws of ethics and the safety of the people around the contactee. For example, if a contactee quarrels with someone and asks his supervisor for a recipe for some poison that cannot be found on Earth, this cannot be given. I just gave an example.

Maxim: I'm just taking notes on the questions. Now I'll ask a question.

35:30 Archangel Gabriel on prayer.

Maxim: Archangel Gabriel, please tell me how you pray to God?

Irina: In my heart I immerse myself in His Light. I don't need to say a word for this, an instant mental attitude. When I descend into my heart, I immediately see the Source of Light there and mentally merge with it. I begin to see myself in everything and everything in myself.

Maxim: Why can’t people do that?

Irina: Why can’t they?

Maxim: Can they?

Irina: Of course. I have seen many contactees who also merged with the Light within themselves. They call it prayer. But this is called "inner prayer." You can pray without words, just with images. You can pray with one intention. You can pray with words, but understand these words with different meanings. Or you can pray outwardly with words, but inwardly be far from their meaning.

Maxim: Please tell me, they depict you on icons with a white lily.

Irina: Yes.

Maxim: What does this mean? One of the first icons that appeared in my house at the entrance were Archangel Michael and Archangel Gabriel. I was always surprised: on the icon you have a blue robe. By the way, blue is the color of Project Cassiopeia. I just now realized this.

Irina: And the Matrix of Burkhad.

37:10 Archangel Gabriel about symbols and types of contacts with earthlings.

Maxim: And a white lily. What does the white lily in your hand mean?

Irina: Lily, even in pre-Christian times, was a flower of hope, because it was dedicated to those gods and goddesses who healed people and brought them hope. It was a delicate, fragile and very beautiful flower, which contained such a vibration that gives the human Soul hope. Already in Christianity this became a symbol of the Good News that I brought to the Mother of God that she would embody the Son of God,

that is, the Firstborn Son of God. They began to draw me with a twig in my hand, although I came to her without a twig. This is such a symbol.

Maxim: You communicate with Archangel Michael, right?

Irina: Yes.

Maxim: Why does he have a sword in his hand?

Irina: He is not embodied now.

Spiritual sword. What is a "spiritual sword"? The spiritual sword is an image of a ray of Light of divine Love, which separates lies from truth, darkness from Light, evil from good and makes the existence of lies, darkness and evil illusory, only apparent in the Light of truth, love and kindness. When Archangel Michael pierces the darkness around with his sword, the dark beings begin to understand that this darkness is only invented by them, it is illusory, in fact, they are light beings.

Maxim: Thank you. This is such an interesting question. Is it true that fire signs cannot wear a cross?

Irina: Not true. Why? He says: "No."

Maxim: I understand. Please tell me you are embodied. People in our churches pray to you, like Archangel Gabriel. Are they speaking to your Higher Self or to you personally?

Irina: I am one with my Higher Self, so they turn to me and the Higher Self at the same time. And I feel their prayers with my heart, but not as words, but as a stream of Love, from which my heart blooms, because I feel a surge of strength and inspiration, Love and send it back to them.

Maxim: Tell me, please, how is it possible to receive so many people at once, spread the flow of Love, respond to people and help them? Or

do you form your own phantoms? How does this happen?

Irina: Yes. I form my phantoms. I also have contacts. There are 185 thousand plasmoid creatures in contact.

Maxim: How much? 185 thousand plasmoid creatures and you are in contact with everyone?

Irina: I keep in touch with them, and they help me help people.

Maxim: Can they, when helping people, introduce themselves by your name?

Irina: They can take on my image to let a person know that they came from me.

Maxim: Wait. So you have assistants? Can destructive entities be represented by you and your name?

Irina: Destructive entities can also take on my image, but they can be easily distinguished by their vibrations and by the words that they will say when they come into contact. Any entity can take on any image in the Astral Plane.

Maxim: Tell me, please, who made the decision to have the crucified Jesus Christ on the pectoral cross?

Irina: The decision was not made by the Council, this is tradition. On some crosses he was depicted, and on others he was not. Both are considered correct. Not depicting is considered correct (just a cross) and depicting is considered correct. At first they began to depict them on those crosses that were in churches. Maybe you saw in the temple, on the left side of the Altar, a cross depicting Jesus Christ (shows where they usually pray for the dead).

Why did you make this decision? In order to remind people that the

blood that flows down the cross cleanses them from sin. And not only. How does she cleanse them from sin? He shed blood, being innocent of the crime of which he was accused, and therefore sacrificed his life voluntarily.

This is not the only reason why blood cleanses from sin. I also talked about communion. So that a person understands that when he goes to receive communion, he receives communion with the blood that is in the wine in the form of energetic ethereal vibrations of the very blood that flowed from the cross and cleanses from sin, from low vibrations.

If the communicant descends of his own free will into low vibrations, he transfers his low energy state to Christ, driving a new nail into his cross. Very figurative. Not a physical nail, it transmits energy.

Maxim: Archangel Gabriel, Mirakh Count, please tell me, there are people on Earth who say that they are your incarnation. The question arises. Can you partially incarnate into someone on Earth?

Irina: No. I can't incarnate. I can be a curator.

Maxim: Can you be a curator?

Irina: Yes. I am already embodied in the body.

Maxim: I understand. That is, those people who say that they are the incarnate Archangel Gabriel, can they be supervised by you and not distinguish themselves from you? Or how does this happen?

Irina: I knew 54 people on Earth who called themselves the incarnation of Jesus Christ.

Maxim: I knew it personally, right?

Irina: I knew their Spirits, I knew them spiritually. This happens because a person loves me, he tells me: "I am your incarnation." This

happens because a person can love this person so much, pray to her, associate himself with her, that he begins to believe that he is one with him and begins to believe that he is that Spirit. This is a conditioned reflex that you have called identifying yourself with someone. This happens to people.

Maxim: And exalting oneself in front of someone, labeling oneself as some famous person.

Irina: If he begins to extol himself that he is Archangel Gabriel in front of others, not because he felt it, but only so that he would be considered someone great. Anyone who truly feels like me will not be exalted, because my inner state, my inner love, preaches to all people that everyone is one and equally loved by God. Exaltation has no place here.

45:50 Irina Podzorova about communicating with subtle beings.

Maxim: Irina, I'll knock you out of contact a little. I want to ask you a question.

Irina: Yes.

Maxim: Don't your curators bother you when you're sleeping?

Irina: No.

Maxim: Are you sleeping well?

Irina: Yes, of course.

Maxim: But many people think that you constantly have entities, voices in your head that interfere with your life and sleep. How do you separate them? Tell. I'm interested. You feel a huge number of entities, spiritual, subtle, dense, in the Astral. When they all come, what do you do?

Irina: If I don’t want to communicate, then I say that I’m not ready to communicate now, since I’m minding my own business. That's all. If some entity persistently comes into contact with my spiritual channel, I simply send Light to it and do not pay attention to what it says. In the end, she realizes that there is no reaction and leaves. A person manages his own contact.

Maxim: Irina, I, as your assistant, project manager (you, in principle, also manage this project), had such a thing that there are a huge number of entities. You see, hear and feel everyone and don’t know what to do about it.

Irina: What to do about it? No. This did not happen. It happened that if I spend the night in some place where there are a lot of plasmoids, they don’t know me yet, I start to fall asleep, they create physical noise. They will knock somewhere or drop something. Then I raise my head and say: “Why are you waking me up? It’s better that we meet and talk in the Astral plane now.”

Maxim: Are you inviting them to the shootout in the Astral?

Irina: And they smile at me and say: “We want to play with you.”

Maxim: Wow, how interesting! I understand. Do you play with plasmoids in Astral?

Irina: Yes. They love to play.

47:50 Archangel Gabriel about the appeals of earthlings.

Maxim: Archangel Gabriel, Mirakh Count, please tell me what requests are being made to you, what prayers are being asked, what are they coming to you about?

Irina: Very different prayers. Sometimes they ask for help, sometimes they turn to you with gratitude. It happens - with a request to

strengthen Love, so that I strengthen Love. It happens that people ask for help about healing and protection, especially about protecting children. So that I protect children from evil and misfortune, from evil people who may meet on their way.

Maxim: Please tell me what prayers you feel and perceive best? And who do you help most often?

Irina: I have no division between whose prayers are accepted and whose are not. The main thing is that this prayer is filled with Light and Love, so that it reaches the level where I am. If a person with low vibrations speaks, it may dissipate in the Astral, and I will not hear it, I will not be able to perceive it.

The main thing is to pronounce it in high vibrations and with complete trust, that is, with hope in the Will of God, because hope and trust in the Will of God presupposes humility. But hope and trust in the Will of God should not destroy your own efforts and actions to build your life and achieve your goals.

What we are talking about here is that the goal you have set may not always be achieved by you for various reasons. The important thing to understand here is that you are still God's beloved children. And this does not mean that God is punishing you. Perhaps this is not useful for you or will bring some negative events into your life.

Maxim: Thank you.

Guys, I'm answering about the Spiritual name. Each person has his own Spiritual name. It is not someone who should tell you the spiritual name, but you who should ask it from your Higher Self.

No. I will not say my Spiritual name.

50:30 Archangel Gabriel about connecting to the Christian egregor.

Maxim: Archangel Gabriel, please tell me, many sorcerers are

engaged in destructive actions, dry spells, and magic. They use the Christian religious egregor. How do you feel about this?

Irina: Sorcerers use the Christian religious egregor for what?

Maxim: In order to do your dark deeds.

Irina: The energy of the Christian religious egregor is aimed at Light, Love, reconciliation, humility, acceptance. Humility does not imply humiliation of a person, but acceptance. Not a feeling of humiliation and submission to any blows of fate, but an acceptance of this world as it is.

As for the sorcerers who use it, they can try to join the Christian religious egregor in order to replenish their etheric energy forces from the huge reservoir of energies of this egregor. Every person can do this, but they must match the vibrations with this egregor. If the vibrations do not match, then no connection to the Christian religious egregor occurs.

The Christian religious egregor has a lot of Guardian Angels, there are a lot of light high-vibration plasmoids, Nature Spirits, Guardians. Connection does not occur to the egregor if there is any negativity in the spiritual heart of the sorcerer: envy, jealousy, pride, anger, resentment, fear.

If these feelings prevail in him, he will not be able to connect. But he will be able to connect to the black magic egregor - this is the lowest department of the esoteric egregor. Magic is also a type of esotericism, knowledge of the world through extrasensory experience. Magicians understand the world and influence it with their thoughts and energies, creating events. But low-vibration destructive plasmoid civilizations can connect to their energies, and disembodied Spirits from the first 6 demonic levels can also come. Sorcerers can connect to this egregor.

There's enough energy there. They take it for their rituals. When they take energy for their rituals, energy as the driving force of this ritual, they have an energy debt to the guardians of this egregor.

If debts do not arise before God and light entities, because it is given unconditionally, then dark, that is, low-vibration Spirits who have abandoned the Light, do not feel it in themselves voluntarily, are not so selfless and do not know how to love with unconditional love. They write everything down (shows).

Maxim: Interesting. What are they doing in churches then? I often see in churches, when I go there, how witches and sorcerers stand on the side and do something. What do you think they are doing there? How do you see this?

Irina: They may try to connect to the Christian religious egregor and perform various rituals. Anyone can enter an Orthodox church. The door is open to anyone. Any person entering a temple can hear a prayer, a psalm or see an icon that will affect his Spiritual heart, raise his vibrations, and he will want to give up his activity, which brought him negative experience. The door is open to everyone in the Christian temple, there is a high-vibration space and the actions of these people in it are absolutely safe.

They will not be able to do anything if the person who is nearby does not attract an influence on this person through fear or irritation. If it attracts you, then you can do it anywhere.

Maxim: Yes, now for some reason I remembered that Irina's book is coming out soon.

Irina: Yes.

Maxim: You can order it at Read-Gorod, you can find it. This book is called "The Diary of a Contactee." By the way, there is a huge amount of information there. Even for the questions that I now see in the chat, you will find a lot of answers in the book.

55:53 Archangel Gabriel about Archangels in female form.

Maxim: Another very interesting question, it is often asked. Why is there no firstborn daughter of God? Why don't Archangels have female

forms?

Irina: I have already said that, for example, on Earth I incarnated as a woman.

Maxim: In the Christian religious egregor there are no Archangels in female form. Why? What is the correct name for them? "Arkhangels" or what?

Irina: Angels, if we take non-incarnate Spirits, have no gender. This is simply an image that reflects the body in the last life before leaving incarnation, if it is a disembodied Spirit. Archangel Michael, for example, had the incarnation of Seraphim of Sarov (a man), or Archangel Metatron, who is now a disembodied Spirit, who (I know him very well) was previously incarnated on the planet Burkhad and was also a man.

The Mother of God - Mary the Mother of God, is also an Archangel, according to your terminology, but she is a woman, now she takes on a female image, she is also on the 24th level, if you look at the gradation of 24 levels. If on the 24th, it means Archangel. There are such Spirits - women.

Maxim: I see. In the Christian religious egregor they are depicted as men. Yes?

Irina: Yes, but they say about the Mother of God that she is higher than all the Angels. She is placed even higher than the Archangels in spiritual level. However, she has a feminine look.

57:57 Archangel Gabriel about reacting to negativity and forgiveness.

Maxim: I will try to read the questions from the “Q&A” chat. Live".

Mirah Count, please tell me how to properly respond to the negativity of others without getting angry and without losing your self-esteem?

Irina: React with gratitude to the negativity of others.

If you react to this negativity, it means that it shows you that there are some hidden blocks in your heart, resentments, irritations, fears that you have not worked through. With thanks. Thank this person mentally or out loud for the lesson. He is your teacher, and he was sent to you for a reason.

And, if you feel any anger, irritation and resentment, thank him for the lesson, for seeing this, because you are more interested in raising your vibrations than he is, and he helped you identify this. Whoever said something negative to you in words is not only your spiritual master, he is your spiritual doctor. He shows you your spiritual illness. And you, having thanked him, if you managed to say something in anger or irritation, ask for forgiveness.

The Russian word “forgiveness” is energetically saturated. Its true meaning is simplification. Forgiveness is leading to a simpler attitude - Love. To forgive means to simplify the relationship, to fill them with Love. Then, when you have reconciled with this person, and this must be done, if indignation has been caused in your heart. You are looking for the reasons why such an emotion worked in you. You ask this emotion: “What are you protecting me from? What is dangerous in these words that were said to me? And then you work with this block.

Maxim: Bueslav writes: “Ward number six.” Dear Bueslav, I propose to join the next ward, number 7 or number 5. We will be neighbors in the ward.

Guys, our state is partial to esotericism, and we do not say that we are the ultimate truth, we do not insist that you must do what we say. We simply express our vision, our understanding.

Give it a like. I will no longer ask you to like to extend the broadcast. We will broadcast according to our hearts, and I will no longer beg for likes. I even canceled two videos, although there were a huge number of views, realizing that it’s not about the number of views, it’s about something else.

I want to thank each of you for your help. For your support, for participating in our retreats, for thanking us and sending us donations, through which I, as a leader, direct and develop this project. Thank you very much. Thank you even for just watching and helping us. Because for me it is very expensive.

1:01:40 Archangel Gabriel on the formation of the egregor “Cassiopeia”.

Maxim: Mirakh Count, are you saying that Irina, you and I incarnated together somewhere? Where did we incarnate? I became interested.

Irina: We all incarnated together on the planet Burkhad.

Maxim: Who was Irina, who was I, and who were you?

Irina: When did we all incarnate together?

Maxim: Yes.

Irina: Irina, you and I had several incarnations on Burkhad. When we were incarnated together (shows), we were all men, sons of the same parents.

Maxim: This is the layout! Interesting.

Irina: This was before the discovery of the Earth, about 7 million years ago. The Interstellar Union already existed.

Maxim: We then agreed what would happen on this planet that did not yet exist?

Irina: We agreed on this in the Spiritual world. On Burkhad we were engaged in flights around the Galaxy. We had a family tradition: to work as discoverers of new worlds.

Maxim: I have a question. If someone had told me 7-10 years ago that I would be the leader of such a project, I would have twirled my finger at my temple and asked the person: “What are you smoking?”

At this time, with great love and gratitude to all of you, our curators and mentors, I am leading this project. Please tell me, was this planned: a certain age at which I will reach and meet Irina? Was this planned in the Spiritual World?

Irina: Yes. It was planned your age, the year in which you would meet and the circumstances under which this would happen. You should have prepared for the meeting. Not only for the meeting, but also for project management.

You had to prepare to manage the entire material part of the project, including various retreats and so on. Everything you know, everything you hold in your hands. You had to prepare for this in many ways.

And Irina needed to prepare to lead the Spiritual side of the project. Including the transfer of information through it, which will become fundamental for the construction of the structure of the information part of the egregor. And not just transmit information, but connect people with the Higher Self.

Maxim: They write: “Maxim, marry Irishka.”

Irina: What is this?

Maxim: Guys, we have our own personal life. We are spiritual brother and sister. We don't need to get married.

Irina: Moreover, they said that we were two brothers on Burkhad, this is generally impossible.

Maxim: Yes.

So, this was all planned in advance?

Irina: Irina needed to prepare not only to transmit information (Archangel Gabriel speaks). And connect people with their Higher Self. This is also leadership of the spiritual side of the project.

And not only connecting people with their Higher Selves, but also teaching others to do it. She had to prepare for this too. Serious preparation, first of all on the Spiritual level, through the purification of her Spiritual heart.

If she had not reached certain vibrations, your meeting might not have taken place. And if it had taken place, the project would not have been launched. You would feel that she is not the right person for this.

Maxim: Yes. I guess, yes.

Irina: I didn't understand anything.

Maxim: Don't understand anything? I understood everything.

Please tell me, why is this project in Russia? Why is he in Russia?

Irina: Good question (Archangel Gabriel smiles).

Maxim: Yes, why in Russia, why not somewhere else?

Irina: Why in Russia?

Maxim: Yes.

Irina: Because in Russia at the time of the creation of the project, there were the best conditions for your development. For your formation and Irina's formation: as a project manager, as spiritual individuals who will

develop it. An energetic trace, an imprint has already remained in the noosphere of the planet.

Maxim: Tell me, please, is there a danger to the development of the project at this point in time in Russia?

Irina: Danger in what way?

Maxim: There is a danger in conveying esoteric information in this format.

Irina: There is no danger in the format that is now in Cassiopeia, because you do not claim to be the truth. What does it mean “you don’t pretend to be the ultimate truth”?

Your broadcast assumes the presence of another opinion, alternative to yours. And this eliminates the possibility of accusing you or your project of being dogmatic, of controlling the masses, of denying the traditions of religions that existed before you. This eliminates the possibility of accusing you or your project of creating some kind of your own world, your own project based on the denial of everyone else. You did not follow the “divide and conquer” path; you did not divide anything. This is the first point.

The second point: you provide not only information, but also spiritual help to absolutely everyone at an affordable “payment according to your heart,” and this makes it impossible to accuse you of profit.

Maxim: But we really don’t have such a thing that we want to make money off of someone.

Irina: This is spiritual help.

Maxim: Yes. We provide spiritual assistance with “payment according to the heart.” Anyone can come to us at the Center, they can live not in the Center, they can live nearby and eat. The training we provide at the Center comes with a “payment according to your heart.” You

decide for yourself which form of payment is acceptable to you.

Irina: Moreover, even on retreats, for which a certain fee is charged, because the retreat is associated with movement, with training outside the city where the project leaders live: the contactee and the leader. At off-site events for all the masters of the Cassiopeia project, including Irina, personal receptions and personal spiritual assistance are still provided on the terms of “payment according to the heart.”

Maxim: Everything related to spirituality is “payment according to the heart.” Our health center operates on a fixed fee basis. But I, as the project manager, made these payments absolutely accessible to all categories of citizens. So that pensioners can come, as well as other people who do not have the opportunity to shell out a lot of money.

I know that now many people charge huge amounts of money for both esoteric services and wellness services. Therefore, I would like this project to help and develop a huge number of people, so that we, as one big family, learn to help each other and understand the structure of the Universe.

Therefore, I remind you once again that our next retreat will be in Krasnodar from September 27 to October 4. The link to register for the project's retreat is located below this video. In the descriptive part. If you want to attend the retreat, please register, the number of places is limited. We cannot rent huge halls and we cannot work with a huge number of people, because it is very inconvenient.

We are from Voronezh. The project, the main training center is located in Voronezh. We are opening a retreat center in Moscow in the near future. I think that before the New Year we will have it in order. After the New Year, I think that it will be possible to hold training classes, retreats, and events in Moscow. Visit our website. There is a lot of interesting things on it.

1:11:33 Appeal from Mirah Count.

Maxim: I would like to thank our wonderful curator Mirakh Count,

popularly known as Archangel Gabriel, for this wonderful broadcast, for your help and support of our project, our egregor “Cassiopeia”. On my own behalf, I would like to express my deep gratitude for your competent and practical recommendations on many issues.

Irina: I thank you too, dear friends. I also (Archangel Gabriel speaks) convey information.

I address you, dear divine Souls, spiritual brothers and sisters. We all came to the material world to temporarily fulfill our tasks, and it doesn’t matter what planet it happened on and how many years we spend on this planet. The only important thing is what we leave here with, what level we get to, and how this will affect all our subsequent incarnations.

Maxim: Mirakh Count, please tell me, you have never been on the air. You know that a lot of people are watching you now. If you were to address these people now, what would you tell them?

Irina: I thank each of you who are in our egregor and the Cassiopeia Project. This project is not only of Irina and Maxim, not only mine, as a mentor of the egregor, but also of each of you. Each of you invests a particle of your Soul, a particle of your light energy, a particle of your material resources, which are also a form of energy. I thank you for this energy. I send you the Light of Love. I wish you strengthening of all your flows: good luck, finances, health and fulfillment of the goals of all your incarnations.

Maxim: Thank you very much, Archangel Gabriel, Mirakh Count.

I want to tell everyone. Guys, our project is not political. We no longer invite political figures.

Irina: We said that we won’t invite you anymore.

Maxim: We made a decision: not to invite political figures. We were drawn into politics by requests to invite those who were involved in politics. We “don’t get involved” in financial structures, pyramids, that are engaged in deceiving people.

Guys, our project is not political. You always have freedom of choice. We are not the ultimate truth. We are always ready to help in any way we can on a spiritual level from our perspective, perception and awareness that we have. Thank you all very much.

Irina: Thank you.

Maxim: See you again. Thank you for this wonderful broadcast.

August 28, 2022.

Conference participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan - head of the CASSIOPEA Project and the Center for Spiritual and Physical Development;

Mirakh Count (Archangel Gabriel) - representative of the planet Burkhad, sociopsychologist, political scientist, specialist in the construction of religious egregors in worlds where young civilizations exist, curator of the egregor “Cassiopeia”, keeper of the Christian egregor.

December 14, 2023

#516 Live / Communication with the Spirit of St. Andrew the First-Called / 12 Apostles First episode.

https://blog.cassiopeia.center/obshchenie-s-duhom-andreya-pervozvannogo-12-aposto
https://www.youtube.com/watch?v=Z9PxGmeC6e4

00:00 Start of broadcast.

00:08 Opening speech by the Project Manager.

Maxim: Guys, hello everyone! Now I'll make a little camera settings. That's normal.

(reads messages from the chat) "Greetings from Nizhny Novgorod!" Hello to Nizhny Novgorod! Hello Mogilev! Divine Love to everyone!

(reads) "It has begun..." Yes, it has begun, everything is correct. As always, I'll start with the most current project news; I won't take up much of your time today. Greetings from Latvia to all of you! The most important news is that from December 29 to January 7 we are going to celebrate the New Year in a luxury hotel in Abkhazia, right on the seashore, with a heated pool, with all the infrastructure, all inclusive, three meals a day, accommodation in good rooms. And I invite everyone to the New Year's retreat of our Project "Cassiopeia" in Abkhazia.

Guys, if you think there are no tickets, there are tickets. If so, there is a link below on how you can sign up. And just in case, I will dictate a phone number that will tell you how to get to the retreat, what methods are available, possibilities of travel, flights, transport accessibility to

Abkhazia. There is every opportunity for all residents of Russia to attend this event, so I am waiting for our large family of the Cassiopeia Project in Abkhazia from December 29 to January 7. The program is simply amazing, you can watch it using the link below, there is a separate video on the program, there is a separate description of the program.

We are also with Crimea, guys, hang in there! So follow the link below and see what will happen at our retreat. There have never been such retreats before - we have a completely different format: there will be no training sessions, the retreat will consist of pure practices. Twelve masters, including scientists, psychologists, kinesiologists, esotericists, energy practitioners, the School of Cosmohealing, the School of Mental Health "MentalHealing", the Institute of Transpersonal Psychology will be present, then the School of Cosmoenergetics will be present.

Nine-day cost of food and accommodation on an all-inclusive basis: 9 days per person – 30,000 rubles. And plus, accordingly, the retreat itself, which also costs “all inclusive” - all practices, all classes, except for personal techniques of the masters - 20,000 rubles. But this amount can be reduced: if you are traveling as a married couple, that is, a husband and wife, a twenty percent discount is provided. If you are traveling in a group of 7 or more people, there is also a twenty percent discount. And the most important discount, if you are a master of the Cassiopeia project, is 50%.

Guys, masters, come, let's relax in Abkhazia, spend a gorgeous New Year, meet, talk, show practices, take part in various events, travel to “places of power”, invite our interstellar friends. And the most important thing about this retreat is that every evening there will be a conference, answers to questions from our interstellar friends, and not only from them, but also from representatives of the Interstellar Union. Therefore, we are waiting for you in Abkhazia.

This is not only training, but a very cool retreat of a new format that you will plunge into. And most importantly, you can come with a team of your friends, where your friends will simply celebrate the New Year, and you will participate in the retreat. This is also possible.

Further. Literally the day after tomorrow we are leaving for Minsk. We are opening Centers in Minsk, on this occasion we are also organizing a large retreat there, in the city itself from the 1st to the 8th, all the information is also on the link under this video, you can read and watch. Guys, we are also waiting for everyone who is ready to get to Minsk! But in Minsk there will be a training program of the first stage - contact with the Higher Self.

(reads) “Maxim, are you a master or what?” No, I’m not a “master”, I’m just the leader of this Project. Therefore, we are waiting for everyone in Minsk who can get there for training.

And most importantly, we have opened a “Content Service”. Such a scary phrase, what is it? “Content Service” is an updated service where you can get more than thirty unique meditations from Irina Podzorova and other masters of the Project with lifetime access, as well as books and music. The database of meditations is being actively updated: new ones are added monthly with the participation of Irina and other masters.

To get the meditation, you need to go to the website using the link in the description, it’s at the bottom. Click on the meditation you like, and then on the “Get meditation”, “Get material” button - you will be redirected to an automated bot, which, on the condition of donation (that is, you yourself determine how much you want to help the Project) can provide you with lifetime access to various meditations, practices, and in the future - to various educational trainings. All this will also be included in the “Content Service”. You can go there using this link. After the New Year and Minsk retreats there will be a link to the “Content Service”. This is our automated project in which you can receive any meditation, information, training on a donation basis.

Guys, everything we do, we do for our joint growth and development together with you, and, accordingly, with great Love on condition of donation, without violating the terms of the Project. Basically, I'm done with the news.

Today we have a unique broadcast for me. We are moving on to communication with Spirits, I don’t even know how to say it correctly - probably not even Spirits, but with the Higher Self of the apostles. But,

again, we do this with the consent of those people in whom these apostles are embodied. We found...

(reads) “FSB man, the road is open all around...” Of course, the road all around is open to us. And in general, I think that the one you named in three letters - FSB, they, too, are probably very surprised why all our roads are open. It’s okay, I think that these structures exist so that there is no destructiveness in our world, and I will always be happy to support the FSB, and the Main Internal Affairs Directorate, and the District Department of Internal Affairs, and other structures that deal with law and order in our state. Since I myself am a lawyer, economist, psychologist, therefore I am for maintaining law and order. And so that there are no rabid “schizoterics” who will deceive you, who will demand something from you. Therefore, if you consider me to be one - well, consider it, okay, I’m not against it, I’ll be all for it.

So where did I stop? Ah, on our new videos. We decided to make a series of twelve apostles. However, I don’t know how we will bring this to the end, and whether we will be able to obtain all the permissions. But now I want to invite our wonderful contactee Irina Podzorova, and she will tell you who is present with us today.

And, I wanted to tell you today that I did not prepare for the broadcast, but I would have deceived you. Today I was preparing for the broadcast. Therefore, dear haters, dear “alcyonists”, our dear “colleagues”, you don’t have to worry - today everything is prepared, everything is fine, all the questions are prepared. But I think that you will still have questions from here, from this channel, plus we have a “Question-Answer Live” channel, where you can also ask your questions. Irisha, I invite you, have a seat.

10:04 Introduction of participants. What is a Spirit Phantom?

Irina: Hello everyone, dear friends, good evening!

Maxim: What a beauty you are today, wow, your beads are so beautiful!

Irina: Thank you!

Maxim: Someone gave them to you, probably?

Irina: Yes, they gave it to me...

Maxim: What a beautiful ring you have! You somehow transformed very quickly, I didn't have time to notice. Is this also a gift? Who gave it, if it's not a secret?

Irina: I thank Marina from Voronezh, who gave me these things and these crystals, filled with the warmth of her Love and the Light of her Soul! Say hello, Marina!

Maxim: So, Irina, who is with us today?

Irina: Thank you all, dear friends, for your kind words, I greet you all! My name is Irina Podzorova, I am a contactee with extraterrestrial civilizations, as well as with spiritual and subtle entities. And today there is a spiritual entity with us, which is a phantom of the incarnate Spirit. This Spirit is the same Spirit, one of whose incarnations is the man known on Earth under the name "Apostle Andrew the First-Called." He is so known in the Christian Church, or Christian religious egregor. Now he is embodied on Earth, I know this man, and he gave permission to talk to his Higher Self.

How does this happen? The Higher Self of the incarnate Spirit releases part of the energy from itself and builds a phantom, which endows with a certain memory and consciousness one of its personalities, which it already had in a previous incarnation. So today I ask you to primarily ask questions about the life of St. Andrew the First-Called, because the phantom that is present here has his consciousness.

Maxim: So we don't have the opportunity to ask questions about his other incarnations?

Irina: He says: “Well, why, you can ask questions.” He is present here, and, by the way, has taken on the image of the Apostle Andrew. I see a fairly tall man, about middle age, with a beard (he is now showing me his image). He says he welcomes everyone.

(St. Andrew the First-Called) If there are questions not about the life of St. Andrew the First-Called, then I will answer them, because I am always in touch with my Spirit.

(Irina) That is, the Higher Self that singled out this phantom left an energy thread for the exchange of energy and information. And the Higher Self of this person, the disembodied part of his Spirit, hears everything through the phantom, including your questions.

14:02 Levels of incarnation of the Apostle Andrew and his other incarnations.

Maxim: I greet you, Andrey, I have collected a lot of questions for you, they were collected by our Cassiopeans in the “Q&A live broadcast” chat.

Great question! (reading) “Who recruited you?” No, you need to ask Andrey a question, guys.

Tell me, please, from what Spiritual level did you incarnate into St. Andrew the First-Called?

Irina (Andrew the First-Called): I incarnated into Andrew the First-Called from the 15th Spiritual level according to the terminology of the Interstellar Union.

Maxim: And at what level did you leave when you ended your life as St. Andrew the First-Called?

Irina (Andrey Pervozvanny): When I ended my life as Andrey Pervozvanny, I reached the 24th level, according to your terminology again.

Maxim: Wow, wow! That is, during this life you were able to reach the maximum in our understanding, to the level of the highest Angels!

Irina (Andrey Pervozvanny): Yes.

Maxim: How did you feel when you were St. Andrew the First-Called "Angel in the flesh"?

Irina (Andrey Pervozvanny): At the 24th level they feel their consciousness as universal, not different from the stream of consciousness of God.

Maxim: Have you had any other significant incarnations on Earth?

Irina (Andrey Pervozvanny): Yes, I had incarnations on Earth. Including before the Apostle Andrew, I had three significant incarnations, and one after the Apostle Andrew was also on Earth, and one on another planet.

Maxim: And after the Apostle Andrew, who did you incarnate into on Earth?

Irina (Andrew the First-Called): After the Apostle Andrew, I incarnated (shows to Irina) into a man, it was not far from the city of Constantinople, and it was approximately the beginning of the 9th century after the Nativity of Christ.

16:27 End of broadcast (cuts off).

Resumption of broadcast.

00:00 Start of video.

00:03 Word from the Project Manager.

Maxim: Well, dear friends, hello to everyone for the third time today! Probably, the structure of this St. Andrew the First-Called is so rich that our lights go out in full, our computers turn off, some small cataclysm occurs.

(reads chat) Yes, wait here, guys. 231 people. Of course, we lost a large number of audiences. Not everyone will probably now receive a message that we have started this broadcast again.

Well, let's start from the beginning then. Hello! We're approaching New Year! I'm kidding, guys. We have New Year in Abkhazia, a retreat in Minsk, “Content Service” here. It's all below. That's it, Irisha, come on, sit down. We will continue our broadcast with Andrew the First-Called.

Irina: Once again, good evening everyone! Yeah, we had a little video pause here because there was a power outage.

Maxim: It’s very difficult for us without electricity, we tried to log out from the phone, but we also had to set up the screen to flip on the phone.

Irina: Yes, but they gave it to us again very quickly, and we can continue the broadcast.

Maxim: Once again I want to remind everyone that on the air today we have a phantom of the incarnate part of the Spirit of St. Andrew the First-Called.

Irina: Let me remind you what we talked about in the part that was interrupted.

Maxim: They write: “No sound.” Guys, can you hear us? Please tell me, can you hear us at all? (reads) “Everything is fine. Anna S." Thanks a lot! Everything is fine, great.

Irina: Yes, good, thank you everyone. So, dear friends, I remind you

that today our topic of broadcast is a conversation with the Spirit of St. Andrew the First-Called. But there is a nuance here - since he is now embodied, the conversation is with a phantom that his Higher Self created in the Spiritual World so that he could answer questions about his life. And for this, the permission of the person in whom the Spirit of St. Andrew the First-Called is now embodied was needed. I know him, I asked permission from this person, and he gave this permission, and therefore this contact became possible.

Maxim: Valery Nikolaevich Parfenov is itching...

Irina: What happened?

Maxim: Yes, someone is blowing up something, we need to block him. Here, everything is fine.

Irina: The question was about what significant incarnations were that of St. Andrew the First-Called, of the Spirit of St. Andrew the First-Called.

Maxim: Yes, I want to remind you that according to the information from the previous broadcast, Andrei the First-Called entered incarnation at the 15th level and exited at the 24th. He had three significant incarnations before St. Andrew the First-Called and one after. Man. And we stopped there.

04:01 The Spirit about his incarnations after St. Andrew the First-Called.

Irina: Yes, he says that after Andrew the First-Called there was an incarnation as a man, at the beginning of the 9th century after the Nativity of Christ, in the area of the city of Constantinople, but not in the city itself, but somewhere (shows to Irina) in the southern part of Constantinople, then This is the territory of Asia Minor. At that time there was no Turkey there yet. But this is the territory of modern Turkey (shows a map and the place where he lived).

(says Andrew the First-Called) At that time my name was (now I will try

to convey this word - Irina) Epifan or Epiphanius, and I was a monk. But I wasn't a Christian monk all my life, I spent part of my life as a simple peasant, and I spent the last 15 years or so in a monastery. There was already a Christian monastery, and I entered this incarnation at the 24th level, and left it at the 12th.

Maxim: Wow!

Irina: Well, yes (he's showing me now), there were reasons.

Maxim: What were the reasons?

Irina (Andrey Pervozvanny): Gone into the material. Even though I was in the monastery, I cared more about material things (shows Irina that he was the one who was responsible for the material support of the monastery), and there were feelings such as irritation, anger, anger at some of the inhabitants.

(Irina) That is, there was such an average level.

(Andrey Pervozvanny): Yes, at the time of leaving the incarnation it was the average - 12th - level. And after that I incarnated on another planet.

Maxim: In our galaxy?

Irina (Andrey Pervozvanny): Yes.

Maxim: What kind of planet is this?

Irina (Andrey the First-Called): Shimor.

Maxim: And who were you there?

Irina (Andrew the First-Called): Spiritual teacher.

Maxim: That is, you got there on the twelfth level, do I understand correctly?

Irina (Andrey Pervozvanny): Yes.

Irina (Andrew the First-Called): And from the twelfth level you became a spiritual teacher there. And at what level did it come out?

Irina (Andrey the First-Called): On the 16th.

Maxim: How much time passed from leaving the incarnation from the planet Shimor to the moment of incarnation on planet Earth?

Irina (Andrey Pervozvanny): From the moment of leaving the incarnation on the planet Shimor, about 200 years passed (shows 188 earthly years) until the moment of incarnation on the planet Earth.

Maxim: During this period of time were you in the Spiritual World?

Irina (Andrey Pervozvanny): Yes.

Maxim: What were you doing there?

Irina (Andrey Pervozvanny): I carefully prepared for the next incarnation: I analyzed all my incarnations, met with Consulting Angels, with those Spirits with whom I planned to incarnate, and with their Higher Selves, that is, with phantoms - in order to develop a plan next incarnation.

08:25 The Spirit about his incarnations before St. Andrew the First-Called.

Maxim: I see. But now they ask the question: “Who was Andrei before Andrei?” That is, what three significant incarnations did you have before?

Irina (Andrew the First-Called): I want to say that my incarnations before the Apostle Andrew were not only on Earth, I was incarnated on the planet Burkhad (shows), and on the planet Shimor, and on the planet Esler (shows Irina a number of planets: and several I’ve been there once, and there several times – a little bit of everything). But mostly I concentrated on the incarnations in the Milky Way Galaxy. I had only a few dozen incarnations in other Galaxies, and mostly in the Milky Way Galaxy.

Maxim: What is the reason for this?

Irina (Andrey Pervozvanny): I wanted to finish my business there, my plan for implementation. My plan was developed for several incarnations, and it was connected not only with me, but also with other Spirits, including the Spirit of Jesus Christ.

(Irina) That is, it’s like some kind of agreement.

Maxim: You have known the Spirit of Jesus Christ for a long time, right?

Irina (Andrey Pervozvanny): Yes. And, of course, I also incarnated in plasmoid civilizations, but these were not my main incarnations. For example, on Earth, as I said, there were three incarnations before the Apostle Andrew, in one of them I incarnated at the twelfth level of density and was a plasmoid Spirit who was responsible for the territory that occupies approximately the southern part of Israel. But that was about 4200 years ago.

And I had two more incarnations on Earth as people, in third density: one was female and one was male. But they were (shows) before the war 12,000 years ago, on a single continent, and there were 800,000 years between them.

Maxim: When were people 3 to 4 m tall and plant-eaters?

Irina (Andrey Pervozvanny): At the time when I incarnated, they were already somewhat shorter.

(Irina) He now tells me that they were four meters when they were created, and then literally 200-250 years later they had such a mutation, if in modern terms, a chain of mutations, from which their height began to change. Because the Earth attracted their bodies quite strongly, and there was such an adaptation, an adaptation, so that their body weight became smaller.

Maxim: I see. People here ask us: what territory is your embodied part located in now?

Irina (Andrei the First-Called): On Russian territory.

Maxim: Thank you.

12:15 The task of the current incarnation of the Spirit of Andrew the First-Called.

Maxim: Tell me, please, what is your implementation task now?

Irina (Andrey Pervozvanny): My task of incarnation now is to remember and simultaneously realize my angelic nature (as I already said, I reached this level), and at the same time realize my nature of the Spirit, which was absorbed by both the material and the spiritual. Integrate all this, combine it in one embodiment - spirituality with the material. Express the spiritual in the language of matter and matter in the language of the Spirit.

Maxim: That is, to unite the material and spiritual?

Irina (Andrey Pervozvanny): Unite and say that this is one thing. And not just to say it in words, but to show it with your life.

13:32 Apostle Andrew about communication with other apostles, and why there were 12 of them.

Maxim: Have you communicated with other apostles in your current incarnation?

Irina (Andrey Pervozvanny): Yes. Many of them are also embodied. But not everyone, and I didn't communicate with everyone.

Maxim: That is, we won't get a series of twelve... But no, wait, if not everyone is incarnated, we can ask permission from the Spirits.

Irina (Andrew the First-Called): Are you asking - from twelve or from seventy?

Maxim: Of the first twelve.

Irina (Andrey Pervozvanny): Yes, I talked.

(Irina) He is now showing how his Higher Self, that is, the disembodied Spirit, communicates with other Higher Selves, even of the incarnate apostles. That is, this communication occurs on a spiritual level.

Maxim: So, in principle, you communicate with other apostles, actually incarnate, and communicated with the Spirits of those apostles who were the first of the twelve?

Irina (Andrey Pervozvanny): Yes, before incarnation I communicated, and now I communicate, at the level of the Higher Self, and this communication has not been interrupted, because the Higher Self, the Spirit, is not blocked from memory.

Maxim: Tell me, please, what about the first twelve apostles – was this number chosen by Christ for a reason? Do you know anything about this?

Irina (Andrew the First-Called): As you know, twelve apostles plus one Jesus Christ is the number 12 + 1 = 13. That is, this figure was chosen as “twelve apostles plus one teacher,” “twelve students and plus one teacher.” She was chosen as a symbol. 12 is a symbol of the realization of the manifestation of spiritual energy, the symbol of which is the number “3” in matter, the symbol of which in turn is the number “4”. After all, if you take four three times, it will be twelve.

(Irina) He is now showing me that it was not by chance that this particular number was chosen.

(St. Andrew the First-Called): But I want to say that besides the twelve apostles there were other apostles, even in the time of Jesus. But the fact is that “13” is “12 + 1”, and “1” is already a symbol of the Absolute, God. And here it was precisely symbolic that there was one Teacher, God, the Absolute and 12 disciples - as a symbol of the embodiment of spiritual energies through matter (as I already said - “three” and “four”).

17:03 Apostle Andrew about the common task of the incarnation with Christ.

Maxim: Tell me, please, do you have a common task of incarnation with Christ?

Irina (Andrew the First-Called): Now is the common task of the incarnation with Christ?

Maxim: He is now on Burkhad.

Irina (Andrey Pervozvanny): Yes.

Maxim: He has a task that He implements in this manvantara, before its end, as I understand it. And you said that you have some common tasks with Christ.

Irina (Andrew the First-Called): It is believed that Jesus Christ came

out of the incarnation, but since He returned to it and united with his previous body, it is believed that this incarnation into which He came continues with Him. This means that His tasks did not change during the incarnation, and they have not changed now, because He continues the incarnation into which He came two thousand years ago.

And my task now in this incarnation is naturally connected with the task of Jesus Christ - the fact that we perform one action, only in different ways. He does this through his energies, through his egregor, and I do this through my example. And how to do this, my example in this is Jesus Christ, because I also participate in the construction of that egregor that will help cleanse the Souls of people, that is, this is a common task. And I believe that the egregor in the construction of which I am participating is partly the egregor of Jesus Christ too, that is, they are one.

Maxim: Thank you, I understood you, I heard you.

Guys, you ask what his name is now, he asked not to designate it in any way.

Irina: He asked not to use his name, so I can't do it, I promised him, this man. I know him, and I promised not to name him or indicate in any way who he is embodied in. He knows about his incarnation, naturally: I told him about it.

Maxim: I'm sure he's watching us now.

Irina: I also think that he is watching us, and I say hello to him!

Maxim: And I say hello to him!

20:14 Apostle Andrew about the nickname "First Called", John the Baptist, work as a fisherman.

Maxim: Tell me, please, why they called you "First-Called"?

Irina (Andrey Pervozvanny): This was named later. “First-Called” is simply a symbol of the fact that Jesus called me first. But the whole point is that I knew Jesus even before he officially called me to apostolic work. The fact is that the apostle is not just a period of discipleship - it is a period of spiritual labor, work on oneself, first of all. And so I knew Jesus Christ for quite a long time until the moment when he called me to be his disciple in front of everyone, in front of a crowd of other people. And I was also a disciple of John the Baptist.

Maxim: Were you a disciple of John the Baptist?

Irina (Andrew the First-Called): Who baptized Jesus.

Maxim: So, you knew John the Baptist before Christ?

Irina (Andrey Pervozvanny): Yes.

Maxim: So, you already began to engage in religious activities at that time? And they told me you were a fisherman.

Irina (Andrey Pervozvanny): One does not interfere with the other (smiles). My social service was very simple - I fished to support myself, because I was not part of the tribe of priests who could provide for themselves with rituals and sermons among the Jewish believers. Therefore, I had another, simpler, but no less important profession than a priest, because, I assure you, even priests bought fish from me.

22:23 Andrew the First-Called about other apostles besides the famous twelve.

Maxim: I understand. Please tell me you mentioned the seventy apostles. And what are these 70 apostles, people ask in the chat.

Irina (Andrew the First-Called): There were more of them, but officially the Christian teaching included the understanding that Jesus Christ first called 12 apostles, that is, me and 11 more. And a little later he called another 70. In fact, there were a lot of them, more hundred, but

a few major names are listed. These are the disciples of Jesus Christ, whom He also called, and in essence we are no different from them. That is, 12 apostles were simply called a little earlier, and 70 a little later. And we received almost identical information, knowledge and the revelation of our Divine abilities.

Maxim: You just said that Jesus called you to teaching. How did this even happen? Did he come up and say: “That’s it, let’s go”?

Irina (Andrew the First-Called): He spoke sermons.

Maxim: How did he select you?

Irina (Andrey Pervozvanny): He didn’t approach anyone. Many people knew Him by His activities - healing sick people, and such actions that caused surprise, for example, turning water into wine. Rumors spread about Him as a very miraculous phenomenon, so to speak in Russian. This was previously understood as Divine power. And the whole district talked about Him, and I can even say, all of Israel said that He was a Divine prophet. Some called Him a Divine Prophet, others a charlatan, a madman, etc. But, nevertheless, they knew about Him.

He was always accompanied by a certain number of people, and when He came to a city, rumors were spread that it was this Jesus who came to our city. And it happened that the whole city, its entire population gathered at the door of the house where He stayed with one of his disciples. And by the way, the students were not only men, there were also women students. He could stay with any student from this city.

Maxim: Yes, very interesting! So he also had women as students? Why didn't they become apostles?

Irina (Andrew the First-Called): Why didn’t they become apostles where? In exercises?

Maxim: Yes, in the teachings about them there is nothing at all that women learned from Him.

Irina (St. Andrew the First-Called): They are called disciples, but are not called apostles, because the ministry of the apostles was not only to study, but also to preach about Christ to the pagan peoples, who did not even know about the One God, let alone Jesus Christ. This was considered a very difficult mission, which was associated with danger. Therefore, initially the Christian church protected women from such work, from such spiritual work; this was actually associated with danger. And many of them had children, and we men did not consider it possible that they would risk their lives and the well-being of their children so much. That is, it was not a woman's business. We protected them.

Therefore, an apostle is not just a disciple, he is one who carries on the teaching, despite the danger to his life. As the Christian religious egregor is well aware, most of the apostles, not only of the twelve, but also of the seventy, ended their lives, their incarnation due to violent death. We did not want such a fate for women.

Maxim: Thank you for your answer, Andrey.

27:37 Apostle Andrew about his love for fishing.

Maxim: Please tell me, the question was so interesting: is your embodied part now interested in fishing, as you were?

Irina (Andrey Pervozvanny): Yes, for my incarnate part, fishing is not a way of feeding or selling something, it is relaxation and recollection of the sensations that my Spirit received from Jesus Christ. That is, there is an association, but it is unconscious.

Maxim: I understand, thank you.

28:31 **Apostle Andrew about his communication with John the Baptist and how he became a disciple of Christ.**

Maxim: It turns out that before meeting Christ you were fishing and already knew John the Baptist?

Irina (Andrey Pervozvanny): Yes, I knew how to read, my parents taught me, and I read the religious books that we had as a teenager. And why I read them and became interested in them - already when I came out of incarnation, I learned that my Spirit was pushing me to this, because my task of incarnating as St. Andrew the First-Called was precisely to become His apostle. And this is exactly what my Higher Self was preparing me for. That's why I was drawn (shows to Irina) to books and sermons. Just like my older brother Peter, he and I constantly talked about this.

Maxim: Peter is the Apostle Peter?

Irina (Andrey Pervozvanny): Yes, Simon. It was Christ who called him Peter, and this is his name Simon.

Maxim: Why did Christ call him Peter?

Irina (Andrew the First-Called): Because I saw his strong and decisive character and compared him to a stone ("Peter" in Hebrew means "stone").

Maxim: So tell me, how did you become a disciple of Christ? You came to Him yourself, did He take you? How old were you when you became His disciple?

Irina (Andrew the First-Called): When I became His disciple, I was 31 years old. Jesus Himself was 28. We have a three-year age difference; I was older than Him.

Maxim: Tell me, please, which cities did you preach in? Because they say you even preached in Bulgaria and in other countries.

Irina (Andrey Pervozvanny): I'll tell you how we met. As I already said, I knew Him even before the call to the apostleship and heard a lot about Him - both from John the Baptist and from other people, and I saw Him personally when He came to John the Baptist even before his baptism (shows how they communicated). And then, when Jesus

Christ had already undergone his Baptism (I was at this event)... Before Baptism, Jesus Christ did not recruit apostles. He had to first retire to the desert and have his experience with Lucifer there.

Maxim: Once again, experience of communicating with whom?

Irina (Andrew the First-Called): With Archon Lucifer.

Maxim: And for what?

Irina (Andrey Pervozvanny): This was His life experience, life path, multifactorial life task in order to gain the experience of manifesting His Divine will and confidence in His spiritual Truth, despite the incarnation in the body. And, naturally, for Lucifer himself, although he was not incarnate, as he is now, this was also a lesson, because their communication resulted in the event that is known in the Gospel as the “temptation of Christ.” Before this event, Jesus did not call the apostles, or disciples in general, He simply communicated with people. In fact, He did not officially call anyone His disciples or Himself a teacher; He had to go through this experience.

And after that passed, He appeared again to John the Baptist at the moment when John the Baptist was preaching at the Jordan River.

(Irina) He is now showing me a small river, not wide, earthy, but there are few plants there, it looks more like a desert, sand everywhere or clay, and here and there green bushes, but there are not enough of them for a river. Now he shows the area and the crowd of people: the sun is so bright, it’s very hot, and there’s a group of people standing, all in white capes or something. What kind of clothes are they wearing?

(Andrew the First-Called) And I stood among the disciples of John the Baptist, it was just another sermon. Jesus came and the Baptist told us that this man was Jesus, He would take away the sin of the world, and this was a symbol of the fact that He would suffer without His own guilt. That is, it was revealed by God to him as a prophecy.

And after that I came up with... (shows another man) to Jesus, greeted Him, and we began to communicate (shows that this was not the city where Jesus lived, where he was born, He was just there temporarily with his friend).

I asked Him: “Where are you staying?”, and we went together to Him, and that day He called me a disciple for the first time. That is, I was already with Him at that time, but for the first time on that day He called me a disciple. And then I came home and told my father that Jesus called me his disciple (by that time my mother was no longer with us in the material world) and my brother Simon.

36:06 Apostle Andrew about his body after death.

Maxim: Question from Yulia Morozova: “Have you visited your relics in your current incarnation?”

Irina (Andrew the First-Called): How did you “visit your relics”?

Maxim: Have you walked in your current incarnation and have you seen any of your relics?

Irina (Andrey Pervozvanny): I know that they exist, and that they are separated. My body... I know, the Angels told me about this, even when I lived on the planet Shimor. There I was a contactee with the Spiritual World and communicated with Archangel Michael, and he told me about what was happening on Earth. Among other things, he knew that I was incarnated as St. Andrew the First-Called. And he told me, showed me pictures, images about where the parts of my body were. He said that it was divided, he knew this as one of the leaders of the Christian egregor. That is, he felt by the energies where which part was located, and showed me that they were divided - one was in one country, the other in another, etc.

Maxim: I understand, thank you.

37:37 Apostle Andrey about contacts with foreign curators about installing microchips.

Maxim: There are so many interesting questions, I don't even know where to start next. How did Jesus teach you in general, what did He teach you?

Irina (Andrew the First-Called): He taught us spiritual laws, also talked about the stars and introduced us to aliens from the sky. We went out into a deserted place, where a huge luminous "cloud" was descending from the sky, and people taller than ordinary people, in shiny suits, came out to us (shows Irina the images).

Maxim: So, you, the apostles, had real physical contact?

Irina (Andrey Pervozvanny): Yes, I had physical contact, we all had it, and it was necessary for us, because we had to tune in to transmit information to other people. They installed what you now call "microchips" in us.

Maxim: Interesting, so all the apostles were microchipped?

Irina (Andrey Pervozvanny): It was a chip in the brain (shows) to activate (at that time it was necessary) the ability to speak and write in languages that we did not learn.

Maxim: So you have been given the opportunity to speak other languages?

Irina (Andrey Pervozvanny): Yes, for this purpose, some kind of organic microchip was applied to our brain, to the cells, which becomes part of the human brain. And he accepted information that we did not know. But we gave our consent to this even before incarnation. That is, it was part of the plan for my incarnation.

39.52 Apostle Andrew about where and with whom he preached.

Maxim: Please tell us in which countries did you go to preach?

Irina (Andrey Pervozvanny): (shows a map) I walked along the shores of the Black Sea, around, then sailed on a large wooden boat up the river that goes north from the Black Sea, and further along rivers, forests... I went to different peoples, there are a lot of them, dozens. I went to the mountains (shows some mountains).

Maxim: What did you tell them there? Can you imagine, you came to the mountains, to an aul, and what did you preach to them there? That there is a Christ, or God?

Irina (Andrey Pervozvanny): When I came to some village, I was not alone (shows the five people who accompanied him).

Maxim: Who were these five people? Are they just helpers or...

Irina (Andrey the First-Called): Students, mine already.

Maxim: Are your students already?

Irina (Andrey Pervozvanny): Yes.

(Irina) He's showing me now: one is even older than him for some reason, and the rest are about his age.

(Andrew the First-Called) They were also Christians. And they accompanied me. And helpers, and disciples, and other Christians who could also preach (it also shows that he laid hands on them).

Maxim: For what?

Irina (Andrew the First-Called): Dedication, connection to Christ, to Christ consciousness, as you say. It was believed that when the laying on of hands was done, the Holy Spirit and energy descended.

42:16 Apostle Andrew about walking on water, healing and

resurrecting people.

Maxim: Tell me, please, did you really walk on water?

Irina (Andrey Pervozvanny): Not me, but my brother. I saw it simply.

Maxim: You just saw it, and Peter walked on water?

Irina (Andrey Pervozvanny): Yes, Simon. I was just in this boat (shows the picture that Jesus talked about when he had a conference with Him, but from the side of the boat).

Maxim: So you didn't go yourself, your brother did, right?

Irina (Andrey Pervozvanny): Yes, I was a witness.

Maxim: Okay. Let's continue.

Irina (Andrew the First-Called): When I came to the village, I greeted and asked to be taken to the ruler of this village, to the leader. I came to him and said: "Peace to the home!", that is, in their language. I included in my desire the ability to speak his language (thanks to the microchip, I had such an ability, although I did not teach it).

Maxim: Is it true that you resurrected people?

Irina (Andrew the First-Called): I healed seriously ill people who were mistaken for dead. But to heal the dead, it is only Jesus Christ who has risen. That is, the restoration of the body if the life thread has already been broken.

Maxim: You helped heal the almost hopelessly sick, do I understand correctly?

Irina (Andrey the First-Called): They were already mistaken for dead, they did not move, they wanted to bury them. There were no means to detect that they were still alive, they were cold (shows), completely unconscious.

Maxim: How did you resurrect them?

Irina (Andrew the First-Called): By prayer. Prayer to Jesus. He asked Jesus to help bring them back to life. I believed that they were dead, died, and asked them to be brought back to life. And this man's Angel (shows) heard this prayer and asked his Consulting Angels if it was possible to return the Soul and unite it with the body before the life thread was broken. This did not always work out, only if it corresponded to his life task.

Maxim: Tell me, please, did you go with the disciples after the death of Christ, or did you leave before His death?

Irina (Andrew the First-Called): After death, and resurrection, and ascension.

45:00 Apostle Andrew about the death of Christ and his marital status.

Maxim: Tell me, please, did you see the death of Christ with your own eyes? Were you there, present?

Irina (Andrew the First-Called): From afar I saw the cross, among a crowd of people, His mother (shows images). Far away, the soldiers pushed us back. This place was guarded, but I saw it from the outside.

Maxim: Did you have a wife and children?

Irina (Andrey): No. But I had a girlfriend, a bride, but she came out of incarnation before we were united in marriage. She left incarnation due to an infectious disease.

(Irina) He's showing me now: something like dysentery, some kind of infection.

Maxim: And after that you didn't have anyone else?

Irina (Andrey Pervozvanny): Afterwards I took up traveling. I had dangerous life circumstances: I was among the pagans, I could...

46:07 What the Apostle Andrew preached about.

Irina (Andrew the First-Called): As I already said, I came to the ruler of some village, city or region and first told him about Christ, that there is one God. I told him everything about Jesus, about His mission on Earth and offered to gather the people with the help of my servants so that I could preach a sermon. And when he asked: "Why do I need this?", I suggested praying for the health, for example, of someone from a member of the ruler's family.

Quite often it happened that the ruler at first did not want to violate his pagan faith in many gods by telling him about something else; this was alien to him. But when I said: "Okay, but I can pray to God for health, if one of you is sick, and God will heal him" (that is, I did not heal myself), then they agreed, even just to check. And quite often there were sick relatives, old people who were very sick. And by the grace of Jesus Christ, by the grace of the Lord, when I prayed for them, the grace of God, that is, His energy, overshadowed this man and restored him.

But this did not always happen, but when this person himself believed in God and was pure enough. Because if there was no internal purity, then his Angels could refuse to supply this energy, because he had to leave the incarnation. There was such an agreement.

Maxim: I understand.

Irina (Andrew the First-Called): But when I succeeded, the rulers were surprised, they called me "healer", "miracle worker" and allowed me to preach a sermon about Christ. I talked about His mission, that He

came to save people from sins through various actions that you now call “sacraments.” This is, firstly, baptism, and secondly, taking into oneself physical bread and wine, in which there is the energy of His blood and flesh.

I told how important this is, it helps to go into the Light World, because there are many dozens of pagan peoples, there are so many of them, I didn’t even remember them, for me it was a single people of God, despite some differences in names. Their customs were somewhat different. But I want to say that wherever I walked, wherever I swam, Jesus was with me (that is, he was in contact with Him - Irina). And He appeared to me, He suggested many things to me on my travels. For example, he even came and said that this place where you are standing now (shows Irina the forest near the river, the edge, the hill is rising), this is a very energetically saturated place, and people will live here (it’s like a prophecy). And I even asked Him: “Will these people be Your disciples, Christians?” At that time, of course, there was no Christianity there. And the answer came to me: “Yes, there is such a possibility, very high, that they will be Christians.” And I picked up a stick there (shows) and tied it with some kind of rope into a cross with the second one, and put it up).

Maxim: Dear friends, if you like our broadcasts, please support us with a like. Please “like” so that other people can see these broadcasts, because “likes” in any case promote the broadcast.

51:07 Apostle Andrew about body, Spirit and holiness.

Maxim: Andrey, please tell me whether the holiness of St. Andrew the First-Called remains in your embodied body now, and can this body work miracles?

Irina (Andrew the First-Called): Holiness is not in the body. Holiness manifests itself through the body. The body is matter. And holiness is the communion of the Spirit with the energy of God. And in the body, when I was an apostle, or lived somewhere else, there is no holiness in itself, but energy can manifest itself through it.

Of course, through the body of any person his spiritual energy is

manifested, including the energy that is influenced by all incarnations of this Spirit. And, of course, in the body in which I am now embodied, energies partially manifest themselves through it, along with many others. Through him, the energies of me as St. Andrew the First-Called are partially manifested. But they manifest themselves to the extent that this embodied part of the Spirit corresponds to the vibrations of that personality, that state of the Spirit, consciousness and will in which I was when I was in the body of St. Andrew the First-Called, was embodied in this personality.

Because these are different names, now there is a different name, and then it was different, and besides these incarnations I had many different names. But the names are different, the bodies are different, but I am one. And therefore, how each of my incarnations manifests me, it depends on the degree of contact of my embodied part with me, as with the Higher Self.

53:21 Apostle Andrew about his book banned by the Vatican and about flying on an alien ship.

Maxim: Thank you. Here's a question: can you tell me what's dangerous in your book, which even the Vatican is afraid to make public? Have you written any book?

Irina (Andrey Pervozvanny): Yes.

Maxim: Did you have the so-called "Gospel of Andrew"?

Irina (Andrew the First-Called): Yes, I wrote the biography of Jesus.

Maxim: Why is the Vatican afraid to publish your book?

Irina (Andrey Pervozvanny): I described there in detail what I saw aliens from the sky and what they looked like. That they came from the stars, what this "cloud" looked like - we went inside it and even looked at the Earth from the side.

Maxim: And you described all this in your book?

Irina (Andrey Pervozvanny): Yes.

Maxim: Now I understand why the Vatican is afraid to show these books. Thank you.

Irina: He won't admit it.

Maxim: I understand, I understand, thank you very much, now everything becomes clear to me. So, next question...

Irina (Andrey Pervozvanny): There is (he is now showing) a copy that has already been rewritten several times. It was not from the first century, which I wrote, but which the students copied. And this copy is kept in the Vatican library, like other apocrypha, by the way. There are quite a lot of them there.

Maxim: Thank you! I now understand why the Vatican hides some sacred writings.

Irina (Andrey Pervozvanny): I wrote, for example, about what the Earth looks like from the outside, that it is a ball.

(Irina) He now shows how he saw her, standing inside. So we enter this "cloud", and there is such a white light, next to us there are people with white faces. And then they show us the wall, and the wall is also white. And suddenly it becomes transparent, and the stars are visible through it, there are very, very many of them, and they are bright. And then the picture changes, and they show a ball (he is showing his memories) - on one side it is illuminated by the sun, and the other side is as if in shadow, but it is clearly visible. Yes, blue, white clouds, and you can even see the outlines of the continents, but he didn't understand it then.

(Andrew the First-Called) And I asked: "What is this?" And Jesus answered me, He stood next to me and said: "Don't worry, this is the

Earth on which we live." And everyone was surprised: "How can it be a ball, but we walk on it and don't fall? Where is the sun? That is, they started asking questions like that. And Jesus reminded us of the words of the prophet that were in the Tanakh, that is, in the Hebrew Bible, that God told the prophet there that "I sit above the circle of the Earth, that is, above the globe of the Earth." He reminded me that this was written many centuries before His birth. And we also remembered that we had read these scriptures.

"Where is the sun?" (in response to this, the picture seemed to change again, and a bright ball was shown). And Jesus began to explain to us that the Earth revolves around the Sun. It was such a shock for us. He smiled and said: "Don't you remember that we left the body? I already showed you this when we traveled in the Spirit." And then I answered that one thing is in the Spirit, and another in the body.

(Irina) Tells a funny story (laughs).

58:48 Message from the Apostle Andrew to his incarnate part.

Maxim: Tell me, please, how many incarnations have you had in general?

Irina (Andrey Pervozvanny): In total I had... Now I am in incarnation, it is 861st (shows this number).

Maxim: Would you like to convey something to your embodied part?

Irina (Andrey Pervozvanny): Yes, of course.

I know, my dear Divine particle, which is now embodied in a wonderful man, a very bright, kind person who always strives for knowledge of the Spirit and matter. I know that you know that you and I are one. And you often communicate with me and ask me about many things that worry you and which you doubt, turning to your Heart.

And you did this from the youngest conscious age. He did this, despite

the fact that he was mistaken, sometimes accepting the arguments of reason as my words. But all this together allowed you to experience your task in this body and in this reality where you are. Namely, as I already said, the union of the spiritual and material principles, as a single divine reality in the Light of Absolute Love.

I send you, my embodied part, the Light of my Love, and I assure you that everything you do is included in the tasks of your incarnation, and at the moment you are completely fulfilling them.

(Irina) That is, he seems to wish good luck.

(Andrew the First-Called) I wish you to unite with me after leaving the incarnation and breaking the thread of vital force to the body. Connect with me at the level at which the embodied part of St. Andrew the First-Called connected with me when it came out of incarnation.

Maxim: Thank you. I hope, or rather, I'm even sure that he hears this broadcast, although our first broadcast was cut off, but the second, I think, he still watches and hears.

Irina: Maybe he'll look later.

1:02:41 Apostle Andrew about his death and exit from incarnation.

Maxim: Please tell us how you came out of the incarnation of St. Andrew the First-Called, where it was, how old were you and what happened?

Irina (Andrey Pervozvanny): I was 67 years old.

(Irina) He shows me a fairly strong man, despite his age. I would give you fifty years.

(Andrew the First-Called): I came out of incarnation because I was

executed, tied to a cross with ropes, and left without water and food just in the sun.

This happened because I healed the wife of the ruler of the city of Patras from illness. This ruler worshiped the Roman gods (shows how he makes sacrifices - some fruits, something like that he brings to the temple of Jupiter). His wife also worshiped the Roman gods, but they could not help her from a serious illness (shows: there is something wrong with her heart).

Maxim: So you healed the ruler's woman from an illness, and they executed you for it?

Irina (Andrew the First-Called): Not for this, but for the fact that she converted to Christianity after healing.

Maxim: She later became a Christian?

Irina (Andrew the First-Called): She became a Christian and began to teach her children this. The father was against it, and he said that this was a betrayal of the gods, and that temporary healing of the body did not imply such a betrayal. Moreover, she became my student and went to my house (shows some kind of wooden church).

Maxim: Maybe he was just jealous of you for her?

Irina (Andrey Pervozvanny): Yes. She told me that her husband doesn't believe that she comes to me simply for apprenticeship, she spends so much time.

Maxim: I'm telling you, I was jealous, it turns out.

Irina (Andrei the First-Called): He also said about faith - "I changed my religion," and then he also said that "perhaps Andrei is not only your teacher, maybe he teaches you not only faith." Although this did not happen, I was 67 years old.

(Irina) But all the same, I want to say, he's showing me the image now - I wouldn't give him 67.

Maxim: In general, it's clear - you suffered because of the ruler, who was jealous of you for his wife, who converted to Christianity, do I understand correctly?

Irina (Andrew the First-Called): When I came out of incarnation, I asked the Angels-mentors, the Angels-consultants. After all, jealousy was only one of the reasons why he decided to kill me, execute me. Still, the main reason was anger at the change in faith. Well, there was jealousy, but less.

Maxim: I understand. Where did this even happen?

Irina (Andrew the First-Called): On the territory of Greece. But then it was the Roman Empire, and now it is the territory of Greece.

Maxim: I understand. And then, accordingly, where did your body go, you know?

Irina (Andrew the First-Called): When they tied me to the cross (shows the cross), there were guards, several soldiers, but they got tired of standing or lying under the hot sun, and went into the shadows somewhere. And they made sure that no one brought me water or gave me something to drink.

I already had disciples at that time, and this ruler said that he was arranging such an execution so that all people would see that no God would remove me from the cross. Because cutting off the head and simply hanging it would be faster. But he said and announced: "I will deliberately inflict maximum torture on this man, who declared that he communicates with God, that he flew in a heavenly chariot, etc. Look how your teacher will suffer, and what "heavenly chariot" will remove him from there." That is, I'll just hang it up, and you can see for yourself.

He could have executed in a different way, and the point is that, in fact,

the disciples believed. Well, yes, I talked about Christ, about Angels, about how they fly. And they were really waiting for something physical to come and save me. But I no longer had such a task of incarnation, my task was already over, and I needed to leave the incarnation.

And the ruler said (this verdict was announced in front of me): “When he hangs on this cross without food, without water, and if one of the disciples comes up and tries to bring him something - food or water, he will immediately be captured and hanged next to him on another cross.” But, despite this (I heard everything perfectly well), I forgave him. Why did I reach level 24? Because I hung on this cross, and it was more than five days.

Maxim: More than five days?

Irina (Andrey Pervozvanny): Yes, until dehydration occurs. I lost consciousness, and then came to my senses again, prayed. But, naturally, the first thing I did - I didn’t know how much my heart could stand, and therefore I immediately sent the Light of Love to this man, the ruler, his wife. So that no trace of resentment or anger remains: I knew perfectly well that this would not save me, and now I would appear before God.

I just understood perfectly well why he decided that way. Because he had low spirituality, he believed in gods, but did not believe in God as Love. And since he did not believe in Love, he was cruel, and precisely because of his cruelty, he decided to cause me as much suffering as possible in this way. And to dissuade my subjects that I am preaching the Truth. That is, he was guided by his own concepts of justice.

I understood him, of course, but I was sorry, I felt compassion, because he is so cruel and because this could lead him to suffering in hell, on hellish levels. And I, indeed, sincerely prayed to God that before he left the incarnation he would have time to repent of this. But no, I didn’t have time, I later saw him on the fifth level, I came to him, went down, we talked, after he left the incarnation. When I saw him, the first thing I said to him was: “It’s a pity that you didn’t have time.”

(Irina) Now he shows me a picture of him hanging in a loincloth, some

insects are biting him, his hands are tied... And he shows the night.

Irina (Andrey Pervozvanny): And before dawn, one of my students brings me water, but I look at her and understand that she is being watched. My voice was hoarse, and I told her: “Get back! Don't you dare come up to me and give me anything! What are you doing, you have children, get out of here!” That is, he began to swear.

Maxim: You were dying and also swore at those who tried to help you?

Irina (Andrey Pervozvanny): Not that he swore, he drove her away, because she wanted to come up and did not listen to me. But I knew that if she was captured, they would hang her next to me on another cross, and it would be unbearable for me to see if someone would suffer next to me because of me. It would be better for me to hang three more times this much than for someone else to hang next to me because they wanted to give me water.

1:12:29 Apostle Andrew about the prayer “Our Father” and contactees with Christ and the Christ Consciousness.

Maxim: Thank you, Andrey! We have a very large number of people now asking you to give some kind of prayer for the healing of the Soul. If you were giving a prayer for people now, what would you give?

Irina (Andrew the First-Called): All prayers were given, including by my Teacher and yours - Jesus. “Our Father” which you call. If you read it fully consciously and understand what it says, you can increase your spiritual level. What you call “healing the soul” is metanoia, repentance, a completely new look at yourself, at your loved ones, at the Universe, at God. And, dear friends, for this you already have all the “tools” in different religions, in different teachings. This doesn't require many words. As Jesus said: “When you pray, do not talk too much, like the pagans, for they think that for their many words they will be heard. Don’t be like them, but simply turn internally, in a few words, to your Heavenly Father, who is in secret. And God your Heavenly Father, who sees in secret, will reward you openly.” The prayer can be absolutely anything.

Maxim: Here Olga Nikonova writes that everyone already knows that “Our Father” is translated incorrectly, and the meaning is deeper, different. What do you think? Now I can read a prayer, and you tell me, this is what it is, what is its meaning? Can this be done?

Irina: He’s asking me now.

(Andrew the First-Called) I know that Irina is a contactee, she is in contact with the Interstellar Union, I know what it is, about the planet Burkhad, and that Irina is in contact with the Christ Consciousness, as well as with many Archangels. And I would like to know if any of its curators or the curators of your Cassiopeia Project (I also know about it) gave an interpretation of the Lord’s Prayer from the position of the Spiritual World and the Interstellar Union?

Irina: They did. MidgasCaus gave. Read it, because indeed MidgasKaus gave, and this Spirit is also familiar with Christ, and they were quite close in several incarnations. And he now communicates with Him, with His Christ Consciousness, and is His contactee - MidgasCaus itself. Jesus Christ has contactees on different planets. And you can read the interpretation that he gave, it is there. Everything is clear there.

01:15:47 Message of the Spirit of Andrew the First-Called to earthlings.

Maxim: Thank you! Imagine that you now have the opportunity to convey something to all the inhabitants of the planet. What would you like to convey?

Irina (Andrey Pervozvanny): My dear brothers and sisters, I ask you to appreciate every moment of your earthly life, to appreciate those people who are next to you. To appreciate means to treat their feelings, their Souls with respect and reverence. Remember that although you are together now, the very next day when the sun comes up, this may change. And you may not say the words that you could say now. Or you will say, but you will not be sure that you will be heard from the Spiritual world, or that you will hear your loved one from the

Spiritual world.

Now you are here, and your loved ones are here in the material world, but in an hour or a few hours this circumstance may change. None of you knows when you will be called to your Heavenly Father, so appreciate every moment of life in matter as a great gift for the manifestation of Love. I wish you to fully understand the value of life, and the value of your loved ones who are next to you, no matter what.

Maxim: Thank you, Andrey!

Dear friends, thank you for supporting this broadcast. I'm waiting for everyone for the New Year in Abkhazia. Guys, the New Year will be simply enchanting, take your friends, mothers, comrades with you, they can just relax. The hotel gave us a great price: for 9 days all inclusive - 30,000 rubles. Plus, the retreat itself costs 20,000 rubles, and your friends can come and just relax in this hotel with pleasure. And you will engage in self-development and, accordingly, go through a huge bunch of practices, meditations, initiations, and various healing sessions. In general, we are waiting for you for the New Year at our wonderful retreat. And there I, as a leader, will also tell you a lot of new things. I'm looking forward to the large family of "Cassiopeia" for the New Year in Abkhazia! Link below this video. Guys, bye!

Irina: Bye everyone!

01:18:40 End of broadcast.

November 27, 2022

Conference participants:

Irina Podzorova is a contactee with extraterrestrial civilizations, subtle-material civilizations and the Spiritual world;

Maxim Rusan - head of the CASSIOPEA project and the Center for

Spiritual and Physical Development;

Phantom of the disembodied part of the Spirit of the Apostle Andrew the First-Called.

#204 History of the religion Islam. What information did Angel Gabriel convey to the Prophet Mohammed?

https://blog.cassiopeia.center/istoriya-religii-islam-kakuyu-informaciyu-angel-dz
https://www.youtube.com/watch?v=-rYu_UIgv4o

00:00 Start of video.

00:22 Greetings from conference participants. First surah of the Koran.

Vladimir: Dear friends, hello! My name is Vladimir Goldstein. I'm in the suburbs of Chicago. And it is absolutely no coincidence that today I am sitting in this white cap, which is called skufya. Today our conference is dedicated to an important topic that many people are waiting for, namely Islam. A spiritual tradition, a serious movement, a confession called Islam - a Muslim egregor. Today Irina Podzorova is with us. Hello, Ira.

Irina: Hello!

Vladimir: And today we have Khamid Dadaev. It is located in Chechnya, the city of Grozny. Greetings, Hamid.

Hamid: Hello.

Irina: Hello, Hamid.

Vladimir: Today we will take turns asking questions with Hamid. He has questions, he is a Muslim. I also have questions, I will represent those Muslims who sent us these questions. Moreover, I myself, maybe this is a secret for some, am also a Muslim. I accepted Islam, although I am in different egregors, in many others too. It doesn't bother me. Ira, who is here with us today?

Irina: Hello, dear friends! My name is Irina Podzorova. I am a contactee with extraterrestrial civilizations. Today, present nearby are the representative of the planet Esler, the curator of MidgasCaus - a biologist, psychologist and specialist in alien life forms. And also two representatives of the planet Tumesout, constellation Orion. This is one of the races of our creators, our physical bodies. It was the inhabitants of this planet who initiated contact with Mohammed, a resident of the Arabian Peninsula, in the 7th century. From this contact and subsequent events the religion of Islam began to move. Lipor is present from Tumesout today; he is a specialist in the formation of religious egregors. He came along with his Teacher, incarnated on Tumesout, his name is Apshetarim. Apshetarim was the Tumesoutian who is known in Islam as the Angel Gabriel.

Vladimir: Archangel Dzhabrail.

Irina: He is still embodied on Tumesout, he says.

Vladimir: It was he who handed over the Koran to Muhammad. This was not the Archangel Gabriel, whom we know as Mirakh Kaunta from the planet Burkhad. And this was Dzhabrail, whom we now know as Apshetarim from the planet Tumesout.

Irina: Dzhabrail is his name in Tumesout.

Vladimir: Okay. Hamid, you wanted to say a prayer, as far as I remember.

Hamid: Yes. A short introduction. I want to tell all my acquaintances and friends not to think that I am a little moved, not to drag me anywhere. And I ask everyone to accept this interview as normal. More than ever, I am very sane today. In connection with the questions that I have, I had a request to hold a meeting. In all our endeavors, every day, wherever we go, whatever we do, whether we make a purchase or a trip, when we see the first steps of our child, we always say: “Bismillayahir-Rahmaanir-Rakhim!” This first surah from the Qur'an is called Al-Fatihah.

Bismillayahir-Rahmanir-Raheem

Al-Hamdu Lillyahi Rabbil-`Alamiin

Ar-Rahmanir-Raheem

Maliki yamid-deen

Iyayakya nya'bu ua iyayayakya nasta'iin

Ihdinya ssyraatal-mustakyyim

Ssyraatal-lyaziina an`amta `aleihim, gairil-magduubi `aleihim wa lad-daaaliin. Amine!

The Koran begins with this first sura, and all the actions that we perform, all our good undertakings, we begin with this. Maybe many people don’t know, and if there is a need, Irina, I can translate the first sura into Russian.

Vladimir: Very short, if possible. Quite short.

Irina: Yes, we don’t have much time. Let's leave more to questions. Maybe just a short one.

Vladimir: Al-Hamdu Lillyahi this means “All Praise be to Allah.” Al-Hamdu Lillyahi, and let our entire recording take place with these words. I ask for a short translation.

Hamid: In the name of Allah, the merciful, merciful. Praise be to Allah, the Lord of the worlds. Gracious, merciful. Lord of the day of retribution. You alone we worship. We pray to you alone for help. Lead us on the straight path. By the path of those whom you have blessed. Not those who fell into anger and those who are not lost. Here's a short one.

Vladimir: Al-Hamdu Lillyahi, once again. Thank you very much, Hamid! I ask the first question, then let's move on to yours.

06:46 Is Islam the last religion? Who is Allah?

Vladimir: My first question is this: Why does the Koran claim that all previous religions were abolished with the advent of Islam? And why is it believed that Islam, as the Koran says, is the last religion that is transmitted?

Irina: Apshetarim answers: “I, as the one who conveyed most of the words that later became the text directly to Magomed, was his curator. And now I remain in contact with him. Although he is now in the Spiritual world, and I am still embodied in the material. I'm answering the question. There is no direct word in the Koran that it replaced all religions. It meant that on the Arabian Peninsula, to which the Interstellar Union sent me, including my mentors from the Spiritual World, that is, I had an agreement. There were many religions in the Arabian Peninsula before the birth of Mohammed, who himself was born into a religious family. These religions provided for the worship and veneration of many gods, Spirits of nature, and Spirits of ancestors. The Earth's traditional connection with the Spirits of Nature, which your ancestors revered as gods.

Religions were heterogeneous. It cannot be said that there was worship of many gods whose names were the same. These were heterogeneous cults in different areas, which became the cause of disagreements between different priests, shamans, between different

cults and their followers. For this reason, it was decided to unite the Arab peoples and the peoples who lived nearby under a single religion. It is for this reason that the Koran said that there is only one God - Allah, and whoever believes in him is submissive to him and follows his path. I want to clarify right away who this is – Allah. By Allah is meant neither Mohammed nor his Spirit. By Allah I do not mean I, the one who brought this news. By Allah we mean only the Creator of the Universe, the Creator of all worlds. That is what he is called - the Creator of all worlds. By worlds we mean those civilizations that live near the stars, in your opinion aliens, as well as various subtle civilizations, and all spiritual levels. This is the Creator of everything. He exists alone. He who is the cause of everything is One. Islam replaced all religions, meaning it was supposed to replace only those where people worshiped many gods. These are polytheistic cults. This was one of the tasks of the new religion. As for religions before Islam that recognized one God, this is not condemned in the Koran and is not called upon to replace them with Islam. This is a human right.

Vladimir: I see, thank you. Please. Hamid, your question. Start with the first one.

10:50 The location of the Spirit of Mohammed. Who is his curator?

Hamid: My question, he almost answered: Where is the Spirit of Mohammed and who is the curator?

Irina: The Spirit of Mohammed in the Spiritual World. He is now on the 22nd, Consulting Angel.

Hamid: Is he not incarnate now?

Irina: He is not embodied now, he is now in the Spiritual world, and Apshetarim-Jebrail says that he communicates with him. Leaves the body, rises to it and communicates. Or Mohammed with him. When it was implemented, I was its direct supervisor. He also had contacts with some plasmoid civilizations, with representatives of Burkhad, and he also met with Mirakh Count, but much later and in my presence. With Mirakh Count, who in Christianity is called Archangel Gabriel, this is my friend and collaborator. He's just from another planet. I am a little

younger than him, if you look at earthly age, then he is 6000 years old, and I am about 4000 years old.

12:27 Who conveyed the words to Mohammed for the Koran?

Vladimir: In the Koran it is believed that the Archangel Gabriel conveyed everything to Mohammed in translations. This means that this is an inaccuracy, this is a mistake. In fact, it was Dzhabrail, and everyone translated it as Gabriel. Is this the point?

Irina: When I came into contact with Mohammed, I talked about Archangel Michael, about Archangel Gabriel, and also said that they pass on this teaching and support it. And since Mohammed heard about Christian teachings, he already knew about them before contact, because we talked to him. He knew about Christianity, he visited with a caravan in areas where Christians lived, he communicated with them. And when I said that the teaching about Allah is supported by Archangel Gabriel and Archangel Michael, he wrote that this Teaching is from them.

Vladimir: I see. Fine. Thank you.

13:57 Guardians of the Islamic egregor.

Vladimir: Who is the manager of the egregor, we understand that. Now it's Mohammed.

Irina: In general, we have five egregor keepers. Five pillars of Islam and five guardians of the egregor.

Vladimir: Please name five.

Irina: Muhammad himself, me, Abdukhashim, Ismail Bukhari, Israfil.

Vladimir: I see, thank you. Are all those named in the Spiritual World?

Irina: Everyone except me is currently in the Spiritual World. Not embodied. I am in embodiment.

Vladimir: I see.

14:52 How the Muslim egregor was formed.

Vladimir: Next question. Tell me, please, what kind of flight did Muhammad or Mohammed take? Tell me what is the best way to call it? What was the form of the flight to Jerusalem, which is called Isra, and what was the form of the ascension to heaven. How did both happen? In Jerusalem there was a common prayer with Jesus and Moses.

Irina: Apashetarim says: “Mohammed had physical contacts with me, with representatives of Burkhad. During physical contacts, he was shown the base on the Moon, its Tumesout branch. They also showed the planet Tumesout itself, the planet Burkhad, the Earth. Early in the morning he was brought to the cities to which he asked to be transferred. He couldn't get there himself. To go there, he asked us about it. On these travels we also taught him to leave the body, i.e. he and I were on a spiritual journey. When he was on our ship, he made a spiritual flight, an astral journey. We showed him the spiritual levels where Angels, spiritual beings, are located. For example, he met with Moses, with his Spirit. This contact was also with me. When he returned from these travels, I know for sure that he did not write everything down, and not right away. What he wrote down later, as he remembered.

Vladimir: So these were astral flights?

Irina: It was both astral and physical too. He wrote about them, but not about all of them.

Vladimir: On the physical level, he met with one of these personalities: Jesus, Moses, etc.

Irina: Moses was in the Spiritual world when Mohammed was

incarnated. Mohammed was physically on the ship, but during these physical contacts I showed him astral travel and took him to those personalities that interested him.

17:50 Symbol of the winged animal Burak.

Vladimir: When he spoke about the winged animal, whose name was Burak, what did he mean? The animal that carried him to Jerusalem? What is this symbol?

Irina: I transported him on my ship. He shows me a ship, a white ball. Why did he write about an animal? I advised him this way, so as not to cause unnecessary distrust in himself, that he said that he flew on a ship in a world where there were not even cars.

Vladimir: Everything is clear, thank you. Hamid, fourth question.

Irina: They could even be faster than the beast. He says it was easier for people to imagine it in their minds back then.

Vladimir: I see, thank you. The question about contactees is yours, please.

18:53 Muslim contactees. Can humans communicate with aliens?

Hamid: Fourth question. Do contactees now exist entirely in the Muslim world? For now.

Irina: Contactors exist everywhere, in all egregors.

Hamid: Why does it relate to the previous question, Muhammad also had physical contacts, but it is not stated in the Quran. And in the subsequent description it is said that an earthly person cannot meet an alien.

Irina: Please read where it is written.

Hamid: This is not in the Koran.

Irina: After the Koran, many began to make up dowries. This is typical for any religion. You need to know the context. This is necessary for his own safety.

Vladimir: I see.

Hamid: Just a second. These subsequent scriptures or such, no one can say, but it is not given by anyone. He also had physical contacts.

Irina: Mohammed did, yes.

Vladimir: This was not the case. This was all invented and introduced later. There is nothing in the Koran that humans cannot communicate with aliens.

Irina: Is there a word in the Koran that is translated as “alien”?

Hamid: No. It says that he went through seven heavens and visited different planets. This is indicated.

Irina: When it is written that he visited different planets, and at the same time saw that this was heaven, hell, God, Angels, etc., this is astral travel. At the same time, when they write that he was physically transferred, this indicates that he had physical contact. It must be understood that when he was physically on the ship, his Spirit separated and flew into the Spiritual World. Anyone who understands the difference between physical travel and astral travel understands well what I am talking about.

Hamid: I understand too. The main thing is that the listeners understand us.

Vladimir: Let's move on.

Irina: When he came to the ship, he lay down in this position, and Dzhabrail told him what to do so that his Spirit would leave his body. He was both on physical contact and on a spiritual journey at the same time. All clear.

Vladimir: He was also in physical contact on the ship. And at the same time they took him to the Spiritual World and the Astral World. All this was combined with each other, and in the descriptions it somewhat overlapped one another.

Irina: Yes. It's overlapped.

22:05 What causes possible distortions in the Koran and how can they be eliminated?

Vladimir: I have a question, a continuation of the same. Please tell me, Apshetarim, are there any key distortions in this pronunciation or have they added or added something? Or in the collection of Surahs, or in hadiths. Give specific examples of distortions, if any. The Koran also says that the Creator will not allow this book to be distorted. If the prophet adds or subtracts something from himself, then punishment awaits him. There is an addition. According to historical data, Imam Ali participated in the compilation of the Koran. If there were distortions, why didn't he prevent it? All about distortion, perhaps.

Irina: What is in the egregor in the records in Arabic, from the information I transmitted, and how Mohammed understood it, how he described the following in his picture of the world, and how now, after one and a half thousand years, I did not see any distortions compared to the original the records of Mohammed and his followers who wrote down his records. Another thing is that some translations may be distorted. They are not intentionally distorted, but in order to translate such a text, you yourself need to be not just a literate person in Arabic, you need to be a spiritually enlightened person. You need to understand what is being said and translate, strictly following what Mohammed wanted to say. It is necessary to look for some correspondence with modern concepts to those ancient concepts, and

only a spiritually wise person can do this.

Vladimir: Thank you. Fifth question please, Hamid. Just don't talk about distortions anymore, but the first part of the fifth.

24:16 A way to resolve contradictions between Sunnis and Shiites when choosing the religious leader of the community.

Hamid: Briefly. There are certain contradictions between Sunnis and Shiites. Who is right and who is wrong here? Are there any distortions?

Vladimir: And about Sufism, please, here. A few words about the specifics of Sufism.

Hamid: Let there be Sufism too.

Irina: Apshetarim says: "Contradictions exist between Sunnis and Shiites due to the fact that some followers of Mohammed, after his disincarnation, initially misunderstood the principle by which religious leaders in their community should be endowed with power. How should religious leaders be identified? This controversy was small at first. There were several opinions that did not prevent these people from loving each other and doing good. But as the religion of Islam strengthened in the Arabian Peninsula, and more Muslims became more numerous, and as the followers of Islam began to come to political power, all conflicting opinions came into open confrontation due to the fact that there was no complete understanding of who has the right guide the religious life of believers. The initial understanding that I conveyed was the same as on Tumesout, as on Burkhad, that the one who feels this calling within himself and who is worthy in his deeds can lead the believers. That is, he himself fulfills all the norms of this religion, while being a kind, loving, merciful person, and who has the desire and organizational abilities. Some followers of Mohammed accepted from their previous knowledge, from their pre-Muslim upbringing, that power can only be transmitted by blood.

Hamid: Yes, yes.

Irina: This idea is the basis of any monarchism on Earth. It is a distortion of the original knowledge of spiritual power, because only those who are more materialists can think this way, since they pay more attention to the body than to the Spirit. Some parents may incarnate Spirits from different levels, therefore with completely different tasks. These tasks may not include managing any process. Any norms of the Interstellar Union are that power is not transmitted either by blood or by inheritance. It is transmitted only by qualities. Naturally, the Interstellar Union opposes casteism in this matter.

Vladimir: Apshetarim, so how to neutralize the contradictions between Sunnis and Shiites so that there is no hostility?

Irina: Everyone, both Sunnis and Shiites, should trust God in this matter that those rulers who were immediately after Mohammed and who are not recognized as Shiites could not lead the Muslim community if it was not the will of Allah.

Vladimir: Everything is clear to me. This was the most important question here. Thank you.

29:43 The spiritual role of Sufism, its comparison with Kabbalah.

Vladimir: And about Sufism. What is the spiritual role of Sufism and can it be compared with Jewish Kabbalah?

Irina: I wouldn’t compare it with Kabbalah. These are different Teachings, they have different prerequisites. Kabbalah is more of a study of the Torah and some books based on it, which talk about the Spiritual world from the point of view of numerology and other symbols. There are Kabbalistic books written not in Hebrew, but in a certain language - a code.

Vladimir: Okay. What about Sufism?

Irina: communication consists of studying books. I very often saw Sufis who not only did not read the Koran, but they did not know how to read at all. Who is a Sufi? This is a person within the framework of the

Islamic religious egregor, for whom love for God is the highest value. He spends almost the entire time of his incarnation on achieving this love and maintaining it in himself using various methods: asceticism, prayer, alms, and so on. He believes that he cannot spend the time of incarnation on anything else, because... the time of incarnation is short, and he does not know when he will leave this body and appear before Allah. And he wants to appear before him in the state in which he is when he connects with him through a spiritual channel. And he can unite only by constantly remembering Allah, saying prayers to him in his heart, treating others and himself with love. This life is somewhat reminiscent of some bhaktas in India. Such a life of contemplation of God and renunciation of pleasures, not because they are bad, but because they can distract the senses, such a life is little compatible with life in the material world, much less with success in it. Such people often, even if they acquired material wealth, they simply, out of compassion, distributed it to the poor and even sold their last plots and helped those in need, while they themselves lived, one might say, in caves. Often among them there were hermits, not because they wanted to get away from the sinful world, but because there was no other opportunity to exist in this world if they did not give something.

Vladimir: In general, it’s clear about Sufism.

33:20 The importance of observing Muslim rituals. The meaning of the number five in Islam.

Vladimir: I’ll ask the following question. Tell me, please, how important it is to perform clearly the rituals, in full, that are in Islam? Is leaving them in any way a serious sin? For example, is it necessary to do exactly five prayers a day, and if you do three or four, how scary is that? How critical is it to carry out the Hajj, the pilgrimage to Mecca? Doing zakat is obligatory charity, keeping a beard or saving it, if you shave it, it is largely considered a sin, etc. I have listed all the rituals. Let's get closer to Ramadan. It’s already clear what we’re talking about.

Irina: About prayer. The number five, which is prescribed for five prayers per day for a Muslim, is not a random, arbitrarily chosen number. According to the law of numerology, which is well known to me and other representatives of the Islamic religious egregor, the number five in numerology is a symbol of a person, because An

earthly person, firstly, has five fingers on his hand. Secondly, the number five, in its vibrations, in the internal qualities of the number, is a symbol of supreme power. A symbol of a person and the vibration of supreme power, a kind of leadership, process control, all this taken together is a symbol of a person's power over himself. The person himself decides whether he will read prayer five times or not, but I am talking about the importance of this number for a reason. If a person adheres to these norms, he helps his spiritual nature, his spiritual mind, to rule over his instinctive manifestations. It is the number five that helps him maintain such a vibration, which contributes to his spiritual strength and strengthens his faith. This is not a meaningless dogma, but it is given to help the believer to strengthen him on the difficult path to the Light.

36:12 How important is a beard in Islam?

Vladimir: Okay. How critical is it for a Muslim not to shave his beard?

Irina: Should I shave my beard?

Vladimir: Yes. There is a question: Is it important? And shaving is considered a sin. This is what is considered in Islam. How important is it to have a beard?

Irina: As for the physical body and appearance, this is not a sin. Just like shaving or wearing a beard is a person's personal preference. It cannot be a sin and it cannot be a virtue. These are absolutely neutral things that do not relate to a person's spiritual life if he does not attach such importance to them.

36:58 The importance of Hajj for a Muslim.

Vladimir: Is the pilgrimage to Mecca considered something critical for a Muslim if he has never performed a hajj during his life? How much worse is he considered than someone who has done this at least once?

Irina: The law on Hajj was also given for a reason. It is quite soft. I

want to emphasize that Sharia is a soft law in relation to people. It is much softer in its manifestations than the same Torah. Especially in terms of punishing crimes. The Hajj Law helps a person to see a place dear to his heart at least once in his life. But if a person is objectively unable, due to his financial situation or physical health, to visit this place at least once in his life physically, and he does not have people who could help him with this, Allah did not send them, then there is absolutely no sin in this . This means it is a sin to visit this place if possible. It is also considered a virtue if a rich, financially secure Muslim, at his own expense, helps to perform the Hajj to someone who is unable to do so. This is considered a virtue, and Allah rewards it a thousand times over. Why is this considered important? This is important so that people who earn money spend it not only on houses, goods, wealth, gold, but so that they can spend this money, material resources on their spiritual development, since by directing them on this journey, they they remember Mohammed and do it for his sake. They don't just come to Mecca to go around the whole city and sit in all the taverns. No, not for that. They come to visit the places dearest to the Muslim's heart and offer obeisances and love to Allah.

40:08 The spiritual meaning of Ramadan fasting. The influence of Ramadan on a person's physical condition.

Hamid: Sixth question: Fasting Ramadan and its spiritual nature.

Vladimir: I want to clarify the spiritual meaning of Ramadan. I'll tell you for those who don't know, this fast takes place in May for about a month; during the daytime you can neither eat nor drink. And after sunrise and after sunset you can. I have an additional question. But doesn't this cause physical harm to the body when people eat too much at night and then fast all day for a month?

Hamid: Muslims know about this, for those who don't know, let him say it.

Vladimir: Yes, finally.

Irina: The Ramadan fast was established in honor of the holiday, although there are no such restrictions in the holiday itself. Apshetarim

says: “The people among whom the news of Islam was spreading required physical influence. In order to show them your faith, you had to do it not just verbally, but physically limit yourself in something. Because that was their psychology. When in the light of the sun during this period they do not consume food and water, they do this out of love for God, for Allah, i.e. they endure some thirst and hunger because they believe that if they eat or drink something, Allah will see it. They do not want the love of material things to interfere with the love of God. The first point is the development of love. All this is done to dedicate this act to God. The second is the development of patience and willpower, this forces you to be more sober about your sins, for example. A person who can tolerate thirst and hunger will be able to be more careful about his desires after others.

Vladimir: Why is it that you can’t eat everything during daylight hours, but during dark times you can eat everything and isn’t it harmful?

Irina: I want to emphasize that quite large categories of people are exempt from observing this fast. These are sick people who feel unwell. According to the rules, pregnant women should be released, if they want to, then under medical supervision. Children, old people, a fairly large category are completely exempt. This was of greater importance to male warriors. You need to understand that they were raised as warriors who could move through the desert for weeks without water or with little water and a small handful of dates. Conditions in those days were harsh. This is how endurance was developed. Why is it possible at night? Because if you are deprived of water and food, or even just food, for a long time - both day and night, it will cause physical harm to a person. And the purpose of fasting is to develop patience, humility, love, and repentance.

Vladimir: Is there any physical harm if a person does not eat all day and eats heavily at night? And so on for a whole month.

Irina: The educational point here is that you can take two small meals a day in the evening and early morning, before the sun rises.

Hamid: Don't overeat.

Irina: Yes, little by little. If you haven't eaten all day and then dream about this food, then a person begins to absorb it in excess. The important thing here is patience, gradualness, i.e. a person must understand that if he eats a little, it will not cause him any harm. And it's good that the money saved on buying food and water during the day can be directed not to your own account, but to charity. This is the solution for any post.

Vladimir: Thank you very much.

46:30 The meaning of the Crescent symbol.

Vladimir: Apshetarim, please tell me why the crescent moon is the symbol of Islam?

Irina: This is not only a symbol of Islam. The crescent moon was a symbol of very ancient religions that came from the sky, from contacts. But Mohammed himself knew about this symbol and drew it in the sand. Very often this was a symbol that if this person created a religion, then he was on the same moon base. Often this was a symbol of the spiritual astral world, because It is at night that people enter their astral bodies and the Moon appears. And a symbol of plasmoid contacts, because very often, magical rituals for which plasmoid civilizations were responsible were performed at night with the appearance of the Moon.

47:43 The miracle of the splitting of the Moon by the Prophet Muhammad.

Vladimir: Can you describe the miracle of the splitting of the Moon by the Prophet Muhammad?

Irina: Apshetarim shows and says that it was the arrival of a Tumesou ship, in the form of a ball, at the moment of the battle. One tribe of Arabs that accepted Mohammed fought with tribes that did not accept them and wanted to destroy them and steal something. There was material interest. At this moment, he shows, a Tumesou ship appeared and made a visual effect. It looked like a large light yellow ball. This

night was moonless. The ball appeared, all the warriors saw it. Dzhabrail says that he was not on the ship, he was at the base, but there were other Tumesoutians there. In order for the warriors to disperse, the ship created a visual effect when it created a plasma field in front of itself, in the form of the same ball, and itself nearby, it turned out that it seemed as if it had split into two halves.

Vladimir: How did there become two Moons?

Irina: Everyone understood that this had to do with Mohammed, because before that he prayed to Allah to send victory. And everyone realized that what they saw had something to do with him; they believed that his prayer had split the Moon. It was not he himself who split the moon, but the one to whom he prayed. That Allah is so against war and this battle that what happened before their eyes frightened them, and they all dispersed.

50:19 The spiritual meaning of polygamy in ancient times and the modern world.

Hamid: Spiritual meaning of polygamy? Ablution, everyone knows, on the one hand, that it is cleanliness, hygiene, but what does it mean on the spiritual side?

Vladimir: I want to focus on polygamy.

Hamid: Many people want to focus on this.

Vladimir: Yes, this is not surprising. Emphasize that the Koran says that in heaven men will be waited by female angels, houris, a certain number of them, and virgins, as everyone knows. Please comment on this information from the Koran.

Irina: Apshetarim says: “You see in what images I showed Mohammed and his followers the meaning of being in the Spiritual world. In images they would understand. They didn’t imagine great pleasures, that’s what happened. They imagined pleasure not just with women, but with virgins. I remember very well Mohammed’s mood about the female

sex, we talked about it a lot. He had several wives, as far as I remember exactly, there were one or two virgins. The rest of the women were not only previously married, but also with children. But for him, like any representative of his people, it was considered the highest honor that he would be a woman's first. I asked why this is so important and is it even important? From that communication I realized that yes, this is important for the men of the Earth. From a psychological and spiritual point of view, the first man who appears to a woman, firstly, arouses in her greater love, greater trust, because for her this is the first partner who shows how to make this contact. This increases the likelihood that the girl will love this man, because... these are the first feelings unburned by disappointment from other relationships. He, too, may be more likely to love, love may grow from falling in love with the one who is her first, he has not yet collected the blocks. MidgasKaus suggests, I thank him, he knows more about psychology from an energy point of view, that a man has not yet accumulated blocks in relation to women, so it is easier for him to love and open his heart. Therefore, it was believed that virginity brings a man no longer physical, but spiritual satisfaction, that he is her teacher, mentor. The followers of Mohammed, his relatives, the friends to whom he conveyed my message, often could not imagine greater pleasures than to eternally unite with virgins in the shade of gardens. Such were the performances.

As for polygamy. Polygyny existed for a very, very long time, in almost all nations of the Earth. There was a reason for this. In ancient times it was very relevant. Many men died in wars, many men died hunting. Those women who were left without their men, husbands, grooms, became defenseless members of society, because... in ancient society there were no professions in which a woman could realize herself and provide for herself. The men did everything, because... there were, for example, no modern sciences, as there are now on Earth, there were no types of art that could provide for a person. More often it was the occupation of beggars who were given alms. It was possible to earn a living only through rough physical labor or trade. To engage in trade, guards were required, and the person himself had to be physically strong, otherwise he would have been robbed by robbers. Trading at that time was a dangerous occupation. It was very difficult for a woman without a man, without a father, without a brother, without a husband, to be independent in this society, therefore, left without a husband or without finding one, women could take the simplest path, becoming a representative of a profession that provides sexual services to men for money. This undermined moral principles in society and contributed to

the spread of infectious diseases, etc. Therefore, the ancient people, knowing the consequences of such a life for women, introduced laws on polygamy. These laws appeared long before Islam, before Christianity. These laws protected, first of all, women, and protected children born in such marriages. But this was an additional burden on men, because... he became responsible for several women. Because of this, there were many abuses in the ancient world when a rich man, ruler, merchant, even a religious figure who had many followers had many wives. He treated them unfairly because there were many of them. He oppressed some, brought others closer to him, and drove others out. When I flew to Mohammed and began to study the society of the Earth, the people around him also had the custom of polygamy. He was a mess, from my point of view. Therefore, I and other leading specialists of the Interstellar Union: Mirakh Count took part, also representatives from the planet Disaru, who still have these norms, developed a fair law, I still think so, so that polygamy would not be for the whim of men, but for protection women, children and for their general development on the path of Allah, to faith, love, mercy. But polygamy is not obligatory for a Muslim. Moreover, it imposes so many obligations on him in relation to all wives that now, judging by the egregor, more and more Muslim men prefer one wife.

59:42 The spiritual meaning of physical ablution before prayers.

Vladimir: Apshetarim, thank you very much! I also want to ask a question. Therefore, if possible, very briefly the second part of Hamid's question about the spiritual component of physical ablution before prayers.

Hamid: Thank you.

Irina: The spiritual component is the so-called ritual purity. Found in many ancient religions. Its spiritual meaning is to strengthen the egregor now, at the present time. Why was it introduced into Islam? Pre-Islamic ideas of ancient people about the gods often involved physical cleansing or preparing the body for communication with the gods. This custom remained in Judaism and Islam. By introducing old concepts into a new religious egregor, people were taught to follow the new path of Allah, the One God, transferring old customs and modernizing them so that they brought more benefits and made more sense. It is worth asking why was ritual purity so important to ancient

worshipers of the gods? Because purity implied cleansing from body secretions or traces of the energy of other people, which interfered with connecting with various plasmoid civilizations, in this case. For spiritual contact with God and Angels, this does not matter so much. This was introduced to strengthen the new religion with old ideas. In Islam, as in Christianity, in Judaism, in all religions created by the Interstellar Union, there is this rule: “We take all the best for a person from other cults for development in a new egregor.”

The same thing happened with circumcision. Its meaning in both Judaism and Islam is dedication of oneself to God, one’s soul. But people who have not studied these religions will be surprised what the soul has to do with that organ.

Vladimir: We have already answered this question in detail. Let's not waste time, we already know the answer in the context of Judaism.

Irina: Moreover, I saw this process in pictures. It was possible to do without images.

Vladimir: We already know. I ask, Apshetarim, let's not waste time. We know about circumcision, we have spoken, and we understand the spiritual meaning in it.

Irina: There, too, it was the most sacred image. And so on and so forth. All.

01:03:22 The broad meaning of the concepts “jihad”, “martyr”.

Vladimir: I have an important question. Please tell me, is it true that in fact the meaning of the concept of “jihad” is not so much a holy war with infidels, but rather a war with one’s own shortcomings, primarily within. And in this context, the word “martyr” is a warrior who fights with his shortcomings, and does not kill people around him.

Hamid: Very interesting question.

Irina: Thank you for this question, I was waiting for it. Apshetarim: “I will now say a very important thing. In the Koran, Sharia and Sunnah there are laws that were given specifically for wartime. But under no circumstances should they be transferred to peacetime. What are the laws of war? These are the laws of the time when someone goes to war against the people, defenseless women, children, for different purposes: to take something away, change religion, etc. Then the wartime protection law comes into force. When you read “kill the infidel” in the Koran, this does not mean that you are not a non-believer in Islam, not at all. For a spiritual person, it is clear that to kill an infidel is someone who has deviated from the path of faith in God to such an extent that he makes an attempt on a person’s life. This is considered incorrect. One who does not adhere to any religion except his selfishness, arrogance and desire to destroy anyone. If this person cannot be stopped by other methods, then he must be killed. And so in the Koran, in Islam and any religion there is a commandment “Thou shalt not kill.” Moreover, in the Koran there are repeated mentions, I myself gave them to Mohammed, that if a person who believes in a religion other than Islam lives in his own world, you have no right to touch either him or his property. This is repeatedly emphasized and refers to the world.

As for jihad, shahid and similar concepts. This word is related to the word shahada, that is, confession of faith. Jihad must be, first of all, against those evil forces that provoke any person to lower their vibrations and move them away from God. Jihad should be against those demons or low-vibration plasmoids that are invisibly near almost every person, in order to lead him astray from the path to God. But jihad should not be accompanied by hatred of this fallen Spirit. It must be accompanied by attention to oneself so as not to sin in the soul. It must be accompanied by a fight against evil thoughts, and not against himself. The highest degree of jihad, as the prophet Issa said, is love for your enemy, because it makes a person invincible. Including if this enemy is spiritual, if he is invisible, if he is a genie, shaitan and Iblis himself. This doesn't mean you should fear or hate him. Hatred and fear destroy your personal good qualities and make you defenseless against these evil entities. If you always adhere to the Light, always choose the difficult but righteous path, and wage jihad with your instincts, and direct the Light of love to everyone who wishes you harm, then you will truly become a winner. Allah will reward you in all the worlds where you will be.

Vladimir: Apshetarim, I thank you from the bottom of my heart for this

answer. Hamid, I promise you that in a month we will try to hold, if necessary, the second part of the conference. Therefore, if you didn't have time now, nothing is lost. Ira, do we still have time for the last question from Hamid?

Irina: Let's have one last question.

01:08:33 Is high human height a disease or a manifestation of Tumesout genes?

Vladimir: Any last question, Hamid.

Hamid: Is it possible for MidgasKausu?

Irina: Of course, Mid. He is listening.

Hamid: We doctors believe that high growth is a disease of the pituitary glands of the endocrine glands. There is a story that there was a man three meters tall. Is this, as doctors claim, a disease or is it passed down through genes from the Tumesout people?

Irina: Yes, this includes the activation of the genes of the Tumesout people. But if this is accompanied by pathology of internal organs, i.e. If the body develops unevenly, then yes, it can become a disease. Body organs may grow unevenly. For example, some bones may grow faster than tendons or vice versa. This may cause pain in the body and some organs may become enlarged.

Hamid: He was a physically healthy man.

Irina: It's not a disease then. It's just a feature.

Hamid: Now this man is three meters tall, and he still is. For some reason, all our doctors claim that being tall is a disease of the pituitary gland.

Irina: If it didn’t cause him any inconvenience or physical illness, then it’s not a disease. But having such a height, much higher than the height of people, it would be difficult for him, especially in your society, to make friends and family. Find people who understand.

Vladimir: Hamid, tell me, are you a doctor by profession?

Hamid: no, I’m an esotericist, but I’m well versed in issues of biology, anatomy, and physiology.

Irina: Yes, this is the activation of growth hormones caused by a genetic feature. It can not only manifest itself from birth, genetics can become involved in the production of hormones during life.

Vladimir: I would like to thank all Muslims and non-Muslims who watched our program. Let me remind you that I also converted to Islam, however, I am also in other egregors. I consider our conversation today important and I hope that we will continue it. So thank you very much for your attention. See you again on air!

Irina: See you again, friends! Goodbye. Thank you all.

Hamid: Thank you very much everyone!

Broadcast January 28, 2021

Participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Vladimir Goldstein - administrator of the Cassiopeia project, journalist from Chicago;

Hamid Dadaev - guest;

MidgasKaus from the planet Esler - biologist, psychologist and specialist in alien civilizations;

Lipor from the planet Tumesout is a specialist in the formation of religious egregors;

Apshetarim from the planet Tumesout, who is known in Islam as the Angel Gabriel.

Video in text
January 9

#508 Live broadcast with a representative of the plasmoid (subtle material) civilization.

https://blog.cassiopeia.center/pryamoj-ehfir-s-predstavitelem-plazmoidnoj-tonkoma
https://www.youtube.com/watch?v=4OHVZIzjhxk

00:00 Start of video.

00:03 Project “Cassiopeia. Codes".

Maxim: Dear friends, hello everyone, I just went to buy some very interesting equipment in our center... How can you hear me, by the way? Hello everyone, I still haven’t asked how you can hear me. Today I will again spend a little time with our beloved viewers, who have almost become close and dear to us. Yes, I hear you. Excellent, excellent, super, 582 people on the broadcast. Guys, hello again, I have a lot of great news. The first very important news for us: from the 4th to the 6th in Moscow (in the Moscow region, in Zvenigorod) the First All-Russian Congress of Cosmoenergy will take place. This is a very important event for the Cassiopeia project, which was organized by the head of the Gihor school and to which a huge number of other schools from other directions were invited.

And now I want to personally thank Ivan Yonten for giving people the opportunity to engage and become interested in cosmoenergetics on the condition of “donation” - on the condition of payment “according to their hearts.” That is, at the Gikhor school there are no clearly structured tariffs for education - each student decides for himself how much it cost for him and how to further interact with this Gikhor school. Therefore, in order to get to that meeting of cosmoenergetics, you need to dial the phone number: +7 (906) 756 63 36. The congress will be held from November 4 to 6 in Zvenigorod. By the way, we will definitely meet Ivan at the congress; we are actually opening a new

program. He spent the first hour with Irina and me: me as the head of the Cassiopeia project and Irina as one of the leaders, the main contactee.

There is another very interesting news: almost at the same time we are having a retreat from the 5th to the 11th in Moscow. I, Irina, the entire health center, Ilya Alexandrov (head of the Mental Healing project) - we are all going to a retreat event in Moscow, which will be held from the 5th to the 11th. From the 5th to the 9th there will be training, and from the 9th to the 11th there will be personal receptions in our new opened center “Cassiopeia” in Moscow, in Domodedovo. Therefore, if you are interested in meeting with us at a retreat, or at training, or at the center, you can call the phone number +7 (988) 910 00 40 (Elena). By the way, all the links are under this video. Look: everything I’m telling you about now has links, there are all coordinates, there is every opportunity to call phone numbers and ask what was not clear.

It doesn’t end there: we have our wonderful Guzel, Gulya Malyarova, who is the head of the Cosmohealing project. She is now on a visiting program in St. Petersburg, a wonderful city with wonderful people, on a wonderful retreat, at a gathering of like-minded people, conducting various healing practices there, “Cosmohealing” practices. And in order to get to these practices, you can call the phone number. Guzel will be there from November 3rd to 5th, and you will be able to meet her personally, meet her team - Gulechka has a very interesting, cool team of people who are involved in the energy recovery of you and me, so you can call the number Katerina's phone number. Katya, what is your number?.. In general, look at the link under this video - there is Katerina’s number, which you can call and get to a meeting with our beloved Gulechka, for Cosmohealing sessions. They actually have a whole retreat there and a gathering of like-minded people.

Well, the most interesting thing I wanted to tell you about: we have opened a new, very cool, wonderful project. This is a whole united structure that will decipher any codes of this universe. I am pleased to present to your attention this completely new unique numerological calculation system - “Cassiopeia. Codes". It calculates a person’s personal codes by last name, first name, patronymic and date of birth. Your personal codes have a number of unique capabilities: reflection of your spiritual path, receiving and strengthening energy, activation of abilities, spiritual intimacy between people, access to the Higher Self and much, much more that this system can calculate.

The system consists of several calculations. All of them are fully automated using a special bot in Telegram, in which everyone can independently look at the description of the system, download calculation examples (that is, not just the calculation itself, but even its examples) and look at it, as well as make the calculation themselves in a matter of seconds in any quantity, with payment according to your heart. You don’t need to invent anything, you decided it yourself and helped the project yourself. This is called "paying according to your heart" and you will be given these wonderful calculations. The link to the bot for calculating personal codes is right under this video, it is the very first one. You can go to one link - there is an additional link to calculate these calculations, and a chat has already been launched into the project to discuss all aspects of the system. That is, you can not only receive a calculation, but also be added to the chat to discuss all the points that arise during these calculations: we have a consultant there. And, accordingly, the project has already launched the channel itself, which will describe these codes. Open the description under this video, follow the link to the Telegram bot, read your personal codes, share your impressions and reviews. The details of the calculation system are actively used by many representatives of the Interstellar Union. This calculation system, which is now available to you, was transmitted through a group of contactees who were involved in structuring these codes and calculations, so it is unique. And you can get this unique calculation system by just following the link under this video.

Guys, all the best to you, good luck in all your events: at Ivan Yonten’s, and at Guzel Malyarova’s, and at our retreat, where we will host the reception. Come to us not only for the retreat itself: from the 9th to the 11th you can come to us in Moscow, in Domodedovo, in the center - and we will be waiting for you all there, we will meet you, show you our new center, tell you about types of events. Alleyya is already there, many masters will also come to this center from the 9th to the 11th. In general, we will meet at our center in Domodedovo. For information on how to get to this center, you can call the phone number: +7 (988) 910 00 40.

Well, I almost did it in 9 minutes 14 seconds. I think that you will still appreciate this work - the six-month work of a group of contactees who created “Cassiopeia. Codes". These are unique projects, and each of you can, according to your heart, order your own calculation and interpretation of it along with a manual - and all this is automated. We

are preparing the “Cassiopeia” universe, which will simplify absolutely all our contacts with you, tasks and solutions to various issues.

And finally we move on to the most interesting topic of this live broadcast. We thought for a very long time about who else we should invite, so that you would be interested in watching our channel in general, so that it would be interesting to listen to the representative of the civilization that comes to this broadcast. And we invited everyone (many, more precisely): spiritual, subtle-material, and dense-material. Today we decided to make a unique broadcast and invite the plasmoid of our planet Earth. And today you can ask all your questions to this, this one - I don’t even know yet, I haven’t communicated yet, to be honest. It’s always the first time I talk to you on air, sit next to you and ask the questions you ask. By the way, you write these questions to us on Telegram: we have a “Question and Answer. Live broadcast" - I don’t know whether it is open today or not, but I will try to look for questions from absolutely all the resources that the Cassiopeia project uses and that you use.

I am sure that today’s live broadcast will give each of you a drop of awareness, a drop of mutual love and a huge flow of love for our bodies, for our souls, for our friends who are always next to us. And next to me is a wonderful little man, my friend, I would say, lifelong friend, “the gold of the party” - you see, you already know. Irisha, I invite you, sit down, now we need to set the camera on you.

12:06 Introduction of participants.

Irina: Good evening everyone, hello, dear friends!

Maxim: Guys, please tell me how Irishka can be seen, have I set up the camera correctly?

Irina: Thank you everyone.

Maxim: Today we have Irishka in such an interesting role - she’s all “knitted” and “homey”. Please tell me who is next to you on this live broadcast today?

Irina: Dear friends, I am very glad to see you all here, to feel the soul of each of you. Today we have with us a plasmoid of the 48th density level, one of whose many names is Demeter. Why do I say “his” and not “hers”? The fact is that at the 48th density level there is no gender as we understand it. It can be called “she”, “he” or even “it”.

Maxim: So there is no such concept of gender there?

Irina: Yes, there is no such concept of gender, that is, differences in bodies: they are all absolutely the same in that world. I remind you, dear friends, that at each level of density there can be many worlds. So, at the 48th density level there are also many worlds, as well as at the third density level.

13:54 Density levels and worlds of Creation.

Maxim: Tell me, Irina, for those who don’t understand about density levels: we have density levels from the first to the third - this is our density level, and then how are the density levels distributed?

Irina: From 1st to 3rd - this is called the “physical world”.

Maxim: Our physical reality, right?

Irina: Yes, the physical world - that is, everything that we can see, hear, feel through the senses of our body. This is all the physical world.

Maxim: And from the 4th to which one does it go further?

Irina: From the 4th to the 59th level of density these are plasmoid worlds, or they are also called “subtle-material” worlds, some call them “ethereal” worlds. These are worlds arranged in a certain way, in which there is also matter, but it exists in a different form. For us, these are like parallel worlds.

Maxim: It turns out that we can immediately be with them in 56 worlds?

Irina: Yes. Marina, I thank you very much for the blouse - I feel like you're looking. Indeed, the love with which you have charged this thing warms my heart.

Maxim: Irina, a package arrived for you today - it contains such a cool medallion! Listen, I'll probably go get him, talk to them for now. I'll come and bring it now. I completely forgot.

Irina: Yes, Marina, I knew that you were watching this video, and I thank you: it's very warm - not only physically, but also mentally.

I want to say that in order to talk specifically with Demeter, you don't even need to invite her from somewhere. I will still call her "she", since the name "Demeter" is feminine, but there are some specifics with names, I'll explain now, nevertheless I will call her Demeter. Why there is no need to invite - because she is always around us. What does it mean? Here we see with our own eyes the physical world of the Earth: soil, reservoirs, trees, sky, and so on. This is all we see around us. And at the 48th level of density, which, I would now use the Russian word "penetrates," physically. But now the image shows me - the word "permeates" is not entirely accurate, because it not only "pierces", but also "fills". At the 48th level of density, the subtle bodies in which Spirits incarnate can be of completely different, as I would say, sizes. That is, for example, the body of that plasmoid, which we call Demeter, is larger in size than the Earth. Just imagine that she has a thin body in the form of a cloud, which can gather into a ball and, as it were, "hugs" the Earth from all sides. Demeter is just telling me that her body is larger than the Earth.

Maxim: Well, yes, I think that there should be more than the Earth. Irina, I'll interrupt you a little for now (I'm always scolded for interrupting you), but here is such a gift, such a cool box. It is written: "For Irina, I did it myself. With respect and love to you." Irina?

Irina: Yes, wow!

Maxim: Oh, look! Can I put one on for you? Right under this blouse! Look, beauty? Come on, show me closer!

Irina: Do you see how beautiful it is?

Maxim: Amazing! Thank you so much! Please call me personally, find me, I also have a gift for you. Watch this broadcast and write me an SMS “I have been found.” I have a gift for you too.

Irina: I thank this Soul who made this medallion and put her energy of Love into it. This is not just a medallion - it is a real amulet, charged with bright thoughts.

Maxim: Yes, besides this amulet, there are still a lot of interesting things, but I’ll show you that later, Irina.

Irina: Interesting.

Maxim: I thank you and, by the way, I want to thank everyone who participates in the growth and development of our project. I really feel how you morally and individually help our project grow and develop. I also have one very interesting space news: guys, we will celebrate the New Year in our center - already completely renovated and prepared. I will tell you all the information a little later, at the end of this evening, at the end of this broadcast. Well, let's move on to Demeter.

Irina: They write that you might be able to solve the person’s problem: they complain that it is impossible to pay for code calculations, all cards are rejected. Maybe you can tell me what to do?

Maxim: We have a chat! Enter the chat - we have a support service there, you can ask.

(reads the chat) “...and maybe others have patience, acceptance and not irritation, and learn to see the light in others, and not the dark sides that exist in myself.” You see, the amulet fits the jacket, they write. “Do plasmoids see us, our physical world?”

Irina: (reads the chat) “I need Maxim to teach me patience.”

Maxim: Yes, you see, I teach patience to many. Well, that’s also good, a certain educational process is also underway. Guys, to be honest, you know, I come to this broadcast every time - I have so much to do! I do construction all day, I spend all day imagining and imagining which center you will come to visit us later, how cool, cool and beautiful it will be here - and in the evening on my day off I broadcast this live broadcast. I actually feel warm because I understand: many people need this broadcast. Therefore, I hugged you tightly, who needs this broadcast. Irina, let's continue.

21:20 The principle of Irina’s communication with a plasmoid of the 48th density level.

Irina: Yes, good, thank you everyone. This means that you can communicate with Demeter anywhere on Earth, you don’t need to specially invite her, you just need to tune in to her. You can mentally connect with her anywhere, because, as I already said, her subtle body surrounds the Earth and the intelligent Spirit is embodied there. She greets everyone, now I will tune in to her and translate her answers.

Maxim: I immediately have a question for her.

Irina: I want to immediately emphasize that many of the words that she sends to me in the form of thought forms can only be translated into Russian quite approximately, because the language of the 48th density level is very different from any earthly one. This can be done with images.

Maxim: That is, you will use images, do I understand correctly?

Irina: With images - and my brain, with the help of the chips that I have, already translates these images into thought forms so that I can extract information from them.

22:45 Demeter about her age and the history of control plasmoids on Earth.

Maxim: Tell me, please, Demeter, were you born immediately when the Earth appeared (along with it, it turns out), or not? Or does this happen somehow differently?

Irina (Demeter): Born in the world of matter or Spirit?

Maxim: In the world of matter.

Irina (Demeter): No, I was born much later in the forward flow of time (that is, later than the birth of the Earth). But there were those who took care of the Earth before I was born - my brothers and sisters, other Spirits.

Maxim: When did you begin to lead, manage, perceive yourself as the Earth?

Irina (Demeter): I will now convert my measures of time, which moves more slowly for us, into measures of third density, using the memory of the contactee. I appeared in the world of the 48th density level 68,453 years ago, if we take a year as a year according to the time of the dense world. But I began to lead and mentor all the plasmoids of the Earth 4,576 years ago. At least that's the series of numbers I see.

Maxim: Yes, this is a very long time.

Irina (Demeter): This is for you. For us this is a young age, about the same as twenty years for you.

Maxim: Did you find Krishna?

Irina: Krishna... Now I will show His image.

Maxim: Don’t you remember such a Spirit on Earth - Krishna?

Irina (Demeter): He had already left the incarnation by that time, but I know who it is.

Maxim: I found Christ, it turns out?

Irina (Demeter): Yes.

25:21 Demeter about the energetic structure of the Earth and her task.

Maxim: Please tell me how the Earth works at the energy level? So you came to Earth - it turns out that you can control it, this Earth? Or how does this happen in general, how do plasmoids come to become in the form of the Earth in order to control other plasmoids? I don't even know how to ask the question correctly.

Irina (Demeter): Well, let's figure out how the Earth works at the energy level. What you call “planet Earth” is a multi-level complex system of different energy layers that have different material densities, if by density we mean the frequency-vibrational range of vibrations of matter that emerged from the Divine Light.

Maxim: I understand. That is, the plasmoid comes here not just to control in its space, but to control in its space, instructing the plasmoids of other spaces - so, it turns out?

Irina (Demeter): Well, here is my task, as a plasmoid of the Earth, as a thin-material being who is responsible for the structure and work of subtle beings of all density levels on Earth, - to coordinate work in information terms for the exchange of energy and information between earthly plasmoids of various levels yourself.

Maxim: It turns out that they are as if in you, in your body - only at different levels of density?

Irina (Demeter): Yes, you can say so. These are like different levels of density: they are separate from each other, do not intersect, and you can only communicate through portals or through the astral world, as you call it - that is, this is the meeting place. Or through portals, making various “passages” to one or another level of density in order to communicate without wasting energy on awareness in the Astral.

28:10 Demeter about the place of her birth. The world of Tropos.

Maxim: Tell me, please, where were you born?

Irina (Demeter): At 48th density level

Maxim: Is this our Solar System, our Galaxy?

Irina (Demeter): This is Earth. The world of "tropos".

Maxim: This is Earth, the world of “tropos”?

Irina (Demeter): “Tropos” is the closest word that I can pull out of the contactee’s memory.

Maxim: Is this somehow connected with the troposphere?

Irina (Demeter): The troposphere is the lower layer of the atmosphere, and "tropos" is the Greek word meaning "place." And since in your language there is no suitable word to designate my world, I take the word “tropos”.

Maxim: Yes, I would like to know now what “tropos” is.

Irene (Demeter): "Tropos" means "place" in Greek. Just a translation from Greek of the word “place”.

Maxim: So you are “local”?

Irina (Demeter): That is, “tropos” means that world in the language of the contactee, because if you designate my world with our sounds, you will not hear anything (or rather, some kind of waves). The entrance to the world (the center of entry into the world) “tropos” is geographically located (if you look at how the worlds are superimposed on each other) at the level of the center of the Earth’s core.

Maxim: Oh, how interesting! So, this small thermonuclear reactor, which we have in the center of the Earth, is the entrance to the world of this “tropos”?

Irina (Demeter): Yes, there, at the 48th density level, you can say, there is my city - that is, a place.

30:30 Demeter about the exchange of energy and information of Earth plasmoids in the Universe.

Maxim: Tell me, please, from your place here, at this level of density, many entities come to contact us?

Irina (Demeter): Of course. If you look at all levels of density of earthlings, then quite a lot of earthlings are in contact with me. But by the word “earthlings” I mean not only the inhabitants of third density.

Maxim: But also all other density levels, up to 48 - do I understand correctly? Irina (Demeter): Yes, not only until the 48th. There are plasmoids that are embodied at higher levels of density - they are responsible for contact, for example, plasmoids of the Earth with plasmoids of other physical objects of the Solar system and the Sun itself. They also contact the Sun and transmit energy (now she is showing me, as it were, a network in which energy is transmitted).

Maxim: Do you yourself receive energy from the Sun? Or “himself”? I will still call it “sama” in the feminine gender; I prefer the Earth in the feminine gender. Do you get your own energy from the sun? And where do you get energy from space in general? And where are you

putting it?

Irina (Demeter): I receive energy from the Sun - and I transfer energy to the Sun, energy exchange occurs. I receive some energies, subtle ones, and transmit others. Since my body is at the 48th density level - energies from other density levels, my body cannot absorb other etheric energies.

32:20 Demeter about the essence of governing the Earth.

Maxim: So, tell us how the process of governing the Earth occurs at the energy level? What do you put into this process, how do you feel it and how do you see it, if you can call it “seeing”? You probably feel it?

Irina (Demeter): By the word “control” I mean the coordination of the work of numerous subtle entities at all levels of density, which are engaged in building elements for the Earth in all its shells and its entire biosphere.

Maxim: This is a very multi-valued process...

Irina (Demeter): Therefore, I have a multidimensional consciousness that can simultaneously embrace many rapidly occurring processes in the environment, accept their significance and role in the biosphere and other shells of the Earth, and quickly direct certain processes and combine them with each other.

Maxim: Yes, please tell me, can you look into the Akashic Chronicles, look at your future self?

Irina (Demeter): If necessary.

33:45 Demeter about changes in the energy shells of the Earth.

Maxim: Tell me, please, compared to what happened, say, a thousand years ago, what changes have now occurred in our atmosphere? They

say that global warming has begun - is this true?

Irina (Demeter): I'll tell you now: a hundred years for me is like 48 hours for you. Accordingly, a thousand years is a few days.

Maxim: It turns out that we multiply two days (one hundred years) by ten to twenty days. A thousand years is twenty days, in our opinion.

Irina (Demeter): Something like that. That is, like a month.

Maxim: So, what happened a month ago in your world? With the Earth, with its atmosphere, with its ecology?

Irina (Demeter): What happened to the Earth, to its ecology? A month ago (a thousand years for you) the state of the Earth... Well, again, at what level should we look?

Maxim: At ocean level, for example. Were the oceans cleaner a thousand years ago?

Irina (Demeter): Purer from what?

Maxim: Yes, that's a good question. Cleaner from what?

Irina: Now I'll explain to her. We have water...

Maxim: From human life.

Irina (Demeter): I understand what you are talking about. Indeed, changes have appeared in the dense material shells of the earth associated with the inharmonious, as we call it, distribution of elements that is incorrect for all shells of the Earth. That is, each element (for you this is a type of atom) for us represents an energetic substance, which, in your opinion, glows in a different color. In other words, it is a set of geometric shapes that glow in different colors. And those

elements that were not supposed to get, for example, into the hydrosphere - one of the dense material shells of the Earth in the physical world - got there, for example, from the depths of the lithosphere. You call it (I have already communicated with many contactees, considered information) the extraction of minerals used for energy interaction with the environment. For example, to heat some space, for movement, and so on. And all this - the decay products of these substances and these substances themselves - if handled carelessly, ends up in the lithosphere, hydrosphere, and atmosphere.

I will now show you how I see the Earth: so voluminous, in the shape of a ball, but this ball consists of several layers, like a nesting doll. And in this ball, if you look at the dense world, there is the smallest ball inside of all - such a light green, closer to yellow, color (this is how I see the dense plan), with bright luminous points in some places. There are more of them over time. These bright luminous points pose a danger to the biosphere, to the dense material bodies of various living organisms. The light from these points destroys these organisms - in your opinion, this is radiation pollution of the environment. Spirits incarnated at the third level of density actively study radiation energy, and it happens that in one of the places in their world they accumulate substances that emit radiation energy. To me this looks like dots.

39:00 Channel “Marina Malini” and “Cassiopeia”.

Maxim: Now I’ll ask you a question, but before I ask the question, I remembered one cool thing. Do you know that I recently corresponded with Marina Malini? And I wanted to thank her for the wonderful video that she made when she came to visit us. Do you remember when she came to visit us, stayed with us, lived? And she made wonderful videos - especially the video where Irina talks about herself, and, accordingly, about me as a leader, my revelation. Marina did it very calmly, very simply, so that I could show myself as I really am, as I was, where I was going, what I was going towards. Marina, thank you so much, I want to express my deep gratitude for this wonderful video. Thanks to this video, a large number of people learned about us. Marina has her own channel, it’s called “Marina Malini”. Type “Marina Malini” on the Internet and you will be taken to her channel, she has a lot of different interesting videos. Of course, I don’t agree with all the videos, for me personally there are many points that I would like to talk about, but Marina knows how to find very interesting people and take exactly what is needed from them 100%.

(reads chat) “In 43 minutes, not a single answer.” Guys, there are a lot of answers, wait. We have to wait. I really forgot about Marina, I would like to express my deep gratitude to her.

Irina: Are you sure that in 43 minutes there was not a single answer? Maybe you're a little distracted?

Maxim: It seems to me that the man got a little distracted. Therefore, Marishka, a huge greeting to you, I wish you and your channel success, growth, development and, most importantly, the love that we send you. Marisha, blossom! Marina Malini forever!

41:08 Demeter about names during contacts and the meaning of her name.

Irina (Demeter): Demeter is one of my names. But every contactee on the third level of density - that is, every person who comes into contact with me - can hear my name in a completely different way. Demeter is, as you know, a character from ancient Greek mythology. Naturally, this is an earthly name; it denoted my characteristics for those priests and their students with whom I came into contact. And moreover, I have my assistants at other density levels - for example, on the 44th, on the 33rd, on the 28th - and they can also come into contact with people. Their names will also be read as "Demeter" because they are also in charge of the Earth. I can have many names. Every nation that has its own language of communication on the physical level can call me differently.

Maxim: What names do you have, what are they also calling you? Can you at least give us an example, because, for example, I would be interested?

Irina (Demeter): Well, for example, they can call me “Gaia”.

Maxim: Gaia or Gaia?

Irina (Demeter): Gaia is the creature that came before me. But

sometimes they call me that, too, because people may not know that I began to lead the Earth instead of Gaia, and they still address me that way. Also in some nations they called me “Ceres”.

Maximus: Ceres, yes?

Irina: There is such an asteroid. I remember what it is.

Irina (Demeter): In some peoples they called it simply “Earth” (as in “Mother Earth”). And in some modern languages they call me “Mother of the World.”

Maxim: Mother of the world, right?

Irina (Demeter): Yes, some called me that. There were different names. In general, Demeter is one of the aspects of my activity. And, as you know, Demeter was the name of the goddess of fertility. That is, fertility is only one aspect of my activity. What is soil fertility - for example, land, soil? What it is? This is not just some abstract term, it is a very specific number and strength of plasmoid civilizations of the earth type, which are responsible for the number and speed of spread of plants, as well as their collection of substances from the environment.

45:00 Demeter about her incarnations.

Maxim: Thank you. Tell me, please, from what spiritual level did you incarnate to the 48th subtle material level?

Irina (Demeter): On the 20th.

Maxim: Since the 20th, right? Are there low vibrational entities that are embodied in your density level?

Irina (Demeter): Yes, but they are engaged in their own development and are not entrusted by the angels of nature with the leadership of

planets such as the Earth. The maximum is a small asteroid.

Maxim: Okay, let them write. If they want to write, let them write. Tell me, please, have you had at least one incarnation on Earth? So you came to rule the Earth, and did you yourself incarnate on Earth as a person or some kind of race?

Irina (Demeter): Yes, I was incarnated on Earth, but it was, in your opinion, more than 700,000 years ago and it was the 13th level of density. I was responsible for the territory that is now in the central part of Australia, but then it was still a single continent. I was, in your opinion, the Manu of a certain territory - that is, the spirit of a certain territory. But I have not incarnated in the third level of density either on Earth or anywhere else.

Maxim: So you never played our levels?

Irina (Demeter): No.

Maxim: How many incarnations have you had in total?

Irina (Demeter): 129.

Maxim: 129?

Irina: One, two, nine.

Maxim: 129, so little?

Irina (Demeter): Yes, because I incarnated in the subtle worlds - it took a lot of time, in your opinion.

Maxim: Why can’t you incarnate in the dense material world, what’s stopping you?

Irina (Demeter): I can. What's stopping me? Nothing bothers me; my plans and tasks of embodiment are connected with the subtle-material plane - at least at the present time.

Maxim: In general, do you have any plans to come here to our Earth?

Irina (Demeter): What density level?

Maxim: On the third.

Irina: She shows emotion, shows the image of a woman with a wreath on her head, in a long dress. She smiles and says that she is not very familiar with the sensations of a dense body, but it would be an interesting experience.

Maxim: Yeah, great.

(reads the chat) “Does Demeter want to incarnate into a human?” I just asked!

Irina: She thought so, she seemed lost in thought. Maxim almost convinced her.

48:25 Demeter about communicating with people.

Maxim: Tell me, please, how do I generally establish contact with you? A person wants to establish contact with the spirit of the Earth - how to do this? Is there anything secret there?

Irina (Demeter): Anyone can do this. Every Spirit that has incarnated on Earth, at any level of density, is already connected to me by special energy channels connecting it to different worlds. That is, if we take the third level of density, then each Spirit born in a person on Earth already has energy channels connecting it with the biosphere of the planet and with various levels of density, including my level of density. These channels are formed (looks at information in its memory) during

the period from conception to several weeks of human pregnancy, during intrauterine development. And they are formed by plasmoids, which are located at a subtle material level next to the developing fetus.

Maxim: Interesting.

Irina (Demeter): How to communicate with me? There are different ways, you can do it mentally, but it's better to do it in nature, especially for the first time. You can sit down or lie on the ground, touch the ground with your palms, close your eyes and feel its energy that comes from within, the energy of the Earth. Answer your question: is the Earth alive? You will feel life there, but it is not physical. If you look at the law of the physical world, the planet Earth itself is not alive, since there is no organic life in it, in your opinion. That is, if you do not take into account various animals, microbes, insects, there is no organic life in it. But in terms of energy damage, there is life in it at various levels of density. At first, you will feel the density levels closest to you - 4th, 5th, 6th - it's like a vibration or hum going through your whole body. But it's not physical, it's like a trembling in the body. Perhaps you felt it when you touched the ground.

51:49 Demeter about the nutrition of plasmoids.

Maxim: Tell me, please, do plasmoids get sick at all?

Irina (Demeter): That is, is the structure of their subtle body disrupted?

Maxim: Yes. Are they sick?

Irina (Demeter): This is possible, but only if they violate the laws of our world. For example, switch to nutrition not from Divine sources from Love and Light, but to lower vibrational energies, including from people.

Maxim: Is this possible? That your density level can be powered by people, right?

Irina (Demeter): Theoretically, this can be done by a plasmoid embodied at any density level, but with an increase in the density level this will be more difficult to do, because the higher the density level, the more energy is required to recharge the subtle body and the more energy the plasmoid releases in response , according to the law of energy exchange.

The higher the level of density, the more difficult it is, according to the law of construction of energy bodies, to switch to this type of nutrition from negative emotions. Although entities experiencing negative emotions, feelings and emitting thoughts always endow these feelings, thoughts and emotions with their life force, which can be absorbed by plasmoids, and all these energies permeate the entire noosphere of the Earth and ultimately end up in the astral plane.

Maxim: Thank you. Guys, I see there are a lot of interesting messages. In fact, of course, for an unprepared person, everything that Irina says now looks like some kind of rubbish. But I know for sure that those people who are interested in and have delved into the information that our interstellar friends convey are already aware of the concepts and events that Irina is talking about, and now clearly understand with whom we are trying to establish contact, from whom We are trying to convey information to you. It's actually very difficult because they don't have bodies like us, they don't speak with a voice like we do. This is a very interesting process that Irina can convey to us as our perception, at least approximately, of the level of density at which that entity next to us is now located. There are a lot of levels, a lot of entities, everyone communicates differently, the entire universe is permeated with these energies. So guys, just try to study us a little. Watch some interesting videos with interesting letters that you will find on our channel. In these interesting letters, consider the interesting words spoken by Irina and our representatives of the Interstellar Union, subtle-material entities, beings from the Spiritual world.

We do not force anyone to believe, we do not convince anyone that this exists. Believe it if you want, don't believe it if you want. Guys, what we are doing is trying to convey to you the level of awareness and perception that representatives of the Interstellar Union convey to us. And this is not a joke, this is not stupidity, this is really a reality in which I, as a leader, have been living for three full years. And over these three years, I clearly understood why this information is being passed on to us. Each broadcast is prepared for you with love, it is

voiced to you with love, it is conducted with love for you, nothing is required from you. In fact, nothing is ever required of you in our project. The main thing from you is presence and exactly the same return love with an understanding of the information that our interstellar friends transmit from different levels, from different planets, from different densities.

I hope that with this small educational program I still asked those people who do not understand to understand exactly where they want to understand, but not to interfere with the broadcasts. Thank you.

Well, shall we continue with Demeter? Irishenka, how are you communicating with her? Are you in the mood?

Irina: Yes. You can ask a question.

56:20 Demeter about her perception of war.

Maxim: Tell me, please, how do you feel about the big wars on the planet?

Irina: Demeter shows a black cloud that consists of negatively charged energy. Negatively charged - that means denying love, life, hope - these are all high-vibration states. And these dark spots seem to spread across the third level of density. Then they rise upward, penetrate all levels of density and end up in the Astral, in those egregors, accumulations of thoughts and feelings of people who are already living. And along the way through these density levels, some plasmoids may try to absorb this energy into themselves in order to process it. For some, this turns out to be inharmonious - and they lose touch with their highest divine essence, switching to a parasitic type of nutrition. They simply don't follow the rule.

57:36 Demeter on the concept of “god”. Demeter is about the constant change of the Earth.

Maxim: I understand. Tell me, please, can you be called the god of the Earth? Can they address you as the god of the earth?

Irina (Demeter): It depends on what you understand by the word “god”.

Maxim: God is the highest ephemeral creature who gives us all the benefits that we have.

Irina (Demeter): Creation of whom?

Maxim: Well, I don’t know, I’m roughly saying what God is for many. God is the one who created us, God is the one who knows everything.

Irina (Demeter): Creator or creation?

Maxim: What is “creator or creation”?

Irina (Demeter): God.

Maxim: God the creator.

Irina (Demeter): Can I be called the creator of the Earth?

Maxim: Well, yes.

Irina (Demeter): Of course, I took part in the construction of the Solar system as a whole, but I was not the only one: the Earth itself was built by other entities. There are actually a lot of them, and they continue to do so. Every moment the Earth is rebuilt, the energy in it moves from one level of density to another, from one type of substance to another. The earth is not finally created, but is constantly changing, and each change is like a new creation for me. That is, I cannot be called God as a creator: many of us participated in this.

59:12 Demeter on the concept of “cluster”. Demeter about the time of the Earth's existence.

Maxim: I see. So, well, what other interesting questions might our TV viewers - our viewers who watch us - ask?

(reads chat) “How long will the Earth last?” Oh, what a good question: how long will the Earth last, Demeter?

Irina (Demeter): What level of density will exist?

Maxim: You see, this is a serious question. One could simply answer how long the Earth will exist. And here you have to think: how many levels of density are there on Earth, which level comes first, which comes second...

Irina (Demeter): As everywhere else, in the entire material world - 59, according to your system. I know that you took it from representatives of the Interstellar Union, because many representatives of the Interstellar Union mentally contact us from their bases, including me. And they told me about your gradation of different levels - we call them a little differently, and our gradation is different, but I am able to keep in mind these elements that are familiar to your worldview. What density level is the shortest lived? It's a tight plan. The shortest-lived.

Maxim: Short-lived, yeah.

Irina (Demeter): At the end of the manvantara, all its energies move to a higher cluster - simply all density levels are distributed among clusters. Your interstellar friends have made such discoveries. In order to be able to understand the homogeneity of space at different density levels and introduce some systematic research into our worlds, scientists of the Interstellar Union, that is, aliens for you, distributed the levels of complexity into clusters. Your cluster is considered the first - it includes the first, second and third density levels, this is called a “physical cluster”. During its decay, all the energy that was contained in the atoms of the elements and between them goes into the second cluster. Then the worlds of the second cluster disintegrate - and all the energy goes into the third, and so on. How long would you like to know how long the Earth will exist at a dense level?

Maxim: Yes, at a dense level.

Irina (Demeter): Now the Earth has not passed even half of its existence. The fact is that the time of its existence cannot be separated from the time of existence of the entire solar system. And the lifetime of the Solar System is from the entire Milky Way Galaxy as a whole. The dense material plane of the Earth, as well as the entire Milky Way Galaxy, has not yet passed through half of its existence in the manvantara. This means that, based on the signs of energetic destruction of the element, the dense material plane of the Earth will exist for approximately another 24 or 27 billion Earth years.

Maxim: Great!

Irina (Demeter): This will still depend on you, on how much you will fill your plan - more precisely, on the generation that will incarnate in the last millennium of this manvantara on Earth. Whether it will be you or other Spirits - I don’t know.

Maxim: Here we have a person who writes: “You say that you treat everyone with love, but in reality you don’t have this.”

Irina: At Demeter's?

Maxim: No, some girl wrote it. I will only say this: everything you see in us is a reflection of you. That's why I wish you love.

(reads chat) “When will the sun go out?” It's the same when the Earth disappears.

Irina (Demeter): Smothered?

Maxim: When will the Sun cease to exist?

Irina (Demeter): What do you call “will go out”? When does it become very small and no longer provide enough light? But it will not disappear

completely until the disappearance of the manvantara, its matter.

1:04:46 Demeter about subtle-material entities near people.

Maxim: I want to thank Demeter from the bottom of my heart. I understand that there are a huge number of questions - and we cannot ask all the questions. But I ask you, Demeter: please tell me, what would you like to convey to all the inhabitants of the Earth? You have a real opportunity to convey something to at least some of these residents. What would you convey?

Irina (Demeter): My beloved divine Souls, embodied on the dense plane! I feel each of you with my Spiritual Heart. I also have a Spiritual Heart, like any Spirit. I ask you to treat the Earth with love and treat the entire surrounding space with love, because you constantly, every moment, radiate a flow of energy from your aura. And if this flow of energy is charged with Light, love, goodness, then the entire earthly space around us becomes a space of Light, where the Spirits of nature are embodied. I consider them my children because I care about them. They help you in your daily affairs, in your spiritual development, in protecting you from any evil negative manifestations, people or other entities.

And if this stream that comes from your aura is charged with black power - hatred, fear, anger, envy, irritability - it will paint the space around you in dark tones and the bright spirits of nature will not be able to be near you, because they will hurt. They experience not physical pain, but the pain of the subtle body. This cannot be called a disease; it feels roughly like a nettle burn. Light spirits will be forced to leave you with regret, but their place will not remain empty - it will be filled by those plasmoids who are satisfied with your energy, your radiation. And they, in order to remain in an energetic connection with you longer, can provoke you through various actions, including those related to the dense material plane of the Earth, to failures, illnesses, negative emotions, because they can become energetically dependent on your energy, charged with negativity.

Also, dear friends, I can give you a recipe for a drink made from your plants, which will strengthen your connection with me, if necessary. It was used by priests many thousands of years ago. Interesting?

Maxim: Yes. Thank you so much.

Irina: She can give you a recipe for contacting her. From plants.

Maxim: Can you make a recipe from plants to communicate with her?

1:08:50 Demeter's recipe for strengthening the channel of communication with her.

Irina (Demeter): There are three plants on Earth, the vibrations of which, when combined with each other in a certain sequence, strengthen the subtle channel of communication with me.

Maxim: Well, come on. What kind of plants are so interesting?

Irina: She's showing me these plants now.

Maxim: I hope there are no prohibited plants there?

Irina: No. There are no prohibited ones.

Maxim: Great. Then you can go on air. And then there are ethers with different... Well, we are waiting for the plants.

Irina (Demeter): Take one part of barley grains - the grains can be peeled or unpeeled. It is also necessary to add 14 parts of water of the same volume to them. It is necessary to heat the water with barley and make a decoction: the water with barley should be at a boil for at least 40 minutes. After this, you need to remove the decoction from the heat and add the lemon peel and several (two or three) above-ground parts of mint plants, which will remain in this decoction for another 40 minutes. And after that you can add lemon juice.

A decoction with a combination of these three plants (namely all three,

not separately) can be drunk before making contact: it strengthens the subtle channel with me, that is, my vibrations.

Maxim: How interesting. Well, guys, did you manage to write everything down?

Irina: (reads the chat) No, it won't boil away if it's on low heat.

Maxim: That is, cook over low heat.

Irina: Yes, because they are already writing that the water will boil away. If you turn the heat on low, it will simmer slowly and will not boil away for the entire 40 minutes.

Maxim: I looked at the question about when we will open in Belarus. Imagine, I forgot to tell you wonderful news! When we arrive from Moscow, on the 11th, we will begin enrollment for a retreat in Belarus, for the opening of a center in Belarus. We have very good news: we are really opening in Belarus, we will have the opening of a center, but we will tell you about it on the 11th, when we have everything ready so that we can invite you to the opening of the center and to a retreat with a very interesting program in Belarus.

Irina: I wanted to say on my own behalf: if you take barley - not pearl barley, but barley (because there is pearl barley), barley grains - please wash it well before cooking, because it is stored in different rooms and with various fungicidal substances. Still, maybe it's better to take pearl barley, which is for food.

Maxim: Yes, and by the way, guys, we are not going to Abkhazia: we found out that there are simply no free train tickets to Abkhazia. That's why we're not going to Abkhazia. We celebrate the New Year in our new center. Guys, this will be a grand New Year for the entire Cassiopeia project. This New Year we will invite all our masters from all our projects - and this will be a retreat for all of ours on the condition of "donation". You only have to pay for food, accommodation and payment for the New Year's corporate party and banquet. And everything else will be "donation".

1:13:41 Demeter about the influence of negativity on the timing of people's incarnations.

Irina: Yes, Demeter is still speaking (now just to convey thoughts). They asked about wars: wars at the third level of density are possible only when quite a lot of these dark spaces, which I spoke about initially, that come from people, from their auras, accumulate. And in this case, the energy that has gathered over people into a kind of dome begins to provoke people to bring each other out of embodiment for a variety of reasons. The reason is not important here: it is important for them to fulfill the will of the energy-informational entity that they themselves created.

Maxim: Great. Yes, by the way, I wanted to say that only those who have received a certificate from the Cassiopeia project can come to us for the New Year.

Irina: (reads the chat) Yes, it is possible to use a pearl necklace.

Maxim: You can have pearl barley, you can have a certificate: Vanya about one thing - Manya about another. You can have pearl barley, you can have a certificate, guys! Everything is fine!

Irina: Yes, we thank you!

Maxim: Yes, we thank Demeter, guys, I thank you. Once again, I want to quickly go over the main events, about which a whole newspaper could already be written. The first is Guzel in St. Petersburg from November 3 to 5. You can make an appointment with her for a general or personal appointment, phone number: +7 (916) 00 139 38 (Katerina).

(reads the chat) "Maxim has mental problems, give him some broth." Of course it's a mental problem, I have a mental problem every day - right, Irisha?

Irina: Why do you write like that?

Maxim: I don’t know, they just want to write. This means that the person is simply reflecting his problem. Yes, that means Guzel is in St. Petersburg from November 3 to 5. Next we have the First All-Russian Congress of Cosmoenergetics from November 4 to 6 in Moscow. Call the number: +7 (906) 756 63 36 (Natalia). Then from November 5th to 11th we have a trip to the Moscow retreat center and all our coolest specialists will go to the Moscow center. Phone number to register for the Moscow center and retreat: +7 (988) 910 00 40. Guys, we are waiting for you all! We are growing, becoming a big wonderful bright project that is waiting for a huge number of people. So if you are with us, we are waiting for you to visit us at all our events.

And many thanks to Demeter for spending time today with us, our earthly people and this planet. Guys, I love everyone, I hugged everyone.

Irina: I thank everyone too, I hug everyone. I would also like to clarify separately: It is no coincidence that Maxim repeats phone numbers several times, because then you yourself will call him and ask. “We haven’t heard!”, “We don’t know!”, “Where can I find the link?” - he receives about two hundred such messages a day, this is the least.

Maxim: Well, about two thousand messages come in a day.

Irina: These are the ones with questions: “Where?”, “What?”, “I didn’t hear!”

Maxim: Guys, everything is under this video, see all the links, all the descriptions, even “Cassiopeia. Codes" is our coolest project that we have had in recent times.

Irina: And now a few words about “Cassiopeia. Codes": it will be taught by Dmitry, he studied with us, this person is directly involved in the work of the "School of Contactees", which he himself will tell you. But I want to say, he is a contactee and is in contact with many civilizations: with the planet Shimor, with Jesus Christ through the Ray of Christ Consciousness - he has the matrix of the planet Burkhad installed, and he receives information, including through these codes. He coordinated everything with me - or rather, even with my curators. We

checked all this: I asked them, gave him the answers - and he himself developed this whole system. A true contactee, bringing light to people. Therefore, I invite everyone. I myself calculated using this system - it's very interesting, different periods of life are calculated there, a very interesting system.

Maxim: You can go there and just take a sample. Don't even order a system, but just see what kind of system it is, and only then place an order if you like it. Plus, after you place an order, there is a support service, there is a decoding, there is a manual - it's all automatic, and everything is on the "donation" condition.

Guys, we do everything you wanted, everything I promised, we produce - so wait for us. And our New Year is generally on the condition of "donation". Esotericism on "donation" - I think it's very cool!

Irina: New Year will be here.

Maxim: New Year will be here. Yes, I will make you a video about our center when we do the renovations. And I think that we will gather here with a very cool, not very large (up to 50 people) team and spend this New Year in a wonderful, completed new center in Voronezh, with great craftsmen, with great people. Guys, bye to everyone, hugs to everyone, see you again! I can't help but tell you about this on live broadcasts. Guys, live broadcasts are like a news channel: here I talk about new events that are happening in our project. This is not even an advertisement, we cannot run it as a ticker - we can only talk about this wonderful news that is happening in our project. Thank you everyone, thank you for your participation, thank you for your help! Bye everyone!

October 30, 2022

Participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan - head of the CASSIOPEA project and the Center for Spiritual and Physical Development;

Demeter is a plasmoid, patron of the planet Earth.

Video in text
February 10

#524 Live with the spirit of Michael Newton.

https://blog.cassiopeia.center/pryamoj-ehfir-s-duhom-majkla-nyutona
https://www.youtube.com/watch?v=pdrZdh-IyKg

00:00 Start of video.

00:05 "Cassiopeia Energy". Probiotic microorganisms.

Maxim: Dear friends, hello everyone! And again I'm on the air with you. We had some minor difficulties with the broadcast, but, thank God, we were able to continue the broadcast.

(reads from chat) “Greetings from Turkey!” Hello Turkey! Hello to Moldova, Chisinau! Hi all! “Snow Maiden, come out!” I'm here. By the way, Michael Newton's books are truly amazing. I read them myself. And today’s broadcast with the Spirit of Michael Newton (by the way, he is not embodied) is a gift of fate for me. "Greetings from the admin." Admin, hello! Helen, hello, thank you for being here... I love everyone!

We are in anticipation of a grand event. We leave tomorrow night. And Abkhazia awaits us with our wonderful retreat. We have never had a retreat like this before! 12 of the best masters of the Cassiopeia Project will work on it for you. Five to six masters will conduct various practices, yoga classes and psychological trainings daily.

(responds to a comment from the chat) Yes, from now on I will only wear jackets. I promised, I heard our viewers, that I would stop appearing on air in construction clothes. Our new Center will soon be fully operational. It has already started working and receiving visitors a long time ago, but it will begin to function in full, in which we planned to launch it, after the New Year.

Another good news. We have already prepared new programs for both the first and second stages of contacting. In addition to this, we will have programs “Science of Imagery” and “Astral Travel” with Irina Podzorova. That is, during a week of training, our teachers and our interstellar friends will tell you how to correctly conduct your images, what “Science of Imagery” means, and how to go on astral travel correctly.

Irina will personally select for each participant the method with which he will go to the Astral. This is individual work. The total group should have no more than 16 people, so we will tell you everything in detail in the near future.

The curriculum for the second stage, which many contactees are waiting for, has already been fully developed and is ready to launch. We will make a presentation of the second stage at the New Year's retreat, and maybe even conduct a two-hour lesson.

Therefore, at the retreat there will be training in the first stage, the second stage, as well as practical classes in the Science of Imagery and classes from the Institute of Transpersonal Psychology, which will also conduct its own sessions, retreats, and training.

Once again I invite everyone to our Centers, which are open in the city of Samara, in the city of Novosibirsk, in the Moscow region in Domodedovo.

I also invite you to Minsk, where we have opened the Cassiopeia Center, and where you can get acquainted with practitioners, masters, access the Higher Self, and, accordingly, solve all your internal and external problems through the structure of the Higher Self.

(Reads from chat) Yes, hello Germany! We have Masha there! Hello to Switzerland too!

I just wanted to remind you that the Cassiopeia Project carries not only spiritual knowledge, it is also a health center. And they ask me all the time: “What are you doing there to improve your health?” I answer: we not only heal people through the latest equipment, but we also produce very high-quality products.

Here is one of them - this is “Cassiopeia Energy” (shows). This is the energy of the Earth and the Universe in every cell. This is freeze-dried juice of specially sprouted young wheat sprouts, and it is not just juice, but crystallized juice, and it crystallizes due to a decrease in temperature, that is, in an environment with sub-zero temperatures, and accordingly, retains all its beneficial substances and properties.

And the “Cassiopeia” Project offers new products for complete cleansing of the internal body, for harmonizing the intestines and stomach, where 90% of the immune system is concentrated. These are probiotic microorganisms (shows) - biolactum, bulgarium, and we also have biofidum, but, unfortunately, I can’t show it: Irina has already drunk all of it. Irina drinks it monthly, uses our products that we produce, but, unfortunately, biofidum has already run out.

(answers a question from the chat) Yes, it is possible to build our health complex in Ufa, for this you just need to come and study at least at the first stage of the Cassiopeia Project in the contact group.

06:11 «Aroma Cassiopeia».

Maxim: And the greatest achievement of the Cassiopeia Project this year, in my opinion, is that we have reached a completely new level. We communicate with our interstellar friends, and they give us advice on how to properly restore our etheric subtle fields, how to properly work with diseases that form on the physical level, how to properly work with our psychosomatic structure, and much more.

After a conference with MidgasKaus from the planet Esler, the

Cassiopeia Project, having collected unique samples of 100% natural essential oils around the world, created this wonderful collection of essential products (shows). There are oils of eucalyptus, basil, orange, lemon, tea tree, frankincense, lavender, mint, geranium and bergamot. Just 10 great essential oils.

You can watch a video about this unique kit, where MidgasKaus explains how to properly use essential oils, what they are needed for, how they are used, and what their effect is first on the subtle human body, and then, accordingly, on other physical structures.

On top of that, if you purchase this set before the New Year, you will receive a wonderful aroma bracelet as a gift (shows), on the lid of which there is a “Flower of Life” depicted. The lid is unscrewed, a green cork is inserted into it, onto which 3-4 drops of oil are dripped.

The set includes 10 plug inserts - one for each of the aromatic oils. That is, every day you can select our Aroma Cassiopeia oils for specific tasks, drop them into your insert plug to solve these problems throughout the day. Here are ten corks for each oil, a bracelet made in yellow or white - all this goes as a gift before the New Year for a collection of aromatic oils. And we want to receive feedback from you.

(reads from chat) Hello Krasnodar! “Traces of the gods...” God! So many alien faces! No, unfortunately, Natalya, we cannot sell one oil at a time, because only a set is sold, and this set is fully formed to harmonize the chakra structure of the human body. This is the first collection of Cassiopeia aromatic oils.

We don’t sell one oil at a time, and, unfortunately, you won’t be able to buy oils of this quality on Wildberries or on Ozone. These are oils that are collected all over the world with chromatograms from quality producers. (reads in chat) “And the rose?” There will be a rose. There is no rose here, but rose will be in the new scent collections that we will create.

The cost of such a set at the moment is 9,999 rubles, and it comes with a discount. Plus a gift. In fact, a set of oils costs 12 thousand rubles, but now until the New Year - 9,999 rubles, plus a bracelet as a

gift (shows). The aroma bracelet costs two and a half thousand rubles. We are ready to give you a gift worth four and a half thousand rubles before the New Year, which you will receive after purchasing our Cassiopeia aroma collection.

(answers questions from the chat) Yes, the Cassiopeia Probio website is working. Just our Elena gives a link to the site in the chat. You can type cassiopeiaprobio.ru and follow the link. We are still developing the online store.

Yes, an order can be sent to Israel; we have established close communication with Israel. Therefore, you can go to the Cassiopeia Probio website, learn in detail about probiotics, get acquainted with all our commercial products and purchase whatever you want. The Cassiopeia Market online store will be available a little later.

And I want to thank everyone again. (reads in chat) “Cedar oil.” It will come later. We intended to use cedar oils for slightly different purposes. These ten oils are specially selected to harmonize the chakra structure. You need to work differently with cedar oil. The following collections will use cedar oil, but these sets will be selected for specific purposes.

Well. I'm looking forward to seeing everyone at the New Year's retreat in Abkhazia. In order to get to training, either for the New Year, or to get advice, you can call: +7 988 910 00 40. Lena will answer you on this number. She is the assistant manager, my assistant, and will provide information on all issues that interest you: retreats, training, oils, and purchasing. Lena is very sociable, so call or email us, all the links are below under this video.

And once again I want to remind you that today we are broadcasting with Michael Newton.

(reads in the chat) “I’m tired of chatting.” Forever, you won’t believe it, I’ve also gotten tired of a lot of things this whole year. And I would be happy to let someone steer this Project a little, if someone has the patience, endurance, strength and understanding that spirituality should be on the most complete terms.

If someone is ready to take my place, guys, I will be happy to provide this opportunity. I will sit next to you and see how you will manage such a large Project, with a huge number of people's complaints, with a huge number of discontent, with a huge ego among contactees who want to be alone. And this is a normal desire of any person - to follow their own path of development.

"Cassiopeia" is a big family, and fortunately, I still have the opportunity to lead this Project. Therefore, I ask you to be patient a little, to listen to my chatter, because due to the fact that I chatter, there is an opportunity for the further existence and development of the Project in which you are all participating. I will be glad if you help.

So, I now want to give the floor to our Irishka. Irishenka, have a seat. Now let's set up the camera.

Irina: Good evening, dear friends, I greet you! Our next live broadcast will be in the new year, so happy coming year to everyone!

Maxim: Yes, we won't go on air until the New Year. This is the final pre-New Year broadcast. There will be no broadcast on January 8 either: we will be on the road, returning home.

Now I am preparing my New Year's greetings to address each of you who helped the Cassiopeia Project, who believed in it, and who are in the Project to this day.

Irina: Happy New Year to everyone! I thank you all, dear friends, for being with us in the past year, for building this egregor with us on a spiritual level, this Project on a physical level. From the point of view of the Spiritual world, this is a single whole; it simply manifests itself in different energies and in different events.

I thank you for every thought, feeling, emotion invested in our egregor, for every financial assistance provided to our Project on the physical level. All this will help many people come to themselves, come to their Light of the Higher Self, as you did in our Project. This is your contribution too. This is your help to people too. I thank you for that.

Maxim: Yes, I see many people who studied in our Project and in other Projects who are already masters. Some have opened their own healing schools, courses where they raise the level of awareness of other people's perceptions. So thank you all so much for what you do! And I hope that the Cassiopeia Project will help raise awareness for everyone who needs it.

Irina: Indeed, many who studied at Cassiopeia are already opening their own esoteric, healing, and contact schools. And I am very happy about this, because this will allow us to further disseminate information about the Spiritual World, about the Interstellar Union, and connect people with their Higher Self, so that they find the answer in the truest source for themselves - in their Spiritual heart.

And we will talk about this today.

16:45 Introduction of participants.

Maxim: Yes, and today, Irish, who is with us?

Irina: Today we will talk with the disembodied Spirit, whose last incarnation on Earth was known under the name and surname Michael Newton. He asks to be called by his spiritual name. His spiritual name is Mikael. He says: "I associate myself with the name Mikael."

Maxim: How interesting! Already interesting.

17:42 The spirit of Michael Newton about his incarnations.

Maxim: Please tell me, Mikael, at what spiritual level did you enter this planet, and at what level did you leave it?

Irina (Spirit of Michael Newton): I incarnated from the 12th level according to the terminology of the Interstellar Union, I have already become familiar with it thanks to MidgasKaus and LiShioni, who came to me and told me everything in detail. And according to this gradation,

I incarnated from the 12th level, and left for the 20th. I'm currently at level 20.

Maxim: Oh! And how are you doing there, at level 20?

Irina (Spirit of Michael Newton): Much better than it was on the 12th (smiles).

Maxim: What's better there?

Irina (Spirit of Michael Newton): More Light, happiness, awareness of oneself as the Light that creates this Universe in Love and wisdom.

Maxim: How interesting! Please tell me, have you completed all the tasks for that incarnation that you planned from level 12?

Irina (Spirit of Michael Newton): Yes, from the 12th level, when I incarnated, I planned to reach the 15th, but I exceeded my plan and went to the 20th.

Maxim: On the 20th?

Irina: Yes. He exceeded the targets.

Maxim: Which one did you expect?

Irina (Spirit of Michael Newton): I was counting on the 15th and 73rd year of incarnation. This was the initial period I had planned, but since I began to exceed my task and many people turned to me for help, this period was extended for almost another 9 years.

Maxim: That is, what is laid down by fate - a certain period - we can extend it, do I understand correctly?

Irina (Spirit of Michael Newton): They extended it not only because I began to exceed my task, but because I helped others come to the Light. And I was left in this incarnation for a longer time than I planned, so that I could help the people who came to me during this period to find themselves.

Maxim: Do you know that your books have been translated into a huge number of languages and have changed the perception of the world for many people on this planet?

Irina (Spirit of Michael Newton): Yes, I know about that. My books were published during my incarnation and were already being translated.

Maxim: Did you catch the moment when they were being transferred?

Irina (Spirit of Michael Newton): Yes (shows many books with covers in different languages). I've seen these books.

Maxim: Please tell me, have you had any other incarnations on planet Earth?

Irina (Spirit of Michael Newton): Yes, I had an incarnation on planet Earth, I was incarnated in the Mayan civilization, as one of the priests. It was the 5th century of the new era.

(Irina) Altskhiomal - this is approximately what his name sounds like. He now shows me a tall man with a staff and a wreath on his head.

(Spirit of Michael Newton) I also incarnated on the territory of modern Russia, it was already the 8th century, and there I was a woman who was of low social status - a simple peasant woman, but a believer, she went to church, and she had many children.

But before that I had incarnations on other planets - on Burkhad, on Esler. And my penultimate incarnation before the person called Michael was on the planet Shimor. There I was a teacher for children.

Maxim: Are you planning to implement it somewhere now? And what tasks are you planning for this incarnation?

Irina (Spirit of Michael Newton): Now, being at level 20, I am thinking about incarnating again on the planet Burkhad in a physical body and being close to Jesus.

Maxim: What an interesting idea you have. And for what?

Irina (Spirit of Michael Newton): To be His student on the physical level and further increase your level: from the 20th go higher.

Maxim: That's how it is, I understand.

24:28 The spirit of Michael Newton about the beginning of his research.

Maxim: Tell me, please, how did you come to the point that you started putting people into a trance and asking them about what they did in a past life?

Irina (Spirit of Michael Newton): I didn't come to this right away. At first I worked using classical psychological methods, as I was taught at the institute. In Russian this educational institution is called an institute. It trains psychotherapists. Naturally, I had heard before about the theory of reincarnation and even read books about it that were published in America. They already existed when I was young.

Maxim: So you did this at the institute, right?

Irina (The Spirit of Michael Newton): I read these books as a student, but I was a skeptic. I was a skeptic who did not deny everything spiritual: I believed in God, I was not an atheist, but a Christian, but rather of the Protestant direction (shows), I prayed. But regarding reincarnation and after-death experiences, I was quite skeptical, because the orthodox Christian church talks very little about these things, fearing the emergence of any teachings that contradict the

Christian paradigm of consciousness.

Moreover, the Christian Church denies the ideas of reincarnation. And I received from my family members - very pious people - faith in God (shows his mother - a tall woman with a high hairstyle). I received this faith from her. Therefore, when I started working with people, hearing their stories that they remembered themselves somewhere in other lives, in other worlds, even on other planets, I believed that these were fictions or unconscious fantasies of their minds that came from memory, because they are in a state of hypnosis.

I put my patients into hypnosis in order to heal them from various depressions, suicide attempts, addictions, and even physical illnesses that were caused by a special type of response of the autonomic nervous system, which gave a somatic, that is, bodily, response to stress. Using psychological methods, I helped such people heal their physical illness.

I read a lot of books and wrote many articles on my own about psychosomatics, that is, the influence of the psyche on the human body and on its health. This is indeed a very serious and extensive topic, because literally every mental state of yours, every movement of your psyche is already changing your body in one direction or another.

I continued to conduct my sessions, but one day the same patient came to me (shows) from whom I began to develop a serious interest in things that you call esoteric, but at that time I considered them pseudoscientific.

I thought there were some things like mythology. No, I didn’t laugh at this, but simply believed that the myths of Ancient Greece, or Ancient Rome, or some other myths were an object of faith for ancient people. But we are modern people who have studied many sciences, and therefore we have a different picture of the world, and we no longer believe in myths.

I considered esotericism and reincarnation, past lives, something akin to myths, although I was a Christian.

Maxim: Thank you.

Irina (Spirit of Michael Newton): But most of all I remember that first patient who experienced constant pain in the ribs (shows). And when I put him into a hypnotic state, I conducted several sessions - despite all my efforts, he remained in pain. Although all examinations at the physical level showed that everything was fine with him, that is, there were no pathologies of the body: he passed all examinations, all tests were done, there were no injuries or infections.

And then I decided to find (then I thought I decided it myself, because I always listened to my intuition) how to act in the treatment scheme for complex patients.

31:35 The spirit of Michael Newton on the process of developing the regression method.

Irina: I asked my intuition: “What should I do?” And I received an answer. After I came out of incarnation and was completely reunited on a spiritual level with my Higher Self, with my Highest Source of Light, I fully realized that this was a response from the Higher Self.

My Higher Self told me: “Immerse this person in hypnosis and give him the setting so that with his consciousness he goes to the moment in time when he first experienced this pain. So that he can describe what he sees.” Under hypnosis, you can make so-called suggestions, give instructions that a person will carry out absolutely of his own free will, guided by these instructions as if he were his own; this is a feature of the hypnotic state.

I inspired him to go there and describe what he sees around him (shows Irina how they are sitting together: that man on the couch, and Michael in the chair).

Maxim: And what happened? Where did he go?

Irina (Spirit of Michael Newton): I told him: “Describe everything you see.” At first he was silent, but his eyes moved behind his closed

eyelids, and I realized that he was seeing something. His breathing began to quicken, and I realized that because of what I saw, he was entering a state of excitement. And suddenly he began to moan and say that he was on the battlefield, and he was killed with a spear.

I started asking him: “How did you end up there?” He said his name - Charlie, and it was not the name that this man had then. I asked, “How did you end up on this battlefield?” And he replied that this was the First World War. Based on his year of birth, the patient could not possibly fit this date, because he was born much later. And then a thought flashed through my mind: “Is it really true that what I read about reincarnation, about reincarnation?” (shows Irina his surprise).

I asked where he was hit with the spear, and he showed on his body with his hands (he could move) exactly the same place that hurt him already in this life. And I was very surprised by this coincidence.

First I explained this to myself... Naturally, my mind defended itself against a new concept, since one of the functions of the mind is to protect those beliefs that already exist. Therefore, in a few seconds my mind went through probably dozens of possible options, just not to accept what I really see.

(Irina) (laughs) Actually, it’s such an interesting story!

(Spirit of Michael Newton) I still settled on a more scientific option from a physiological point of view - that this pain caused a focus of prolonged excitation in the cortex of his brain, which was reflected in the consciousness as a “spear blow.” And the patient took his name and the situation that he described (as I explained it to myself then) from films or books. Naturally, I didn’t tell him about this.

Maxim: (answers a question from the chat) Yes, next year we will travel to cities with retreats. Maybe you'll catch us somewhere. They ask: “Do you hold retreats in Moscow?” We also hold it in Moscow.

Irina: Michael says that he explained to himself that it was because of the pain - as if his patient had been hit with a spear. But he

involuntarily, not on purpose, came up with it, but his psyche created such an image, and under hypnosis he saw it exactly what he saw in the films.

Maxim: Tell me, please, when did you fully believe that patients were saying things that really happened in past lives? When did it happen?

Irina (Spirit of Michael Newton): Nevertheless, I, naturally, did not tell him this, I just thought to myself, and began to act in this situation using ordinary psychological methods: I asked him to imagine that the spear had passed by. And he began to imagine this in order to calm that focus of excitement that was causing him psychosomatic pain, because on the physical level everything was in order.

Imagine my surprise when, having come out of this state, he, firstly, practically did not remember anything, although I did not give him the instruction to forget, and secondly, he looked at me in surprise and said that, perhaps, for the first time Over the course of several decades, the pain subsided without painkillers. He looked at me with great surprise and asked what happened.

I always kept audio recordings (shows a tape recorder) of my sessions and realized then that with this method I could help other people who were difficult to respond to psychotherapy. This case interested me very much, and I, still not completely believing it, decided to read literature on the topic of reincarnation, Eastern religions, etc. I thought that even if this is all untrue, if these are all fantasies of the brain, which explains its own pain, then so be it. If this method can help people, then I will do it, even if I don't tell them about it.

And I gradually began to use this method more and more. This interested me in the sense that, although I did not believe it, but only admitted that it was true, I thought: "Is it possible to find out any details about the life of past eras?" I began to question the people whom I put into hypnosis (at that time I did not yet call it regression, but simply hypnotic technique, psychotherapy), and began to record the results first on a tape recorder, and then began to listen to what they said about different eras.

One woman said that she was incarnated in a northern country where people no longer live, somewhere in Greenland. It was a very, very long time ago, when there was no glaciation there yet. Another man told me that he was incarnated in Ancient Greece. I asked him those details that he theoretically could not have known from ordinary books: what did you eat there, what were you wearing? And others. And then I tried to check it all through historical literature - what they told.

Maxim: And?

Irina (Spirit of Michael Newton): And I began to become convinced that many facts coincided with each other. I thought that reincarnation still exists, because it is it that explains in the most harmonious and logical way the facts that I saw in front of me.

I came to this conclusion using a purely scientific method, performing many experiments, and decided to share this discovery with other colleagues (shows the audience how he gives a lecture). I collected some of the most striking cases and said that I discovered such a phenomenon. I called it the “reincarnation effect,” and this coincides with historical data. The reaction that I saw from my colleagues, first on their faces and then in their conversation, somewhat surprised me. We can say that they reacted to this not only with some kind of scientific skepticism (which would be quite understandable), but some even with condemnation, like: why am I doing this, for what?

Maxim: This is approximately what happened to me when I gathered my friends for the first time: “What am I going to show you now!” And Irina began to perform. Half of my friends, not only with skepticism, but began to twist their finger at their temple and say: “Max, what have you gotten yourself into!”

So half of your friends didn't appreciate your zeal?

Irina (The Spirit of Michael Newton): They didn’t want to publish my article in the magazine. A completely scientific journal on psychotherapy was being published, where I wrote articles and was already collecting material for a book. But when I wrote specifically about reincarnation, the person who was in charge of this publishing

house (the head of the scientific department) called me and said: “Sorry, but we can’t publish this.”

I say: “Why? This is quite scientific material. I’m not saying that this absolutely exists, it’s just one of the hypotheses.”

He says: “We cannot allow such a hypothesis. This is closer to some religions, and should not be in science.”

I objected: “I have discovered such a phenomenon.” And he began to tell me that this can be explained as one of the strange and funny effects of the brain that occurs in its neural network. But it is advisable not to put forward hypotheses that go beyond the scientific paradigm. There was such a conversation, but it was all said quite kindly and gently.

But then I started doing research myself. This interested me. And the more I researched this topic, the more I believed in it, that is, my Spiritual heart responded to these stories. I saw the sincerity of people, how their destinies change. I saw how their health was changing, and I already believed that the Soul was immortal. I believed in this before, as a Christian, but I began to accept the idea that reincarnation exists.

I even talked about this with the pastor of my church where I went. He knew about what I was doing - that I was a hypnotherapist, a psychotherapist. I told him everything too. It was my friend Isaac (shows a rather elderly man with a small beard). He listened to me and said: “I know that you won’t invent anything, that you are a very conscientious scientist. But still, be careful, because there are evil forces in the Spiritual World that can mislead you regarding reincarnation.”

Maxim: What forces are there in the Spiritual world that can mislead in relation to reincarnation?

Irina (Michael Newton's Spirit): He meant evil Spirits.

Maxim: Evil Spirits... Michael, you understand what’s the matter. I'm

sorry, Mikael.

48:07 The spirit of Michael Newton about the decline of the Mayan civilization.

Maxim: Mikael, you just said that you were incarnated in the Mayan civilization. What actually happened to the Mayan civilization? Where did she go?

Irina (Michael Newton Spirit): When I left her, everything was fine. It was a fairly large country: several cities and settlements connected to each other. We, like priests, even had maps (shows Irina a papyrus-type sheet of paper, rectangular gray paper, and there is a map of this country). And there were rulers, they even had their own police, priests, judges - a fairly developed social society, and everything was in order.

There were no prerequisites that anything would happen to this civilization. Later, while in the Spiritual World, I looked through the history of this people and saw that gradually those people who lived in these cities on the ocean began to go deep into the continent, to places where there were no people. And the further they diverged, the more their languages and cultures began to differ. And they began to quarrel and enter into military conflicts among themselves.

And much later, to the lands of the descendants of the Mayans... And not only the Mayans. What you now call Maya is just one of the tribes of the country I'm talking about. There were many tribes there actually. A tribe is something like your nationality, and each of them was called differently. Then they began to quarrel with each other and disperse further and further, so that each would have their own hunting grounds, so that there would be places to cultivate the land. Because they did not, as was the case before, divide everything in the world, in turn - share with each other, as happens in a tribal system. And in the end it turned out that this country was scattered into many tribes.

And only then, on large ships from the east (shows), where the Sun rises, those people who are already known to you sailed. They became the ancestors of the founders of those states that are now

located on the continents of North America and South America. That was later. They simply captured several dozen tribes, who were generally called Indians, without understanding who were Mayans, who were not Mayans, and who were their descendants.

Maxim: It's clear, one civilization came and absorbed another civilization.

Irina (Spirit of Michael Newton): The civilization that came from the eastern country managed to conquer these Indians, the totality of these tribes, because they were scattered. If the invaders had come at a time when we had a united country, they would not have been able to do this so easily, since we would have put up more resistance.

Maxim: I understand, thank you, Mikael.

53:15 The spirit of Michael Newton on clarifications to his books.

Maxim: I read your books, for which I am grateful to you. They contain information that clarifies a lot. Everything also fell into place in my understanding of the world after meeting with our interstellar friends, who explained to me a lot that I did not understand before.

Now you are in the Spiritual world. Please tell me, are there any contradictions between what you now see in the Spiritual world and what you wrote about in your books?

Irina (Spirit of Michael Newton): I want to tell you that after all, the Spirit is embodied in one physical body. What I called based on the stories of those people... I didn't write the books myself, but described the stories of many people, as I considered the most interesting, which I selected for my books. Some of them told me that they are simultaneously embodied in different bodies, and sometimes even on different planets, and not just on Earth.

But still, I want to tell you that this was a slightly different effect, it was the effect of a coincidence in the vibrations of different Spirits. The spirit incarnates only in one specific body. Because his task is to

change his spiritual level by performing the tasks of incarnation in one body. One body is enough to increase your level.

Moreover, the body of a person or other intelligent being is not just clothing, but a rather complex energy structure, which is manifested at the physical level of density, at the etheric level of density. And also through the physical and etheric levels of density, various spiritual qualities are manifested, which in modern esotericism are called aura. The manifested spiritual qualities become separate fields.

That is, a person is a rather complex structure. And therefore, in order to direct the energies of the Spiritual world into the physical body, into the etheric body, into the astral body, and so on through the spiritual channel, and in order to maintain life in this body, a certain amount of percent of the spiritual essence that remains in the Spiritual world is necessary.

Maxim: So, the statement that we can find in the books you wrote - that there is one incarnation of the Soul in different bodies - is incorrect? And you now claim that there is only one Spirit and one incarnation?

Irina (Spirit of Michael Newton): Yes, then I wrote from my observations, from the stories of those people who described it to me. Now, already being in the Spiritual World, I will tell you why this effect occurred.

Maxim: Yes, I will be very interested to find out why this effect occurred.

Irina (Spirit of Michael Newton): Because people, being under hypnosis, that is, in an altered state of consciousness, clothed their spiritual experience in those words that are in their brain, in their memory, in their vocabulary. And when they tried to convey to me the sensations of spiritual unity with one or another Spirit embodied in another body (unity in vibrations, coincidence in vibrations), their brain could not find another phrase other than “we are one being, embodied in different bodies.” . This is the first effect.

And the second effect: they could well, being in this altered state of consciousness, begin to remember themselves, or rather, remember their feeling of life in bodies - in several at the same time. Such an effect is possible, and then they said that they live simultaneously in several bodies. Only these were their lives in different incarnations. Because the spiritual entity can begin to perceive itself as a single stream of existence in different incarnations. I think you understand what I'm talking about.

Maxim: Yes, yes, yes.

58:50 The Spirit of Michael Newton about the Fiery World.

Maxim: Please tell us, a viewer asks us what the Fiery World is, which you wrote about in your books?

Irina (Spirit of Michael Newton): Yes, I wrote about the Fiery World, as well as about the Spiritual World, when I had already begun to study the reincarnation of people and write down my observations in a separate notebook.

Then one of the patients who came to me began to talk about her existence not only in a past life, but also in the Spiritual world, and I became very interested in this. I decided to explore something that no one else had explored - life beyond this reality, and not just in other historical periods.

I, of course, knew about the existence of books, for example, by a doctor who described the after-death experiences of people who returned to the body after clinical death. I read this book, it was very interesting for me. But it described only the first few minutes of being in the world of Souls (as I called it then). And I thought: “I have a unique opportunity to finally find out through my patients not only the details of their past lives, but also the details of how they existed between lives.” And I also decided to write a book about this.

The fiery world - I called this a certain level of the Spiritual world, where there is only Light.

Maxim: Is the Fiery World the Spiritual World?

Irina: Highest, like the sky of the Spiritual world. There is a sky there too, and it glows. There is no Sun there. There is fire there (shows with hands).

1:01:38 The Spirit of Michael Newton on the universal language of Souls.

Maxim: Please tell me, here the viewer asks: “Now you are transmitting information in Russian through Irina, but how do you know Russian?”

Irina (Spirit of Michael Newton): She doesn’t know English, so, naturally, I transmit telepathic thought forms to her. Now I don’t have a language to speak with sounds, so I give her thought forms, and she reproduces them in the language she speaks.

Maxim: So, in principle, there is nothing complicated?

Irina (Spirit of Michael Newton): We communicate mentally. You usually call this telepathic contact. This is precisely mental contact, when I convey the flow of what I am thinking about, one might say, in the universal language of Souls, which is spoken in the Spiritual World. After all, if you find yourself in the Spiritual World, then there you will understand each other without words, no matter what language you speak.

1:02:37 The spirit of Michael Newton about the different tasks of incarnations.

Maxim: I see. Tell me, please, have you personally had contact with extraterrestrial civilizations, or through regressions?

Irina (Spirit of Michael Newton): I have not been in contact, but some patients told me that they remember their incarnations on other planets. I asked them questions.

At the beginning it seemed fantastic to me, because I thought that they only incarnate on Earth, although I always thought about the possibility of the existence of alien life. I believed in her. That is, I believed in God and thought that God, since he created the Earth, which revolves around the Sun, then perhaps planets on which intelligent beings live also revolve around other stars. Because the light of these stars should not be wasted, but should give life to someone. That's how I felt. This means that there is life there somewhere - I had this understanding. And some people told me that they remember incarnations on other planets.

The thing is that my task was to record people's memories. Then I called this method “regression therapy.” This is the healing of the Soul, the healing of the people’s psyche by returning back to past memories. And the more I did this research, the more my fellow scientific workers called me a person who went into esotericism, into pseudoscience, and even some began to call me a charlatan who wants to make money from gullible people.

Maxim: That’s what they call us too.

Irina (Spirit of Michael Newton): I'll explain why they say that. They are not to blame for this at all, it’s just such a level of consciousness. They came into this incarnation to live the lessons of the material world.

Maxim: I understand, thank you.

1:05:00 The Spirit of Michael Newton on the completion of the incarnation.

Maxim: Tell me, please, I want to ask about something personal. When you disembodied, who met you, what did you feel, how did you feel your body? Tell me where you ended up, who came for you, or did you go somewhere yourself?

Irina (Spirit of Michael Newton): I knew a few days in advance, I felt that I was leaving this world, but I was absolutely not afraid, because I already knew that I would be met by my spiritual family, my spiritual

brothers, with whom I might spent more than one incarnation.

I've heard this hundreds of times, and now I wanted to see it for myself. And I knew that I already had an old, weak body, so I was not afraid. I closed my eyes and didn’t even feel suffocation or pain, but felt lightness and expansion, as if I was becoming a cloud. And it seemed to me that I occupied the entire room and turned into light steam. Just imagine a room filled with steam, and it seemed to me that it was me.

If I didn't have this knowledge that I acquired, I might have thought that I was hallucinating or that I was going crazy, and I would have been scared. Because people are usually afraid of strange sensations in their body or in their head. They begin to think that they are going crazy, that they are hallucinating, which means they need help, otherwise they may harm themselves. People have such thoughts.

I was no longer afraid, but felt expansion, lightness, and then I stopped feeling my body altogether. I tried to open my eyes, but I didn’t feel like I had them at all, so I just started looking in front of me with what I then thought were my eyes closed.

At first it was dark, a gray fog, then it began to dissipate, and there was more and more white Light. But I didn’t feel either my arms or my legs. At first I was just a rarefied space, I was the Light itself, I felt like the eternal Light. And I understood, the thought came to me that I was dying, leaving this life, but I did not have any note of fear. I thought: “Well, well, well, we’ll continue to see what happens next.”

Maxim: When you were dying, did you already start observing yourself?

Irina (Spirit of Michael Newton): Yes. Just as I observed my patients who talked about the transition to the Spiritual world. I even thought: “Well, well, let’s see what happens next, how similar it will be to what I’ve already heard.”

Maxim: Yes! And how similar was it?

Irina: He smiles and says that it was like some stories. But people told different stories: some were met by Angels, some by their relatives, some even rose alone, and only when they were already flying high did they meet the first living being.

(Spirit of Michael Newton): And when I saw the Light around me, I felt like a huge ball. I began to look around to see my body or the world around me in this Light, but I saw nothing. I felt the presence of someone nearby, began to look at this point in space and saw three tall young men, completely in white clothes, coming out of the white Light towards me. They greeted me, I thought. Their lips did not move, but I clearly heard a greeting in my mind (shows Irina how it was). I asked, “Are you my spiritual family?” They said: “We congratulate you on the rise of your Soul to the level of an Angel.” That is, they felt my level.

Maxim: And what did you feel?

Irina (Spirit of Michael Newton): Surprise. “We welcome you,” said one, and the second said, also without moving his lips: “We welcome you to the World of Light, our brother in the Light of Divine Love.” And then I realized how important was the Love that I showed to every person I met on my life’s path, no matter what their character and behavior. This Love truly elevates, lifts into the Higher worlds.

And then we moved to the 20th level, and I felt all the completeness of happiness and the meaning of my existence that I could only dream of while in my physical body. I sometimes felt echoes of this state, but they quickly passed, being replaced by the bustle of everyday life. And it’s there forever.

Maxim: Thank you, Mikael.

1:13:00 Spirit of Michael Newton about the Astral and Spiritual worlds.

Maxim: But I have other questions for you. Your books contain information that Spirits are united in groups, and within a group Spirits can differ in spiritual level, but at the same time live in the same

spiritual space. This somehow contradicts the data transmitted through Irina. How can you explain this?

Irina (Spirit of Michael Newton): What is transmitted through Irina? I'm just not entirely aware.

Maxim: Within one group, Spirits can only be of one level. Higher Spirits can descend to lower Spirits, but lower ones cannot ascend to higher Spirits.

Irina (Spirit of Michael Newton): What I called the spiritual level is not what the Interstellar Union calls the spiritual level. I had formed an idea only of the lowest, middle and highest levels.

Maxim: So you didn’t have a breakdown into sublevels?

Irina (Spirit of Michael Newton): Yes, I had no information about the sublevels. Speaking about a single spiritual space, I meant the space of a spiritual family, which includes Spirits from different levels.

And, indeed, as I have now learned, between the world of disembodied Spirits and the material world there is that area of the Spiritual world, which in esotericism is called the Astral world. The astral world is an intermediate world between embodied and disembodied Spirits. And it is in the Astral World, which has many different layers and sublevels around each planet, that both embodied Spirits and non-embodied Spirits can come - this is the place of common contacts.

And when non-embodied Spirits come there from any level, they can form a single spiritual space where they can all communicate, if of course they want to.

Maxim: I understand, thank you.

1:15:18 The spirit of Michael Newton about the specifics of incarnations on Earth.

Maxim: Please tell me why they hide information about their origin, about the Spiritual world from the inhabitants of the Earth? We live like blind kittens: we are looking for the truth bit by bit, but when we find it, those around us have a hard time believing in it and consider us crazy. We are deprived of basic basic knowledge. Why do you think this happens on planet Earth? Why are we not given the knowledge that our interstellar friends convey through Irina, and that you conveyed in the form of conscious perception that you possessed? Why is the Church silent?

Irina (Spirit of Michael Newton): I can say my opinion and my view of reality as a healing angel. I believe that the Earth, in the form of development and in the form in which it is now, is a planet for those Spirits who decided to try to incarnate here and independently come to the truths that we are now talking about. That is, without prompting, without training in childhood. So that you can walk the path to the Spiritual world through the lessons of material consumption, material creation, material creativity. Gradually discover in your material body, and then throughout your entire material life, that bud of the Flower of the Spirit, which we all know as Absolute Love. After all, only Absolute Love gives birth to peace in the Soul.

The Earth is such a specific planet, which, depending on the spiritual level, is some kind of test. For the highest Spirits, this is a test of their faith, their Love in those conditions in which there is no longer tenderness, gentleness and Love from everyone around them. Yes, many do not pass it, but their experience is all the more valuable later. And for Spirits from the lower and middle levels who incarnate here, this is an opportunity to learn the lessons of life in matter, gradually learning to love themselves, their family, build their reality so as to be happy in it, and only then consciously come to the level of spiritual comprehension reality.

Maxim: (reads from the chat) Marie T writes that Astral is like a smoking room, people go there to socialize.

(Irina laughs).

I understood you, Michael, how you notice all this, how you explain it all, but in principle, of course, it’s understandable.

1:18:38 The spirit of Michael Newton on the directions of human development.

Maxim: What adjustments would you make to your books now? What would you remove and what would you add?

Irina (Spirit of Michael Newton): This is the experience of people, my comments there are only a minimum. I have a book (shows), which is like a textbook for others like me. It describes how to conduct the same regression sessions. This is what I would add to it.

Maxim: What would you add?

Irina (Spirit of Michael Newton): I would add to it those words and the methodology that in order to help people, it is very important not only to perform regressions into past lives, but also to communicate with your Spirit, to discover various facets of your creative, spiritual, contacting abilities . It is important to open different facets of your mind and heart, to cleanse your Soul of everything that prevents you from being a happy, loved and loving person, from being harmonious. For you this is contact with your Higher Self. I would add this to my books. I wrote about this, but I would add more detail.

1:20:17 The spirit of Michael Newton about a spiritual lesson, about auto-aggression.

Maxim: We are people, and no matter what you tell us, we still have our own questions to which we want to know the answers.

Many people are now asking you: “How do you feel about the situation that has developed between Russia and Ukraine? I mean a military conflict. How do you see the solution to this conflict from the point of view of the Spiritual world? And what options do you generally see in the future regarding this situation?

Irina (Spirit of Michael Newton): Ukraine and Russia? You know, I am at the 20th level of the World of Disembodied Spirits. Only the Spiritual

world is visible there, but I, of course, heard from other Angels who come and tell stories.

I have heard information that very destructive and tragic events are taking place for the destinies of many people. My point is, I believe this is a huge spiritual lesson for all entities that, regardless of their spiritual level, are embodied in this time and space.

What is a spiritual lesson? Often people understand it as punishment, as karma, as an inevitable blow of a whip from the Upper World, which should force them to go in the right direction. In fact, this is a look through the heart, permeated with instincts. That is, this view is relevant for the physical body in which you are now. From the point of view of the disembodied Spirit, reality looks different, including the spiritual lesson looks different.

A spiritual lesson is not a punishment in the sense that you are used to understanding it. This is not revenge for a wrong action. A spiritual lesson is a specific task for your Soul that you have set for yourself, as the result, the ideal to which you need to come. Before your incarnation, you set yourself the task that after leaving the incarnation you should be at such and such a level. To do this, it is necessary to study certain methods of action in the material body.

And if you find yourself during organized hostilities in any country, if you have incarnated there, then the first thing you should know is that your Soul was familiarized with the likelihood of these events occurring before your incarnation, and you yourself gave such consent. In many cases, you yourself have consciously chosen this incarnation.

Because during hostilities, when one person is your friend and the other is your enemy, and all this is tied to the instinct of self-preservation and the fact that some government circles teach you who to love and who to hate, and why to do, all this is a very difficult, but very effective and potentially bright spiritual lesson. In it, you can either descend in your vibrations and go to a lower spiritual level, or go through it with Love and learn to be yourself, to be the Light of Love for everyone, even in the circumstances in which you find yourself.

But in order to achieve this in reality, you must, firstly, believe in God, in His existence, in His justice, in the righteousness of this world where you are. It is necessary to love God, and based on Love for Him, to love yourself and all the people around you. Because when you truly love God, you will love any manifestation of God and accept it, send him Love, forgive, and thereby rise in your vibrations.

I want to tell you that the Souls that incarnated during moments of hostilities did not always kill someone themselves, or had bad karma, or something else. This happens, but not always. In fact, you can lower your vibrations and accumulate a lot of aggression or a lot of despondency in your Soul, which, by the way, is called “auto-aggression,” that is, aggression directed at yourself, without killing anyone. You can just quietly hate your neighbor, your wife, your children or yourself, and do this for quite a long time. And in your vibrations you will actually be no different from the most brutal warrior.

Here is a certain lesson of Unconditional Love for the rulers of these nations, which you called Russia and Ukraine, and all those countries that help them remain in the state in which they are now.

1:27:06 The spirit of Michael Newton on the Russia-Ukraine conflict for December 2022.

Irina: You asked me about the future, so I told you about the karmic lesson. While I was speaking, I sent my phantom. An angel can instantly send his phantom to the place in the Astral World where the Time Tape is located. And now my phantom is practically in the Time Tape and is viewing this situation. Looks through egregors, the energy state of the masses and looks at what options for the future exist.

You know, at the moment I see the following: in the egregors of Ukraine and Russia, in the masses, in the Souls of people, which are reflected in the Astral world as egregors, a lot of indignation, claims, and anger towards each other have accumulated. But all this is quite fixable, if only these two countries are not prevented from taking the lesson by the rest of the world.

I am now looking at a version of the future when the rest of the world

will come to its senses, come to its senses and persuade Ukraine and Russia to send Love. They will call for peace, mutual Love, forgiveness of each other, and not only even the rulers, but the people.

Currently, I see support for a particular side in this conflict. It is the support of certain material means and means for killing people that only leads to the deepening and expansion of the conflict and its greater growth, like fire, a fire. That is, instead of extinguishing this fire, there are forces that add firewood (shows), but this is figurative.

But I see this option.

(Irina) Shows me, I practically look through the Time Tape with him. Here I stand at a crossroads, when the past is behind me and the future is in front of me. But you know, there are a lot of branches going off in different directions, and you don't know which one to follow. In fact, it is very difficult to choose this twig, because, by the way, they are quite similar in thickness, equally probable, but we will look ahead.

(Spirit of Michael Newton) Here is an option for a peaceful resolution of this situation, and even greater friendship between the peoples of Russia and Ukraine than there was before these events. I see this option around the end of March - beginning of April 2023, but on condition that the leading countries in economic and political development of the world call - and not order, but with Love call on these countries to stop destroying their own and others' lives and agree on brotherly

Maxim: What about the bad option, the worst possible development of events, what do you see? The worst thing possible?

Irina (Spirit of Michael Newton): For whom?

Maxim: For both countries. What option do you see in the Timeline that would be terrible for these two and for all other countries? Is there such an option at all? This may be an unlikely branch of the Timeline events, but could it be?

Irina (Spirit of Michael Newton): The worst option for both countries... There are several such options that could end badly for the people of Ukraine, and for the people of Russia, and for both of them, and for the world as a whole.

There are such options, but if you look at the Timeline, they are currently more distant in time than the one I just named. For example, if we look further, then by 2025 we still see the continuation, expansion, deepening of this conflict, the involvement of more and more countries in it, and in the end - the revolutionary overthrow of the ruling classes both in Ukraine and in Russia, and devastation, chaos (shows).

Maxim: Complete chaos?

Irina (Spirit of Michael Newton): Yes. There will be certain groups that will gather around strong personalities. They will take everything for themselves and go out to rob. In general, nothing is clear there.

Maxim: Michael, then let’s focus on the first option, when peace, Love, and we become normal countries and help each other.

Irina (Spirit of Michael Newton): I think so too, especially on the eve of the New Year. I know this not because I have some kind of calendar, because in the Spiritual world there is no time, we do not have day, night, or any months there. I just know from the energy that the New Year is coming.

The New Year is coming, and therefore let us not even assume the worst options, because those viewers who hear them can believe in them and with their faith bring them closer, and make their materialization more likely, because people’s faith shapes events.

I call on all people in Russia, in Ukraine, in the United States of America - in my Motherland, in which I lived and which I love, in Germany, in France, in Japan, in China and in all other countries (I will not list everything now) : Let's remember who you are! Who is the person sitting next to you. How is he different from you? He, just like

you, wants to be happy, he, just like you, wants to live.

Now just go back and imagine a person from another nation. Let the Russian introduce a Ukrainian - the same as him: the same age as him. Let the Ukrainian introduce the Russian. But why do you hate each other? Because someone else doesn't hold the same beliefs as you? But even if you kill him, he will not begin to adhere to them, you will not force him - neither the first nor the second. You won't force him. You will simply tell the Creator of the worlds that this son of His lives on Earth in vain, which means that the Creator is mistaken, that He settled him here.

Let's not do that, but let's respect the will of the Creator! If He needs to disincarnate one of His children, He will do it himself.

1:36:36 Message from the Spirit of Michael Newton to earthlings.

Maxim: Okay, Michael, I heard you, I understand. At the moment, two and a half thousand people are watching us. You now have a great opportunity to address all participants in our video conference live and convey something very important from the Spiritual world on your own behalf.

You have been dealing with the existence of the Spiritual World all your life. And now, when you have entered the Spiritual World, you have the opportunity to convey very important information to people from there. What will you tell us?

Irina (Spirit of Michael Newton): I want to convey information to you from the high spiritual level that I am at now, compared to where I was before my last incarnation.

From this spiritual level, we are all one, we are all loved, and everyone goes through their own experience, to which they have every right. And I ask you to treat any person with Love and respect, even if you think that he is living somehow incorrectly. This is his precious experience, his unique life, which will never be repeated.

And I wish you to always remember this, and then there will be nothing similar to what is happening now on Earth. And not only this will not happen. Then there will be no crimes, no injustices, and we will all enter together, as our interstellar friends, representatives of alien civilizations say, into the Interstellar Union.

We are not entering there now only by the level of our awareness. And the level of awareness grows when we move away from our narrow egoism and begin to look at any person as ourselves. And only this will allow you to complete the task of your incarnation, which I wish you to begin or continue in the New Year, and always continue in the future.

Maxim: Thank you very much, Michael! Thank you very much, Irishka, for the high-quality transmission of information!

Irina (Spirit of Michael Newton): Thank you.

Maxim: (addresses Irina) When I first showed you to my friends and told them that I would now demonstrate something phenomenal, and it might surprise them, half of my friends were perplexed that I believed in it. Yes, the world is very multifaceted and very interesting in many ways.

The Cassiopeia Project will always try to increase the level of awareness of the perception of each person who joins us and trusts us. We do not force you to believe blindly. We simply ask you to sometimes listen to the information we provide. And then, through your Spiritual heart, you must find your teachers, your programs, your Higher Self and much more.

Guys, the broadcast is ending, it can be continued endlessly. I look forward to seeing everyone in Abkhazia at our wonderful retreat. For all questions about the Project: if you want to go to training, go to a retreat, sign up somewhere, book something somewhere, you can call our Lena on the phone: +7 988 910 00 40. Lena will tell you everything, will explain, show. She is an excellent coordinator of the Cassiopeia Project.

Once again, thank you so much for your help, for your support, for trusting our drugs, our equipment, buying our products, coming to us to get healthy! Guys, thank you all so much and bow to you! I'm waiting for you in Abkhazia, where Santa Claus will give a huge number of wonderful gifts. Bye everyone, see you soon!

Irina: All the best! See you again!

December 25, 2022

Participants:

Irina Podzorova - contactee with extraterrestrial civilizations, with subtle worlds and with the Spiritual world;

Maxim Rusan - head of the CASSIOPEA Project and the Center for Spiritual and Physical Development;

The spirit of Michael Newton - hypnotherapist, writer.

Video in text
12th of February

#473 Live broadcast with the Spirit of Pythagoras. Cassiopeia – Irina Podzorova.

https://blog.cassiopeia.center/pryamoj-ehfir-s-duhom-pifagora-kassiopeya-irina-po
https://www.youtube.com/watch?v=xKbg3b0XZAs

00:04 Wellness program of the Cassiopeia Center.

Maxim: Dear friends, hello everyone! We are experiencing internet outages again. How can you hear me? Tell me please. Hi all! Hello Tomsk and hello Vichuga, Ivanovo region. Nizhny Novgorod, hello! A huge hello to Kazakhstan!

Great, we thought that we would have to rebuild the broadcast. Firstly, I want to welcome everyone. Today is a very interesting day - New Year in the Galaxy.

The flow is great, yes, I already understood. The sound is excellent, thank God we tuned in. I think that Kirchiton helped us after all. But before we start our broadcast today, I want to remind everyone that we literally have a retreat in Kazan soon - from August 4 to 9. And a retreat in Novosibirsk from August 12 to 14. Sign up for the retreat. There is, of course, a link under this video. But just in case, I'll give you a phone number where you can sign up if you don't know how to use links: +7 (988) 910-00-40.

Another very interesting news. Our Center decided to develop an experimental health program that is aimed purely at improving the health of the body. No training, no anything.

This program will include accommodation and full meals at the Center for 7 days. Moreover, your pool is included on Tuesday and Friday.

You have all health equipment included. And, accordingly, testing on Oberon equipment to determine the root causes of your physical ailments and problems.

That is, for 7 days full board with meals, accommodation, swimming pool, sauna, wellness and with the opportunity to undergo the Higher Self with our masters on condition of donation. This is experimental, I tell you right away. Because we haven't been accepted into the Wellness Center before without training. But this time we decided to take two experimental groups with feedback. We will have this from August 1 to 6 and from August 8 to 13. The group will be only 12 people - both the first group and the second. Moreover, we will give the results of the group both before recovery, and we will do a full study of each person after recovery with a description of the effective part after undergoing the latest equipment in our Center.

Everything on the system is absolutely all inclusive. It will cost 29,900 rubles. That is, for 7 days you completely recover, completely rest, meditate, undergo the Higher Self in person with our specialists at the Center. These are experimental groups. There are already 5 or 6 people in the first group, I think there are 7 people left to recruit. We haven't recruited for the second group yet. Therefore, everyone who wants to have a very pleasant rest and improve their health, we are waiting for you at our Center from August 1 to 6 and from August 8 to 13. The link is below this video. You can familiarize yourself with the program of the Wellness Center and see where you will arrive.

And, accordingly, I will dictate the phone number for those who do not know how to use links. In order for you to come specifically for a purely health program: +7(988) 910-00-40. Call, Lena will tell you what will happen, how it will happen and give you a link where you can go and get acquainted with the full program, where you are going, with our latest equipment that we use at the Center.

Limited number of seats. Guys, if anyone really wants to get in, call Elena, sign up, come. This is full board, you will have minimal additional expenses here, only for travel.

05:24 Introduction of participants.

Maxim: And most importantly: our broadcast today is dedicated to a very interesting personality. And one of the incarnations of this personality is Irina's curator in the current incarnation of Kirchiton. Previously, he incarnated on Earth and was Pythagoras. Therefore, we will ask all today's questions to Pythagoras. His teaching, his politics, how he disseminated his knowledge, why this knowledge was needed in general.

Write all your questions to the live Q&A chat. For those who do not know this chat, I will, of course, try to ask questions from both the chat and YouTube. But I will focus on the live Q&A chat. It's very convenient for me to sit, work, and write down your questions.

I give the floor to our wonderful contactee, as I call her - the Party Gold, which we found. Irina, please sit down.

Irina: Hello, dear friends! Hello everyone, good evening. My name is Irina Podzorova. I am a contactee with extraterrestrial civilizations. And today the Spirit is present with us, who is now incarnate. He is now embodied in an inhabitant of the planet Daraal, already known to us all as Kirchiton.

Since Kirchiton is an embodied Spirit, he has a Higher Self, there is a disembodied part of the Spirit. And the Higher Self of Kirchiton, at the request and, according to its embodied part, separated the energy phantom from itself and placed in this phantom the memory of one of its incarnations on Earth.

And now this phantom is here. It contains information about the incarnation in the body of Pythagoras, the same one who was an ancient Greek philosopher and mathematician. Quite a famous person. He was a scientist. His works influenced the development of both science and esotericism.

He accepted the image of how he looked in his life. This is a man, I see him, middle age, with a beard, average height. He welcomes you and asks you to ask questions.

(Spirit of Pythagoras) I greet you and am present here with the permission of my disembodied part in the form of a phantom, I have a memory of life in another body on Earth.

Maxim: I greet you, Pythagoras. This is how I will address you. Although it’s very unusual for me to think that you are now an embodied part of Kirchiton.

Irina: It’s also unusual for me to transmit my thought forms to a person and do it in Russian. I didn’t know this language during my lifetime. And Irina doesn’t know ancient Greek. That's why we communicate through thought forms.

10:12 Pythagoras on numbers.

Maxim: Please tell me, when you were Pythagoras, how did you even begin to study numbers, where did it come from?

Irina: When I was in the body of Pythagoras, at a young age, I traveled on a ship around the world. And he was, among other things, in the temples of Egypt and Chaldea, Babylonia. There was such a country. There the priests initiated me into their secrets and revealed the essence of numbers, that these are the energy waves that make up the Universe, and the numbers written on paper are only a reflection of these energies.

11:17 Pythagoras about his family and childhood.

Maxim: What kind of family did you grow up in, what kind of family was it?

Irina: I grew up on an island surrounded by the sea. This island belonged to Greece. I grew up in a family where my mother was a housewife. I had two older brothers. I was the last in the family.

Maxim: Third son?

Irina: Yes. The brothers were much older, about ten years. When I was little, they were practically adults. At least they seemed to me to be almost adults. My father changed several professions. He was selling some fabrics. Then he trained as a jeweler-engraver. He studied with one master. And he has already engraved items made of gold, silver and precious stones. He had orders.

Maxim: What prompted you not to continue the jewelry path and go into the study of different religions and other things.

Irina: This was my task of implementation. I did not have the task of incarnation to arrange a cozy nest for myself in the material world.

Maxim: How old were you when you left your family and when did you start traveling around the world?

Irina: He shows me at 16 years old. (Spirit of Pythagoras) Even at the age of 15, I was already traveling on my own. He went on a long voyage at the age of 16.

Maxim: What century did you live in?

Irina: Five centuries before the birth of Christ.

13:40 Pythagoras about the religions of his time.

Maxim: What was your religion then? We now have Christianity and Buddhism.

Irina: On our island there was a Temple of Hera, the goddess who was the wife of Zeus the Thunderer. In other areas of our country there were, for example, the Temple of Dionysus, the Temple of Zeus himself. We had many gods, many philosophers. And there were many movements where there were no images, but simply glorified nature and sang songs.

14:29 Pythagoras about his contact and curators.

Maxim: You traveled the world, studied numbers. How did you receive information, how did you receive it? Have you had contact, as we now call it, with extraterrestrial civilizations?

Irina: Yes, I was a contactee. My first contact was at the age of eleven. It was then that my destiny was revealed to me. I was connected to a device in which I connected with my Spirit and read the words written on the screen addressed to me, as you now say, from the Higher Self. That I need to develop myself by building an egregor that carries the doctrine of numbers and the teaching about self-improvement through asceticism, that is, renunciation of some earthly joys. There is such a way.

Maxim: Very interesting. Can you be more specific? What kind of civilization is this, and what kind of equipment is this?

Irina: Civilization was absolutely neutral to my path, it just showed it to me. It was the Higher Self who told me that I have such a task. The task of civilization was to connect me with the Higher Self, because no one taught me this in my family. We did not have such an understanding - to talk to our Spirit.

At the age of 11, I was walking near the sea, and the idea came to me to come here after sunset. This thought was so clear, I immediately realized that this was not only my thought, not only, as you say now, my intuition. That this is something different, higher. I understood this as a call from the gods. This is the thought that pierced me. (He points from the top of his head.) That is, a thought after which further action becomes clear.

Maxim: Very interesting. Why don’t we know about this equipment in which you can sit and connect with your Higher Self? What kind of equipment is this?

Irina: Ashtar has it on the ship. Only I was placed in a physical body.

Maxim: You were taken for physical contact, do I understand correctly?

Irina: Yes. This is why they told me to come to the seashore. Only then did I find out that it turns out that when I walked near the sea during the day, I was not alone. Next to me in the astral body was my curator. I didn't hear him then, didn't understand him, didn't feel him.

Maxim: Who supervised you?

Irina: Artazan, he comes from the planet Futissa. But then he lived for a long time on one of the ships of the fleet of the Galactic Federation of Light. Not on Ashtar Sheran's ship, but on one of the ships of his fleet.

18:09 Pythagoras about the Pythagorean square.

Maxim: Thank you. There are a lot of questions about your Pythagorean Square. Please tell us how you created this Square, and what is it basically needed for?

Irina: Artazan also passed on this knowledge to me. He then started coming to me. After the contact, when I knew my Higher Self, he brought me to Earth. I asked him: "Are you god?" And he said: "I'm the same as you, only from another world." And I said since I'm from another world, it means that for me it's God. Because I didn't know what "from another world" was.

Then he began to come to me in a dream and give me such energy that I was aware of myself outside the body, that is, he taught me astral travel. He said that I was already ready for this thanks to the fact that I had been in this device.

Maxim: I really want to get into this device to learn everything. And then every time I'm surprised by something. And all the time.

Irina: This is a device for activating the seventh chakra. I began to go into the Astral consciously. And already there, in the Astral, Artazan, my curator, mentally handed over to me a diagram, which he even

then called - the Digital Matrix of the Soul. It is known on Earth as the Pythagorean Square.

Already in the body of Kirchiton I was especially interested. I sent thoughts to my embodied part, Kirchiton, so that he would learn about this system. How is it developed on Earth now? I know that it is now called the Pythagorean Square. And this was conveyed to me from another planet.

Maxim: What is this Pythagorean Square needed for? What does it give? What can they calculate?

Irina: You can calculate the innate abilities of the Soul. To what extent in each Soul are manifested 9 main abilities and 8 abilities that follow them, one might say, secondary ones. But this is all at the moment of the incarnation of the Spirit. That is, by his date of birth it was possible to determine which Spirit incarnated. His specific abilities, his willpower, his level of bioenergy, his level of interest in learning about the world, and many other things could be determined.

Because the date of birth of the Spirit was indicated in numbers not by chance. That is, the Spirit, building an etheric body for itself, already fit into certain digital matrices that existed on the planet. You already know that the Spirit of a child can either extend its existence in the womb for several days, or delay it. It does not always happen that he is born exactly at 9 months. It's different for everyone.

Maxim: I understand. Using the Pythagorean matrix, you can calculate the various properties of the Spirit, right?

Irina: Yes, various properties of the Spirit at the time of incarnation. And you can figure out what the problems are and what the advantages are. And you can give recommendations on how to adapt to this world and how to complete your task.

23:01 Pythagoras about the creation of his teaching.

Maxim: This is the question they ask. They say that when you went out

in public you really seemed to glow, is that true?

Irina: Not all people saw this. This was mainly seen by my students. Because the breathing and meditation exercises that I gave them, plus a special way of nutrition and energy security that I developed for them with the help of the curators of the plasmoid worlds. (He later had three more curators: the Spirit of Fire, the Spirit of the Sun and the Spirit of Air. After Artazan.)

I also developed with their help. The Spirit of Fire is earthly, the Spirit of Air is also earthly, and the Spirit of the Sun is a solar plasmoid.

Maxim: It's clear, you were a full-fledged contactee. And the new information that you structured was taken from representatives of different civilizations, do I understand correctly?

Irina: Yes, every plasmoid and every Spirit that came to me, I asked about his worldview and tried to include this in my teaching. To benefit...

Maxim: When did you start teaching people?

Irina: In general, my students appeared after I was in Egypt, in Babylonia. I was 28 years old at that time.

Maxim: So you spent 12 years traveling around the world before you started teaching people?

Irina: This was my first trip. Then I returned, then swam away again. Lived in different cities.

Maxim: Please tell me, did you have friends nearby whom we now know as ancient scientists?

Irina: Do I have scientists who are now embodied somewhere?

25:27 Pythagoras on vegetarianism and the transmigration of the Soul.

Maxim: Okay, I'll ask later. Please tell me, they say that you were a vegetarian and believed in the possibility of the souls of animals transmigrating into humans.

Irina: It was later, when I came into contact with plasmoids. In the beginning, I was an ordinary person who ate like my parents. And then, after my contact with the fire plasmoid, it was already in the Astral... I met him during one of my travels. He and I exchanged energy, and after that I simply could not eat animal products. Because when I tried to bite off one piece, I saw this animal, how it was being deprived of its life, I felt its fear, and after that I could not bring myself to take this meat.

I told the students that this could affect them for the worse, that is, lower their vibration. But not everyone agreed with this. Some were already accustomed to eating meat. And we had a little argument about this. Some even wanted to leave me. I told them: “Okay, it's your choice. But I ask you for one single favor...” I felt that the very center of the Soul that an animal has is in its heart. And so I asked those of my students who still eat meat to give up eating the heart.

Maxim: I understand.

Irina: It’s like the physical embodiment of the Soul. And as for the fact that the Souls of people are embodied in animals. I had a period when I thought so. Although later, by the end of the incarnation, I already understood. Artazan explained to me when I asked him that Spirits incarnate separately in people both on Earth and on other stars. And in animals there are other Souls.

I didn't agree with him at first. And then, towards the end of my life, I also came to this conclusion, because he gave me an example that animals have different bodies. Their brain is structured more simply, which means that the human Soul, having got into this body, would not be able to demonstrate its abilities, which means that for the human Soul it would simply be a waste of time. I realized this only later.

28:43 Pythagoras about his death.

Maxim: Thank you. Please tell me how many years have you lived on Earth? At what age did you die?

Irina: 75 years old. (He was already an old man.)

Maxim: Many people are interested in: how did you die, what was your death like?

Irina: I died myself. I know that there are rumors that I was killed in that incarnation. There have been attempts on my life.

Maxim: Were there any assassination attempts?

Irina: Yes. Some priests wanted to kill me. Then, when I had many students, when I moved to Italy, south of Rome, on the seashore. They also had their own priests, and they resisted my taking on disciples and sent a boy to me who tried to sell me poisoned grape juice. But when I took one sip, the thought “don’t drink this” immediately struck me. The Higher Self protected. And I didn't get too poisoned.

Then it was a craze to take the lives of your rivals and enemies through poisoning. And I died after one of these attempts, when they wanted to burn me and my students. They blocked all the windows with some kind of logs and pieces of wood. That is, as I understand it, there were shutters. They were locked up, beaten and set on fire. And there was a passage to the door. My students began to push me towards it and put out the fire with their clothes. They pushed me out. But because they wasted time pushing me out, something fell on them, and they died because of me. There were 15 people, and only three came out. Me and two others.

I was already an old man, and they were younger than me. And they dragged me by the hands along some street. It was night. Our killers were waiting not far away so as not to miss anyone. We hid in the bushes. I cried because my students died. And the two survivors asked me to be quiet, because they might notice.

We went to the mountains and I became despondent. Then I became weak and died of hunger.

Maxim: After this situation, did you go to the mountains?

Irina: These are some mountains and a cave.

32:05 Pythagoras about his appearance and marriage.

Maxim: Thank you. Please tell me, did you have a wife, and how old were you when you got married?

Irina: Yes, I had a wife. I was 52 years old when I got married. I already had enough students.

Maxim: How old was your wife?

Irina: My wife was 21, on her 22nd.

Maxim: Please tell me, was it for love?

Irina: She was one of the students. We fell in love with each other. At 52, I was a fairly attractive man in terms of intelligence. And that's how we fell in love with each other, and such an age difference was normal. I was like a father, like a protector.

Maxim: I understand. Something that immediately came to mind was my former director.

Please describe yourself, what you looked like at 60-65 years old. Hair, eyes, height, weight.

Irina: Height is about 175 cm.

Maxim: Tall.

Irina: Weight was around 65 kg, I was quite thin.

Maxim: What color is your hair?

Irina: Already gray, the beard is dark, and gray below and on the sides.

Maxim: Did you have a mustache?

Irina: Along with the beard.

Maxim: What color are your eyes?

Irina: Gray-blue, not dark.

Maxim: What did you wear most of the time?

Irina: In a toga. That is, they wrapped a piece of fabric around themselves, then pulled it between their legs and pulled it further so that it did not fall off.

Maxim: Tell me, please, do you know such a science as hylozoic?

Irina: We need a description.

35:10 Pythagoras on the connection between fasting and tuning the spiritual channel.

Maxim: I understand, okay. They say that you sometimes went hungry for 40 days. Is this really true?

Irina: It was at the beginning of my journey. When, one might say, I

was setting up my spiritual channel for contact with plasmoid civilizations. The Higher Self told me that in order to tune into the subtle spheres, I need not to burden my body with food. It wasn't just starvation, it was low consumption of food and water. Despite the fact that this device was turned on for me, as I already said, when I was on the ship at the age of 11, they did not give me any chips. Artazan told me that they do not suit my body. They didn't pick it up. I had a brain structure that could block or reject this chip. That's why I set up my own spiritual channel.

36:40 Pythagoras on digital codes for controlling reality.

Maxim: This is such a serious question for you. Is it possible to control reality using numbers?

Irina: Of course, it's possible, if you believe in it, and if you correctly understand the meaning of the term "reality management."

Maxim: Can you give me some kind of digital code to make wishes come true?

Irina: Each wish will require a separate digital code.

Maxim: I understand. So, what is our biggest request, what desires? Desire to find love.

Irina: In yourself?

Maxim: Yes, in myself. Is there such a code?

Irina: Six times six.

Maxim: Six times six?

Irina: He is now showing me 6 horizontal lines and 6 vertical lines. And

divide them into 36 cells. And write six in each. That is, six is a symbol of the energy of love. Six squared is six multiplied by itself, helps to find love in oneself.

The square must be drawn on white paper with lines in the color of the planet Venus. It's blue or pink. Then put this square with sixes and put water on it. For example, at six o’clock in the evening, and at six o’clock in the morning, so that everything is equal to six, drink it. And this will help recharge your fourth chakra, the energy of love.

Maxim: There is also a mercantile issue. What is the code to open financial flows?

Irina: What do you call opening a financial flow? Specifically.

Maxim: Finding the energy of money.

Irina: I’ll clarify what I understood. By acquiring the energy of money, do you mean developing a mindset that will allow you to see the opportunity to acquire money everywhere?

Maxim: Yes.

Irina: That is, thinking free from financial prejudices.

Maxim: Yes.

Irina: Interesting thinking. I understand what you are talking about. You can also charge water. Only the number four is responsible for material support, for material construction. That is, the same as with sixes. Only this should already be a square with sixteen cells, four by four. And it needs to be drawn in brown or orange. Write fours in the same color. And, of course, set it at four o'clock in the afternoon. That is, at 16.00, just four by four will be sixteen.

Maxim: At 4 am, right?

Irina: If we are talking about the circadian rhythm, it would be enough to drink at four in the evening and at four in the morning. Every day our body goes through cycles of sections.

Maxim: Thank you. And lastly, is there such a code to end the war?

Irina: To the one who fights, to the one who is involved, to the warrior or to the one who observes?

Maxim: To the one who watches. What code is needed for the war to stop and peace to begin. Does such code even exist?

Irina: Those who observe these actions do not need codes. He needs to direct energy into the egregor with images of peace, friendship and love. He is not involved in hostilities. There is a code for a soldier so that he can win, for example, this battle. Or there is a code for a soldier to be removed from the battlefield in some way, but to remain alive. So that such circumstances create egregors so that he comes out. There are even codes for him to go to the battlefield and be absolutely protected from injury. This is known.

42:37 Pythagoras about the god Pythia and the Pythia.

Maxim: I understand that we can't talk about codes the whole broadcast, so let's move on. Is it true that you took part in the Olympic Games, where you won fist fights more than once?

Irina: No, it was another Pythagoras. From the same island as me. But he lived later. The name was the same, the person was different. By the way, the name Pythagoras was quite common. Because its translation is "one who is approved to be born by the Pythia." You know who the Pythia is, right?

Maxim: Well, yes, Goddess.

Irina: Pythia is a servant of Pythus. Pythos was the god who predicted

the future in ancient Greece. One might say, the god of time, he predicted one of the future options. It was a plasmoid that looked into the Time Tape and, based on the level of awareness, said which option was possible.

Pythia is most often, of course, female. Because this plasmoid liked to exchange a certain type of energy with women.

Maxim: So the name Pythagoras implies the possibility of exchanging, I won't say, what energies with women?

Irina: I'm not saying that Pythagoras himself exchanges with women. Just Pythia, who predicted the birth of a son to her parents. My parents were also predicted by Pythia. That is, it's like a servant in a temple who came into contact with this plasmoid Pif and predicted.

44:36 Pythagoras about the astral battle.

Maxim: I understand. There is information that you claimed that in a past life you were a warrior and fought for Troy. Is it true?

Irina: I wasn't there. Yes, I told my students about this then. But when I came out of embodiment and connected with my Higher Self, I realized that I had mistook for a past life what was simply one of the trips in the Astral Plane where I took part in a battle, in an astral battle. I took it for a memory of a past life, but I was not there.

Maxim: I understand, is this some other, astral reality?

Irina: Yes, astral reality. For example, from Kirchiton's memory I took information that in modern civilization on Earth there are computer games that simulate reality, including battle. The same can be done in the Astral. If you go out there with sufficiently aggressive thoughts, with anger at someone, with the desire to prove that you are right, you can attract plasmoids, which will also be charged against you. And you will have a battle.

It won't be like a computer. This will be a real battle, you will see everything more realistically. For example, when they defeat you in this battle, they won't kill you, you will simply return to your body. It can receive information about pain from the astral body that is damaged.

46:30 Pythagoras on the connection between the laws of mathematics and the arts.

Maxim: I understand. Please tell me, is it true that the laws of mathematics, music and fine arts are the same?

Irina: They are not just the same. You could say they are reflected in each other, but in a different way. We can say that they are the same, only expressed in different words. And depending on each science. Different sciences have the same laws.

What is law? A law is the natural existence of something. The patterns are the same.

Maxim: I understand. Is it true that you conveyed your information only orally and did not write anything down?

Irina: Basically yes. Of course, I could read and write in my language. I wrote something down, but that was when I was alone. But I later passed these notes on to my students or could even leave them. Didn't value them. Basically, when I spoke to students, my task was to convey a thought, and not to write something.

47:53 Pythagoras on the influence of the digital matrix on the future.

Maxim: There is a doctor who invented the digital computing method of the future. Is it even possible? This is a tricky question.

Irina: Any calculations of the future in a futuristic way, that is, an assumption based on logic, or through some kind of digital calculations. Perhaps in a numerological way. For example, each date has certain digital energies. And based on these energies, roughly say

what events, at least with what energy, are expected.

For example, December 20, 2022, there are a lot of twos there. Two is the energy of union, communication and unification with someone. And one - this energy is both unity and individuality. That is, on this date there is a high probability that people will want to unite, unite different individuals into some kind of union.

But how much it will manifest itself in reality depends on many factors. Because, in addition to the digital matrix of the ethereal space, reality is also influenced by choice. And it may not coincide with this reality. Because the digital matrix in no way determines the behavior of Spirits. Just like, for example, calculations based on the stars in astrology. It just shows a possible direction.

50:01 Pythagoras about number systems.

Maxim: Thank you. Please tell me what you think about the duodecimal counting system? We have nine and then ten goes. But there is a duodecimal counting system.

Irina: This was one of the systems in Babylonia. There was a sexagesimal counting system. That is, there were sixty units. And they took this from the fact that they studied a circle, which they divided into 360 degrees. It all came from watching the sky. And the duodecimal system, one might say, is part of this system. Because the number sixty is a multiple of the number twelve.

How do I feel about her? You can work with this system too. But I worked with the system from 0 to 9. It has its own information. Numbers 1, 2 and 3. Humanity is accustomed to working with the decimal system precisely because a person has ten fingers and this is the first count that he designated - five, ten. In many alphabetic systems, the numbers are 1, 5, because there are five fingers on one hand, and 10, they are highlighted. Separated from the rest.

Maxim: Very interesting.

52:03 Pythagoras about his children on Earth.

Maxim: Question, did you have children?

Irina: Yes, I had children. Two boys and one girl, the youngest.

Maxim: Two boys and one girl?

Irina: Yes.

Maxim: They then lived on Earth, what currents were they involved in, did they continue your teachings?

Irina: When I left the incarnation, I did not track their fate. Minded his own business.

Maxim: I understand. Tell me, please, are there any earthling contactees with this part of Pythagoras who are trying to contact you and receive some information?

Irina: Yes, there are contactees, followers of my teaching. They still exist even on Earth. And there are also representatives of plasmoid civilizations who can introduce themselves this way. In order to introduce himself to a person by some scientist known to this person from his memory, in order to convey some information at the level of awareness that the plasmoid understands, in order to be more understandable. Who are you? Pythagoras.

Maxim: I understand. Say, there is a Pythagorean theorem that we are studying, “Pythagorean pants are equal on all sides.” We call this theorem the Pythagorean theorem. The square of the hypotenuse is equal to the sum of the squares of the legs.

Irina: Yes, I understand what you mean.

Maxim: Did you develop it yourself?

Irina: Well, what are you talking about? It was known thousands of years before I was born. Pyramids were built this way in ancient Egypt and in ancient China. I just repeated what was known.

Maxim: That is, it was not developed by you. Is this simply repeated by you and passed on to your students?

Irina: But it was all clear. When you draw right triangles at right angles. The two sides and the larger side connect them. If any person measures all three sides, you will see these numbers, which will immediately guess the relationship.

Maxim: They write in the chat “Q&A live”. He got married at 60 and his children became leaders. It's in his biography.

Irina: I was 52 when I got married, the wedding was like a ritual. I wasn't 60.

Maxim: Your children have become your leaders, this is in your biography.

Irina: I didn’t track it.

Maxim: Don’t you remember your wife’s name?

Irina: As I hear, Illiara.

Maxim: What was the purpose of creating the Pythagorean school?

Irina: Creation of an egregor. Transferring the information that Artazan gave me in order to show people the path to higher vibrations, states and a harmonious mind. Opening the spiritual heart in this way, as I understood it at that moment in time.

Maxim: Yes, dear friends, Pythagoras is now the incarnation of Kirchiton, Irina's first curator.

Mathematical creation of a description of the universe. Please watch the beginning of the broadcast. He said there that everything can be described with numbers and numbers.

He created some kind of science. We call it hylozoica.

Irina: I was just creating the magic of numbers.

And what this science was later called, he does not know. Not like magic, mysticism. Mystical understanding.

58:33 Pythagoras about the first contact.

Maxim: Please tell me what was the most memorable thing in your life Pythagoras?

Irina: As I already said – contact. Evening. Everyone fell asleep. I left quietly. (He shows some kind of hut.) The hut was quite good by the standards of our settlement, with a low, flat roof. When he left, he went to the seashore. There was no one there, it was a full moon. My thoughts were about why I came here. At first I couldn't see anything, then my eyes got used to the darkness, and I wanted to look up at the Moon. I watched. Suddenly, out of the corner of my eye, I saw some movement, someone was approaching me. He was, as it seemed to me then, a tall man. He had an unusually fair face. I thought he was tall. And then I found out that his height was a little more than two meters.

And he was dressed unusually. The overalls were white, and the overalls had pockets. He greeted me in my language and said, "Come with me. I'll show you now why you came here." He said that it was he who mentally inspired me to come here during the day. I was surprised by his unusual appearance. I found him very handsome and attractive.

I went with him. And when we walked a little to the side, I saw, then it seemed to me huge, round, like a bowl, standing on three legs. He said it was a flying ship. I say: “How does he fly? He doesn’t have wings like a bird.” He smiled and said, “I’ll show you.”

We went inside. I sat down near the window. And he began to show me how slowly the sea was moving away. I saw because the moon continued to shine down.

Maxim: We have very little time.

Irina: First, he flew into space. (Spirit of Pythagoras) Then I saw a scattering of stars there.

59:56 Pythagoras about the society of Hermes Trismegistus.

Maxim: Is it true that you were a member of the secret society of Hermes Trismegistus?

Irina: I wouldn’t call it a society. These were several people who came into contact with the Spirit of Hermes. Including Hermes Trismegistus was considered the incarnation of the god Hermes. And there were people who came into contact with him and also received messages. There was such a small circle of people. I was familiar with them, but then I began to build my own life.

1:00:43 Pythagoras on the selection of students.

Maxim: I understand. Were there many contactees around you who were also in contact?

Irina: Among students or among the population?

Maxim: Among the students.

Irina: From among the students, I have already selected those who have passed tests, certain tests. Among other things, he made calculations using the Pythagorean matrix, using a square, which was later called the Pythagorean Square. Without this, I did not take Kvadrat as a student. And they first underwent a probationary period of about three years. They wore certain white clothes. I came up with this as a sign of contact with this white man, so that they would become like him with these clothes.

I asked them to stick to vegetarianism or at least not to eat animal hearts. He asked me to refrain from eating certain types of food in large quantities and from consuming wine. And do a special exercise, like meditation. I called it Contemplation. To establish contact with your highest essence. Therefore, among my students there were maybe 70 percent contactees. And among the population - no more than 5-7 percent.

1:02:33 Pythagoras on mastery of different languages.

Maxim: Please tell me how many languages you knew?

Irina: I knew ancient Greek, Egyptian and Chaldean quite well. Could speak with some difficulty, but could understand Hebrew conversation. I talked to Jews when I traveled.

Maxim: Of course, there are a huge number of questions for you. In general, just a huge amount. They say that you saw centaurs, is it true?

Irina: No, it doesn’t confirm. (Spirit of Pythagoras) I have heard about them, but have not seen them. I heard about them in ancient legends and epics.

Maxim: Thank you so much for this broadcast.

Irina: It was very interesting for me to remember all this and answer questions.

1:03:50 Pythagoras on the meaning of the numbers 0, 3, 6, 9.

Maxim: Last question. Why is there no destiny number 10 in the Pythagorean Square?

Irina: Because there should be 9 cells. 9 is the number of complete perfection of the Universe, harmony. And 10 was already 9+1. Artazan revealed to me that the Universe consists of nine numerical vibrations. And vibration “0” is the absence of any vibrations, emptiness.

Maxim: Please tell me what you think about the set of numbers 3-6-9. What do they mean, what are these sacred numbers?

Irina: He shows the spiral. That is, it is a spiral ascent to perfection. 3 is the number of energy, activity, overcoming your ego.

6 - as I already said, the number of love. Overcoming ego leads to love. And love leads to complete perfection, merging with God, one’s consciousness. Merging with the energy of the Universe, your life force. Towards unity with God.

Maxim: Please tell me your date of birth.

Irina: In a modern way. Born in the spring. (But for some reason spring for them is at the end of February. When everything was in bloom.)

Maxim: Yes, there was also a change in the calendar.

Irina: At the end of February. At the end of the sixth century before the birth of Christ. Since it was the end of the sixth century, the fifth century began. Because before the birth of Christ it declines. First the sixth, then the fifth.

1:06:31 Pythagoras about the number “Pi”.

Maxim: They still ask. We have Pi 3.14. Was this number named Pi after you?

Irina: This was already known to the Egyptians. The ancient Egyptians took this number Pi when they calculated various proportions for the construction of the pyramids. And for this they studied circles and measured them. And this was also known in ancient Babylon. Because the circle was considered the most perfect shape. After all, the Sun and Moon, which they worshiped, were round in the sky.

Then they drew circles and measured the circumference in numbers, the diameter of the circle and divided it all by each other. And in the end they got the same number, no matter what the circle was. And they generally called it the number of perfection, the number of the perfect circle. That is, knowing it, it was possible to calculate various things very simply. I already knew him.

Maxim: Thank you. Dear friends, if you like our broadcasts, be sure to like. I won’t ask you to like and extend the broadcast. I will not engage in begging in order to promote and develop the project. If you like it, just like the broadcasts, and we will be very grateful to you.

The most important thing is that we noticed that YouTube unsubscribes people from us on its own. We don't know how this happens. Therefore, be sure to subscribe to our channels if you have been unfollowed, or in general, so as not to miss new videos, new events.

And I want to thank everyone who supports our project, who makes it possible to transmit this information to us, to develop centers, to give the opportunity to work for masters on a donation basis. Thank you very much!

1:09:15 Pythagoras about his spiritual levels.

Maxim: I have one more question. Everyone is interested in what level did you incarnate from and what level did you then go to?

Irina: I incarnated into Pythagoras from level 20, but I left at level 15. I lowered my vibrations by 5 levels just before leaving incarnation. Because, as I already said, I was somewhat depressed due to the death of the disciples. But I didn't sink any lower because I was able to forgive those who did it. I understood that they did it unconsciously. And he didn't condemn them.

1:09:52 Wishes from Pythagoras.

Maxim: I have a big, huge request to you. What would you wish to all those people who are now watching your communication from the Spiritual world? In general, what would you wish for us from there like Pythagoras? Not like Kirchiton, but like Pythagoras.

Irina: I wish you to establish contact with your highest essence, so that this star in your heart always illuminates the best path for you in your life, so that you achieve everything you want and what your higher essence wants. And so that you understand that in fact this is a single desire for love, happiness, perfection.

Maxim: Thank you very much! As always, everything is very wonderful. Guys, thank you for this broadcast and for your questions. See you on new broadcasts!

July 25, 2022

Broadcast participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

Spirit of Pythagoras.

Video in text

#493 Live broadcast with the Spirit of Lomonosov Mikhail Vasilievich

https://blog.cassiopeia.center/pryamoj-ehfir-s-duhom-lomonosova-mihaila-vasilevic
https://www.youtube.com/watch?v=tJcsEf0B9Iw

00:04 Introduction of the participants.

Maxim: Dear friends, hello everyone. How can you hear me? As always, I'm starting the broadcast again. I have a lot of interesting news. There are even very interesting requests. We are now finishing renovations at the Cassiopeia Center in Moscow, which will open after the New Year.

Hi all. Hello Ekaterinburg, Moscow is watching. Excellent, everything is super, you can hear perfectly.

The most important news is that today's broadcast will be dedicated to a very interesting historical figure - Mikhail Vasilyevich Lomonosov. This personality was asked to go on air by many people. I think it will be very interesting today. By the way, he is here, already nearby. But I think that Irina will still introduce him. And he will introduce everyone who will be nearby on air today.

First news: you can ask questions in the Telegram chat “Live Q&A”. The link to this Telegram chat is below this video. Therefore, all the questions that I will read today will be from this chat on Telegram.

Further. Soon, soon, in a week we will be in Krasnodar for our wonderful training retreat. The only thing I can say is that, in my opinion, all the places have already been filled. You can probably sign

up if someone suddenly refuses. In principle, there are places there, they have been filled, and you can sign up by calling the phone number +7 (988) 910-00-40. The specialist's name is Elena. She will add you to the list and, accordingly, indicate how further communication will take place between us.

Another interesting news. We decided to comply with new trends and new trends. And we decided in the “Cassiopeia” project to create the “Cassiopeia” multiverse in 3d space. And we do not have enough specialists in this area. Therefore, dear specialists, 3D designers, 3D modelers who know how, can make various 3D images, drawings, some specialized ones, anime on a computer, we are waiting for you all to join our team. I'm not saying this is volunteer work. This is indeed a very responsible job, and we can talk to you about all possible communications. There is a form under this video that you can fill out. We will contact you later and figure out how we will communicate further. But the project is very cool, very big, huge. I think that every 3D designer in this project will be able to find themselves and realize themselves in a project that will continue to develop on this planet for a very long time.

The most important news. This is also not volunteer work. All work at the Moscow Center has almost been completed. We are looking for finishers who know how to work with facades. We need to finish the façade and restore it. Therefore, you can call me personally as the manager, and we will discuss all the conditions for your assistance in finishing the facade of our Center. Under this video there is my phone number, under the fourth item it will be listed.

When will Lomonosov perform? He will speak a little later. I'll take two more minutes from you. No, I already borrowed everything from you. Therefore, the floor is given to our golden party, which will transmit information from our wonderful Spirit. Is he just not embodied?

Irina: Greetings to everyone, dear friends. Good evening. My name is Irina Podzorova. I am a contactee with extraterrestrial civilizations, with the subtle worlds and the Spiritual world. And today we will talk with you just with the disembodied Spirit, one of whose incarnations, one of his personalities was familiar to us as Mikhail Lomonosov.

Maxim: Mikhail Vasilievich Lomonosov.

Irina: Yes. He's here now.

Maxim: I salute you! Please tell me how can I contact you?

06:11 The spirit of Lomonosov about his incarnations on Earth.

Irina: Hello. The fact is that after the incarnation, which you know as Mikhail Lomonosov, I had another incarnation.

Maxim: Do I understand correctly that after disincarnation on Earth, you have already gone through another incarnation?

Irina: Yes.

Maxim: Where was it? And what kind of embodiment is this?

Irina: It was in Belarus.

Maxim: Already interesting. So, so?

Irina: My name was Evgeniy Miroshnichenko.

Maxim: Something familiar. Evgeny Miroshnichenko. Who is this?

Irina: I was born Evgeniy in 1928 and was a simple pioneer. I worked as a forester in one of the forests in the Minsk region.

Maxim: That’s it, there’s nothing else there? Is it possible to say anything more about Evgeniy?

Irina: I can only say that I came out of incarnation at the age of 38. I

lived in a forest house. I came out of there in the morning and came across a snake. When she bit me, I did not have the opportunity to turn to doctors, and I left the incarnation.

Maxim: I see.

Irina: Because of this, I did not complete my life task and again lowered my level, which I raised when I lived in my incarnation of Mikhail Lomonosov. But since now I represent Mikhail Lomonosov, precisely his part of memory, precisely that part of his Spirit that occupies his personality, you can contact me Mikhail.

Maxim: Thank you very much, Mikhail. Tell me, please, at what spiritual level did you enter into incarnation when you were Lomonosov?

Irina: At 15.

Maxim: And at what spiritual level did you emerge?

Irina: At 18.

Maxim: So you basically completed your task?

Irina: Yes. Although not everyone is happy. I have reached level 18.

08:25 Spirit of Lomonosov about the process of disembodiment.

Maxim: Please tell me how your transition to the Spiritual World happened? How did you disincarnate? What happened to you? Why did you come out of incarnation?

Irina: I couldn't breathe. I had a high fever, a bad cough, and didn't wake up. It was as if he fell asleep and woke up when he was already outside the body, in the Spiritual world.

Maxim: I fell asleep and woke up in the Spiritual World.

Irina: The veil before my eyes cleared, such a white fog. I looked around and saw that I was in a green clearing. I was surprised because I never left the house. And it was not yet time for such beautiful green herbs and flowers. It was early spring after all.

Then two young men dressed in all white approached me and introduced themselves as Angel Guides. They said that I was in the Spiritual World.

Maxim: How interesting everything is. And where did they take you?

Irina: To level 18.

Maxim: How to understand this? How do they spend it? Did they lead you somewhere or did you fly, how did it happen?

Irina: They took my hands, and we instantly moved. That is, it was like we were here, but ended up on level 18, where there was a bright light. We were greeted by a very large number of angels, and there was a feeling of divine presence everywhere. I felt it in every cubic millimeter of space. Like His gaze from everywhere.

Maxim: What does level 18 look like through your eyes? What was there? Grass is not grass, houses are not houses.

Irina: There was no grass there. There was a bright beam of light. But you could create your own houses there. In the beginning, when I got there, it was just a light from which angels came out. And we stood as if on a ray of light. Other angels came out of the arch. She was like a rainbow. Only there was no red color there. (He shows the gate.) There were green, blue, purple colors, and they shimmered. I thought I could see the Sun behind them, but angels came out of this light. Twenty is like a big meeting.

11:37 Spirit of Lomonosov about lowering the spiritual level and his incarnations.

Maxim: Mikhail, it turns out you entered at level 15, just as Lomonosov entered at 18. And what level are you at now, after incarnating as Evgeniy Miroshnichenko?

Irina: At 12.

Maxim: At 12?

Irina: Yes, I only cared about material things. I was a materialist in my last incarnation, which is why I found myself in the middle of the levels and because I did not love God. He didn't believe in him, and since he didn't believe in him, he didn't love him.

Maxim: I have a logical question. So it turns out that your whole life was wasted in vain in order to end up at level 12?

Irina: I set other goals before incarnating Evgeniy. I set a goal and a plan to reach level 20. But he didn't fulfill it.

Maxim: What prevented it from being fulfilled, besides the fact that you were a materialist?

Irina: In order for me to get to level 20, I had to start healing people and helping people. But I didn't go to study to become a doctor, then I got married early. I missed this moment when I could have gone to study and helped people accordingly. I needed to earn money, so I got a job. Only then I divorced my wife, and there were conflicts with her.

Maxim: It turns out that you are now telling us, I am talking to the Spirit, who is constantly at the 12th level. Right?

Irina: Now I'm on the 12th. Now I'm already thinking about reincarnation. I was offered several options, not only on Earth, but also

in another Galaxy, and they also offered me to be a subtle-material being.

By the way, that incarnation, if this is perhaps interesting, before the incarnation that you know as Mikhail Lomonosov, as I already said, incarnated at the 15th level, before that I lived for a long time on the planet Pikran.

Maxim: Burkhad in our opinion.

Irina: He was a man and was engaged in research of cosmic worlds. Explorer of those stars that have not yet been explored by Pikran. Astronaut. But he didn't study the Earth, he studied others.

14:31 The spirit of Lomonosov about his father and the choice of an educational institution.

Maxim: I understand. Mikhail, you have a very interesting destiny. Tell me, please, did you grow up in a simple peasant family or in some other family?

Irina: She was not a peasant. My dad worked, among other things, as a peasant, but this was not his main occupation. He caught fish, but also bought it from other fishermen and gave it to Moscow. People came on horseback and took it from him. And it so happened that he turned up the scales and gave out less money than the fish caught.

Maxim: I was engaged in light deception.

Irina: I consider it theft.

Maxim: Please tell me, was it your personal decision to go to study in Moscow?

Irina: Yes, it was my personal decision, but my father and some Irina agreed.

Maxim: Did Father and Irina agree?

Irina: The woman with whom he lived.

Maxim: Why not to St. Petersburg? It seems that all educational institutions at that time were large in St. Petersburg. Why exactly to Moscow?

Irina: Because only in Moscow there was an acquaintance at the only educational institution. My father had an acquaintance, a monk, who had an acquaintance at the educational institution where I was going to Moscow. And, besides, that caravan that came to my father for fish once again agreed to take me with them for free, to take me there. They provided me with a horse.

Maxim: Father little by little deceived these caravan workers, and they decided to take you for free.

Irina: He didn’t deceive the caravan workers, but the fishermen who risked their lives in the cold sea while fishing.

Maxim: He deceived the fishermen. I understand.

Irina: He didn’t give them as much for the fish as they earned. Tightened the scales.

Maxim: Why did you bring up this topic? I just can't understand. We didn't seem to ask about this.

Irina: Because it was from this money that he gave me for studying and living in Moscow. Accumulated.

17:30 The spirit of Lomonosov about his contact work.

Maxim: Interesting. Tell me, please, our people are very interested in whether you have had any other significant incarnations on planet Earth?

Irina: For a long time before my incarnation as Mikhail, I lived on the planet Burkhad (he says Pikran). Before that, I lived there for about 10 thousand years. I was born when a little more than a thousand years passed after the war with the reptilians known to you. And I heard a lot about this.

Maxim: You knew about this war right when you were on Pikran. Yes?

Irina: It has already passed. They talked about this at school at Pikran, and then, when I was already studying, as you call it, at the Academy of Cosmonautics. Where they teach how to control a spaceship, various biorobots, collect information about Star systems, planets, and so on.

And when I was already born in the body of Michael, those who remained on Pikran in incarnation were my children. They remained in incarnation even then. They began to come to me in visions. When I was still a small child, I saw a very large man with an absolutely fair face walking through the wall.

Maxim: Is this when you were incarnated as Lomonosov?

Irina: To Mikhail. I was not yet five years old. He greeted me and said that he was my friend. He said it not with his tongue, but with his mind.

Maxim: Do I understand correctly, from the age of five you saw something, felt something, sensed something? What did you understand? Who is this anyway? Who was that for you?

Irina: He said that he is my friend and wishes me well. Then I began to wait for him, because he calmed me down if my father, having too much drunkenness, might hit me again. Then he came to me. And then not just one came, but several more (shows three). And they started asking me: “What are you studying?” And from the age of 8 I

could already fish with my father. My friends who came said that they were from the stars, and in order for the Earth to join the Interstellar Brotherhood, for this it was necessary to first train them all.

They told me that they chose me to teach them. And for this I began to study. I told my father what I wanted to learn and pass on this knowledge. But that was back in childhood. When I grew up, I practically no longer communicated with them.

21:12 Spirit of Lomonosov about lowering vibrations.

Irina: I didn't communicate because I lowered my vibrations with certain things.

Maxim: What things?

Irina: I was angry at my surroundings (shows people). Who were they? Other students. And already when I learned, some colleagues. He was angry, often drank alcohol and could enter into conflict (shows how he holds something in his hands like a wooden mug and throws it).

Maxim: I understand. My student years must have been very interesting.

Irina: This was not only during my student years. I have already been to St. Petersburg after my student years and if something makes me angry, for example, injustice. I saw how the Empress allocated money for the Academy, and the academicians who were supposed to do science pocketed everything instead of developing science (he swore at this).

Maxim: You didn't like it when people steal, right?

Irina: I wanted the people to be enlightened. And for this we need to build schools and attract people. And even more so when I heard with what disdain they treat Russians (like "Peasants shouldn't study"). I knew that. Because they took me thanks to the fact that the priest who

accepted me into this educational institution back in Moscow, he was a distant acquaintance of my father, and I talked to him. But they didn’t want to take it, they refused.

23:27 The spirit of Lomonosov about the education of Lomonosov.

Maxim: Is it true that you forged documents in order to introduce yourself as a different person?

Irina: What documents are there? There were no documents there either. Everything was in words. But the one who received knew who I was (shows a thin man with such a piercing gaze, in monastic clothes).

Maxim: The monk deceived him when he recommended you, it turns out?

Irina: He didn’t report to anyone. He just put me on the applicant list and that’s it.

Maxim: I know, there is such a story. When they found out that you were the son of a simple, wealthy peasant, they even wanted to remove you from higher education.

Irina: They didn't know about it. It is far. My home was a thousand kilometers away. It was necessary to send a delegation from Moscow and find out who I am.

Naturally, they said that I was the son of a wealthy nobleman. It was the priest himself who advised me to say and write this. But this was not a document, but like a written request, a statement. And, moreover, not only in this statement, but also when communicating with other classmates or classmates, I said the same thing. And to check, to cover a thousand kilometers, it took about a month to get to these places where I come from.

Maxim: Thank you. Tell me, please, did you then go somewhere else to study?

Irina: Yes. In St. Petersburg the Academy, where there were already more natural sciences. If in Moscow I studied more languages (shows books in a foreign language) and theology, that is, I studied the Bible, then in St. Petersburg I already studied more physics, chemistry, geology, astronomy, geography (shows maps).

Maxim: Is it true that you studied in Germany?

Irina: Yes. But that was later. This was when the St. Petersburg Academy itself sent me and several other people so that I, as a capable student, could learn the science of how to search for metals, extract something from the earth, and smelt it. There you had to know mathematics and chemistry. And I was elected. Moreover, they were not elected right away, but they passed some tests, like an exam.

Maxim: Got it, thank you very much Mikhailo.

27:18 The spirit of Lomonosov about Lomonosov's talents and the reason for the termination of contact.

Maxim: Please tell me, when did contacts with your extraterrestrial brothers stop? So it was right after you started studying in Moscow, or was it later?

Irina: They still came to me, but I brushed it off myself. That is, in order for me to talk to them, I had to strain my thoughts. Because it was necessary not only to communicate with them, but to concentrate on them. But it was difficult for me to do this. And that was the last time, when I was 22-23 years old. Already after I arrived in Moscow. And then they practically didn't come, but I felt that I could call them. But I considered it more as fantasy. They said that they were from the stars.

Maxim: Thank you very much. Please tell me, were your talents and abilities derived from your past incarnations, or did you develop them in your incarnation?

Irina: Yes, they, of course, were laid down in the sense that the

information that I received not only in my incarnation on Pikran, but in all my incarnations. And I had a lot of them, in another Galaxy. And this information was preserved in me as in the Spirit. And, naturally, when incarnated into Mikhail's body, it was blocked. But the desire to understand the world remained. And information about this was blocked.

29:09 The Spirit of Lomonosov about Lomonosov's studies in Germany.

Maxim: Mikhail, I don't know from which fortress, but we have a question. Is it true that you escaped from some fortress?

Irina: Not from the fortress. It was not a fortress at all. This was in Germany.

Maxim: What happened there, what happened?

Irina: If you are talking about this incident when I ran away from the soldiers?

Maxim: What kind of soldiers were they?

Irina: German soldiers. Some kind of regiment (shows tents and horses in an open field). (Now I'll tell you. Okay.) The fact is that in Germany, as you rightly said, we received financial allowances from St. Petersburg and did not always spend them on studies.

Maxim: It is clear that students did not always spend money on their studies.

Irina: We saw a completely different life in Germany. And sometimes they abused alcoholic beverages. And after another such evening, I realized in the morning that I was not sitting in a drinking establishment, but among soldiers in an open field, near some kind of tent.

It turned out later that they came to the tavern where I was, met me and continued our fun evening with me. I left with them, no longer remembering myself. And it turned out that, while under the influence of alcohol, I agreed to become one of them, that is, a soldier. And when I woke up, I saw myself (shows a dark green jacket and red shoulder straps). And they congratulated me on the fact that I had taken some kind of oath.

I say: “What oath?” And there several people confirmed in German that I agreed to serve in military service with them. There, different Germanic tribes (or non-tribes) could fight among themselves.

Maxim: How did you escape, tell me?

Irina: Naturally, when I found out about this, I not only said I was sick, I felt bad (showed how sick I was and asked a doctor). And when the doctor arrived on a horse, I promised him payment for taking me to the city, because they wouldn’t let me go. I whispered with him, and he said that I needed to be taken to a certain infirmary. So I escaped.

Maxim: I understand. And headed back to Russia?

Irina: Not right away. At first they didn’t let me into Russia because I didn’t completely finish my studies because of some Johann or John. I left him even before the soldiers. That is, in parallel with training.

Maxim: Why did you leave? Why didn't you finish your studies in Germany? What contributed to this?

Irina: (He shows how they had a fight.) Firstly, he said that he would not give the money that was sent from St. Petersburg to me and other students, but would spend it himself on our maintenance. Secondly, he forced them to do work that was not appropriate for students. Working specifically with minerals.

Maxim: That is, he took your money so that you would not have fun often and imposed additional work on you at the institute.

Irina: Not only did he take the money. He also wrote slander and denunciations to the Academy in St. Petersburg. They sent me money from St. Petersburg for the trip, and I came back. I read these notes. And it was all about me, Dmitry, Vasily.

Maxim: Vinogradov?

Irina: Yes, Dmitry Vinogradov and someone else.

Maxim: Okay, I don’t know either. I only heard about Vinogradov, that there was a question there.

Irina: With some other Vasily.

Maxim: Did you all come to Russia together?

Irina: Yes.

Maxim: So you all didn’t finish your studies?

Irina: We came to Germany together.

Maxim: Did you leave Germany alone?

Irina: They stayed. I left when I didn’t listen to this man with a long face (shows) and his nose is hooked.

Maxim: Okay, I don’t know who it is. Thank you, Mikhail.

This is not the first time I have seen a question from our subscribers about the fact that you are the son of Peter I. Admit it honestly.

Irina: I already said that my father was Vasily.

Maxim: Haven’t you heard what they say about you, that you are the son of Peter I?

Irina: No. I haven't heard this specifically. Did they start saying this later?

Maxim: Yes, then most likely they started talking. Thank you.

Irina: Peter I was in our area, I know. But that was before I was born. My mother could not give birth to me from Peter I. I know that he was in our area long before I was born. I was told about this when I was a child.

Maxim: I understand, thank you.

Please tell me, Mikhail, have you been developing the table that we now call the periodic table?

Irina: No. I know what you're talking about, but I haven't done it. I studied the elements, but in a different way, not in a table.

Maxim: How do you assess the development of science during the period of time when you were Lomonosov?

Irina: A very low level, because there was more descriptive science. That is, they described some phenomena, but did not try to explain them in any way except through the providence of God. Such scientific concepts as why, for example, a rainbow occurs, why thunder occurs, the northern lights, why the compass needle turns? They practically did not do this. I started researching all this.

Maxim: Got it. I’ll ask about science a little later.

37:43 The spirit of Lomonosov about his family, children, employment.

Maxim: People are interested, they ask if you found the love of your life, your woman, and when did you get married?

Irina: It was in Germany. Lisa. (Shows a short girl with a very small face.) Lisa was the daughter of the mistress of the house where I lived. She was younger than me and we fell in love. I had no one else besides her. Of course, before I met Lisa, and even during the period when I met her, we simply had an affair. Due to the abuse, as I already said, of alcoholic beverages, it happened that other students, including Germans, and I went into a house where there were available women.

Maxim: Have you used the services of available women?

Irina: Yes. But this was before the serious romance. This is also what I spent money on. (Moreover, the Academy’s money, as I understand it).

Maxim: Please tell me, did you have children?

Irina: Yes.

Maxim: How many children did you have?

Irina: Two - a son and a daughter - died in childhood.

Maxim: At what age?

Irina: A daughter is four years old, a son is one year old. They got an infection. Covered with a rash. I don't know the details. That's what Lisa said. I have already been to Russia. Later she arrived.

Maxim: So you got married, went to Russia, and she stayed in Germany?

Irina: Yes. At first she couldn’t come, I couldn’t take her because I

wasn’t settled. I didn’t have any future in St. Petersburg, because, as I already said, it wasn’t even a wild life. I didn't lead a particularly wild life.

Even at a German university they wrote that, despite everything, I study very well, with only positive grades, and that I am very capable. I answer all questions and write scientific papers. And this was noted even by those who reproached me for such behavior, but still recognized that I behaved very well in my studies, and recommended that the St. Petersburg Academy take me on as an employee.

But, nevertheless, when I went to Russia after all these adventures, it was still far from certain that I would be able to somehow find a job. For example, when I arrived there, some boss at the Academy did not even want to enroll me in the register of Academy specialists who had graduated.

Maxim: Why?

Irina: Because of these notes that they sent, which I talked about.

Maxim: Slander?

Irina: Yes. I told him that I was studying anyway. He said: “Are you, peasant servant, going to argue with me even more?” He found out from somewhere, perhaps someone from my circle told him, perhaps these were some people who knew about my origin. And this rumor spread. No one spoke out loud. And after I arrived in St. Petersburg, he was the first to tell me this.

There was a guard at the Academy, and he let me into his guardhouse. And then I wrote a petition to a high-ranking person, like a count, so that they would take me. And then they took me on a probationary period, assigned me a certain salary, and I began my activity. But only later, when I gained a foothold, I wrote a letter to Lisa. She arrived.

So, two children died young, and the third remained alive when I had

already left the incarnation. Elena. I named her in honor of my own mother.

Maxim: I understand. Mikhail, please tell me how many languages you knew and what languages you spoke?

Irina: He says that he knew 4 languages well: German, Latin, Russian and Greek. Greek could only be read. Also Church Slavonic. He knew a little English and spoke a little English.

44:21 The spirit of Lomonosov about his relationship with his stepmother.

Maxim: It's strange, they write that you were molested by your stepmother in some movie. Were you molested by your stepmother?

Irina: She didn't harass me, but we argued with her because, as she believed, I was sitting over books. When I was a teenager, my stepmother was against me reading books. And I collected them all over the village. Because I was interested in learning, as I already said. My friends came to me and told me to read books. And when I started reading them, an old priest taught me to read. I asked him to teach me. And he first gave me books, and then I collected them throughout the village and brought them home.

The father did not mind, but the stepmother cursed. She said: "Why do you need it? It would be better if you helped me with the housework"

45:35 The Spirit of Lomonosov about the "Brief Russian Chronicler with Genealogy."

Maxim: Mikhail, please tell me, you created a "Brief Russian Chronicler with Genealogy", where you described the main events of Russian history from 862 to 1725. Question: what did you use, what documents, when describing the events since 862, what kind of ancient writings were they?

Irina: These were chronicles that were in the library in St. Petersburg. The chronicles were preserved at the Academy of Sciences. They were written at that time. At first they were in monasteries, and then they were transferred to the Academy of Sciences. That is, the Academy of Sciences acted as the center where they were collected. And I sat there in the library and used them.

Naturally, I not only rewrote all this, but also added my own thoughts. I didn’t add it, I interpreted it.

Maxim: Yes. Lady Nadya. Hello, I'm late. Was Lomonosov from a poor family? Is it true that he walked? He was not entirely from a poor peasant family, not entirely poor, you can watch the beginning of the broadcast. There he spoke about this clearly and well.

46:57 The spirit of Lomonosov about his personal library.

Maxim: Mikhail, please tell me, did you really collect your large library?

Irina: Yes, she was in the house where I lived. Even when I was paid a student salary or a scholarship, I spent it on books. And including the money that my father gave me with him. I started collecting as a student. That is, I went to the markets, where they sold manuscripts. Like historical markets.

And I bought them, they were expensive. When I was still a student, I could leave it for a month so that I could eat the cheapest fish, bread and just drink the cheapest kvass, without tea.

Maxim: Please tell me, do you know where your library disappeared after your death?

Irina: I have already left the incarnation and haven’t seen it. Probably went to her daughter, but she could have given it to other academics because she wasn't interested in it. (He shows some manuscripts; he drew something there.)

48:29 The spirit of Lomonosov about the scientific environment of his time.

Maxim: Mikhail Vasilyevich, you lived at a time when two great Empresses ruled. What can you say about them? Who supported you more in your endeavors and scientific works?

Irina: Elizabeth supported me more, because she was for science, for there to be more Russian scientists than French and Germans. (I see a woman, she supported him.) She knew that we were capable and supported him.

Maxim: Please tell me, have you been looking for the recipe for the philosopher’s stone?

Irina: This is what alchemists did. I saw these manuscripts, but I was studying chemistry. That is, more scientific. I'll explain, I saw the books.

Maxim: Have you read these books?

Irina: Yes, they were written in Latin. But I was not looking for the philosopher’s stone in them, but for the patterns that ancient alchemists discovered when trying to find the philosopher’s stone and simultaneously discovering some substances. There were discoveries, but they were encrypted with some symbols. And I tried to understand what it is.

Maxim: And what do you think about these books in general?

Irina: I think that in ancient times, in the Middle Ages, as you say, 12-13-14 centuries, there also lived very intelligent people who, despite the lack of science, still made discoveries. They simply explained them in this way and did not have the opportunity to create some kind of science and use these discoveries to benefit people. That is, it was like the philosopher's stone, for them it was possible to transform not only lead or any metal into gold. But for them it was still an opportunity to discover something, new laws of nature.

Maxim: Didn’t you have such a desire to figure out how to make gold from lead?

Irina: No, I thought it was impossible. These are different substances. I thought it was a myth, a delusion, a superstition. But I nevertheless respected these scientists because this was their level of knowledge.

Maxim: And at that time, were you already studying the ether? Was there such a concept?

Irina: A substance or something else?

Maxim: Substance. Not something else.

Irina: The substance was ether. Began to be used for anesthesia.

Maxim: No, not that kind of broadcast.

Irina: So I’m saying that this is an invisible gas that permeates all space?

Maxim: Yes.

Irina: Yes, many scientists believed, and I especially thought so at first, that gas fills all worlds, all space, the entire Universe, and other elements are born from it.

Maxim: Yes. So that was your assumption?

Irina: It was.

Maxim: Thank you very much, thank you. So, please tell me, did your interstellar friends give you information of a scientific nature, or did you

somehow receive this information yourself?

Irina: I believe that I received this information myself. As you would say, under the influence of your Higher Self, intuition.

Maxim: Intuitive, yes?

Irina: I had this, a connection with the Higher Self. But I didn’t understand that it was the Higher Self, I simply called it God. I believed in God and prayed. And I believed that it was God who was revealing it to me.

Maxim: Neo asked a good question here. Did you have secret Vedic scrolls that Western scholars were hunting for?

Irina: No.

Maxim: I know that at that time there were a lot of Germans in science. Tell me, please, did the Germans greatly distort our history?

Irina: I don’t agree with some of their visions of history. They didn't do it on purpose. Because of my natural, as I believe, disdain for Russians. To the Slavs in general. There was such a disdainful attitude towards our history.

Maxim: I understand.

54:05 The spirit of Lomonosov about natural phenomena during his life.

Maxim: Please tell me, there are moments that you had some kind of huge, strong flood, flood. Or there was a version that you had an atomic war, where some strange types of weapons exploded, very serious ones. Did this happen in your time? Did you know about this?

Irina: No, I didn’t know.

Maxim: Not a flood, not atomic weapons?

Irina: Everything was calm. In St. Petersburg sometimes (he shows: the river, some of its tributaries overflowed their banks and could somehow flood). But they fought against it. Where there were embankments, sand was poured and compacted so that it would not flood.

54:55 The spirit of Lomonosov about Rurik.

Maxim: This is a question for you as a scientist. Who really was Rurik? What did his name mean, and was he a newcomer from the Varangians? Do you know this Rurik?

Irina: Yes. Personally, I don't know. I studied history.

Maxim: Did you study history?

Irina: What is my opinion?

Maxim: Yes.

Irina: It was one of the Slavic leaders. But I don’t think that he was a Varangian. I believe that he was the leader of one of the Western Slavic tribes. And in general, his last name was not Rurik. This was later translated in this way into the language of the Swedes or someone else who entered into trade relations with him. That's what they called him.

But I think he had a more Russian name. Not Rurik, but Rusich or something like that. (He says that he believed that he was one of the leaders of the Slavic tribe.) By origin I believe that he was of Slavic blood. And I wrote about it.

Maxim: They ask, are there any of your incarnated close relatives on Earth now? Do they continue their educational mission? That is, do you have any blood relatives left, and are they involved in science?

Irina: I'm not interested in that. I don't know. I was not interested in egregor.

Maxim: Thank you very much.

56:58 The spirit of Lomonosov about the Kiev-Mohyla Academy.

Maxim: Please tell me, did you study at the Kiev-Mohyla Academy in Kyiv?

Irina: Yes, I went there. But not what I studied. I just looked at what they were studying there. He stayed for no more than a month and went back to Moscow. I thought that they provided less knowledge for that period of time than even in Moscow, but I wanted to go to St. Petersburg. And then I went there. With a note from the Moscow School, the institute where I initially studied. With the fact that I am recommended to the St. Petersburg Academy. There were plans to go to Kyiv, but it didn’t work out.

Maxim: It didn’t work out. You did not appreciate Kyiv knowledge.

Irina: I thought that St. Petersburg is the capital, and they provide the most advanced scientific and academic knowledge.

Maxim: Thank you.

58:05 Spirit of Lomonosov about the atmosphere of Venus.

Maxim: Please tell me, is it true that you discovered that Venus has an atmosphere?

Irina: Yes, I wrote about this because I saw it through a telescope. Not because I knew about it from somewhere, but I saw it myself.

Maxim: How was it possible to understand that it had an atmosphere through a telescope?

Irina: If you look at Venus when it is at a certain angle, that is, to the Sun, you can see how the sun's rays pass through it (shows white stripes, and these stripes rotate). Only clouds can behave this way.

Maxim: I understand.

Mikhailo, please tell me what subjects are missing in schools and institutes? This is probably not a question for us. You don't know what items are available now.

Irina: I can only say what items were there and which were missing, in my opinion, when I lived in Eugene's body. It will soon be 100 years ago.

59:34 The spirit of Lomonosov about the road from home to St. Petersburg.

Maxim: They ask: Mikhail, how long did it take you to walk from Siberia to Moscow?

Irina: I didn't walk, but rode on a horse.

Maxim: They say that he walked for three days and caught up with the convoy, or am I mistaken?

Irina: They took me right away. (Shows that about 10 people came to my father as guards from robbers.) They also guarded the money that Moscow merchants brought and then fish. The exchange was simple: money for fish. They took this fish to Moscow, and there was quite a lot of it. Some kind of cart, and they were carrying salted fish (shows

pieces of salt). And I ate it. About three weeks later we rode there on horseback because it was snowy. Of course, no one cleaned it dear to us, as tractors did in the 30s of the 20th century. But nevertheless, on horseback, in a sleigh. And that was three weeks. More than a thousand kilometers.

1:00:55 The spirit of Lomonosov about the happiest day of Lomonosov.

Maxim: Please tell me, what was the happiest moment of your incarnation when you were Mikhail Lomonosov? Perhaps the happiest day or event in your life?

Irina: Happiest day?

Maxim: Yes.

Irina: When I found out that I was entering the Moscow Slavic Language School. Not Slavic, some kind of Greek. It was an institution larger than priests, but when I went there, I thought that, despite knowing this monk, they would not take me because of my origin. And the happiest day was when it all worked out and I went in. The whole day was joyful.

1:01:45 The spirit of Lomonosov about his activities in the Spiritual world.

Maxim: Mikhail, we have a tradition that we talk about intergalactic news. Is there any news in the Spiritual World? Let's say, can you tell us some news from the Spiritual World? Does such a thing even exist?

Irina: I'm at level 12 now. And I live in the house that I always dreamed of when I was in the incarnation of Eugene. This is quite a big house. But still, this is how he would probably look in the village. Wooden, large, with platbands.

News. I can only say that I am busy choosing where to incarnate and

reach level 18 again. I want to make it my implementation plan to reach level 18 again. And now I'm thinking about how I can do this. (He says he doesn't really communicate with anyone and thinks about it.)

Maxim: Thank you.

1:03:00 The spirit of Lomonosov about Catherine II.

Maxim: I have a question for you. Did Catherine II really love Russia and do everything for its good? How would you characterize Catherine II?

Irina: Yes, I believe that she was a wise ruler, very kind, who really cared about Russia. And she also cared about the scientists, that they felt good. She fixed their wages and provided them with libraries for work. She even provided laboratories where they did experiments. And she paid for it all. She was very kind, a believer, and really cared about Russia.

1:04:06 Spirit of Lomonosov on the treatment of gout with herbs.

Maxim: Mikhail Vasilyevich, please tell me what plant can cure gout?

Irina: I didn’t really do herbal medicine. But I learned more about this in Evgeniy’s life, because he was a forester who studied herbs. And I believe that gout can be cured by comfrey and burdock roots, taken in equal quantities. Because they remove acids. But there you still need to not eat certain foods and generally take care of yourself. Gout often happens, even in Mikhail’s life I heard from doctors who were academicians that this is a congenital, hereditary disease. Not to cure, but to alleviate.

1:05:28 The spirit of Lomonosov about the territory of Russia in his time.

Maxim: Please tell me, do you remember which territories were part of the Russian Empire in your time?

Irina: (Shows a large map.) Siberia, the Far East, Kazakhstan, at least some part. There were also territories in the west.

Maxim: What about the European part?

Irina: He needs to name the cities. Because he shows me the territory.

Maxim: So, in principle, it would be possible to draw a map.

Irina: In principle, yes. Because it shows: Belarus, Ukraine, some part of Poland, I see this map, that it is definitely the Russian Empire. But I only see that in the south the Caucasus is not yet Russian, at least not all of it. There is a Russian part there, and there is where there is not. Mixed.

Maxim: Mikhailo, I seriously really want to thank you for agreeing to transmit information through Irina for our project, for our viewers. I am very glad that I have the honor of communicating with the Spirit of a great man.

1:07:24 Appeal of the Spirit of Lomonosov to earthlings.

Maxim: I would like to ask you: if you had the opportunity to address all the inhabitants of the Earth, what would you tell them now?

Irina: I already look at all my lives from the position of the Spirit. I understand many mistakes that led me to lower my spiritual level, which I achieved in the life of Mikhail Lomonosov.

I would like to appeal to all of you that do not waste time in your life simply on something material: on family, on work. Be sure to know God, be sure to read about God. This could be spiritual literature. Be sure to pray to Him. Because all this will be useful to you after leaving the body. Be sure to practice spirituality. Don't focus only on family, only on work, only on children. All this will remain on Earth. And your children should also receive spiritual education from you, knowledge

about God, because otherwise it will be difficult for them to take the spiritual path and fulfill their task of incarnation.

Maxim: Thank you.

And the last question. Do you know such a country as Tartaria?

Irina: No. Tatarstan? Not a country, but a region of the Russian Empire.

Maxim: Guys, thank you all very much for your questions. Thank you very much for supporting our project, our channel, our subprojects. There are a lot of links under this video.

Irina: Thank you.

Maxim: I would like to repeat our most important news: you can ask a question live in the “Question - Answer Live” chat. This chat is located in Telegram.

We have a retreat in Krasnodar from September 27 to October 3.

We are looking for a 3D modeling specialist for the project “Multi Universe “Cassiopeia”. Guys, this is not volunteer work. This is really very interesting work. And we will definitely talk about the conditions of this work. Below this video you need to fill out a form, we will definitely call you back.

And we need those who can help finish the facade in the Moscow center. Call me personally.

Call, write. I am always happy to answer all your questions and suggestions. We have very little left. And we are, in principle, ready to launch the Moscow Center and we will be able to place all our specialists in this Center just like you. Thank you all very much for your questions. Thanks to LiShioni, thanks to Mikhailo Vasilyevich, thanks

to everyone who watches us. Until next time.

Irina: Bye.

September 19, 2022

Conference participants:

Irina Podzorova – universal contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia project and the Cassiopeia Center for Spiritual and Physical Development;

The spirit of Mikhail Vasilyevich Lomonosov.

Video in text
February 21

#501 Ancient and modern races of the Earth. Alien experiments: the creation of the first people. 12 strands of DNA.

---

https://www.youtube.com/watch?v=Nvnrk8wSL-w

00:00 Start of broadcast.

01:00 Introduction of participants.

Irina: Hello, dear friends. My name is Irina Podzorova. I am a contactee with extraterrestrial civilizations. Today we have another conference. Present with us is Argelas Markish, a representative of the planet Disaru - a biogeneticist, a specialist in genotyping and hybridization of various animals in order to create hybrids for the infusion of an intelligent Spirit. Also present here is MidgasKaus, a biologist, psychologist, specialist in alien civilizations from the planet Esler. And here is Tiar Paulon, a representative of the planet Burkhad, a specialist of the Commission for Contacts with Young Races, a historian.

Elena: Great. Greetings to all specialists from Disaru, Burkhad and Esler.

Irina: Such a team from three planets.

Elena: Great. We welcome everyone and thank you for finding the opportunity to come today and chat with us on the topic of ancient and modern races on our Earth and hidden forms of cosmic contacts with earthlings.

If you allow, with Irina's help, we can start with the first question.

Irina: Yes, please introduce yourself.

Elena: My name is Elena. I am an information analyst, I presented myself at another conference earlier. My field of activity is far from space, however, this is a very important interest for me, which I have maintained for many years. This direction, which I am mastering information, gave me the opportunity to draw up questions for today's conference.

Irina: Elena, we greet you from our planets and from the Commission for Contacts with Young Races.

Elena: Great. This is amazing. Let me begin, dear guests.

Irina: Yes, of course, we are listening to your questions. We will be very happy to give our answers, our opinions.

03:41 Differences in the understanding of the term “race” by Blavatsky and representatives of the Interstellar Union.

Elena: How does the information of Helena Blavatsky (who, as is known, was related to Esler) relate to the information in her work “Anthropogenesis” about the origin and evolution of the seven root races and subraces on Earth, which she received from the mahatma teachers of the White Brotherhood of El Morya, Koot Hoomi and others (who, as is known, are also from the planet Esler), with data on the origin and evolution of human civilization received by us through Irina from the Interstellar Union and representatives of Burkhad?

Irina: Okay. Who is the question for?

Elena: Disaru, I think so. Or maybe a racial historian.

Irina: Now Tiar, the historian, wants to answer.

Yes, I am familiar with Helena Blavatsky's contact. I know some of her supervisors who passed on information to her. She was in contact with the Spiritual World, with plasmoid civilizations and with the civilizations of the planet Esler. And several times I came into contact with my race, the civilization of the planet Burkhad.

Of course, she was given the same information as it was given to Irina, in astral contact. Blavatsky had physical chips. She kept notes on all the information that was given to her. She wrote down some information, remembered some information. And she herself studied various sources on Earth about the origins of peoples, religions, and various philosophical movements. She traveled a lot both in the Astral and physically. I asked many people.

She also contacted plasmoid civilizations and also asked them about the origin of people. That is, she was interested in different opinions about this, different views, different interpretations. She wrote what is

stated in the book later, after she received the information. And in this book she made a synthesis of those ideas that she learned about - naturally, already processed by her analytical mind. Therefore, in her book one can distinguish different data that she received from alien civilizations, from plasmoid civilizations and from various teachings that she comprehended.

As for the ratio of the seven races. Blavatsky described several races that arose successively on Earth. She had her own names. Moreover, she argued that representatives of different races could coexist on Earth for some time. What can we say? What did she call race? What she called race is not what we call race.

Elena: Yes, I agree. There's a different concept there.

Irina: Race for us is a certain type of human population, differing from another race by the presence of certain genetic characteristics that make a difference in appearance and, to some extent, in the structure of the nervous system and brain, which determines certain characterological characteristics of the race.

Helena Blavatsky called a race a certain type of living intelligent beings who build their civilization separately. How is this explained from the point of view of the Interstellar Union? What she called the non-physical first races on Earth were representatives of plasmoid civilizations that arose in earthly space at different density levels. They had different appearances, and their task was to create the Earth's biosphere. That is, plasmoid civilizations appeared on Earth earlier than dense material civilization.

And those races that she described as physical, with great growth (she described races 18 meters tall) were also representatives of plasmoid civilizations. She simply did not have such an understanding of the difference between physical matter and various subtle etheric types of matter. And we give Irina information from the perspective of her knowledge about the structure of matter.

09:41 Creation of a human genetic hybrid.

Elena: Thank you. If you allow, let's move on to the second question. It is less philosophical, but more specific.

What explains such a small five percent prevalence in the genome of the first hybrid humans of the genes of anthropomorphic ancestors over the genes of chimpanzees? And why, out of all the diversity of primates, was this particular population chosen?

Irina: We need one more specific question.

Elena: We say that in the genome of the first people, alien genes prevailed over chimpanzee genes by only 5%.

Irina: Who said that in the genome of the first people, alien genes prevailed by 5% over chimpanzee genes?

Elena: The Interstellar Union told us that the basic ratio in the human genome was 45% primate, 50% anthropomorphic civilizations and 5% reptilian.

Irina: What is the question?

Elena: The question is why, when people were created, representatives of the animal class turned out to be very close in the total volume of the genotype in relation to people. Why is this so? Maybe it was scientific selection that ultimately led to exactly this ratio?

Irina: Argelas Markish from the planet Disaru answers. He is just a biogeneticist.

I understood this question. I studied the history of the creation of Homo sapiens. In fact, tests, experiments, experiments were carried out with various combinations of genes, and of different races in different proportions. What was then chosen was initially the most viable hybrid.

Elena: I see. That is, chimpanzee genes turned out to be most suitable

in precisely this proportion in order to create a full-fledged human being.

Irina: Regarding the choice of chimpanzees. It was not a modern chimpanzee, but rather a species that is similar to a modern chimpanzee, but taller. However, the descendants of this species have changed so much that the population of representatives of those chimpanzees no longer exists.

Elena: Yes, that's understandable. But I would like to make the following remark for the representative of Disaru, who is engaged in this research: modern scientists from the Faculty of Biology at Tomsk University confirm that they have discovered chimpanzee genes in human genes. Whether it’s true or not, at least this information was published in scientific publications.

Irina: I studied your data on this matter. Your scientists, your scientists say that the human genome contains so many percent of chimpanzee genes, or they can even calculate what percent of the genes of a particular plant - there are such studies. But they actually compare the percentages of genes in different living things differently than we do. They compare what is called the nucleotide sequence. And moreover, on a limited section of DNA of one or several chromosomes.

Elena: What is interesting to us is that as a result of their research, which, of course, differs from the capabilities of alien scientists, they nevertheless confirmed the very fact of the presence of chimpanzee genes.

Irina: I just heard that the coincidence of the genes of humans and chimpanzees is 96% or so, and the coincidence of the genes of humans and some plant is 40%. I am aware of these studies. Such data is provided to the media by those scientists who try to explain their research in a simplified form to people who do not have scientific knowledge - the so-called popularizers of science.

And people imagine that humans are only 4% or 5% different from monkeys. In fact, this is not true. This is just a simplified description of the research that biologists and biogeneticists do. Research says that

humans and chimpanzees are 95% similar only in those genes that were compared in a DNA chain of a certain length according to the nucleotide sequence of humans and chimpanzees. And there you can really choose chains that will match 100%. Or you can choose those that will not match at all.

15:26 Biological characteristics of the first people.

Elena: Okay, I see. The next question is even more interesting, but unknown to us. It is simple enough for specialists who deal with genetics. What color was the skin of the first eighteen people, the color of their blood, how many strands of DNA did they possess?

Irina: Do you mean physical DNA?

Elena: Yes, finally.

Irina: Because there are also etheric matrices.

Elena: Of course, we take physical ones.

Irina: If we take the physical world, then physically there are two chains of DNA, which contained all the necessary information about the structure of the body, its functions.

As for skin color. The first man had white skin. But not completely white, but a little tanned, European. This is if we take the very first people.

Elena: Yes, the very first nine pairs.

Irina: They were of the same race - the “white” race, in your opinion. They were very similar to modern European people, only their height was about four meters.

Elena: What about the color of blood?

Irina: Red, because hemoglobin was present there. But its content was somewhat different.

17:27 The color of the blood of representatives of Burkhad, Tumesout and Selbet.

Elena: I see. So, the blood of our anthropomorphic creators (Burkhadians and Tumesoutians) is also red? What color was the blood of our creators – the Burkhadians, Tumesoutians and Selbetians?

Irina: Tiar answers.

My blood is red. Only it is not bright red, like a person's, but pink. It was as if blood had been dropped into the water. This is due to the fact that there is a lot of oxygen in our atmosphere and we have enough hemoglobin content.

Tumesout people have red-brown blood. It is very thick, like jelly.

Elena: And what about our beloved Selbetites?

Irina: Brown-black, dark, closer to black. At least that's how I see it. But there is a brown tint there. I don't know this color. Selbet residents also have a certain amount of hemoglobin, because they breathe oxygen. But they have a slightly different structure of this molecule due to the fact that there is a certain amount of various nitrogen oxides in the atmosphere.

19:29 Participation of representatives of the Spiritual world in the creation of an intelligent hybrid.

Elena: Great, thank you very much for the complete answer. Now let's move on to a question that is quite interesting from the point of view of

the interaction of the Spiritual and material worlds in the conditions of genetic design.

How do geneticists of the Interstellar Union interact with representatives of various levels of the Spiritual World at the stage of genetic design? Maybe including consulting Angels when creating new populations of humanoids in dense bodies?

Irina: How do they interact with the Spiritual world?

Elena: Yes, at the moment of designing the future humanoid in a dense body.

Irina: It varies. But, of course, before starting a project to create an intelligent hybrid into which an intelligent Spirit will move, scientists contact representatives of the Consulting Angels. And they, so to speak, “agree” with them that a certain Spirit will be sent to be incarnated in this body. It often even happens that the first one to move into the body of a hybrid is an Angel or the Consulting Angel himself. Because they have more energetic capabilities to adapt to a body that no one has yet inhabited. That is, the energy must be strong.

Elena: I see. But this happens precisely through the connection with the Higher Self? How does this technically happen?

Irina: It can happen through a connection with the Higher Self, or through a journey to the Spiritual World. That is, leaving the body, like you are in the Astral. Only you come to another planet, and we can, for example, go to the Spiritual world, that is, to the world of disembodied Spirits.

Elena: I see. Did the representative of Disaru or Burkhad answer?

Irina: Disaru, biogeneticist. Because he is now conducting experiments on one of the colonies of the planet Tashig, Elshuar, which is located in the constellation Scutum. They are conducting certain experiments there on crossing the genes of the Tashigans with local animals and also the genes of the Burkhad colonies.

Elena: I wonder what will happen in the end. Okay, our next question is.

22:24 Reasons for the creation of several races on Earth.

Elena: According to earthly time, the creation of six human races existing on the planet, according to our earthly classification, took place. What caused the creation of such genetic color diversity on Earth? Please answer us.

Irina: Mead says that these questions have already been asked. All right that's okay. Repetition is the mother of learning.

12 thousand years ago, after the war with the Selbetians, when conditions on Earth changed, it was decided to create different races. The first goal was to create different peoples with different skin colors, with different appearances, so that those earthlings who would create a civilization on Earth after the war could quickly adapt to different types of intelligent beings and then it would be easier for them to enter the Interstellar Union. This is what those xenopsychologists who spoke with earthlings after the war considered it necessary to do. You probably understand the level of distrust of aliens after the war.

23:51 Natural crossing and genotyping in the development of a race.

Elena: Yes, the mistrust is understandable. But, Mead, can I clarify the next point? It “freezes” a little in terms of our knowledge. Through Elena Petrovna, Esler conveyed data that before the war, when there was a single continent of Pangea, there were different races there: red Atlanteans, black Lemurians and white Hyperboreans.

Irina: She simply described various representatives of alien civilizations who flew to Earth, as we have already said, from 3 million to 12 thousand years ago. Numerous representatives of alien civilizations communicated very closely with representatives of the Earth. They practically lived among earthlings. And there were even cases when they came into “contact” - I wouldn’t call it marriage. And with the help of special technologies, a child was born, who could then

become the ancestor of one particular tribe, but this did not affect the general genetics of the earthling population. Because it happened in a limited place on the mainland.

But there were such cases. Representatives of a group of civilizations that exist in the constellation Lyra, the so-called Lyrans, especially liked to do this. They were actively in contact with earthlings before the war.

Elena: It turns out that genetic color diversity manifested itself mainly only under conditions of adaptation after the war period. And before that there were private crossings, which had no real influence on the creation of the six current races, right?

Irina: The fact is that genetic changes from the natural crossings I mentioned gradually disappear in the absence of a certain technology for introducing genes or changing genes that affect appearance, precisely with the help of genotyping technologies and working with the cell nucleus, since the descendants of people born as a result crossbreeding, live in terrestrial conditions. This is not a single point change in DNA that can persist for many generations.

Elena: It is clear that this hybridization was of a private nature and could not result in the creation of modern races in our understanding.

Irina: To create races, it was necessary to carry out special genotyping and the subsequent resettlement of representatives of different races to different parts of the continents, which had already separated. And so that they are separated by long distances so that they have time to consolidate this trait in their genotype before they begin to interbreed.

28:20 Modification of the genotype of earthlings after the war with Selbet.

Elena: Got it, thank you. The next question is exactly related in meaning to what we have just discussed. The civilizations of which star systems took part in the subsequent post-war modification of the genome of earthlings? Using the example of the Mongoloid, Caucasian

and Negroid races.

Irina: These are the same three planets that made up the human genotype. The ratio of the genes of the Burkhadians and the genes of the Tumesoutians was simply changed. It has increased by five percent so that a person can eat animal products, the flesh of animals, fish and birds.

Elena: Yes, we understood this very clearly from previous conferences.

Irina: Which scientists exactly worked?

Elena: No, civilizations of which star systems? For example, Sirius, Pleiades.

Irina: It was a project, an operation of different races, and scientists changed in these laboratories.

Elena: Okay. What star systems were behind the Mongoloid race? Who connected and contributed something from time to time.

Irina: You can't say that this is a specific star system. All races that were created from a single one were the product of the same scientists. A whole team worked there.

Elena: That is, this is a cooperation of scientists. In this regard, it is difficult to identify who exactly?

Irina: Do you think that to change DNA in such a way that a different external type appears, which could then be inherited and become stable in a series of descendants, it is enough to take and transfer one nucleotide into one chain with some kind of instrument? No, this is far from true. Everything is more complicated there. And all this worked in conditions of contact with the Consulting Spirits. And the scientific equipment of these laboratories was very technologically equipped. There were modern electron microscopes, various instruments,

nanochips, and so on.

Elena: We understand that. It's just that from our earthly point of view, it seemed to us that there were some representatives of the civilizations of star systems where the issues for the black, white or yellow race were most worked out.

Irina: Take the modern yellow race and the white race. What is the difference? Now you can say that they have a certain appearance. What is the reason for this appearance?

Elena: Apparently, this is the same genotype.

Irina: Which gene needs to be changed, how and where to place it, in which row of DNA, on which chromosome, in order to cause, for example, a trait such as narrower eyes or yellow skin color? All this, of course, is being studied.

He is now showing me some pictures of how chromosomes look on the screen. And arrows from one to another.

Elena: Okay, Irina, we won't go into too much detail about hybridization technology. We must understand the essence of the issue. That in any case it was a cooperation of scientists who, for certain tasks, certain territories, created hybrid people, most adapted to this particular zone of residence and habitat.

Irina: How was it done? Gametes were taken from men and women. First among those who were representatives of the white race. And it was in them that this hybridization was carried out. And then these reproductive cells were united and placed in the uterus of certain women whom the Spiritual world selected as mothers to these children.

Elena: Okay, thank you, it's available. The next question is this. Taking into account the fact that after the war the proportions of the four basic components of the earthling genome changed and have now changed in relation to when it all began, in what proportion have these

proportions changed?

One of the conferences said that the situation had indeed changed. Due to the fact that it was necessary to use meat products, the configuration of the four basic components changed. But after this, as is known, there was a cooperation of scientists who, after the formation of various continents, created the corresponding races that suited them best. So, was there a large proportion of other alien civilizations within this genome?

Irina: Initially, representatives of different races had the same ratios as others. Some nucleotides and groups of nucleotides within chromosomes, as well as between them, simply swapped places. And this led to the appearance of a new body structure, a new appearance. If we take the Negroid race, then it was necessary to strengthen the gene that encoded the production of melanin as a protein, and so that it was not produced in some microscopic quantities, but accumulated in certain layers of the epidermis and dermis.

This was all done pointwise, by micromutations. And this did not require the addition of any other genes from other races. What we call DNA is just a general name. The human genotype is a certain dynamic matrix that can be changed and rearranged without adding anything new there, and new species can be obtained.

36:03 Twelve strands of DNA from the etheric matrix of the cell.

Elena: Thank you, we understand, let's move on to the next question. We mentioned earlier, when we were clarifying about the first people, that they had only two strands of DNA on the physical plane. But in our sources, earthling contactees gave information about twelve strands of DNA. Maybe it was about the etheric plane? If possible, please clarify.

Irina: Yes, it was not about the physical plane, but about the etheric. That is, about the etheric matrix. What they called the twelve strands of DNA still exists in the etheric matrix of every cell. Only this is not DNA as a physical set of certain molecules, these are certain types of energy that are invested in the etheric matrix of the cell and make up its 12 spiral channels through which life force flows.

Elena: This is a very interesting addition because it is completely unknown to us. We are probably hearing about him for the first time. Earlier, Irina said in one of the conferences when communicating with our scientists from space that the etheric plane is not just a copy of a person, but its fundamental principle. Everything is built on it. But here we learn that the etheric plane can vary. In part, this happens through the etheric plane. Each cell has certain energy spirals that allow it to accumulate vital force.

Irina: If we look at the shape, then a cell in the etheric matrix of any organ most often has an oval shape, the shape of an egg. And these 12 channels descend in a spiral manner. We can simply say that they have different colors. But different colors are just the perception of Irina's contactee. Because they just have slightly different vibrations. They descend from above this cell, down around this oval, and the energy of certain types of ether flows through them. What you call the ether is many different types of subtle energies. It's just that you usually don't call subtle structures energies. And we call them subtle energy.

Elena: Representatives of Indian pharmaceuticals who study the condition of human bodies use the term "nadi". Meaning, apparently, this is the connection of etheric channels with the physical body.

Irina: This is Burkhad's representative speaking.

In our country, the structure of the etheric matrices of each organ is taught in the subject "Energy structure of a humanoid" at school.

Elena: We can only dream about this.

Irina: Can you imagine if at school they study such spirals and how energy flows through them? How interesting is such a subject?

Elena: Yes, I would like to meet you. If not in elementary school, then at least a little later.

Irina: We can pass on this knowledge. For example, four of the twelve channels come from certain plasmoid civilizations, which you call elemental Spirits, elementals. The remaining eight come from the ancestral egregor, they are inherited from the etheric fields of the parents and, in turn, are charged with the ancestral egregors. The rest come from the Spirit itself. The initial pranic shell and the other three etheric energies of the Spirit itself come from his Spiritual heart, his Spiritual mind and his total energy shell.

Elena: Thank you very much. Go ahead.

41:28 Development of the Burkhad civilization.

Elena: To maintain stress resistance and stable hormonal balance in the body of earthlings, 5% of reptilian genes were introduced to them, correct?

Irina: Yes.

Elena: Now we want to check with the representatives of Burkhad, and maybe Disara. How did our anthropomorphic creators and other non-reptilian races achieve the same capabilities? Stress resistance and stability of hormonal balance.

Irina: Burkhad's representative speaks.

We evolved without hybridization naturally through evolution. And therefore, a certain possibility of developing the same characteristics as yours was already built into our bodies, but only in a natural way. Not through hybridization with reptilians, but by adapting to various changes in society, environmental changes through evolution. But I can say that at the initial stage of the formation of the Burkhadian civilization as an intelligent community, there were a lot of historical events that put the Burkhadian civilization under the threat of complete extinction as a result of global wars. This was long before the creation of the Interstellar Union.

Elena: I see. That is, this natural evolution, which allowed you to

achieve such qualities, apparently continued for quite a long time? Long period?

Irina: Yes, there was a long period. There was a period of unification of both the planet and various countries. This cannot be called a country in your understanding. In your opinion, this is rather an appanage principality. Unification, then certain uprisings on the outskirts of the appanage principality and the formation of a separate one from it, with one type of government or another, most often dictatorial. Well, the wars between them.

Elena: I see. With your permission, we now move on to the section that is associated with the so-called contacts. We called them “conditionally hidden”. But maybe they seem like that to us, but in fact for the specialists of the Interstellar Union or the Galactic Federation of Light this is not a revelation, as it is for us.

Irina: The fact is that here now there is just a representative of the planet Burkhad, who is a historian and who is a specialist of the Contacts Commission.

44:58 The influence of the civilization of the Ursa Minor constellation on the development of earthlings.

Elena: Great, then we turn first of all to this specialist. In particular, this applies to civilization in the constellation Ursa Minor. In our earthly sources it came across that this constellation, perhaps, as we said earlier, was part of the cooperation of scientists who were related to the post-war situation with the Aryan civilization. If so, please confirm. If not, we will drop the question.

Irina: In the constellation Ursa Minor there is a civilization that is part of the Interstellar Union. I don't know what it is called in Daraal language, but in Burkhadi language it is called Aelmakertash. In Daraal, the language in which Irina is named, she may sound completely different. This civilization is indeed part of the Interstellar Union, and it participated in shaping the conditions on planet Earth. But this was not genetic formation, but rather the teaching of different peoples how to build cities, how to cultivate the land, how to navigate by the stars.

That is, they were given basic knowledge so that they could survive in the material world. There was no point in giving any scientific knowledge about the structure of stars or the structure of atoms, because people had to go through the initial lessons of the formation of their civilization before engaging in science.

46:49 The origin of people with elongated skulls.

Elena: I see, thank you. Let's move on. A question has arisen that is also connected, on the one hand, with our raceology, and on the other hand, we have questions that we cannot answer. Archaeologists from different countries and at different times carried out excavations, for example, in Antarctica, Egypt, Bolivia, Russia, and France. And they found the remains of people with highly elongated skulls. In particular, the world community knows Queen Nefertiti, an Egyptian, her husband Pharaoh Akhenaten and their children, who are in the collection of the Berlin Museum.

So, what genetic lines are representatives of such civilizations, what are their missions, where did they come from? How did we get them?

Irina: By genotype, these are people, if we talk specifically about people with elongated skulls. If genetic testing showed that these are human remains. But why do they have elongated skulls? The fact is that some tribes, especially North Africa, Transcaucasia, and the southern shores of the Caspian Sea, had such traditions approximately 4000-4500 years ago. As a historian, I remember them.

When a child was born, he still had soft, pliable plates of the skull, more similar in composition to cartilaginous ones. The skull was fixed in a certain way in wooden structures so that as the bone structures grew, it lengthened.

Elena: I see. That is, these are some kind of manipulations with skulls, and not genetics.

Irina: Why do I remember this? Because representatives of the Interstellar Union reported about this to the Contacts Commission. And

we even recommended to our contactees that they stop this, prevent it. Because this practice caused abnormal brain development and severe headaches, intracranial hypertension.

We (meaning, our ancestors) asked those people who did this. I just know about this from the archives of the Interstellar Union, because I studied them as a historian regarding Earth and all these records remained there. It was found that earthlings do this to their children in order to make them like the gods who descended to them from the sky. Having studied local mythology, we came to the conclusion that in this way, from generation to generation, people passed on stories about certain races that arrived on Earth 7000-8500 years ago. They were representatives of one of the civilizations of Lyra, and they had elongated heads.

Elena: The etymology is clear.

Irina: They put some kind of wooden frames on the child. And then, when the children grew up, the shape of the skull remained that way.

Elena: But it’s interesting that this craze spread to completely different countries that had no contact with each other. Let’s say Antarctica, which was covered in snow, and at one time these representatives ended up there for some reason.

Irina: If we are talking about Antarctica and what was found under the ice there, it is clear that when there was no winter on Earth, then Antarctica, naturally, was not under the ice. Moreover, she was not in the place where she is now. This is a certain part (shows) of a single continent. Australia, Antarctica - they just went their separate ways later. But there, if you look under the ice, you will find coal deposits, oil deposits. This suggests that there was rich organic life there, which is no longer there - there inside, under this continent, under the ice, under the snow. It had a tropical climate, a rainforest, and certain people actually lived there.

And if you find these skulls there, then these are indeed representatives of either the representatives of the Lyrans themselves, or their descendants. Because, as I already said, in the period from 3

million to 12 thousand years ago they actively flew to Earth and, among other things, came into contact with earthlings.

52:36 Representatives of the Interstellar Union about the forms and reality of contacts by W. Tompkins.

Elena: It’s clear which “gods” the earthlings were guided by. OK, thank you. Let's move on to the next question, we're nearing completion.

There is such a famous contactee (now he has already moved to other worlds) - the American William Tompkins. And he claimed that he was a participant in the rather closed American Orion project for space exploration, including flights to the Moon. In it, as he claims, the “Nordic” civilization took an active scientific and technical part. Conventionally, he calls the “Nordics”, the constellation Taurus.

Is this project known to our historian, and is this civilization members of the Interstellar Union or the Galactic Federation of Light?

Irina: What kind of project? There were a lot of projects.

Elena: This is a military project for space exploration, let’s put it this way. It included flights to the moon. And this William Tompkins was directly the person who, according to his conferences, actively participated in the establishment of space communications.

Irina: I don’t understand what military project to fly to the moon you are talking about. Please clarify a little.

Elena: The project was civil. And he was part of the Orion project, which is a military project.

Irina: The purpose of this project?

Elena: Tompkins states quite clearly that these were direct contacts. In particular, with the civilization that helped them solve issues of various

kinds.

Irina: Very little data, in fact. We need to look in more detail. Perhaps he was a contactee who was part of some association of contactees or collaborated with intelligence services. Or acted in some other way. And only then they called it “Orion”.

Elena: The point is not in “Orion”, but in the fact that it emphasizes cooperation with this “Nordic” civilization of the Taurus constellation, which provided very active technical support in solving many issues that were funded through science as civilian projects.

Irina: If this is really the case, then you can easily find out what kind of civilization it was and where it came from, just by retelling the technical information that those aliens gave Tompkins. What technical project was created with its help?

Elena: For example, a flight to the moon. They actively participated in some issues that related to this interplanetary connection between the Earth and the Moon.

Irina: What Earth-Moon connection do you mean?

Elena: Technical communication that was maintained with the astronauts who landed on the Moon. It was necessary to solve technical issues, to make it of the highest quality, as we would say. And video communication too, so that you can study the interesting questions that have been outlined for the Moon.

Irina: Did they transmit certain radio waves or what?

Elena: Apparently, yes.

Irina: We are talking about certain radio waves, okay. The fact is that representatives of American military scientists and ordinary scientists who created the space industry (and in America it has always been and remains a military space industry; at the first stage of its formation

many contactees went there), contacted the civilizations of both the planets Tashig and Disaru , and Tumesout, and the planet Elshuar, which is a colony of Burkhad. There were many such planets.

Elena: I would like us to limit ourselves at this conference to only “yes” or “no” answers. Is this project and this civilization known?

Irina: Several civilizations are known in the constellation Taurus, but none of them had active contacts with earthlings. There were astral contacts, but no physical ones.

Elena: I see, okay.

Irina: Maybe those aliens were not from the constellation Taurus. Or it was an astral contact.

Elena: At least from his message in the video conference it is clear that this civilization was physically present.

Irina: You can be physically present, but make astral contact. For example, the representative of the planet Esler MidgasCaus: his physical body is now on Earth, at the base, and now he is present here in the Astral.

58:18 Representatives of the Interstellar Union about the possibility of earthlings living on the planet Serpo.

Elena: Quite possible. Okay, let's move on to the next question. He is also connected with the Americans. But maybe this project is known to the scientific community, the Association for the Study of Young Races.

We are talking about Americans living for 13 years (this was in the 70s) with representatives of one of the “gray” subraces - ebony from the planet Serpo. The star system of this planet is not indicated in the source, but it is said that it is a binary planet and that it has existed for 10 thousand years, and their mother planet is already 5 billion years

old. And these representatives of the “grays”, the ebony, have been visiting the Earth for approximately 2000 years. They live for about 800 years. As a result of this exchange of experience, the Americans stayed there for 13 years. The Ebens created the history of mankind in holographic symbols, called it the "Yellow Book" and handed it to them on a certain device that somewhat resembles our modern iPad.

We wanted to ask the scientists who are communicating with us today whether the history of the origin of humanity outlined in the “Yellow Book” correlates with data from the Interstellar Union? And is the Ebon civilization included in the Interstellar Union?

Irina: What you describe as “gray” – there are quite a lot of “gray” races.

Elena: They call them "ebony". I don't know.

Irina: What language, again? I don't know all the languages of the Galaxy.

Elena: They conveyed this in audio, as they call themselves.

Irina: Even more so. I don't know all the languages of the Galaxy. What is the "gray" race? They are a spacefaring race, a species of humanoids who have gray skin as seen by human eyes. There are quite a lot of such races. They are in different constellations, on different planets. There are both in the Galactic Federation of Light and in the Interstellar Union. If we take Kirchiton from the planet Daraal, formally in terms of skin color he is also considered “gray”, although he does not coincide with the Tashigans in structure.

Elena: We convey the information that we gleaned from sources. We just wanted to clarify if anything is known about this “Yellow Book”. Is this coordinated with the story of the origin of humanity from the Interstellar Union?

Irina: If this was physical contact (in which physical contactees fly with various aliens), then it most likely was with representatives of either

the planet Daraal or the planet Tashig. Because it is these two “gray” races that have been most actively in physical contact and are now in contact with people.

As for whether they gave them any book. As you know, according to the rules of the Interstellar Union, it is prohibited to transfer any objects for the safety of the contactee himself. Could the contactees themselves write this book based on their contacts, based on what was passed on to them? Of course they could.

Elena: Okay. But the very fact that they stayed on an alien planet for 13 years, not three hours, is interesting. Perhaps this civilization is not part of the Interstellar Union and is not subject to the laws and rules of the Interstellar Union.

Irina: You said it was in the 70s?

Elena: Yes, they returned from there in 1977.

Irina: If such a thing happened, the Contact Commission does not know it. Because none of the curators applied to place their contactees anywhere for 13 years. This requires a certain infrastructure that will provide earthlings with suitable living conditions. In any case, either the government of the planet or some humanoid fairly close to the government should know about this. Or it should be some kind of, by your standards, very rich private astronaut or space researcher who can transport contactees to some planet or base and create the necessary infrastructure for them there.

Perhaps someone needed this. We don't know anything about this. Because 13 years is a long time.

Elena: One can indeed conclude that this civilization is not a member of the Interstellar Union.

Irina: Perhaps civilization itself is a member of the Interstellar Union. But the fact is that there are many humanoids on the planets of the Interstellar Union. And they may consider it necessary to

independently carry out such a project as settling an earthling somewhere for 13 years. If he agrees, of course.

How could this happen? Yes, very simple. He could take permission to contact earthlings. At that time, this was not controlled as it is now by biorobots. He could take them there, but not tell the Interstellar Union Commission anything. Theoretically, this is possible. I just can't imagine why a curator would need this.

Elena: In a word, there were 12 of them. It was a whole group of Americans.

Irina: Even more so. The infrastructure needed to keep them off-terrestrial was not so simple. Everything had to be increased 12 times.

Elena: Yes, but it turns out, according to their description, they somehow coped with this task.

Irina: So someone needs it for something. No such project is known. Because if this had gone through the Interstellar Union Commission, all expenses for this operation would naturally have been reflected in special documents.

Elena: And the "Yellow Book" would appear in the electronic libraries of the Interstellar Union or something similar.

Irina: It's not even about the "Yellow Book". It would just be necessary to ensure conditions on Earth or close to them for 13 years. This is not one hour or two. It is necessary to take into account the composition of the atmosphere, humidity, gravity, and magnetic field. There is a lot that needs to be taken into account so that over a long period of time the human body, adapted to earthly conditions, can be absolutely harmonious. Because if harm is caused, this is already contrary to Spiritual laws.

Elena: According to the description, almost everyone returned, except for one person. But then they started having very serious health problems.

Irina: They could return in completely different states. We don't know what was there. And this is not reflected in the archive of the Interstellar Union. It’s just that if something like this really happened in the physical world, then I myself think about which curator, for what purpose, needed this. This is a fairly large-scale project – both in the spiritual sense and in the material sense.

Elena: Most likely, the initiative came from earthlings. According to the source it turns out like this. Okay, let's move on to the next question.

Irina: I understand, from earthlings. But not all curators I know support such an initiative.

Elena: According to the source, they somehow resolved the issue with both the atmosphere and food.

Irina: This is quite possible. You can at least keep them under a dome. But the question arises about the goals of the curators. Not contactees, but curators.

Elena: Actually, it’s difficult to find out from the source.

Irina: Just for the earthlings to live there for 13 years as guests, then bring them back - so what?

Elena: The fact is that civilization, from the point of view of technology, was in many ways ahead of earthlings. Therefore, probably, the interest was precisely of a scientific and technical nature.

Irina: Did the curators have a scientific and technical interest?

Elena: No, among earthlings.

Irina: What about the curators?

Elena: Perhaps they were considering issues of some form of coexistence. Some common spiritual issues that could be resolved together. Well, in the future, perhaps, scientific and technical cooperation.

Irina: Even if they created such a project, its results are unknown to us.

1:08:16 Representatives of the Interstellar Union about the woman from the reactor of the Chernobyl nuclear power plant.

Elena: Okay, let's move on to the next question. Thank you very much for your comments. We didn’t even expect such a detailed comment, thank you.

Next question, last one. He is also unusual. A woman appeared on Earth who called herself Dileya, Herodias. And in several of her interviews in Poland and the Czech Republic, she claims that she is a plasmoid entity that was born in a nuclear reactor at the time of the disaster at the Chernobyl nuclear power plant. She has transformed her body into a human-like one, and her diet is based on radioactive isotopes and the corresponding mushrooms and berries.

What could you say? What is behind this phenomenon?

Irina: Memories of a past life in a plasmoid civilization, I think. Her memories. They are perceived by her as reality, as if she now lives in this body. If she introduces herself as a plasmoid.

Elena: Yes, she says that she is a plasmoid. She was born at the time of the explosion at the Chernobyl nuclear power plant. This was the situation.

Irina: Perhaps she was somewhere nearby at the time of the explosion at the Chernobyl nuclear power plant.

Elena: In a nuclear reactor. This is the environment of her existence.

Irina: How old is this woman?

Elena: Now about forty years.

Irina: Where was she at the time of the explosion of this reactor?

Elena: At this reactor, she seemed to be in a subtle body.

Irina: Where was the dense body?

Elena: I don't know how to say it. Basically, somehow she got a dense body. Or her plasmoid form condensed and transformed into a human-like body.

Irina: Where did she appear?

Elena: She appeared not far from this disaster site. And the relevant services somehow eventually came to her attention and paid attention. In general, she was supervised for quite a long time. Because this is an unusual creature with an unusual blood composition, an unusual aura, and nutrition.

Irina: What documents did she have?

Elena: None.

Irina: Who did she call her parents?

Elena: There were none. She was placed in some kind of conditional family, from which she soon left when she became an adult.

Irina: How old was she at the time of her appearance?

Elena: At the time of appearance, where?

Irina: In a nuclear reactor.

Elena: Probably, in our understanding it was not a baby. Because when she materialized, it was already an entity that could adapt to our world, somehow be aware of its existence in it, but at the same time understand that this world was alien to it. And she has some kind of mission.

Irina: When she was found, how old was she?

Elena: It wasn't a baby. A child, but not a baby.

Irina: Three years, five years, ten - how old was she?

Elena: This interview does not say. It simply says that, relatively speaking, she was adopted by certain people who continued to live with her for some time. But these were strangers to her, as she says.

Irina: You need to talk to her yourself. Anything could be there, really.

Elena: Okay. It so happened that, having learned about this, I asked her to send some information about herself. And she eventually sent me a drawing with her aura. It must be said that this is a rather unusual situation. It’s called “Bioenergeticization of a Hundred Centers.”

Irina: I understand. But you need to talk to her. And let her ask questions herself if she wants.

Elena: Okay. The question concerned this phenomenon, since it is all connected with radiation: a woman “eats” radiation. She left Ukraine for the Czech Republic and was a specialist in radioactive treatment. She had patients, including from Germany, who received all possible medical care.

Irina: Elena, they expressed their opinion. What other question do you

have?

Elena: Okay. Then we close this topic of contact. Thanks a lot. We thank all the participants from Disaru, from Burkhad. And MidgasCausa personally. Because he is our main consultant in so many conferences. And I personally managed to communicate with him, as they say, in absentia. But I am very grateful to him for his very important, extremely professional recommendations. Thank you very much to all participants. Thank you very much to Irina, because without her participation it would be difficult for us to communicate.

Irina: Thank you, Elena. Thank you, dear viewers. Thank you for watching this conference. I hope you found it interesting. Until next time.

October 9, 2022

Conference participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Elena is an analyst;

Argelas Markish – representative of the planet Disaru, biogeneticist, genotyping and hybridization specialist;

MidgasKaus - representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms;

Tiar Paulon is a representative of the planet Burkhad, a specialist of the Commission for Contacts with Young Races, a historian.

#485 Events in the Solar System 12,000 years ago. Alien answers. Cassiopeia – Irina Podzorova.

https://blog.cassiopeia.center/8oKyXpDDhfY
https://www.youtube.com/watch?v=rPvqYyD0xgY

00:00 Start of video.

00:18 Background.

Voice-over: In the summer of 1999, a 13-year-old girl Irina Podzorova from the village of Peski near Voronezh agreed to take a short trip on a triangular-shaped ship with aliens from the constellation “Cassiopeia”.

Since then, for more than 20 years, representatives of the civilizations of the Interstellar Union of our Galaxy, which includes 117 of the 728 intelligent races present in it, have regularly come into contact with it.

01:50 The structure of the solar system 12,000 years ago.

Irina: Before the war 12,000 years ago with the Selbetians, the structure of the solar system was different. Not only the Earth, but also the solar system. What else? Venus and Earth were located closer to each other. Venus was a little further from the Sun, and the Earth was closer. The Moon was a planet between Mars and Earth. After Mars there was another planet, the size of which was slightly smaller than Mars, but larger than Mercury. By size I mean mass and diameter.

This was the location of the planets in the Solar System at the time of the discovery of your Solar System by the Tumesout cosmonauts. What I'm saying is from the Interstellar Union database. Every humanoid who wishes, naturally, can familiarize himself with it. It is open for study. And when they formed your species, when they moved some to Mars, some to Venus, they did terraforming there, the structure of the solar system remained the same. #41.

03:48 The beginning of the war in the solar system.

Irina: When the war began, a blow was struck first. Selbet ships flew to the solar system. On the planet, which was called Nibiru in Tumesout (it was between Mars and Jupiter, it was broken), there was the main base of the Tumesouts.

The Tumesoutians are one of the races who participated in your creation. Our Burkhad base was on the Moon. The Selbetites had bases on the Moon, Nibiru, Mars, and so on. Before the attack by warships, the Selbet government, under a plausible pretext, took out its specialists.

Naturally, it was not reported that an attack was being planned. The Selbetites flew to their planet so that their specialists would not be harmed. The attack began from the outskirts of the solar system and was sudden.

Before this everything was calm. People already lived on Mars, I mean earthlings. People lived on Venus and, naturally, on Earth.

When the ships attacked, there were quite a lot of them. They understood that if they destroy people, they will not be allowed to do it. Because there were bases with ships that could protect them. Therefore, some of the ships separated from the main mass and flew to Nibiru. To where the Tumesout bases were. Some flew to the Moon. And the rest - to Earth. Because there was a majority of humanity on Earth. And it was decided to strike the Earth. #41.

06:57 Destruction of the planet Nibiru.

Irina: The impact of the weapons was aimed first at the Tumesout bases on Nibiru. But this is not a colony. They didn't move residents there. Their specialists lived there. But, nevertheless, there was a large base there.

When the Selbetites hit the planet, they did not have time to protect it

from this blow. It shattered into what you see. For four large fragments. Meteorites that often fall to Earth are parts of the planet Nibiru. In your opinion, Phaeton. You later connected this event with a Greek war myth in which Phaeton was a character.

When the blow was struck, the planet began to fall apart, it did not instantly fly apart. Was destroyed. The instruments of other ships detected the release of weapon energy. They began to look for where it came from. We found a point in space. And the attack has already become obvious. They began to gather for defense.

There were no warships here. There were only research ones. They were not wearing weapons to protect the others. They realized that the Selbetites were attacking. Some of the ships flew to intercept in order to slightly delay the attackers. Realizing that they will be destroyed. Naturally, they sent a signal.

9:30 The closest was a warship that could protect. One ship, then several more appeared. These are from Psifau, which are near Sirius. "My world". They were sent from there to fly to protect.

9:30 The closest was a warship that could protect. One ship, then several more appeared. These are from Psifau, which are near Sirius. "My world". They were sent there to fly to protect. It took time to arrive. Everything happened instantly. Every second was precious. The weapon was powerful. #41.

10:10 Saving the inhabitants of Mars, Venus and Earth.

Irina: Some flew to intercept, and some flew to Venus and Earth in order to get people out in time. A battle has broken out in space. Those who flew to Venus put almost all the inhabitants on their ships. At the moment when they were being taken out, part of the Selbet ships reached the orbit of Mars. Not from the ecliptic, but a little higher.

Mars was on the other side of Earth. The Selbetites reached the orbit of Mars. Before them was the Earth. From the orbit of Mars, before reaching the Earth, they began to influence the Earth with weapons.

The weapon could operate at such a distance. There were already Tumesout and Burkhad ships on Earth that began to take people out. But they did not have time, and many people died. #41.

11:39 Gravity bombs and their impact on planet Earth.

Irina: The weapon looked like two gravity bombs. They were flying towards Earth. Physically they looked like white balls. They were attracted by the gravitational field of the planet and, approaching it, entered it. What you see happened. The continent split, volcanoes became active, earthquakes and floods began. Most of the people died. The impact was such that the Earth began to move away from the Sun in the direction opposite to the impact, slightly at an angle.

When she began to move away from the Sun, the Moon was on her way between Mars and Earth. It was necessary to remove the inhabitants from Mars at the same time.

13:18 By this time, warships had arrived from Sirius. The Selbetites had no time to stay on Mars. They had a couple of ships there, which began to fight with the arriving Tumesoutians and ours with Psifau (Psifou), who were in our world and with our military.

On the Burkhad ships they realized that the Earth could collide with the Moon. Both planets could fall apart. And then the Burkhad ships began to stop the Earth with their gravitational field. While they were stopping, a couple of Selbet ships, which remained outside the range of action of the arriving military, burned cities on Mars with a plasma beam that emits radiation. Almost no one was saved. Few of the Burkhadians or residents managed to take them out. #41.

14:46 A ship called Nibiru.

Irina: The ship that came to protect it had the shape of a ball. He was Tumesoutian. He was with Psifau (Psifeu), flew from there (then two more Tumesout ships).

It was later named Nibiru in honor of the lost planet. Why was it called

that? When he arrived, there was a battle in the region of this planet, and it was the first to die. Then the ship was named after the first planet to die in the solar system at the hands of the Selbetites. They named the ship, but there was also a planet. #41.

16:11 Mythology about the war with Selbet.

Irina: Then, when the Earth was more or less restored, people were resettled back to the planet. They didn't just resettle, but told about the essence of what was happening.

But how did people perceive it? Not like aliens. And as gods, because they flew from the sky. People interpreted it to mean that it was a war of the gods. When they were brought back, they were not told that they were attacked by reptilians. They were told in their terms: "You were attacked by snake-like creatures from which we protected you. And now our ship, which protected you, will fly to you after a certain period of time to guard you so that you will not be attacked again."

This was done to reassure them: they were being watched. Then in mythology, when modern nations were being formed, the story was told about the war and that they were brought. In the mythology of the Middle Eastern peoples, the concept was formed that there is a planet Nibiru, from which the god Marduk flies. The one who destroyed Tiamat. Serpent symbol. Through mythology, they began to pass on the history of the war to their children in images that were closer to them. #41.

18:33 Tiamat. The war with Selbet from the point of view of an earthling.

Pavel: What is Tiamat?

Irina: This is a symbol of the snake-like creatures with which Marduk fought from Nibiru. If you read mythology, you will find it. They explained it in an understandable form for the ancients. Of course, it's not a war that the Selbetites attacked, but "we protected you as best we could." The myths were told in a form they could perceive. To

transfer experience. That there was a war with such and such a race, and “in the future we will protect you from it.” So that they are not afraid.

Because for many survivors it was a shock. They lived on the land, minding their own business. And suddenly a glow appears in the sky, from which, looking up, many immediately went blind. Because there was radiation. Then there was an explosion, from which many died. Then the Earth began to move away. And then, when they were brought to Earth by those who saved them, they saw for the first time that it was snowing. They had never known winter before; the climate was different. This was also a shock for them.

It was necessary to form an idea of what happened. The specialists who worked at that time, in those critical conditions, made this decision. #41.

20:13 Earth and solar system before the war with Selbet.

Irina: And one more important question. All these thousands of years you have been asking about what happened on Earth. There was a civilization that lived. Cities were built, there were rulers. But they developed under the auspices of extraterrestrial civilizations. At that time, the solar system had a completely different appearance than it had before the war. That is, for example, there was a planet between Mars and Jupiter. The Moon has not been seen on Earth. The Moon was also a planet between Mars and Earth.

Alexander: Inhabited?

Irina: There were mostly bases there. It was rebuilt inside. There is a base underground. There are many living beings. Of course, conditions have been created for them.

Alexander: Underground?

Irina: By lunar soil, I mean, under the surface. The Earth was a little closer to the Sun. Venus was a little further from the Sun. They rotated

in other orbits. Not quite in the ecliptic plane. Thanks to this, the climate on Earth was different. For example, there was no winter.

Alexander: Were the continents as one?

Irina: One, yes. There was a single continent.

Alexander: Why did this happen?

Irina: This happened because of the war. I'll tell you now. All these civilizations lived and developed. They had a single language, a single culture. They developed both in contact with aliens and plasmoids. All the people. They multiplied.

21:59 Reasons for the Selbet attack on Earth.

Irina: The Selbet people have not reached an understanding on the issue of genetic superiority. They wanted to contribute more than five percent to our race. An attempt was made to destroy the human race, first through deception. In your sacred scripture, in the Bible, they came under the symbol of the “serpent”, which gives the apple. By serpent we mean Selbet. But this attempt failed. Nothing came of it.

Alexander: What was opposed?

Irina: There was a story that would take a long time to tell. If you're interested, you can find the materials. They are in the VKontakte group. This was approximately 200,000 years ago according to your calendar.

On Venus and Mars there were conditions similar to those on Earth. Thanks to a different form of address, a different atmosphere. It was decided to move some of the earthlings there so that they would occupy the entire solar system. There was more space, more conditions for development.

Alexander: So, life on Earth originally originated on Mars?

Irina: No. Initially, life was on Earth. Then it was transferred to Venus and Mars. There were other conditions. There was no such heat on Venus; the atmosphere was breathable. There were other conditions. After the war everything changed.

Alexander: Oceans, forests?

Irina: There were, yes. Then they evaporated, disappeared on Venus and Mars. About 200,000 years ago, scientists of the Interstellar Union transported approximately 20 thousand people each to Venus and Mars. They built cities there. Naturally, people perceived them not as aliens, but as gods. In their understanding. They did not have space flights, and they did not develop in this direction. They walked the path of merging with nature. This was the way of development of civilization then. With plasmoids, not technical yet. Because we have not yet traveled the natural path. Civilization has not passed.

But 12,000 years ago, a group came to power on Selbet that was sharply opposed to the Burkhadians, one of your creators. The planet Burhad is now the capital of the Interstellar Union. On Selbet, the planet of reptilians, a group came to power and a war began in the Galaxy. The civilization of Sirius, which participated in this war, also suffered. Then war came to the solar system, and the Selbetians attacked Earth. The land was then considered a colony of Burkhad. And not just a colony of Burkhad, but a hybrid civilization. The government of Selbet started a war to destroy the creatures, and there were reasons for this.

25:43 The war with Selbet and its consequences.

Alexander: What happened?

Irina: There was a war.

Alexander: What did she look like?

Irina: The Selbetites used weapons that change the orbits of planets. There is such a weapon. From this weapon the continent was split into pieces. The Earth began to move further from the Sun. Then the Moon appeared, which almost collided as a result of the movement. It's good that Burkhad's ships stopped the movement of the planets with their gravitational field and set the Moon in the orbit in which it is now. That is why the Moon is turned to the Earth on one side. Because there was interference. They placed it in such a position that it would not rotate around itself like the Earth.

After the outbreak of hostilities, many people died. The ships began a rescue operation in parallel with the fight against the Selbetites. First, about ten thousand people were taken to Mars, then to the Moon. This was included in your mythological systems under the name of the Great Flood. It is in all religions, as far as I know, mythologies under one name or another. The Great Catastrophe or the Great Flood. Almost everyone from Venus was rescued. They managed to be transported on ships to another planet even before the Selbet people turned Venus into what you see now. That is, the Selbetites created the atmosphere with special chemical weapons.

They also used a weapon that moved it closer to the Sun. The greenhouse effect appeared and it became unsuitable for life. But the inhabitants of Venus, who were genetic earthlings, were taken to a planet in the constellation Hercules, which we call Disara. She is now part of the Interstellar Union, her representatives are visiting Earth. They are your direct genetic descendants. That is, outwardly you are almost indistinguishable. If a representative of Disara is dressed in earthling clothes and taught the language, no one will recognize that he is an alien. They are practically the same.

Alexander: How many planets are included in the Union?

Irina: At this point in time, 116 planets are included in the Interstellar Union.

Mars was also completely destroyed. There was a very big battle that captured that planet, which you later called Phaethon. It was destroyed and a ring of asteroids appeared. Mars has lost most of its atmosphere. One tenth of it remained from the use of weapons. The

water of the oceans evaporated and the planet began to move further from the Sun. Mars has also experienced changes in its magnetic fields. It has become the place you know it.

Due to hostilities, Selbet was excluded from the Interstellar Union for 250 Earth years. And it was turned on again only when another group came to power, which overthrew and punished all those responsible for the attack on your race. #33.

29:53 Changes on planet Earth after the war with Selbet.

Irina: Another important addition. As I already said, conditions on Earth were different before and after the war. The atmosphere, magnetic fields, and climate were slightly different. After the war, radiation was reduced using special devices. Residual manifestations of harder radiations have been removed.

And when they brought the remaining survivors to Earth so that they could later populate their world, they realized that conditions had changed. That is, the climate has changed, the tilt of the earth’s axis that you see today, that ecliptic, has appeared. The moon appeared.

Everything began to change. Disasters continued. The weapon affected the earth's core, causing heating and subsequent activation of all volcanoes. There was a lot going on there. And, in the end, the Earth took on its familiar form with the cold season, with seas and oceans, and the magnetic energy fields changed. #33.

31:13 Change in the genotype of earthlings after the war 12,000 years ago.

Irina: The decision was made to slightly change your genotype so that you could survive on this planet.

Alexander: How did they do it?

Irina: Before the war, as I said, there were 35% of Burkhadian genes.

Burkhadians are not consumers of what we now call animal protein. They don't eat animals. Such a civilization. And the genotype that was introduced did not allow your people to absorb protein. And since conditions on the planet have changed, it was decided to switch you to a different diet. You ate a dairy-plant diet. The man saw that there were predators. He could eat the animal, but it would harm him.

Alexander: He still brings it now.

Irina: Now I will explain everything. There were no enzymes. Why were there no enzymes? Because those genes and chromosomes that encode this protein were not introduced into your genotype. Any enzyme is a protein. It depends on DNA. After the war, when the climate and the energetic magnetic characteristics of the planet changed, biologists decided that you need to change your diet, switch to protein. This is reflected in various scriptures.

How was this change made? Two of your creators, the Tumesoutians and the Selbetians, had animal nutrition and had the necessary enzymes. But for obvious reasons, they did not increase the reptilian genes. Because it wouldn't lead to anything. Therefore, the genes of the Burkhadians were reduced by 5%. That is, instead of 35%, it became 30% of the Burkhadian genotype. And the genotype of the Tumesoutians, as one of the representatives of anthropomorphs who had the appropriate structure of the digestive organs and who could eat what you call animal protein, was changed by 5%.

That is, at the moment in your genotype there are 45% primate genes, 5% Selbetians, 30% Burkhadians and 20% Tumesoutians. This is what transformed you from being a plant eater to being an omnivore. Without this change, your civilization would not have survived at that time. This is how everything has remained until today. Of course, there were big changes in metabolism, but in the end it all worked out. #33.

34:48 Global war in the solar system.

Irina: When the time came, 12 thousand years ago a catastrophe occurred, which is usually called a global war in the solar system. The culprits of this event were again the representatives of Selbet.

Maxim: Selbet are the ones who forced you to eat the apples in the garden.

Irina: Yes. What happened there? A political party came to power in Selbet, which was sharply opposed to the representatives of Burhad, one of our creators. The land was then considered a colony of Burkhad. That is, we are their creations. The war began not on Earth, but far in the Galaxy.

A few years later, representatives of Selbet attacked the solar system. That is, on the colonies that existed here. These were Earth, Venus and Mars, where our ancestors lived. They attacked suddenly in order to change the entire solar system and turn it into what we see now. They destroyed the main base of the Burkhadians, which was between Mars and Jupiter. A planet whose fragments we now see as an asteroid belt. We call it Phaeton.

Maxim: That is, there used to be a planet Phaeton, which was destroyed in this war. And now this planet is attracted by Jupiter, this is the ring of Jupiter. This is a former planet that was destroyed.

Irina: The asteroid belt in our solar system is located between Mars and Jupiter, it consists of debris from that planet.

The Selbetites attacked suddenly. We had no guard posts in our solar system because no one was expecting an attack. Everything was open then, in order. The ships flew from the direction of the Galaxy and split into several combat formations. That is, some flew towards Mars, others to Earth, and others to the point in space where Venus was.

First they destroyed Mars. They had energy weapons that could completely blow away the atmosphere and turn oceans of water into steam. They had these types of weapons. The Burkhadians and Tumesoutians, who were on the ships at that moment, naturally came to the defense of the earthlings and everyone else. Some of them began to save people who were on planets that were exposed to weapons, for example, Venus. The Selbetites released gas and used chemical weapons, because of which people began to die.

Maxim: Were the people on Venus destroyed by Selbet chemical weapons?

Irina: The Burkhadians managed to land their ship. Almost everyone was taken to another planet, although there were some who died. To a planet in the constellation of Hercules called Disaru. And now the descendants of earthlings live on this planet. In appearance, they are practically no different from us. They are part of the Interstellar Union. They have contactees on Earth. They are our height, build, etc. If we give them clothes that match ours and teach them the language, then we will not distinguish them.

Question: What is it called?

Irina: Disaru. #18.

August 27, 2022.

Participants:

Irina Podzorova is a contactee with extraterrestrial civilizations, subtle-material civilizations and the Spiritual world.

#18

Raom Tiyan is a representative of the planet Burhad, a specialist in energy interactions in the environment of the material and Spiritual world and the transformation of various energies;

MidgasKaus - representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms;

LiShioni is a representative of the planet Shimor, a specialist in the astral world and its interactions with the material world;

Siomoni is a representative of the planet Gihor, a specialist in the creation and management of external energy fields for use for healing and increasing vibrations and other needs of cosmic energy;

Maxim Rusan is the head of the CASSIOPEIA Project and the Center for Spiritual and Physical Development.

#33

MidgasKaus - representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms;

LiShioni is a representative of the planet Shimor (the birthplace of Krishna), a specialist in the astral world and its interactions with the material world;

Alexander is a follower of the Hare Krishna movement.

#41

Ashtar Sheran – head of the space fleet of the Galactic Federation of Light;

Raom Tiyan is a representative of the planet Burhad, a specialist in energy interactions in the environment of the material and Spiritual world and the transformation of various energies;

MidgasKaus - representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms;

Pavel is the administrator of the alien group Mitya;

Maxim Rusan is the head of the CASSIOPEIA Project and the Center for Spiritual and Physical Development.

#469 Alien bases on Earth, Moon, Mars. Question answer

https://blog.cassiopeia.center/inoplanetnye-bazy-na-zemle-lune-marse-vopros-otvet
https://www.youtube.com/watch?v=na9coyXpuOo

0:00 Start of video.

00:01 Moon base.

Irina: I say: “Where are we?” He replies: “This is a lunar base. This cave has already established a normal temperature and atmosphere. We don’t have to wear protective gear.” We didn't walk on the surface. We were right there. We left. It was light there too. Again, there were no lights, but it was light. The walls were stone, it was clearly visible: the floor was stone, the walls. Air. It was pretty cool, I remember. A huge cave, the ceiling is very high, probably 20 meters.

Surprised by this feeling, I began to jump. And when I jumped, I was even higher than Kirchiton. And I was surprised myself.

Question from the audience: Was there such an attraction?

Irina: Yes. I was surprised myself that this happened. Kirchiton says: “Let’s go.” We went to the wall. There's a round cave there. When we approached, I saw that the brown door was built right into the wall. When we approached, she lowered herself down.

We passed, the narrow corridor turns (shows). And the doors on both sides are black. We entered the second one from the right. He opened the door, we entered and again found ourselves in a room in which there were no corners, it was oval (shows). And its walls were not stone, not gray, like in the cave and the corridor, but greenish - such a

greenish tint. And in this room there was a table. Without legs - as one whole with the floor, it rose from the floor, about the height of my chest. Brown.

There was another Daraalian there, like Kirchiton in appearance. And Kirchiton turns to me and says: “Do you agree to be our contactee?”

02:32 Selbet bases on Earth.

(Fragment from video #32 Sensation! Dialogue with a Reptilian from the planet Selbet from the constellation Canes Venatici)

Maxim: Do you have bases on Earth and under the Earth?

Irina: (Te Per Hredours) No. There are no bases on the Earth or under the Earth in the possession of Selbet at the present time.

02:42 Tashiga bases on Earth.

(Fragment from video #34 Sensation. Dialogue with Gray - a representative of the planet Tashig from the constellation Northern Crown)

Maxim: Do you have a base on Earth?

Irina: (Ari Shen Puros) Yes. Today we have 83 bases on your planet. The closest one to you (it is not our largest base) is located in the Trans-Ili Alatau region.

Maxim: Around what?

Irina: (Ari Shen Puros) Alatau. There are such mountains near Almaty. And the Ili River.

Maxim: Do you have bases on the North American continent?

Irina: (Ari Shen Puros) Yes, but I just named the one closest to you. And on the North American continent - in northern California. There's a former base there. We were there too, but it wasn’t just our base there. Some of our colonies were there, then we were. Now it doesn't work, it's abandoned. They now have their main base in California.

Maxim: Main base in California?

Irina: (Ari Shen Puros) In the north. Not far from the Pacific Ocean.

03:58 Insectoid bases.

(Fragment from video #35 Contact with an insectoid, a representative of the planet Sho-Hariki from the constellation Pegasus)

Maxim: Do you have bases on Earth?

Irina: (Shpa-A-Shi) No. Not on Earth.

Maxim: You don’t have contactees on Earth?

Irina: (Shpa-A-Shi) There are contactors, but there are no bases.

Maxim: And on the Moon?

Irina: (Shpa-A-Shi) No. Our closest base is on what you call Mars. Under the ground (what is this point?). 200 km from the North Pole. I don’t know what kind of point this is (I showed it on Mars).

04:32 Alien bases in Central Asia and the Urals.

(Excerpt from video #?)

Irina: (LiShioni) In Kyrgyzstan, there are bases in Central Asia. There are alien bases in Central Asia.

Question: Are there bases of Arcturus representatives in the Urals?

Irina: (LiSioni) Yes (shows the dot). This is rather the Northern Urals, there is a base there not of the Arcturians, but of the planet Shimor. This is Andromeda.

05:04 Alien bases in Lithuania and Belarus.

Maxim: Are there bases of the Interstellar Union (IC) in Belarus?

Irina: (LiSioni) There are three bases. One is Burkhad, the second is Tikht, the third is Laori from the Pleiades System (she is not an MC, but they allowed her to exist).

They showed it to me now, but I can’t figure it out without a map.

Maxim: Are there alien bases in Lithuania? And we won’t say where. Can we tell if they exist or not?

Irina: (LiShioni) There is one in the Baltic Sea, but not on the territory of Lithuania. They are in the sea, underwater (show), somewhere in the north.

05:53 Alien base in Antarctica.

Guest: There is a widespread interesting version that on the continent of Antarctica there is an alien base that is currently operating, which was rediscovered (or occupied) by representatives of Nazi Germany back then. The so-called "New Swabia". Can you comment anything on this? Does such an object really exist? What civilization works on it, if it really exists?

Irina: (LiShioni) They didn’t take it. They were there, they set up their bunker there. Not exactly a base, but a small bunker. The alien base is much older. It still exists there. She belongs to the Galactic Federation of Light (GFL), Futissa's main representative there. And there are also from MS - Tashig and Burkhad. It belongs to these three civilizations, it is quite a large base.

But any civilizations that are conducting research can fly to it, even those not included in the MS. It is open to everyone, like almost any base in the solar system. Because the MS and the State Fiscal Service have a rule according to which a base on another planet not included in the MS can, if necessary, be visited by any ship for scientific, research or tourism purposes.

07:30 Alien base in Altai. Fenugreek.

Irina: (LiShioni) In general, the original origin of this word came from the name of an alien base, by the way, which is still located in Southern Altai. Under the ground between the bases there are tunnels, in your opinion - dug spaces for the movement of ships. This base was originally created about 10,000 years ago. Not immediately after the war, but after 800-1000 years.

It began to be created after the war with the Selbetites. And the Eslerites took a big part in its creation. In Esler's language, "Shampa" is the capital of Esler. The city is so big, like Esler's. There is also a word in the Eslerian language, “loa,” which means “alien.” And those Eslerites who built a base there, they came into contact with the local population, who then became the priests of the emerging religious cults. When these priests asked the newcomers where they came from, some answered in their own language: “A stranger from Champa Loa,” not from Esler, but named their capital, where they lived, in this city. Many priests were taken to this base (they were also contactees).

And then they began to call: “We were in Champaleau, where the aliens live.” Then they wrote it down and began to say: “Chamboli” - in their ancient language. This is the “Country of the Gods”, so to speak. They didn't call them researchers. They called them Gods.

In the future and now, at the present time, this base belongs to different civilizations. There are a lot of them. There are Burkhadians, Tumesoutians, Eslerians, and Tikhtians - many people live there now. It is still a functioning, very ancient base.

10:03 Functioning of alien bases.

Maxim Bronevsky: Are there bases of civilizations on Earth that are not part of the MS, including civilizations from other galaxies? Or just MS databases?

Irina: (LiShioni) There are MS bases on Earth, but they can, naturally, contain representatives of any civilization that has received permission to be on these bases.

Maxim Bronevsky: Basically, how does it turn out: do they use MS bases or are there cases when they build their own base so that they can fly there?

Irina: (LiShioni) When they received permission to work on Earth, there is no such need to build their own separate base, since they usually immediately submit a request to work together. They are given some place, because, in reality, enough bases have already been built both on your planet and on the Moon, including not all of them operational, there are also abandoned ones.

Naturally, if the MS says: “We don’t have space, build your base,” indicates a place, and so on, then they will be forced to start research, if they don’t want to fly here every time, to build something of their own. But so far there have been no such cases.

Maxim Bronevsky: Such a question. What is the rental fee for the base premises? Or is it provided for free?

Irina: (LiShioni) Again, depending on what purposes. For research purposes, the space is provided free of charge by the Scientific Community of the Galaxy, but on the condition that they share the results of their research with the MS.

Maxim Bronevsky: It turns out that there are different versions of the agreements?

Irina: (LiSioni) Yes. If these are some kind of tourist ones - for example, bases to bring tourists here from regions of the Galaxy - then, naturally, since tourists pay for their stay here, then some percentage (as far as I remember, about 25%-30%) goes to the MS . From every tourist. If this civilization does not belong to the MS, another civilization.

12:48 Underwater alien bases.

Maxim Bronevsky: The following information is often found in ufological materials (especially during the USSR this was popular, the military recorded it) when a ship (or submarine) is stationed in the Indian Ocean far from the shore - the spaceship emerges from the water and flies into space. There is an opinion that there are also many alien bases under water, is this true?

Irina: (LiShioni) Yes, there are bases underwater. Representatives of the planet Disnit especially like to build bases underwater, since their planet has entire underwater cities. They have very well developed construction technologies in these places under pressure, on the bottom, in water, etc.

Maxim Bronevsky: Do they use special materials for this?

Irina: (LiShioni) Yes, these are special materials.

Maxim Bronevsky: Could these be some kind of transparent domes (as someone said) under water?

Irina: (LiShioni) They may not be transparent, they can be (shows) like balls.

Maxim Bronevsky: Spherical, it turns out.

Irina: Their walls are thick. They consist of... I don't know what kind of material it is (LiScioni shows): it's both metal and ceramic.

Maxim Bronevsky: It's clear, he can withstand pressure. And some other processes.

Irina: Like metal, I don't know what metal ceramics are.

Maxim Bronevsky: I understand.

Irina: I don't. MidgasCaus says: "I'll show you in the Astral Plane."

Maxim Bronevsky: It turns out that they are building underwater bases at that depth so that our people do not reach them, right? So as not to be violated?

Irina: (LiShioni) Underwater bases are convenient because, indeed, your military does not have access there. You have, of course, submarines. But alien bases are usually built in places where they do not sail. Even if a submarine lands there, the base can not only camouflage itself, but also send a signal to the people on the submarine such that they will turn back.

15:27 Alien bases in Israel.

Maxim: Are there alien bases in Israel?

Irina: (MidgasCaus) Of course there is. And not alone. One is very close to Jerusalem.

Maxim: Irina, are you tired?

Irina: No.

Maxim: They say it's time to finish.

15:46 Alien bases on the Moon and Mars.

Irina: (MidgasKaus) As you know, there is a base of 18 civilizations. There is an entrance on the far side of the Moon. The Tashigan sector of the base is represented by a Tashigan man, whom I asked to come today in an astral body by the time Maxim announced. He agreed to come and answer questions.

As for the Martian bases. Under the soil of Mars there are bases of representatives of both Burkhad, Disaru, and Selbet. I also asked the Selbet department of the base on Mars to send a representative. I don't think it will be their manager, but someone from their department will come. Selbet is a reptilian planet.

13.07.2022

Excerpts from various videos

Conference participants:

Irina Podzorova – contactor with alien civilizations;

Maxim Rusan – head of the CASSIOPEA Project and the Center for Spiritual and Physical Development;

Maxim Bronevsky – head of the contactee and ufological center “Contactee CASSIOPEIA”;

MidgasKaus - representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms;

LiShioni is a representative of the planet Shimor, a specialist in the astral world and its interactions with the material world;

Te Per Hredours – representative of the planet Selbet, biologist, ecologist, transformer of genetic information in the cells of reptilian-type humanoids; specialist in genetic alterations and experiments on Earth-like planets;

Henri Cher Puros – representative of the planet Tashig, biotechnologist, ecologist, specialist in the study of earthly contactees;

Shpa-A-Shi – representative of the planet Sho-Hariki, specialist in contacts with anthropomorphic races;

Guests, audience.

#478 How was the Sahara formed? Paradise life in Eden. ALIENS ANSWERS. Cassiopeia – Irina Podzorova.

https://blog.cassiopeia.center/kak-obrazovalas-sahara-rajskaya-zhizn-v-ehdeme-otv
https://www.youtube.com/watch?v=n7rsvzSEVAw

00:00 Start of video.

00:02 Alien base “Eden”.

(Fragment from video #18 Who created man? The history of our civilization and planet Earth. Is the tempting serpent a reptilian? Fragment time code 32:37)

Irina: (MidgasKaus) And in the place where the Mediterranean Sea is now located (it didn't exist then, it appeared after the war, 12 thousand years ago), closer to today's Turkey, there was a base - just the central base where they created us, our ancestors

Maxim: This is what we call heaven, right?

Irina: (MidgasCaus) Eden. "Eden" in Hebrew means "garden". Indeed, there was not just a scientific base there, there was also what they now call a "testing ground" - for training our ancestors.

00:51 Formation of the Sahara Desert.

(Fragment from video #76 Live broadcast with contactee Irina Podzorova. Pineal gland, Higher self, ayahuasca, levitation. Fragment time code 14:47)

Maxim: Meade is not a historian, but he...

Irina: (MidgasCaus) As a result of the war. Because this territory was right around the base, which is now at the bottom of the Mediterranean Sea, closer to the shores of Turkey, which was called Eden.

Maxim: What kind of war, please specify?

Irina: (MidgasKaus) Which was 12,000 years ago. There, under this desert, there was the territory of a large garden, a large Eden. Not the whole area was like the tropics now at that time. And as a result of the war and the splitting of the earth's crust, this sand was deposited, it seemed to burst out of the ground and covered everything. The result of the explosions of war. Therefore, nothing grows there now, and the water lies very deep.

#491 Live broadcast. Schizoteric esotericism with Archangel Michael.

https://blog.cassiopeia.center/pryamoj-ehfir-shizoterichnaya-ehzoterika-s-arhange
https://www.youtube.com/watch?v=QEuliITA6fk

00:00 Start of video.

00:02 Opening speech by the leader. News from the Cassiopeia project.

Maxim: Great, we're on the air! Dear friends, hello everyone! We will have a very interesting broadcast today. We didn't just come up with the name: "Schizoteric esotericism with Archangel Michael." Today, at the request of Irina and I, Archangel Michael and LiShioni from the planet Shimor are present here.

I want to start by saying that our last live broadcast caused a lot of

indignation. And you know, I probably agree with you. The last broadcast was quite open, direct, and honest. I would like to remind everyone that we carried it out as Irina Podzorova and Rusan Maxim - not as Project leaders, but as living, normal people. They answered questions simply and normally. And our task was to be honest with you.

And you and I were absolutely honest, we didn't hide anything. Yes, of course, the emotions that arise in ordinary people are not alien to us either. And the last broadcast was quite emotional.

Before we continue: I always make an announcement before the broadcast of our new events, new events. And I want to tell you about one of the events that will take place. This is a unique Pillar Tree method taught by Master Alleyya. She organizes on-site training two-day events: from October 1 to 2 in the city of Omsk, and from October 8 to 9 in Kazan.

The method is very interesting. I think that when you get into training, you will understand why it is interesting! Therefore, I recommend everyone to take this training so that later you can help people.

Sign up for the Pillar Tree by phone: +7-988-910-0040. Specialist Elena, she will sign you up.

And the most important thing. We are preparing a grand, large-scale retreat for the entire Cassiopeia Health Center, along with a training program from Irina Podzorova and the head of the Mental Healing Project, Ilya Alexandrov. This event will take place from September 27 to October 3 in the city of Krasnodar. This is 4 days of training, and all days will be hosted by Center specialists.

What kind of specialists? This is Nadezhda Viktorovna, a doctor of the highest category, who works on Oberon equipment; Ilya Alexandrov - he will receive "Crownoscope" and "Aurabuk" equipment (you can see your entire etheric fields, energy, auric structures on them); plus, a specialist on the Higher Self, Alexey Morozov, is traveling with us, our little Buddha, who is constantly in the spiritual channel (with him you can get to know your Higher Self); Alexey Shuvalov is a wonderful

specialist, a visceral therapist in three different areas; he sees with his hands the organs, your inner body and can bring them to an adequate, harmonious state. Plus, Yulia Kulagina, a specialist in bioenergy massage, is coming with us with a new technique for reaching the Higher Self through the development of physical blocks, through bioenergy massage.

In general, the retreat will be very interesting, there are 12 places left. Hurry up, those who didn't have time to get to us! The number of places is limited and we will not be able to accommodate everyone. And the most important thing is that by visiting this retreat, you will be able to get an appointment with Irina Podzorova - either offline or then online. Everything will depend on your internal request and the need to build contact with your Curators and Mentors. But we'll talk about this later when we meet. And, accordingly, I will personally keep an appointment with Irina.

Among the upcoming events are these. And let's continue our live broadcast, right, Irish?

06:04 Presentation of broadcast participants. Viewer reaction to the previous broadcast.

Irina: Yes. Hello, dear friends! Good evening! Today we have a topic: everything about esotericism. You can ask questions about its contradictions with science. Why don’t science and government agencies often accept esotericism? Why don’t your relatives accept some esoteric teachings? And in general, are there many mental pathologies in esotericism? Everything on this topic.

LiSioni is present here, he is a specialist in astral interactions and has been studying earthly esoteric teachings for a very long time. He is the Curator of many contactees and our Project. Also present here is Archangel Michael, who is the Spiritual Patron of planet Earth, as well as the Guardian-Patron of the Christian religious egregor and is very familiar with the egregor of esotericism. He is a disembodied Spirit now. They greet you. So we are waiting for questions.

Maxim: The most interesting thing. After the last broadcast, we

discovered a fairly large number of interesting videos in support of our position. I want to tell everyone that today we are on this live broadcast not just as Rusan Maxim and Irina Podzorova, but I as the head of the Project and founder, and Irina as the founder of the Cassiopeia Project. Therefore, you can ask all questions not just as people, but as the leaders and founders of this Project.

Irina: Where to ask questions? Probably in the chat, because when the two of us broadcast together, we cannot read the Telegram channel at the same time.

Maxim: Therefore, today all questions will be in the chat of the YouTube channel.

So here it is. A lot of people wrote that they were disappointed in us and in other Projects, and that someone was washing each other's bones, etc. I will tell you that we as a Project generally have a negative attitude towards discussing other Projects. But in the last broadcast I spoke personally, as a person. And today I would like to respond to some videos that were made in response to us by some esotericists who consider themselves Teachers who give advice to people. Although giving advice is absolutely destructive, and the person who gives this advice will be responsible for each advice.

09:08 Did the project of uniting contactees fail?

Maxim: I'll probably start with Yura (meaning Yuri Fidrya).

Yura, you know, I watched your videos, and I'll honestly say: respect to you in general! You are handsome! You said everything absolutely correctly. We ourselves have created all the situations we find ourselves in; all situations around us reflect us. And for us, this situation is another opportunity to harmonize in our growth and development. But you said such an interesting thing that the Higher Powers told you that the project of uniting contactees had failed. Yura, I want to upset you: the project of uniting contactees is being implemented in the Cassiopeia Project!

For everyone who is not familiar with us, I want to tell you a little about our Project. Our Project unites a huge number of different directions in esotericism. One of the areas is “Cosmoenergetics”. We have a separate direction of cosmoenergetics under the Cassiopeia Project, and in this Project there are already more than 500 students from our wonderful Master of Cosmoenergetics - Ivan Yonten, and his assistant Natalia. And all cosmoenergetics work on the condition of donation. Everyone who was ready to join on these terms is working with us.

Next is the Cosmohealing Project. Guzel Malyarova is a wonderful Master, she is a conductor of the energies of the Intergalactic Medical Service. She also already has her own students, followers, she runs her own schools. I will say that there are a large number of students who are under Project Cassiopeia.

Plus the MentalHealing Project. This is a Project that combines esotericism and psychology. And it includes not only contactees, but people who are simply interested in psychology. There are already more than 500 students there too.

Plus we have the “In the Flow” School, master Alleya, which is also under the “Cassiopeia” Project. And in a single impulse we try to bring awareness of perception and new information to people.

In addition to these Projects, we also have the “Sacral” School, which includes a huge number of Masters. It also works on condition of donation. And at the Sacral School we have teachers who did not undergo harmonization and training in the Cassiopeia Project.

Irina: We have more news!

Maxim: Guys, I completely forgot! There's more great news! We have opened a new esoteric astro-numerological portal. And now all interested people who want to receive numerological, astrological calculations and their interpretation can also do this for a donation.

Therefore, Yura, if your Higher Powers said that the project of uniting contactees has failed, then these are definitely not our Higher Powers.

Because our Higher Powers are trying to unite all contactees on this planet in different Schools, in different directions, under a single Project “Cassiopeia”, which will always transmit spiritual knowledge only on condition of donation.

But your video gave me respect for you. Well done! What you say is correct. But in addition to what you say, you also need to do it. When you become older and wiser, I am sure you will become a good Master, a good Teacher. But only when you learn not just to speak, but also to do what you say. Therefore, Yura, I wish you the Light of true Love, I wish you all the best! God truly sees everything, shapes everything, so your growth and development! Grow and develop. Not in our Project, on its own - do as you feel comfortable.

Irina: Yura, I also talked about you, I told it like it is. This was my personal opinion about interacting with you. You were at our retreat, then we talked for a long time, and, in fact, I expressed everything that was in my heart and told the truth. I didn’t mean to offend you in any way, and I apologize to the best of my ability if it happened unintentionally.

Why did I say that? You insist that this could only be said face to face. You know, I am a fairly frank person, and I always speak in the flow of my thoughts, and therefore, as they asked me, I answered: what do I know about you, what is my opinion of you. Perhaps, somehow without choosing words, as they say, not with the mind, but with the heart.

14:46 Can saints swear?

Maxim: And the last moment. One of the so-called contactees, Pavel Bogoroditsa, made a video, then for some reason deleted it.

Irina: It still exists.

Maxim: Oh, is there more? Then you can look. He is precisely the one who is present with us now - Archangel Michael, as he assures, told me that I am a latent bisexual who wants boys like him.

Irina: You can ask if he said...

Maxim: No, I don't want to ask. I know that Archangel Michael could not say such a thing. Pasha, I'll tell you honestly, when I spoke about your contact, I had in mind not only this - not only your orientation. In fact, maybe I don't care what your orientation is. But I want to say that Saints cannot swear. This is accurate and unambiguous.

Now I even want to ask Archangel Michael: "Archangel Michael, please tell me, can the Holy Spirits swear?"

Irina: Do you mean the enlightened ones?

Maxim: Such as, for example, Nikolai Ugodnik.

Irina: (Archangel Michael answers) They always convey their thoughts to contactees with higher vibrational words. Both I and other Angels, if you mean disembodied Spirits, or high vibrational plasmoids, or highly spiritual humanoids - we all convey our thoughts in words that will not lower the vibration of the listeners.

Those words that you call obscene, obscene - I know their origin perfectly well, I know perfectly well what they meant in the past. But in the modern world, despite their ancient origins, they can lower the vibrations of those people who do not have this knowledge. For this reason we always find other words.

But some plasmoid civilizations and non-incarnated Spirits sometimes transmit information exactly in the way they are used to either in earthly life or in the life that they had before incarnating into a plasmoid civilization. These can be Spirits from the middle or lower level, and plasmoids, one might say, from the middle level. Or there is another option that the contactee himself interprets the information this way because he has such a vocabulary.

17:44 The relationship of the Cassiopeia Project to the Alcyone Project.

Maxim: And finally, let's devote literally 5-7 minutes to our wonderful person, who really helped the Project grow and develop for some time, and who later created his own Project and left ours.

Dear Vladimir (Vladimir Goldstein is the head of the Alcyone project), I want to tell you only one thing: in our Project we have provided you with an absolute opportunity and platform to grow and develop. You received all spiritual knowledge on condition of donation. You created your Project together with Marina. And I'll tell you this: when children who grow up leave their parents, it is, of course, hard for the Soul. But I want to frankly wish you Love, growth, development, happiness and much more!

I consider everything you said to be spiritual schizophrenia. In all seriousness.

Irina: This is about that video where you talked about us.

Maxim: Yes, where did you say that our Project is under some special services, etc.

Volodya, I want to tell you: the biggest intelligence agency in this Project is me! And those decisions that are made are made by me in agreement with all the founders of the Project. Previously, when you were with us, these decisions were made with you.

But I want to tell you one interesting story. Just imagine the situation: a child comes to kindergarten. And they tell him: if you want to be in kindergarten, you must follow the rules. If you go to the toilet, then it's only there, if you go for a walk, then it's only there. And then for some reason the child takes it and starts smearing bad things on the walls.

Volodya, if you remember, six months ago there was a situation when I was gathering the board of founders of the Cassiopeia Project, when the question was raised about removing you from the Project for not following the rules. And, if you remember, all the administrators and founders of the Project gave you the last chance, the last opportunity due to the fact that they loved you very much. They respected you a lot

as a person and gave you this last chance. But then, when you crossed all the boundaries of the possible, when you went against not only the Project itself, but also its ideas, then I had to (this was a difficult decision) ask you to leave our Project.

And even despite what you said in our direction... (reads in the chat): “Zeus is no longer the same.” You know, people come here to raise their spiritual structure, and the memory of their past lives is blocked. If someone calls himself Zeus, then you need to ask this person if he remembers himself as this Zeus? If he doesn’t remember himself as this Zeus, but imagines himself, this is called spiritual ego. Therefore, Volodya, we let you go with Love and in no case did we even think about any destruction of your Project. Because destroying your child is the same as destroying yourself. Therefore, grow, develop, we close the topic.

21:32 How the Cassiopeia Project is trying to harmonize with the Alcyone Project.

Maxim: By the way, our subscribers asked us that we should harmonize and make contact.

Irina: I’ll tell you more about this now.

Maxim: Yes, tell me more, Irish.

Irina: I promised to make contact. Vladimir is aware: we communicated with him in correspondence and by phone. We talked to him, called him and talked quite calmly. He expressed his point of view, I expressed mine, and we explained.

We have known each other for a long time and have also met in person and communicated quite a bit.

Maxim: (responds to a comment from the chat) This is not dirty laundry, we are now trying to harmonize the situation that has arisen.

Irina: Because people have some grievances and fears. Including Marina (Makeeva Marina is a contactee for the Alcyone project), unfortunately.

What I want to say now: to my great regret, Marina fell into a state of, one might say, oppression, and even resentment. This was told to me by MidgasCaus and its new Curator, who came to me just yesterday. We talked to them. What I want to say is this. Marina, Vladimir told you that in the last live broadcast we said that you are not a contactee at all. This did not happen. We didn't say that. Vladimir exaggerated somewhat, being in his emotions.

For which I also forgive him. I don't consider this a deliberate lie. He said in emotion. But we didn't say that. On the contrary, I have always emphasized that you are a contactee. You yourself came to me and went with me to the Higher Self, and I know all this very well, you talked with your Curators, and not only with MidgasCaus. You yourself remember very well with whom. However, I respect your decision and love and accept you for who you are.

I have no grudges against you at all. But I have already written to you what Raom Tiyan and LaOrshmi, as the Curator of the Alcyone Project, conveyed to me. If you wonder why he came to me, don’t be surprised. LiScioni, who is the Curator of the Cassiopeia Project, came to see you. It is completely normal for different Curators to come to different contactees and communicate with them. Especially for those who were recently in the same egregor. And what he asked me to tell you - I wrote to you, and to Vladimir too, he knows. And to you, dear friends, I want to tell you that I suggested that Vladimir harmonize as much as possible with our Project. So that we can, as originally agreed, confirm each other.

What does it mean to confirm each other? This is when we do not contradict the information that was in the Project. If any information contradicts, we begin to ask our Curators why this is so and figure it out.

I watched Vladimir's video. According to many parameters - now I won’t say which ones, it’s completely unimportant - but the information that Marina conveys from her Curators does not coincide with the

information that I convey. And we are both confident that we are conveying it correctly. Of course, this is the truth in the heart.

Seeing what was happening, I naturally suggested to Vladimir that we all get together - with our Curators, with Maxim, as the head of the Cassiopeia Project, with him, as the head of the Alcyone Project, and with us, two contactees, that is, me and Marina. And invite our Curators and talk about why this situation arose and how we can harmonize information.

Because if we agreed to support and confirm each other...

Maxim: Guys, let me explain: we are not going to make any showdowns here, we are trying to harmonize the situation that happened, because many people were very disappointed in many esoteric Projects and abandoned them.

Irina: The fact is that the information that I hear does not coincide with the information that she hears, and this is already clear. The only thing I could offer in this situation was to help figure it out, call together on Skype, etc. And ask together, together, our Curators. I suggested to Vladimir, Maxim. Maxim agreed: “Yes, okay, I’m ready.” Vladimir said that (I speak now as it is) he is not ready for this, but is ready to simply meet to confirm that everything is fine with us, and we will not remember this in the future. But I don't think we're doing well.

Maxim: Guys, they refused to hold a joint conference. We are trying to explain.

Irina: I don’t think that everything is fine with us until we harmonize in information. As long as there are contradictions among us, there will be contradictions in the minds and hearts of the people who listen to us. Therefore, I first suggested that before the reconciliation, which we will show everyone, we first harmonize ourselves and understand what is happening with the information content of our egregors. Why do we have different information? To which Vladimir answered me that it was pointless, and that it would only be a quarrel and would lower everyone’s vibrations. It’s his right to perceive it that way; for example, I don’t think it will lower everyone’s vibrations.

Archangel Michael is a witness, he now hears what I say, and he knows that this is really so. And I won't go into detail about what's contradictory there, but that's the way it is. In fact, I wish Love, development and good luck to both Marina and Vladimir and their Alcyone Project. He brings Light, they lead to the Higher Self, teach others. We are always ready for any cooperation with any contact projects in the name of Light and Love. But, naturally, if the information is different, it needs to be harmonized. It's my opinion.

Maxim: Yes, guys, we are ready for any joint projects, for any dialogues. We are ready to harmonize and share information, even if it doesn’t add up. But if people are not ready to do it themselves, then we certainly won’t force them.

Irina: We all have freedom of choice. Yes, I see you write that this is not just a contradiction of information. I understand everything perfectly, dear friends, and I not only read and listened to this information, I talked with Vladimir. Marina has not answered me yet. But I can't force her...

Maxim: We don't make excuses. A huge number of subscribers wrote to us: “Guys, you must urgently make peace with the Alcyone Project!”

Irina: I did everything I could...

Maxim: I gave the go-ahead, said: “Yes, we really must make peace with the Alcyone Project, we really must find common information.” We suggested that they do this. But they... I'll tell you more. Vladimir began to set a huge number of conditions: how we should conduct this broadcast, what we should talk about, what we should not talk about. And ultimately he refused to conduct any live broadcasts at all.

Irina: (responds to a remark in the chat) Dear Aksinya, this is not empty, this is our life, and we didn’t waste half an hour on empty things. A lot of people were waiting for this broadcast, these explanations, because Vladimir had already released several videos on this topic over the past week. As you can see, we didn’t comment anything further, we decided to wait a week until everything calms

down and explain ourselves to you. Moreover, now you can ask questions to both LiSioni and Archangel Michael.

30:47 Did Archangel Michael convey information about the SVO to Irina.

Maxim: By the way, that’s a good question. When you conveyed information about a special military operation, as Vladimir claims, Archangel Michael was not around.

Irina: I was waiting for this question. And this is exactly one of those contradictions in information that I told you about. What's the contradiction? The fact is that I really received this information from Archangel Michael. That's what he's talking about now.

(Archangel Michael): Yes, I conveyed everything to Irina. I already know from Irina what Marina said. I conveyed this information to Irina, it was called “Spiritual reasons for recent events” and was transmitted by me on the afternoon of February 27 of this year. I originally conveyed this to her via text. And when Irina wrote everything down, I asked her to mentally read everything to me, to see, to make sure that there were no distortions in her consciousness: she wrote down everything that I wanted, naturally, with her vocabulary, a lexicon in Russian.

What she read completely satisfied me. She completely conveyed the energy and the message that I gave her mentally. And, naturally, I recommended that she post all this on the resources of the Cassiopeia Project.

Alcyone was then one with Project Cassiopeia. It already existed, but at that time Marina and Vladimir were on retreat. Naturally, they immediately saw this text. And then Irina told me that Vladimir, but not Marina, had some questions about this text. She read his questions to me, and I answered her...

(Irina): Yes, I remember that Vladimir actually asked me questions about this text. Marina didn't ask anything.

Maxim: Irina, the audience doesn't even understand what we're talking about.

Irina: We are talking about Archangel Michael's article on the spiritual causes of the conflict, which was posted on our resources. And it was precisely about this article that Marina told Vladimir quite recently, when she left the Cassiopeia Project.

Maxim: Guys, we are not making excuses, I say again: we are trying to explain to you the situation that has arisen. We actually got a little naughty on the last broadcast - we were too frank. Therefore, we must explain ourselves to those who ask these questions.

Irina: The fact is that Marina told Vladimir that Archangel Michael did not convey this information to me at all, as Maxim already noted. She said so because the spiritual reason for the special military operation was indicated there: what recent events in Ukraine itself and in Russia attracted this event. The spiritual reasons and spiritual desire of the political leaders of our countries were outlined there. This article is available. You can read it on our resources and draw your own conclusion.

Maxim: Dear friends, let us decide now. Look, you always have freedom of choice: who to believe, who not to believe, who to listen to, who not to listen to. If you hate here and say that we are making some kind of money and betraying people, well, I can give up my place. The place of the person who is responsible for all the projects that exist in the Cassiopeia Project.

You see, the point is this: when a person appears in a large family who has great contradictions and, to some extent, spiritual schizophrenia, I, as a leader, have to remove this person from the Project. And do you know why I do this? So that other Projects can exist normally. So that people don't point their finger at us later that we are doing some kind of nonsense, that we are deceiving people, forcing them to experience some kind of destructive emotions.

Irina: (reads the question in the chat) They've already written: "Who do you communicate with – that's why you have different information in

your heads." This is a very good question, by the way.

You know, dear Petrovich, those with whom we communicate are in the Astral. That is, they come to us through the Astral, we do not physically communicate with them. This refers to the contacts that I am talking about now. For example, Archangel Michael. He physically cannot come at all. In the head, I would say more precisely - through the head, through the brain, through the hand and through the tongue - now Archangel Michael is answering.

But this is a completely separate personality, this is not me, not some manifestation of me - not some subpersonality of mine or someone else. Why I think this way, and not like this, as if I were answering myself - I'll explain to you now. Because I adhere to esoteric beliefs, and in esoteric beliefs there is a Spiritual world. And it is the essence of the Spiritual world, which is called Archangel Michael, that comes to me. If you do not adhere to esoteric beliefs, but, for example, materialistic ones, for you there is no Spiritual world separate from the human brain. It is natural for you to think that it is part of your consciousness. I definitely won't try to convince you otherwise – it's your right to think so.

37:50 What is "spiritual schizophrenia".

Maxim: So, today's broadcast is called "Spiritual Schizophrenia." And you know what a huge number of people write and come to the Project, and then spiritual pride arises in them, and behind spiritual pride arises the love of money, and behind the love of money comes spiritual schizophrenia.

People come, harmonize, say they agree, then for some reason they gain an audience and leave the Project. So, I'll tell you that Vladimir stated that he did not take anything from the Project. Volodya, YouTube channel, 8 thousand subscribers, a huge audience, knowledge gained from alien civilizations and much more!

Therefore, after this broadcast we will completely close the topic with "Alcyone". We wish you Light and spiritual development. In any case, you are part of us. In any case, we gave you everything you wanted.

We are always happy to send you the Light of our Love and support the opportunity to transmit spiritual knowledge to people.

39:04 Spiritual reasons for the conflict between Russia and Ukraine.

Irina: The broadcast with Archangel Michael, where he said that Ukraine itself was to blame, forced many people to unsubscribe. Archangel Michael, please tell me again, is Ukraine itself to blame? Now we will ask him again about what is happening.

(Archangel Michael answers): I have never uttered the word “guilty.” This is your interpretation. What is happening now in this country, dear to my heart no less than Russia and any other state on Earth, and not only, is a consequence of the general decrease in spiritual vibrations in the egregor.

When vibrations from the thoughts, feelings, desires, and emotions of the participants in the egregor (participants - this means participants) decrease in the egregor of the state, then first these spiritual negative energies accumulate in the egregor. Then the spiritual leaders of the egregor, his patrons, are always given a chance to the government and the entire people as a whole to transform this negative into a positive. Such chances have been repeatedly given to all countries that are now involved in this fratricidal conflict, from which there is real physical destruction and conclusions from the incarnation of many, many Spirits on all sides of the conflict.

For what reason did this happen? This happened for the reason that neither side nor the other had learned their lessons. And here the matter is not only in the rulers, but in the majority of the peoples of these countries (in the majority - that means, in the egregor, in the noosphere). They did not learn their lessons, that is, they did not transform the negative into positive, they did not reconcile with each other through peaceful negotiations. And where they do not want to draw up peace treaties at the political, economic and simply at the popular level, certain military actions always take place.

This has always been the case in the history of the Earth, as I have already conveyed in this article: I gave an example of a revolution that

took place a little over a hundred years ago on the territory of the Russian Empire. There were also a lot of deaths, a lot of negative energies and conclusions from the incarnations of intelligent Spirits due to the Civil War that followed. I also talked about the spiritual causes of the conflict that you in Russia call the “Great Patriotic War” - not only from Germany, which is an external aggressor, but also from the Soviet Union, which was not formally to blame.

But this does not mean that he was not attracted to this event. There are certain negative qualities (which I have listed) that attracted this event. I can also say about any other conflict that two people are always responsible for it. But two were responsible at the time of February 27, when I transmitted the information. Now quite a lot of time has passed, the situation has changed, and now there are no longer two people responsible for this conflict.

Now for this conflict, which lowers the vibrations of many people, and not only those who participate, but also who think about it with any negative emotions, feelings, thoughts - now all states and countries that are involved in it are responsible for this conflict at the material or technical levels. This is also their responsibility, although there is no direct conclusion from incarnations. For example, if they are not involved in this, but support it in others. I hope he answered in sufficient detail?

44:06 Maxim’s tasks as the head of the Cassiopeia Project.

Maxim: I will still continue my monologue about those people who come to the Project and participate in it. You know, I assumed it would be difficult, but I didn’t know it would be to this extent. You write, I’m so gloomy here, but I’m just trying to read what you write.

There are so many interesting things, and this is only on one channel. I receive more than 2.5 thousand SMS messages a day, and, unfortunately, I don’t have time to read them all, but I do read the most important ones. Every day new Masters and new projects come. And we need to try to harmonize all this. And to harmonize not just like that, but so that it fits into the structure at the legislative level, at the psychological level - so that some people do not break the psyche of other people. So that there is no intimidation from new contactees in

order to then take some money from you. Because many people come to donation. They say: “Yes, we are ready.” Then they gather an audience and slowly begin to set prices, they begin to say that there is no need to go to Cassiopeia, that free cheese can only be found in a mousetrap. But it’s not actually free, it’s subject to donation – it’s your gift to the Project.

Plus, if a contactee or some person appears in the Project who can harm the entire Project (and the entire Project is not one, not two, not ten, not a hundred people - it’s a huge array, a huge number of Students, a huge number of Teachers). And if such a person appears who tries to harm, thinking that he will harm only me or Irina, he harms the entire Project. I, as a leader, am obliged to isolate this person from the normal spiritual Project, which brings awareness of perception to people. And to protect him from possible further attacks from those intelligence services, those law enforcement agencies, who, I am sure, are watching some of the videos and drawing their own conclusions.

Why is esotericism considered pseudoscience? Because in esotericism there are a huge number of contactees, and each, through their own prism of awareness of perception, tries to convey information, presenting themselves as some kind of significance, that is, becoming higher than others. As a leader, it is very difficult for me to be between a large number of very serious and advanced masters and to regulate their relationships.

They ask me: “Why are you so serious?” Because I have to be serious sometimes. I cannot walk, like many enlightened Teachers, all spiritualized, all in goodness, bringing Light to people - in addition to Light, I have a huge number of tasks, as a leader. So that such people who know how to carry the Light remain in the Project and carry this Light further.

This Light is used by you - our subscribers, all the people who trust us, who watch us. And my tasks, as the head of the Project, are to make sure that this Light really is Light. If I see that the Light is beginning to develop into ego-schizophrenia and darkness, I will, in any case, eliminate this person from the Project. If I see that in the Project a person starts setting prices behind his back, I will remove this person. Guys, the Cassiopeia Project was created for you, for the people!

Irina: And if Maxim sees that one of the Masters or his immediate deputy, whom he valued very much, suddenly begins to condemn some politicians and lower the vibrations of everyone else, he will talk for a very long time, but in the end he will not allow him to destroy the entire Project. This is not his task.

Maxim: There was not a single person in the Project who harmonized with us, worked with us, brought the Light, with whom I did not talk before removing him. There is always conversation, there is always warning, dialogue, harmonization. And only after this conversation, if a person begins to continue to talk about this utter nonsense in the Project and engage in schizophrenia, then I have to remove him. And many people don't understand this, don't see it, don't feel it.

They say that we betray people. We are not the ones betraying them! We always talk, we always engage in dialogue, we try to harmonize. Why? Because I am waiting for more Masters in our Project. I am building Centers, I will build a research institute that will give at least some new concepts to our science, to our scientists. Although I know that many states have such institutions.

I don't ask anyone for money. We do not force anyone to give us money. We carry what we can carry. The more of us there are, the faster I can do this.

49:55 Archangel Michael's appeal to people.

Irina: Now Archangel Michael is transmitting.

(Archangel Michael says, LiSioni completely agrees with him): I was listening now, I completely agree with Maxim, Irina. I want to ask you: my dear divine Souls, please do not become a judge over any person, no matter what position he holds. Don't judge any rulers for the decisions they made. Because military operations, any military actions, no matter where they occur, are not anyone's fault. This is a problem of two or more nations.

Lack of awareness, which has accumulated over many years, led to

this disaster. People could not agree, and blood flowed. Please don't judge anyone. Judging, calling someone an aggressor or some other word will only make the situation worse.

What is aggression? Aggression is emotional energy that is aimed at re-creation, at creating one's own world, at remaking in it that segment of reality that is not perceived, is not perceived by the mind, is rejected. And anger, or aggression - a modern word - it manifests itself for a reason. We need to go deeper and ask: what was the aggression in response to? Why was it revealed? And since it was manifested on both sides, and since the governments of the two countries could not harmonize this aggression at the beginning (who led them there is, of course, important), but the governments of the two countries bore responsibility specifically for their people.

They could refuse this guidance. But I ask you not to judge them for this, but to treat them as Spirits, as your brothers who simply lowered their vibrations and could not forgive each other, let's say so. I also ask you not to judge either Vladimir or Marina in the comments, these are also very dear Souls to me, who carry Light at the level they can, at their level of awareness, just like Irina.

That's how they understand it. This is how they understand justice, this is how they understand Love. They understand it as the freedom to speak (as they believe - to call a spade a spade). But every contactee and every person has their own path. And in fact, you are all equally dear to God. You are all his children. And I ask you to send Love to each other. I also ask now, through Irina and Pavel, and Yuri, and Marina, and Vladimir, to send Love to each other, and to Maxim, and Irina. I also ask Irina and Maxim to send Love, because look for what unites you. And what separates you is just your lessons so that you can learn to find commonality and move on together. Therefore, I send you the Light of my Love, and I wish you to escape condemnation.

The condemnations that you expressed against any political leader - it seems to you that the words simply disappeared, flew into the air and became silent. But the energy – it rose up. It rose into the egregor to which you belong, and this lowered its vibrations. You can replace judgment with analysis. But for this you need to study the history of relationships, the history of these individuals. Or simply see Souls, as Angels and Jesus Christ himself do.

54:33 What does Maxim see as his mission in the Project and the mission of the Cassiopeia Project itself?

Maxim: (reads messages in the chat) There was an interesting comment: “Maxim, you are jealous of your Project.” Guys, jealousy is a destructive feeling. I will say that I am not jealous, but simply understand the responsibility I bear for the huge Project in which I am the leader. And, I’ll tell you honestly, the state considers us schizoteric. Esotericism is a pseudoscience for them, and everything that we carry is a madhouse for them in the literal sense of the word, because it has not been proven.

Moreover, we contradict each other and do not try to harmonize with each other. I have been the head of this Project for 2.5 years now, and you can’t imagine how many esotericists, how many Projects... (reads in the chat) “Project Defender,” yes, indeed. Because if now we leave everything as it is and give people the opportunity to complete what they want, then many will immediately go into the state of scammers. Why? Because they will begin to set prices for their esoteric information, they will begin to scare people, which is also very important, because if they don’t scare you, they will not take money from you in any other way. You need to tell some scary stories, come up with some nonsense that you need to get rid of.

Therefore, I will stand in my place and in any case keep vigil and observe the Project so that there are no schizoterics in it. So that in this Project there are at least more or less adequate people who can carry adequate information that is comparable to normal human logic, with normal spiritual laws - nowhere are the saints swearing; with normal state laws, where it is possible to express your opinion and attitude in a negative form about the government, but not when a special operation is underway; where any esoteric data can be compared with existing ones, and this data can be asked again from our Curators and Mentors.

Watch all previous videos. In the entire history of the Project, while I am the leader, I have not found a single contradiction. If you look at those Projects that are leaving us, for some reason they begin to bear contradictions. Why do you think? Why did I, as a leader, have to ask them to leave this Project? There is only one simple reason - they are

not ready to work in a team. They are not ready to build Centers, they are not ready to build institutions, they are not ready to engage in scientific research. They are not at all ready to contribute to the fact that esotericism becomes at least part of some psychology, at least part of some science. We have been trying to do this for two thousand years, and for two thousand years we have been considered schizoteric.

There are already a huge number of masters in the Project that is now organized. This backbone with scientific research, research, even if it has not yet been scientifically proven, but it works with examples, can already be used. And everyone who now exists in this Project works on the terms of the Project, they help me, as a leader, to build my Project.

I, as a leader, do not take anything for myself from this Project - I do not build any villas or dachas for myself, I do not buy any expensive items. 50% of the gift you give remains with the master himself. It's not the amount he assigns, it's the gift you can contribute. And from this gift he contributes his gift to the Project, this is called “crowdfunding” in another way. And with the totality of these gifts, I begin to organize Centers for them where they will conduct retreats, training seminars, and events.

Not so much as to pay exorbitant rents and rent premises at high prices. Why? Because it is subject to donation. If you really carry spiritual knowledge on a donation basis, you don’t have enough money to pay for all sorts of rent. They will be provided with Centers, they will be provided with accommodation - these masters.

Therefore, my tasks as a leader include bringing esotericism into the sphere of psychology and into the sphere of some scientific paradigm. And at the same time, remove from it the schizoteric, star-studded, crowned people who work only for themselves, only for themselves. They leave the Project for a simple reason - they don’t want to help the Project anymore. They want to work only for their own benefit, for their own needs.

I don’t see my benefits, my needs, in the Cassiopeia Project. My blessing is that I have the opportunity to do this. This is a blessing for

me. Therefore, everything that I collect, everything that I accumulate, I organize for those who are in the Project.

1:00:19 Replies to remarks in the chat.

Irina: Nobody portrayed Vladimir as a schizophrenic. We were actually talking about something else now. We talked about those people who are also in our Project, who, indeed, were with us, and then set prices and left. There are such people. This does not apply to Vladimir, he left for another reason, we have already explained why.

Maxim: Guys, look. If you are an adequate esotericist, if you want to develop, if you want to join a large team that has Centers, that has opportunities, an audience - we are always waiting for you! Come, harmonize in our training, it is not so complicated. This is just a week course. And each of you can participate in this huge Project, which is truly needed by all people. Don't just come in and make money by setting prices. In this Project there will never be prices for spiritual knowledge. And to participate in raising the level of vibrations, awareness, perception of people, and in people's acceptance of that esotericism that our state considers schizoteric.

Irina: Dear friends! Please do not react in any way to the adherents of "UFOlogists of God". They came just to show themselves. See for yourself what energies they carry.

Maxim: Always look at the energies that the contactee himself carries. In our Project, take any Teacher, any Master - he will always be with Love, with Light, with goodness. And compare with other Projects. The same ufologists who, I don't even understand, what kind of nonsense they are talking about, they are simply blocked. They even swear and they block them.

Guys! Always look at what the person is carrying. If it is destructive and negative, then where it came from is destructive and negative. If you are being intimidated that there will soon be a nuclear war, immediately think about who could transmit this information. Because no one canceled the woof. No one has canceled the collection of negative energy either.

(reads chat messages) “Archangel Michael is listening to you.” Yes, Archangel Michael is listening to us.

“You are talking nonsense.” Hello! I carry what I carry.

Irina: Dear “ufologist Bova” and all the people who love him! It's wonderful that you love this person. Love is generally the highest vibrational, most spiritual feeling. What can I say. You can immediately understand from your words what kind of energy you have. When you write: “You are a traitor, you communicate with the archons, etc.”, the word “traitor” is a condemnation. The energy of judgment reveals that you have grievances or irritation. Why is this condemnation? I'll explain it to you.

Whether I am a traitor to the Russian or any other people is not for you to decide, and not even for the ufologist Bova. Because for this there are certain beings who sent us to this world, they are called Consulting Angels. And they are already assessing how much we have betrayed ourselves, our Higher Self.

What does it mean to betray yourself? It fails to fulfill its task of embodiment. That is, you betray the idea and do not fulfill the task of implementation, and lower your level. Whether I fulfill it or not, my Higher Self will tell me about it, which, with all due respect, ufologist Bova will not even look at, and neither will you.

Maxim: Some kind of Bova attack!

1:05:05 Do the Higher Powers hear when they are addressed?

Irina: (reads a message from the chat) “If an ordinary person calls on the Higher Forces of Light, are those to whom he addresses always hear him?”

Maxim: Yes, good question.

Irina: If he calls, addresses them mentally or out loud, of course, they hear him. Because he thinks about them, builds a certain image. He thinks about them, he names them, addresses them, and through the Astral this appeal reaches the person addressed. Because distance and time do not exist there.

Maxim: (reads the chat) Look how many of these Bovs are here! Guys, no one is chasing us, and we are happy to make contact with ufologists. And all the ufologists who needed it have already arrived and found out everything. And those ufologists who do not want to leave their paradigm will stand their ground.

Irina: (reads the chat) They ask when we will listen to Archangel Michael? Ask questions. “Many people are interested in the fate of Russia, look at the Timeline.” This is a very general question. What specifically are you interested in and for how long?

1:06:19 Spiritual reasons for the war on Earth 12 thousand years ago.

Irina: (reads a message from the chat) “What is the spiritual reason for the war on Earth 12 thousand years ago on the part of earthlings?”

Archangel Metatron has already answered this question and said that there were spiritual reasons on the part of earthlings, and on the part of the Selbetians, and on the part of the Interstellar Union as a whole. If from the side of earthlings, then the spiritual reason was that some earthlings, who were called “priests,” lowered their vibrations and the vibrations of the planet by trying to control people with the help of low-vibration plasmoid civilizations, coming into contact with them. That is, they sowed a certain destructiveness into the world where they lived, into the Universe.

Selbet has its own spiritual reason for this event: this is the energy of rejection, aggression, pride, etc., which they experienced towards earthlings. The Interstellar Union also had a reason, because they also died in this war, and they were taken out of incarnation...

1:07:32 Spiritual reason for leaving the Project.

Maxim: (reads the chat) Cool question: “It’s a very unpleasant aftertaste from these showdowns, but it’s interesting to know why this situation arose from the height of the spiritual level?”

Irina: Which one is this?

Maxim: Why do people first come to the Project, and then begin to contradict it and leave it?

Irina: About all people or in general?

Maxim: In general. So as not to draw attention.

Irina (Archangel Michael answers): If a person leaves some Project in which he himself was a member, then this indicates that he feels that the vibrations of his spiritual heart have no longer coincided with the vibrations of this egregor. For what reason, you need to look, of course. It could have been for any reason.

That is, this is a mismatch of vibrations, they have changed. And in fact, this is quite natural, because all people are different. The main thing is to approach this without judgment, with understanding, with Love.

1:09:04 How to avoid schizophrenia.

Irina: (reads a message from the chat) “How to avoid schizophrenia?”

(Answers Archangel Michael): In my understanding, what you call schizophrenia is the presence of negative energy blocks that cause the attraction of certain entities to a person that begin to frighten him, cause aggression in him or otherwise lower his vibrations. That is, to give, let's say so, certain false attitudes, all kinds of illusions under the guise of truth, which lower his vibrations. How do we distinguish lies from truth? Truth raises a person's vibration, and lies lower it. Truth always leads to Love. Lies lead to the opposite of Love - to condemnation, to hatred, etc.

How to avoid schizophrenia? If you are a contactee, if you hear something, see something and want to avoid schizophrenia, that is, to avoid such a diagnosis, you can communicate with your Curators, but at the same time always check the information through your Spiritual heart, through contact with your Higher Self If any information comes that sets you up for condemnation, anger, fears, etc., then always ask again through your Higher Self why it came, from whom it came. And then you will avoid suspicion and hostility, which are leading in the statutory forms of the so-called schizophrenic delusion.

1:10:56 The meaning of the division into “dark” and “light”.

Maxim: (reads a message from the chat) “You are puppets of the dark ones under the guise of the light ones.”

Irina: It is quite possible that you perceive us, our energy, as dark. But it may well be the other way around. We, too, may perceive your energy as dark. It depends on the difference in vibrations. If we are very different in vibration, then we can perceive each other the same. You may perceive us as dark quite sincerely. And we, too, can quite sincerely perceive you as dark.

Here, in order to understand, it is necessary to say what, according to our understanding, Light and darkness are. What is Light and darkness, for example, in the understanding of Archangel Michael. When you hear this answer now, you will decide whether this state is light or dark for you. For you personally.

(Answers Archangel Michael): For me personally, Light is the great radiance of unconditional Divine Love, which gave birth to all worlds and all spiritual entities, as His parts, as His children, as His particles, so that they could create in these worlds and carry their Love further. This is the meaning of the existence of Love as a feeling that causes many desires to create a similar creature for oneself and take care of it, that is, to help and send life to it. Because the energy of Love generates the energy of life, the energy of truth. This is Light for me.

Darkness for me is the absence of Light, that is, the absence of Love

and true life. And what is for you, dear participant, darkness and Light - decide for yourself.

1:13:00 Space news from LiShioni.

Maxim: They are asking for space news. From LiSioni, probably.

Irina (answers LiShioni): Yes, I have space news, and it is connected with planet Earth. You may remember the live broadcast, and I was there, where they discussed the Egyptian pyramids? Do you remember what the representative of the planet Tumesout said about the room under the sphinx? About the fact that in a room covered with a stone slab there are various artifacts that were handed over by representatives of alien civilizations a long time ago?

So here's the galactic news: for the first time in many centuries, through some passage in the pyramid, Egyptian scientists, together with their power structures, began, one might say, to open (cut) the wall.

Maxim: Have they already started doing this?

Irina (LiShioni): Yes. They are already looking for a passage there, and the instruments installed there have recorded activity that comes from something very nearby. We believe that in some way the information that was given through Cassiopeia, not directly, but perhaps even through the egregor, provoked interest in this place. There is absolutely nothing wrong with this, it is simply a fact as it is, and such galactic news.

They are looking for a way to get there, and perhaps they will find it soon.

1:15:10 Plans of the Higher Powers for “schizoterics”.

Maxim: (reads a message from the chat) “What are the plans of the Higher Powers for schizoterics, of whom there will soon be even

more?”

Irina (answers LiSioni): This is a good question. I'll explain it to you now. To many esotericists, and I understand them perfectly, the word “schizoteric” seems offensive. Because they associate it with the word "schizophrenia" and think that they are considered crazy. In fact, even in psychology there is such a personality type - schizoid. And this is not schizophrenia. It’s just a type of personality who likes to read books, mentally communicate with himself and does not like to communicate with people or do some kind of homework. He just goes into books, into studying something.

Also, “schizoteric” is a slightly ironic name for esotericists who carry some kind of philosophy that does not affect their life in any way. Because there are a lot of esotericists who simply talk about some increase in vibrations, but their lives do not change. And what they were - they remain so for decades. They are called schizoterics.

They read something, study, meditate, and then they come to the store, for example, and will not pass the simplest check: they will be given more change than they need, and they will not even say anything and will not give it to the seller. I give this simple situation as an example. Or they will find the wallet with the owner’s money and documents and will not give it to him. Such esotericists really do exist.

(Archangel Michael speaking) They do not relate what they read and what they do to their personal lives. They have a separate life - esotericism is separate. By the way, there are such people among believers of all religions; they are usually called “ritual believers.”

Maxim: (reads the chat) They write: “It’s time for you to close, nothing new, no information. Yuri Yakovlev."

Dear Yuri, this is the last broadcast when the two of us sit together. I think that you have probably watched all of our 420 videos and fully studied all the information that we carry. And in the Project we also have a school of cosmoenergy “Gihor”, there is a school “MentalHealing” - this is psychology, there is a school of cosmohealing where you can have a session, we also have Wellness Centers and

much more. Therefore, if there is nothing new for you, well, then find new teachers who will bring you something new.

1:18:12 Once again about the concept of “schizoteric”.

Irina: (responds to a comment from the chat) You wrote that more often than not the cashier himself does not give it back. Do you know, dear friends, if this cashier or salesperson also studies esotericism in his free time, but it does not change his life in any way, and he does not give change correctly, or a businessman who is somehow interested in esotericism and tries to collect for himself in his business capital precisely through, one might say, such actions that will reduce vibrations in other different ways - then this person does not act in the energy of Love, and he is simply schizoteric, because his esotericism does not change him in any way.

This is not really a condemnation, because here the word "schizo" does not mean "schizophrenic." "Schiza" is "schism" in Greek. His passion for esotericism has been separated from the real life that he lives every day: he communicates with loved ones, goes to work. If nothing changes for him there, this life is cut off from his esotericism, from his hobbies. And he becomes schizoteric, that is, in Russian speaking, a hypocrite.

Hypocrite is also not a condemnation, but simply a neutral name for a certain type of person who exists. Even Jesus Christ and the apostles used this word simply to indicate that such people exist. We send them the Light of Love, we are not offended by them, we do not hate them, we forgive them if we suddenly encounter them in real life. But if you don’t indicate that they exist, it would be a lie.

And a lie is just, as Archangel Michael has already said, not Light. This is darkness.

1:20:08 When will the Cassiopeia branch open in Moscow?

Maxim: (reads a question from the chat) “When will there be a branch in Moscow?” It's almost ready. There are interior finishing works going

on there. We will need to get the same equipment that we have in the Voronezh Health Center. And, in principle, I think we will open just after the New Year in Moscow. We will have a very cool opening of this Center. Therefore, I can say that very soon there will be a branch in Moscow - a retreat Center with the opportunity to come for health treatment with some types of equipment. This is in Domodedovo, but not the Domodedovskaya metro station, but the Domodedovo area. Ten minutes to the train, seven minutes to the bus. Accordingly, I will tell you everything when we open this Center.

Once again I want to remind everyone: dear friends, we will have a simply unreal outdoor event for the entire Wellness Center. There you will be able to get not only training with Irina and Ilya Alexandrov, but also work together with specialists from our Wellness Center. Once again: this is Nadezhda Viktorovna (Oberon equipment); This is Ilya Alexandrov (equipment “Kronoskop”, “Aurabuk”). The head of mentalhealing himself will watch you on this equipment and talk about your etheric fields, energy, you will see all this yourself on the computer.

Plus visceral therapist, bioenergy massage, specialist in working with the Higher Self Alexey Morozov. Therefore, from September 27 to October 3 we will be in Krasnodar. There is a link under this video. You can call Elena and make an appointment. At the time I went live, there were 12 spots left. Therefore, we are waiting for you all in Krasnodar at this wonderful training retreat and work with specialists from our Center.

By the way, what is Oberon? Many people don't know. On Oberon you can see the entire structure of your physical body, with all the organs, all the destructive or constructive aspects in the body. Therefore, we are waiting for you at our retreat in Krasnodar. There you can communicate with me and Irina personally. I will definitely be present: I will register you for this retreat.

(answers a question from the chat) Why is it the last time we are together? I think two ethers are enough.

Irina: Well, if you have such a request...

Maxim: If there are really requests, we will arrange such broadcasts. But it seems to me that the information that is transmitted through Irina is priceless for me. And I wouldn't like to take up your time with my chatter. Again, people are probably interested when they are given some knowledge and information. I, as a leader, am just structuring this Project so that it is harmonious with our Orthodox Church.

1:23:34 Communication between the leader and the Spiritual Mentor of the Project.

Irina: If someone does not understand: it is not by chance that a person ends up in a position or as a Project Manager, and any of his words is not accidental, but comes, among other things, from the Spiritual Leader of the egregor. Because the head of a physical project will always be in one way or another in contact with the Head of the egregor. They simply agreed together, so to speak, for him to become a leader on Earth, his continuation, so to speak, a physical one.

Its continuation means the conductor of its ideas. The Spiritual Leader of our egregor, as I have repeatedly said, is Mirakh Kaunt from the planet Burkhad. And, accordingly, this, one might say, is his representative in the egregor. That is, he says something here that is not accidental. And in fact, this is his mission, his responsibility, which he himself agreed to even before incarnation. He knows this very well.

Therefore, any of his words is not accidental, just like mine. I am not the head of Cassiopeia, I am a co-founder. I have neither the desire, nor the time, nor the opportunity to lead. I have another task in this egregor.

Maxim: And as a leader, I can explain to any services or inspection bodies what we do, how it can be harmonized into the knowledge that we say and carry. I'll tell you a secret: you know what a large number of negative energy attacks are carried out on the Cassiopeia Project from other esotericists and not only. Do you know how I deal with them? I always harmonize inside through my Light, through my Love. I clearly understand that those who attack us, try to judge us, hurt us, do not have the Love they need.

Therefore, with all my Soul and Love, I cope with these attacks by sending the Light of true Love to those who do it. Sometimes this is done by fairly strong people who are in contact with strong entities, and I feel it. In any case, I have to conduct an internal dialogue in the Light of Love and send back to those people who attack us the Light and Love that I have inside.

And each time, the more attacks, the more they make me stronger in the Light of this Love, in the Light of finding myself as the leader of this Project.

Irina: (reads a question from the chat) “What causes dementia?” We have a video, we have been on the channel several times. Please look in the tab. On our channel there are tabs with videos about medicine, about health, where our Curators, MidgasKaus, answered. See playlists called “Medicine, health.” And there you will find about mental pathologies, including dementia, Parkinson’s disease - all this is already there.

1:27:27 How did the Holy Spirit descend on the apostles on the 50th day after the resurrection of Jesus Christ?

Maxim: (Reads a question from the chat) “How did the Holy Spirit descend on the apostles on the 50th day after the resurrection of Jesus Christ?” Good question.

Irina (Archangel Michael answers): It is in this place of the Bible, in this place in the “Acts of the Apostles” that contact with the Holy Spirit is called, first of all, contact with your Higher Self and with the founders of the Christian religious egregor: with Archangel Gabriel, with me - Archangel Michael, with Archangel Metatron, with Archangel Raphael, with the Spirit of Jesus Christ himself and the Spirit of the Virgin Mary. Since the Mother of God was still in incarnation, this was her Higher Self, her disembodied part. If the Spirit is in embodiment, then it can contact its Higher Self by sending a phantom.

And due to the fact that they had contact through their spiritual channel with the Spiritual world, people who had spiritual sensitivity, spiritual vision - that is, sensitivity to the perception of these energies by visual

images, saw certain phenomena above the heads of the apostles, which they called " tongues of flame." That is, this is their spiritual channel through which energy flowed up and down like a stream.

And there information was revealed from the Higher Self to each of them about the language that they knew when they were embodied in other countries, in other bodies. That is, one of the languages was open to everyone. They instantly gained knowledge of these languages without having studied them anywhere. And this was allowed by their Higher Self, their Angels-Mentors, so that they could become preachers of Christianity among those peoples who needed it, but without learning the language. This knowledge was given to them by the Higher Self.

1:30:00 Announcement of the New Year's event.

Maxim: Well, dear friends! Thank you for supporting us and participating in our events! By the way, they asked the question: “What will you do for the New Year?” Guys, we will most likely spend the New Year here in Voronezh, in the now completely completed Center.

We will invite all the Masters of all our Projects to the New Year and celebrate! As for inviting other people, I don’t know, we’ll see. Maybe we will gather some kind of group that will be ready to spend the New Year in the very interesting company of all the absolutely Masters of the Cassiopeia Project!

And don’t forget about our new esoteric portal - astrological and numerological, where you can make calculations on condition of donation.

1:31:03 Why the Universe created the opportunity for evil, violence and suffering.

Irina: (reads the chat) And another very important question: “Please ask Archangel Michael why violence, evil and suffering were created?”

I also think this is very important. Archangel Michael, why is the

universe created the opportunity for evil, violence and suffering? Why was this particular opportunity created for the manifestation of the free will of Spirits?

(Answers Archangel Michael): Because what you call evil, suffering and violence is, as I already said, an inevitable consequence of the complete freedom of choice of Spirits not only towards Light, Love and all bright qualities, but also towards negative qualities , towards degradation.

Why was this opportunity given? Because the freedom to choose these two states is the main condition of Divine Love. Because it is precisely this that allows you to freely choose Love or dislike and develop in it. And this is the main sign of True Love, which loves and accepts you all as you are.

Maxim: Well, guys! We've been talking for an hour and a half now. If you like our broadcasts, like, subscribe to our channel, launch a huge number of bots from various ufologists we don’t understand.

Thanks to all! See you again! Hope to see you on air. We will also come up with something for the New Year. Bye everyone, hugs to everyone!

Yes, I forgot to say. Yura Fidrya, you are a cool guy! You know, especially after your last video, I began to respect you more than before, and I am ready to provide you with any of my Centers on condition of donation. You speak well, so if you have such a desire, come, let’s learn to speak well and also do it well!

Irina, Maxim: We will unite if you want!

1:33:43 End of broadcast.

September 11, 2022

Participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Maxim Rusan – head of the CASSIOPEA Project and the Center for Spiritual and Physical Development;

Archangel Michael is the guardian of the Christian egregor, patron and curator of the Earth in the Spiritual world;

LiShioni is a representative of the planet Shimor, a specialist in the astral world and its interactions with the material world.

Contactees, Higher Self, extraterrestrial civilizations,

CASSIOPEIA, Irina Podzorova

- Contactees, Higher Self, extraterrestrial civilizations, spiritual world [Cassiopeia-8] - by **CASSIOPEIA - Irina Podzorova -**

Contactees, Higher Self, extraterrestrial civilizations, spiritual world

Information transmitted by our space friends through Irina Podzorova, a contactee with extraterrestrial civilizations.

#59 Twelve questions and answers that changed more than one fate
#54 Communication with real demons (low vibrational entities). Dark and light forces. Path to the light
#66 Physical fields, levels of matter and deciphering crop circles from the perspective of aliens
#67 Conference with ufologist Maxim Bronevsky (part 5). Atlantis Hyperborea. Bermuda Triangle
#69 Contact or Schizophrenia
#71 Alien about love, raising children and proper nutrition. How to maintain youth?
#72 Conference with ufologist Maxim Bronevsky (part 6): reptilians, Hubble, gravity, meteorite
#74 Live broadcast with contactee Irina Podzorova. Is Christ risen? The universe is infinite?
#75 Live broadcast with contactee Irina Podzorova. Quantum transition, Dyatlov Pass, pyramids, 5G
#76 Live broadcast with contactee Irina Podzorova. Pineal gland, Higher Self, Ayahuasca, levitation
#78 Kabbalah. Questions from a representative of the Kabbalah Academy. History of mankind.
#81 Proper and healthy eating. Prana, living food, protein, therapeutic fasting, connection between spirit and body.

#83 Live broadcast with contactee Irina Podzorova. Love, deja vu, karma, yeti, astral plane, black holes
#84 Conceiving a child, pregnancy, childbirth, pain, childhood, maternal instinct, parenting, abortion
#89 Live broadcast with contactee Irina Podzorova. Higher Self, spiritual development, enlightenment
#90 Scientific knowledge: electromagnetic engine, levitation, ether, energy. Alien clues
#92 Quantum transition. Advice from aliens. Signs of an increase in human vibration frequency (part 1)
#95 Answers to the most pressing questions: Bigfoot, Shambhala, pyramids of Egypt and much more
#96 Evidence of communication with aliens. What does direct intervention threaten us with?
#98 The secret of the human DNA chain. Lifespan, causes of aging, Schumann resonance
#99 Autistic children, GMOs and DNA mutation. Does a person have freedom of choice?
#103 Questions about medicine from emergency doctor Mikhail. Spirit and body. Diseases, psychosomatics, children
#107 How to overcome the animal nature during the period of spiritual growth. Practice connecting with your Higher Self
#109 Black holes in space, phantom tulpa, lucid dreaming, life force
#111 Life, soul and reincarnation. The trinity of the nature of the spirit: mind, heart, energy.
#112 Live broadcast with contactee Irina Podzorova. How to go to the astral plane? Options for the future, soul and spirit.
#115 Live broadcast with Irina Podzorova. Contactees, Higher Self, extraterrestrial civilizations, spiritual world
#117 Artificial intelligence: development, nanochips, new technologies. Alien experience.
#120 How does the human brain work? Neural networks, mind, memory, nature of thoughts, connection with the Spirit.
#123 Synergy, matrices, cosmoenergetics, sound healing, sound healing, raising vibrations.
#124 Psychosomatics of diseases: subconscious, immunity, spirituality, positive thinking. How does the virus work?
#125 Ashtar Sheran and the reptilian. War in the Solar System 12,000 years ago - attack on the Burkhad colony.
January 1, 2023

#59 Twelve questions and answers that changed more than one fate

https://blog.cassiopeia.center/dvenadcat-voprosov-i-otvetov
https://www.youtube.com/watch?v=BIp-nEJsD20

Foreword by the author – Maxim Rusan:

This video is dedicated to the entire CASSIOPEIA team and personally to Irina Podzorova, her open, bright and pure soul, which brings LIGHT and LOVE to our planet and all of humanity in general.

Exactly a year has passed since our fateful meeting. Exactly a year ago, on April 1 (probably GOD himself joked like that) I sent 12 questions to the contactor with extraterrestrial civilizations Irina Podzorova in the village of Povorino. I had no idea how these questions would affect my entire, and not only my, future life. This was the first acquaintance with Irina, which was decisive in the fate of many people and the entire CASSIOPEA project.

At that time, I was running an interesting children's project and my cameraman was invited to film a crazy woman who communicates with aliens in the village of Povorino. I, studying to be a psychologist and interested in esotericism, decided to formulate 12 questions that would explain to me her level of madness.

When I heard the answers to the 12 questions asked of her and Kirkhiton, I couldn't believe my ears. I knew the answers to these questions for myself, but when I heard Irina's answers, I immediately realized that this was a gift of fate for our entire planet! I heard inside myself: "This can't be, she even revealed something in me that I myself didn't fully understand..." And the most important question arose in my head: "Why hasn't anyone become interested in her yet?.." After her answers to the camera, I realized that I couldn't hesitate, and the time had come.

The next morning, I personally visited her with my friend and cameraman and asked other questions on camera. There we met MidgasKaus from the planet Esler, and he diagnosed everyone. For a long time I could not come to my senses, not understanding where I was being "conned", and how could I tell everything about something that many doctors cannot even determine???

All the way back to Voronezh I was tormented by the question in my head: "How is this even possible and is this possible at all?.." To be honest, there were thoughts that I had found someone who would simply make us rich with her gift! But, having learned more deeply and begun to communicate with our creators, I realized that WEALTH is not what many people dream of and look for in life.

My friend on the way back said that this was nonsense, and she accidentally guessed everything, that she was a charlatan, like everyone else. It was very difficult to really believe, bordering on the impossible. I myself, talking later with Irina and our Interstellar friends, doubted all this for some time. MidgasCaus, talking to me, said that this is normal, everything has its time and faith is needed for this. At that time, I also didn't fully understand what he was talking about... But maybe I'll talk about it and show it later in new videos, if you're interested!

01:05

Question 1: Why was our race created on Earth?

Question 2: With the help of which cosmic races were we created?

Our race on Earth was created by three civilizations. The planet was discovered 5 million years ago by astronauts from the planet Tumesout (I speak all the names in Daraal because I

am a Daraal contactee), which is located in the constellation Orion (the star Pi) at a distance of just over 1000 light years from Earth. We were also there with Kirkhiton during physical contact (editor's note - Kirkhiton is a representative of the planet Daraal) in September 2018. I have these notes, I kept a diary, I can provide all the materials on the planet Tumesout.

The inhabitants of Tumesout look like people of Slavic appearance, only they are giants. They are usually between 5 and 8 meters tall. They are much taller than Kirchiton and, especially, me.

On our planet, when the Tumesoutians discovered it, there was life, there were animals, but there were no intelligent people.

The Tumesoutians have a goal - to spread intelligent life throughout the galaxy, they consider this their mission. And their closest partners in this mission are aliens from the planet Burkhad. It is located in the constellation Cygnus (670 light years from the Sun). Burkhad is the most important planet now in the Interstellar Union, which includes 116 planets (including Daraal, Esler, Tashig, Tumesout, and so on).

The Burkhadians and Tumesoutians decided, after seeing our animals, namely the ancient primates (similar to our monkeys, but larger), to do experiments with these primates, combining their genetic material with their own in order to breed an intelligent creature.

Why did they decide to do this? Because it was connected with their religious worldview. Their ideas about God do not conflict with science (unlike our order). They believe that God created the material world to embody the intelligent spirits he created and achieve his goals. In the spiritual world we can only dream, create some images, and we can achieve goals only in the material world. According to their ideas, intelligent spirits, including me and you, we were all created before the creation of the material world, we just don't remember it.

The material world was created on the planets gradually. Galaxies were formed. On the planets on which life was possible, evolution took place, but not randomly, but directed by His Divine spirit, combining in a certain way so that organic matter was obtained. There was the first cell and so on, but not by chance - this is called the directed evolution of the development of life. Then animals emerged and began to develop on some planets. Their central nervous system developed.

The fact is that a rational spirit cannot incarnate in everyone. He needs a certain development of the brain so that the spirit can act through it (talk, for example, think, think). A rational spirit cannot incarnate into a cat or a dog, because it cannot speak or think. In the Daraal language, the intelligent spirit is called "limis".

And so, when the animals living there on the planets reached such a threshold of development that they could be incarnated, the limis incarnated. For the first time this happened not in our Universe, not in our galaxy. Then in ours, including on the planet Tumesout several hundred million years ago. This was the beginning of their civilization. They began to develop, multiply, technical development began, they went into space, and made various discoveries. And then interstellar flights began.

And then 5 million years ago the Tumesoutians discovered our planet. And they decided that if there are primates on Earth whose development is quite a bit lacking to embody a rational spirit, then they can be helped by giving them genetic material to breed hybrids, so that as many limis spirits as possible can incarnate in the spiritual world. They consider this their mission.

Then the Tumesoutians and Burkhadians were joined by a third civilization from the constellation Canes Venatici - the planet Selbet. If the inhabitants of Burkhad and Tumesout are similar to people (that is, anthropomorphic, humanoid, to call it in Russian, because humanoid civilizations are sometimes humanoid, but sometimes not), then the inhabitants of Selbet are cold-blooded, similar to our lizards, only they walk on two legs. These are oviparous reptiles. Selbet also decided to participate in this hybrid breeding experiment.

They initially had disputes among themselves, because the Selbetians wanted intelligent reptilians to be created on Earth from our animals. But the Burkhadians and Tumesoutians were against it, partly because of poor gene compatibility. The debate was about whose genes we should have more of. Then experiments began, and about 3 million years ago the first people appeared. The intelligent spirits-limis incarnated in them. Unlike primates, people no longer had hair, they were upright, without a tail, and so on.

Millions of years later, the Tumesout people came into contact with Moses (a biblical character), he really existed, he was a contactee. The Tumesoutians told him in simple mythological form what was happening. They had contact on the mountain on which the alien ship was landing, all this is described in the Bible in the Old Testament. He, of course, could not understand much, because he did not know that space and other planets existed. There was no such technical development then, so for him everyone who descended from the sky seemed to be Gods. The aliens did not convince him of this, believing that it was easier to give knowledge to primitive, undeveloped people in a mythological form.

They told Moses how man was created. The Bible says that the Lord God created man from the dust of the ground and breathed into his face the breath of life, and man became a living soul. Knowledge is encrypted here. The dust of the earth is the genetic material of primates. Ashes represent undeveloped life. He blew in the breath of life - a combination of genetic materials.

We don’t have much Selbet genetic material, it’s true. But in genetic diseases such as ichthyosis (scales in humans), these genes are expressed.

13:46

Question 3: How many civilizations were there on Earth before humanity, and where did the previous one go?

They explained it to me this way: civilization was originally human, but the Earth itself and the solar system were structured differently. There was no Moon, which was then a planet between Mars and Earth. The Earth was a little closer to the Sun, and there was a single

continent on it. The base of our creators was where the Mediterranean Sea is now, closer to the shores of Turkey, in the modern geographical sense.

In the solar system, Venus and Mars had oxygen and water, they were suitable for the life of our people. Our creators decided 200 thousand years ago, when people on Earth multiplied, to transport some people to these two planets, build cities for them in order to populate the solar system with people. This was consistent with their mission - the spread of intelligent life in space. About 20 thousand people were transported to Venus and Mars. Cities were built, the necessary plants were planted, and people lived there for many millennia.

But 12 thousand years ago on the planet Selbet, in their political structure, humanoids came to power who were opposed to Burkhad. And their war began. There were contradictions about people too. Selbet believed that we were created incorrectly, that the hybrids turned out to be too aggressive, difficult to control, and that we should be destroyed so that there would be no problems from us in the future. Earth, Mars and Venus were then considered the colonies of Burkhad. People were undeveloped then, the aliens helped us, gave us knowledge, but did not do our development for us, believing that people should develop themselves. Then the Selbetites attacked our planet, Mars and Venus.

Selbet, of course, was expelled from the Interstellar Union due to the attack on these planets. The exception according to the rules is valid until the end of the war and the punishment of all those responsible. But Selbet did not stop and used serious weapons on the Earth that change the orbits of the planets. As a result, a single continent on Earth split, many people died, floods, volcanic eruptions, and earthquakes began. The Earth began to move away from the Sun and, with its attraction, acquired a satellite - the Moon. The moon almost fell to Earth, but the Burkhadians were able to prevent it. During this war, the Burkhadians and Tumesoutians had to fight off the reptilians and at the same time remove those who survived from the Earth, because the living conditions on Earth had become unbearable due to climatic conditions.

All this became part of the mythology called the Flood. The death of Atlantis, etc. - yes, these were all cities that existed at that time and were in contact with aliens, giving them knowledge.

The Burkhadians first took the survivors to Mars, but the reptilians destroyed everyone there. They managed to take people out of Venus before the Selbetites used chemical weapons there, spraying gases. The survivors were sent closer to the core of the galaxy, to the planet Disara. They still live there. They are already flying between the stars, joining the Interstellar Union, and even arriving on Earth. They are very similar to us, and if you give them different clothes, then on the street you will not be able to distinguish him from our person.

And even before the war there were Burkhadian bases on the Moon, because it was the closest planet to Earth. And the surviving people from Earth were transported to bases on the Moon. There were transparent, glass-like domes. In mythology, these actions are also described as Noah's Ark. But this ship did not float on water, but this was a mythological form of describing a spaceship. And he was not alone; several ships were then able to save several thousand people and animals. Many animals died like dinosaurs. Previously, people and dinosaurs lived side by side, together, there was no such separation.

Our people perceived this war as the actions of evil Gods. Then paganism was developed with the concepts of good and evil Gods.

When all this calmed down on Earth, it was cleaned a little from radiation with special devices and people were resettled back. But the planet already had different climatic conditions, winter appeared, and earlier there were even tropical plants at the poles. The Moon appeared in the sky, which was not there before. Since then, they decided to leave our civilization without special care for its independent development. Flights to Earth stopped, but it was decided to look for contactees.

23:32

Question 4: Was there a planet Phaethon?

It was a planet between Mars and Jupiter. There were alien bases there too. But the Selbetites used such weapons that the Phaeton fell into pieces. Our Earth could also expect this, but Burkhad repelled the attack of the reptilians, and many Burkhadians died.

24:44

Question 5: How to become a contactee? Conditions for choosing a contactee.

There are certain conditions for contactees. That is, how do aliens choose those with whom contact is possible? Kirchiton told me that when I left contact with him, I wrote down all these conditions. That is, I will talk specifically about Daraal. Their contactees all have physical contact, they are taken to different planets.

Personal desire. No one will persuade a person; he must want to become a contactee himself.

No fear of UFOs and aliens. There should be no mistrust.

The desire to understand the world.

Lack of conscious aggression directed against sentient beings. Aggression in this case is possible only with defense. If a person deliberately wants to harm someone, his energy changes.

The desire to fly into space.

No fears or phobias. Even if a person is afraid of a spider or a mouse, he will not be suitable for contact, since in his subconscious there is already a fear of alien life forms.

Absence of religious fanaticism in any form and the habit of imposing one's opinion on others.

Tolerance of the opinions and beliefs of others.

Intolerance for crimes against life and health, as well as the sexual integrity of other beings.

Absence of sexual perversions - pedophilia, necrophilia, bestiality, sadism and masochism. The energy changes from sexual union in such forms.

Normal sexual orientation. With such violations, something happens, they say, to the aura, and it becomes weakened.

The absence of physical diseases that prevent a flight into space with aliens (hypertension, arrhythmias, previous strokes and heart attacks, heart, liver, kidney failure, poor hearing and vision, epilepsy, diabetes, oncology, allergies and reduced immunity.

29:35

Question 6: How to develop superpowers: clairaudience, clairvoyance, claircognizance, telepathy, telekinesis and others?

Clairvoyance, hearing, seeing are considered forms of contact with life forms. If we are talking about seeing the future, then this is contact with angels, good spirits, because only God can know the future. In ancient times, such people were called prophets.

But telepathy (transfer of thoughts at a distance) is something else. Here I have a telepathic connection with MidgasKaus from the planet Esler. It became possible because a chip was inserted into me, which changes my brain waves upon contact to perceive his thoughts and transmit my own. I couldn't do it without the chip.

Telekinesis is associated with human energy. Hence the phenomenon of poltergeists. This is precisely telekinesis that is unconscious to humans. That is, a person has vital energy that comes out during stress; its excess is especially noticeable in children and adolescents. This energy, when released, can suppress gravity in some object, and it will fly up. To have conscious telekinesis, you must concentrate your thoughts so that you are 100 percent sure of success. Only faith gives such energy, or rather the opportunity for this energy to come out of you.

Humans are capable of both telekinesis and levitation. The only thing stopping them is their lack of belief in this possibility.

33:31

Question 7: Who is the Devil?

Aliens have a different faith than Christians. When Christianity was formed, it was also with the help of aliens, or rather, their contactees. Thus, Christ's physical father was from the planet Burkhad, and his mother was a physical contactee. She was given genetic material, and so she gave birth to Christ. When Christ died, the Burkhadians took him onto the ship and restored his body. In the description of those events, it was the ascension of Christ, he was taken away by a cloud.

During the formation of the Christian faith, the Devil was set up as a symbol of evil in the universe. The serpent, the dragon fought with the Archangel Michael - this is a symbol of the war of the Selbetites, who wanted to destroy the human race. They still don't treat us well. I was on Selbet, they took me there.

There are also demons - evil spirits, that is, limis, who do evil and enjoy it. They are both embodied and not.

In the spiritual world there is a waiting list for incarnations. And some demons do not want to wait their turn and choose people with weak wills and forcefully occupy their body. Does this violate God's law? Yes.

35:02

Question 8: How to communicate with your own soul?

They have slightly different terminology, I'll explain now. Their soul is the Spirit, that is, it is us embodied in the body. And angels and demons are spirits not embodied in a body. But, unlike Orthodoxy, angels and demons can also incarnate here. That is, they believe in the reincarnation of the soul.

The soul is the spirit connected to the life force that connects it to the body. After death, the soul of a person or any humanoid comes out and for about 40 days it stays with this soul energy. But gradually her vital energy, due to the death of the body, dissipates. And then she becomes a spirit.

And the spirit itself consists of three parts (the trinity is a symbol of everything in the world): mind, heart (the essence of the soul) and energy. Each of these parts in turn also consists of three parts. The mind is thinking, imagination and memory. Heart – feelings, desires, instincts. Energy - consciousness, emotions and will.

Will is the energy needed to perform actions. Feelings are different from emotions.

Feelings are an attitude towards something, expressed in a wordless form, and emotions are simply a reaction, the energy that is needed for the spirit to react to a change in a particular situation (external or internal).

Consciousness is the energy of thinking that is needed to perceive the world and oneself.

37:54

Question 9: Does each person have their own non-physical mentors for growth and development, and how to communicate with them?

Of course have. What is called a guardian angel in religion are spirits from a certain level of development. When we go for incarnation, we are usually given such a companion, a mentor from the highest level. Even demons are given such mentors. He needs even more care than we, who have taken on some responsibility.

In general, there are 24 spiritual levels in the spiritual world. 1 to 6 are demons. 7-8 – nature spirits, plasmoid civilizations, elemental spirits. From 9 to 16 - ordinary spirits who do both good and evil, so to speak. From 17 to 24 - good spirits, in our terminology called angels.

Every person has guardian angels, not only the baptized. Sometimes a spirit does not have an angel, this is when its higher mentors decided that it should try to live unaccompanied.

Usually communication with mentors occurs mentally. For example, a person had a good thought. He doesn't realize where this thought comes from. Mentors try not to show themselves so that a person develops independently, without relying too much on them. They believe that independence is the best condition for development.

You can communicate with mentors telepathically or spiritually. Although a spiritualistic session is considered an inferior contact, since the information transmitted by a medium during a spiritualistic session with the help of material objects will be greatly distorted by the consciousness of the medium.

40:38

Question 10: Is there Fate?

There is no predetermined fate for every person. Destiny is the way. But a person “makes” this destiny for himself by making a choice. Life in itself is neither good nor evil. It is a container of good and evil, depending on what we ourselves turn it into. Every spirit faces God's judgment

after leaving the body. A trial is a kind of analysis of life. There it will no longer be possible to say that I was controlled, it is not my fault. You will realize that you made the choice yourself. And what kind of destiny you have built for yourself depends on your inner desires, aspirations, the amount of good and evil, and upbringing. There are people who were born in bad families (alcoholics, etc.), but were able to get out of them and were able to become good. And there are counter examples. And this is a person's choice, and his destiny. Fate depends on choice.

***In order to answer the following questions, Irina needed to contact Kirchiton (planet Daraal). This took a few minutes. After making contact, Irina relayed Kirchiton's words that she was his first contactee, about whom so many people had learned. He has many contacts, but everyone prefers not to talk about their contacts, knowing that they will not be believed.

45:05

Question 11: Can a person change the past and future, control time?

If we mean a time machine, then there is no such technology. Such experiments are carried out in the Interstellar Union. There have been some successes in moving objects, but to move a living person into the past, you need to transfer him into some kind of wave form and send him back in the course of time. Such experiments are underway, but earthlings are still far from this.

There is only one way to get into the past without a physical body - this is astral travel, for this you need to leave the body and want to get to the desired period of time. And you will really get there, you will watch the events, but you will not be able to influence anything, you will be such a ghost there, because the vibrations of the astral body are different than the vibrations of the material world, they do not influence each other.

We can only change the memory of our past. But by changing the memory of the past, we change the present, and therefore the future. In general, time is only our perception in the material body. And time as such does not exist. This is our countdown to eternity. We have invented time periods for the convenience of living in the material world. In eternity, everything happens simultaneously, the present, the future, and the past. God, when creating us, already knew what would happen next to us; for him, time does not exist.

When I go into the astral plane, I catch the feeling that I have always been, am and will exist. That I will not die and have always lived. These sensations bring joy.

But in the material body we do not feel this, since our consciousness is distracted by this world in order to act in it. We do not pay attention to the fact that in our subconscious there is contact with our mind. The memory of life in the spiritual world and of past incarnations is blocked. We would not be able to live here, remembering our past lives in other worlds. We would then be living our past lives.

49:38

Question 12: What is the maximum level of energy that a person can achieve under earthly conditions without destroying his physical body?

This energy level is largely individual. For example, during my mental contact with Kirchiton, which you just observed, the flows of energy that enter me begin to move my body, so the question of not destroying the physical body arises.

How to achieve maximum energy levels? It depends on the body. We replenish our energy with the help of chemical reactions occurring in it. Due to the slow oxidation of food substances with oxygen. Oxygen reacts with various substances, and vital energy is released in the cells. To achieve the maximum level of energy, you need to take care of your body: eat properly and variedly, eat in moderation.

It is important that there is no oxygen starvation of tissues. What reduces oxygen levels? Food additives - sodium nitrate, carbon monoxide, for example, react with hemoglobin and interfere with the flow of oxygen. Parasites and various infections are also negative.

You can engage in different energy practices. But these practices are not suitable for everyone, since you need to believe in all this, first of all. Energy always follows thought. In medicine this is called self-hypnosis. But in fact, this is an order to your energy. There are healers who supposedly heal with spells. But in fact, it is you, believing in him, who gives the order to your energy and directs it to increase immunity.

Maksim Rusan's afterword:

These were the 12 questions that have now completely changed my entire life on this planet. I am grateful to fate for this gift. Now our teachers are our creators. And I thank God for giving us such an opportunity to know all this, study and convey this knowledge to all people who want it!

Participants: Irina Podzorova (contactor) and Maxim Rusan.

December 30, 2022

#54 Communication with real demons (low vibrational entities). Dark and light forces.

Path to the light

https://blog.cassiopeia.center/obshchenie-s-realnymi-demonami
https://www.youtube.com/watch?v=QUsoeT4T9YA

We ask that children be kept away from the screen when viewing this video. Not for people with weak psyches.

00:01 Introduction of participants

Maxim : My name is Maxim Rusan. I am a lawyer, economist, psychologist, esotericist, energy practitioner.

Irina : Hello, my name is Irina, I am a contactor with extraterrestrial civilizations, and MidgasCaus from the planet Esler and LiShioni from the planet Shimor are with us today.

Maxim : And we will also invite Erwin, the 37th density level of the plasmoid civilization, in order to go to Irina and see her energy structure.

Vladimir : Hello, my name is Vladimir, I am one of the moderators of this conversation. I would like to introduce Ekaterina Torshina. Well, she will speak about herself now. She has a special situation there. She communicates with spirits of different vibrational levels - we will now find out which ones. Kat, please, you have the floor.

01:13 The story of Catherine. The demon speaks through her.

Ekaterina : Hello, my name is Ekaterina Torshina, from the city of Murom, just an ordinary person, but in 2018 the following story happened to me, when after contact with a Ouija board, a homemade Ouija board, strange things began to happen to me: I began to feel the touch, rustling, my facial expressions began to change. If I relax my body, it *will behave strangely* ... Something like this. I just relaxed my body a little... My heart is beating very wildly, my heart is beating very wildly... quietly, quietly, calmly.

Vladimir : Katya, that is, you still retain control over the situation?

Ekaterina : Yes, yes, I can maintain control, absolutely true. But I practically don’t see the pictures, that is, I don’t see with my physical eyes, with some kind of inner eyes. Very blurry pictures, and perhaps somewhere my brain is coming up with these pictures. That is, they speak most of all through my throat chakra and throat. And my facial expressions change. That's it.

02:45 Appearance of a demon after a seance

All this happened after I told fortunes on a Ouija board. Accidentally or not - I want to find out why this happened to me (after all, this does not happen to every person) and why, and who is really next to me. He calls himself Lucifer, by the way. Its light side and dark side. There was also such information - I don't know whether to say it or not.

Vladimir : Speak.

Ekaterina : He said that before I transformed into Katya Torshina, I insulted him with something or something I told him - in general, something like that. Of course, I don't quite believe every word these creatures say. I always feel some doubts, somewhere. That is, I have a brain, I don't trust everyone. That's why I don't understand what's wrong with me, why this happened to me. So it goes. But you saw it all. I feel an unreal fear in my legs, someone's fear, or someone is next to me. Someone is very afraid - most likely of your high vibrations.

03:59 Irina, Mead and Erwin go to Catherine in their astral bodies.

Vladimir : Katya, say that we will not cause any harm and will try to behave carefully. There is no danger to these creatures. And then I give the floor to our friends, Irina. And perhaps you need to come there in your astral body and look. Please, Ira, you have the floor.

Irina : Well, yes, he says, we have to go anyway...

Maxim : Katya, will it be possible for Mid, Irina and Erwin to come to you in the astral plane?

Ekaterina : Of course, of course.

Vladimir : Okay. Katya, you will just need some time there, they will visit you now. Because we are heard through you by those who are now with you, your companions (let's call them that).

Ekaterina : *They hear* .

Vladimir : Great. Does this entity have a name?

Catherine : *Arakabakarasafaka* [inaudible].

Vladimir: Was that the name?

Ekaterina : *Yes.*

Vladimir: I want to say that we will do absolutely nothing now. We're just watching, so don't worry, we're just watching. Moreover, we are watching with Katya's permission.

Irina : Now we're just looking at who is nearby and how much right they have to do what they do.

Maksim : It's hot, Volodya, right?

Vladimir: I'm already feeling feverish. Well, I can't pronounce the name, but apparently he's also acting. I'm kidding actually, it's just not very cold here. Although anything is possible. In any case, I am sure that this will be useful communication for everyone, including those who are with you, Katya, because anyway, they are probably also trying to figure out what is happening to them or what is happening to us, or together. And therefore it is useful for everyone. Everything is part of divinity, including them, us. We just made different choices - it happens. It happens. Therefore, you see, in my opinion, it is very good that you retain this control over yourself, and therefore, in fact, we can communicate. Probably, this is also your certain strength or merit, or both. So now I'll do one more thing here.

Ekaterina : Well, they said all sorts of crazy information. Of course, I didn't believe it.

06:44 Catherine's attitude towards the church.

Maxim : Katya, do you go to church?

Catherine : To church? I used to go and I had a cross, I took it off because they told me that "God is punishing you, he doesn't love you, he despises you."

Maxim : Who said?

Ekaterina : Well, I don't know, I don't really see them, I want to find out who is saying this and who is here with me.

Maxim : And when you wear a cross, do you feel any different?

Ekaterina : No, why did I take it off? Because it was when I was reading the prayer that I felt such inner anger, and I just thought, they still don't help me, and I took off the cross and stopped reading the prayer, and put it somewhere. I have two icons of Jesus, and sometimes I turn to him. Well, I'm applying in this state, because I no longer know: what, they can't hear me, or what's happening to me. I'm also not that kind of person, I'm very sensitive, I take everything very close to my heart.

Maxim : Do you communicate at all? Do you have any girlfriends?

07:58 Strengthening contact after a stay in a psychiatric hospital.

Ekaterina : No, I don't have any friends. I had a friend, but after I was in the hospital, it was a long, long time ago, I was, by the way, in a psychiatric hospital - I even wrote about it and spoke on video when I made the video. They wrote me a diagnosis (although I didn't see this diagnosis, they told my mother) – they wrote psychosis.

Vladimir: What was the treatment protocol, Katya? What medications were there?

Ekaterina : I don't remember the names of the medications at all now. Regidron, or something, I don't remember it, it was called "R" somehow, I can't say. They gave injections.

Vladimir: Was it Haloperidol or its derivatives?

Ekaterina : I don't remember.

Vladimir: How long did you spend there?

Ekaterina : I don't remember, I don't remember. And when I returned from the hospital, these contacts became even stronger. It seemed strange.

Maxim : Did your contacts become even stronger after you were in the hospital?

Ekaterina : Yes, yes. Before the hospital, I did not feel any touches, nor rustling, nor did anyone act through my body. I just heard some kind of inner voices, my facial expressions changed. For example, even this happens now, when I'm lying down, for example, I'm not sleeping at this moment, and my fingers or the blanket begin to move a little, as it were, a little bit. I even feel as if someone is trying to touch me, and there were also (I don't know, maybe even cut this out) intimate contacts.

Maxim : With full sensation, with orgasms, with everything, right?

Ekaterina : Yes, yes, yes, absolutely right.

Vladimir: Was this on an ongoing basis or were there some cases, once or twice?

Ekaterina : No, it wasn't completely constant. Now it has practically stopped, these intimate

contacts, they are no longer there, but they were like that, I somehow didn't even sleep all night, there was a lot of adrenaline.

Vladimir: Why did they stop, on whose initiative?

Ekaterina : Maybe I mentally didn't want to - somehow, to be honest, I can't say specifically.

Vladimir: I see, I see.

Maxim : Did you end up in the hospital after you started practicing with the board?

Ekaterina : Yes, after I started practicing with the board, I don't remember, a month passed, and then, before I went to the hospital, I couldn't control myself, and my mother called an ambulance. She saw that something was happening to me, she became very worried, she cried a lot about it. Now I control myself, but then it was as if, maybe, this was the first time this had happened to me.

Vladimir: So you think that being there did you some good?

Ekaterina : Yes, you can say that.

Vladimir: Here is Ira now, she went to the astral plane, she, in essence, went to you, not in essence, but that's the way it is - she went to you.

Maxim : You have it there now with Mid, with MidgasKaus. She is there, in the astral plane, and for such sessions, when we understand that these are either low-destructive, low-vibration plasmoid civilizations, or demonic structures, we also invite Erwin. Erwin is from a plasmoid civilization of the 37th density level, a rather interesting civilization, he is the guardian of the order of magicians of their civilization. That is, all these fantasies that have been written, science fiction about the order of magicians, something else, some new universes - this is precisely the transfer of information from precisely these civilizations. In general, are you ready to clean this up from yourself? If we give you some specific input, if we ask, say, Erwin, to block your communication, or do you like this communication?

12:18 Thoughts about mysticism, destructiveness and fears.

Ekaterina : Well, how should I say, I have always loved something mystical. I think this is my gift, this ability or not? I would like to develop this ability, but not in the dark side, to hear these bad things there, but in some light side. Of course, I would like to get rid of the dark side.

Maxim : Do you often have destructive thoughts: pain, resentment, hatred, anger?

Ekaterina : Often, I myself am a restless person, my mother has a goiter, she seems to do the same thing, she raises her voice, I react to her voice. I don't know if I have a goiter. They only checked me at school and didn't say anything. And she has had thyroid disease since 2001. And who knows about thyroid disease, this includes increased nervousness,

Maxim : Well, yes, this is the absence of iodine in the blood in large quantities, all of it goes to work out the negative.

Ekaterina : Yes, she has a diffuse toxic goiter.

Vladimir: Katya, did you have any thoughts of suicide?

Ekaterina : There were, I even drank, tried to drink dishwashing detergent. When I used to quarrel very strongly with my mother, I wanted to destroy everything around me, just destroy everything. Maybe because of my these things they came. They say that they choose according to the energy that suits them, probably. That's what I heard.

Vladimir: What were your hopes, if you had managed to commit suicide, what were your hopes, what should have happened because of this?

Ekaterina : Yes, I didn't even think about it, to be honest. By the way, they told me that I would only live 5 years. They even said what I would die from—these ones. Well, I call them spirits, in general.

Vladimir: How long ago did they say this, and what will you die from, according to them?

Ekaterina : Well, they told me, somewhere back in 1919 they said and repeat this several times, that I would die of a stroke, that is, I would see their manifestations with my physical eyes and would be very frightened. By the way, they sometimes appear through my face in the mirror, that is, I see myself, my face, and I feel as if it is not mine. I'm even scared, that's how my head seems bigger - that's my feeling.

14:55 The purpose of the demon's contact.

Vladimir: For what purpose are they communicating with you? Do they somehow explain this?

Ekaterina : I already told you that I was told that... - there were several versions: before the hospital they told me (don't faint now) that I was the bride of Michael the Archangel [*And only when editing this video, I, listening again, compared how she in a previous incarnation she could have offended this demon (the bride of Archangel Michael)*]. Of course, naturally, this is real nonsense. And then they told me, lately they have been telling me that I am the bride of Lucifer. Wife, beloved bride. Of course, I kind of laugh it off a little to defuse the situation,

otherwise they would get nervous. It is the one who is next to him who calls himself Lucifer.

Maxim : Katya, look, I'm communicating now, when you say "bride of Lucifer", you even seem to have some sort of spiritual inspiration. In fact, maybe you like being Lucifer's bride?

Ekaterina : You know, I always... Lucifer to me, I don't know if it seems to me or, again, there is something else in me, maybe some kind of energy has probably moved into me, and this energy probably , I like Lucifer, and this is transmitted to me and the desire to be with Lucifer. And I imagine that he is so handsome, he has dark, long hair. Therefore, I don't know whose desire to be with Lucifer is mine or someone else's. [*At that moment, when Irina went with Mead and Erwin to Katerina in the astral plane, something causing slight fear moved towards me from there and studied me* ...]

17:20 Description of contact by Irina Podzorova. Portal, demons and plasmoids.

Vladimir: Ira came to us.

Irina: She has a portal at home, but that's not the point. She has two low-level disembodied spirits and three plasmoids in her field.

Maxim : She has two demons and three plasmoids?

Irina: Yes, she communicates with them there. Well, basically, the girl, as far as I understand, is a very, I'm not afraid of this word, gifted medium. They love such people very much. But what set her up for these vibrations is, firstly, she has such (sorry if I say something wrong), but I have such anger at mom or dad, as far as I understand, and in general at men, some boys, which even burned me. Anger, resentment towards everyone, and not just anger, resentment - with such hopelessness to change anything in the world at all.

Ekaterina : By the way, I don't want to get married and have children, I don't need men.

Irina: In your relationship with your parents, you have already completely told yourself that they do not understand you, and you seem to be angry that you do not have the opportunity to live without them. Hopelessness and at the same time the understanding that it cannot be otherwise, and you cannot change this situation. Here is Mead, to set you up for a higher vibrational contact (and anyway you need to set up a higher vibrational contact, you can't completely close it there, this is a request from her Higher Self).

Maxim : This is her energy structure, and this is her process, perhaps, of teaching her to perceive other energy-information fields in the future.

Irina: And in general, the first demon and the second demon...

Ekaterina : What's the demon's name at least?

Vladimir: Do they really relate directly to Lucifer?

Irina: Well, only Lyutsik gave his name.

Maxim : Lucik or Lucius.

Irina: And the second one is something like some kind of Kuzma, and the plasmoid is either Ho, or Roy, or some other such names. And the plasmoids, two are the elements of the earth, and one is some kind of nature, but not a brownie - either forests, or... some kind of nature.

Ekaterina : But I think that somehow I could see the forest, some kind of forest always seemed to me.

Irina: Lucius – he's a higher level there, he's fifth there, in my opinion.

Vladimir: It's not Lucifer, it's just a demon from the fifth level who took that name?

Irina: They like to call themselves there, as far as I talked to him, and he said that they like to call themselves by this name.

20:50 Demons are like teachers for raising vibrations, for transferring contacts to another level.

In principle, they are "light bearers"; almost all of them sincerely believe that they bring light. And I talked to him, and he said that they were generally sent to her, that is, to you, as a teacher, to learn not how to get rid of them, but to raise the vibrations in yourself until they go away on their own.

Maxim : That is, you need to learn how to take your contacts to a completely different level.

Irina: Even if now there are rituals of expulsion or something else, this is only for a while. If you don't remove these in yourself, you have them in your astral body opposite the 4th energy center. I approached you, by the way, did you feel me?

Ekaterina : I felt a strong heartbeat. My heart was beating very hard, pounding.

Irina: She practically has this 4th energy center covered with resin, black viscous resin - it's

not theirs, it’s your own, you yourself. Not only have you forbidden yourself to think about love, you don’t believe in it at all.

Ekaterina : Yes, absolutely right. I stopped believing in love.

Irina: Firstly, your environment needs to be changed, because there you have...

Ekaterina : I understand, I understand. I have absolutely no friends. Only Lyoshka is my brother, I have no one else.

Irina: It is best for her to be in the company of people who understand her, who will not respond to this disbelief in love, some cynicism even in relation to these things that are sacred to some, they will not respond with irritation, but will understand and correct love with understanding. That's when she has a chance to believe. When she herself believes, she will begin to forgive everyone, she will begin to justify everyone who offended her. And in this state, the larvae will first provoke her - throw up memories: “Well, remember what she did to you then, and you remember what he told you then.” If she drives away these memories: “Well, so what, what did he say,” - answers: “Now it’s already passed, now there’s a new life, there’s no need to remember it,” - and forgives, - then she will be cleansed of this negativity and transform it into light. And these two demons, too, when they feel that she is leaving them, they will try to leave her, because they think, by the way, that it is right - what she is doing. They believe that she is being treated unfairly, that she is right in everything, and, on the contrary, they set her up to behave this way. They actually have constant mental contact there. She simply no longer distinguishes where her thoughts are and where theirs are. It's all one thing for her. And they talk through you - most often demons can do this, but this is less common. These are plasmoids, among them, like among people, there are both good and evil - just as among people there are good and evil people. They are also angry there, they are embittered towards the whole world. We didn’t ask about their level there, we didn’t look at it - it’s clear, at least not the highest level, but 9-10th. Katya, in order to get rid of this contact, you first need to understand that if you get rid of this contact, then you will not get rid of your abilities completely, you will simply tune in to a higher vibrational contact that will not bring you inconvenience, bring rejection from other people - after all, you have this, because of these contacts of yours you have condemnation of other people, and this causes resentment in you, and a feeling of guilt, and what anger: I am a female person, but also I was burned! In order for beings in the astral body like Erwin, like Mead, who have high vibrations of love, to be able to communicate without discomfort for themselves, they must feel other energies from you that will not burn them every time, because low vibrations, when they connect with the high ones, they evoke such a feeling, especially if the spirit is open, as if it had been whipped by nettles. You need to understand that if you refuse contact with these low ones, you will in no way give up your gift of hearing, you will simply move to a new level when you hear higher vibration ones, who will not wish you harm, who will not wish evil upon others, they will not send you thoughts that everything is bad, they will not plunge you into depression, despondency is so constant, nothing makes you happy, nothing is good. Even if someone tries to do something nice for you, you begin to suspect some kind of trick.

Maxim : As Dmitry Anatolyevich said, there is no money, but you hold on.

Irina: I hope that you understand what I'm talking about now?

Ekaterina: Yes.

Maxim: You know, I can't help but tell you about this now. Honestly, I'm sitting and, you know, now at this moment in time I was plunged into the past, when I listened to Irina, when I understood what was happening to you, I was plunged very much into the past. I was once in approximately the same state as you. I hated everyone so much, I hated women so much, I hated people so much, I was so embittered with them that I began to slowly die and rot from the inside. That is, I completely began to destroy myself with these destructive thoughts, even down to my physical matter. They lead you to this, they lead you to destroy yourself. But, feeling myself here now and understanding what I'm doing now, who I'm next to, who I'm communicating with now, I clearly understand that if I hadn't sunk to the bottom of this hatred, I wouldn't be able to now appreciate the love I have for everyone. The lower you fall, the deeper you can hate everyone, the more projections of negativity in your life - you sink to the very bottom, and from this bottom even the smallest piece of light seems like a huge flame. And every time you rise higher to this light, you clearly understand that you were lowered there only so that you could learn to appreciate this light. I actually feel great that you like it. It was not in vain that I asked why. Irina just answered me: you are a born medium. In your entire energy structure, when you were told that you were the bride of Archangel Michael, this was a translation of the fact that you have the ability to communicate with spiritual structures. And the fact that they are now nearby, they are with the permission of your Higher Self, with the permission of your guardian angels. That is, when you climbed into the Ouija board, you gave everyone the command that I was ready to do what I could do, I was a medium. And as soon as you climbed into this board, your guardian angels gave you permission so that these destructive spiritual structures could come to you. For what? How from kindergarten, from the very bottom, learn to rise, learn to stand up, learn to love, learn to appreciate even these demonic structures that gave you the opportunity to rise to this light. And I have a big request to you - thank them for every contact with you, whatever form it may be. Say: "Thank you, you are my teachers, I need to move on."

Irina : There is no need to be angry with them.

Maxim : So, you need to read literature that is quite highly vibrational...

Ekaterina: By the way, I have 8 biblical books: the Holy Gospel and everything connected with God. I really enjoyed reading them, but now I have stopped reading them. It was suggested to me that God...

Maxim: Katya, do you now understand who is nearby and, in principle, why?

Ekaterina: Yes, yes.

Maxim : I really wish you great light and great luck, because your broken heart will give the opportunity to grow a completely different heart, even larger, even more loving, even more appreciative and even brighter. Because when you don't have a heart, you have no other choice but to make yourself a new heart and nurture it in love. I understand you very well and even understand your current state in which you are. I feel very good about you in this regard. I really, I really want to cry, I'm sitting here - you can't imagine how much I feel for you right now. But you need to get out of this state, in any case you need to look for light, you need to look for love in everything, you need to look everywhere for moments that will give you growth

and development of your spirit, because the task of your incarnation is to be a medium here and help everything that surrounds you , raise vibrations for growth and development. These demons are just a small kindergarten for the growth and development of the spirit. They are at the lowest level. Yes, they are strong, yes, they are interesting, yes, they are powerful, but when we outgrow this kindergarten, we then go to school, after school we go to university. Now, at this point in time, you have been given the opportunity to look at the entire structure as a medium from the lowest, from the very kindergarten, and learn not to control them, but to be harmonized with them, because if you continue to work as a medium, such demonic structures with which You are working now, you will come across them very often. 80% of people live in negativity and attract these structures to themselves. Therefore, you now have a very good school, you now have a wonderful moment to learn to harmonize with them and understand that you need to grow further.

Ekaterina: Yes, I understand. Thank you. A breath of fresh air for me.

33:53 The task of the Cassiopeia project when working with mediums and contactees.

Maxim : We are actually always in touch, we are in touch with contactees, with mediums. That is, our task is to still give the opportunity to increase the level of awareness to everyone who does not fully hear, does not fully see, but has very serious structures in order to interact with them in the future. I clearly understand who you are, what you are and why you are. Therefore, it will be very interesting and pleasant for me to work with you in the future.

Vladimir: You can also write to me if you need any urgency.

Maxim : You and I, we will support you in any case and understand perfectly well that everything that is happening to you now is happening for a reason. If you, with your abilities, learn to love, you will have no price. What's the problem? The problem is that they are not embodied now. And they are waiting for their huge turn for this incarnation. And their task (sometimes it happens) is to fit in without a queue, so that they can be realized. And in order to fit in without a queue, you need to be brought to a state where you stop controlling your soul and your body and give it to them, so that they can be here for at least a second. There is no time for them, so even a second in you is like a gift for them.

Ekaterina: I understand.

Maxim : They feel everything on a different level, they feel on the energy level - thoughts, images, emotions, perceptions - everything you think, they see it all in projection. Therefore, you can play with them, you can be friends with them, you can harmonize with them, you can communicate with them - there is no need to be afraid. Because these are your teachers at the lowest, lowest level that you can have. As soon as you begin to study and work with them, I emphasize the word “work”, that is, to harmonize, so that you can correctly explain something to them, correctly explain to them your desire - this is also important, later in life you will have the following teachers. When will you outgrow and say: “That’s it, I’m tired of it, I want to go to the light, I want to bring happiness to people, I want to finally learn to love my mother, I don’t want to curse my girlfriend, I want to have a man next to me who understands me like this.” Say hello to your huge one, Lucy.

Ekaterina: And I also thought: “How cool, Lucifer himself!”

Vladimir: Katya, just tell them to yourself there without us that you still love them all, no matter what or even because of it, you love them.

Maxim : You see, the thing is: if you start to love them, they will have no other option but to leave.

Vladimir: Well, or you need to change in order to correspond, to raise the vibrations in order to correspond to your love, but this is already their serious work, they need to do a lot of things.

Maxim : I'll tell you honestly, you were deceived about your five years.

Vladimir: Just like they were deceived in that it was Lucifer directly, and in everything else.

Ekaterina: I understand.

Maxim : I’ll tell you, as a psychologist, why this was done. In order to set an anchor for you so that you can wait for the fifth year. They will make some kind of light manifestation in the mirror, and accordingly, with this anchor, the manifestation that they spoke about will work. So don't believe it. You won't die soon, Katya.

Ekaterina: I’ll still live.

Maxim : Yes, and if you become a good medium - I believe that you will become a very good medium in the future - then you will live a very long time. Erwin wants to say something.

37:46 Erwin's help in closing the portal. An artifact for power over demons.

Irina : He came now, he was with her. He looked at the portals there. He looked, the portal had nothing to do with it. He is very old there, and, in principle, he hardly even acts there - not in the world from which, he says, she feels spirits, he can, if she agrees, he can try, firstly, to give her such a type an artifact, just not an artifact, but a type of rod so that she could have power, power over them, to be sure, because when he looked at the contact now from the side, when she was sitting and he was standing next to her, she feels insecure with them, she seems to belittle herself.

Maxim : Katya, do you want an artifact? Do you want a scepter to control them?

Ekaterina: Yes.

Maxim : This is the first time. Never once, Katya, never suggested it to anyone. This is the first time I've heard this.

Catherine: With love and gratitude I accept your gift, Erwin [*We cannot further show how this happened. But Katerina did not accept this artifact easily. But then, thank God, everything worked out!*]. I saw.

Irina : What is he like?

Ekaterina : It looks like some kind of ruby, there was one at the top. Very similar to the wand from the animated series Sailor Moon, anime. It's like Sailor Moon's. How she protected from evil spirits.

Irina : In the future, to work with him, if you need to protect yourself from the bad actions of these plasmoids that are next to you, but he also partially protects from demons, at least they cannot do it without her will. If you feel the influence of any entity, spirits there, invisible entities, you mentally remember that you have it, you will always have it in your energy, in your aura, it will be near your right hand. You simply remember this image that you see now, take it and physically squeeze it just like that and direct it to this entity that you see next to you. You close your eyes and fixate the space where he could be. You point the wand, with this ruby that you see, at it and say: “I forbid you to act in my body without my will with the power of the magic of ice fire.” It contains the energy of many worlds of Orion, which will not allow any low-vibrating energy to act. This a special gift for you, so that you can more, more harmoniously go through your development path that you are on. You have all this for a reason, your contacts. This is really, as Maxim said, so that you can learn to contact those with higher vibrations.

Maxim : Yes, and I suggest you work with the demonic structures that are nearby now, who are friends with you, also with this rod. See how it affects them too.

Irina : And when you direct and speak, you must say it boldly, but without objection. Just calm and confident. Do not be angry with them and do not be afraid of them, that is, do not show any negativity - then he will show his strength and guide them, you will see for yourself.

[*If you emit LIGHT, then no darkness can harm you! The best friend of DARKNESS is FEAR*].

#66 Physical fields, levels of matter and deciphering crop

circles from the perspective of aliens

https://blog.cassiopeia.center/fizicheskie-polya-urovni-materii
https://www.youtube.com/watch?v=bliLm1QS8wo

00:00

Guest Oleg: Good evening, Maxim. Good evening, Ira. Irina, who is in touch with us?

Irina: Hello, MidgasCaus is in touch with us from the planet Esler.

Guest Oleg: Great. Good evening, Mid. Greetings. Our topic will be a continuation of the energy component, the component of matter, energy fields and energy matter. I think the topic is not very interesting for everyone, but for the scientific community it will be very relevant. Because many struggle with the energy component. We understand that our earthly science has not completely reached a dead end, but it does not provide answers to the questions.

Irina: He says: “Yes, I agree that your theories of natural sciences are far from the concepts with which we describe the manifestation of the material world. As I said earlier, and as Raom Tiyan said, this happens in an obsession with the materialism of perception.”

01:34 What three main levels of Reality can be distinguished?

Guest Oleg: Great. Therefore, I will remind our dear friends of the important first topic that Maxim (the other Maxim) raised in a conversation with a ufologist. It was then that a very fundamental understanding of the three levels of the five components of matter was heard. Let me remind you again, because in conversations, even in scientific circles, this is difficult to convey. There's been a little confusion, so I want to clear things up a bit. When you talked about the first, second and third levels, then turned it around - first, second, third, it turned out to be confusing. Let's be clear, let's say: the lowest level of matter, the middle and the highest level. I'm just repeating that lecture. The highest level of matter, if we speak, is the gravitational component. The next, middle level is energy connections and structures. And the lowest level, there are five components of matter: electricity, magnetism, light, heat and radio waves. Did I say it right?

Irina: Yes. You have listed the energies contained in substances.

Guest Oleg: In substances. At the lowest level, i.e. at the level of a substance that we can touch, feel and knock this energy out of it. Right?

Irina: The entire universe consists of three large structures, which are called the “dense

material world or physical Universe", the "subtle material world or plasmoid levels" and the "Spiritual world".

Guest Oleg: We will now be interested in the material world, because it is in this field of knowledge that we have reached a dead end. All materiality rested on materiality itself. Therefore, I would like to go in this direction and give some clarifications and clarifications.

The guest displayed five drawings on the screen.

Guest Oleg: He came up with five theorems from crop circles. What did he see?

There are two other drawings on the screen.

Guest Oleg: This is a different person. It's called a pentagram, but this will already have something in common with the five components of matter. Here's a pentagram, see?

Irina: I see.

Guest Oleg: When he analyzed this theorem No. 1 *(first picture)* , he laid out all the components according to decibal values in a certain series. He got the number 264 *(on the screen)* . I'd like some comment on this before I go any further. Otherwise, everything I say will make no sense.

Irina: Mead says: "This man deciphered several crop circles and deduced the same structure in them, right?"

05:13 How was music written based on the diatonic series of frequencies?

Guest Oleg: Yes, he saw the structure, saw fractality. He determined that this was the first, solid one. It is divided into other fractalities along this series. *(Displays on screen).* Here it is, called the diatonic series. Integer numbers appear here. This is difficult, of course, to explain simply. This is 0-2-4-5-7-9-11-12, and then comes 264. These 264 are divided by this series.

I understand that there is some confusion. Let me present you with these frequencies in the diatonic series (displayed on the screen). Here they are (33-66-88-132-176-231-264). 264 - this is where it goes (draws an arrow from right to left), and then "zero". He derived these fractal frequencies, which are broken down into these components, from crop circles. Now, I've broken these components down.

I will give you the following figure (33-66-88-132-176-231-264, respectively DEFGABC). These are the notes: do-re-mi-fa-sol-la-si-do. Here only "to" will be "zero". These are the frequencies he derived. I just divided them according to his formula, into these frequencies. But another

person wrote music based on these frequencies and presented it at the conference. Everyone was fascinated by the music written on these broken frequencies. The fact is that our musical staff is logarithmic, and music does not always sound harmonious. He derived it all, Hawkins, from crop circles. Please comments.

Irina: First, please indicate where under the letters which note is.

Guest Oleg: This is the note “C” - 264. And this is decreasing. "Before" will also be "zero". (Shows) Do-re-mi-fa-sol-la-si-do. And then it goes along fractality, I didn’t continue, but I compiled this series before ultrasounds. That is, I have this row. But then we just move on, we can take the same fractals, and the music sounds completely different.

Irina: Please show the relationship between the numbers shown here and the notes. What formula did you derive from?

Guest Oleg: Okay, I understand. *(Laughs)* Great, I like it. Do you see *(shows)* this is 1/8? 33 is 1/8. Then comes 1/4, then 1/3, then 1/2, then 2/3, then 7/8 and 1 (shows). He saw that these were all whole numbers, i.e. there is the fractality of dividing the whole into components. But each component is an integral component.

Irina: Why after 1/4 comes 1/3 and not ½? Why didn't he split it in half again? After all, after 1/8 comes 1/4.

Guest Oleg: Absolutely right, after 1/8 comes 1/4. She is there 1/4. There are 1/8, 1/4, 1/3, 1/2, then 2/3, 7/8, and a whole.

Irina: Now he is trying to understand his train of thought.

Guest Oleg: It’s just that he was derived from this *(shows the first drawing).* That is, Hawkins saw the integrity of 264, then all the dimensions.

Irina: Oh, can you see the original circles, not diagrams?

The guest shows a diagram on the page of the book.

Guest Oleg: That was the figure in the fields. He began to withdraw from her.

Irina: Five-pointed star?

09:32 What graphic symbols are symbols of the three-dimensional material and Spiritual world?

Guest Oleg: In particular, yes. There was a star and triangles. And also this was *(shows another picture).* It was all in one place. Here are some of the theorems he derived. These four add up to one. There was this crop circle. He calculated them by size. This is a professor, he works at many universities, not some kind of “homemade guy”.

Irina: Please show me the diagram again. He (Mead) will look through me. *(Looks).* Yes it is clear. Although these circles are Tashigan, these symbols are widely known in the circles of researchers of the galaxy and the Interstellar Union. A drawn circle in a triangle, and they were repeated there, indicates that this triangle is a symbol of our three-dimensional space. And the circle inscribed in it is a symbol of infinity, a figure without corners, in this case, a circle. That is, what kind of infinity can there be, what kind of eternity can there be in the material world, where everything is changeable? This means that this is a circle that goes beyond the material world.

Simply put, a circle is a symbol of the Spiritual world. And why was it inscribed in a triangle? Because it was shown there that he is at the center of everything, that everything comes from him. This was a symbol of exactly what we were talking about earlier. This is the one in the middle - a triangle inscribed in a circle.

Guest Oleg: In general, can we ignore the dimension that Hawkins derived? *(laughs)*

12:04 Which number of vibrations is responsible for three-dimensional space?

Irina: The fact is that his theory is interesting in itself. To see how he arrived at these results, you need to look at the sequence of formulas and calculations he used first. Because I can only say that as a result he got the number whose vibration (if you add its numbers together, it will be “three”) is responsible for three-dimensional space. *(The ufologist displays a series of frequencies on the screen).* This is an esoteric teaching for you, but for us numerology (i.e. numerical codes, their properties, their energies) is one of the parts of our science. We did not exclude the Spiritual world from there.

Guest Oleg: That's the whole point!

Irina: According to the laws of numerology, it is customary to add multi-digit numbers to one in order to find out which vibration it belongs to. For you, this “three” is responsible for three-dimensional space. And besides, that sequence of numbers that is here...

Guest Oleg: Here. Let me tell you a little more about what I saw when I brought it out. If we look at 33, then 33 is only divisible by three and the component is 11. So those 11 players kicking the ball are there. 11 priests, that's all there. This is for guys interested in esotericism. Therefore, 33, as the last fractal component of 264, is already divisible only by 3. In which 11 is another integral fractal number. 11 is no longer divisible by anything.

14:37 How are the intangible properties of numbers calculated?

Irina: He shared. We calculate differently, not by division, not by multiplication. We have slightly different formulas and we calculate the properties of numbers using vibrations. Numerical vibrations are immaterial... Numbers are their material embodiment.

Guest Oleg: Yes, yes, stop. I'll stop and give some clarification right away. Why are the vibrations of numbers immaterial? Because this is just a paper representation of physical processes. So that people understand that all the numbers are just a convention, nothing more.

Irina: Yes. But those numbers that are symbols are a reflection of real spiritual processes.

Guest Oleg: Therefore, we come to the 33rd. 33 degrees of Freemasonry is the first integral faction, already transitioning, which consists of small factions. In particular, 11+11+11 (first level) will be 33. 33 is the first solid faction of the second level. Again, this is a certain convention of representing 11 in 33.

Irina: Just look at the fact that according to the properties of numerology, you made calculations through division. If you look at the number 33: two threes add up to six. According to the laws of numerology, 3 and 6 are antagonist numbers. Speaking in astrological terms, through the vibrations of Mars and Venus.

Guest Oleg: This is the next transition, yes, yes, yes. 3-6-9 is a transition to the next category. Already wonderful. At least that's how we saw it.

Again I return to those musicians who want to write new works. They were written using these frequencies. When this piece was played, not on the logarithmic staff, but on this linear staff (diatonic number, diatone), people said that they wanted to listen further. This is a great effect if musicians want their music to be listened to. When music was written in a new range of notes, people were just fascinated and said: “We want to keep this going. We don't want this music to stop." That is, the effect itself appeared when music was played, superimposed on a new harmony.

Maxim: Oleg, I am sure that these numbers can be superimposed on the Fibonacci effect.

Guest Oleg: *(laughs)* 100%! This is 1-2-3-5. I've already done this and reviewed it. If we imagine it in a different integrity, then there will be 1-2-3-5, there will be a golden row. Absolutely right. I would like to tell you this separately, because it is very interesting here. The thing is *(shows a diatonic row)* that if this is another whole row, then it also looks like that. I'll give you another picture later.

The whole point is that the harmony of space is one: either it is sound, or architecture, or matter. We have lost the meaning of reproducing this harmony. I am studying this and with this I want to restore everything. After all, they say that architecture is frozen music. Why? Because each proportion of architecture has, relatively speaking, its own standing wave that can resonate and sound. You enter a building and you want to be there. It harmonizes you. You go into another one, and you want to quickly escape from there. We lost integrity due to

the introduction of the metric system. I don't want to switch gears; I need to give a separate lecture about it. But why did I start with this? Because it seems to me that this is very, very important for us to see frequencies, start writing new music, start writing a new word. We would fit the frequencies around us and their division into the golden series. Although, I understand that this is all a convention, right?

Maxim: Oleg, here "zero" should be placed at the end, after 12 (in the diatonic row).

Guest Oleg: There is a repeat, this row (on the screen: 33-66-88-132-176-231-264, respectively DEFGABC). For musicians who want to change their tune, I can further give the division formula when I got to ultrasounds. Here is "before", and then again it goes 264, it goes again. That is, 264 is the second integrity. The first integrity is 33, which consists of three 11s. And 11 (this is a convention!) is no longer divisible by fractality, so we can imagine that this is an atom of matter. As Mead told us: "It (the atom) is not divisible. It is you who divide it into electrons and protons. This is your schizophrenia." *(laughs)* It is indivisible, but it consists of three [components], which give a presentation: 33, then the next integral fractal - 264, and then there are these fractals *(selects, displays)* , for example, take the Petal of Life. See, no?

Maxim: Flower of Life, yes.

Irina: Yes, I see.

Guest Oleg: Yes, Flower of Life. This is the same fractality within fractality. A single whole that blossoms into a flower.

Irina: Three, right? There's the first, second, third.

Guest Oleg: This was the first subtopic that I wanted to ask about, Mead's opinion on this unique issue.

21:10 Crop circles in the form of a Tesla coil are an Eslerian sign from school textbooks on the alien universe.

I want to move on to the second - redistribution of field energy. I mean the field of energy, and not the fields of wheat for which they are given to us. *(laughs)* I'll introduce you to what we have here *(on the screen there is an alien drawing in a field of wheat).* This was where Hawkins lived, in England. This is the well-known Tesla coil, right? That is, it was represented by crop circles. We know that Tesla was the first to wind this coil at the beginning of the twentieth century. I'd love to hear your comment.

Irina: Now he (Mead) will look. Spiral, yes. The most interesting thing is that this is exactly the Esler sign.

Guest Oleg: Esler's sign? Very interesting. Oh, then I'll have a whole topic on Esler! And there will be many of them.

Irina: These two points, which are on the left and right...

Guest Oleg: Yes, yes, yes.

Irina: Now I will explain this drawing. What did it mean to those who made it? This sign, one might say, is painted on our textbooks. They can hardly be called a physics textbook. More like a textbook on studying, so to speak, the universe. For schoolchildren, let's say so. This sign. One, two, three, four, five: each line represents a specific plane of reality or dimension.

Guest Oleg: But it will be according to vibrational frequencies, that is, self-investment is taking place.

Irina: Yes. There the vibrations naturally increase. The ball that is to my left...

Guest Oleg: Upper or lower?

Irina: Nizhny. Yes this. The line that goes [from it] means for us and science (we draw this for children) our three-dimensional physical Universe. Here she goes *(shows the path from the outer bottom point in a spiral inward).* Next from her, to the right...

Maxim: We spin it in the opposite direction.

Shown on the screen.

24:21 What graphic signs symbolize the closest vibrational level of the Spiritual world to the material one?

Irina: Yes, to the right of her, next. The next line on the right, not a ball *(shows).* Yes, which goes closer to the center. It means the next dimension, the next vibrational level of reality, which is precisely called subtle.

Guest Oleg: Does this mean that they connect in the center somewhere?

Irina: *(laughs)* Now he'll tell you where they connect. The next, second turn from the ball goes to the center *(show)* - this denotes the closest vibrational level of the Spiritual world to the material one, what you call the astral plane, the astral world. Next comes the fourth.

Guest Oleg: Where from - from the edge or from the center?

Irina Maxim: We need to show it.

25:45 What does the fine-material world of plasmoids mean?

Maxim: *(shows)* Here is the first line, the second line, the third line and the fourth line.

Irina: Yes. This is our physical world of the dense material Universe in which we live. Which consists of substances that you name in the periodic table.

Guest Oleg: Oh, we'll talk about her now too *(laughs).*

Irina: There is a pattern in it. You count by carbon, because your life is based on carbon, of course. We're a little different. This is what the subtle-material plane means, what we call the [plane] of plasmoids *(shows)* . It is still matter, that is, it is the material world. What does the subtle world mean? This means that it is not detected by your body's receptors. You already have instruments that can detect some levels of plasmoid worlds, but not all. They also have many different levels of density there.

27:00 At what density level is humanity?

In general, plasmoids are intelligent. These are the same Spirits that we are. Only we are embodied in dense material bodies, and they are embodied in subtle material ones. Here they are, the plasmoid worlds are here *(shows).* And they have density levels there.

The physical world has three levels of density. We all live at the third density level. First second Third. But these are considered matter density levels. That is, in the physical universe it is solid, liquid, gaseous. Our physical bodies are made up of these density levels. In humans, for example, there are substances that are in a solid state, in a liquid state, and in a gaseous state.

Guest Oleg: Come on, Ira, I'll speed things up, because there will be a lot of information now. Let's hurry up then.

28:11 How many density levels do we have in plasmoids?

Irina: Plasmoids are considered to have the fourth level of density, the fifth level of density. It all goes in here. In total we have 56 levels of plasmoid density. After the 56th there is no longer matter, vibrations are already higher than the material plane. They constitute the transition to the next dimension. Do you see the gap here? (shows). It means a transition to another dimension. They [the lines] go into each other, but they do not intersect anywhere, one

might say they are parallel. They pass into each other in vibrations, but they do not intersect. Everything is smooth here.

This is the astral world *(shows).* This is the closest...

Guest Oleg: I want to make a footnote. I can't see on my screen how you move your mouse.

Maxim: When you look at the video, everything will be visible there.

Guest Oleg: What I mean is that I don't see and can't ask questions.

29:32 How many levels of disembodied Spirits are there?

Irina: Here: one-two-three *(shows).* Next comes the world of disembodied spirits. We have a special word that we use to designate it. We will call it in Russian - "the world of disembodied Spirits". There are levels from the first to the twenty-fourth where Spirits await their incarnation. It is the same for the entire universe: both for plasmoid worlds and for all dense material planets *(shows).* Physical, subtle, astral. Here it is, the world of disembodied Spirits.

Guest Oleg: So, give me comments, because I don't see. It is difficult to navigate where the mouse is running. Is it for compaction or decompaction? Do vibrations increase towards the center?

Irina: Vibrations increase towards the center, yes.

Guest Oleg: Okay. Does this mean matter becomes less dense towards the center?

30:31 After what level of disembodied Spirits does the world of Divine light begin?

Irina: Yes, of course. The world of disembodied Spirits from the 1st to the 24th level *(shows).* The next line, closest to the center, means the next world after the world of disembodied Spirits, after its 24th level, i.e. the subtlest vibration. This cannot yet be expressed in your language of science, because this world is not studied among you, except in some esoteric and philosophical teachings. For us, these concepts are quite [clear], because we do not divide the universe into material and spiritual. So that some sciences study one world, and others another. For us it is one. And this world, closest to the center, this line is the world of light. This is the closest definition in your Russian language. The Divine Light of that Creator who [created] everything. It means the Source of Everything.

Maxim: From the Source of Everything, why does the loop go in the other direction?

Irina: Now, more to come. Because it shows infinity. That which returns to the Source of Life is endlessly generated from it, to the material world.

Maxim: Yeah. Do these worlds not intersect? They also go further in terms of vibration level and also reach... Are these parallel worlds?

Irina: This drawing is on a plane, as you can see, that's why it's shown here.

Maxim: Ahhh.. It needs to be made three-dimensional. Lower this point [center] down and lift the other two up.

Irina: Yes, and there will be a spiral like DNA, twisted.

Guest Oleg: It turns out to be a funnel, a vortex.

Irina: Yes, like a funnel.

Maxim: It turns out that we lower the point in the center down, and up we get a spiral with two endings.

Guest Oleg: There vortex is unwound like this, with compression.

Maxim: Yes-yes.

Guest Oleg: Therefore, this parallelism *(shows another photo of crop circles).* I understand correctly?

Maxim: Can you enlarge it?

Guest Oleg: Yes *(increases).*

Irina: I don't understand what's in the center between them.

Guest Oleg: The fact is that if we move, then there is a clockwise and counterclockwise direction.

Irina: I understand.

Guest Oleg: Then we get parallel realities.

Irina: This is the same thing, but already decomposed into, as Maxim said, three-dimensional. The three-dimensional is again laid out on a plane. Two sides of it.

Guest Oleg: View from above, view from below.

Irina: *(laughs)* Somehow they look like a flying saucer. Only not a flying saucer, but two funnels that diverge like that. And so they were simply laid out and opened.

Maxim: Why do the points from the ends go with decreasing circles? What does this mean?

34:03 Why is the vibration of the number "three" so important in the material world?

Guest Oleg: There is also fractality here, on the side, on top *(shows).*

Irina: Yes, yes, yes. At these three points, further explanation will follow. What relates to the physical world is this point (shows). And to the right and left of them there is an explanation that this very physical world also consists of three [density levels]. Here we emphasize that in the material world the vibration of the number "three" is of great importance. Now I will explain why.

Guest Oleg: Here are the 33 that we just looked at.

35:13 Time is a way of counting the intervals between changes in material reality.

Irina: Yes. Because, firstly, as I already said, three-dimensional space is considered, because we do not take into account time as a separate dimension. This is simply a way of counting certain intervals between changes in material reality.

Guest Oleg: Material world.

Irina: Yes.

Maxim: Why does the right spiral come from a circle flowing back and forth, and on the left side does the spiral come from one circle with two lines?

Guest Oleg: Asymmetrical.

Irina: Where are the two lines? I do not see.

Guest Oleg: Pay attention to the center, it's symmetrical. There is an inflow into a point, and the point in the other, upper circle is not set in the center. That is, the lines there are not in the center. Could it be that the spaceship that was drawing made a mistake?

Irina: This point? *(shows)*

Maxim: Take it from the left side, please. Even further to the left, here.

Irina: Well?

Maxim: Oh, don't you see the difference between the circles?

Guest Oleg: Look at the center of the circle.

Irina: It turned out to be laid out on a plane this way, because it [wouldn't have worked] any other way. This is what the spiral on the left that we talked about looks like from the inside. Back side.

Guest Oleg: Okay. Ready for your next drawing? *(displayed on screen)*

Irina: *(to Mid)* What deployment? This is the beginning, right? It's clear.

(to us) Here is a slightly different drawing, but the meaning is the same. That from the center, the Source of Everything, space-time unfolds along such a spiral *(shows).* Those. worlds gradually appear. Here simply more occurrences of vibration levels are shown, not like there, schematically. And here it is also shown why they switch. This is it (shows).

Maxim: Eleven.

37:30 What is the essence of Esler's teaching that the flow of time in the material Universe is cyclical?

Irina: On Esler there is a teaching that the flow of time in the material Universe is cyclical. According to certain cycles, the Source of Everything does not create the Universe at one moment, but maintains its existence at every moment of time *(shows).* The deployment is underway. But after certain cycles of time, it begins to move into the Source of Everything. It begins to raise its vibrations.

Guest Oleg: Ira, I'll stop right away with a related question about the quantum transition, the quantum leap. This immediately suggests itself. If we imagine that it is a spiral. She goes one-two-three. Does it go in these leaps, or does it unwind slowly? This is the so-called quantum transition. We spin and spin, jump to another, spin there. Once - on another they jumped. I would like a comment here.

Irina: This is where the passage of time is shown. When space-time begins to fold back into the Source of Everything, it turns out smooth... not smooth...

Guest Oleg: Spasmodic?

Irina: Yes, with smooth progressive movements it moves closer and closer to the center. That is natural.

Maxim: Can this be imagined as the Big Bang theory? Someday the Universe unfolds, someday it will collapse?

39:31 The process of creation and destruction of the Universe is not explosive, but a gradual process of transition from one form to another.

Irina: If we talk about the dense material Universe, then yes. The fact is that the first atoms of the substances known to you, from which all the others were later obtained, they came from energies, and the energies came from here *(shows).*

Maxim: From the deployment center.

Irina: Yes. You can say approximately, in your earthly language, the process of creation and... "the process of destruction", perhaps it would be incorrect to call it. Rather, the "transition" of the dense material Universe gradually into more and more subtle forms and, ultimately, into the Source of Everything. It does not collapse, it simply transforms into another form.

Guest Oleg: Then go straight there. I would like to draw your attention to this *(shows a new photo).* This is the same thing, two spirals turning into each other. Let it be a projection. But, as we see, something happens in their connection.

They are considering.

Irina: I see. Yes, this is more like this, different from what you showed. This is a more schematic representation of the same process.

Guest Oleg: Wait a second, I have to stop you. It's hard to see here, I have to give some

comment. How can I explain it to you? On the left, if the groove is smaller, then on the right there are fewer indentations. The fact is that there left and right are mirror images of each other, this is not just one continuation. Let me expand it to show you. Look. You see the wide one here, right? The wall is wide, it is cut out, and the groove is narrow.

Maxim: That is, one circle can lie within another.

Guest Oleg: Yes. It's just asymmetrical, as if you took it and stamped it in the sand. And where the edge is, it becomes a groove. See here? It's not just like that. Here it is wide, and here it is deep. It's like an imprint on each other.

Irina: This is again, as in the case of the first [photo], when the levels of the Spiritual world, etc. were shown, a projection on the plane of what is in a three-dimensional image. We show, for example, these diagrams to our children in a special device that gives a three-dimensional image. This drawing is on the square. And what's below...

Guest Oleg: Yes, this is especially important and interesting. What follows from this?

43:06 How many primordial spiritual vibrations are there that are reflected in numbers?

Irina: Here, of course, it doesn't quite look like our [images]. But I understand what they wanted to submit. The way they managed to portray it on the field is how they did it. They tried to show those same nine original spiritual vibrations that are reflected in numbers.

Guest Oleg: *(counts)* 1-2-3-4-5-6-7-8-9.

43:52 Why do they reduce multi-digit numbers to one number from 1 to 9?

Irina: As you say, the number series is from 1 to 9. In the science that you call numerology (we call it a similar word), all these numbers from 1 to 9 are reflected, and they have different vibrations. 1 is different from 2, 2 is different from 3. To find out the general vibration of a multi-digit number, they are reduced to one number from 1 to 9.

This process is shown here in the unfolding and collapsing of the Universe, the Universe. It operates under the laws of these spiritual vibrations, which are physically designated by numbers. These symbols, these balls that you see, circles, a circle in a circle - not exactly similar, but these numbers of Esler writing look approximately the same.

45:17 How are the events of the Spiritual world reflected on the material level?

Guest Oleg: Very interesting. You brought up the topic of energy fields, right? It turns out that

both the Universe and the energies are reflected.

Now, here's the same thing, the Tesla coil is presented *(photo on the screen).*

Irina: The shape of all energy fields and even the shape of portals that pass into the worlds of plasmoids, etc., will in one way or another be reflected by this form of unfolding-collapsing, that is, a spiral shape. In your earthly, very figurative language, we can say that when there is a loud voice, it causes an echo. So is this. This is a reflection on the material level of those events of the Spiritual world, which, as I have already said, continue to give rise to the reality of the material world.

Guest Oleg: Like a response from the environment. Our processes are fractal and similar. Therefore, if we emit something into space, then this fractality and similarity are reflected according to the same laws, right?

Irina: Reflected.

Guest Oleg: Great. Now we will consider the topic, as a continuation of the previous two, about the materiality of the component. I'd really like to see these explanations. I mentioned three energy levels for a reason. If we take material energy, then it is five-level. That is, higher, middle, lower, and the lower consists of five: electricity, magnetism, light, heat and radio waves. Do I understand correctly that this *(displays a photo)* is a [lower-level] representation as a hint to us?

Irina: Now [Mead] will look. Yes. The five-pointed star, which you call the pentagram, is represented here surrounded by figures. This figure is not Esler's or even Burkhad's, but one of Burkhad's colonies (it needs to be clarified from which one).

The following photo with a drawing on the field is displayed on the screen.

Irina: [The part of the figure] that looks up shows that... I told you about that first drawing, that that Divine World of Light, which generates all the others, is from a point.

Guest Oleg: This is the center.

48:46 Two states of the material world - the dense material world and the thin material world of plasmoids.

Irina: Yes, that's the point *(shows).* It's just that [the figure] is shown not in the shape of a spiral, but in the shape of triangles. It's the same concept, just told in a different form. Which is above all, means the world of light. And the remaining four represent two states. They do not call it "transition of vibrations", but "states of the Universe", they have their own term there. These two *(shows)* mean two states of the Spiritual world: what we call the astral plane and

the world of disembodied spirits. And their vibrations are a little lower, as shown here. This [first triangle] looks up if you hold it by the top. And these two [lower ones] mean two, what we call the edges of reality, and they call two states of the material world. Here is the dense material world and the thin material world of plasmoids. This shows the fact that the astral world and the Spiritual world are in the middle, between the material world and the world of light, where the most complete manifestation of the Divine Light is, which is impossible in the material Universe.

The following photo appears on the screen.

Gost Oleg: Do you remember the Order of the Red Star, the Order of Victory we had?

Irina: These are two [stars] superimposed on each other.

Guest Oleg: Yes. The Order of the Mother Heroine in the Soviet Union was similar, if you remember.

Irina: This shows the same thing I said. Why are they superimposed on each other because it shows... [to Mead] Yes, I get it...

Guest Oleg: Ira, wait. Here is one five [pointed star], and here is the second. They are shifted 45 degrees and superimposed so you can see everything.

Maxim: Yes, everything is clear.

Irina: Yes.

Guest Oleg: And the pentagon is already below.

Irina: Why are they superimposed on each other? [The star] that is in front of us and goes further... In fact, it is assumed that the series is continued and the cyclical development is endless.

51:35 Which figure is a symbol of the atom and the first level energies that make it up?

Maxim: What does a pentagon and not a star mean, Meade?

Irina: It means that after the last second pentagram, further pentagrams are continued. There is no point in drawing them here, because... they will not be visible. They are continued - that means.

Guest Oleg: Here's another pentagram *(displays it on the screen).*

Irina: Oh, yes! He says that these circles are not drawn here by chance. This means, in your words, an atom. This is what is supposed to be an atom *(shows).* And it is believed that the outer circle, which simultaneously designates the atom and those first-level energies that make it up.

Guest Oleg : That's it! Let me explain so you can see...

52:51 What is the meaning of the circle symbol?

Irina: And the second circle denotes the energies of the second level. This denotes the energies of the third level *(shows)* , and this star in the center denotes what I was talking about - the Spiritual world. The circle conveys the idea that the material atom is generated by the Spiritual world.

Guest Oleg: This is on the one hand, and on the other hand, look, I'll explain. It was difficult for people to understand the three levels and five investments in the lower level. This is the lowest level of vibration, which consists of five sublevels of matter, right? *(shows).* This is the average level of nuclear bonds, and this is the gravitational level. This has been talked about in circles for a long time. Ira was the only one who interpreted everything clearly in Russian.

The following photo appears on the screen.

54:00 How did the Tashigans present a synthesis of the earth's idea of the atom and their idea of three levels of energy?

Guest Oleg: Another, very interesting interpretation of matter. Is there something here about the composition of the atoms?

Irina: This is again a project of Tashigan scientists. They have tried here to make a synthesis of your idea of the atom and our idea of three levels of energy. On the screen you see what happened.

Guest Oleg: And now it will be very important. I will reveal one important image. For those in the know. Not everything, but I'll try to explain it. Here's the image. It was presented where Hawkins lived in England in 2001. It looks like this *(zooms in).* Look, dear friends. What does Mead have to say about this image? It's clear that it needs to be rotated about 45 degrees, what will say about this. And then I will give my comment.

Irina: Yes, it's definitely not Esler's.

Guest Oleg: This *(another photo)* was also presented at the same circle , this is from a book. The fact is that this is the only copy that I could find. I have been looking for this symbol for a very long time. As you can see, there is one, two, three, four, five. There are five circles, self-investments. If we look here *(previous picture),* there is also one, two, three, four and there is the fifth one below. Can he comment on something? And then I will tell you what interpretation we have on Earth.

Irina: Yes, he can guess. This is not Shimor, this is not Tashig. This civilization is not even part of the Interstellar Union. He does not know exactly such figures. Presented here a little differently. He assumes that we are talking about the energy levels contained in atoms.

56:41 Why are energy levels laid out differently in different alien civilizations?

Guest Oleg: There are five levels here: one, two, three, four and the fifth, nested at this level *(shows).* The same if translated here *(second picture).* Here we see: one, two, three, four and now the fifth.

Irina: This does not belong to the Interstellar Union. Here we are talking about energy levels, but they are already laid out there in their own way. For them, perhaps, heat and light are generally combined into some kind of single energy. Or radio waves are intermediate between “heat and light” and “electricity and magnetism”. That is, perhaps this is the case.

Guest Oleg: Okay. Look here, dear friends. This image appeared in July 2001. The circle [has] approximately 200 feet in diameter, that's 70 meters. Ah, now turn your attention to the screen. I am now telling this to everyone who hangs out at the Global Wave and knows Yuri Stepanovich Rybnikov well, who presented us with the table. You see, right? *(on the screen).* This is a new periodic table, I’m not saying either “for” or “against”, I’m just stating the facts. Do you see? His table is the new periodic table. He says, but it is impossible to verify this, you just have to accept it.

Irina: Orthodox elementary system? Russian Orthodox... Unity of periodicity of the electroatoms of the Universe?

Guest Oleg: Yes-yes-yes. See, yes?

Irina: I wonder how.

Guest Oleg: Who first took it and where he got it from - that was my question. Very interesting. The alternative crowd in Russia, in particular, here... Do you see the similarity? *(points to a drawing from 2001).*

Irina, Maxim: Yes.

Guest Oleg: And here it is (table). Russian Orthodox, elementary system of the unity of periodicity of the electroatoms of the Universe. Is there anything to comment here?

Irina: The fact is that when we started the topic about circles, I became familiar with the main versions of the drawings that the Interstellar Union made. I didn't remember everything. This circle that you showed either does not belong to the Interstellar Union, or it belongs to civilizations that are not anthropomorphic. Insectoids, for example, from Sho-Hariki. I know that they also did their own experiments with signs and symbols. Was the person who came up with what we see here familiar with these circles?

Guest Oleg: I don't know.

Irina: No, I already see that he published this system before the circle appeared.

Guest Oleg: Most likely, yes.

Irina: He published it in 1997?

Guest Oleg: I can't say.

Irina: It says so there.

Guest Oleg: In 1997 there was no Internet.

Irina: I mean, it says: "Author of the Russian Orthodox Elementary System of Unity." This means that he published these signs somewhere in 1997, perhaps in some magazine. If he typed before the circle appeared, and the circle appeared only afterwards, this indicates contact. It is not necessary that he was a contactee. Perhaps someone close to him was a contactee, or he researched it from some other contactee.

Guest Oleg: I am also inclined to this opinion. The person himself could not imagine this topic *(photo of the circle in 2001)* . Because it is impossible to look inside the atom or test it. They like to say: "How did you test? What device do we use to observe this?" That's all. And there are no answers to the questions. It is impossible to look inside an atom and say that it consists of something like this or that it consists of something like this. And this diagram does not show a dynamic picture, I say this all the time. Okay, this is a static picture. How did you recognize her? What did you use to photograph the static picture?

01:02:32 What does the yin-yang symbol mean?

If it's dynamics, it's a vortex. How did you stop him? This is a separate conversation.

So let's comment on this symbol if it can *(displays a picture).* These are crop circles, they're just easier to see here. These are two “yin-yang” superimposed on each other. Does he have anything to say about this?

Irina: About yin-yang?

Guest Oleg: These were also crop circles. NASA says “yin-yang.” But there is a lack of fractality here. Here there should be another “yin-yang” inside, and there another “yin-yang” and another “yin-yang”.

Irina: Again, to look at that circle, preferably its image [photo]. What is understood by your researchers as the “yin-yang” symbol is one thing. What was put into it initially? The meaning could be similar, or it could be different. What does this symbol mean? We are talking about spiritual things here. This is a symbol to indicate that in every low vibrational energy, in every low vibrational Spirit (what we call a dark Spirit) there is a piece of Light. But the light Spirit also has the opportunity, as shown here by a piece of darkness, to become dark. Freedom of choice is shown here.

Guest Oleg: Duality of all processes, in particular, right? We have the duality of all processes. Duality.

Irina: The duality of processes stems from freedom of choice, in fact.

Guest Oleg: Freedom of choice, yes. Wonderful, wonderful. These were the questions. Thank you, Mead. Thank you, Ira, for your hard work.

Irina: Thank you.

Participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan – head of the International Center for Spiritual Development “Cassiopeia”;

MidgasKaus - representative of the planet Esler, biologist, psychologist and specialist in alien civilizations;

Guest Oleg - ufologist, scientist, representative of Dr. O Academy from America.

00:49 Opening remarks.

Maxim: Hello, dear friends. Today we have another session of answering questions on ufological topics and more. And today, as I understand it, we have Raom Tiyan and MidgasCaus in touch.

Irina: Hello, dear viewers of our channel “Cassiopeia”. My name is Irina Podzorova, I am a contactor with extraterrestrial civilizations. Today, next to me there is a representative of Burkhad - Raom Tiyan and a representative of Esler - MidgasKaus.

01:34 Representatives of the Interstellar Union about contactee, psychic and healer Nikolai Levashov.

Maxim: Is this symbol familiar to the Interstellar Union?

Irina: Yes, LiShioni, he is familiar to you for now, LiShioni is also present here with us. He just left for a while. He says that this is a symbol of one of the philosophical communities of their planet Shimor. But I won’t look at the bottom.

Maxim: Maybe there is a correlation here, the fact is that this symbol is from Nikolai Levashov’s website, it is his personal symbol. And I would like to ask: in his books he used expressions such as: “I had to interact with the civilization of the Cygnus constellation.” Here, Raom Tiyan, is civilization familiar with Levashov? We had such a psychic, a healer.

Irina: We need a photo of him.

Maxim : I’ll try to find a photo now. Can this be calculated by energy vibrations?

Irina : Yes, whether he knows him or not.

Maxim : For example.

Irina : Now. At one time he was in contact not with Burkhad, but with Esler, with Shimor, maybe a couple of times. He came into contact with several civilizations. But Raom Tiyan does not know him personally.

Maxim : So he is known in the Interstellar Union, one way or another?

Irina : There were several episodic contacts, as he said.

Maxim : It's just that he described one interesting point in his book. There he says that he had to interact with the civilization of the Cygnus constellation, most likely with Burkhad, but, apparently, Raom Tiyan did not intersect with him.

Irina : He says that I don't know him personally from the photo, and at the time of the photo I don't feel the energy in him, but there is a trace of contacts with the Burkhadians. Maybe there were occasional contacts, but not constant ones.

Maxim : But he has now left the earthly plane, maybe it's dead energy, or it doesn't affect it at all.

Irina : But he was alive at the time of the photo, so he's looking now. But I don't know him personally, so if there were contacts with Burkhad, it was several times, not constantly.

Maxim : Yeah, I see.

05:1 5 Life expectancy of plasmoid civilizations.

Maxim : So, the question is this. What is the lifespan of representatives of plasmoid civilizations?

Irina : Which ones exactly?

Maxim : Do they have different types? Different lifespans, do I understand correctly?

Irina : Life expectancy differs greatly at one density level from another. The higher the density level, the longer in the time of your world it can exist in this world. The higher the vibration

frequency of this energy body, the longer it will exist without changes.

Maxim : Well, okay, let me pose the question this way. The minimum period, which has a lower density, and the maximum period, which has a maximum vibrational density.

Irina : The minimum density of a plasmoid civilization is fourth. Their lifespan can be approximately 600-700 years on average. This is usually how long it takes for a humanoid civilization to live. And with a density level of 56, the lifespan is measured in hundreds of thousands of years. No humanoid civilization lives this long.

06:46 Reproduction in plasmoid (energy) civilizations by budding, division. Creation of new energy bodies by plasmoids.

Maxim : And then the question is: how do they reproduce? Do they somehow create new bodies?

Irina : They reproduce very differently. It happens that they reproduce when, from one individual plasmoid, its children bud off, as it were. Division happens, like a cell, like mitosis occurs.

Maxim : Very interesting.

Irina : It happens, not even from one individual or two, but from several. They, as it were, collect rays, focus them at one point and create a new energy body into which the intelligent Spirit is embodied. Differently.

Maxim : That is, the methods are basically different.

Irina : Yes.

Maxim : Okay.

07:4 2 Appearance of Vanga's curators – representatives of the Vamfim civilization from the Arcturus star system.

Maxim : The next question. In one of the videos, Mead said that the clairvoyant Vanga was in contact with representatives of the Vamfim from the Arcturus star system. Can you find out what kind of civilization this is, and how frequent they are on Earth? Do they have bases on Earth?

Irina : They are not frequent guests on Earth, although they are part of the Interstellar Union.

They have very few contacts here; there was Vanga and a few other people. Now we need to look at the database of contactees, if they have contactees now. They all had non-physical contactors. He now shows me that he is short in stature, somewhat reminiscent of the Tashigan people, only their faces are more human, and their skin has a kind of greenish-brown color.

Maxim : These are representatives of Vamfim, right?

Irina : Yes. Only their physique is thin, thin, and their eyes are black.

Maxim : Are these some kind of hybrids?

Irina : No, these are not hybrids, but they changed a lot in their genetics when medicine began to develop in them.

Maxim : What is their main goal of working with earthly contactees? Healing or some other moments?

Irina : Transfer of information about the spiritual worlds. Healing is a side effect of changing the worldview of earthlings.

Maxim : That is, the common goal is a change in worldview.

09:50 Apostle Paul, Mohammed, Zoroaster, Alexander the Great, Pythagoras, Konstantin Tsiolkovsky, Wolf Messing - contactees with alien civilizations. Contacts of modern famous people of the Earth.

Maxim : This is a question: are there any famous people in the fields of politics, economics, science who have physical and astral contacts with friendly alien civilizations? Can you name some, for example?

Irina : Who are alive now?

Maxim : Yes.

Irina : When contact begins, and especially when a person works in a high position, he asks us not to disclose this to your earthly people. We have no right to go against his will. This is prohibited by the rules of the Interstellar Union.

Maxim : I see. Can you name any famous personalities who died?

Irina: As I already said, Konstantin Tsiolkovsky was a contactee, Wolf Messing.

Maxim : Stalin was not a contactee?

Irina : No. At least Stalin himself is not recorded in the database of the Interstellar Union. He was not a contactee.

Maxim : But Alexander the Great or his teacher Aristotle were contactees?

Irina : Pythagoras was a contactee.

Maxim : It turns out that some ancient philosophers were contactees?

Irina : Apostle Paul can be called a contactee with the Burkhadians, for example. Mohammed and Zoroaster were contactees.

Maxim : Was Pythagoras a physical contactor or an astral one?

Irina : He was also physical, they took him around.

11:49 Atlantis. Open contacts between earthlings and alien civilizations. The disappearance of Atlantis. Remains of Atlantis.

Maxim : Okay, then the next question. According to information from various historical and ufological sources, in ancient times there was a continent on Earth called Atlantis, where very highly developed people with powerful extrasensory abilities lived. They also allegedly flew to other interstellar systems. What kind of continent was this, who lived there, when and for what reason did the catastrophe happen to him there?

Irina : He says that Atlantis is not a continent, it was a city on the shores of a single continent that was destroyed in the war. And this, in your opinion, was a very large city, like a capital. And they say that the inhabitants were priests and flew to other planets; there were many alien bases there. After all, before the war, earthlings communicated openly with aliens. Therefore, contactees, your residents also called them contactees, could come openly, without hiding, there was no such need to hide contacts, and they could fly away in front of everyone, fly away, and fly back. As for the priests, these were already the people who were in contact with plasmoid civilizations and created their own religions. It was a big city, very ancient. Therefore, when the Selbetites attacked, it was destroyed first. When a single continent was torn apart, its remains ended up southwest of the southern coast of Africa, several hundred kilometers from the city of Cape Town on the ocean floor, and it was buried.

Maxim : So the disaster occurred as a result of Selbet's attack?

Irina : Yes, they used weapons there, gravity bombs and laser beams.

14:29 Priests of Atlantis and subtle-material civilizations. The impact of low-frequency energy on human emotions. Bindings.

Maxim : And here's another question, there is information from various sources that the high priests of Atlantis at the last moment, before the catastrophe, were already connected with destructive forces, everything was already bad. Is there such information in the Interstellar Union, or is it not confirmed?

Irina : Before the war, there were a lot of people on that first continent. What does destructive civilization mean? This term is not entirely clear to us, because there are no destructive civilizations, there are only those individuals who go against the Law of Light within themselves. They can be in any civilization.

Maxim : Maybe they mean some kind of parasitic civilizations?

Irina : Do you mean subtle?

Maxim : Yes, it's possible. There is a version that the priests of Atlantis were associated with parasitic subtle-material civilizations, because in the end all was not well.

Irina : I just thought that we were talking about humanoid contacts. Plasmoid contacts - everything is very complicated here, because, as any contactee knows, communication channels with plasmoid civilizations (and now there are quite a lot of people on Earth with similar communication channels) in esotericism are usually called bindings, but this is a communication channel with a subtle-material civilization. So before the war there were no fewer such people than now. Raom Tiyan says, my personal opinion is that there were much more of them, because at that time people somehow communicated more consciously. Modern contactees with plasmoids lack awareness. Not all people had high vibrations in that period, because there were those who produced low vibrations and were offended, angry, hated, and afraid of these same civilizations. And, naturally, by their energy they attract those who assimilate low-frequency types of energy. Why are they called parasitic? Because they are interested in further receiving energy of this type and try to evoke appropriate emotions in a person, sending wave effects through the communication channel to him, causing changes even in his hormonal system.

17:14 The influence of low-frequency spirits on people. The right of choice of the embodied Spirit to accept or reject the thought forms of dark spirits.

Maxim : If we assume that some residents of Atlantis were in the management structure, then they develop a thirst for power, envy, something low-frequency. Can low vibration levels 1 to 6 influence them, connect and control them for their own purposes?

Irina : Low-frequency spirits have the right to send thoughts, if they come to the astral world, which is closest to the material, their thought forms to any embodied spirits, no matter what level they are. But, naturally, this right is given, because this is the right of free communication of spirits, no one has canceled it. But any incarnate Spirit has the right to choose, the right of free will, to either listen to these thoughts and develop them further in their own body, brain, in their own energy, or to reject them. But if he himself is a low-frequency Spirit, if he is already accustomed to these low-energy states, when he is in prolonged states of hatred, resentment, despondency, and so on, then, naturally, it will be easier for him to instill any destructive thoughts in the same demons, than the high-frequency Spirit. Although there are known cases of degradation of high-frequency spirits, and there are many of them, unfortunately. And this, of course, was greatly facilitated by disembodied spirits and demons. And not because they have such a goal that everyone does evil, but because they do not consider their actions to be evil, this is a natural line of behavior for them.

19:2 8 Analogy of the beliefs of members of criminal groups with crimes in the Spiritual world. Spirit between incarnations.

Maxim : I see. For example, just as we have civilizations on Earth in some remote areas where cannibalism is considered the norm, it also works for these.

Irina : I would rather make a comparison with the fact that, for example, criminal groups are very developed in your society. And those people who are members of them can occupy some leading positions and consider their actions good for themselves, for their families, for their friends who have similar beliefs to them, and act contrary to the laws of their country, sincerely considering them unfair. In the same way, a criminal who violates the laws of the Spiritual world, space, and Divine Laws, he can quite sincerely consider them unfair to himself or to other spirits. And this is very similar to criminal groups within the country.

Maxim : So it turns out that the same Lucifer and his charges can be considered a criminal group the size of the Universe?

Irina: But not the entire Universe. I just named the image so that you understand that that criminal on Earth does not yet consider himself such, he remains a criminal, just as he does not consider his actions to be wrong, unfair, and even if his conscience tells him that it is wrong, he still drives away These thoughts convince himself that he is doing everything right. It's the same in the world of spirits. Only this criminal person, who is an authority in his environment, is simply already deprived of a body. Deprivation of the body does not deprive one of thoughts, feelings, beliefs and the entire direction of the personality. Between incarnations, the Spirit remains in the same beliefs that it achieved during life, and in the same spiritual and energetic states.

22:01 The influence of demons on the leaders of criminal groups on Earth.

Maxim : Then here's a question. Let's take, for example, some leader of a large criminal group on our planet. He is used to living in these energies when he robs, kills, or something else. In this case, could he be possessed by some demonic creatures? He's in resonance.

Irina : Demonic creatures can also possess him. They can possess him early, before he becomes a criminal leader, and lead him to this lifestyle. Because if a demon has possessed him, naturally he wants to experience as many sensual pleasures as possible through his body, and this requires the means that are obtained through crimes, for example. Or it happens that a demon possesses a criminal. It is the same. Because their vibrations match each other. This may well be the case.

23:06 Disembodiment as a way to stop the decline in spiritual level.

Maxim : Here's another interesting point. I once conducted statistical research, from which it turns out that the leaders of criminal groups, after their formation, suddenly died an incomprehensible death. I got the feeling that it was the soul that was taking itself out of incarnation. That is, she saw that degradation was taking place. Could this be?

Irina : There's not even a soul there. I will now explain that even a high-vibration Spirit, which has incarnated on Earth with the goal of further improving or leading other people to perfection, if for some numerous reasons (due to its internal or external) begins to degrade, lower its spiritual level in this incarnation, and if this happens quickly and it is impossible for his Guardian Angel, who is next to him, to convince him, to send him those thoughts so that he returns to the bright path, then the Guardian Angel of such a person has every right to put him in front of his mentors, consultants of the Spiritual world, who released him into this incarnation, the question of his withdrawal from the incarnation ahead of schedule. And he can motivate this by ensuring that he does not significantly lower his level, which he will then have to raise, perhaps over the course of several lives. But consultants have the right to either agree with the opinion of the Guardian Angel or disagree. If they agree, then they will create, with the help of other spirits and in their own way, such circumstances under which disincarnation occurs. After all, the Spiritual world can influence the material world.

25:01 The power of the personality of the intelligent Spirit. Possession by demons.

Maxim : From this concept the structure of the criminal world is obtained; the leaders, as a rule, are either the demons themselves or the possessed. The bulk are those souls who are lost and do not lead the right way of life?

Irina : Everything can be very different. The leader may be possessed, or perhaps there is simply a demon next to him who has not been possessed. But he does not allow the demon into himself completely, because he himself is a leader by nature, has sufficient willpower to repel him, and he does not like any external control. This also happens. Because, in addition to the fact that it matches the vibrations, it is necessary that the will and energy of the demon that inhabits it be stronger than the will and energy of the incarnate Spirit. This doesn't always happen, but often.

Maxim : That is, it turns out according to the laws of physics: who has more energy, power?

Irina : It's just that each incarnated Spirit, with its energy, vitality and energy of its Spirit, its thoughts and feelings, forms an aura around itself, which consists of various structures. And the strength of his personality, the strength of his character influence this aura, its density, its vibrations. And if this density is sufficient, even if this evil Spirit, demon approaches the

vibrations, it will be very difficult to connect to it. This demon must have higher frequency characteristics, or rather what we call a high energy component.

27:11 Ways to form bindings.

Maxim : As I understand it, since we have a protective shell, it is for these purposes that some parasitic entities are trying to awaken trust in themselves so that we open up, open this shell for them. Then we get free, very easy access to our energy.

Irina : Each entity has its own way - how to weaken energy protection. This is usually achieved through trust. What is trust? This is an emotion, one of the manifestations of love. And it is difficult for low-frequency entities to connect to these high-frequency energies. Unless, of course, they inspire trust with low-frequency beliefs. For example, arrogance, pride or anything else that lowers a person's vibration. And if he is open and trusting, sincerely accepts them and loves them as they are, it is very difficult for low-frequency representatives of civilizations to connect to him. It is easiest for these representatives, who have low energy, to connect at a moment of fear, anger, irritation, that is, in low-frequency energies. By evoking such feelings in a person, frightening him or irritating him, he lowers his vibrations, and it is easy to attach an attachment to him, which consists of the energy of their world.

28:52 Bermuda Triangle. Reptilian tactics in war 12 thousand years ago.

Maxim: Okay, then the next question. There is information from various sources that Atlantis was located in the Atlantic Ocean near the American State of Florida, and that part of the remains of this continent still rests on the ocean floor in the area that is today called the Bermuda Triangle. Is it so?

Irina : Bermuda Triangle. It was another city on Earth, on that single continent. It was also a very large city, but not the one that is called Atlantis. You could say it was the capital of the Earth. America and Eurasia were divided by the Atlantic Ocean precisely as a result of the actions of the Selbet weapons to split the continent. And as you can see, the main blow was directed precisely at this capital, so the widest tectonic fault formed there.

Maxim : So, it turns out that the Selbetites were aiming at exactly the right point on the Earth.

Irina : Yes. Since there were not only people there, but also, as I already said, alien bases near the cities, there were ships of Burkhadians and other civilizations that could protect. Therefore, their first strike was aimed at preventing the takeoffs of these ships.

Maxim : It turns out that the strikes were aimed at strategic points first.

Irina : Yes, I would say so.

Maxim : As I understand it, there were people killed at the bases who did not have time to physically fly away.

Irina : There were.

30:56 Open multi-frequency portals of plasmoid civilizations in the Bermuda Triangle area.

Maxim : There is an opinion that the periodic disappearance of ships and planes in the Bermuda Triangle area is due to the fact that at the bottom of the ocean there are the remains of Atlantis, among them there are pyramids with some still working crystals that open portals above the surface of the ocean, and in Planes and ships disappear through these portals. Is it so?

Irina : Above this big city, since there were many temples, alien bases, portals had already been opened, what you call plasmoid civilizations. But physical weapons that destroy planets, change their orbits, cannot negatively affect the plasmoid base, because they are from a different energy. They are not made of dense energy, but of subtle energy structures. Therefore, although the city was destroyed, the portals above it remained. There really are a lot of them, and they are all of different frequencies, since different civilizations worked with them, and they have different frequencies, then those electronic devices that fall within their range of action may fail. As you said about planes and ships. As for their movement to other parts of the dense material world, of course, we do not have such data; this is still dense matter, but their device could easily fail and, for example, fall into the ocean.

Maxim : It turns out that the equipment malfunctions, the plane crashes, and he cannot warn anyone, he just drowns in the ocean?

Irina : Yes, this could happen, it's not excluded. Moreover, now all your planes have a lot of electronics that may not withstand the energy of these portals.

Maxim Rusan: Max, I'll tell you more, that even when they come in astral bodies, all my equipment flies during recording. I already have a second camera, I'm changing it, my computer, TV starts to glitch, the screen doesn't work and everything else. This has never happened when I had no contact. Therefore, here the influence is not even that of subtle civilizations, there is the influence of humanoid civilizations that come in the astral plane.

33:50 A change in vibration in the Spiritual world can cause a resonance to change vibrations at the level of electromagnetic fields.

Maxim : And then here's a question, by the way, related to MidgasCaus and Raom Tiyan. I also observed that a person possessing some kind of powerful energy really influences radio communications and equipment. What is the reason for this, since these are different types of energy? How can one influence the other?

Irina : Yes, these are different types of energy, but one can influence the other according to the principle of resonance. A change in vibration in the Spiritual world can cause a resonance to change vibrations at the level of electromagnetic fields. Although these are different types of vibrations, one affects the other. I'll give you a simple example now: the air is thinner, in the sense that the atoms in it are more discharged than, for example, in sand, but this does not prevent the wind from lifting the sand into the air.

Maxim : Well, yes, I understood the analogy.

Irina : According to this principle.

35:05 Possibility of teleportation in the Bermuda Triangle area.

Maxim : Interesting. It turns out that no physical teleportation has ever been recorded in the Bermuda Triangle area? Is this all fiction?

Irina : All the data we have suggests that perhaps the devices change their orientation. That is, if it is a device that orients an airplane or ship, it may fail and lose orientation. And therefore, a plane can fall, and a ship can, for example, run into some obstacle: islands, reefs and also drown.

35:46 The Flying Dutchmen ships in the Bermuda Triangle area. Parallel worlds, Akashic chronicles - a vision from the past in the layers of the Spiritual world.

Maxim Rusan: I have one more question: the appearance of the "Flying Dutchmen", ships from the past, what could it be?

Irina : These are ships that disappeared, but then they were found without a crew, do I understand correctly? This is explained by the fact that the crew who was on this ship might not have disappeared. Sometimes waves appear in the ocean that generate sounds, you call them infrasounds, people could simply throw themselves overboard. Moreover, they find food and scattered things there, this suggests that they are thrown into the sea in a panic and die, because their instinct to run is triggered. It is in the ocean that this happens, especially if there are no protective equipment, thick walls near the cabins, and so on.

Maxim Rusan: But the appearance of ships and planes from the past over the Bermuda Triangle area, what could this even be?

Irina : Do you mean recorded by cameras, or just people saw?

Maxim Rusan : People saw it, and it was recorded by cameras. There is evidence that the plane disappeared in the year 60 and then appeared in the year 80.

Irina : Anything can happen, you need to look at the materials. Maybe the person saw the noosphere of the Akashic chronicle. With the eyes inside, it happens that he sees the past. You need to look at the materials, anything can happen.

Maxim : So he could see other vibrational levels?

Irina : Someone tell me, please, I don't understand. Yes, Raom Tiyan. The fact is that some people can call the past, present and future parallel worlds, and therefore what a person can see from the past, he can see in those layers of the Spiritual world that you call the Akashic chronicles. But he will be sure that this is a completely material plane. But at the same time, there was evidence that his own plane flew through the plane from the past. It seemed quite material, but they seemed to fly through each other. And then he disappeared. This is what could happen.

38:55 Hyperborea (Daaria). Changing the Earth's orbit. Sharp cooling on the planet. The death of mammoths. Ice caps at the poles.

Maxim : So, okay, then the next question. According to information from various sources, under the waters of the Arctic Ocean lie the remains of an ancient continent called Hyperborea or Daaria. There are suggestions that this continent is even older than Atlantis. Representatives of a highly developed civilization lived on it, which other peoples called Gods. What continent was this, and who lived there? When and for what reason did the disaster occur there?

Irina : They show me that it was a single continent, further than the Arctic Ocean. We can say that this is not an island, but a continuation of this continent, a piece of it or something, like a peninsula. But he still belonged to this single continent.

Maxim : So the catastrophe also happened to him due to the attack of the Selbetites?

Irina : Yes, the whole Earth, the whole appearance of the Earth changed 12,000 years ago.

Maxim : Why then do some sources indicate that it was at the North Pole that some highly developed creatures lived and flew there? They were called Gods. Were there any bases there?

Irina : They lived all over the Earth, all over the continent, as I said, one. I wouldn't say that at every step, but there were many bases. Naturally, everyone flew on ships. The representatives of these bases may have been called gods. Although, Mead says, I personally would not be surprised that any of the peoples that replaced them after the war began to tell each other about these times, passing them on from generation to generation. Mead says, I won't be surprised that the people themselves, not the aliens, but the earthly people who lived in those times and flew with the Gods, were also, as it were, deified.

Maxim Rusan: So it turns out that on the continent that we now call Hyperborea, now the

North Pole, roughly speaking, there really was a city, there was a civilization, there was an alien base, just like on the whole Earth?

Irina : There was no winter at all on Earth. No snow, no winter.

Maxim Rusan : How were the caps and glaciers formed?

Irina : This was after the war as a result of climate cooling. The Earth has become further from the Sun. And earlier, as you know, far in the north, where there is now permafrost, they found, for example, the remains of trees that now only grow in the tropics, for example, palm trees and so on. The entire Earth had the same climate. At least there was no snow anywhere.

Maxim : Was the Earth closer to the Sun?

Irina : Yes, closer to the Sun.

Maxim Rusan: There is evidence that there was a sharp emergency frostbite of the hats, there were some huge minus degrees. Why? Because the food found in the mammoths did not even rot in their stomachs, it was simply frozen. And all their organs are also frozen, and when you freeze them, they are like fresh meat. This is how we do emergency freezing.

Irina : Because the Earth, as I already said, as a result of the use of weapons, was thrown away from the Sun, and when the rescue operation began, it flew further than it is now. She was returned to this current orbit and stabilized. Therefore, it was at the poles, since they were at an angle that allowed the cosmic cold from the surrounding space to have a greater impact on the climate, that there was a sharper cooling, and, indeed, animals, not only mammoths, but also birds and so on, who were in that moment there, they couldn't stand the cold and died instantly. And then, as a result of the next explosions and those volcanic eruptions that began, there are many that began on Earth, they were simply covered with dirt, and much later they were found. And not only were the mammoths' stomachs intact after 12,000 years, but they even had grass in their mouths. In general, they froze instantly.

44:20 Orbit stabilization, restoration and settlement of the Earth after the war 12,000 years ago. Climate change on the planet, increasing ice thickness at the poles.

Maxim Rusan: How long did it take for the Earth to recover after the polar caps froze? How long did it take for the Earth to be repopulated?

Irina : After we managed to stabilize the orbit and stop volcanic eruptions, earthquakes and floods, about 6 years have passed according to your earthly time.

Maxim Rusan: So in 6 years there was frostbite over 2 km?

Irina : No, what you see now continued. You say when you began to populate the Earth, but you didn't populate the poles. People were simply brought to Earth.

Maxim Rusan: That is, the formation of ice with a depth of 2-2.5 km occurred over a long period of time.

Irina : Yes. If you take its entire thickness. Then winters began. Moreover, at the poles, the ice caps generally do not melt even in summer. The sun rises very low there.

45:50 The tilt of the Earth's axis before the disaster 12,000 years ago and the climate of the planet.

Maxim : Then here's a question. And before the disaster, the Earth's axis was without tilt, as I understand it, perpendicular to the star?

Irina : There was a slope, but not as much as it is now, less. Therefore, the climate was more uniform, there were no such winds, there was uniform precipitation, everything was more uniform.

March 14, 2020

Participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan - head of the International Center for Spiritual Development "Cassiopeia";

Maxim Bronevsky – ufologist;

MidgasKaus from the planet Esler - biologist, psychologist and specialist in alien civilizations;

LiShioni from the planet Shimor is a specialist in the astral world and its interaction with the material world;

Raom Tiyan from the planet Burkhad is a specialist in energy interactions in the material world.

#69 Contact or Schizophrenia

https://blog.cassiopeia.center/kontakt-ili-shizofreniya
https://www.youtube.com/watch?v=Km25od9XeO8

Natalya: How can a contactee be unconscious? After all, if a person is a contactee, then he probably notices that someone is telling him something?

Irina: We actually have a lot of unconscious contactees. Yes, of course, he can notice this, but it can pass by his consciousness, because he can take the thoughts of his curators as his own.

Moreover, no one explains to us, either in the family or at school, what contacts are. That is, they do not teach a person to distinguish his thoughts and communicate with his Higher Self, unfortunately. And even more so, no one says that other worlds exist next to us. That representatives of the Spiritual world, representatives of humanoids, plasmoid worlds can come to us in the astral plane, how to distinguish them, who they are.

The source of thoughts is not only in our Spirit. Thoughts can come from our mind, from our memory. But they can also come from the Spiritual world from those beings who are next to us.

00:48

Natalya: Well, how can you tell them apart?

Irina: To differentiate, you need to recognize the fact that not all thoughts that come are my own.

Some people recognize this intuitively, but they just can't believe it. That is, they feel that some idea has come to them, a stream of thoughts has come to them, an image has come to them. And they clearly feel that this is not their product, not their mind. But, in any case, they think they have come up with something. That is, they begin to struggle with the feeling that it came from outside.

To discern, you need to believe in the Spiritual world, believe that you yourself are a Spirit embodied in a body. Even from this Faith, sensitivity will increase.

And then you need to learn to get in touch with your Higher Self. Ask him: "Who am I in contact with?" - and then ask questions.

02:10

Natalya: You understand that for a person who does not practice, it looks like this: a thought came to me, now in my imagination I will find my Higher Self and ask myself if this is my thought...

Irina: There you need to ask, not whose thought is this, and when entering into contact with the Higher Self, ask: “Are you a contactee?” You will receive an answer - “yes” or “no”. If “yes,” then clarify with whom exactly, with a humanoid, a plasmoid or the Spiritual World, or with both, and with a third... There are combined contactees. We call them station wagons. And when they name who the contact is with, you can ask about the level of density, and whether conscious contact with them is possible.

03:23

Natalya: Can a person, without any operator, without assistants, connect with his VY, how to do this correctly?

Irina : Of course, he can, because he is actually in constant contact with VYa.

The question here is to make this contact conscious. So that a person can turn and hear the answer. But the first time it may be difficult for him to do this, because when he finds himself in a state of communication, in a state of merging with his Higher Self (and it loves our mind, loves to merge with it), then the person begins to feel the inner Light with which he merges , dissolves in it. And then all his questions may disappear altogether. Therefore, at least the first few times such meetings should be held with a guide.

This can also be done through meditation. Some do it through prayer, that is, they pray to God and clearly receive an answer. And they think that this is an answer from God. Well, this is really from God, because VYa is a part of God.

Let me remind you that the VY has its own name in all religions, but, in any case, it is the highest part of yourself. All people are simultaneously in the material world with one part of them and in the Spiritual world with the second part.

The first part that you are in the material world is called perception. And you call this material world objectively existing. In psychology, the inner, Spiritual world is called subjective. Subjective - because this is your subjective world, and there you can build your thought forms. The only problem with our psychology is that the subjective world is not recognized as real as the objective one.

05:40

Natalya: Thought forms always belong to us, or can someone send them to us?

Irina: Maybe so and so. How to distinguish them? This only comes with experience. For example, with the experience of contacts with your curator, you will clearly feel his vibration and understand that the thought came from him.

06:04

Natalya: How can I understand that this is not schizophrenia, and I'm talking to the curator?

Irina: You see what's the matter... According to the law of similarity, each contactee receives a curator who is closest to him in vibrations. I recently talked with a psychiatrist (my friend), and she said that indeed, among schizophrenics, most often there are people who are negatively disposed (this may be hidden negativity) towards the people around them or towards themselves. That is, with some kind of emotional disturbances: with resentment, with anger, fear, that is, with low-frequency emotions. It is not surprising that they, having some increased sensitivity to the Spiritual world, but at the same time having low vibrations, attract such curators who then begin to control them. Voices, for example, are sent that people cannot get rid of. That is, in any case, this already goes over the Personality.

This contact gets out of control, and then the relatives or the person himself turn to doctors. And since our medicine is materialistic, they do not consider any possible plasmoids or humanoids and use methods of treatment that temporarily calm a person and cause vibrations in his brain that are incompatible with different types of spiritual beings. But this is all temporary while the drug takes effect. And as soon as it is removed from the body, these vibrations will again attract a similar entity and everything will happen again.

Therefore, among schizophrenics it is believed that this disease cannot be cured forever without medication. And that a person can live and work only with the use of treatment.

08:30

Natalya: It turns out that this schizophrenic is just a person on the channel. And if he raised his vibrations and attracted another (higher vibrational) entity, then he could be a contactee?

Irina: He is already a contactee, but his contact is unconscious, and he is in contact with low-vibration entities. These could be plasmoids or entities from the Spiritual World, and if he is in contact with a humanoid, then he perceives it incorrectly, as some kind of violence. And then he wants to get rid of it, complains to everyone that they interfere with his life, and feels negative towards his curators.

And this does not allow him to get out of the state of these low-frequency vibrations. And those low entities that are on his channel (if they have a structure that allows them to feed on this low-frequency energy) then begin to provoke him to this negativity in order to bring him to these emotions and receive food.

A person, although schizophrenic, still eats, moves, breathes... From this, any person

produces life energy, which is released from the body (in the form of heat). But this energy, released from the body, is already charged with our thoughts, emotions, feelings on the subtle plane. High vibrational beings will find it difficult to be around this person because they will feel negativity from him. In the astral world this is very strongly felt. It sometimes feels like you were burned by nettles or boiling water was poured on you...

10:48

Natalya: How can we help such people?

Irina: Medicines don't really help them, they don't raise their vibration. This requires comprehensive work, both with such a person himself and with his environment. But only if the person himself is interested in raising his vibrations. That is, in getting rid of fears, even if it will be difficult for him to do this at the first stage of recovery. In getting rid of grievances, from anger, even if he is angry with someone. If he is not ready to forgive the person who offended him, then your work will either not bring any effect at all, or it will be a temporary effect. In any case, we can explain to such a person on a level accessible to him (if he is capable) that he has contact with beings, and not the production of his brain. He has a question about what they want from him, etc. Then it is better to immediately bring him to the VY, this usually works, since such people are quite sensitive. Unless, of course, there is a lot of negativity in them. And if there is, then you can repeat the mood with them: "I am the Universe," for example.

12:50

Natalya: Can you read it now?

Irina: Yes, of course.

I AM THE UNIVERSE. THE UNIVERSE IS ME.

THE POWER OF THE UNIVERSE IS MY POWER. AND MY SPIRIT IS PART OF THE STREAM OF EXISTENCE OF THE CREATOR OF ALL WORLDS.

HIS POWER WILL BE DIRECTED FOR THE GOOD OF ALL BEINGS RESIDING IN ALL WORLDS AND PLANS OF EXISTENCE.

REALITY WILL REMAIN IN TRUTH, AND LIES IN THE ILLUSION OF PERCEPTION WILL ALWAYS DISAPPEAR .

This is a MOOD for high vibrations, which on the planet Esler is read once a year by all its inhabitants at the same time. When moving to a new annual cycle (New Year in our opinion).

This is a translation into Russian from Esler's. Translated by MidgasCaus for me. For a person, it increases vibrations.

You can also try to clean this person using your own methods. Energy, for example, or put him under the channel of cosmoenergetics, reiki... Work with him and arrange for him to contact his Higher Self. And already in this contact, ask VY whose contactee he is and how to balance the contact so that it does not cause harm. Then look at the situation.

14:45

Natalya: Can Orthodox prayers help?

Irina: If a person doesn't just pronounce them on paper, but sincerely believes in it, then yes. Any prayer is an appeal to God through an egregor. God hears us even when we pray in our own words. But when we pray according to the rules of some religion, we turn, as it were, with double power: to God himself and to God through the egregor.

If we ask God himself to save us from this entity (in the case of schizophrenia, for example), then he may not fulfill this request for the reason that he allowed this entity to appear so that a person could learn some lesson. So that he stops being afraid, for example, of this entity, and becomes stronger.

Or learned to forgive... So that he can even see his problem.

Every negative has its positive. It was for the sake of this positive lesson that God could allow this situation to happen.

Natalya: And then he won't help?

Irina: He will help, but he will reveal to the person that the reason is in himself. That he himself attracts the essence. But if a person does not agree with this, if he did not agree to change, then God will not force it to change, because he gave him freedom of choice.

16:31

Natalya: What if this is a high vibrational entity? Can a high frequency Spirit come to a low vibration person?

Irina: As I already said, maybe, of course. But there will be contact at the human level, that is, what he perceives, he will perceive.

16:40

Natalya: So, every person who communicates with Archangel Michael (and there are many of them now), they all broadcast through the lens of their own ego, the human self?

Irina: A spiritual essence, especially from the Spiritual world, like Archangel Michael, comes to any person and begins to communicate with him at the level of thought forms. And when these thought forms penetrate into a person's consciousness, they do not penetrate just like words, but pass through his mind. This is telepathic communication. That is why Archangel Michael does not need to know the language of this person. He speaks to him in his own spiritual language, which he knows, and his mind already translates it into the closest concepts. That is why the purity of this channel and the accuracy of information transfer depends on the contents of the contactee's own memory. If the information is very different from what is in him, then he either will not hear it, or he will distort it so much with his consciousness that even he himself will not understand anything.

18:37

Natalya: It turns out that the contactee can greatly distort the meaning of what was conveyed. What percentage then is the truth of such contact?

Irina: It's different for everyone. This depends on the contents of the memory of such a contactee, on his ability to tune into this channel, which, in turn, depends on the coincidence of his vibrations with the transmitting one. The more the vibrations match, the more accurate the transmission. And from the contactee's ability to completely surrender to the flow. That is, integrate, trust him, open up and not add anything of your own. Talk as it goes.

In order not to add anything from yourself, you can imagine that the water of words is flowing through you.

I, too, sometimes do this, especially when I talk with high-vibration Spirits. Whatever comes up for me, I immediately say in the flow. At this moment I do not analyze how pure the transmission is, because at the moment of speaking in contact, if I turn on the analysis, then I will definitely have mine built in. I make contact in an altered state of consciousness and remember what I say, partially.

20:25

Natalya: How can you raise and maintain your vibrations so that such a high-flying entity can come to you? How do you work with this yourself?

Irina: I don't do any special meditations there, I don't belong to any one religion. I believe that there is truth in all religions. I don't observe rituals, don't go to temples and so on. My only Temple is the temple of my soul, my heart, in which I can, when left alone, merge with my Higher Self and ask it to raise my vibrations, and it does so.

Well, here is the main condition for maintaining high vibrations after leaving contact with the VY, so that all situations that happen to me in everyday life, all conversations, are perceived from the position of Light, and not from the position of resistance to this situation, whatever it may be. Even if it causes you some kind of anger or irritation or grief. You need to notice this emotion, and then think about how it looks from the side of Eternity, from the side of Light.

In any negative there is some positive moment to be found. This can be done for literally any occasion. Here you can give an example: what would upset or anger you most?

Natalya: Okay, here's an example. People come to my channel and write some kind of complaint, although I understand that they came to visit me. It was as if they came to my house and started telling me that my chair was the wrong color.

Irina: A good example about the chair. So, people come to your channel and start teaching you, right? This applies to any life situation. Guests come to you, you come to them with all your heart, and they point you to something. It offends you that a person did not show you the proper attention and care, the interest that you expected.

How to react to this in order to remain on high vibrations? How not to become infected with his negative emotions and not sink to his level?

To understand this from the side of the Light, you need to understand this person, why he does this, what motivates him at this moment. That is, you need to be interested in his condition. Understand that, in any case, this was written to you by the embodied Spirit in the body, which is part of the same Light that you are. That is, we are all children of God, and he is also the same child of God as you. And he has the right to behave the way he does because he believes that he is right.

He has the right to express his opinion exactly the way he was raised. Because in our country there is such a thing as Freedom of Speech. Anyone can go to any channel and write whatever they want.

And why exactly did he behave this way? This means that in his consciousness, in his subconscious, in his mind there are such attitudes according to which he believes that he must improve this world.

When he sees something that does not correspond to his ideals, he becomes uncomfortable in his soul. Well, one might say, it’s painful and uncomfortable. Why? Because he is used to bringing everything to perfection, and he acts from good intentions.

He acts from completely good intentions, as he understands them (and he may understand them differently than we do), and this is completely normal, because it is normal that we understand the world differently than he does.

Question: why does he write like that, what does he want to achieve with this? He doesn't want to annoy me, does he? This means that he is carrying out some of his own instructions. Which? He writes that he doesn't like my channel or doesn't like what I do, or how my chair is... Why does this bother him so much? This means he wants to make the world a better place!

Another person doesn't care about the channel, well, if he didn't like it, he passed by or left. And this one, look how good he is, he tries, he fights for the purity of this world, well done.

Now, when you think about him like this, you can not even write anything, but send him the Light of your love and you will remain on high vibrations.

To be capable of such perception, the first thing required is not to be afraid of any criticism. In order not to be afraid of criticism, you must be completely confident in yourself, in your Light.

26:26

Natalya: How can people raise their vibrations? What to do? Maybe exercise in the morning or eat right? Or, conversely, do nothing?

Irina: Relax and be who you are. Never be afraid of anything, feel free to express yourself in the way and the person you are. But at the same time, there is no need to offend other people and, in any case, forgive everyone. We, without noticing, may offend another person, but we want to be forgiven? So, according to the law of justice, we must forgive others.

As Omar Khayyam said:

> Do not be evil to others and do not be evil yourself.
> We are guests in this mortal world.
> And if something goes wrong, accept it!
> Be smart and smile.
> Think with a cool head.
> After all, everything in life is natural.
> The evil you emitted
> He will definitely come back to you.

#71 Alien about love, raising children and proper nutrition. How to maintain youth?

https://blog.cassiopeia.center/inoplanetyanin-o-lyubvi-vospitanii-detej

https://www.youtube.com/watch?v=yIk37p5Q7ik

01:30

Natalya: How do you understand what kind of child was born, what was he created for? Children have certain inclinations. How is your education going? How do you figure out which child will grow into which? How best to develop it?

Irina: We are figuring it out from above. Firstly, through the Spiritual world we can enter. Most Eslerians connect with their Higher Self, we call it the Inner Light - that's our term. Inner Light, it also shines in the soul of this child. Even before a woman gets pregnant, we imagine what kind of child we will have. Those. a woman can control this process to a certain extent. Her Spirit in astral travel can meet the Spirit of the child who chose her for incarnation.

02:48

Natalya: Do you have love?

Irina: Yes. We have love. We have an attraction not only of bodies, but this attraction, first of all, of the Soul. And bodies only reflect this connection of Souls, reflect the connection of bodies. Here everything is very similar to earthlings, only there is one fundamental difference - neither a man nor a woman of our race can have attraction to the other sex without love for

this Soul. Our energy and our body are set up to fall in love with a woman or a man just once. And if this is mutual love, we feel how our Souls merge into one, we become a single being in many ways, and only then can we experience bodily attraction. And without this love we cannot even experience bodily attraction.

Natalya: Does this happen to everyone on the planet?

Irina: Yes. For us, our hormonal system of our body is built in such a way that it depends on the excitement of the Spirit. Not from the instincts of the body, but from the promptings of the Spirit. It has already been rebuilt this way.

04:18

Natalya: How to find this Spiritual part of yourself, this soul mate?

Irina: How to find your soul mate? By similar vibrations. For example, many people have similar vibrations. When you are with Irina, do you feel that you have similar vibrations with her?

Natalya: Well, yes.

Irina: Was there such a thing that they were, for example, even more similar in communicating with a man? That when you saw him, you seemed to understand that here he was, your loved one. That you always want to be with him, want to think about him, etc.?

Natalya: I was in love. And to be honest, I didn't think about vibrations.

Irina: You don't have instruments to measure. You feel it with your Soul.

Natalya: Well, yes, it's like falling in love. You understand that this person is different in some way from everyone else, and you begin to distinguish him...

Irina: And if this feeling is mutual, if later people do not reject this feeling because of some of their attitudes and because of some of their moments of inner life, instinctive or different upbringing, then this love will only grow and strengthen, and Even earthlings will no longer need anyone in this family. This means that if someone who truly loves, he is no longer able to change, because for him this love even remains at a distance, even in separation.

06:17

Natalya: But these two halves of the Soul, do they somehow strengthen each other by

connecting? What's happening?

Irina: They connect in energy. Individuals remain unique. They have such a united aura. Of course, they reinforce each other. This is like a universal law for the Universe - both for you and for us. If there is true love, then everything that happens to one partner is reflected on the other. If one becomes physically ill, the other will also become ill. He can take over some of it and recycle it. If one of them, for example, lowers his vibrations, gets somehow angry, frightens him, lowers his vibrations in every possible way, is jealous, doesn't even say anything to the second one, then the second one will also feel a decrease in his vibrations. If she does not artificially keep them high, i.e. she will feel that she is in a bad mood, something else... I.e. they influence each other. And, naturally, this influence extends to their children, i.e. on those who have already appeared through them, incarnated. They, in general, have a common aura with their parents, up to 14 earthly years.

Natalya: We are talking to you now about our children, right?

Irina: Yes.

Natalya: Is it the same with them?

Irina: We have a common aura with our parents. It lasts a little less, up to about 10 years of yours.

07:59

Natalya: What about the life expectancy of an Eslerite?

Irina: Yours are 430-470 years old.

08:07

Natalya: Wow, why do we live so little?

Irina: You lived longer before the war, you had a life of 600-700 years, 10 times longer than now. But now the position of the Earth in its orbit has changed, and in its orbit around the Sun, your planet has acquired the Moon. A single continent split, there was a completely different magnetic field, core radiation, etc. You, your bodies, are now adapted only to this period of life.

08:42

Natalya: How can we keep our bodies at least young during these 80 years, or how long we

have been given?

Irina: The body here always follows the Soul, i.e., in any case, how the soul feels, it will give a signal to the body. For example, in your case, since your Soul is so young, it already gives a signal to the body at the hormonal level so that it continues to accelerate metabolism like a young person, for example. Those. All organs of your system are working. Your age cannot be told by your body. If you compare them with the indicators of your age, they will be higher for you. The rate of aging of the body depends on genetic characteristics; it happens differently for everyone - metabolism, nutrition, lifestyle, stress, attitude in general to life, to old age, to youth. Those. if this does not matter to a person, then this process will go faster for him. If it matters, it will slow down. It happens that if a person ages slowly, this is a sign that there were long-livers in his family. This happens. But this does not mean that if he ages quickly, that his family did not live long. This may actually depend on other factors.

10:45

Natalya: Maybe there is some kind of special diet or you need to take some proper water or charge it? Maybe some nutrition tips?

Irina: Diets... I have already said that a diet without special prescriptions, any restrictions on your diet, they do not make sense. Because they must be prescribed, if your body requires it, it must be prescribed by a doctor, or I can look and choose from the vibrations what is suitable in the food. The only thing that is beneficial for everyone, that is beneficial for all people, is a varied diet. This food, as we call it, is fractional. Those. in any case, it is better to eat little and often, because it is healthier for the digestive organs than if you eat a lot at once several times a day. This is an overload of the digestive organs. They don't have time if they eat a lot of earthlings at once. Yes, you are full, you feel full, etc., but your digestive organs cannot immediately release as many enzymes as are required to process this food, to absorb microelements and vitamins, etc., etc. Then more than half of the unprocessed food will go into the intestines, where it will decompose from your microbes, which can cause intoxication. Plus those microelements, vitamins, proteins, etc., which should have become part of you, since you bought it, ate it, should be part of you, benefit you, but instead, due to enzyme deficiency, you feed the microbes.

Natalya: This is interesting.

Irina: And almost everyone has microbes in their intestines. Each earthling has about two kilograms of bacteria.

13:07

Natalya: I'm wondering, do you eat animal food at all?

Irina: Eslerites - no, they don't use it.

13:17

Natalya: And to a person? Is it generally useful for humans? Do you eat animal proteins?

Irina: I said, a variety of foods. In any case, if consumed in moderation, if you do not eat only animal proteins. Yes, it's useful.

Natalya: And meat?

Irina: And there must be meat for humans. I would advise (if you eat meat, at least after 40 years, red animal meat - pigs, cows) to eat meat 2-3 times a week, not every day. This is enough to replenish protein. And the rest of the days, if you are accustomed to animal food, you can eat poultry. It would be good to eat sea fish once or twice a week, i.e. there are a lot of useful substances there. Eating only meat is harmful... A larger portion of your diet should still be occupied by plant foods. This includes fruits, vegetables, and herbs. It is very useful for you to eat a variety of greens, and even buy them in winter. In general, wherever the green leaves are, in any greenery, there is chlorophyll. Chlorophyll contains a lot of copper, which is necessary for the functioning of your brain and, in general, even for tuning into contact.

Natalya: Seriously? Maybe I should switch to green leaves.

Irina: Even if you eat meat, it is very good to accompany it with greens. It improves digestion and stimulates the production of your enzymes. Chlorophyll itself carries a lot of oxygen in its leaves, and when you eat, you saturate your body with oxygen, and you also have other compounds that are found in plants, vitamins, etc. They just contribute to the rejuvenation of the body, in your opinion - regeneration.

Natalya: That's it, let's move on to the greens. And some people don’t eat meat at all. This is good? I haven't eaten meat for many years.

Irina: If you just don’t like it, that’s fine. There are people who don't like him. If, for example, a person who loves meat does not eat buckwheat, bananas, or some kind of fruit, no one will say to him: “What’s wrong with you, why don’t you eat fruit?” Or: “Why don’t you eat pineapples?” And if you don’t like it, but love meat. I will say: “I don’t love him.” There are many such people. You can also love it, just for the taste.

If you look from a medical point of view, the ratio of plant and animal foods should be approximately 70/30, i.e. 70% plant food, but it includes vegetables, fruits, herbs and cereals. Cereals must be included in the diet, varied, not just buckwheat, not just oats. And this also includes carbohydrates, what are called sweets. This should be 10-15% of the diet, the sweets that you are used to eating. And 30% is animal food, but this also includes dairy products.

17:18

Natalya: Are dairy products good?

Irina: Dairy, eggs, meat, fish. In principle, if this is the ratio of the diet, then this is the most optimal for your species. If you consume more animal food, eat a lot of meat or milk, cheese, etc. every day, then this will not cause such harm. But animal food is considered concentrated, i.e. these animals also ate plants anyway. It's still a food chain. Even if you eat some kind of predator, that predator ate other animals that ate the same plants, so in its meat, in its milk, etc. the same plant substances are found in concentrated form. Therefore, if you have more than 30% meat, you will be full, full, and you will not want to eat a lot of plant foods.

Animal food does not contain all the substances that humans need, so plant food is needed. And an example of this is that the ancient sailors took with them canned food, dried meat, canned meat, caught fish, but from a long voyage, because they had not seen plant food for many months, they still developed scurvy from a lack of vitamin C, because that there is practically no vitamin C in animal food, especially processed food, milk, and meat.

19:12

It is also useful to drink plenty of fluids to avoid dehydration. A person does not notice a dehydrated body. And this also makes him age quickly. He can eat normally, he can eat everything, he can play sports, not be nervous, but if he doesn't have enough fluid, he will, firstly, be prone to constipation, and secondly, he will be weak and want to eat more, and, thirdly, he will have dry skin.

Natalya: How much water should you drink?

Irina: I recommended 2.5 liters to Irina.

Natalya: Does she drink?

Irina: I will never drink that much... But in general, tea is also considered a liquid.

20:03

Natalya: Is it good that there is sugar in there?

Irina: Tea, for example, without sugar. But sugar is individual, I think 30 grams, i.e. This is about 2 tablespoons of sugar per day - this is the norm for a person.

Natalya: Do you mean white sugar? They say it is harmful to humans.

Irina: Also found in sweets. The fact is that if you want sweets, then this is a sign that from other substances that should be supplied in a variety of ways, something is already missing in the body. For example, if you eat the same oatmeal with honey in the morning, you will crave chocolate less, etc. Because this porridge with honey, with a small amount of natural honey, will take a long time to digest and will saturate your body with glucose and energy for a long time. And I want sugar because I lack energy. This means that you haven't eaten exactly what takes a long time to digest and saturates your body, because if you eat sweets often, your blood sugar level will quickly rise, and as a reaction to this, insulin will rise and this sugar will be removed from the body. And because your sugar levels will drop again due to insulin, you will again want to eat sweets. This is how the races will be. And if you eat porridges and cereals that contain a lot of complex carbohydrates, which take time to digest, then you will feel full for a long time, and you will not want to eat sweets in such quantities. This is again due to the fact that you have distributed the diet incorrectly.

Natalya: Did he try earthly food? Did you treat him?

Irina: No, I didn't treat him. I wanted to treat Kirkhitona to beer. True, I took beer with me.

Natalya: What are you talking about? What a story!

#72 Conference with ufologist Maxim Bronevsky (part 6): reptilians, Hubble, gravity, meteorite

https://blog.cassiopeia.center/reptiloidy-habbl-gravitaciya-meteorit

https://www.youtube.com/watch?v=LyaXKjvcdYM

00:49 About the origin of the Tisul princess.

Maxim: In September 1969, during excavations in the Tisulsky district of the Kemerovo region of our country, an interesting find was found: a two-meter marble casket of amazingly precise mechanical workmanship was discovered. The casket turned out to be a coffin, filled to the brim with pink and blue crystalline liquid. Under the surface of the spring rested a tall, about 180 cm, slender, unusually beautiful woman, apparently about 30 years old, with delicate European features and large, wide-open blue eyes. At the woman's head there was a black, rectangular metal box, rounded at one edge: something like a cell phone, approximately 25 by 10 cm in size. It is believed that this was a representative of an extraterrestrial civilization. Do you know anything about this story?

Irina: Perhaps these were pre-war remnants. People lived here for many thousands of years and, naturally, they had their own burial places, their own Temples, their own priests, rulers, whom you can call kings. Who it was in the Kemerovo region - you need to get out the archives, maps and see who it could be in that area. During these thousands of years, anyone could have been there. According to the descriptions, it also looks like an earthling. If you had done a DNA test on this woman, you would have known who it was. Because it is by DNA that the representatives of your planet differ.

Maxim: It turns out that even if it was a dugout, it lay in such a pink liquid that did not allow the tissues to decompose, accordingly, the knowledge and understanding of that civilization was much higher, and therefore they could develop such things?

Irina: Of course, at that time there were priests, knowledgeable people who added various, one might say, antiseptic solutions that prevented tissues from decomposing. They removed the internal organs from which decomposition occurred, where the most microbes were found, for example. Priests and doctors already knew all this in ancient times. But they didn't call it modern language, but in a different way, but, in any case, they had knowledge. And they also

received this knowledge from open contact with representatives of extraterrestrial civilizations: many priests and contactees, who later also became priests and rulers, asked about the health, about the physical body of the aliens, and they were given knowledge that there is a microworld, why the body decomposes and etc. And based on this, they developed chemicals similar to what the human body can preserve without rotting.

04:32 The release of the Spirit after death, the reasons for its retention next to its body.

Maxim: Why did they preserve the dead body? After all, the fact is that, as far as I understand, it is very difficult for the Spirit to separate if the cells remain in such a preserved state.

Irina: It is not difficult for the Spirit to separate. The Spirit separates at the moment when its connection with the body, what you call the thread of vital force, is severed. It's just that if the cells are intact, if they are in a state of non-decomposition for a long time, then some time passes inside these cells, not always of course, but some time after death is different for each organ, for each person, for each body individually Although a slow metabolic process is taking place, that is, metabolism continues in a very weak form. This is why nails and hair grow on human corpses, and even when they are long dead, cell division continues. And due to the fact that energy processes are taking place, life force continues to be released from the body - what you call ether. And that Spirit who has freed himself, if he is pure, in the understanding that he is not attached to the earthly world, to his relatives, to his property, he wants to further develop spiritually, then he, not paying attention to this life force, will move on into the Spiritual world to his level, where he is supposed to be, and there he will already think about his incarnation, analyze it, go to consultants, that is, he will live in the Spiritual world, in short. And if he is attached to his relatives, to his friends, to his property, then he can use his life force, which is released, and due to it stay longer with the living in the astral world, in the spiritual region closest to the material plane, the region Spiritual world. And due to this he can delay his development, but it all depends on his will, the choice of the Spirit. But, in any case, the Spirit Guides will come for him, they come to any Spirits. But no one has the right to force him to go, and he can stay. And this vital force, which is released from his bodies and is the most suitable for his vibrational characteristics, is the easiest for him to assimilate and use to keep himself close to the material world.

07:17 Goals and beliefs of ancient priests when mummifying bodies after death.

Maxim: It turns out that the goal of the priests who did this for other people was for this vital energy to be released precisely during mummification and preservation of the body.

Irina: Their goals can be very different, for example, the belief that the Spirit will return to this particular body at the end of time, for example. There were different religious beliefs: that the energy that is released from the body can go to feed the Spirit that lives in the Spiritual world, or that the Spirit has left, but the Gods can feed on the energy that comes out of a dead body for many months, and, naturally , these will be plasmoid civilizations. They could tell their priests to preserve this body - and this is also quite possible.

Maxim: This means that fashion began to use these manipulations after the catastrophe, when people did not have knowledge, but there were only assumptions about the religious ritual.

Irina: Before the war there were contacts with the same plasmoids. Therefore, contactees who mistook plasmoids for Gods could well have done this. And there were even more of them than now, because the contact was more conscious, more real for them. At that time there was no such materialism, and religious and philosophical teachings could have existed in the pre-war period.

09:02 Reasons for the hermitage of believers, sorcerers, and magicians.

Maxim: My version and I believe that various ancient sorcerers and magicians went into the forest far from people to live specifically in order to connect with their Higher Self, to awaken these extrasensory qualities. Is this true or not?

Irina: You see, it's easier for many people to tune in to the Spiritual world, to the plasmoid world, to what you call invisible; change the qualities of the receptors of your physical body, the level of vibration of energy in such a way that you begin to feel, feel and communicate with the astral world or with plasmoid worlds in solitude, because they are not influenced by the energies of other people, are not distracted by communication with them, caring for the family . This is easier for many people, but it is not a mandatory rule. You can stay. It also depends on many moments and desires of the person himself, on his habits, beliefs, on his faith, in the end. If a person believes 100% that he can communicate as freely among people, then he will do so, because he will overcome these obstacles. And if he believes that it will be easier for him to communicate among nature, to hear Spirits, Gods, as he calls them, then so it will be for him. How he configures his perceiving apparatus, he will receive such contact.

10:58 Raising your vibrations as a prevention against low-frequency influences.

Maxim: If we analyze our situation: we live in multi-storey buildings, we may have an alcoholic neighbor or someone else behind the wall, and these thought forms can come and be captured by us. It seems to me that this greatly interferes with some aspects of development.

Irina: Again, here, depending on what vibrations the person himself is on. If he himself attracts these thought forms, he will attract them from the atmosphere altogether. I believe that both Mead and Raom Tiyan say, and we believe, that a person should not run away from these interferences, he should raise his energy.

Maxim: But nevertheless, as far as I know, in some civilizations even houses are built deliberately far from each other so that the energy of different families does not intersect, is this the same?

Irina: It's not because it's hard for them to communicate with each other there. This happens because everyone has their own space, because in it, for example, they can not interfere with each other's lives, behave as they should, so as not to simply create physical discomfort for each other. But to be sensitive in this way to such energetic interactions? As far as I know, Esler and Burkhad increase their vibrations, so they do not feel similar influences from other low-frequency beings that would interfere with their lives.

Maxim: The situation there is different: there are not as many low-frequency creatures as there are on Earth.

Irina: Well, we can be on Earth in astral bodies, and in the astral body the influence of thought forms and the influence of a low-frequency person is even more noticeable than in the physical body, for example. Because the physical body itself protects against contact with such thought forms. You may simply not perceive or feel anything, but in the astral body you not only feel at the level of thoughts and feelings of the astral body, you also see and hear, you feel more. In any case, we can come and be in any society, one might say. Even if a person is unpleasant to us for some energetic reason, we are not influenced in such a way that this could somehow lower our vibrations.

14:02 The futility of the agreement between the reptilian civilization and the financial elite of the Earth.

Maxim: According to information from Mitya from the Andromeda Galaxy, a certain extraterrestrial race of reptiles, called Cancer, entered into a bilateral agreement with representatives of some earthly financial elites, and now they are allegedly jointly setting up a base on Mars. These supposedly reptilians take earthly specialists, representatives of our financial elites, to Mars on their spaceships and work together there. Miti says there are now about 30,000 people at this base on Mars. All this happens with the permission of the Interstellar Union. How would you comment on this?

Irina: There is no data in the Interstellar Union about contacts of both reptilian races on such a scale with your people of any countries, and not only reptilian races, with any people on Earth on such a scale. Of course, there are bases on Mars, but we can fly there ourselves and see who is there. In any case, you need to look at how and what his contactee understood. Do these flights take place in the physical body or are they some kind of astral travel? After all, on astral travel, naturally, representatives of any races can come. You need to ask these questions to the contactee himself, as he understood them. Raom Tiyan says that as far as he heard from Ashtar, who knows Mitya personally, he was about 30 years ago at a base on Mars, and he himself saw the situation there very well. Yes, and what is the point of concluding a bilateral agreement, and even with your financial elite, to take them to Mars? This makes no sense, especially for the Interstellar Union. What can this bilateral agreement achieve? It is clear that the civilizations of the Interstellar Union can give some technologies or treatment of diseases, the same flights to Mars and so on, but what can the same people give in return to the same reptilian civilizations, what is the point? If this contactee claims that Mitya says exactly this, then let him give a full breakdown of the situation: what are the terms of the agreement on both sides.

Maxim: So you confirm that there are no financial elites on Mars, no one is developing anything there, and there are no people on those bases?

Irina: Even if contactees are sometimes brought to bases, it doesn’t happen for long: a maximum of 30-40 minutes. Then the contactee is taken back. If it is a physical contactee, of course. In order to simply show some base. For example, Irina was shown a base on the Moon, we can say that she was at a base on the Moon. Physically. She was there several times, she was brought there, but it cannot be said that she lives there permanently. There is no meaning for the civilizations of the Interstellar Union.

Maxim: It's just that on Earth, I'll explain the situation, rumors are spreading intensely that these financial elites, such rulers of the world, let's say, are already in contact with someone, and on Mars or on other planets they are building their bases in order to leave the Earth for experiments: epidemics to reduce the population and so on, and at the bases, supposedly, the elite will be safe. As far as I understand, there is no such thing, is it just fantasy?

Irina: This kind of experiment, which involves causing deliberate harm to the health and life of living intelligent beings, cannot be approved by the Interstellar Union. Such a civilization will immediately be expelled from the MS if it is proven that these were not just criminals who acted, but with the consent of their power structures. Therefore, you can, of course, assume that they may even be hiding these people from us and from representatives of the Galactic Security Service, which, of course, is unlikely. After all, everything is being checked, but I will once again ask you to ask Mitya about what is the return of these supposed representatives of the financial elites, thereby reptilian civilizations? That is, what did they promise them in exchange for services for moving to bases?

Maxim: And if you fantasize like this: do the financial elites have the right, for example, to offer our planet as experiments to the same reptilian races in the form of a bilateral agreement? Or will the Interstellar Union figure it out right away and stop it all?

Irina: Do you mean that they will act on behalf of the governments of the Earth?

Maxim: Yes, this is the coordinating body: we are the main ones here, we give you the planet for experiments. Could this be possible?

Irina: If such a proposal comes to the Interstellar Union, then, in any case, the opinion of the governments of the financial elites will not be taken into account, especially since open contact is prohibited, but the answer will simply be that this kind of intervention will only take place after mass contact.

Maxim: That is, from the point of view of the Interstellar Union, representatives of our financial elites do not have the authority to represent the entire planet.

Irina: No, of course, no one has the right to represent the entire planet; it is in the Galactic Interstellar Union to decide for the planet. Any earthling who flies can represent his planet. Any earthling can represent, but make a decision for the majority of the population, if such a proposal comes to the Council of the Interstellar Union, which meets on Burkhad, then, in any case, they will ask the question: "Why are you making such a proposal if there has not yet been mass contact, and people haven't decided yet whether they are ready for such experiments?" In any case, such experiments are carried out only on contactees with their voluntary consent. But not over those who are not in the know at all.

21:38 About the intervention of the Interstellar Union in political and military conflicts on Earth.

Maxim: How does the Interstellar Union generally view the situation when representatives of

financial elites or Masonic organizations decide everything for everyone? They have money, resources, and they think, for example, like this: “Let's reduce the population of the Earth, create a new virus, and so on.” Are these our personal affairs? You don't interfere in this, as I understand it. Should we stew in this situation ourselves? When the powers that be begin to decide for the entire planet what to do, how to do it, where to go, and so on. However, they are not the highest vibration ones, that’s the problem.

Irina: Since your planet, as I already said, is not part of the Interstellar Union, direct interference in its political and military affairs is prohibited until it brings danger to your entire species, your entire planet. Because you must develop on your own, our intervention will not give anything, even if we knew in advance in some way: from our contactees or from observing your television media. The Interstellar Union is watching over your society. And even if we find out in advance about some secret experiment, for example, or something else, we isolate or, in your language, kidnap those responsible for this experiment, then, in any case, the very system that generates all this, will remain until another power comes to planet Earth. And then completely different ones will come, and there will be no such low vibration ones. And if we simply remove one of the people or several people who are doing this, then others will take their place, and it’s not a fact that they won’t come up with something that will be even more harmful to your planet. Therefore, we have a principle of non-interference at the political and military level. We made the only exception, as we have already said, in the 50s, when there was a threat of nuclear war, not just a war like the First World War, the Second World War, but a nuclear war that could lead to the destruction of the entire planet. There was not just a threat, as I already said, the USSR and the USA actually fired missiles with nuclear warheads against each other, only this was classified. Therefore, the Interstellar Union decided to make contact, but not mass contact, but with those representatives who were responsible for making these decisions. And they were simply told that if there was a repetition of such an incident, then in this case the Interstellar Union would be forced to make open mass contact, because a nuclear war could threaten the existence of your planet.

24:48 About the impact of the Tikht civilization on the Chelyabinsk meteorite.

Maxim: In 2013, a meteorite fell near Chelyabinsk. There is an opinion that the meteorite was originally very large, and it was split into pieces right in the air by some UFOs so that people would not suffer in large numbers. Did aliens really influence the Chelyabinsk meteorite?

Irina: Yes. It could have fallen on the city, but one of the representatives of the Interstellar Union civilization actually changed its trajectory, but not with weapons, they have such radiation as a directed plasma field. But he did this almost as if in space, even in the stratosphere, he influenced it to change the angle of its fall. Yes, that happened. But this was a representative of the Tikht civilization. Ticht also has a base on Earth, it is located not far from the area where you live.

Maxim: And what was their calculation? So that the meteorite does not cause severe damage to the Earth. Why did they interfere?

Irina: He was noticed by those ships that were a little further than the Earth’s orbit. There were Tikhtian ships there, which noticed the fall of this meteorite. They flew after it and changed its orbit so that it would not fall into a populated area of the city, otherwise there could be great destruction.

Maxim: And if, say, some large asteroid flies towards the Earth, and they understand that it will cause great damage, will they deflect it away from us?

Irina: Yes, they will reject it if it is a large asteroid. The fact is that Chelyabinsk was small, there are many of them flying around the Earth in orbit, they can be said to be unpredictable. And if it is large, then it can be noticed from afar and its orbit can be calculated in advance and, naturally, deflected so that it does not cause any destruction.

Maxim: Were there any cases when this already happened and was rejected?

Irina: Yes, it happened several times during the 20th century.

Maxim: Why wasn't the Tunguska meteorite rejected?

Irina: Because the comet that was flying at that time was, firstly, not the largest, and secondly, the Earth was flying through its tail, and there were no calculations that the comet's nucleus would pass so close to the Earth. And when it became clear that it would not pass around the Earth, there were no bases nearby at that time. There was no ship that would turn it around.

29:04 About the expansion of the Universe and the cyclical nature of its existence.

Maxim: We have Hubble's law, according to which, supposedly, our Universe is expanding. Is our Universe really expanding, and if this is not the case, then why from Earth do we observe a shift of the electromagnetic spectrum from different galaxies to the red side, towards lower frequencies? According to the Doppler effect, this can be interpreted as galaxies moving away from each other.

Irina: The most interesting thing is that this scattering shows that our Galaxy is in the center. All galaxies are running away from you. In any case, this effect is not due to the fact that the Universe is expanding, but to its cyclical existence. The time of existence of the dense material Universe is cyclical, that is, the time of manifestation of matter in a dense material form seems to change. First, the dense material Universe appears, and then it passes again into the subtle material plane, vibrations and again into the Spiritual world. You observe the effect of this transition as the retreat of galaxies.

Maxim: So we are observing a change in the vibrations of matter itself?

Irina: You can say that, if it's easier.

Maxim: So the Universe is not expanding after all? Everything is quite static, right?

Irina: It manifests itself first in the form of the Spiritual world, then it seems to unfold in the subtle material.

Maxim: That is, this process occurs continuously: unfolding, changing frequency characteristics, then folding back, and so on for billions of years.

Irina: If you look from the point of view of the Spiritual world, then this is what happens. Because the energy that goes first to create subtle material worlds, and then its dense form of matter, comes continuously, in any case. We call this energy support from the Spiritual world to maintain existence. But if you look at this not as a static process, but as a dynamic one, then we can say that it is continuously unfolding and at the same time collapsing. Because time does not exist in the Spiritual world. Therefore, if you look from there, this process occurs continuously in both directions.

Maxim: So, the Doppler effect is what we observe from Earth: the process of folding and unfolding of constant change?

Irina: To put it simply, we can say that you are observing the transition of spiritual energy, which initially forms the subtle material worlds, into a dense material form.

Maxim: And this process will simply stretch out over billions of years?

Irina: If from the point of view of your earthly time, then yes. You have a type of perception that perceives these waves exactly like that.

Maxim: It is clear that from the point of view of the Spiritual world, this is a fairly fast process.

Irina: Maybe fast, but maybe slow. The concepts of “fast” and “slow” are very difficult to explain to someone who lives in the Spiritual world.

33:33 About the existence of time in the Spiritual world, its perception and the flow of spiritual processes in it.

Maxim: I understand. But when the Spirit is in the Spiritual world (it is clear that there is no time in the Spiritual world), but the consciousness of the Spirit itself affects the perception of the passage of time or not? Can it stretch or increase, or, conversely, shorten some processes?

Irina: In the material world?

Maxim: No, exactly in the Spiritual world, how does the Spirit perceive this?

Irina: How does he perceive the course of some processes?

Maxim: Yes, the flow of processes. When there is no time, then he can, for example, at will, stretch out some process, or, on the contrary, shorten it, or is this impossible?

Irina: Most likely, the perception of processes following each other, what you call the flow of time, is not similar to the material, which is the same for everyone. It's not something that happens at will, it happens rather according to the frequency characteristics of the Spirits, that is, the higher the frequency of vibration of the Spirit, the faster these processes proceed in it. And vice versa, Spirits who know how to do this have such an ability, they can slow down and speed up personal time. But this is not time, this is a process, because nothing changes there, the process of phenomena coming one after another is simply perceived there. Well, here, for example, is a conversation between two Spirits. What is conversation? This is a sequential transmission, in this case, of mental images. In order for there to be a consistent transmission of mental images, they must follow each other. And the one who has a higher frequency, in order to transmit information from a lower frequency, adapts to his personal conditional time so that he can perceive this information. Otherwise, for him it will be an incomprehensible stream of some signals.

35:41 About help from the Spiritual world and the reasons for this help.

Maxim: Last question. A session of regressive hypnosis was conducted, when the person who was put into hypnosis explored the situation. As a child, he fell from a balcony on the 5th floor, the height was quite high, and when he had very little time left to reach the ground, something delayed him, and he fell softly to the ground. When they began to look at this process from a regressive point of view, it turned out that at that moment some of his curators, the entities that supervise him, approached him, they changed time or the course of time and gently lowered him to the ground. Could this be an intervention?

Irina: I would even say that it was not time that was changed, but rather gravity.

Maxim: Maybe. Is this possible for some entities to do this?

Irina: Well, of course, if you direct energy to this, to suppress gravity, then even levitation in your world is quite possible. Moreover, the decline is slowing down. Why did this happen to him? This means that in this case, leaving his incarnation was not provided for by his term. His plan of implementation, which he himself chose.

Maxim: Dear friends, another conference session with Irina on ufological issues took place. We are waiting for you in the next issue. Best wishes.

Irina: I wish you all the best, good viewing. Until we meet again, dear friends.

May 01, 2020

Participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Bronevsky - researcher, ufologist;

MidgasKaus - representative of the planet Esler, biologist, psychologist and specialist in alien civilizations;

LiShioni is a representative of the planet Shimor, a specialist in the astral world and its interaction with the material world;

Raom Tiyan is a representative of the planet Burhad, a specialist in energy interactions in the material world.

#74 Live broadcast with contactee Irina Podzorova. Is Christ risen? The universe is infinite?

---

https://blog.cassiopeia.center/voskres-li-hristos-vselennaya-beskonechna

https://www.youtube.com/watch?v=ZrJp354NrO8

00:00

Irina: Hello, dear friends. At the moment, there are people next to me in physical bodies and

in astral bodies. Today we decided to conduct a live broadcast, the theme of which is Christian egregor.

I, LiSioni and MidgasKaus invited one of the representatives of the Christian Egregor to this live broadcast. This is Archangel Raphael, who is present here now and is ready to answer all your questions.

03:01 Irina, please tell me what MS representatives can tell you about the IVF fertilization procedure?

Irina (reported by MidgasKaus): Reproduction outside of maternal organisms is a normal method of reproduction. On planet Earth, when using the IVF fertilization procedure, the fetus grows in the woman's body. Fertilization occurs outside the mother's body. There is absolutely no barrier for the Spirit to direct its vital force into the resulting cell of a new organism. In this case, there are no obstacles to the incarnation of the rational Spirit; everything happens in the same way as during traditional conception.

04:38 When will the coronavirus pandemic end in Russia?

Irina (reported by MidgasKaus): Representatives of the MS previously said that in the summer the number of infected people will decrease, due to the fact that at high air temperatures and in sunlight, this virus becomes less stable. They also rely on people's understanding and lack of fear. Then the authorities will have to listen to the opinion of the majority of people and remove restrictive measures. MS representatives wish us this to happen as soon as possible.

05:56 Ask our friends about the children who were released from US underground bases?

Irina: In this case, we need more complete information: which children were released by which military personnel and in what year?

Maxim: Irina doesn't watch TV, and she needs to ask specific questions.

06:25 Will coronavirus vaccinations containing chips be used in the near future - is there a risk of people being chipped?

Irina (reported by Raom Tiyan): I researched the technologies of your planet and found out that the main problem with creating nanochips on Earth is the lack of technological capabilities that would allow this device to be autonomously powered from the human body. Similar models already exist in your country, but they are not designed for long-term operation. Such technologies exist in MS. MS representatives often install chips on their contactees at the physical level. This chip is different from the chips on your planet in that your chips need batteries. Our chips can be powered by the life force of a person secreted by his cells. Such devices require very fine organization to be able to absorb mitochondria from your cells. While

studying technology on Earth, I have never seen such chips. Perhaps there is research in this area at the moment, but in the next fifty years I don't see the possibility of introducing these chips through vaccinations or purposefully. Due to the fact that you do not have the technical capabilities to create nanodevices.

08:37 Tell us why all the saints in the Christian religion lived a martyr's life?

Irina (Archangel Raphael answers): In the Christian religion there is a teaching that saints experience great suffering in life. This is not because all saints must necessarily suffer in order to become saints. This designation arises due to the fact that the status of a holy person in the Christian egregor is identical to the status of an enlightened person in esotericism. Such a person radiates light, shares it with other people and helps awaken similar feelings in people. This person has the ability to see darkness and suffering in other people, which causes suffering in himself. He suffers because he cannot help everyone. Because this is impossible. He feels powerless in such a situation. The saint also suffers from the attitude of other people towards him. Since there may be low-frequency people around him who are not aware of this light in themselves. They may also feel humiliated in front of the saint and, perhaps, put pressure on him, but they have no desire to change their own attitude towards life. Such people can often abuse the kindness of a saint. An equally important reason for the torment of Christian saints is the historical fact of their persecution. On Earth, in ancient times, the laws were quite strict. Believers in a forbidden religion could be killed or executed. For the last three hundred years you have had a free religion. In this regard, many saints had to accept martyrdom, not imagining it possible for themselves to renounce Christ. For a true believer in Christ, renunciation of him entails a complete departure from God.

13:04 What needs to be done on Earth for the common good?

Irina: We all try to make the world a better place and become better ourselves. But initially you need to figure out what the concepts of "better or worse" mean to you? These concepts will differ for each adult. We cannot change the world around us in any other way except through ourselves. It's the slow way. It is very difficult for a selfish person who is used to loving only himself. For such a person it is extremely difficult to radiate light and act selflessly. The surest way is to be an example for other people. These people will then raise their children in love and light. Thus, we can approximate the time period of humanity, which is called the "golden era". This will also allow earthlings to join the MS, whose representatives are with us, at the moment, in astral bodies.

15:14 Is it possible to have official contact with representatives of other planets? This is necessary to stop the spread of false information about the veracity of such communication.

Irina (Raom Tiyan answers): I, as a representative of the planet Burhad, which is the capital of the MC, can declare that mass official contact is prohibited until you fulfill several conditions.

One of the main conditions from which all others flow is respect for the life of every intelligent incarnate Spirit from the moment of conception. Respect must be at the level of legislation and government. The consequence of mutual respect should be the cessation of all wars, the prohibition of killing children in the womb, the prohibition of the death penalty and other forms of disrespect for the form of the rational Spirit.

The next important condition is respect for your planet, not just as a celestial body, but as an intelligent being. Your planet is controlled by plasmoid civilizations, which are the same intelligent spirits as you, but they are in subtle bodies. Their interests also need to be respected - not to pollute the atmosphere, nature, clean up what is already polluted, restore the ecological balance. Representatives of the planet Tikht are ready to help you with this. You also have ecologists and other scientists who know what needs to be done. The government must pass laws that will protect the interests of not only yours, dear rulers, but also the interests of the population of the planet.

The next condition is freedom of speech, the eradication of the totalitarian regime.

If all these conditions are met, mass contact is possible. At this moment, if we make contact, your government will only be happy about it initially. Then a request will arise to join the MS and receive technologies for moving in the Galaxy. At your level of consciousness, you are not ready to possess these technologies and to move around the Galaxy. The main place in your consciousness is occupied by materialistic interest, guided by which you can cause harm, including to yourself.

19:38 When will the next birth of Jesus take place? According to numerology calculations, the next birth of Jesus will occur in March 2024. Is it so?

Irina (transmitted by Archangel Raphael): Jesus will not be born. These predictions may have been about one of his students. The body with which Jesus was united is immortal. This body can be killed, but no one will do this; due to illness and old age, he will no longer die. When he entered his body, which died due to the brutal wounds inflicted on him, the DNA cell structure was completely changed. Its cells, at the moment, cannot be subject to complete destruction; a constant process of regeneration occurs. In this regard, he cannot be born in another body and leave the one in which he now lives.

21:47 Who created the coronavirus?

Irina: Representatives of Burkhad believe that this is a development of the Chinese intelligence services and military. This virus is not a biological weapon, but it is an experiment to create one. We have no evidence that this was deliberate sabotage. We also accept the possibility that there was a leak from the laboratory.

22:39 Is the earth round or flat?

Irina (answers LiShioni): Some plasmoid civilizations perceive the Earth as a flat object. Underground civilizations perceive the earth's core as a separate planet covered with a dome. You, as beings of the humanoid type, third density, perceive the Earth as a spherical object.

24:05 Who is Sanat Kumara? Where was this Spirit incarnated, and where is it embodied now?

Irina: Sanat Kumara was incarnated on different planets. On Earth he is known as Esler's representative. On your planet there was a Shambhala base, which was located in Southern Altai (the name comes from the name of Esler's capital - Shambi). Sanat Kumara was one of those who founded this base and lived there for a long time. At the moment, he is embodied in a high-frequency plasmoid world of the 24th density level, which is not in our galaxy.

26:05 Is it true that if a person receives a chip during his lifetime and loses contact with God, then after death his soul goes to Hell?

Irina (transmitted by Archangel Raphael): These judgments arise from a misunderstanding of the book of the Apocalypse. I believe that a separate conference should be held on this topic and discuss the interpretation of chapter 13 from the "Revelation of John the Theologian." All fears and phobias about chipping are basically based on this text. I am ready to tell the true meaning of these words, which were conveyed to John the Theologian.

27:16 Is the Universe infinite?

Irina: Yes, the Universe is infinite in our understanding of the material world.

27:38 Is there life after death? What is Hell? How does the soul feel when the body is cremated? Also interested in who controls the Earth?

Irina: Life after death exists. Life is energy that cannot be destroyed. Also, a body that dies cannot be completely destroyed. These elements, decomposing, pass into nature and then into other living organisms: plants, animals and other people. The soul that has left the dead body is in the Spiritual world and then incarnates again. In the Christian egregor, the word Hell denotes the figurative perception of fire. This is an image of the state of the Spirit when it is in low vibrations. And, coming into contact with the light that is present in the Spiritual world, he feels burning and burning - unpleasant sensations. In the understanding of the Christian egregor, this is Hell. A person creates Hell or Heaven for himself while on Earth.

30:09 Why are the rulers of the Earth allowed to cause harm and suffering to earthlings, and are these rulers people?

Irina: From a genetic point of view, in all countries known to us, people who were born earthly creatures come to power. The spirits embodied in these people can naturally be incarnated from other planets, just like your own. The origin of all bodies is earthly, the origin of all Spirits is unearthly. We all come from the Spiritual world, and before that we all had different experiences of incarnation in different worlds. For example, Raom Tiyan had incarnations on Earth. Some of you, my dears, had incarnations on his planet – Burkhad. In what place were the incarnations of your Spiritual rulers it is possible to consider only with their consent, with the help of their Spiritual mentors. Rulers are allowed to cause suffering because everyone has freedom of choice. Each Spirit knows about its tasks of incarnation before the moment of birth. The spirit is embodied in a certain period of time in history when the population of the Earth has not yet reached a certain level of consciousness. This means that he needs such experience - the experience of finding himself, the light. There are many branches of religion and teachings on Earth. Everyone can make their own choice and everyone should learn to take responsibility for their choice. When a ruler commits an evil act, this leads to a lowering of

his own vibrations and the fact that after death, having entered the Spiritual World, his mentors will inform him that he has not completed the necessary lessons. Your main task is to increase the level of awareness in yourself, the level of love and grace. Because, despite all the difficulties that you go through in the material world, by doing this you purify your Spirit and prepare it for being in the Spiritual World.

34:32 Does MS have enemies?

Irina: MS considers everyone to be its employees, but not everyone is part of MS. Civilizations that are not part of the MS are not perceived by us as enemies, in your understanding of this term.

34:58 Does the process of cremation affect the state of the Soul?

Irina: The fate of the body does not affect the fate of the Spirit, since it has already broken the connection with the body. What matters are the deeds and experiences that the Spirit has accumulated during life.

35:21 Why didn't the Selbet people like us?

Irina: Some representatives of Selbet did not like the fact that the earthlings had the smallest percentage of their genetic material. They expected more. In their opinion, the Tumesouts and Burkhads, by creating hybrids, thus violated their rights. They observed that planet Earth has enormous resources. Their task was to spread others like themselves throughout the Galaxy. The Selbet people initially organized the situation with eating an apple from a tree, which you heard about. Then, many hundreds of thousands of years later, they started a war. For them it was a question of restoring justice.

36:55 Tell us about what Qigong is?

Irina (answers Mead and LiShioni): Qigong is a joint creativity of several civilizations. Earthlings also took part in this. They studied their Higher Self, energy flows. Some qigong teachers came into contact with the curators of humanoid civilizations and many plasmoid civilizations. As you remember, contacts with representatives of plasmoid civilizations occur much more often.

38:17 Where is the Spirit of Seraphim of Sarov now?

Irina (transmitted by Archangel Raphael): The Spirit, whom we know as Archangel Michael, incarnated in Seraphim of Sarov. He also incarnated in such people as the prophet Elijah, John the Baptist.

39:40 Is Putin the same Putin at the moment?

Irina: We don't see any changes in this person's energy.

40:25 Is colonization of Mars possible?

Irina (reported by Raom Tiyan): We believe that it is impossible for a person to go to Mars and return back at the moment. To colonize Mars, it is necessary to initially create terraforming, plant spores of single-celled organisms, achieve the formation of the required level of oxygen, and then plant plants there. Carrying oxygen tanks, food and water to Mars, at least forty million kilometers away, is impractical, and we do not advise you to go this route.

41:46 How can you go to the Astral?

Irina: You need to realize that every time you fall asleep, the astral body separates from the physical. Maintaining awareness at this moment is the main rule. This skill is acquired by practice and training not to lose consciousness when falling asleep. Every person is capable of learning this. There are many practices that help you learn this.

Maxim: Soon, we will open a Center for Spiritual Development, where everyone will have the opportunity to learn this practice.

44:16 Tell us, who speaks through Tarot cards and Lenormand cards?

Irina: Through Runes, Tarot, Lenormand cards and other fortune-telling tools, arranged in any order, any entity can speak to you. This entity may be near you or you can summon it. It could also be your Higher Self. The placement of cards in the same order can be interpreted differently by different fortune tellers. For Mead, for example, fortune telling by cards is a psychological process that reflects the psychological state of the fortuneteller. Thoughts that appear during the process of fortune telling can also be sent by representatives of other civilizations or by one's own Guardian Angel.

46:30 Tell us about the Spirits who live near the Sun?

Irina: Near every star, including near the Sun, there are Spirits in subtle bodies. There are 17 plasmoid civilizations located near the Sun at various density levels. Their body consists of subtle matter, of energy fields. Therefore, it cannot be damaged by the heat of the Sun. These Spirits receive energy from the Sun, and this is their nutrition. The spirits of the Sun are actively in contact with earthlings and transmit their information to them. They perceive the material world differently, and in connection with this, some contactees receive information from them that is not entirely correct in relation to earthlings. For example, they recommend eating solar energy because this way of eating is acceptable to them.

48:36 What is Holy Fire?

Irina (Archangel Raphael answers): On the night when people receive the Holy Fire, the following happens: the energy of the Christian Egregor materializes into what you call fire. Initially, this energy materializes in space. Therefore, only after materializing, this fire has a temperature that does not burn the human body. But over time, acquiring materiality, the fire begins to burn. Also, I would like to add that not only representatives of the Christian Egregor, but also plasmoids of the element of fire take part in this action. This is a good example of the interaction of plasmoid creatures with a religious egregor.

52:00 Why do people live on Earth for a short number of years, and what does the concept of the Great Harvest mean?

Irina: Friends, please indicate the source of origin of the term “Great Harvest”, since its meaning depends on this.

Earthlings do not live long because after the war your bodies were not adapted for long-term existence on your planet. At that moment, global natural changes occurred. Life expectancy depends on many factors: from electromagnetic radiation from the Sun, among other things. The period of incarnation on a particular planet is not as important as the experience that you gain during this period of time. Mentors of the Spiritual World believe that several decades of experience will be enough for your development. Let me remind you that the lifespan is known to the Spirit even before incarnation.

54:17 Tell us about Mount Kailash (Kailash).

Irina: In the area of this mountain there is a joint base of aliens, which belongs to three civilizations: the planet Loara (part of the MC, located in the constellation Taurus), the planet Burkhad and the planet Shimor.

Maxim: Irina gives all the names of the planets in the Daraal language. We have several contactees, but they can give the same information in different languages. There is no directory of contactees on Earth where all the names would be indicated in a single language.

Above this mountain rise 12 portals to plasmoid worlds, of different density levels and from different galaxies. They are located above the top of the mountain. This is an energetically very strong place.

56:17 Kashpirovsky, Chumak were contactees?

Irina: Perhaps he is in contact with 5 or 6 plasmoid civilizations, on a conscious level. His colleague Chumak is in contact with representatives of the planet Esler and the planet Tiss (humanoid civilizations).

57:36 Is the Earth actually making the transition to fourth density?

Irina: The earth consists of dense substances. Dense substances remain the same substances. The consciousness of most earthlings is becoming closer to the Spiritual world. This information was transmitted by plasmoid civilizations. In their language this fact means the transition to fourth density. In the language of beings from the Spiritual World, this means that earthlings are now on the path of raising their spiritual vibrations. Thanks to religion and contactees, many people perceive information from the Spiritual world, and many also remember their experience of being in the period between incarnations or being in the light. Thus, the level of awareness and the desire to develop in one's Spirit increases. This is called a transition to another density in the language of plasmoid civilizations.

59:56 Why was Christianity imposed on the Russian people? Why was the Inquisition created?

Irina (Archangel Raphael answers): During the period of time when the Inquisition existed, there were many wars, many low-frequency Spirits incarnated on Earth. There was a lot of cruelty, human life was not valued. Wars, hunger, poverty, and diseases attracted more low-frequency demonic Spirits to incarnate. The Inquisition existed for the same reason that other wars happened. Such was the era. People who were in church power at that time fought against dissent in this way. In this case, the responsibility does not apply to Christianity. For the sake of a wrong understanding of the love of God, people treat other people incorrectly, humiliating them and causing them harm.

The Christian faith was introduced by force at the end of the tenth century for the same reason - the birth of low-frequency Spirits. The earth was going through its period of history.

When Prince Vladimir came to power, Christianity was introduced everywhere. Prince Vladimir and his ancestors also fought wars for other reasons. Baptism took place by force by order of Vladimir. If a person refused, he became a rebel and was considered dangerous to the authorities. For this reason, there was a suppression of riots - what you perceive as violence against faith.

01:06:18 Has Christ risen?

Irina: Christ really was killed, his life thread was severed. When leaving the body into the astral plane, the connection with the body is preserved in the form of a thread. His connection was cut off, as if he were dying. They buried him, buried him with a stone, and set up a guard. A cave was allocated for burial. The Pharisees and high priests told Pontius Pilate to place soldiers near the grave so that Christ's disciples would not steal his body. Christ predicted everything that happened before his death. Then, after the burial of Christ, a ship arrived from the planet Burkhad. A special beam was sent, which temporarily put the warriors to sleep and also reduced gravity. This allowed the Burkhadians to go inside and take Christ away. They took him to their base and began the process of restoring his body. The Spirit of Christ was nearby. When the body was restored, the Spirit was again connected to the body through a thread. Thus, all previous DNA information was erased and new information was created. Therefore, indeed, Jesus rose from the dead.

01:12:12 What would Archangel Raphael want to say to our listeners and the CASSIOPEIA team group?

Irina (Archangel Raphael answers): The questions you ask indicate that people take their spiritual development seriously. I would like to personally wish all people - the main thing is to develop a feeling of Love, since this is the main feeling in life. Stay in the love of the Creator, our heavenly Father, and never leave it.

Participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan - head of the International Center for Spiritual Development "Cassiopeia";

MidgasKaus - representative of the planet Esler, biologist, psychologist and specialist in alien civilizations;

LiShioni is a representative of the planet Shimor, a specialist in the astral world and its interaction with the material world;

Raom Tiyan - representative of the planet Burhad, a specialist in energy interactions in the material world;

Archangel Raphael.

Video in text

January 9, 2023

#75 Live broadcast with contactee Irina Podzorova. Quantum transition, Dyatlov Pass, pyramids, 5G

https://blog.cassiopeia.center/kvantovyj-perekhod-pereval-dyatlova-piramidy-5g

https://www.youtube.com/watch?v=qfjoW2RKnM8

3:47

Presenter: Is it possible to wear a cross with a crucifix?

Irina: Yes, you can, if you believe in it, it will bring you the protection of the egregor.

04:08

Presenter: Does the Hamilia civilization exist?

Irina: There is, this is a group of civilizations of a subtle material plane.

04:55

Presenter: Levashov's wife, Svetlana, was a contactee?

Irina: Yes.

06:13

Presenter: Tell us about the religion Islam.

Irina: Islam is a religion created by a civilization from the planet Tumesout. Basically, the purpose of its creation is to unite disparate Arab tribes into one strong national, religious egregor, because they fought with each other there, and blood feud was developed.

06:51

Presenter: Does thought have energy?

Irina: Yes, thought undoubtedly has mental energy. Everything has energy, everything is made of energy.

10:40

Presenter: Tell us about Krishna's civilization and its goals.

Irina: LiShioni answers from the planet Shimor. Father, dad of Krishna (whose name, in your opinion, was Vishnu) is Vishnuite. He was an inhabitant of the planet Shimor and flew to Earth. The Himalayan mountains were his base and he had contactees, including Krishna's earthly mother and her husband. The husband agreed for his wife to become the carrier of a child from another planet. And the purpose of this contact, like that of other civilizations, is to convey to earthlings their experience of Shimora.

They basically conveyed at that time a story about their understanding of God, the Spirit. God and the spiritual path to him. And Krishna lived on Earth for a little more than 130 earthly years, did not die a natural death, he was killed by a hunter in the forest. He didn't kill him on purpose. Krishna sat, meditated, indulged in the meditation of merging with nature, did not see anything around him. It was after the war, which you know as the battle on the field, where Krishna made his greatest speech, which was later translated as the song of the Lord or in Sanskrit Bhagavad-gita. Bhagavad means shining being, he showed his shine there to Arjuna, his friend, and called it his original form. Yes, this is so, this is his original form, like each of us, the embodied Spirit, this is also our original form or Light.

After this battle, several more decades passed, during which Krishna traveled both on Earth and on other planets. He was taken on spaceships, he even took Arjuna and his other friends with him on an interplanetary, interstellar journey, then he returned to Earth, since he considered himself an inhabitant of it, in any case. And when he was 134 years old, Krishna sat in the forest, in dense bushes, meditated, merged with nature mentally. At that time, hunters shot animals with bows and arrows, which were coated with poison to make the hunt effective. A deer ran past. When the hunters were chasing the deer, he felt the calming energy of Krishna that he had from this meditation and ran towards him. The hunter shot after the deer, but did not notice that Krishna was sitting in the bush, and this arrow flew past the deer, killing Krishna's body. Naturally, his Spirit remained alive, like the Spirit of each of us. Currently, the Spirit of Krishna is not embodied, as MidgasKaus and LiShioni tell me, they managed to find out that the Spirit of Krishna is not embodied and is at the highest level of the spiritual world. From there he supports his religious egregor and the egregors of religious movements close to him.

16:05

Presenter: Who are Tarkh and Tara, and what is known about them in Burkhad?

Irina: Does Tara mean a goddess in Buddhism (Mead asks)? But in any case, Tarkh and Tara are the names of the goddess and god, a little more details are needed, because more than one people were called by such names. At least to which people they belonged, and the main characteristics. Because the gods and goddesses could be called as aliens, the same Burkhadians (Raom Tiyan answers), Tumesoutians, Shimorians, representatives of their colonies, who also arrived. There were many experiments in the period from the creation of man to the war 12 thousand years ago. We must remember that your people and aliens from other planets were in contact much more closely than they are now. There was no such secrecy in contacts as there is now, due to the peculiarities of your state policy regarding contactees.

17:31

Presenter: What should we do so that we are not all vaccinated and microchipped?

Irina: Raom Tiyan answers. Raom Tiyan appeals to all viewers of the Cassiopeia channel with a request not to worry, in any case, not to be afraid of any actions regarding vaccination and the like. Similar measures were previously taken in relation to many infections that your scientists considered dangerous to humanity.

Whether your authorities will do this at the present time, this can only be assumed; I only know that work on the vaccine has not yet been completed, and it is difficult to name the exact time frame for its production, given the immediate variability of the virus. The Interstellar Union specialists who are studying it have already developed several dozen varieties of this virus, which seem to have a mutation already in their genome, and this makes it very difficult to obtain a reliable vaccine.

MidgasKaus (biologist) says that in the context of this viral infection, it will be more effective not to vaccinate. If the first symptoms of the disease are detected in persons with reduced immunity, antibodies from those who have already recovered from the disease can be administered. In any case, this is an already developed immunity against these proteins. This is what they do, for example, in the case of tetanus and many other diseases.

As for vaccination, yes, in your conditions, your authorities may agree to this, because they are afraid of a worldwide epidemic in conditions of crowding, rapid movement of people around the world, as the virus spreads across borders. In light of recent events in the world, in America, in Italy, governments of all countries are looking at what is happening there and can begin vaccination. I encourage you not to be afraid. Well, of course, whether to take the vaccine or not is everyone's choice, but in any case, you shouldn't be afraid for your life, for your health because of this, because it will be no different from the vaccine that you are given according to desire, for example, from other viral infections. The same type of influenza virus that was present at the beginning of the twentieth century killed several million people. It was called the Spanish flu, although it actually came from China, originally (like this one), but now there is a vaccine for it, for the Spanish variety, and people no longer get infected as much. There were other bacterial infections - smallpox, plague.

I read it myself, and Mead told me that when there were medieval epidemics of the same smallpox, for example, on the territory of Russia, in a city where there were ten to fifteen thousand people, after a year five or six people remained alive.

Maxim: Raom Tiyan, people are not afraid of vaccines, people are afraid that chips will be introduced into vaccines and everyone will be chipped. People are afraid that they will now invent a vaccine, they will introduce chips into this vaccine, and they will microchip everyone under this brand.

Irina: Well, chipping may also begin under the guise of old vaccines. Raom Tiyan says, if you follow your logic, there would be no point in making a new vaccine at all and scaring people by introducing chips into it to arouse suspicion. It would be more logical to do this with old vaccines without telling people that they are being administered.

I don't think there will be forced vaccination. According to the law of many countries and the world community, the proportion of cases must be at least thirty percent of the population. Then only the epidemiological services of your planet introduce compulsory vaccination against this infection. But you haven't even reached half of this level.

For example, in Central Asia, when there was an outbreak of plague in the seventies, there were just about forty percent of those sick, and forced vaccination against the plague was introduced. Why forced, because the Kazakhs, residents of Central Asia lived in villages, they did not trust doctors, they ran away, hid, they were caught by the police and they were given this vaccine. This was when thirty-five percent reached some southern region, where Shymkent is now. Plague was brought from Pakistan and a mandatory vaccination regime was temporarily introduced. That is, they came directly with the police, gave the vaccine, if a person refused, it was given to him by force, and for resistance he could still pay a fine, etc.

25:54

Maxim: Were there large trees on Earth that were cut down and remained like stumps and petrified, becoming like mountains?

Irina: They show me that there were big trees, but not so big that they became mountains. Everything in them turned to coal. Even when you take a piece of coal, you can even see parts of the trunks.

Maxim: It's just that we have such mountains on Earth that look like big stumps, as if there were huge trees that were petrified. Did such a thing exist?

Irina: Right from a high mountain several kilometers away, no, there were no such trees.

26:53

Maxim: Recently, in the eighties or seventies, the Tisul princess was found, her coffin was in Uglya. What civilization was she from, and who was she anyway?

Irina: They've already asked about her, Mead requested information from the Interstellar Union regarding this period of time when they could have buried her. She was buried; she was a representative of earthly civilization. You can do DNA, she was a ruler and lived not millions of years ago, but about 850-900 thousand years ago. And due to the fact that after her death they used a special composition for embalming, the atoms, the tissues of her body acquired such an ability to lose isotopes, the analysis method, which is based on isotope measurements in these tissues, pushed back her age by an order of magnitude, thousands of times. It was all used because everything was saturated with a substance that shifted the age of this find by millions of years. And she lived naturally before the war 12 thousand years ago and even before the period when people began to move to Venus and Mars, as we have already told. That is, even before this period, when there were also cities on Earth, there were states in an earthly way. Only they did not fight with each other, then there were no wars like ours,

because people still followed the path of development without wars. And she was the ruler of one of these kingdoms, states, and she was buried.

30:06

Presenter: Irina, please tell me what energies the city of St. Petersburg carries. There is a hypothesis that it was erected by a more advanced civilization. Is it true?

Irina: Him or someone else in his place?

Presenter: It is this city that now stands, because the technologies that exist now do not allow the construction of a cathedral like Kazan.

Irina: It is the Petersburg that exists, it was built by your civilization. This can be easily verified by looking at the history of its creation and analyzing the more ancient layers of the city. In fact, it was built on swamps, and it took a very long time to build. At first there were wooden buildings, then when they began to drain the swamps, cut down the trees, they covered them with soil. Many died in these swamps while they were building, because there were people who drowned in them, and there were many builders there. They were even imported from the southern regions of Russia; there were, for example, representatives of the Caucasian republics, Cossacks, etc. And even in these swamps, since there were many people there, construction workers, there were patients with malaria, there were outbreaks of malaria, because the malaria mosquito multiplied, which claimed many lives. Well, the history of St. Petersburg is known. They say Moscow is ancient. When Moscow was already there, there was still a spruce forest on the site of St. Petersburg. The century of Moscow's foundation is approximately the 12th century.

32:42

Maxim: They ask you to tell us about the Khamilia civilization, what kind of civilization is this?

Irina: The Khamilia civilization is a group of plasmoid-type civilizations, from the 9th to the 16th density level. Mead says that they are changing there, that is, new civilizations can enter there. At the last known time, it included 128 plasmoid-type civilizations from different star systems of our, and not only our, galaxy. This is a global network of plasmoid worlds, the purpose of which, in contact with earthlings, is to convey to people, earthlings, the vision of the world of their civilizations, one might say an educational goal, to tell people about changing vibrations in such a way that the Spirits of these people can then be embodied in their dimension. Why do they think so? They consider this a much more advanced stage of development than the three-dimensional world of third density where we live.

34:14

Maxim: Who killed the tourists at the Dyatlov Pass?

Irina: The fact is that Mead and I visited the Akashic Chronicles several months ago, that is, this is the place where past events are recorded, like in a book, but they are only recorded in space, not by electromagnetic pulses, but by special radiations of people who they lived there and in general were exposed to radiation from the entire planet. So, we were with him in the astral body, they did not see or hear us, we were among them. It was a complete impression of being among these people, and everything that we saw there, I could call an accident, but of course there is nothing accidental.

This is not a man-made origin of the tragedy, it was not the plasmoids that frightened them, this is not murder, none of the people killed them, they were not killed by aliens from outer space, special services, etc. There was no one else for many kilometers other than them. There was simply no need to do this.

Mead is surprised, because cases like the Dyatlov group were known before; many tourists go without equipment and die. After this incident, people froze in the warm Caucasus in the winter, when they could not get to help. Moreover, they went, as they now show me, without any means of communication at all, they did not take any walkie-talkie. And when they had a catastrophe, they were sleeping at night, they set up their tent on the mountainside in such a way that from a strong wind it slid down a little, because a strong wind was blowing, and snow was falling on top, and also under the force of gravity, it slid down , moved, the supports on which the tent was placed inside were broken. It was not a full-fledged avalanche, one might say that a little snow fell, but people who slept closer to the top were overwhelmed. The damage that was found on the bodies was characteristic of strong compression from the outside, that is, there was no external damage, but there was pressure inside. That's why people ran out of the tents. The snow continued to shift as they ran out of there while they pulled out those who couldn't get up. Someone had a traumatic brain injury, things fell from the walls. For example, I had a backpack, it fell and damaged something. Then they jumped out into the snow, into the cold. They had a flashlight, and when they shined the light, the people saw that they were all about to be buried, and they thought it was an avalanche because it was snowing. If they don’t run down now in what they are left with, then they will all be thrown off and mixed with the snow. Then everyone will die. And so they ran down the slippery mountain. Naturally they rolled down, fell on the rocks, it’s all natural. But when they ran downstairs, and by some miracle one of them had matches, they lit a fire, and they showed me a cedar tree there. We cleared the place under this tree as best we could, and waited, whether the avalanche would go or not, and lit a fire. The avalanche did not go, we decided to return for warm clothes and shoes, because many ran out without them.

Why didn’t they come, even those who went towards the tent? Because going into the wind, even to the top of the mountain, without clothes is very difficult. They were already very tired, the wind was blowing all the warmth out of them. Walking against the wind up to the top of the mountain without shoes and in light clothing, while keeping warm, was much more difficult than running down. Therefore, people sat down to rest (those who went to buy clothes) and fell asleep from weakness, cold, psychological and physical fatigue. And they didn’t wake up anymore. And those who stayed there, under the cedar, decided that when the snow stopped, they would reach the tent, pull out everything and go home. But that did not happen.

Maxim: Why were their legs burned, they ask?

Irina: Not everyone, only those who were at the fire and kept the fire going. Because when they ran out of something to keep the fire going in this wind, they began to plant each other on the cedar tree in order to break the branches higher, everything was broken off from below, and when the fire was burning, one, whose leg was badly burned, stumbled and fell from This

cedar was touched by the fire. Why their hands were burned, because when they were left alone, they began to fall asleep, a cold wind was blowing at their backs, and in order not to fall asleep, they bit their fingers, put their hands into the fire, but it did not help them. They still couldn't keep the fire going until the morning and froze.

42:19

Maxim: What is a quantum transition? And does he exist at all?

Irina: Yes, he is, he is coming. In fact, it is now accelerating, because many civilizations, both subtle and dense, have joined in that activity in order to change the vibrations of the Earth and the Solar system as a whole to increase the vibrations of the Earth's noosphere. What is a quantum transition? In order to understand this, you need to understand what quanta are. Quanta are the smallest portions of energy according to your physics, which form all the substances around you, including the dense materials in which you are located. Each quantum is located only in its own specific vibration of energy, characteristic of the dense material world of the third dimension, third density. Quantum transition is when quanta, without losing their material nature, without losing their ability to form dense substances, increase their vibrations. What does this lead to? This leads to the fact that the whole world, the whole Earth, in this case your planet, its atmosphere, biosphere, hydrosphere, all the shells of the Earth begin (all the substances of which they are composed) to increase their vibrations. This leads to the fact that those people who have low vibrations in their souls (feelings, emotions, thoughts) do not resonate with the basic vibrations of the planet. And this gives rise to various spiritual, psychological, and physical problems in them, because their body also changes, moves to a new level of vibration, and if the Spirit does not have time to resonate with it, then the body begins to hurt. The quantum transition cannot be fast; in any case, after each quantum mini-jump, time must be given for adaptation. This is roughly what happens to you now, every 90 - 96 days there is a change in the quantum level of vibrations, and then about 70 - 78 or 60 - 65 days, adaptation to the new level occurs.

45:36

Presenter: LiShioni, please tell us about religion in Shimora.

Irina: LiSioni answers. We do not have one religious system, but several. Only they do not quarrel with each other, do not argue, do not come into conflict with each other on basic truths, and cooperate mutually. And their ministers also cooperate in order to move together towards a common truth.

The main religious trend on Shimora is the understanding that everything that surrounds a person's consciousness is himself in the form of God. This is something like Indian Advaita, only there is not Advaita in the form that God plays with himself, but that this is the property of God - to look at himself as at the world. This is approximately the understanding of God.

To achieve spiritual perfection through this religion, the Shimorian performs special, I would call them rituals, only they have nothing to do with rituals, like physical actions. These are rather spiritual actions, reflections, meditations on the topic: "How do I recognize myself in another, how do I recognize myself in the natural phenomenon that I see, and how do I

recognize the star itself, the animal, the Sun, how do I recognize these parts in myself?” .

48:29

Maxim: Tell us about the Kryon civilization.

Irina: At first glance, it is similar in its group mind and plasmoid origin to the Hamilia civilization, but there is a fundamental difference. Firstly, it includes plasmoids of the terrestrial type and the Solar system, and mainly from the Sun itself. Let me remind you that there are 17 plasmoid civilizations near the Sun, 12 of them are already part of the Kryon system. Most of the civilizations of our Spirits of Air, Earth, what we call gnomes, sylphs, Spirits of the Sun, individual places of nature, the Spirit of the mountain, for example, the Spirit of the city, what we call the Manu of the city. This is all part of the Kryon system. This is a union of plasmoid-type civilizations from the 8th to now the 18th level inclusive, and it already includes more than 150 civilizations, and more are being added. Each new civilization can be accepted into the Kryon civilization if they have common goals.

The goal of the Kryon civilization is not the same as that of Hamilia: to convey its teachings so that we can be embodied in those civilizations. The goal of the Kryon civilization is different: to support our magnetosphere with its energy so that we can comfortably exist in this third density. That is, so that everyone’s magnetosphere (and we, each person, also have our own magnetic field, like an electric one), so that we can be organically integrated into this magnetic sphere of the Earth. And now Kryon is actively participating in that very quantum transition that everyone is talking about, by redirecting the energy of solar civilizations through the Earth’s magnetosphere, through the Earth’s core, where their own plasmoid-type Earth civilizations also live (the 16th density level is present). Kryon is more actively involved in the quantum transition of the Earth than Hamilia.

51:27

Maxim: Why doesn’t the Bible say anything about the war 12 thousand years ago?

Irina: It says about a war 12 thousand years ago, but it doesn’t give a date. The books that make up the Old Testament are a mixture of stories told to these contactees by their curators and their own reflections, their own attitude to this contact, and to the world in general, of course.

Moses, as the contactee who was told most about the past of the Earth, was also told about the war. But he was told in a mythological form, because at that time people were at that stage of development that they would not understand how the Gods could fight among themselves. It was a mythological picture of the world. People didn’t know the word “alien”, didn’t know the word “rocket”, etc. Therefore, for them, even the Selbet people who wanted to destroy earthlings were like Gods. In Hebrew Elohim.

As MidgasKaus and Mirakh Count have already said, the Selbetians were also the creators of our earthly bodies, our race, and they were among the gods, and only then they made the

image that it was a serpent, a dragon, as if they brought it out of the Elohim. The concept of the Great Flood remains in the scriptures, this symbol denotes a war 12 thousand years ago, and in the Bible there are even traces of the fact that God did this... Since monotheism was formed there, it so happened that when it was told to Moses, there was only one God as if he simultaneously sent a flood on people and at the same time saved them. And this was done by different civilizations.

53:55

Maxim: When an alien dies, can relatives communicate with his Spirit, and how do relatives and friends endure this loss?

Irina: MidgasCaus answers from the planet Esler. We communicate if the one who has left us for the Spiritual World is not busy with his own affairs at that time. That is, we know that he is alive, that he is developing further. We have no such concept as to regret him, or we feel sorry that he left. This is not the case, only because we explain to every child in every family and school that you are the incarnate Spirit, and your body will die when you fulfill your goals here, and all the time they set up this child to fulfill his He lived his life on Esler not in vain, but with benefit for his development. Because he is taught that you can be called to the Spiritual World at any moment, and what you come there with depends only on you. Therefore, our attitude towards death is quite adequate in the sense that we consider it a continuation of life, and life - a continuation of death. There are actually two types of death: physical and spiritual. When physical death occurs, the Soul and body are separated, the Soul then separates from its life force and becomes the Spirit. But spiritual death can also occur during the life of the physical body, when it is still walking. But this does not mean the death of the Soul as the cessation of its existence, it continues to exist, it is eternal. The Death of the Soul is understood in the sense of separation, rejection, closure from the source of life, which is Light and God.

56:49

Maxim: Who built pyramids in different parts of the Earth and why? Do medical pyramids with golden ratio proportions have a healing effect?

Irina: MidgasCaus answers. Pyramids in various parts of the Earth were built by both aliens and earthlings, imitating the aliens. You can, of course, distinguish between technologies, although those pyramids that earthlings built were built using their own strength, with the help of animals, sometimes attracting blocks from many kilometers away, simply harnessing a large number of bulls, for example. You need to look at a specific pyramid and discern who did it. There are even known cases when in Egypt blocks were cut out of sandstone with special bronze tools, they were harder than copper, and transported upstream along the Nile on huge wooden boats, which were driven by slaves. Many people died from this hard work. In your understanding, there was a lot of turnover, only these workers were not hired, but slaves were taken, including captured in other cities, went to war against other states, bought at slave markets, and brought slaves with caravans. In place of these sandstones there are canyons, there are traces where they were dragged with ropes on bulls.

And some of the pyramids were built by alien civilizations to harmonize space. This was mainly done by representatives of Tumesout and her colony. They believe that for the anthropomorphic race, a room with such shapes as a triangle with an upward angle, and a

triangular or square base, helps to attract energy, which you call ether, torsion fields, prana. This used to be called the vital force of space. This is the same energy that comes from the spiritual world to maintain the material world, and some forms of rooms, objects, can collect this energy and direct it more or less to one or another area.

This explanation also applies to those healing pyramids with these proportions that you are asking about. Do they have medicinal properties? Here again everything depends on the question of how much you are ready to believe in their action. Faith, trust, thoughts about it enhance the impact of this vital energy that you strengthen in yourself. Yes, they work, but if a person does not believe in it, rejects it, then he will block this action of vital energy.

1:01:19

Maxim: Irina, what kind of flying objects are now flying over the entire Earth in groups of 100?

Irina: 60 pieces so far. Raom Tiyan answers.

The fact is that at the end of May one of your private owners, a very rich man, purchased satellites from factories. And this is a series of satellites that were launched in order to then create various types of communications for you. That's why you see this chain of satellites. To understand this, you need to look at them not just with your eyes or through a camera lens. And use at least the lens of eight-power binoculars, then you will see what they are, how they fly and move. You have these tracking devices. These are Elon Musk's satellites. On the Internet, you can use an application and track their path across the sky. Get out when they fly over your city and remove this chain. They are now flying at an altitude of 450-500 km, each with its own engine. But there will be more of them, much more, only the first batch has been launched in order to create for us a cosmic network of the global Internet so that it can catch in all places equally. In any case, these are your earthly satellites.

1:03:37

Maxim: Who wrote the Urantia Book?

Irina: A group of contactees wrote the Urantia Book, MidgasCaus and LiSioni know them.

Some of them live in Portugal, England, America, and several in Russia. An association of 15 people, corresponding with each other, wrote this book, and then published it. But not the entire book has been released to the publishing house; some manuscripts still remain. Without the consent of these contactees, no one has the right to disclose their names; the book was written secretly. These are contactees with different civilizations and with plasmoids, humanoids, and the Spiritual World.

1:04:47

Maxim: Irina, how do you communicate with representatives of alien civilizations, races, do you completely trust them, are you not misled by them?

Irina: I believe that I am not misled, because their words that they tell me completely do not cause any distrust or rejection in me. I don't see any violation of logic or spirituality in their words. My beliefs are consistent with theirs, and therefore I see no reason not to trust them in anything. And even more so in the questions you ask. I don't know what exactly they are talking about, but if you have read or watched something else on the same topic that does not correspond to what they are telling me, then it could be for various reasons. Someone doesn't have to deliberately lie. It's just possible that some other person has a different opinion on this matter or looks at the same issue from a different angle. It's like in religions, for example, you can say that there is one God, but you can say that there are many Gods. Both will be true, because God is one Creator, but there are many Gods, his children are us, and we are also Gods. Therefore, neither one nor the other is a lie. And when monotheists begin to accuse polytheists of lying, of heresy, as they say, or vice versa, it looks somewhat strange from the outside, to put it mildly.

How do I communicate with them? I can now hear them through the devices, the chips that they gave me, Kirchiton gave me one chip, and two chips were installed on Esler, they allow my brain waves to be tuned to their vibrations, without these chips I would not be able to contact them, it was done that way on purpose.

1:07:19

Maxim: What happened to Kirchiton?

Irina: Everything is fine with him, there were minor health difficulties, but he asked in the general chat and video not to talk about this in detail, because this could interfere with some of the actions of the Galactic Security Service, which is conducting checks on some circumstances of his life.

1:08:04

Maxim: Is 5G harmful to a person, his health, immunity?

Irina: No, it won't hurt if you believe that it doesn't harm you. Here, and as in the case of other radiations, with radio waves that exist, with the radiation of mobile phones, everything that you ask about chips, 5G, about new technologies, and are afraid of them, is a manifestation of your earthly instinct of self-preservation, very characteristic of your type consciousness, which is called fear of new life circumstances, new technologies. These questions creep into your own medical, biological technologies that have not yet been introduced.

That is, you have such a feature of the earthly psyche - to be afraid of something new, even if it is objectively better than what you are leaving behind. Because you are already accustomed to the old, and the new is unknown. 70% of earthlings are afraid of the unknown due to a heightened instinct of self-preservation. The reason for this, we believe, is the wrong paradigm

of your society, that you are raising your children, again, in a materialistic perception of this world.

1:10:00

Maxim: Who destroyed the American squadron in Antarctica?

Irina: We have no evidence of aliens colliding with warships to such an extent that they destroyed the fleet. There were isolated collisions, but it was not in the Antarctic region, and, in any case, it was with airplanes. Our spaceships, saucers, disks, triangles can safely fly away from surface and underwater ships without engaging in battle with them. The Interstellar Union has not received any information that any alien civilization could do this to surface ships.

1:11:15

Maxim: Why do some contactees see Kirchiton as a reptilian?

Irina: Because initially they occurred on the planet Shiitlo, in the constellation Sagittarius, where they had a catastrophe. Five thousand six hundred earthly years ago they moved to Daraal, where the conditions of existence were less suitable for them than the conditions of life and development on their home planet. That's why they made changes to the DNA. They themselves evolved to Shiitlo from animals that are somewhat reminiscent of our bears. The genes of lizards were introduced, but not of the Selbetians and other reptilians. Therefore, 28% of their genes are reptilians.

1:12:42

Maxim: Negative human Rh factor.

Irina: In the beginning, the blood of all people contained this special protein. Several thousand years ago, a mutation appeared in the gene that codes for proteins in your blood. And the organism that appeared as a result of this mutation no longer contained this protein in its blood, and therefore it had a negative Rh factor of blood. Then it began to be passed on to others through generations and spread throughout the globe. If you're wondering if people who are Rh negative are different in spirituality, etc. from those who have a positive Rh factor, then no. This is a property of the body, the same as hair color, eye shape. The spirit is no different.

1:14:28

Maxim: Who really was Shiva?

Irina: An intelligent Spirit who had many incarnations. He incarnated on different planets, was

known on Earth, incarnated as priests, and many times as plasmoids. Shiva also calls himself Living, that is, the plasmoid that gives birth to animals. He was known in Slavic countries, Greece, and India. He was one of the Slavic Magi, one of the ancient Greek philosophers.

1:15:43

Maxim: Who shot down the Chelyabinsk meteorite?

Irina: The extraterrestrial civilizations whose ship was in orbit belonged to one of the colonies of Burkhad - the Pleiades (it was not Futis). The Tashigans and Pleiades, a joint crew, were present on the ship. They were higher above him, directing the beam to change the flight path as the meteorite flew towards the city, and therefore it fell in a different place.

Participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan - head of the International Center for Spiritual Development "Cassiopeia";

MidgasKaus - representative of the planet Esler, biologist, psychologist and specialist in alien civilizations;

LiShioni is a representative of the planet Shimor, a specialist in the astral world and its interaction with the material world;

Raom Tiyan - representative of the planet Burhad, a specialist in energy interactions in the material world;

Video in text

January 10, 2023

#76 Live broadcast with contactee Irina Podzorova.

Pineal gland, Higher Self, Ayahuasca, levitation

https://www.youtube.com/watch?v=awJN4e_sT7s

06:10 Where do the souls of animals go?

Irina: There are several types of animal souls. The fact is that in MS science, living beings are not so sharply divided into plants, animals, and so on. In any case, even in your science it is recognized that plants are the same living beings, and they also have souls, microorganisms have souls. All types of animals also have souls, and so do insects. But all these groups of living beings have different groups of souls, they are group and single. Group souls occur in plants and microorganisms, insects, some birds and fish. Mammals, reptiles, and large fish have solitary animal souls. All groups of animals are created by representatives of plasmoid civilizations, which are created specifically for this. From their thoughts they emit a certain type of energy, which combines and then incarnates into various types of animal bodies. If it is a group soul, after the death of one of the solitary animals, it enters the region of the astral world where the animal souls are located. And this happens until all the bodies of this group soul die and it gathers again. Then they can reincarnate. Incarnate in the next group of animals. Moreover, this may not happen immediately, but gradually. That is, some part of the group soul has already incarnated, and some has not. After several incarnations, sometimes after several dozen incarnations, it depends on the specific animal soul and the type of body; after the death of the next group of bodies, this soul disintegrates. What do you mean, disintegrates? Her consciousness gradually falls asleep, all these energies dissolve in the astral plane and enter the plasmoid world from which they came. They become the basis for the creation of future similar group souls. Almost the same thing happens to a single animal soul, with the only difference being that it is incarnated into one animal, not necessarily of the same species, but of similar species. For example, the soul of a cat may well incarnate into a dog. She can no longer incarnate into a herbivore, for example, into a cow. Mead says that they conducted research on Earth, which animals incarnate into which souls, this happens approximately within the same family of animals. After several dozen incarnations, the animal soul, after another loss of its body, loses its energy, its self-awareness gradually falls asleep, and it also dissolves in the astral world and goes into sleep. Its energies also go to the plasmoid levels from which they were created. Animals are even created the same at different plasmoid levels. Various plasmoid civilizations participate there.

11:24 Who is Ashtar Sheran?

Irina: Ashtar Sheran is an embodied spirit. He is now embodied. It is already more than 12,000 years old. He is the leader of a fleet that is in space on large ships. He participated in the defense of our planet and the solar system in general from reptilians in a war 12,000 years ago. But unfortunately, his home planet, which was located near Sirius B, died as a result of this war, because the Selbetians attacked not only the Solar system, but also their system, which was next to the Solar one. And in this case, they moved to ships, they live on ships, they

have already had a whole generation there. More than 25,000, as far as I remember, already human. They live on huge round ships several tens of kilometers in diameter, which resemble entire planets.

12:33 Who brought Reiki energy to Earth?

Irina: Reiki is a flow of energy. It is heterogeneous in its composition. That is, there are different types of slats, there are many of them now, more than 10 types. Each type of reiki is a flow of energy of a special type. They brought plasmoid civilizations. 11 plasmoid civilizations directly participated in the creation of this energy potential, which is aimed at restoring dense material bodies of the humanoid-earth type. But if they were created by 11 plasmoid civilizations, this does not mean that other plasmoid civilizations cannot participate, they are just the creators. They are from different planets, systems, but they are all in our galaxy.

13:40 When will the meeting between earthlings and aliens take place?

Irina: Do you mean mass contact? Mass contact with earthlings will occur only with the direct permission of the leadership of the MS, but who will give it, if it is a voluntary mass contact, not earlier than our civilization fulfills all the conditions for being in the MS. Because after mass contact for five to six years, joining the MS should follow. In order for there to be annexation, and for this mass contact to take place, we need to fulfill the conditions - stop all wars on earth, remove the laws on the death penalty, for example, clean up nature and many other conditions.

14:41 How did the Sahara Desert appear?

Irina: He says as a result of the war, because this territory was right around the base, which is now at the bottom of the Mediterranean Sea closer to the shores of Turkey, which was called Eden. The war that took place 12,000 years ago. There, under this desert, there was an area of a large garden, a large Eden. Not the whole area, at that time it was like the tropics now. As a result of the war and the splitting of the earth's crust, this sand was deposited, it burst out of the ground and covered everything. The result of the explosion of war. Therefore, nothing grows there now, and the water lies very deep.

15:43 Why do many sleepers see the participation of aliens in the Dyatlov Pass Incident?

Irina: The fact is that sleepers, if we watch 5 or 6 sessions of different sleepers who are unfamiliar with each other, then we will get completely different scenarios of what happened at the Dyatlov Pass. But this does not mean that any of them deceive your consciousness. Because, entering a state of mental travel, the sleeper sees their death in any case, but he sees through the prism of his ideas. I also went there in the astral plane, I was not present there, because I don't have a time machine, on astral travel through the Akashic chronicles. Then the question will naturally arise, how to distinguish my story from the stories of other sleepers; this is a completely fair question. I can only tell you that you need to look at the facts - to what extent my or another specialist's story agrees with the facts. I mean now the investigation material. These facts are all known, they have been made public. There are materials from the criminal case, all the autopsy reports, and so on, they are all publicly

available, everyone can read them and draw their own conclusions. I will just now draw your attention to one fact. It is known that the bodies of the last 4 tourists were found only in May at the bottom of a deep ravine, covered with snow at a depth of about 3 meters. But there was no way they could dig this shelter for themselves without a shovel, because they were without a shovel, without anything, more than 3 meters is not a meter, it is a very great depth. But the sleepers and other researchers who adhere to the anomalous theory of this tragedy did not even question why they ended up at such a depth. This fact can be easily explained if we take into account that they were walking along the bank of this hollow above the stream, this ravine, they fell there, mistaking the snow peak for snow in the dark, they did not figure it out, and snow fell on them from above. This explains all the injuries and is consistent with the case file.

18:42 Is same-sex marriage the norm?

Irina: No, this is not the norm for one simple reason - there is an explanation for this phenomenon. Same-sex attraction can arise due to partially blocked memories of the opposite-sex body in the past in which the soul lived. But this lowers a person's vibration. It lowers the vibration of his spirit. Because if a person was born in a male or female body and does not take into account that if God and his mentors allowed him to be born in this body, then he must already live a different life - not the one he remembers, but must perform the tasks of this one life. But he doesn't want to come to terms with this, he fights with God, one might say, with his law, and therefore he lowers his vibrations. Secondly, by connecting with the body of the same sex precisely in sexual contact, he reduces the vibrations of his body, because they are disturbed by the fact that there is no normal exchange of energy between them. And this disrupts energy and psychological health, which also harms a person.

20:28 What is the Ayahuasca ceremony and who do shamans communicate with? What happens when you drink the drink?

Irina : They just showed me a circle of people who drink a decoction of herbs. Not only grass is included there, there are a lot of them, a whole set. There are special substances in this herb that can temporarily change the vibrations of the human brain and configure it to receive signals from plasmoid worlds that are nearby. In addition, they make it easier for them to enter the astral plane and leave the body. This happens among shamans, this is an auxiliary ritual for them so that they can communicate with plasmoids, luminous balls, they call them gods, helpers of gods, and so on. And they receive information and go to the astral plane themselves. But from the use of this herb the consciousness itself changes very strongly, it is very difficult to remember what happened, or the memories will be distorted, memory confabulations are very common, these are phenomena in which, under the influence of a substance, a memory occurs from one's childhood or from a film seen, and the person weaves into reality, it seems to mix everything up. And this distorts the information that exists.

Maxim: Who do shamans communicate with?

Irina: Most often with plasmoid civilizations. There are contacts with the spiritual world, but most often they are not tuned in to humanoid civilizations, because they have a different vibration frequency. Through their rituals they develop another ability.

23:03 Do aliens use artificial intelligence?

Irina: Yes, if you mean robots, then they use them. Automatic digital systems that themselves calculate, for example, the flight course of a ship. Humanoids themselves do not carry out such calculations; they leave it all to automatic systems. This is faster, better quality, and frees up the labor of humanoids.

23:39 What is the pineal gland for?

Irina: Do you mean the physical or energetic level? At the energetic level, the pineal gland is a reflection of the 6th energy center, which is responsible for intuition, for contact with this world, for one's own thinking, and so on. The pineal gland is still a physical organ. Its reflection on the physical plane occurs through the release of those hormones that regulate a person's intellectual activity, his mood, even when a person goes to the astral plane, when the body is asleep. Even the separation of the astral body itself is regulated by the release of hormones from the pineal gland. Not just one hormone, but a whole spectrum of hormones. And the very condition called sleep paralysis, when a person cannot move during sleep, so that he does not walk in his sleep, is also regulated by the normal ratio of hormones of the pineal gland and the hypothalamus. It matters that the connection between spirit and body goes through the pineal gland.

25:29 What is beyond space?

Irina: The spiritual world, if you look at the frequency of vibrations. Does the word cosmos mean the entire material world or only the dense material world? No, there is no dome over our Earth, there is only an atmospheric dome.

25:57 How will the name of our planet sound in Eslerian language?

Irina: Arramia.

26:26 For what purpose do we forget our purpose in this incarnation?

Irina: Our Higher Self always remembers him - that part that is not embodied. But it tells us through intuition, through promptings of conscience, and so on. Complete forgetting does not occur. A person, when he grows, develops, when he is a teenager, always feels what he wants to do, what he likes more, what he likes less, what he can do better. In human society, this is usually called a talent for a particular action. Everyone has talent. There are no untalented people, only each one is aimed at something different. But this is wonderful, we are all diverse people. Therefore, diversity is good, it shows the diversity of God's plans for us.

27:36 Please tell us about Chaitanya (revived Krishna consciousness).

Irina (LiShioni): His spirit was from a high level. He was born from a level called 24. And before that, he incarnated a lot on Burkhad. When he was still a child, the Burkhadians took him in, that is, he had physical contact with the Burkhadians, and they modernized his body, improved his contact with the spiritual world. And he began to feel like himself. They changed

the vibrations of his pineal gland. And from this he began to feel the spiritual world better. He came into contact with the Burkhadians, with plasmoid civilizations, with the spiritual world from which he incarnated. If an ordinary person has 2-3 Mentors, then he had 12 Mentors. He was a very high vibrational spirit. He is now incarnated on Shimora. That's why LiSioni knows about him. He is there now and is already an elderly Shimorian. We do not have rulers in your traditional sense of the word, but this is one of the elders of the planet who is involved in politics.

30:28 Was there a cataclysm 200 years ago and why were the cities buried?

Irina: No. There have been and still are minor cataclysms, cities are flooded, earthquakes, and so on. At that time there were more, there were epidemics that they did not know how to fight. Entire cities and even countries also died out, a little earlier than 200 years ago. 200 years ago there was no such cataclysm that the cities fell asleep. There are different explanations for the fact that the lower floors of houses are found buried. There used to be a room where food was stored, when there were no refrigerators, there were basements, because it was impossible to build very high houses, the foundations could not hold up, they were located below. If all the cities were filled up, then with the efforts of 200 years the remaining handful of people would not be able to rebuild these cities. And there would be skeletons, but there aren't.

31:57 Do other civilizations have money?

Irina: In the majority, yes. In one form or another, there is an exchange of material values. Not everywhere they are in natural form (paper, metal); there are many civilizations where they are in electronic form, for example. In any case, they receive compensation for their work and can support their families. We are now talking about dense material civilizations. Subtle material civilizations do not have any money; there the exchange of energies simply takes place in a different form.

32:38 Is 5G harmful to humans?

Irina: No, in the form in which the waves exist in space, they do not cause significant harm, like radiation. Even without 5G, we are already exposed to radio waves, and even the highest vibration ones, on which, for example, you watch TV. These are very high vibration waves, they are distributed by antennas all over the world, there are also dozens of channels. There is not one channel, but dozens of channels, they all permeate your body, even if you don't watch TV, they are still there in space, you just don't have a receiver to catch them. They pass through your body, and they are not as high-energy as radiation, for example, to disrupt the flow of energies in your atoms, as radiation does. This is your form when they are afraid of new technologies - a form of neophobia.

34:10 Can conserving sexual energy raise a person's vibration?

Irina: Maybe if he directs this sexual energy specifically to raising the vibration, and not to physical force, or if he does not, for example, release this same sexual energy by engaging in self-satisfaction. Even sexual contacts in the astral plane with plasmoids, although they spend much less energy than physical contact, it remains in the body, is spent in the astral plane, but,

however, some leakage still occurs. A person can get used to this and, in any case, no longer direct energy to raising his vibrations. But if he fulfills two conditions, special energy breathing practices and visualizes how the energy rises up and fills his head, for example, and occurs as a light around him, a flash. And, most importantly, spiritual practice. By spiritual practice we mean not just reading prayers, mantras or some rituals, but the practice of bringing spirituality into everyday life - helping people, mercy, compassion and the like.

36:01 Are dolphins a separate race or animals?

Irina: On Earth, intelligent spirits do not incarnate in them. There are races that live precisely under water, but this is on other planets. For example, on the planets of the Ursa Major stars. There is such a race. They are underwater, they don't go into space because they are an underwater race. But intelligent spirits are embodied in them. And in dolphins, despite the fact that they are quite organized animals, they embody a solitary soul.

36:39 Why are some people not hypnotizable?

Irina: Because they don't believe in this possibility. There could be several reasons. First, they do not believe that it is possible to hypnotize them at all, and they resist. When they are told words that are supposed to put them into hypnosis, they resist it. The second reason is fear of the unknown. They maintain so much self-control that it is difficult to break them out of it, even when they want to. Fear, lack of self-confidence, doubts, some blocks in the energy system that prevent energy from flowing freely. Those hypnotists who themselves perform hypnotic trances are treated with hypnosis; they themselves calmly enter into it. A person can hypnotize himself. You call it self-hypnosis, autogenic training. Back in the Soviet Union, you developed such things that a person would put himself into a trance with certain words and cause changes in his body, as is done during therapeutic hypnosis.

38:41 Who are spiritual guides?

Irina: These are spirits in the world of disembodied spirits who are at the 22nd level of spiritual development. In our terminology they are called consulting spirits. These are spirits to which every spirit comes when it wants to incarnate in the material world in any of the material worlds of any density. The spirit comes to them and says, I want an incarnation, and they look at which incarnation is most suitable for him to fulfill his tasks. And they advise the spirit on various types of incarnations. The spirit itself chooses where it will go. And if he does not want to go to any incarnation of those that were chosen for him, he is simply deprived of the incarnation, and he again waits in line.

39:29 What is the difference between spirit and soul?

Irina: Spirit is an immortal essence born by God, which is part of God, light. The soul is the same spirit, but it is already connected to the life force to connect with the body. Life force is what you call ether or prana.

40:23 Is it possible to heal diseases without drugs, with the help of energy practices

and some other structures?

Irina: Nothing is impossible in the world. Everything is decided by a person's faith and the degree of the changes that have occurred in the energetic and physical body. The cause of this disease plays a huge role. They are different, if it is a functional disorder, then it can actually be cured without the use of any medications. If this is an organic pathology, then all this is more complicated, of course. That is, you need to look at the cause of the disease and look at the person's willingness to believe in his healing, live as if he is already healed, not think about this disease, but direct his thoughts to the fact that his body is healthy and does not feel what it is feels. And this will form his healthy etheric body, which will then gradually form his physical body.

41:34 How to establish a connection with the Higher Self?

Irina: Mead says now I will give practice to everyone. First, to enter into communication with the Higher Self, you need to clearly understand what the Higher Self is and how it can respond. The Higher Self is the highest part of your essence, your spirit, which is not embodied. When you come into contact with him, you will talk to yourself - to your higher part, to your higher consciousness. It can respond mentally or with thoughts, words, images, or both - mental images. To get in touch with him, you must relax physically and psychologically, you must not rush anywhere, nothing should upset you. You should place yourself in a comfortable place for the physical body in any position that you like, which will help you temporarily forget about the body. And the first stage is called self-observation - closing your eyes, being in this place, you must clearly understand that you are comfortable, it's good that you are in no hurry to leave. If I set aside an hour for this and think when this hour will end, they are waiting for me, then I won't be able to get in touch. Because your thoughts will return to this anxiety of expectation, and this anxiety should not exist. Try to push aside all thoughts that do not relate to your spirit, to your life, to your Higher Self. The very first stage of observation is to close your eyes, if you are sitting, then slightly lower your head forward and, simply immersing yourself, mentally imagine that between you and the outside world there is a wall through which nothing can penetrate that can interfere with you. How protection is built for your peace of mind, that nothing will get you out of this state until you get out of it yourself. And when you feel that you feel good, calm and comfortable there, you begin to observe your thoughts. From the outside, without interfering in any way with their process, just observe what you are thinking about at this moment. When you feel that you are thinking about something, hold your attention at that moment and ask yourself why I am thinking about this particular thing. Then you will receive some kind of answer. Then ask the next question - who am I, where am I in the body. So say, I am, I exist, I am spirit. You must feel your spiritual nature. As soon as you feel it, start reading the mood - "I am the Universe" to increase vibrations and so that you can get in touch with your highest essence (the mood is in the VK group). You are raising the vibration of this consciousness that you are in. When you read this mood, you will feel special changes in your state. It may seem to you that the room has become larger, or that you yourself have expanded, light may appear. Not physical light, but spiritual light. You may feel any other sensations - goosebumps, etc. This is completely normal, it means you are on the right track and doing everything right. And then say - I want to talk to my Higher Self (better whisper out loud, because when you pronounce words with your tongue, it has an advantage than if mentally, because you involve the speech apparatus in it,this makes thoughts clearer). Already in this state: "Higher Self, are you ready to answer me?" And in order to successfully talk to him, you must catch the first thought that comes to you. You will already feel it clearly. It will not be a voice in your ears, it may be a very familiar feeling of an inner voice.

47:23 Who are Seklitova and Strelnikova?

Irina: Seklitova and Strelnikova are in contact with various types of plasmoids, they began to contact the Sirian civilization, but they are also in contact with the spiritual world.

43:47 Is the Earth flat?

Maxim: No, the Earth is round. The flat Earth is seen from the point of view of plasmoid civilizations.

48:00 How many galaxies are there in the Universe?

Irina: An infinite number. Even the MC knows several billion galaxies, because one galaxy is an MC, and each galaxy has contacts with other galaxies. And all this goes into a single database. And they continue to open new ones.

48:38 Is the day of death determined?

Irina: No. It is not strictly defined, it can be changed by the person himself (his behavior).

48:53 Who was Zarathustra?

Irina: Contactor with Tumesout, Burkhad. He also came into contact with plasmoids, he called them fiery creatures. He had a cult of fire because he believed that fire was a living being. Contacted fire plasmoids.

49:27 How often do flying saucers fail?

Irina: It happens. But if we exclude various damages and so on, then maybe once every few decades, as far as we can remember, this happens. And then, this is because we have microrobots that are in the ship's systems that monitor all its work. And they notice violations much earlier than a humanoid can see. And they can report the slightest violation when it is not yet out of order. If something happens to these robots themselves, there will be such a restructuring of this network of microrobots that it will not notify in time, then it is possible, yes.

50:39 Will a time machine be created on Earth?

Irina: The past no longer exists in the material world, and the future does not exist yet, because we are in a continuous flow of time. Time itself is the ability of the material world to change. You cannot return in a material body, this can only be done in the astral body - to look at the past or options for the future. And in a material physical body it is impossible to return by any machine to something that no longer exists. Or get to something we haven't created yet.

51:22 Who is Trump in contact with?

Maxim: With his wife and other presidents.

51:33 Is there heaven or hell?

Irina: Paradise is a conventional name in the Christian egregor of high vibrations, when a person feels the energy of God as bliss. And hell is a conventional name in the Christian egregor of low vibrations, in which the spirit feels the same energy of God as fire, as suffering.

52:06 Moles and birthmarks on the body reflect something?

Irina: It varies. Sometimes they reflect. It depends on the reason for their appearance. There is a genetic reason for their appearance, that is, a reflection of melanin on the body. It happens from energy factors, some energy blocks on one or another energy channel of the body, or what we call micro-energy centers, because the energy channels of the body intersect at certain angles, if there are any blockages there, then they can be reflected on the physical body accumulation of melanin. Well, spiritual reasons, for example, damage to the physical body in past lives, a mortal wound or something else, they can be so remembered by the spirit as some kind of pain or insult, he was killed in this, then even subconsciously the memory of this pain and insult carries into the next incarnation, he himself does not remember this, and such a body is formed with the deposition of melanin.

53: Why is self-satisfaction harmful?

Irina: Harmful to the body or to the spirit? For the body there is almost the same effect as from sexual intercourse, for example, with an unloved person. If you don't love a person, but you have sexual intercourse with him, then this is the same as self-satisfaction, the same consequences will be for the body, the same hormones will also be released. But for the spirit, this is not just a form of egoism, it is a form of sexual pleasure that is produced without marriage. In any case, a person does not do this out of love, but simply to gain satisfaction. This can reduce the vibrations of the spirit, it can develop egoism in it. For example, he thinks more about his pleasures. In this regard, it causes spiritual harm.

56:10 Is there a connection between Vedic, Slavic, Indian, Greek gods?

Irina: On the territory of India, Greece, Ancient Russia, Scandinavia, there were different peoples who came into contact with humanoids, plasmoids, the spiritual world, with these three levels of civilizations. They called them gods, children of gods, and they could call the same plasmoid entity by different names, as happened, for example, with the same Indra, who in India was known as Indra, and in Greece as Zeus the Thunderer. In any case, this is the same entity, living for a very long time; at that time it was embodied at the 28th density level of the plasmoid world. She was responsible for the atmospheric plasmoids that lived as Kryon is now. Kryon is only a part of atmospheric plasmoids that is responsible for the magnetic field. And there are also those that are responsible for electricity, for the manifestation of thunderstorms, various atmospheric fronts, cyclone, anticyclone, etc. And all these elements

are controlled by plasmoid civilizations that are in the atmosphere. They simultaneously live next to you. You may be in your room, for example, on the 10th floor, and in the same space, but at other frequencies their life may exist, you just don't see it. It is as if superimposed on your world. And these plasmoids, their leader Indra or Zeus, or Perun among the ancient Slavs.

58:08 Does levitation exist and can it be mastered?

Irina: Levitation is a temporary suppression of the Earth's gravity by human life force. You can master it, but only if you are able to direct your life force mentally downward through your legs, and thereby command the life force. Naturally, you will spend a lot of it, because the Earth's gravity is quite strong. To temporarily suppress it, you need to direct a lot of vital force down. But in order to direct it correctly, and for it to push you away from the Earth, you need to completely believe in it. Full faith that this will happen 100% will give you the power to manage it. That is, you must believe that when you mentally image the direction of the ray coming from the heart down as yellow light, you must fully believe that when this ray comes out through your legs in your imagination, your body will fly up. You shouldn't doubt it. If you doubt, you will not direct this energy.

59:30 Is there an alien base in Israel?

Irina: Of course, there is more than one. One is very close to Jerusalem.

01:01:09 How can a person live 150 years?

Irina: His lifespan also depends on his spiritual mentors.

01:01:18 What are the best herbs for body regeneration?

Irina: For the regeneration of the body, do you mean cell rejuvenation? I will now give one recipe that I have already given many times to those whom I diagnosed. That is, the recipe can be universal for rejuvenating your blood cells, and so that you can lower the level of cholesterol in the blood, reduce the number of cholesterol plaques, and with this you will already improve blood flow to all parts of your body and plus reduce the excessive load on the heart, which manifests itself in the area of hypertension. To do this, you will need three herbs that grow everywhere in the middle zone. These are immortelle, St. John's wort and chamomile. You should pour 500 ml of boiling water into a tablespoon of 15 g of dry crushed herb and do this in a very warm place, preferably in a thermos so that it keeps the temperature, and brew like tea for 40 minutes. Infuse for 40 minutes in a warm, dark place; this is not a decoction, but an infusion. You should strain and drink this 500 ml per day after meals or before meals, the daily dose is like tea. You can add a little honey. You can drink it constantly and your cardiovascular and circulatory system will constantly heal and regenerate.

Participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan - head of the International Center for Spiritual Development "Cassiopeia";

MidgasKaus - representative of the planet Esler, biologist, psychologist and specialist in alien civilizations;

LiShioni is a representative of the planet Shimor, a specialist in the astral world and its interaction with the material world.

#78 Kabbalah. Questions from a representative of the Kabbalah Academy. History of mankind.

https://blog.cassiopeia.center/kabbala-istoriya-chelovechestva

https://www.youtube.com/watch?v=gbb5f_NriqE

00:10

Irina - Hello, dear friends! My name is Irina Podzorova. I am a contactor with extraterrestrial civilizations.

Today with us are four representatives of the Interstellar Union in astral bodies. This is Raom Tiyan from the planet Burkhad, MidgasKaus from the planet Esler, LiShioni from the planet Shimor. And another representative of the planet Shimor, whose name in the current incarnation is Rahaim. Well, he just told me that his last incarnation on our planet Earth was as a man who lived in ancient Israel. His name was Daniel, and he wrote a book there (from the prophet Daniel).

Vika - Very nice! I study Kabbalah at the International Kabbalah Academy.

This is an academic education, not at all related to religions. All people of all religions can practice here. We unite absolutely everyone, any people, and even those who do not believe and have nothing to do with religion.

I've been doing it for three years now. There are many things that are clear from the start, and many things are very difficult for me to understand, not logical at all. In general, a lot of questions arise to which, of course, you are looking for answers.

I'll tell you more about myself. My name is Vika. I am a biochemist by training. I work in a hospital in a biochemical laboratory. Therefore, I know very well about coronavirus. We do these tests.

Maxim - Yes. You are a colleague of MidgasCaus. MidgasCaus we have a biologist.

Vika - Yes. I am very touched by all your stories, very interesting. I want to tell Irina that the whole video is something amazing and made an impression on me. I think on others too. Thank you! I study a lot, but there were a lot of interesting and new things for me. I hope that today we will also shed a little light on some issues.

03:09

Vika - One of the first questions I had was about the personality of Nimrod. There really was such a ruler, and he built the Tower of Babel. What were his real goals? Is it true that there was a confrontation between Abraham and Nimrod in the sense of generally understanding who the Creator is and how everything happened?

Irina – Rahaim will answer...

I would like to comment on what you said, that it is difficult to develop a sense of God. This is because we are inherently selfish. But we are initially that very light, which we then recognize in ourselves, and the selfishness that manifests itself is a distorted perception of it. However, this is inevitable and even necessary in some incarnations of the material world, because, having gone through a distorted understanding, we can then enjoy the truth more.

Vika - Yes. In Kabbalah there is such a concept as a “vessel” or “kilim” into which divine light can be admitted. And, of course, all sorts of processes took place, as a result of which we received a broken “kilim”, broken “vessels”. Therefore, we transmit this light through ourselves, but we do not see it, do not feel it, or see it distorted. Like broken glass.

Irina - If you do not recognize the light, if you do not find its source in yourself and in that part of your spiritual being that remains in the spiritual world, then it is useless to look for it in an

earthly place in any teaching, you will only distort it.

I would not call Nimrod a king in the typical modern sense, characteristic of a given time, for a given era and for your country. What happened? Do you know that there was a war 12 thousand Earth years ago with Selbet?

Vika - Yes. I listened and read. And about Atlantis, and about the situations that happened before.

Irina - So, the Selbetites were among the creators who descended from the sky in the form of “snakes”, “dragons”, and “enemies of the human race” later in a later era. That is, they were among the Elohim.

After the war, people, about 10 thousand people, those who survived were transported back to Earth. It was only later that they were resettled. They were first left on the same continent. The place where they were landed was just between the Caspian and Black Seas, a little to the south.

Vika - Well, not far from Babylon. This is the city of Ur.

Irina - They were originally planted there, even before the Tower of Babel. There was an original post-war settlement there. Then, since there were a lot of people, they began to settle and with each decade they began to move further and further apart. Some to the north, some to the northwest, some to the east, some to the south, on the territory of Europe, Rus', China and so on. And they began to divide into tribes.

But in one of the tribes they had such a desire to get to the Gods. Since the war happened, and people no longer really trusted the Gods in general. Elohim. Yet people understood that this was a war of the Gods. And people were no longer as willing to make contact with Elohim as they had been for several hundred thousand years that they had lived before, before the war.

Therefore, the Interstellar Union decided not to communicate so often. Only come to certain people. But the stories that the Gods live in the sky, including on the Moon and the stars, were passed down from generation to generation. There was an idea that the star or moon itself was God. But there was a clear understanding that the Gods live in the sky and you can fly to them.

The fact is that even before the war, people learned from the Interstellar Union the technologies that made it possible to move in space. These were, of course, not interstellar flights, but one might say, like a rocket. They were not based on the types of fuel for engines that are now available, but were based on ion transformations, on nuclear energy. And it was called in other words. There were joint projects between specialists from the Interstellar Union and people from the emerging earthly civilization. It wasn’t that they were shown technology, but they were told that this could be, preparing them for the earthlings to invent it themselves. They built these ships for themselves.

And after the war, these stories about what could be built, what they did not call “ship”, but say, “chariot” and so on, and fly to the Gods, were already transmitted transformed into a secret teaching accessible to the priests.

People, in modern terms, began to experiment. We've thought of a lot. It’s not like they figured it out on their own. You need to understand that any priest, any person in general on Earth is an embodied spirit. And among them were incarnated those spirits whose memory was not completely blocked from the same specialists of the Interstellar Union.

That is, I emphasize once again that we have a common spiritual world, and we can incarnate on any planets. On Earth, on Burkhad, on Shimora, this is how it happened to me. I was in the body of the prophet Daniel, and now I am in the body of a Shimorian.

And, having partial knowledge about the structure of these ships on ion engines and nuclear transformations, after the war people were able to build, in your earthly language, a rocket. Mountain-shaped, it was like a tower.

Vika - Made of bricks?

Irina - They built it from metal. They already had metallurgy, they mined it, they even had mines. What was conveyed by the “tower of bricks” was later told to Moses in the form of a myth about what happened.

They didn’t say that they wanted to fly into space, but simply said that they wanted to get to the Gods. He was told in the form of a myth, because the Tumesoutian, who told this story on behalf of Yahweh to Moses, understood perfectly well that any Jew, any person knows that no matter how high a tower is made of ordinary bricks, one will never reach heaven. Why not get there? Because everyone understands that the higher the tower, the more effort is required to raise the bricks further. And in order to even get to the clouds and so on, this must have been an incommensurable effort. That's why they encrypted the story about the spaceship in the form of such a simple parable.

They were sure that people would guess that this was not a tower of bricks we were talking about. Because not only modern, but even ancient people understand perfectly well that it is impossible to build a tower to the sky. And any modern person will guess that those ancients also knew that this was impossible. That’s why it’s such a simple form of allegory. There are many allegories throughout the Bible and in history in general.

Vika - Yes, yes. This is what we are talking about, that you can understand it as a legend or as a parable that speaks about something, any event that happens there...

Irina - And it is written: “The Lord God took and created man from the dust of the ground...”, as it is written there, from clay and so on - this does not mean that God came from clay, sculpted people like golems, and breathed life into them. This speaks to some other events.

The “dust of the earth” here refers to the genetic material of terrestrial primates. Why ashes? Because he was lower in vibration. Every cell, every DNA has its own vibration, its own frequency. The “spirit of life” that God breathed in was the genetic material of the three races that participated in the creation, which was higher in vibration. This allowed the cells of the body to be synthesized, in which a rational spirit could be embodied.

I remind you once again that the entire teaching of the Interstellar Union says that spirit is primary and matter is secondary.

16:08

Vika – What conditions are needed in the body so that the spirit can incarnate? Why primates? Why didn't the dolphins come, for example? Dolphins were already on Earth at that time; they were highly developed, it seems to me?

Irina - Because they were aquatic creatures, not adapted to move on land.

There are intelligent aquatic races in space, in which the intelligent spirit is embodied, but they do not have the opportunity to go into space, for example, they cannot build something or even write. They just communicate and live. By the way, they remind me very much of the civilization of the same plasmoids. Only plasmoids, unlike marine animals, have access to space due to the fact that they can move through portals using electromagnetic waves.

Maxim - Yes. And these intelligent civilizations have the ability to communicate in the astral plane. They go to the astral plane for communication, for contact.

Vika - These aquatic civilizations?

Irina - Yes. As I already said, all animals have animal souls. And during an animal’s sleep, its soul also goes to the astral plane. She is also connected to him, and she can communicate too. Although she does not have the same consciousness as a rational spirit, she also has feelings and emotions.

In the astral plane, meetings with the souls of animals are possible. The main thing is to understand that we have different levels of consciousness and the ability to transmit mental images.

17:56

Irina - Yes. About Nimrod...

So, as I already said, people were divided into tribes. One of the tribes, the head of which was

this leader Nimrod, who was not only a leader and a king, but was also initiated into secret knowledge, that is, he was a priest.

The natural work of a priest could not be unrelated to the work of a contactee. But in this case, he was not a contactee of the Interstellar Union, he was a contactee of plasmoid civilizations, which happens with many priests. But they also told him a lot about the construction of that ship. Because some plasmoids have an idea of how it is in the Interstellar Union, because they move between planets.

One way or another, he and his tribe managed to build some semblance of a spaceship, on which they intended to fly to the main goal. They also remembered from myths that there were Gods on the Moon, that there was one of the main bases on the Moon, and that the Moon was already orbiting the Earth at that time.

These plans became known to the Interstellar Union because among its associates there were contactees, including those with the Interstellar Union. And through these contactees it became clear that people want to fly from Earth. Then specialists from the Interstellar Union came in the astral bodies, checked the ship and realized that it was very dangerous to fly on it, because it was not perfect to the required degree.

Firstly, the calculations were not made. The ship could have veered off course given that the Moon is rotating. They would have launched it straight to the Moon, and while it was flying, the Moon would have moved, and the ship would have flown past, and they did not know how to correct the flight sufficiently.

Secondly, there were many other nuances. And the engine was made incorrectly. Too much radioactive material was put in, so that an explosion and contamination with radioactive elements could occur. But they did not call them radioactive, they were called “light-bearing”, since many radioactive substances begin to glow in the dark.

Vika - But there was an explosion there after all?

Irina - Yes. But what I’m talking about now is that a large nuclear explosion could have occurred.

The fact is that when the Interstellar Union found out about this, they flew to this ship and made open contact. This is reflected in the Bible as the fact that God came down to look at the Tower of Babel. And what the representatives of the Interstellar Union saw in the physical body, of course, obliged them to say that everything was canceled, that there should be no flights. But people began to argue. Say: “You, too, arrived on a “chariot”, you yourself told our ancestors that we are equal to you and why can’t we fly?...” They tried to explain to them that they had built the aircraft incorrectly. To which people asked: “Why can’t we use yours then? Give us yours!..” Which, of course, could not be allowed to happen.

In general, people did not believe that something terrible could happen and staged a sort of demonstration of their ship. Yes, there were several explosions, but not nuclear ones. And

they were explained that it could be worse and much stronger, that many would die and then it would be impossible to live in this area. People did not understand what radiation was, but it was explained to them at their level.

Vika - Got it!

Irina - This also had the consequences that people still agreed with the representatives of the Interstellar Union, but said that they also wanted to visit other worlds and celestial bodies. To which they were answered: “To do this, you must first go through the path of development, and then enter the Interstellar Union, like us, and then we will provide you with everything...”. Raom Tiyan now says that their ancestors, the Burkhadians, also went through the path of social development at the very beginning and also did not fly right away.

Not only Nimrod was there, but the surrounding tribes also gathered.

Vika - Yes. There were many tribes there.

Irina - They arranged a Cathedral there. Not on the same day when they arrived, but later.

Vika - They say that there were 70 nations or tribes.

Irina - Well, there were more of them there, namely representatives from people. And people agreed in a general meeting that it would be fair to go this way and enter the Interstellar Union. But they didn’t say Interstellar Union, but there, for example, “Council of the Gods.”

And only then the Interstellar Union conferred and decided, in order to speed up the path of evolution, to settle people in different places, give them different languages. And, not to make new changes to their genomes, but to make various small changes to the genotype of some of them, so that different races and peoples arise from them.

Maxim - Was it at that moment that the Chinese, the yellow races and everything else happened?

Irina – They didn’t happen right away, but gradually.

Maxim - But at that moment there was just such a division?

Irina – The change was made at that moment.

Maxim - Well, at that moment three or four new races appeared?

Irina - Yes.

Maxim - And before that the race was one, right?

Irina - Yes, like lumberjacks.

Vika - And there was a single language. Because the legend says that languages were divided between peoples.

Irina – There was a single language, but they had already begun to separate, because people began to settle anyway, as I already said. That is, they have not settled everywhere, but they have already begun to settle. But still, they mostly understood each other. This is what was meant by a single language. But it changed as they separated, that is, the further people moved away from each other, they began to teach their children a little, for example, to teach them to pronounce words differently.

And plus, as I already said, there were many contactees with plasmoids, these are subtle-material civilizations. Terrestrial plasmoids, space plasmoids. And they spoke a language that can be said to be syllabic, that is, which consists of syllables. It is so often convenient for plasmoids to communicate with their contactees, with priests, with shamans, for example, and so on. This syllabic language had already begun to form; there were several variants depending on the area and even on the contactee who received information from the plasmoids.

Then, when they divided the languages, that is, they gave people some other simplified versions of the galactic languages, adapted, of course, to earthlings. They began to teach them. They didn't immediately put it into my head, but began to teach me. And even later, when nations were formed, when other languages began to be divided and formed from the data, then this syllabic language was still present in different tribes, in different peoples. But he was secret. Unlike the language that was generally accepted, it was the secret language of the priests. And they even wrote it down with icons called "runes" and each icon denoted a syllable. Each syllable had its own secret meaning.

The most common example is that the syllable "Ra" means "sun" and so on...

Maxim - I would like to clarify further, because I have been dealing with this issue for a very long time and have not understood this issue for a long time.

Plasmoid subtle-material civilizations also consider us their children. Because those primates that were on Earth were created precisely by these subtle-material civilizations, which, in principle, invest in these creatures, also creating a soul. Well, that is, they are at different levels, someone creates material things, materializes objects, someone creates higher vibrational spiritual objects, but they are also considered our creators.

29:02

Vika – 45% are primates in us, and 55% are hybrid DNA. I have a question about this.

Abraham has such a book, called Sefer Yetzirah, this is the Book of Creation. It says that man was created using the letters of the Hebrew alphabet. There are 22 letters and 10 sephiroth. Each sephira means a specific property, there are a lot of meanings and can be viewed from different angles. This is not just some property and that's it. Absolutely everything is built on this.

I have a question. If this is some kind of universal model in general for constructing all living beings or all worlds, using the letters of the Hebrew alphabet. Humans have 23 pairs of chromosomes. One pair is the sex chromosomes, and 22 pairs are our genetic code as a person, regardless of gender.

Some see a connection in this, that each letter corresponds to a pair of chromosomes. 22 letters – 22 pairs of chromosomes that completely determine its structure and properties. This is how we are built physically. Is there some connection?

And 10 sephiroth, which also participate in the creation or construction of man. Can you tell me a little about this?

Irina – Raom Tiyan answers. He shows me an image of these 10 sephiroth. And these 10 are, as it were, decomposed into 22.

Vika - Is this the type of picture?

Maxim - This is the Flower of Life and the Tree of Sephiroth.

Vika - Yes. Similar picture?

Irina - It's less here, it's not 22.

Vika - Isn't this it? What does it show?

Irina - Something similar, only from these "balls" somehow two come out, which somehow form exactly 22.

He says that what you named is not only Abraham, it is already their

understanding of how the Universe unfolded in general. The contactee has a different terminology, but we are talking about cycles of creation. That is, the spiritual world, lowering its vibrations, passes into the subtle-material and then into the dense-material.

But this was explained to them differently, that these qualities of God are manifested differently in different vibrations through the Sephiroth. This was in accordance with their understanding. And as for the 22 letters of the alphabet or the 22 arcana of the tarot, for example, the 22 human chromosomes, we are already moving on to the fact that each number has its own vibration, characteristic.

It is only at first glance that it seems that the numbers are just icons on paper. This is also a certain wave of space energy. In this case, 22 denotes a certain quality of manifestation of divine energy in the form of the birth of something new and the discovery of meanings. I emphasize once again that this energy comes from the spiritual world, and it can express or manifest itself in the material, in these 22 letters of the alphabet, in human chromosomes, in the arcana of the tarot and in other areas of our material world.

Just like, for example, the number 7, which denotes a certain wave, vibration in space. It is not just an icon on paper and not just a sound that we hear as “seven”. This is a certain vibration, energy and, you can say in your language, “a certain sephiroth”, which denotes such a quality as “Divine secret”, for example. Achieving the mystery that leads to immersion in the infinite Light. From here, for example, even the embodiment of this intangible idea comes. The fact that the Gnostics said that the Pleroma is decomposed into eons, for example...

Maxim - I don’t understand what was said just now. What is this?

After I heard this, I had to go to Wikipedia. Even 3 higher educations did not help.

Wikipedia.

Pleroma is a term in Greek philosophy, one of the central concepts in Gnosticism, denoting Divine fullness. In the New Testament, “all the fullness of the Godhead bodily” dwells in Christ.

Aeon (Greek Aion - age) is a concept in ancient Greek and modern philosophy. In antiquity it meant “age”, “path of life”, time in the hypostasis of the flow of human life and living beings.

Irina - But in any case, no matter who says it, be it plasmoids or humanoids, the idea is the same, it’s just refracted differently in the minds of those who understood it.

In any case, this number 7 is also reflected as 7 days of the week, seven notes, and it is even reflected that 7 notes give rise to a single music.

Or this idea, where 7 denotes the vibration of the Divine secret or sephiroth, this energy coming from the spiritual world in the form of the idea of the number 7, it is even embodied in the fact that in our material world white light is decomposed along the spectrum into exactly 7 colors, which for the earthly person can be manifested. And, if you put them together, you get white light again.

And here in matter the spiritual idea is expressed that it is not just that there are 7, and not 17, for example, colors. This also expresses the idea that in various manifestations of the material and spiritual world, where we comprehend the secret of Light, that the Light is hidden there, we will then find a common Light and dissolve in it, that is, we will become white Light.

38:01

Vika - I see. With letters. In Hebrew, each letter has a numerical value.

Irina – Not only in Hebrew, by the way.

Vika - Yes? Where else?

Irina – In any language, any letter can be expressed through a number. But this is done completely differently by different systems.

Vika – But initially there were no numbers in Hebrew, everything was indicated by letters. Even the year of birth. Everything that was counted. For example, if they want to say that this “increases many thousands of times,” there is the expression “pi tarah pa mim” (אלפי פעמים רבות), where “tarah” is precisely a large, huge number. It was always expressed in letters and words.

Irina - He says that each letter of the Hebrew alphabet also has its own numerical expression.

39:06

Vika – If before people were really vegetarians and did not eat animals. It is said here that after Noah set sail with his ark, the eating of animals began. How did this actually happen?

Irina - Indeed it was. After the war, since the climate on Earth changed, the magnetic fields and, in general, the entire energy of the Earth, the atmosphere, and so on changed, the genotype was even changed compared to the original, pre-war one. It was decided to add 5% of Tumesoutians due to the genes of Burkhadians. That is, the genes of the Burkhadians decreased by 5%, the genes of the Tumesoutians increased by 5%. The genes of Selbetians and primates have not changed.

And this was done because in the new conditions of a new climate, a new magnetic field, and so on, the authors, biologists and the same biochemists, considered that it was necessary to introduce into the human body the ability to digest animal food. Initially, this opportunity was not available, which is why they said not to eat it, because it simply would not be absorbed.

As a biochemist, you know that various enzymes are required to digest plant and animal proteins, fats, and so on. An enzyme is a special protein that is produced by the human digestive system. In this case,

we are now talking about pancreatic enzymes and those enzymes that are contained in bile and help digest the same fats into fatty acids, that is, break down more complex ones into simpler ones.

Burkhadians are able to digest only plant foods. And initially, the genotype of earthlings contained more Burkhadian genes, there were 35%. That is, more than all extraterrestrial genes in total. Therefore, people turned out to be herbivores. They could absorb a little due to the fact that they had an enzyme that breaks down plant foods, for example, dairy foods. But they didn't do it well and they could get sick from a large amount. If you don't learn it, you will end up with a health disorder.

This was done because conditions on Earth were different then, as we have already said. There was no winter, there was a denser atmosphere, a different magnetic field, many more plants, which were large. Therefore, people had enough energy to create heat in the body, for processes in the brain, and so on. What they had was enough for them.

After all, you know that even now you can live without animal products. But the point here is that modern metabolism will require that more plant food will simply be needed.

43:33

Vika – There are several types of amino acids, which are very little or almost absent in plant foods, but they are found in large quantities in animal foods.

Irina - Before the war, there were such plants due to a different composition of the atmosphere, a different percentage of nitrogen and some other gases, which produced exactly those amino acids, which were sufficient.

The entire composition of plants that grow depends on the composition of the surrounding soil, air and water, because, except from the external environment, these elements have nowhere to come from.

And due to other metabolism in plants, they synthesized in sufficient quantities. Not in all plants, but in their individual parts, but people already knew what they needed to take.

Vika - So it turns out that genes were added to them. Added or changed?

Irina - They changed the ratio. In your language, at the cellular level, and the offspring could already assimilate animal food. Abraham already kept cattle and when he received the Tumesoutians, he already treated them to a kid of goat, which he had prepared.

And as for Jesus, you need to eat bread, milk, honey, fruits and so on. The fact is that it was Jesus Christ who already clearly showed the importance of both animal and plant food. And of equal importance. Because when he endlessly produced material food and fed people, he chose not only one bread or not only one fish, but he chose a symbol of both. Bread is a symbol of plant food for humans, because it grows from the earth, and fish is a symbol of animal food, because fish is an animal in any case.

Vika – Representative of the animal world.

Irina - Yes. Fish is animal food. And, since he himself gave from his own hands to people, disciples and the whole people. And God, answering his prayer, God the Father, means, multiplied both the bread and the fish. It was a symbol that God approved of it. Because otherwise he would have multiplied only the bread or only the fish. And he multiplied it equally, so it is equally significant for a person. He knew perfectly well that this would be written in the Gospel. One of the purposes of these miracles was not only to feed these people for a while, but also to give us eternal food for our souls in that God approves of both foods.

For the Jews, for the Jews it was already clear that God approves of the consumption of animal food, which, for example, follows from the same book of Leviticus, which describes in great detail what and how to eat. Including the priests who served the ark, and then later the temple.

48:25

Vika – And there were sacrifices in the temple.

Irina - Yes. And there were not just sacrifices, there they were according to the rules that Yahweh had described in detail to Moses and Aaron, exactly how to kill an animal, what parts to use, and so on.

Animal sacrifices were needed to fulfill various purposes. This, firstly, feeds those plasmoid civilizations that created the necessary climate for the Jews, because the spirits of nature, plasmoids feed on the energy of the killed victims, the vital force released from them.

The second goal is that when the Jews were taken out of Egyptian slavery, it was necessary to form a new egregor. Jewish already. Monotheism. For 400 years, Jews had become accustomed to Egyptian sacrifices to many Gods and plasmoid civilizations, which appeared in the form of Gods. And those who formed Judaism, they decided to combine these two actions in the minds of people - the old ritual of sacrifice to the Gods, but with a new image of monotheism. This strengthened the egregor under construction.

And the third goal was the support of those priests and their families, for whose food the remains of the sacrifices were used, so that they could not cultivate the land and raise their livestock, but could teach the word of God.

Vika - Yes. They did not have their own allotment.

Irina - And they had no right to it.

50:16

Vika - Who is Yahweh?

Irina - This was a representative of Tumesout, in whom the spirit was incarnated, which then became incarnate in Christ. The Tumesoutian called himself by a name that, the most accurate sound in Russian, sounds approximately like “Yahweh” (“Yahweh”). In the original language, Tumesout, if you translate it not literally, but simply by meaning, then in modern Russian you will need a whole phrase. It will sound something like “Carrying the light of eternity in time.” But this can be understood not as “light” or even “carrying light”, but can be understood as “Light that carries eternity in time.” Here is such a polysemantic phrase that in Tumesout can sound like one word, and “Yahweh” is already more adapted to sound for earthly ears. Approximately this can mean one word “Absolute”.

The ancient Greek sages and Christian thinkers very clearly and correctly called Christ “Logos”. This is a very precise word in meaning, which means, as I already remind you, not only science or teaching, or a word, it also meant the light of God that brings knowledge. Knowledge is not of the material world, but of that primordial unified knowledge, which is divided by our material mind through the material body into different knowledge. About the spiritual world, the material world. And there is one original thing, which precisely carries “the light of eternity in time.”

53:36

Vika - Got it! This is about the main thing in the Torah.

Today, by the way, my Kabbalistic group and I talk a lot about the fact that we have already come to such a state in the world in general that we are, as it were, forced to observe the law: “Love your neighbor as yourself!” In the Kabbalistic understanding, this means that we and each of us must take care of each other as we care for ourselves. Because we are all connected. We are connected spiritually and must be connected in the same way in the material world in order to rise to the next stage of development.

But this is again very difficult to do. You need a desire, you need a certain number of people, because today very few people want to love their neighbor as themselves. What should we do? Can I get some advice?

Irina - You said that it is difficult to do. Love your neighbor as yourself. Take care of yourself. It's not easy - it's hard to do. This is also a reflection of the law that exists in the human body, in the human soul and in the spirit that unites. And this difficulty is not just like that. Love, in any case, cannot be achieved easily, because if it is achieved easily, it will not be valued by those who achieve it, it will be a common state for them. This is the first.

Second. To do this, to love your neighbor as yourself, you must first love yourself.

Maxim - Initially, the big problem is that it is said “love your neighbor as yourself,” but 80% do not understand what “loving yourself” means. Here we must not love our neighbor as ourselves, here we must love ourselves, and then, after a person has loved himself, love his neighbor as himself. And the hardest work is working on yourself.

For some reason we think that we give people love without having it inside. In general, without having it inside. We think that we are giving this love to everyone, but in reality we are giving this ignorance that we cannot even express in ourselves. That is, the absence of love cannot be given. And when we give the absence of love, we demand love from the people to whom we gave this absence of love. How can they give it to us when we didn’t give them what they wanted? And we came up with something for ourselves. And we think that we give them love.

Therefore, I believe that one of the biggest problems of humanity is learning to love ourselves. But not just to love yourself, to engage in self-love, but to love in yourself that God who can see everything, create, create, precisely taking into account the internal qualities of love, joy, happiness and the faith that is in every God.

Irina - Yes. If it were possible to love without loving yourself, then it would simply be said “love your neighbor,” and how it would not be indicated.

So, what does it mean to “love yourself”? Loving yourself does not

mean fulfilling your every desire. Love does not consist in the fulfillment of any desire. Love is the pursuit of perfection. That is, to become the master of your desires.

Why the master of your desires? Because only the master of his desires can fulfill them correctly, to create himself and to build perfection around himself. That is, only the master over himself, the one who manages himself, without allowing his instincts and desires to take precedence over his spirit, over his will, over his rational part of his personality, only he can correctly, without distortion, bring the light of God into the world.

And this is what love is. First, correctly, as Maxim said, in order to love yourself, you need to see this source of light in yourself. See and recognize it. In any rational spirit, embodied and non-embodied, the darkness that sometimes exists, you need to recognize in it that light that has become distorted, and recognize the reason.

I mean, what does this mean? Why don't people love themselves? Because they deny this or that part of themselves. They try to forget about her, not think about her, make her bad, exclude her from their consciousness. Instead of accepting all their negative qualities and transforming them into positive ones, they try to scold themselves, blame themselves for them, forget about them, pretend that they do not exist. Including not only in front of others, but also in front of yourself. But this does not stop them from being distorted.

But if you recognize the cause and see the light in it, then these qualities are transformed into this light. A person will see the light within himself. As we say, contactees need to connect with their Higher Self and establish such contact with it that you can communicate with it at any moment, at any moment merge with it in a single light. And then a person will see that the same light that is in him and which he himself is, fills all others. A little later he will see that besides this light in its various manifestations there is nothing at all in the world.

1:00:25

Vika - The question is how to force people, how to bring people to this?

Maxim - It is impossible to force people.

Vika - How to wake them up, let’s say, like this? Any practical tips?

Maxim - I have a wonderful institute with a wonderful rector who teaches us psychology, and he says that the best example is to show by personal example. Only by your personal example, showing that you are showing this light, this love, and what specific changes are happening in your life, what is changing in you. And the people who will look at you will look at your changes, they will think that they can do exactly the same, think exactly the same and have the same.

Because it is very difficult for a person who has not walked this path to explain what even light is, what love is. Why? Because he does not have these understandings inside, and these understandings will only be through specific examples, through those images that he can see, touch, realize in a living example. But that's my personal opinion. But what is the opinion of the representative of the Interstellar Union? Do you have any other, perhaps special, opinion?

Irina - Yes. Okay, Mead.

He says that every embodied spirit, as has already been said here many times, is light. Part of the world. And any part of the world is light itself. The very light that loves itself and loves others, simply that part of it that is embodied, can distortly understand love, both its own and that of others.

So, if, as Maxim says, you show by your own example your love, selfless love, the highest love. Not the one that demands something in return, but the light that is visible. Then those people who surround this person, and their spirit, their Higher Self, which looks through these people at the world around them, will remember that they are also like that in their essence. They also recognize this light in themselves.

But there is a small nuance here. Those habits that have already formed in people are habits at the level of the mental mind. And at the level of the astral and etheric body, negative low-vibration formations

can form, which are called energy blocks, larvae, pseudo-intelligent entities that the embodied spirit can create in its aura.

After all, as we have already said, the spirit is endowed with all the qualities of God, including the creation of living beings. Plasmoids realize this in the form of creating animal souls. And we, embodied spirits, are in the creation of our thought forms. If they are positive, if they are filled with light, they become our helpers, one might say, they charge objects, they charge the space around us and help. And, if they are negative, if they are saturated with low vibrational states of anger, fear, resentment, then they become larvae.

But they are created by us, they are not immortal. They have something like a pseudo-intelligence, very similar to robots, it's just not an electronic device, but an energy one. And, like any energy being, it strives to fulfill, firstly, the desire of its owner, and secondly, to prolong its existence. They can prolong their existence only due to the same energy that created them.

Therefore, if a person has these formations and there are many of them already in his aura, as soon as his spirit begins to recognize itself as light, then a struggle will begin in him. The struggle between the light and these larvae, which will begin to decompose into the same light. But, possessing a pseudo-mind, they will begin to cling to this pseudo-life and send a person into his mind, into his thoughts and ideas, old attitudes, grievances, wounds, fears, so that he releases more energy.

There is nothing stronger than the energy of love in the Universe, because it created everything, and it supports everything, everything is based on it. And, in any case, if a person continues to cling to the light, feel himself to be the light, continue to manifest himself as the light, despite the temporary aggravation of his internal struggle, then the larvae will go away and dissolve. A person will become the same as the one who sets an example for him.

1:06:24

Maxim - Yes. First, a person forms a larva on a physical level, then the

larva acquires consciousness, and then, when a person has further formed the larva and fed it to the level of a more literate consciousness, the larva begins to control the person. That is, this is an energy-informational formation that a person himself created, and to which he then becomes susceptible.

Vika - Are we slaves to our desires?

Maxim – Yes, yes, yes.

Irina – Who said “Everyone who commits sin has the fear of sin!” Fear of negativity.

Vika - Yes. I understood. Problem!..

Thanks a lot! Thanks to everyone on the other side, I didn’t see anyone, but I felt that they were present and gave excellent answers. Thanks a lot. I hope we continue, because I have a whole notebook of questions here.

We said goodbye and, just in case, calculated the level of spiritual incarnation...

Irina - First of all, congratulations, you are an angel incarnate.

Vika - Thank you.

Maxim - We have an article in the group where we clearly explain the levels of spiritual development.

Irina - I calculated it. This is an angel prophet.

And, as always at the end, a little interesting thing when recording, I would say the most interesting...

Maxim - We have a surprise for you here.

Vika - Which one?

Maxim - I don’t know how happy you will be. Raom Tiyan was invited, simply because they helped in creating your religious egregor, and now your prophet Daniel (Daniel) has come.

Vika – My son’s name is Daniel.

Maxim - Well, that means he didn’t just come. Now at this point in time he is embodied on the planet Shimor and his name is Rahaim.

Vika - I salute him!

Maxim - Yes. We have a party here every day. I'm no longer surprised. Here in the astral plane, whoever doesn’t hang out all the time.

Vika - Great! I envy you!

Maxim - You know, it’s good when from afar. So you feel and envy. And when you are in this constantly, sometimes you want to get out of it. Go somewhere simple fishing, take a walk in the forest, leave the house so as not to edit a video, do something else hunting.

Now with demons, now with plasmoids, now with humanoids, now some kind of “grits”, now “showdowns”, now conflicts, now friendship-love, in general, here we are fully involved in all the “movements”.

Conversation with contactee Irina Podzorova

Published:

Participants: Irina Podzorova, Maxim Rusan, Raom Tiyan from the

planet Burkhad (in the astral body), MidgasCaus from the planet Esler (in the astral body), LiShioni from the planet Shimor (in the astral body), Rahaim (in the past earthly incarnation - the prophet Daniel, now embodied on the planet Shimor, also in the astral body), questions were asked by a representative of the International Academy of Kabbalah Victoria (hereinafter referred to as Vika).

#81 Proper and healthy eating. Prana, living food, protein, therapeutic fasting, connection between spirit and body.

https://blog.cassiopeia.center/pravilnoe-i-zdorovoe-pitanie-prana-zhivaya-eda

https://www.youtube.com/watch?v=lgDp6W6eM4Q

2:03

Karim: Tell me, is there a difference in pranic and non-pranic nutrition, and how does this affect spiritual evolution? How does heat treatment affect food?

Irina : MidgasKaus answers from the planet Esler, he is a biologist who studies these questions in our bodies.

If you mean the type of energy that separates the spiritual world from the material, then its content at that point in space, even in a vacuum, even in a room, even in the air, even in any atom, is approximately equal, since it gives rise to matter .

And it in no way depends on heat treatment or any other: chemical, thermal, physical, or any other treatment that acts on matter; it cannot depend on or change its quantity. This means that you are still talking about more material energy now, if you mentioned heat treatment.

Karim: Well, I gave an example, if we now take cabbage protein,

chop it and get, say, a whole basin of cabbage from one protein, which is large in volume, take this cabbage and put it in a frying pan, and fry it. In terms of quantity, it changes very significantly and becomes literally one cup of ready-made cabbage.

Irina: And what does this mean, in your opinion?

Karim: In my opinion, this suggests that these chemical bonds, I, of course, apologize, that maybe I was not ready for this definition or to give this definition specifically, but these energy-chemical bonds, they crumbled or transformed into something else, and cabbage from living cabbage or carrying a certain quality of energy was structured into another type of energy, that is, it lost that energy that could be very important for our digestion to be complete, for the satiety of the body to be complete for so that both development and evolution go in the right direction.

Irina: Yes, I see. Karim, the fact is that cabbage becomes smaller in volume not due to loss of energy, but due to the fact that juice comes out of its cells due to temperature and dissolves in oil or water, depending on what you heat it with.

You can observe the opposite process: if you take any cereal and cook it, on the contrary, the volume will increase.

This does not mean that the energy entered there in the form in which you presented it. This suggests that when cooking any cereal, its shell, what consists of fiber, there is this type of matter - fiber, it began to break down into simpler carbohydrates, and into these gaps into which it began to break down, water began to flow from vessels in which it is cooked, so the volume will increase, the visible volume.

But this does not mean that it was energy that did this, because the water in the corresponding volume in the vessel will decrease.

This chemistry that happens to food from heat treatment, which changes its apparent volume, they do not affect energy in this way. This is where the chemical bonds change, but in a slightly different

way.

Again, as I already said, different types of substances in food are affected by heat treatment and its time and temperature in completely different ways. And the final product, which is then obtained, affects the body differently. Here we need to talk in more detail. Are you interested in heat treatment or the lack thereof of what foods?

Karim: Well, mostly, of course, plant foods, and then there's the issue of cereals, grains, legumes, in general, of course, this is also a point that I would like to discuss if there is time.

In general, of course, for plant foods, leafy greens, and root vegetables. It's just that practice shows that eating thermally processed food causes delayed digestion, stagnation in the digestive tract, shows that the body is cluttered, the process of antigenetics of the body, inflammation in the tissues, how is this explained?

Irina : I understand. He says that different types of food are accepted differently by the body in fresh or thermally processed form, or processed with some substances, well, salting, smoking, vinegar, and so on. That is, different types of food react differently to these substances and other types of chemical and heat treatments. And as you just mentioned greens, that is, by greens I mean fresh leaves of various herbs, right?

Karim : Yes.

Irina : I wouldn't recommend thermal processing of greens to anyone. Why? Precisely crushed leaves.

I would recommend, and even if you like, to eat thermally cooked any food, regardless of whether it is animal or plant, but if you like to eat it, then in any case, I recommend adding greens to an already prepared dish, that is, not even Do not heat-treat for one minute.

Well, of course, wash it, that is, you can scald it with boiling water, but nothing more. If you doubt its hygiene. Because it contains vitamins

that are destroyed during heat treatment. But there is one more nuance. Also, vitamins are destroyed more slowly when they are in finely crushed form in bright light.

If you eat it fresh, it is better to chop it right before use. This is the first thing. And secondly, in the greenery of coriander, basil, etc. contains very useful essential oils that have an antiseptic effect, an immunostimulating effect, and which, when heat treated with food substances, form compounds that lose their properties. They don't lose their chemical properties, but they do lose their ethereal components, which you can smell. This is a stream of very small molecules that you can inhale through your nose. And they quickly collapse at temperature.

As for other raw foods: in order for a person to avoid digestive disorders and health problems, he needs to eat a varied diet.

The healthiest thing for creatures of your species is a varied diet. That is, there should not be processed, boiled monotonous food, this can lead to a slowdown in intestinal motility, especially with a lack of physical movement, and now many people have this problem, because... Many people have jobs that involve lack of movement.

Therefore, it is desirable to have vegetables - root vegetables such as beets, carrots, etc. consume raw. But there is an individual point: if a person does not have a deficiency of enzymes or pancreatitis, or low acidity, then his body can consume raw vegetables. If he does not have enough enzymes, his body will not be able to break down the plant membranes. Fiber can be difficult to digest.

Heat treatment is intended not only to make it easier to chew, but also to ensure that the temperature changes the substances into a state more ready for processing by enzymes. Therefore, I personally believe that a person’s diet should include both boiled and raw food (with the exception of greens, there is no point in boiling them, they are put in a ready-made dish).

The same goes for fresh ginger root. It is also better to put it in the finished dish. As for cabbage. It is useful to eat both fresh and

fermented. When salt is added there and canned preparations are made (and cucumbers too), it is better to use apple cider vinegar and just a little. Salt alone is not enough, because... To prevent rotting, you need to put in a lot of it, and it won't be tasty for a person to eat.

As for potatoes: it is better to process them thermally, because... it has such a structure that the starch it contains is absorbed better during heat treatment (like flour). This is especially true for cereals, flour and similar things, because... These plant cells have a very hard shell.

Thus, the type of food that is healthy for the body is determined by the structure of its cells.

It is advisable to eat fruits raw.

The proportion of raw and cooked foods should be present.

18:57

As for animal food, we will now switch to dairy products. If the milk is not from your personal cow, which you tested for brucellosis, then it is better, if not boil it, then bring it to 70 degrees for 20 minutes. As for the properties of sheep's milk, too.

Cottage cheese and cheeses are practically not thermally processed, but here it is at your discretion.

Karim : Cottage cheese and cottage cheese are a completely denatured product, slag, it is not a food product. It is simply an effect on the areas of the brain that cause addiction.

Irina : I'm now talking about those people who love these products. In any case, they exist, and even more so in the East they love cheeses made from goat's or sheep's milk. I urge you to be careful in this area and process milk thermally, especially if you do not personally know the owners who keep the livestock, because there are infections that multiply quickly in milk.

20:58

Denaturation is the conversion of some proteins into amino acids. But in the case of animal or plant proteins (there are plant species with a lot of proteins), the denaturation of proteins helps their digestion precisely because denaturation of proteins also occurs in the body.

In the body, protein denaturation occurs with the help of pancreatic enzymes, which are produced by the pancreas. Denaturation begins in the stomach with the help of pixin and hydrochloric acid, and continues in the small intestine with the help of pancreatic enzymes, and here, by thermally processing protein foods, you will only help your glands convert these proteins into amino acids so that your body can later build your own proteins from them.

Since the proteins in plant and animal foods differ quite significantly from the proteins in your body. All proteins, no matter what they are, consist of the same 20 amino acids (on Earth). And in order to break these proteins into individual bricks - amino acids, which will then make up your body, you need heat treatment or digestion by your body, and more often, both together.

The protein in the raw product will be digested in any case, but this will depend on the amount of pancreatic enzymes in the body and on the amount of gastric juice, and also on how thoroughly you chewed the food before swallowing. If it is not chopped enough, the proteins will remain unprocessed in the depths of the food bolus. Unprocessed proteins in the small intestine move to the large intestine, where they become a good nutrient medium for intestinal microflora.

It all depends on your immunity, everyone has rotting processes in the intestines, the weight of bacteria in each person is about 2 - 2.5 kg. Naturally, they need something to eat. It would be good if most of the proteins from food came to you in the form of amino acids for building your body, and not to microbes. It's healthier for your gut and your body as a whole.

24:42

Karim: How can we explain prana-eating and raw mono-eating? Moreover, people who practice this have a high amount of energy and can do without variety and without cooked food. They consume 1, 2, 3 products, consumed separately in small quantities. At the same time practicing Tai Chi.

How does metabolism occur in such people, and in general, in what modes can metabolic processes occur? There are people who practice not eating at all and live a full life and even beyond that. How can this be explained?

Irina: This is a very individual question. In general, all the effects of food, of varied food, of monotonous food, well-being, energy - depend on the person's belief that he is doing it correctly. His faith triggers energy for proper metabolism. If a person eats a varied diet, eats what is in the store, buys food that you consider dead, and believes, loves, wishes good things to people and believes that God is giving it to him, and thanks him for this food, with him everything will be OK.

Vegans who eat only plant foods - they don't just eat it, they thank God for it, and start the process of synthesizing the necessary amino acids from what they already have in their bodies. But this is again a matter of their personal faith.

27:29

Karim: I have heard that bhakti devotees ate prasadam for a long time, with the belief that they were doing everything right, but still suffered from serious illnesses. The presence of diseases and their faith, which gives rise to this energy, are they in no way connected? Are diseases and food consumption unrelated?

Irina: Diseases can be associated not only with food, they have many causes. They are individual for each person. Very often these are psychosomatic reasons that have nothing to do with food. It can also be infectious causes, traumatic causes, very diverse causes for various diseases. Anyone who has lived among vegans for a long time knows that they also have diseases.

28:41

Karim: How do you explain the fact that fasting can cure almost every condition that exists? There is an opinion that if a disease cannot be cured by fasting, then it cannot be cured at all?

Irina: Two points come together here: fasting is, firstly, stress for the body, since it is deprived of the food to which it was originally accustomed. That is, he is accustomed to receiving certain portions of food, etc. But if he is deprived of food, then he experiences stress, and this triggers his self-preservation instinct more strongly than that of an ordinary person.

The instinct of self-preservation triggers such processes in the body to save energy, since food is not supplied from the outside, and triggers such processes of checking the entire body for those processes that require energy.

That is, if these are any inflammatory processes, where there are microorganisms that are not particularly dangerous to the body, but antibodies are still produced there, and the person has pain there. This causes pain and inflammation. Then, getting into a state of hunger, such an organism no longer spends energy on this inflammatory process, it stops sending your protective cells there, and the inflammatory process stops.

I say this in the most general terms. Because the body, in order to survive, stops all energy-consuming processes that can be stopped in this place. And on this he also spends his energy, his vitality, which was previously embedded in him. He spends it on this in order to use his last effort to suppress those inflammatory processes that can be suppressed at this moment.

This is life in emergency mode. When there is no longer time and energy for long wars of leukocytes with microbes. This is why fasting can help, given the physical reasons. Again, this depends on the person's faith in the method. If it exists, then faith can change any processes in the physical body. Almost any, since this energy is

capable of changing chemical, hormonal and biological processes in the physical body. That is, if a person believes that fasting will help him, if he believes in it sincerely, then it will be so. If he does not believe in it sincerely, then it will not help him. Exactly for him and exactly in the state in which he is.

32:41

Karim: The only energy that is inherent in food products is the biochemical bonds that structure the matter of this product. If this is so, then how can we understand nutritional karma, which says that certain foods cause certain spiritual states. If we think of food only as biological connections, then how can we understand the influence of foods on our spiritual state?

Irina: A spiritual state can be caused by influencing the body, because as long as the spirit and body are connected by vital force, they can influence each other. The state of mind very easily affects the body. But also the state of the body, changes in its chemical composition very easily affect the spirit.

The simplest example is intoxication. This is the simplest example of how a very simple chemical substance, which we call ethyl alcohol, entering the body and causing certain chemical, namely chemical, biochemical changes there, can change the vibrations of the spirit.

All this is transmitted, even if the spirit leaves the body into the astral plane, astral space, and at the same time it maintains a connection with the body along the thread of vital force, then this connection will remain, and the person who drank alcohol will transmit the corresponding vibrations to the person who has already left him to the spirit. This is the simplest, most striking example.

34:49

Vladimir: Can we come back? Mead did not fully answer the question about fasting. He said that two reasons were combined here, he illuminated the first, and the second?

Irina : And the second is faith. If he believes, he will be helped more. If he does not believe, he will either not be helped at all, or will receive less help.

Maxim : I'll tell you more, if you believe that what you are doing is helping people, and your faith is so pure and frank, then it will really help people, help them gain energy. What I mean is that if you run a restaurant and saturate it with all your faith, saturate this restaurant with energies, the prana that you talk about and all other things, then at the level of perception of this space it will be so.

Irina: For people who are able to feel it or believe it.

Maxim: Yes, especially for people who will come into the atmosphere, feel it, believe it and, accordingly, get exactly what you put into what you do.

Irina : And if they don't feel and believe, then they will block themselves from receiving this energy of yours.

36:01

Karim: Thanks for your answer. The next question is about metabolic regimes and the structure of the lymphatic system, and its role in metabolic processes.

As far as I understand, life energy (whether we spend it or receive it) is inherent in us from birth. External nutrition, which is unnatural for the body (if a person is an omnivore, then he can eat everything, but I don't think so) must be assimilated, its remnants must be eliminated. And here the body's energy is consumed, thereby reducing a person's lifespan. The lymphatic system, as I have studied it, draws energy from the depths of the body. Raw food and mono-eating, which is able to take energy from the outside, from raw foods, absorb it and nourish the body with minimal loss of its own energy. We know that left-hand rotating fructose enters freely without enzymes and nourishes the cell. If we eat a ripe apple, chew it well and are satisfied only with it, then we do not spend our energy on assimilation. Except that the remainder

will have to be withdrawn.

Can you comment on these two modes - is there a grain of truth in my logical reasoning?

Irina: You just mentioned that food from the store is not natural for the human body. But if you believe in it, then for this particular organism it will be so. That is, by eating this food, which you called unnatural, you can really harm your body, since you have blocked yourself from getting the enzymes that are necessary.

But you remember that the human body has great adaptive capabilities. A person who, just like you, sincerely believes that any food for his body is natural, and such people exist, then it will be so for his body. You know very well that the spirit is primary in the body. Faith is manifested by the spirit, not the body. Faith in the naturalness of any food is demonstrated by the spirit. Belief in the unnaturalness of any type of food, be it raw or boiled, is also demonstrated by the spirit. Therefore, as you configure your body, so it will exist, so it will live.

41:24

As for life expectancy in this case: the human body has high adaptive capabilities, living within a fairly wide range of chemical interactions in its body. And I would like to emphasize once again that the spirit, going to incarnation, determines the lifespan in advance with its mentors in the spiritual world.

And it can, of course, be changed, but not by changes in nutrition, etc. He can be changed by the behavior of the spirit in this life, that is, if he increases his vibrations, awareness, love, and the mentor sees that in one life he will do as much as he planned to do in several incarnations, for example, then he has the right to extend his term .

Well, and accordingly speaking, it’s the other way around. If a spirit has been assigned a rather long period of incarnation on Earth, and it is highly vibrational, then if it does not fulfill its task and, in addition, degrades, lowers its vibrations, experiences negative feelings,

triggering negative thoughts in relation to another person, then such the spirit lowers its vibrations and will degrade, and his personal guardian angel (the spirit that watches a person from high vibration levels) has the right to ask mentors to shorten such a person's life on Earth so that he does not have time to degrade to such an extent that he will then have to rise to this state has several lifetimes.

So in fact, in the debate between vegetarians and meat eaters, between vegans and consumers of cooked food, the truth in the very old debate between these types of food lies exactly in the middle. This is my personal opinion. And this truth is that the body adapts to any type of nutrition that your spirit believes in, but life expectancy will not even depend on this, but on how successfully the spirit will fulfill its tasks, which it itself set for itself before incarnation .

44:32

Karim: Is there an answer regarding the functions of the lymphatic system and the metabolic process, and the energy supply of metabolic processes? How is the lymphatic system related to the metabolic regime and the formation of energy in the body?

Irina: Before talking about the lymphatic system, I will say a few words about what lymph is. Lymph is a type of biological fluid in the body, which, unlike blood, does not have red blood cells. That is, the function of the lymphatic system is mainly transport and protective. That is, the transfer of nutrients throughout the body, the removal of unnecessary ballast substances from the body, and protective, that is, the fight against foreign microorganisms that have entered the body.

Karim: When Hercules fought the Hydra - was this action neutralizing the lymphatic system or is this another process described? Isn't the lymphatic system an enhancer of cell life?

Irina : In the sense that one of the functions of the lymphatic system is precisely the nutrition of these cells, which naturally enhance vital functions.

Karim : If an inorganic element that has undergone heat treatment enters the body and cannot be absorbed by the tissues, what mechanism should restore its organicity? And, like tree roots, this function is performed by the lymphatic system in our body. At the same time, intercellular fluid is forcibly drawn out from the intercellular space, accelerating metabolic processes inside the cells so that vital processes are maintained at a certain level. This is a violent extraction of the energy inherent in us. Subsequently, this shortens the lifespan and increases slagging. Is the lymphatic system a catalyst for this process?

Irina : Do you mean cleansing cellular systems?

Karim: Not cleansing, but enhancing their vital activity by drawing out intercellular fluid from the intercellular spaces.

Irina : Extracting intercellular fluid from intercellular spaces to what extent?

Karim: For example, a car has a turbine that makes the engine run faster through the exhaust system. We strengthen the exhaust system of the body, cells are subject to an increased pace of life.

Irina : In every cell of the human body, hundreds of chemical reactions take place every second. Now I still can’t figure out exactly what processes and cells we are talking about. So let's decide which process you have in mind.

Karim : I mean all the processes in general, the process of life.

Irina : Well, speaking in the most general terms, the vital force of the embodied spirit, its quantity depends on two sources. The first continuous source is the spiritual world, that is, the spirit continues to receive energy from the spiritual world, even after incarnating.

The second source is organic matter and oxygen. That is, as you know, people in any case must inhale oxygen 16-18 times a minute in order for it to react in our cells with glucose, etc., and produce energy.

This is very similar to the combustion of a candle, or fire in general. You know that fire requires oxygen. What is fire? If you look at it from a chemical point of view, it is the rapid oxidation of certain substances with the release of energy. The same thing happens in the body, only there oxidation occurs more slowly than in a flame, and therefore your body is warm. That is, your cells continuously release energy, even when you sleep. Because when you sleep, your spirit is absent, it is in the astral plane, but your body continues to breathe, because without this breathing all biochemical processes will stop, and the life force that binds the spirit will break, and it will go into the spiritual world.

53:15

Vladimir: It is believed that milk and dairy products are a source of calcium, but studies have appeared that indicate the opposite. That in order to cope with the consequences of consuming dairy products, the body, on the contrary, pulls calcium from the bones in order to restore the acid-base balance in the body. It turns out that dairy products worsen the calcium situation. How is it really?

Irina : Calcium metabolism strongly depends not even on the type of products through which calcium enters the body, it depends, for example, on the presence of vitamins A, D, E in the body... That is, without them it will be poorly absorbed.

When it comes to dairy products, their consumption is natural in...moderate consumption. That is, if you do not eat only dairy products and with the rules that I said, then on the contrary, they are beneficial for the body, especially for the body of an elderly person, because They are a source of not only calcium, but also easily digestible protein.

For example, the same casein that is found in cow's milk. It is absorbed by the body by 88-90 percent. That is, it breaks down into amino acids, including essential ones, and then these amino acids become the basis for new cells.

As you know, the process of formation of new cells occurs

continuously in the body, because... There is continuous death, death, and autolysis of outdated cells in the body. Therefore, new ones must continually appear. This is a continuous process in the body.

The loss of calcium may not be from dairy products, in the bones, if we talk about bones, but from the fact that a person lacks movement, for example, he begins to lose calcium from the bones, because processes begin in the bones that remove calcium from them . To prevent this from happening, movement is necessary. For example, your earthly astronauts, who are in weightlessness for a long time, have this problem, etc. their body does not receive load, then calcium begins to leave the bones.

Well, or various hormonal disorders occur, that is, again with a lack of movement, and plus hormonal disorders, for example, with age-related changes in the body, can also cause a loss of calcium and, moreover, not only in women, as everyone knows, but also in men.

56:42

Vladimir: Which alien civilization gave people grains of various cereals and legumes simultaneously in different parts of the Earth? Is it true that plants could be created in this way: a meditating high embodied spirit swallowed a grain, all sorts of metamorphoses occurred with it in a state of meditation, and when it left the body naturally, it was another plant that produced an agricultural crop?

Irina : When I was studying the history of your planet in the bases of the Interstellar Union, I found information that when the Tumesoutians arrived, there were already plants here, well, in a different form. All I studied was that at the time of the creation of people and later, experiments were carried out with plants, that is, their genes were naturally changed so as to give, for example, greater weight and size of fruits, or greater yield.

As far as I read the information in the publicly available Interstellar Union, all plants were already formed by the time man was created. Those. natural evolution.

As for the second part of the question, about a person who passed a seed through himself, and which, without being destroyed by the digestive system, came back and gave a plant, I have not heard such a story, I have not studied it, but it is quite possible, because some plants, they spread in this way, passing through the digestive tissue, through the digestive organs of birds, fish, animals and humans. They can spread this way.

59:55

Vladimir: Modern genetics argues only about exactly how many common genes humans and chimpanzees have - 90%, 95% or 98%? There is no report of 55% of extraterrestrial origin, therefore, if aliens participated in the creation of man from a primate, then their genes should have fit in the range of 5-10%. Please comment.

Irina: In fact, chimpanzees and humans have common genes, but as for the fact that they are 90 percent or less, these are your scientists, studying humans, they see genes that are already familiar to them, because they did not study the genetics of these civilizations.

Therefore, they compare them with chimpanzees in this case, but the main argument proving the opposite relationship is that with so many supposedly identical genes of chimpanzees and humans, it is still not possible to obtain common offspring.

And secondly, study the issue that scientists still find foreign genes, or rather, gene fragments embedded in human DNA, but they usually call it junk DNA.

1:02:02

Vladimir: Judging by various studies (not only radioisotope analysis), 5 million years ago the Earth was not what you say. Please comment.

Irina : If scientists want to talk about radioisotope analysis and its indicators, they can arrange a joint conference with some specialist from the Interstellar Union, for example, on planetary geology.

Published May 13, 2020

Participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

MidgasKaus is a representative of the planet Esler, a biologist, psychologist and specialist in alien civilizations.

LiShioni is a representative of the planet Shimor, a specialist in the astral world and its interaction with the material world;

Vladimir Goldstein - journalist, Chicago, USA.

Karim is a guest.

#83 Live broadcast with contactee Irina Podzorova. Love, deja vu, karma, yeti, astral plane, black holes

https://blog.cassiopeia.center/lyubov-dezhavyu-karma-jeti-astral-chernye-dyry

https://www.youtube.com/watch?v=9Mba2aQ_1IU

Maxim: Can the soul of an animal incarnate into a human in its next incarnation?

Irina : No, the soul of a pet cannot be born as a human in its next incarnation, these are different types of souls.

4:35

Maxim: Did vampires exist?

Irina : These are mostly legends, but based on real events.

4:50

Maxim: Tell me, do our dead parents see and help us? And is it necessary to light candles?

In any case, you support your parents with mental images.

5:25

Maxim: Does your cat leave your body at night?

She also has a soul, but an animal soul, she can also leave the body and travel.

5:34

Maxim: Who are energy vampires?

Irina : These are organisms that can absorb people's energy, but we

give them this energy ourselves.

5:48

Maxim: Who hears us when reading a prayer?

Irina : Firstly, God hears us, he always hears us both when reading a prayer and when reading other words. He is always nearby, because he is everywhere and in everything.

6:07

Maxim: Are the Eslerites sleeping?

Irina : Yes, of course the Eslerites sleep, they are physical organisms.

6:33

Maxim: Is blood transfusion dangerous?

Irina : From the point of view of infections, yes, it can be dangerous if not checked.

6:42

Maxim: When is the next supernova explosion in our galaxy?

Irina : The future has many options, it is very difficult to make such forecasts.

6:52

Maxim: If there are additives, do the prayers reach the creator? Or are

they intercepted by the dark ones?

Irina : Those dark ones you call cannot intercept any prayer, because God is everywhere, he is omnipresent and omnipotent.

7:10

Maxim: What can you say about the Shaman's trip to Moscow?

You can't go against the authorities so openly. And publicly. Our government will never give the opportunity to carry out such actions, much less gather people and processions. This is a very big mistake of the Shaman, that he directly publicly went against the authorities, you need to go through love.

7:38

Maxim: What is God's name?

Irina : He has billions of names, any name, even the name God itself, limits him, because it is more than the entire universe. The entire visible part of the universe is only an infinitesimal part of its energy.

8:05

Maxim: What is karma and karmic knots?

Irina : Karma is the tasks that you came to solve in this incarnation. Relatively speaking, this is the book where all your actions and their consequences in previous incarnations are recorded; do not forget that karma is formed every second of your life, in accordance with your choices. Karmic knots are those lessons that you did not go through in your past or current incarnation. In the current incarnation, karmic nodes are also formed.

9:10

Maxim: Is it possible to kill animals?

Irina : Animals can be killed because they have an animal soul. The immortal spirit does not incarnate in animals, therefore taking the life of an animal is not a crime or sin before God, such as killing a body in which a rational spirit is embodied.

9:41

Maxim: Are you planning online classes, who do you take on the team?

Irina : Yes, we plan classes online, we take everyone into the team. If you are a contactor, please contact us, we will check and hire you to join the team, or teach you if this is possible, and this is what you want as a contactor.

10:07

Maxim: How are things going with Kirchiton?

Irina : Kirchiton is doing well, we'll fly with him when he appoints a contact.

10:25

Maxim: Can cats and dogs be killed?

Irina : Cats and dogs are no different from cows and sheep, they are also animals with souls. There are countries where they eat cat and dog meat. And by the way, the majority of Buddhists live there.

10:54

Maxim: How do other civilizations feel about cosmoenergy?

Irina : They are normal, other civilizations send energies to form frequencies that are included in the channels of cosmic energy.

11:09

Maxim: Mid, how do you maintain your physical body at the base if you are in the astral plane all the time?

Irina : Well, he is not in the astral all the time. He returns to his body. If we sum up all the trips to contactees, then this is 5-6 hours a day on earth, the rest of the time he is in his physical body.

11:48

Maxim: What creatures do sleepers contact during regressive hypnosis?

Irina : With a variety of creatures, both with plasmoids and with their curators from humanoid races, and with the spiritual world, and with their Higher Self.

12:12

Maxim: Are there energy vampires in people, and how to deal with them?

Irina : We need to fight not with people, but with our outflow of energy, which we charge with negative emotions, we need to fight with the very condemnation of people and not call them such words as vampires. Condemnation, anger, resentment provoke us to drain energy, which vampires then absorb.

12:58

Maxim: Who are mermaids?

Irina : This is the name of one of the types of plasmoid civilizations that are responsible for the element of water on Earth.

13:13

Maxim: The cause of cancer?

Irina : I have an article on VK. Briefly: the formation of microorganisms, fungi, parasites and other microflora, including mutations of one's own cells, arise on the basis of long-term negative emotions in the person himself - fear, resentment, envy, jealousy, i.e. everything that is low vibration.

14:09

Maxim: What methods of prevention and treatment of viral infections does your civilization use?

Irina : Increasing immunity, in any case, a virus, before entering a cell, it must pick up a key, an antigen, its own protein that will let it in. And if the immune system is adjusted, it will not let him in. On Esler, strengthening the immune system comes through strengthening the spirit, through strengthening the connection of the spirit with the Higher Self. Then your cells will not let in pathogenic flora, which will destroy the body.

14:50

Maxim: Is the power of faith capable of healing?

Irina : Yes, of course. The power of faith can cause illness and heal. If you believe that you will get sick, or that you will get sick from some action of a person, then you can really get sick. In the same way with healing, if you believe that some person will cure you, then this faith will help you recover, faith will bring your energy to such a state that your physical body will begin to recover.

15:33

Maxim: What is sleepwalking?

Irina : This is a human condition when, when the astral body leaves the physical, during sleep, the physical body does not become immobilized, it does not experience sleep paralysis from the action of sleep hormones that are secreted in the pituitary gland. The physical body either moves partially in sleep, or it gets up without the astral body and repeats the movements of the astral body that acts in the dream. The physical body cannot completely repeat the actions of the astral body, but, for example, if the astral body flies or passes through walls, then the physical body approaches the wall and tries to pass through it. Sleepwalking occurs due to a malfunction of the sleep paralysis mechanism.

16:40

Maxim: What are places of power and where are they on Earth?

Irina : Places of power, as far as MidgasKaus knows, are places where people observed any changes in the energy background or their own state, or often in these places there were contacts with aliens, plasmoids. Or in these places in ancient times there were temples of pagan pre-Christian religions. But if you look at these places from an energetic point of view, then this could be a large plasmoid portal, or a nearby alien base, or the place of residence of an ancient person - a hero, a saint, a spiritual teacher, to whom there was a pilgrimage, but later people forgot about it. But the place remained shrouded in energy.

17:47

Maxim: Are there secret space programs?

Irina : If they are secret, then they are unknown to us. The scientists who work with us are MC scientists; they are not representatives of the Galactic Security Service, who know exactly the secrets of the MC. Scientists are not told this; they have other tasks.

18:22

Maxim: Are there Interstellar Union bases in Belarus?

Irina : There are three bases. One is Burkhad, the second is Tikht, the third is Laori from the Pleiades system - they are not from the MS, but they were allowed to exist there.

18:49

Maxim: Who built the Chinese Wall and why?

Irina : They built tribes that lived there, so that one tribe would not go to war against another, for protection. These are the tribes before the Chinese. There were many tribes in that territory.

19:33

Maxim: How to learn to go into the astral plane in order to contact intelligent beings?

Irina : In fact, it's easy to go into the astral plane, we already do it when we fall asleep. The main thing is to learn to go out there consciously in order to remember these contacts; this happens in a dream. A couple of tips: astral travel is possible for children, teenagers and those adults who are not burdened with worries about the material

world. Whoever takes everything lightly, does not build mental structures, plans for the future, he does not waste his energy. Because maintaining consciousness in the astral body requires energy. If this vital energy is spent on creating plans, on physical work or other physical entertainment, pleasure, etc. then it may not remain on the astral plane. A person must be calm, balanced, free from stress and conflicts in the family and at work, so that energy does not flow there. He must believe that the astral plane is possible. He must believe that he will get there. Even if it didn't work out several times, he shouldn't stop, he needs to learn. When a child fails to write or read something, he doesn't stop doing it, he learns, and it's the same with adults. Don't expect it too much. During the exercises that are on the Internet, type in exercises for astral travel, it's all there. You don't need to expect too much, relax physically and, more importantly, mentally, and everything will happen by itself, it's an instinct.

21:54

Maxim: Is it possible to live in our world without religion?

It depends on what you call religion. If without rituals, without certain actions that are prescribed by religion, then yes, it is possible. Many millions of atheists or agnostics live precisely without religion in this understanding. And if you don't have faith in something, then strictly speaking, it's impossible. Because even atheists have a religion - that there is no God. This is their own kind of religion, because they cannot prove it, they don't know how the universe came into being. The Big Bang is also not proven, this is also a belief. If religion is perceived as belief in something, then a person must believe, he has such an instinct, without faith he simply will not see the point, why then live if there is no goal.

23:12

Maxim: Is the land a farm for collecting gavvah?

Irina : I understand the term "gawwah", some UFOlogists told me that this is some kind of negative energy. There is a theory among UFOlogists that aliens arrive to collect gavvaha. If you mean low

vibrational plasmoids that actually collect low vibrational life energy from people. Maybe some parasitic civilizations call the Earth a farm for collecting gavvaha, but even if they feel and call the Earth that way, then not all people are their donors, but only those who are connected to them by their vibrations, and even those who are connected to them , they themselves transfer energy of their own free will, as soon as they raise their vibrations, they will cease to be cash cows for these entities.

24:10

Maxim: Recently a UFO was shot down in Brazil, comment

Irina : The MS did not notify about this incident. You need to find out, make inquiries. We are not notified of all incidents. You need to submit a request to MS.

25:38

Maxim: What civilization lives on the planet Antares?

Irina : This is not a planet, if you mean the celestial body Antares, then it is a star, it is also called Alpha Scorpii, dense material entities do not live there. Those civilizations that live there are subtle, and some of them are just parasitic low-vibration worlds. For them, their world is dense, so they may well call their world a planet.

26:59

Maxim: What is “Deja vu” and why does it occur?

Irina : This is a special state of human consciousness that arises for various reasons, but the most common is when a person’s mind has the function of comparing similar things and situations. The most common reason is when a person has lived through one situation and forgotten about it, and when he encounters a similar situation, he feels that it happened, but does not remember where. The second reason

he can see this in a dream, there people often form thoughts that begin to form the desired future, so to speak, to dream. Sometimes this future materializes. What a person saw in a dream, a person can forget, and when this future comes, he no longer remembers where it was. Less often, this is an analogy with what a person read in a book or film. Memories from a past life are even rarer.

28:36

Maxim: Is it possible to practice exorcism?

Irina : If it is simply an expulsion without explanation, if it is an expulsion of an entity from a person by creating incompatible vibrations temporarily in his biofield without an explanation of where this entity came from and what it wants, exorcism will not lead to a positive result or will lead to a temporary one. It is necessary to explain to the person why he became the object of attention for this particular entity, how he is similar to it. Exorcism, by analogy with medicine, is an auxiliary method if a person is explained how he attracted this entity by lowering vibrations. And if he begins to raise his vibrations and it doesn't work out for him, because the essence, for example, is in the way, then you can help him, but not do it for him. Before the exorcism ritual, you must try to talk with this entity and find a harmonious way of contact.

30:07

Maxim: Who is Bigfoot?

Irina : This is a representative of the earthly race, which, unlike other peoples of the Earth, did not follow the technocratic path of development, but remained in fusion with nature. They live in the mountains, caves, and deep forests, just as their ancestors lived. Because of their merging with nature, they feel and see much more than those who are developing in our civilization. They do not have an education system that is aimed at understanding the material world and building a rigid scheme in their minds that the material world is primary, etc. Thanks to the lack of exposure to our civilization since childhood, a representative of the Bigfoot people simply believes in

what is impossible for us. And thanks to this faith, they perform wonderful phenomena for us.

31:32

Maxim: What is Merkabah and is it dangerous for humans?

Irina : Merkabah is a system of energy healing and restoration of a person, all structures of his energy field and restoration of the probabilistic lines of his life so that he tunes in to more positive vibrations. It affects the spiritual world of a person, the connection between a person and his mentors from the spiritual world. This system originates from contacts with representatives of the planet Burhad (Pikran). This is their energy system, similar to cosmoenergetics, but the goal and objectives are different. She is not dangerous, she restores a person.

32:47

Maxim: Did Jesus have children?

Irina : No, there were no physical children. In any case, when he reached the age of puberty, he became a teacher. He was a contactee and knew his future perfectly well, all its options. And he knew about his upcoming execution from the very beginning. For this reason, he did not start a family and children, because he knew that he would leave them at a young age. And in the ancient world it was difficult for a widow with children to survive. For this reason, he did not enter into close relationships at all.

33:58

Maxim: Are there civilizations that have knowledge about healing people?

Irina : All civilizations have knowledge about healing people, even our own. The question is, what do we call healing? If there is complete

restoration of health and absence of disease, then it depends on the person who heals. The main thing is to give him knowledge about disease prevention. Prevention is better than treatment. It is easier to preserve the integrity of the body than to later restore the destroyed one.

35:25

Maxim: Will there be spiritual centers in other countries?

Yes, there will be spiritual centers in other countries, but first it needs to be done in Voronezh.

35:31

Maxim: Was the Antichrist born?

Irina : We don't know. But according to the latest data, the Antichrist is more of a symbol, and there may be many of them. Antichrist is the force that goes against Christ in the human soul.

35:57

Maxim: What is the meaning of a cosmic name?

Irina : If you are talking about the name of the Higher Self, the highest essence. There is a proper name, sometimes it coincides with the name of a person, sometimes it has the name of another person, gender, in a different language. Most often this has to do with past lives. Those incarnations that a person does not remember. But the Higher Self's memory is not blocked, since it is in the spiritual world and continues to call itself by this name.

36:48

Maxim: Are there alien bases in Lithuania? And where are they?

Irina : There are in the Baltic Sea, but not the territory of Lithuania. Underwater bases in the sea, in the north.

37:11

Maxim: What is Nibiru?

Irina : Various cosmic bodies are called by this name. Nibiru is a planet now called Phaeton, which was destroyed by the Selbetians 12,000 years ago. Now this is the name of a large base, which has many kilometers in diameter and is spherical in shape. Inside this ball live aliens, representatives of the Sirius civilization. Their planet was also destroyed during that war, and some of them live on this base. Ashtar Sheran and his companions belong to this civilization. Nibiru is located not far from the solar system, the distance is different at different times. Approximately 30-35 astronomical units (1 AU is the distance from the Earth to the Sun = 150 million km) from the boundaries of the Solar system. The surface of the base itself is dark, does not emit light or other radiation, so that it cannot be detected by our means, so that scientists do not tell our people that aliens are watching us, etc. Because this will already be proof. In order not to reveal its presence, because earthly technology can already send a rocket there, albeit without people. Earthling rockets, without people, with cameras, they were already leaving the solar system.

39:58

Maxim: What is the best way to reveal your love?

Irina : Love cannot be revealed without its practical implementation in favor of those people who are close to you. The first thing you need to do is to understand that those people who are directly next to you, your loved ones, are the best teachers of love. You can train on them how to do it. To love them with active, practical and unconditional love. It is often called sacrificial, because unconditional does not require anything in return, and this, to some extent, is a sacrifice of one’s

energy and time. But only such actions can develop unconditional love and raise your vibrations. You must admit that this is necessary for you and answer the question: “Why do you need this?” The answer will be simple - God gave you life unconditionally. He gives you the light and warmth of the sun, the opportunity to live, and gave the Earth for growing plants and animals. For this he does not require any payment or gratitude. Just like his children, being in the material world, if you want to be like God, i.e. have the highest vibrations, you must develop this love within yourself. How to do it? The simplest method is to ask yourself: “How would I like to be loved, what would I need?” And give it to your loved ones without selfishness, certainly without expecting anything in return, just as God does not expect anything from us. Don’t even expect gratitude, no matter what people do.

42:54

Maxim: How do mantras work?

Irina : Mantras work on those who believe in them. What if they pronounce a mantra and change their energy, increase their vibrations, activate the energy center, attract a certain entity, then the utterance of this mantra, the sounds themselves trigger an energy reaction that forms a thought form, and this thought form already performs the necessary actions either on your energy structure or in astral

43:55

Maxim: What are Black holes in the galaxy?

Irina : A black hole is an accumulation of gravitational energy. This is a former star, which usually had a mass of more than two times the mass of your sun, and all types of energies of the first and second levels came out of the atoms of this star, only gravitational energy remained. Therefore, gravitational energy compresses itself into a set of particles and gravitational energies. Due to this, it has superheaviness and superdensity. That is, if you look from the position of our world, there is nothing there except gravitational energy that envelops the remains of the atoms that formed this star. From the perspective of a fine-energy plasmoid world, in the center of such

formations there are portals to other black holes, which are even located in other galaxies.

45:29

Maxim: Is it possible to cleanse and raise low vibrational spirits?

Irina : You can't raise them without their will. You can wish it on them. If you see a low-vibration disembodied spirit in front of you - a demon, you can sincerely wish him with all your heart to rise in vibrations and feel the light of love that he is deprived of. Because he himself lowered his vibrations and became a demon. Something happened to him in one of his incarnations, for example, and he became one because he did not complete his lesson. You can wish him in the next incarnation, demons also incarnate, they are also waiting for their turn - to get out of this state. Having waited their turn, they will incarnate in those worlds that their mentors will select for them; these are angels of the 22nd level.

No matter how the demon behaves, you need to understand that he feels bad without light, without the love that you experience if you are at higher vibrations than him. You can recognize in him the same brother in God, only he, unlike you, does not feel it. From a distance, one can say that he is spiritually sick with demonism. You can direct your light of love to him, fill him with it and sincerely wish to accept him. But he can refuse and leave. On the contrary, it will be like protection for you, but he will not be able to be in your company, he will feel bad from your vibrations.

49:25

Maxim: Is it possible to treat autism?

Irina : You can not only treat, but you can adapt this child who communicates with plasmoid civilizations for some reason. Therefore, it is difficult for him to learn to speak the language of people or he is not interested in it. We can adapt it to our world. This must be done individually. They have similar energy.

50:19

Maxim: Were dinosaurs intelligent 65 million years ago?

Irina : By the time the Tumesoutians arrived, according to MS, it was 5 million years ago, there were various animals, including dinosaurs and primates. But only animal souls incarnated there; there were no intelligent species. By intelligent species we mean those in which a rational spirit, not an animal, is embodied. Another 2 million years were given to the natural evolution of these primates and, without waiting, 3 million years ago they began to change the genotype, creating your bodies so that a rational spirit, just like ours, could be embodied in them.

51:28

Maxim: Where are the Tumesout people, why don't they want to get in touch?

Irina : As soon as there is a request for Tumesout people. You need to invite them separately if the question is directed specifically at them. We need to formulate a request, because they will ask what they are needed for if we have our own curator.

51:53

Maxim: What are the causes of diabetes and can it be treated?

Irina : If we talk about type 1 diabetes, then this is a genetic failure, a mini mutation in DNA, as a result of which the body stops producing insulin in the required volume for the absorption of glucose by cells. There are types 1 and 2 hereditary diabetes. Then you need to ask why the spirit chose this particular body, what lesson it decided to take. Hereditary and congenital diseases were reported to this spirit by mentors before it entered this body. He chose this lesson himself, for his own reason. As for acquired forms of diabetes, there are a large number of factors, the main ones being: stress – lowering one's vibrations. The emphasis is on the fact that a person may have long-

term depression and does not enjoy life. Then his spirit artificially raises the level of glucose in the blood and artificially lowers the level of insulin, and makes the cells insensitive to this insulin so that glucose remains in the blood longer. This happens in a chain reaction, the spirit affects the body. There is no pleasure in life, which means there is more sugar in the blood. This is how the spirit sometimes understands. Another reason is infections, chronic pancreatitis, damage by parasites, giardiasis of the pancreas, damage by various types of trematodes: opisthorchiasis, clonorchiasis and fasciola. They can all live not only in the gallbladder, but also in the pancreas, and infect the very cells that produce insulin. Also associated factors: intoxication with alcohol, drugs and other harmful substances from food. Which disable the production of insulin or pancreatic cells make insulin molecules defective, unable to penetrate the cell and carry glucose there. The point is, to cure diabetes, you need to completely change the entire system of glucose and fat metabolism in the liver and pancreas. At your level of development, you can maintain your condition for a long time with herbs and special medications. Naturally, given the psychological mood of the person himself, he learns to get out of depression, etc. In order to be completely healed from any disease, it must come from the spiritual world, energy that will instantly heal the cells of the body. And in order to call upon it, you must completely believe in it. This healing must be consistent with your embodiment task. First you need to ask the Higher Self, why was this necessary? What would have happened to you if you had not gotten sick? What vibrations would there be? Perhaps your mentors are protecting you from something more terrible; different options are possible.

Maxim: In a mental image, diabetes mellitus is a lack of enjoyment of life, that is, a lack of enjoyment of this life.

57:48

Maxim: Was there a proto-language of earthlings?

Irina : There was a proto-language, but it was not united. Each part of the Earth had a slightly different proto-language. In most regions it was syllabic, they spoke in syllables. This is the beginning of the formation of language. The syllables had an everyday meaning and an ancient one, which shamans and sorcerers used. Where each syllable was

given a meaning that no one knew except the priests and their students. The plasmoids have already given me variants of the meanings of the syllables of the proto-languages. I counted 5 or 6 options. We need to choose one, something in between, and show people what the plasmoids think about the proto-language and the meaning of the syllables.

59:14

Maxim: How can you independently get in touch with your curators? Is it possible?

Irina : For your part, if you know for sure that there are definitely curators. But you cannot contact them yourself, you do not hear him. You need to increase your sensitivity. There are various exercises for this: going to the astral plane, meditation, reading the mood - “I am the universe” and asking it mentally. This is necessarily the practice of communicating with your Higher Self using the methods that were given earlier. And mentally ask yourself in this state of relaxation. And when you next go out into communication with your Higher Self, ask: “Higher Self, can you lead me to my curators. I ask you to connect me with them.”

And then watch what happens. If you are energetically ready, if the Higher Self believes that this contact will not harm you psychologically, energetically, or emotionally. Then this contact will happen.

1:01:05

Maxim: Which civilization oversees Reiki energies? Is it dangerous?

Irina : 11 different plasmoid civilizations. They gather, collect their energies in order to heal people with different energy vibrations. Reiki is an intuitive channel, there are many types of these channels. And in each channel it looks like cosmoenergetics, they simply called it Reiki, in this channel there are many frequencies that come from different plasmoid civilizations and several can come from one civilization. It is not dangerous, just like cosmoenergetics. It all depends on the

attitude, if a person begins to exalt this into a cult, leaves ordinary life, lives only Reiki and imposes Reiki on everyone, and gets angry and swears at those who do not understand him. Of course, this is dangerous, but it is not Reiki that is dangerous, but the person himself. Reiki has nothing to do with it.

1:02:21

Maxim: What is speaking in tongues in churches?

Irina : Most often this is contact with plasmoids, this is semi-conscious contact with plasmoids. When plasmoids come into contact with a person at the moment of their emotional upsurge, that is, in a state of positive religious emotional upsurge, they glorify and love God. On this emotional channel, the plasmoids that this channel approaches are embedded in the channel and begin to speak through it. And since this is not a coordinated contact with his mind. It turns out that their language is adapted, taking into account the language of the contactee itself, a set of sounds is obtained. Because it is difficult for plasmoids to speak their own language, they can speak in the language of electromagnetic waves. There are also contacts in other languages with the spiritual world, but they will look the same, only maybe a little more orderly. That is, this language can be somehow understood and translated, but with plasmoids this is more difficult to do. Hundreds of plasmoid civilizations.

1:04:16

Maxim: How long can a person really live in this body? Why do we live so little? How can you extend your life?

Irina : As much as the spirit itself chose before incarnation, but you can increase it by performing the task of incarnation well, but not for long. It is also possible to extend it for a long time, but the state of your body on Earth assumes a life of up to 250-300 years. In your current state. This is our reserve. If this is a natural death, then the soul itself chooses this, if this is not an interrupted life. If the spirit decides to live up to 300 years, and the mentors agree that it is in this state that it fulfills its purpose, will it be able to fulfill its purpose or will it stay with

relatives and pray to the Lord to take it away quickly so that it does not interfere with loved ones, these are different things.

Participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan - head of the International Center for Spiritual Development "Cassiopeia";

MidgasKaus is a representative of the planet Esler, a biologist, psychologist and specialist in alien civilizations.

#84 Conceiving a child, pregnancy, childbirth, pain, childhood, maternal instinct, parenting, abortion

https://blog.cassiopeia.center/zachatie-rebenka-beremennost-rody-bol-detstvo

https://www.youtube.com/watch?v=J7v7ChmucYs

00:32 Introduction of participants.

Irina: Hello, dear friends! My name is Irina Podzorova, I am a contactor with extraterrestrial civilizations. Today with me is my curator from the planet Esler - MidgasKaus - a biologist, psychologist and specialist in alien civilizations. Today we will have a very interesting topic: “Childhood, pregnancy and childbirth.” Introduce yourself as well.

Irina A.: My name is Irina Arsenyeva. I am a practical psychologist. I live in the Novosibirsk region, practice and work. And now we have created a course “Maternal School” from conception to 3 years, I will teach. We want to give precisely in-depth training, practical knowledge about motherhood, including practical psychology, physiology, and esotericism. We want mom to be the leader. We get different information from different teachers, but I would like to get answers from Mead here to questions of interest.

Irina: Mead clarifies: “So that I answer in relation to the physiology of an earthly woman?”

Irina A.: Yes, exactly.

Irina: Okay. We have studied this issue.

02:10 When does the intelligent Spirit come when a child is conceived into the material world?

Irina A.: First question: when does the intelligent Spirit come when conceiving a child?

Irina: Do you mean comes into the material world?

Irina A.: Yes, to the material world.

Irina: He says when mentors show and choose parents, and the Spirit agrees with these parents and says: “Yes, I want to go with them, let’s say, on Earth.” He can come earlier, before conception, simply observe together with mentors, with guides, that is, with Angels. Angels - guides from the 21st level of the World of disembodied spirits

guide the Spirit, which incarnates into the material world, endowing it with the vital force necessary to connect with the body. This life force is taken from Divine sources. He comes to incarnation at the moment when conception occurs. That is, we all witnessed the contact between mom and dad. We stood side by side in the Spirit and waited for the male reproductive cell to unite with the female reproductive cell. The spirit comes closer to the woman and introduces its life force into the first cell of its future organism. But he himself cannot yet enter there, because it has not developed to the level where it can accommodate him within itself. The rest of the time before the Spirit enters the body, it is next to the mother. He can go to the Astral. Access to the world of disembodied spirits is still open. Sometimes he comes to his mother, sometimes he goes there. And approximately at the seventh week of pregnancy of an earthling, the Spirit enters the developing body. Why exactly in the seventh week? Because the rest of the time, and it is quite long, will be needed to adapt the Spirit to this body. Correctly tune your nervous system, tune your circulatory system, your cardiovascular system to yourself, to your vibrations. He spends the rest of the time in this body, but, naturally, he can leave it in a dream to the Astral. Access to the Spiritual World and the world of disembodied spirits is still not blocked.

05:32 How does the soul of a baby realize itself in the womb of its mother?

Irina A.: How does the soul of a baby realize itself in the womb of its mother? How does she feel, does she understand what is happening around?

Irina: If she is in the body in the mother's womb, then practically not yet. The sense organs are not yet formed. Almost until birth, when the body's receptors begin to form, being in the body, when the fetus is awake, it can hear sounds, for example. This is closer to 5-6 months of pregnancy. Through the receptors of the body, the soul can hear sounds around, feel its body, where are the hands, where are the legs. To feel that she is floating, as it were, in such a bath. She can open her eyes, but all she sees is a reddish surface that moves. But he doesn't understand where he is when he's in the body. He just feels like he's somewhere alive. And he hears the rhythm of the mother's heart, and how the blood flows through the vessels of the uterus, through the uterine artery. Place the stethoscope, he says, on the lower abdomen and listen to what happens there. A woman's body,

her intestines, for example, creates very strong sounds. But he does not understand the nature of these sounds. He is simply in a state of relaxation, adapting to this body. He feels good about his body, he can feel himself. Even put a finger in your mouth. He is already beginning the process of understanding the world around him. He sleeps most of the day, and in his sleep the astral body of this Spirit also comes out. It may even happen that the mother is sleeping and her child is sleeping, and they meet in the Astral and walk and travel together.

He is able to hear music, and these rhythmic musical sounds calm him. Because by nature they are aimed at inducing the pleasure hormone. And, as you know, when a child is born and becomes an adult, if you turn on the music that his mother often listened to, which he had not heard anywhere else, even as a baby, then even if it does not seem vaguely familiar, he will like it.

09:39 When a mother talks to her baby, does he hear her?

Irina A.: Mom, when she talks to the baby, does he hear that his mother is talking to him?

Irina: Yes, she hears her voice. But as for the meaning of the words, if the Spirit is not in the body, but stands nearby, then he will understand. And through the body he is just beginning to collect his first neural connections.

10:08 When does maternal instinct kick in? Father's parental instinct.

Irina A.: When and how does the maternal instinct turn on during the first natural birth?

Irina: In general, the maternal instinct should turn on much earlier. All forms of behavior of parents in the family, the parents of a girl, should help this instinct to turn on in childhood. The earthly manifestation of this instinct in you is when children play at being their mother. These are dolls for you. When they take care of younger brothers and sisters, when they like to imitate feeding a child. Even five- and six-year-old

girls like to put the doll to their chest. But it's not just because they repeat it, they actually have these feelings. And this needs to be encouraged so that the maternal instinct can form correctly and then manifest itself correctly.

But you can slow down the emergence of this instinct if in the family or on television, or anywhere else, disparaging conversations about children or the role of the mother are allowed. It happens that the maternal instinct is not formed if a man, the child's father or some other family member, humiliates the mother in front of the girl. This can also later cause a subconscious fear that she will have a repetition of this pain when she becomes a mother. A woman should not be humiliated not only physically, but even morally. You must treat her with respect. Here at Esler, women are treated with great respect for the simple reason that she is the source of birth life in this world, including for men. Are you saying I want to go to Esler?

Irina A.: Exactly! We also try to talk about the fact that you need to be careful with pregnant women, so that men generally treat women well.

Irina: Normally, this instinct manifests itself in early childhood. It can manifest itself not only by playing with toys, but also by caring for animals, birds, even insects. I want to say, the more a child communicates with living nature, not with pictures, but with real insects, animals, birds, and brings them food and water himself, the more he will develop the instinct of caring for the weak, one of the forms of which is it's maternal instinct.

Irina A.: Thank you. Good tip.

Irina: Of course, you need to teach him to take care of animals, younger brothers and sisters, or even other people's children, younger friends, without any violence. Simply by showing by example that it makes them feel good, they like it. Usually children perceive goodness and good deeds very easily and naturally begin to repeat them. And you don't even need to force them, you just don't need to disturb them.

I would also like to add that normally in adolescence, a manifestation of maternal instinct will be that a girl who has already started puberty

likes to communicate with small children. When she wants to hug them, cuddle them, or even play. Many teenage girls like to spin children around, toss them, touch their bodies in different ways, or simply lift them, hold them in their arms, carry them - this is already a manifestation. This should not be prohibited, it should be encouraged. This is a normal formation of this instinct - the desire to be in their company. Naturally, with the right upbringing and the right attitude towards this girl, mothers and fathers need to remember that your daughter in the family is the future mother. And think accordingly not only about yourself and her, but also about her future children. What you put into it now, what concepts and what skills in life, it will later give to your grandchildren. We also need to think about the future.

Irina A.: Thank you!

Irina: And I also want to say that dad also manifests not a paternal or maternal instinct, but simply a general parental instinct. It manifests itself in dad no less than in mom. On Earth it is not so noticeable, but it still manifests itself. And a boy can also be taught this, using the same method as girls.

Irina A.: Thank you. They wouldn’t even think that it’s possible to raise a man using exactly the same methods.

Irina: He may not want to play with dolls, although there are boys who play. Caring for animals, for the weak, for the same girls. Show masculine forms of behavior, but in relation to the protection of younger ones, and so on.

Irina A.: Defender's instinct, yes?

Irina: Protective instinct and helping instinct. Because the role of the father in education is also very important. He, too, can quite easily take the child and caress it. This is considered normal. Just like mom. A father can show no less tenderness towards his child.

17:21 The effect of caesarean section on the child.

Irina A.: In our country, approximately 50% of all pregnancies end in a caesarean section. How does a caesarean section affect the psyche and health of the baby during childbirth and later in life? What does a baby lose during a caesarean section?

Irina: A caesarean section, he now says, has strict indications. Simply doing this is dangerous, first of all, not even for the child, but for the woman herself. Firstly, this will lengthen her rehabilitation period by 6-7 times, and she will not be able to take care of the baby normally, but even of herself. The reduction in pain that is possible during this caesarean section under anesthesia and so on is more than compensated for by the pain afterwards. They still hurt. The risk of bleeding, the risk of amniotic fluid entering the blood vessels, the risk of formation of fat globules from it, even embolism. There are similar risks in the first few days. And then, when all this has already passed normally, the risk of inflammatory diseases increases, the risk of complications of the second pregnancy increases, up to miscarriage, even to uterine rupture, if the place that was cut was not sufficiently regenerated. So all this is dangerous, first of all, for the mother herself. It will be very painful later. And if there were strict indications and the impossibility of giving birth for various reasons, then, yes, this is indeed justified. And for a child, the first danger is that he does not gradually enter the air environment. When he is in his mother's womb, the water creates pressure, including on his head. And when it passes through the birth canal, it gradually approaches the atmosphere and the pressure equalizes. And if he is pulled out immediately, the following may happen to him: the internal pressure in the skull and brain vessels will exceed the external atmospheric pressure, and if the vessels are weak, a microhemorrhage will occur in the brain. This is the first. Secondly, the mucus that should be expelled from the respiratory tract is not squeezed out. It can remain there and then provoke allergic diseases, that is, the child’s sensitivity to all sorts of diseases and infections of the respiratory system. And fear. When he is born, it is also frightening. It hurts, but still he gradually adapts to this situation, because during childbirth there is a rather long period of adaptation. And if he is immediately pulled out into the light, and there are people standing around, then this fear can be deposited in his memory and he can dream about it for a long time. Then, when he is already 3-4 years old, he will dream of it not in the form that happened, but in the form in which he perceived it: as if from a warm and cozy place, where it was good, they grab him with cold huge hands and pull out some monsters , beings he doesn't know. Therefore, there must be strict indications for caesarean section. It's better not to do this. This will harm both mother

and child.

22:44 The moment of the birth of the child.

Irina A.: Baby - he's getting ready, he knows when to go out?

Irina: The spirit knows him. But not in the body, of course. Even if he was sleeping and his Spirit went out into the Astral, but at the first sudden movements that can collapse the astral body, he usually returns.

23:17 Maternity instinct during caesarean section.

Irina A.: Thank you. Next question. Is the maternal instinct activated, and how, if during the first pregnancy, a caesarean section is performed?

Irina: As I already said, actually, it should turn on much earlier. If this did not happen either in childhood or adolescence, I think that even with natural childbirth some time must pass before the woman gets used to it. It depends on the process of childbirth, on the attitude towards the man - the father of the child, on the social situation in the family and in its environment. Sometimes such a woman experiences hidden resentment, anger towards the child who caused her pain while passing through the birth canal. To prevent this from happening, proper education is necessary. In our family and even at school, little girls begin to be told that they are future mothers and how it all happens. But for some reason you don't have this. I myself am surprised why your school curriculum will not introduce a special subject for at least 6-7 grades, "Fundamentals of Family Life," for example. Including talking about childbirth and how to prepare for it. These are the most necessary items for us. Much more important than algebra. It will be useful to maybe 4-5 girls out of 100. And the basics of family life, the birth and care of a child, the psychology of relationships with a husband will be useful to probably 90 out of 100 for sure.

25:33 Childbirth and pain. How can a woman remove fear and

pain during natural childbirth without the use of anesthesia?

Irina A.: Okay, thank you. How can a woman herself best remove fear and pain during natural childbirth without the use of anesthesia?

Irina: He says: Here you go - this is again a question of education. What a woman experiences during childbirth is only 30%-40% of the pain that is caused during childbirth. Everything else - 60%-70% - is her fear. Reluctance and general non-acceptance of this process, the desire to quickly free oneself from the burden. The first thing I recommend here is psychological and physical relaxation. The correct attitude towards this process, which, as I have already said, is formed in childhood. But since you don't have such a subject at school, then you, mothers and fathers, take the future of your daughters into your own hands. When she is about 13-14 years old, usually girls understand at this age, be sure to tell her (usually her mother should tell her how she gave birth to her) how she was born. Usually all girls are interested in this at this age, and they don't know who to ask. They contact the media or friends, but they do not receive the exact information they need. Be sure to talk to your daughter and tell her how she herself came into the world. Don't deceive her, don't say that you weren't hurt, and so on. Be sure to say that yes, there will be pain, but it will not be so strong if you take it calmly, relax, and directly show how to breathe from the lower abdomen. In general, it is useful for all people to breathe from the lower abdomen without raising their shoulders. This way the body relaxes better. Be sure to show your generally accepted relaxation systems. Show her illustrations of what happens during labor, each stage. Let mom do it in this form, saying, when I gave birth to you, it was like this and like this, showing in pictures. The first thing a woman is afraid of, especially when she gives birth for the first time, is the unknown. It happens that she simply listens to the stories of other women - how terrible it was, and tells herself that she will not stand it, will go crazy, bleed, and no one will help her. Fears begin. And if she has fears, they block, firstly, the release of pain-relieving hormones that should be released. This is provided by your nature and your instincts. And secondly, any, even small, fear provokes a surge of adrenaline. Adrenaline constricts blood vessels, tightens the muscles even more and lengthens the period of labor and greatly increases pain. Even a small injection in a moment of fear is perceived more painfully. Explain that your greatest enemy is fear, and your greatest friend is relaxation. Teach her what periods of childbirth are, how it all goes. Tell them that when you feel pain for a period of time, then this pain will go away and you just relax. And it's

very good to try to get in touch with the child at this moment. Mentally calm him down. Don't think only about yourself. Tell me that, unlike a child, you are an adult, you understand what is happening, but a child is very small, he is also in pain, uncomfortable, and unlike you, he does not know what is happening. Calm him mentally, and he will hear you through his Spirit. Call him, invite him into this world, say:"I'm waiting for you". This will strengthen the maternal instinct, and will calm her down, attuning her to the fact that childbirth is a natural process. This is not torment, this is not a disease. This is a natural process, and pain is a path that cannot be avoided for objective reasons. Explain that nothing will happen to her, that everything will be fine with her, that if something happens you will be there. It is very useful for a relative to be present at the birth. If dad doesn't want to, although ideally it would be better if it were dad. Mom can also be present. Of course, if the mother treats her daughter normally in this state. If she does not interfere with the medical staff, and she herself is not even more frightened of her daughter. Mom has already gone through this, but it happens that the pain and tears of her daughter’s suffering cause a nervous reaction in the mother if she is a very vulnerable person. In general, it is very useful for a relative to be present who will support. Because the presence of a loved one or friend, in addition to the hospital staff, will calm you down with its energy. Well, you - the parents of this girl who is giving birth, her husband and all those who know her (even if you are not next to her) just send the light of Love. Just imagine her image and fill her with energy. This will also support her at the energy level. It’s very good to learn behavioral tactics with your daughter: how to lie down correctly; when labor begins, you don’t need to lie on your back. This impairs blood circulation when you need to walk, when you need to stand up. When can you take a bath, what temperature should it be. For example, in the period when the child is not yet out, and when preparations are underway, it is useful to take a warm bath with a temperature of up to 38C. It's relaxing. It is useful to use rose, jasmine, lavender and cinnamon oils in aroma lamps. Turn on quiet, calm music and, of course, no rudeness with this woman is acceptable. Everything will happen by itself, persuade her, remind her that nothing terrible is happening, that if she behaves too excitedly, then simply say: “Don’t think only about yourself, let’s better calm the child down. He’s even more scared now as it is.” further," so that she could direct her attention to him. Then it will be easier for her. I repeat, what I just told you is what they teach in Esler.that the pain and tears of the daughter’s suffering cause a nervous reaction in the mother if she is a very vulnerable person. In general, it is very useful for a relative to be present who will support. Because the presence of a loved one or friend, in addition to the hospital staff, will calm you down

with its energy. Well, you - the parents of this girl who is giving birth, her husband and all those who know her (even if you are not next to her) just send the light of Love. Just imagine her image and fill her with energy. This will also support her at the energy level. It’s very good to learn behavioral tactics with your daughter: how to lie down correctly; when labor begins, you don’t need to lie on your back. This impairs blood circulation when you need to walk, when you need to stand up. When can you take a bath, what temperature should it be. For example, in the period when the child is not yet out, and when preparations are underway, it is useful to take a warm bath with a temperature of up to 38C. It's relaxing. easier for her. I repeat, what I just told you is what they teach in Esler.

34:53 Miscarriage from an esoteric point of view.

Irina A.: Okay. Thank you. We also have psychologists who accompany pregnant women and began to come to childbirth. The next question: why does a pregnant woman have a miscarriage, from the point of view of esoteric knowledge?

Irina: Because the plans of either this Spirit who comes to incarnation or its mentors have changed. He may be sent to another incarnation, or the mother has changed in her behavior so that she is no longer suitable as a mother for this child. And they recall him from incarnation before it has even begun. This is the case in a natural way, not violent.

35:32 Reasons for stillbirth.

Irina A.: What if it's stillborn? Sometimes a child is born dead.

Irina: So the Spirit has left.

Irina A.: That is, the person decided not to incarnate. Is this the reason?

Irina: Either he decided not to incarnate, or he was recalled from incarnation, or his incarnation was needed in another place, or simply his mother had already done something like that, somehow changed her vibrations, so that she was no longer suitable for this particular Spirit as a moms.

36:07 Favorable age for the birth of your first child.

Irina A.: I see, thank you. Interesting addition. Okay, here's another question: the best childbearing age for a woman to have her first child is between 19 and 24 years old. What are the risks for the baby during the first pregnancy and childbirth by age 30 and later?

Irina: In general, this is very conditional, because it depends on the social situation. Many, on the contrary, believe that it is safer to give birth later, when the woman is both socially and psychologically more ready. As for her health, the excess pathology of the extra chromosome is only a few percent. Junk food, radiation and the use of harmful substances have a much greater impact. The same nicotine and so on have a much greater influence on the likelihood of a child inheriting a genotype with an altered chromosome set. As for a woman's health, by the age of 18-19 a favorable period begins when the bones of the skeleton come together easily. They are still soft. It's the same in the pelvic area. It will be easy for her to give birth. And the whole system: hormonal and so on, when it is younger, tissue regeneration occurs faster. It is even important that a young woman usually has fewer infectious diseases. Stronger immunity. That is, there are understandable risks. The older a woman is, the more negative changes she may experience in her body. But this doesn't always happen. Sometimes an older woman is even healthier than a younger one.

38:53 Reasons for the onset of early menopause.

Irina A.: Okay, thank you. And another question: why does a woman reach menopause by the age of 35-40, and how does this relate to the use of a woman's vital energy?

Irina: There are many factors for early menopause. The most common is a genetic factor. The rate of aging of the body is largely determined by hereditary factors and metabolism. The second factor is intoxication of the body with alcohol, nicotine, drugs and ending with some harmful production. The third factor is radiation, if a person lives in a radioactive area or is exposed to frequent radiation due to duty. Hormonal disruptions occur so quickly. And not only menopause, but also general aging of the body. The fourth factor is stress, some negative attitudes, constant conflicts, including with yourself, and not only with others. Depressive conditions also contribute to early aging. An unbalanced diet can occur when there is a lack of some vital elements or frequent fasting, for example. Or simply an imbalance of some substances over others. A lack of vitamins can also contribute, since there are simply not enough substances that are needed for the production of hormones. The same zinc, for example. Excessive consumption of vital energy, that is, ethereal force, which is aimed at

not producing hormones and maintaining the youth of the body. It can be anything: hard physical or psychological work, when a person is very tired. After all, there is also psychological fatigue that is not associated with direct stress. Just tiredness when there is no time to rest. This also brings about old age in both women and men. Overspending may occur if, especially, menopause is associated with premature extinction of the sexual sphere and sex hormones. This may be due to overexpenditure of vital energy through the sexual sphere. It could be anything, starting from early childhood masturbation. According to statistics, it occurs in girls no less often than in boys. If for an adult it is simple, as I already said, the development of a certain egoism, then for a child, especially if he has not yet reached puberty, everything is much more complicated. The thing is that your bodies allow you to receive special sensations even when the child has not reached puberty. These receptors will still work. If there is inattention to the child or if he is punished frequently, he may become distracted in this way. And there, the direction of etheric force and energy, which must be there for growth and development, goes to obtaining an orgasm, for example. It takes quite a lot of energy to have an orgasm, as you know. If an adult quickly compensates for this, if he rests and eats well and does not experience stress, then for a child it is much more difficult. This may be due to those internal reserves of the body that are aimed at youth. He just might get old quickly from this. This doesn't always happen, but it happens. This is especially typical for women who later give birth and waste energy. And if there was often a change of sexual partners, both in women and men. This leads to the formation of energy connections, as I already said, between partners,and energy can flow into others. And if there are a lot of different types of them and there is no compensation with something else, there is no strong energy, for example, playing sports, good nutrition, good rest, then all of this is superimposed on each other, and the result is such an overexpenditure of vitality that there is no time to allocate hormones. A person can grow old very quickly. Moreover, if he is outwardly aging, then this is not so scary for the body. The most unpleasant thing is when premature aging of internal organs begins. And this can even happen with a youthful appearance. This will be the imbalance. And then there may be exhaustion of the heart muscle, and the immune system may be weak. And then a person can become infected with the most common diseases and may even die. Of course, the main and leading one is, as we believe, spiritual reality. If a person does not see the meaning of life in the life he lives, he can unconsciously give the order to his body to quickly age in order to go into the Spiritual world. Why would he waste his energy on a weapon that is meaningless to him? If he goes to work day after day, no one

understands him, and he does not find any satisfaction for his personal desires, his personal dreams, any fulfillment or even the possibility of their fulfillment, then he can say to himself: “What am I I’m doing this here if there’s no point anyway, if I’m going to die anyway.” This is even more common in your materialistic civilization, which teaches from school and institutes that there is no meaning in this life, outside of this world.that there is no meaning in this life, outside of this world.that there is no meaning in this life, outside of this world.

46:24 The impact of abortion on the woman and the Spirit of the unborn child.

Irina A.: Thank you. Another question: how does abortion affect the development of the disembodied Spirit by a woman?

Irina: When she does this, it will, of course, reduce the vibrations. And the fact that she allowed the child to be killed will reduce the vibrations. But again, depending on what the reason was. If this was a necessity for the woman’s health in order to be saved, then this will not lower the vibration, because it was some kind of medical necessity, for example. If it was impossible for two to escape, then, naturally, they leave the life of the already incarnated woman, because if the mother dies and the child survives, it will still be very difficult for him here. Therefore, during such cataclysms, let’s say, they choose the life of an adult woman. As for abortion at will, this action lowers the vibrations because it is a disregard for the life of the intelligent Spirit. He was still waiting for this incarnation, he chose her, and she rejected him, while being well aware that her mother did not reject her, although it was possible that it was difficult for her too. But she was born. This is the first thing that lowers the vibrations, and the second is the feeling of guilt that comes later. Dejection and sadness come to 90% of women sooner or later. This also reduces vibrations.

48:43 What should women who have had an abortion do? How to get rid of guilt?

Irina: And here I need, he says, to tell those women who did this what to do, how to promote them again. There is a way to this. To do this, you must, firstly, realize that you did it, realize all the reasons that led to it, and realize exactly why it was wrong. And if it was wrong, then

why did you think differently? That is, analyze everything. And when you analyze everything, just tell yourself, mentally turn to God with a request that He, depending on your religion, either forgive you or help you forgive yourself and love again. Sending you love in my heart. And be sure to turn to the Spirit of this child, ask him mentally for forgiveness for what he did not realize. Mentally briefly explain why this happened, but do not justify yourself. It's easy to explain that for such and such reasons I thought like this then, but if I were in that place now, I would have it like this. Such a mental conversation. If you already know how to communicate with the Higher Self, then you can devote one of the sessions of communication with the Higher Self to connecting with the Spirit of the child mentally.

Irina A.: That is, ask your Higher Self to contact the Higher Self of the child?

Irina: Yes, which you voluntarily did not allow to incarnate. Tell him all this and fill him with the light of Love. And watch what will happen, and then ask him mentally what he would like to tell me. And when a woman feels the reciprocal love of this baby, she will forgive herself and allow God to forgive her and feel love in her heart again. Because those women who experienced an abortion realized what they did, but realized that it could no longer be corrected, they very often cannot love either themselves or others. And this state is even worse than that initial act. You need to get out of it. In any case, you need to understand that nothing is irreparable. And if you have fully realized what happened, why it happened, and you are no longer going to, you sincerely are not going to return to this act if pregnancy suddenly occurs. If you do not want to have children or you cannot give birth to them, you need to take measures so that when you enter into a relationship with a man, there is no need to have an abortion. As an adult, you must think about how to block the path to conception. I understand that different situations are possible in your world: where you will be with your child, for example, and what he should eat and where he should live, it is advisable to think about it before meeting a man. I am, of course, not taking a case of violence. But even if there was violence by a man against a woman, and as a result of this a pregnancy resulted, then it is very difficult for a woman to make a decision to leave the child due to material or social unpreparedness and because of the special, as they say, attitude towards this man, part of whose genes will remain in child. In any case, you need to realize with your mind that this Spirit, who came and incarnated, and wants to gain experience here, just like you, is not to blame for this.

Irina A.: I chose difficult circumstances for my incarnation.

Irina: It can be different. All Spirits have different tasks.

Irina A.: Okay, thank you. Many women come with this question; they really worry very much after abortions. Thank you!

Irina: Did he answer your question?

Irina A.: Yes, I answered!

54:21 What does a child experience when being born naturally?

Irina A.: Being born naturally, what does a child experience when he is born into this world?

Irina: If in a natural way, then he feels that something incomprehensible is squeezing him and pushing him out. He can resist. That is why mom needs to mentally communicate with him: “Don’t resist, everything is fine.” Calm, and he hears her in the Spirit. And indeed he can calm down from this. You can even talk to him in a whisper. Or mom or dad, if he is nearby. Calm not only the woman, but also the child. When he is born, he feels air rushing into his lungs. Sometimes it is even painful. Because there the airways straighten out, as if opening up. Moreover, the air may seem too cold to him even in a warm room. Because he is used to a different temperature. And the environment itself may seem cold. Even if it's warm. And when he takes his first breath, he feels that with the first breath he is going to burst. Mid, is this how you feel? He says that they are similar and everyone has them in a closed part of their memory. From pain and from this feeling of cold and fear, an instinct appears to attract attention to oneself by crying. The instinct of this body, this brain, is to make a sound to be carried to safety. And even a gentle touch he feels as if he is being squeezed quite tightly. The skin is not used to it, it may be painful for him. He sees silhouettes. Can't see clearly yet. He doesn’t see with his eyes, he just sees faces and doesn’t understand who it is. He doesn't even understand that these are living beings. His perception has not yet been adjusted. It is only then that he begins to

understand that they provide food. And it is very important that the energy of mother and child connect correctly. So that the child feels the first love for his mother, and the mother fully activates her instinct and feels love for the child. For at least the first 10-30 minutes, put the baby not just next to her, but on her, try to attach her to the breast and feed her.

Irina A.: Yes, now they are allowing it, but before it was not allowed at all.

Irina: If the child is lying on her, and she wants to stroke him, then there is no need to press him too hard.

Irina A.: So as not to hurt. I understood.

Irina: Yes, all his bodily sensations are very heightened. By the way, he says, when the umbilical cord is cut, it’s painless. These are not his nerve endings. He doesn't feel anything about it. Then, from this overwork, from what he experienced, from this pain and fear, he just wants to sleep and falls asleep. This is the norm.

Irina A.: Rest right away.

Irina: She wants to go to the Astral and...

59:39 Baby and access to the Astral.

Irina A.: They really can enter and leave the body when they are small?

Irina: Yes, like all of us, when the body sleeps, they leave their body.

59:55 Reasons that prevent a healthy husband and wife from conceiving a child.

Irina A.: For what reasons, being completely healthy, can a husband and wife not conceive a child?

Irina: So, the mentors don't send him for some reason. Maybe they have other tasks for incarnation, or simply for the Spirit who is waiting for incarnation, at this moment they or he are not suitable for them, or there may be some other reasons. Maybe they need to learn something, maybe do something else in life. There are various reasons.

1:00:39 How to become the mother of a child whose Soul is incarnated from high levels of the Spiritual world?

Irina A.: Okay. How and what should a woman be taught in preparation for motherhood so that Spirits from high levels of the Spiritual World can come to incarnate, and what should a mother's school teaching this be like?

Irina: I will tell you very briefly: you need to teach Love in all its manifestations. As I already said, care. This is the first. By your example, when raising a girl or boy, you show them a model of behavior that they will then show towards their children. Treat your children the way you want them to treat you when you need care, when you need care due to old age or illness. This can happen at any time.

It happens that children are already adults, independent, but mothers or fathers do not move or move poorly. They need care like a child. Just mentally imagine yourself in this position for a while and ask yourself: "What kind of attitude would I like to have towards myself? Love, care, understanding. In what form? This is what to provide to a child.

And about school, as I already said, love, care. Special methods of education are not even required. The main method of education is educating yourself. Nurturing those emotional and mental attitudes that may give rise to some kind of negative emotions towards a child, or towards one's husband or wife. I will name a few rules. The first is smoking tobacco. As a biologist, I would like to remind you now that it

accelerates the development of old age in men and women by 4-5 years. This is in addition to other factors. If a pregnant woman does this, it poisons her child. The nicotine content in one cigarette is insignificant for your body weight, but for the body weight of a child, who is ten times smaller, this dose is ten times greater, and at the same time all your blood passes through him. This does not allow the nervous system to form correctly, for example.

1:03:49 Can spirits, being at different spiritual levels in the Spiritual World, agree among themselves to be husband and wife in different reincarnations?

Irina A.: Can spirits in the Spiritual world agree with themselves, being at different spiritual levels, to be husband and wife in different reincarnations?

Irina: Yes, they can agree, but the whole difficulty is that when they already find themselves in incarnation on Earth, it can be difficult for them to meet and simply recognize each other. These memories and feelings of soul kinship can be suppressed by brought upbringing and mental attitudes. From different levels they can too. The Spirit that lives on a higher level will come to the Spirit that lives on a lower level.

1:04:54 Is it possible for pregnant women to perform chakra opening activation?

Irina A.: Is it possible for pregnant women to activate the opening of the chakras and in what order?

Irina: Yes, it's possible, but measure it against your capabilities and well-being.

1:05:16 How to rekindle a woman's love for her baby during pregnancy?

Irina A.: How to give birth to a woman's love for her baby during pregnancy? How can an ordinary woman in Russia spark a feeling of love?

Irina: It will be very difficult to kindle love if it has not yet been sown in childhood. Even if this is not the case, then the woman observes examples around her. This, firstly, must happen according to her free will. Tell her: “How she needs love.” Just like her child and everyone around her. This is the simplest method.

Irina A.: Thank you! I thank both Irina and Mid for interesting answers.

Irina: Thank you for the interesting questions.

Broadcast 02/20/2020

Participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

MidgasKaus from the planet Esler - biologist, psychologist and specialist in alien civilizations;

Irina Arsenyeva is a practical psychologist, teacher of the “Mother’s School” course from conception to 3 years.

Video in text

January 17, 2023

#89 Live broadcast with contactee Irina Podzorova. Higher Self, spiritual

development, enlightenment

https://blog.cassiopeia.center/vysshee-ya-duhovnoe-razvitie-prosvetlenie

https://www.youtube.com/watch?v=kHx0KxC9iIE

M: Irina, we need to define the topic.

I: Today the topic will be “The Higher Self. How to learn to communicate with it, how to distinguish its message from your temporary thoughts.”

M: All questions about VYA that you have, you can ask today.

03:34

And: (answer to a question in the chat) The chip is in my spine, if you mean the one that was placed just below my left hypochondrium - this is the Daraal chip (planet Daraal). Kirchiton played it for me.

04:39

I: I have three chips. Two Esler and one Daraal. They gave me the chips so that I could talk to them and hear them all.

05:19

M: Are there phantoms among us?

I: We will now immediately understand the terminology. The word “phantom” is used by some esotericists and contactees to describe those embodied spirits who have not realized themselves as spirits.

They consider themselves a body, that is, they do not feel like that light, those spirits for whom the Spiritual world and all actions for developing themselves in the Spiritual world are important. According to our terminology, these are spirits who have not realized themselves. We can say that they are temporarily asleep, that is, only part of their function is working. But phantoms still have a soul, that is, they are immortal spirits, they are embodied, but they do not yet know about it, they do not believe in it. In their case, disbelief is equal to ignorance.

It is not at all necessary that the phantom will remain like this until the end of its incarnation, that is, it may well come out of this state, cease to be a phantom and become aware of itself.

06:46

M: At what age can you become a contactee?

I: If we take into account both plasmoid civilizations and the spiritual world in general, then there is only a question of awareness. In my experience of working with people, contactees of plasmoid civilizations (many of their curators are responsible) were connected to a person from birth or even earlier in a new incarnation. More or less conscious contact is possible regardless of age, when a person is ready for this path psychologically, energetically and spiritually. Because the path of conscious contact is a difficult path in the sense that you will need to combine it with life in the material world. So there is no question of age here, there is a question of awareness.

07:40

M: Irina, they say that you are very similar to Blavatsky. Do you have a connection with her?

I: The only connection that I can have with Helena Blavatsky is our common curators. One of Blavatsky's curators were precisely representatives of the planet Esler. MidkasKaus from this planet also contacts me. At that time, he was not in contact with Elena (he was not yet born), but his senior teachers who taught him were in contact. But

in addition to Esler's contacts, she had contact with the plasmoid civilizations of the Earth, Jupiter, Venus, the Sun, and almost the entire solar system.

And one more thing in common is that she went well and often on astral conscious travel. I do this too. This can unite us with her in the same spirit.

But, unlike her, I already live in a different time, with a different attitude of people towards these events. And I also have physical contact: with Daraal, with Burkhad. She had contact with Esler and the plasmoids. Well, another difference is that she devoted a lot of time not to working with people, but to writing books. She traveled, and during these long ship voyages she had time to write books. She wrote several books, they were published and translated into many languages. I do more practical work with people, helping them connect with their VY. For this reason, I don't have the time or energy to write books.

10:04

M: Regarding the spiritual level, Irina will only tell those students who come to her to study at school, and there she will teach them how to calculate this spiritual level.

And that.

10:17

M: Irina, please tell us what VYa is and how to establish a connection with him? Why is it even needed?

I: The fact is that our spirit is not completely embodied in a dense material body. Part of it remains in the Spiritual world. So you, my dear TV viewers, are only partially in the physical world. That part of you that is in the Spiritual world, which has not blocked the memory of your incarnation, your life path, your life tasks here, and how much your path in this life corresponds to your life tasks - with this spiritual structure we come into contact with and call it the Higher Self.

Why “Higher”? Because in terms of vibrations it is higher than the part that entered the human body. This is the highest part of consciousness, its Superconsciousness, Superego, Cosmic consciousness - it’s all one and the same.

Why contact him? Because only from VYA can you find the answers to questions that will correspond to your purpose and your own path in life. Therefore, on such vital questions as: “where should you go”, “what to do in life”, “what goals to strive for and how to achieve them”, we consider it necessary to consult with VYa. Only it can know the only correct answer for you, and not for your parents, teachers, gurus. Therefore, it is believed that VY is the best teacher for a person.

And coming into contact with him is important for that person who wants to engage in esotericism, for example, for contactees. Through VYa you can set up contact with any of the Curators. In this case, the VYa from the Spiritual World will already invite these Curators.

13:22

M: Is the Higher Self Jiva or Paramatman?

And: Jiva is rather a soul, atman, connected with prana, that is, with life force. Paramatman is precisely a description of VY, of course, with the specifics of Indian religiosity that were introduced there by those Brahmins who wrote them down.

13:52

And: (answer to a question from the chat) Of course, everyone has a Higher Self.

And: (answer to a question from the chat) If you see the VY in the form of a star, it can be like this, yes, in the form of the sun, a star, in the form of your reflection, in one image or another, if you have imaginative thinking. All of these could be images sent by your VY.

In the astral plane you can also meet your VYa, but you go out into the Spiritual world. And there it can also send you an image that will talk to you. To do this, a person moves to the higher astral plane in a dream, in that state of consciousness when he is unconscious. And in conscious astral travel, contact with the VY is possible, but here the contact will be in the form of questions and answers without images.

15:13

M: Irina, how can you tell whether it's VY speaking or just consciousness and images in consciousness speaking?

I: There are very clear criteria to really hear the VY. Three conditions must be met here. The first is to enter a state of physical and psychological relaxation before contacting the VY.

Everyone knows what physical relaxation is. Psychological relaxation is a conscious temporary renunciation of self-control over one's thoughts and analysis. That is, that part of the spirit that is responsible for logical thinking must be temporarily pushed aside. While in the body, we tune in through the brain, so we must tune in through the area of the brain that is responsible for creative thinking, imagination, imaginative thinking, etc. It is through this part of the brain that one can establish contact with the Spiritual world without leaving the body. Psychological, mental relaxation is a temporary pushing aside of all worries and worries in the material world, that is, complete relaxation.

How to ask a question to VY? "I wish to speak with VYa. Are you ready to answer me? VYa will hear your request and send a response.

In the state when you receive answers, it is impossible to analyze them in order to distinguish whether the VY spoke to you or not. The analysis can be carried out later, after leaving the contact state.

You can tell by the answers. If, when asking questions, you receive answers that do not correspond to the goals and objectives of spiritual evolution, as they are recognized in spiritual teachings, then this is not a VY answer. For example, VYa will not be able to tell you that the

purpose of your life is to harm someone or simply live and leave here, leaving children, property, and at the same time not achieving any spiritual goals.

So that there is no doubt that this is definitely the VY, we have such a rule in the Spiritual world - the first answer that comes in response to your question will be the answer from the VY, but it can come both in figurative form and in thoughts or at the same time.

At first, when the channel to the Spiritual World has not yet been configured, it is possible that the answers will be confused and a confusion of images will arise. And in order to understand what we are talking about, in order to set up this channel and strengthen it, it is important to ask a clarifying question. For example, if you asked a question about the meaning of life and received an answer in a simple, understandable form for you - “climb the stairs,” then you need to ask “where to climb, why, etc.” These clarifying moments will strengthen the connection with the VY, receiving more detailed answers and more accurate from a spiritual point of view.

20:47

M: Irina, is there such a thing as “dark VYa” or “lower Ego”?

I: There are various negative attitudes in the human mental body that give projections onto the astral etheric fields in the form of negative blocks and larvae. They are not exactly called “I”, at least in our terminology, because according to the ideas of the Interstellar Union, these temporary formations are not part of the “I” at all. We do not call this the lower or negative self, so as not to emphasize its significance for a person, we consider these temporary formations in his spiritual structure. Indeed, she may also begin to respond (some kind of larva or negative thought form in the human mind), but, as I already said, it will be very easy to distinguish by the answer. You will receive answers to only one topic and exactly the one on which this larva is charged.

22:39

M: Is it possible to communicate with VY using a pendulum?

I: It's possible. But MidkasKaus and LiShioni (now they tell me) have seen a lot of people who use materialistic forms of communication with the Spiritual world through bodily practices or material objects. These are spiritual forms of contact. MidgasKaus says that the planet Esler studied in some detail spiritualism, pendulums, frames, various turning saucers, etc., that is, spiritualistic sessions in which a connection with the Spiritual world is also established. And they came to the conclusion that this was not a full-fledged contact. In any case, full contact is a mental, mental connection. But at first, if you don't feel anything at all, you can use a pendulum, but just to make sure that it exists. There is no need to get used to contacting VY through material media, otherwise it will be difficult to learn how to enter into direct dialogue.

I was contacted by several people who communicated with VY using a pendulum. And when we tried to enter into a direct dialogue, this group of people without pendulums received answers only in the form of sensations in the body. It is very difficult to get detailed answers in this case. When we asked detailed questions, such a person did not feel anything at the initial stages except sensations in the body. We could not get any thoughts or images until a person began to practice at least the practice of increasing sensitivity that MidgasKaus gave (I'm talking about reading the Esler mood, when you read this mood for 21 days using a certain method).

25:05

M: What can block contact with VY?

I: Mistrust. In general, in the broadest sense, negative emotions can block contact with VY. These are emotions aimed at fighting the world around us or fighting oneself, not accepting this world as it is. These are: fear, anger, condemnation, irritation, envy, distrust and suspicion, or distrust in oneself or in the specialist who conducts the session. Doubts about the existence of the Spiritual World also interfere, because they do not allow one to gather energy to set up this channel, they dissipate it: it seems that contact has begun and then it can be lost.

General disbelief in VY may interfere. If a person decides just out of curiosity to try, but he himself doubts, thinks that there is nothing like this, then he has such a prejudice before contact, this can also interfere. He will hear the answers, but will believe that he is not talking to VYa, but to his own thoughts, and will not believe it.

26:43

M: What is higher in vibration than VYa?

And: By the Higher Self we (in our terminology) call the highest part of the embodied spirit. It may be called completely differently in other religious esoteric and philosophical systems. In Christianity, this is generally called either the Holy Spirit or Christ. For example, the Apostle Paul often wrote that there must be Christ in the heart, or the Apostle John wrote that the Holy Spirit, Light, and so on must be in the heart. In esoteric systems this may be called Superconsciousness, as I already said. This is the classic term of theosophy - Superconsciousness, Cosmic consciousness, Inner fire and so on.

In Esler it is called Inner Light. In Shimora it is called the Sun of the World, it is in everyone, like a ray.

In any case, if in any book, article, video you come across a description of some higher structure in the Spiritual world of man, then you are not looking at the names, of which there may be thousands, but you are looking at what stands behind the words, to their meaning. Then you can easily figure out what it is.

29:08

M: Can the subconscious in psychology be called VY? Can psychologists, working with the subconscious, work specifically with a person's VY?

I: You know, I have heard the interpretation of the word "subconscious" many times in different interpretations from my contactees. This word can be used to name anything, from a person's heart, his feelings,

desires that he is not conscious of, to his memory. Some people call the subconscious everything that is hidden from consciousness, including the VY and other unconscious processes.

What is consciousness? In the description of the structure of the intelligent spirit of the Interstellar Union, consciousness refers to the energy of the spirit aimed at perceiving the surrounding world and oneself. That is, the definition of consciousness that is familiar to your psychology, namely “consciousness is a reflection of objective reality in subjective space”, is only partial for us. It doesn't talk about energy, it says that it is only a form of reflection. And that is why the word “subconscious” can be understood as any process that is not currently perceived by perception.

31:02

M: At what spiritual level is VYA?

I: The spirit incarnates from a certain spiritual level. Therefore, his disembodied part is naturally located at the level from which he incarnated. But even if he incarnated from a low spiritual level, and his VY is there, he is in the Spiritual world, in any case, in contact with those Mentors who also live in the Spiritual world, but at a higher level. That is, they have a continuous communication channel in the Spiritual World, they feel each other at a distance, because they do not have material bodies. Therefore, they do not have the same means of communication as we do, through speech, writing, video, they communicate mentally and instantly.

32:09

M: How to distinguish the voice of VYa from the voice of spirits?

I: You can understand from the answers. If some spirit speaks, then he will have answers according to his level of understanding. But if this is a spirit that is assigned to you to protect you and send you bright thoughts (for example, a Guardian Angel), then you can really mistake his voice for the voice of VYa.

Here we should take into account one simple feature of the human body and brain. For a person who is not prepared for contacts with the Spiritual world, it is much easier to first build a channel to his VY for conscious contact, and only then, through this VY, build a channel to other spirits (the VY itself does this). Therefore, if this person is not a conscious contactee, then in 90 percent of cases he hears his VY. And if he already feels the voices of spirits and consciously communicates with them, then he is already able to distinguish them by vibrations. If you can't tell the difference, it means you haven't had enough practice. And so every spirit, yours and the one that can come to it (whether embodied or not), all have their own personal vibration, you can learn to distinguish it by constantly practicing these contacts.

34:14

M: Do such abilities as clairaudience, clairvoyance, clairvoyance have anything to do with VY?

I: Judging, because we understand by this term, all this refers rather to forms of contact. When the contactee is ready, things like future options, etc. are revealed to him.

If by claircognizance we mean intuition, that is, knowledge of how something should happen, but without understanding the source of information, then this is rather working with the VL. Intuition is one of the manifestations of EI. In any case, you need to figure it out individually.

35:51

M: Can one VY supervise more than one person?

I: Such a question may relate not to VYa, but to the Guardian Angel, to the Mentor Angels. They may have many wards, especially the latter. They can also respond to a person and come into contact with him. And a person can mistake them for his VY, who supposedly has many wards.

38:01

M: Does everyone have their own VY or is it common to everyone?

I: To each their own. But in a state of connection with it, our consciousness (which is embodied) begins to merge with it, and a feeling of unity with other VY, and in general with other people, arises, as if this is a single VY. This happens because there is truly no division in these vibrations. This is the Spiritual world, there are no such bodies and no such divisions. There, indeed, everything is known through unity.

The best way to express this is to say: “You and I are one in the light.”

Our common VY, which can be, is God. That is, that Heavenly Father, whose manifestations, thoughts (embodied) we all are.

39:08

M: How to protect your VY from contacts of other curious people?

I: Probably, we are talking about other people’s requests to your VY. The fact is that if a request comes in that does not correspond to the purpose of your spiritual evolution, your VY simply will not respond to it. It is able to figure this out without your help, because for an earthling the VY is about 70 percent of your Self, and you, as an embodied part, are only 30 percent.

VYa can answer something. But what it says will correspond to your and his goals of spiritual evolution. Your VY and the VY of the requester will in any case find the contact that will be beneficial for the spiritual awakening, enlightenment and advancement of both of you.

M: That is, if an unconscious person makes a request to your VY, then he will be given an answer according to his level of awareness?

I: Yes, the answer will be given according to its level. For example, if you are afraid of revealing some of your secrets, then you should not be afraid of this, because your VY will not reveal anything that could harm you. Or, for example, if your wife decides to ask your VY whether you are cheating on her, then your VY will give the answer: “That the energy of distrust in your husband will provoke his infidelity,” in order to encourage her, on the contrary, to love you, and not to hatred and destruction. There will be harmonization.

42:16

M: Is it possible to communicate through your VY with another person with his consent?

I: You will communicate with his VYa, that is, not with his consciousness, which is embodied, but with that part that is in the Spiritual world... How does this work in practice? For example, a person has a block of resentment towards someone, in order to dissolve this block, he needs to ask for forgiveness and harmonize with this person. But how to do this if he is not nearby or has gone to the world of spirits? We do this by establishing contact with his image and with his VY. And already his VYa makes a request for forgiveness: “I ask you for forgiveness, forgive me too,” and [there is] filling with light. That is, harmonization is underway. This is the level at which contact is possible.

If this is important for a person, you can ask his VY the reasons for this or that person’s behavior, but the answer will be given in such a way that there is not destruction, but harmonization and alignment of these relationships.

43:27

M: Can VY answer with colors and numbers?

I: If the channel has not yet been configured, then, of course, VY can respond with images, colors, but this is at the initial stage. Colors in a person's perception may change. Energy can change, a person can

begin to see the colors of the aura with inner vision.

I have never seen contact in numbers without letters and words. If a person is a mathematician and his formulas work, or a chemist, then during further contacts he will have a more conscious dialogue, as with himself or another person. You don’t communicate with your friend with formulas, you communicate with words.

44:46

M: Is it possible to become the same as you? As beautiful, as brave, as kind? (Referring to the contactee)

I: In fact, you are no less a unique person, and you have your own path of development. You don’t need to strive to become like me at all. You may have your own path and it is no less important for you and for the entire planet, and for the entire Universe as a whole.

If you already have a question about how to become a contactee, then there are two ways to do this: either wait for the contact yourself (they will come to you when you are ready in terms of vibration level), or set up this contact yourself, if possible, but with preliminary permission from your VY, after talking with him, with his permission, under his leadership and control. That is, build the channel that suits you in terms of vibrations, if this at all corresponds to your task of embodiment. Sometimes it doesn't match. I have had several people who, when asked their VY: “Is contact possible?” The answer was: “No, this does not correspond to the tasks of implementation.”

M: I would like to add that if you are ready to answer people’s questions 24/7, help them even when you are sleeping, go for a walk on the balcony because you don’t have enough time for anything else... Then you can become exactly the same as Irina .

46:43

M: If there is a connection between the VY and any egregor?

I: Egregorial connections – they generally happen to the spirit. There is no longer any division: VYa or this embodied part of consciousness. Egregorial connections - they go at the level of your aura and at the level of your VY, and at the level of your embodied part. Your spirit, in general, has a connection with the egregor, into which you invest energy. The VY, while it is in the Spiritual world, also believes in this as you do, but it perceives it more consciously. Consciously perceives, in any case, also sending energy there. After all, spiritual energy, the energy that your spirit has, comes from the VY from the Spiritual world to the egregor to which you join.

48:01

M: What is enlightenment?

And: Enlightenment is the name of the state of merging with the VYa, with the light that you have inside, in your heart, in the soul - that is, it is an exit to the Spiritual world, but not to the astral plane, but to the VYA.

Why is it called "enlightenment"? This is what the first experience is often called - “clearance”. A certain event occurred in a person’s inner life, which he perceives as light.

How does enlightenment differ from ordinary bright religious thoughts? After enlightenment, a person usually changes dramatically. He, for example, may cease to be so interested in material acquisitions; he may cease to be afraid of death, feeling himself to be an immortal being. He may start making contact. A person’s very perception of the world changes, he ceases to feel like a useless cog in this world, who temporarily performs some work in the system of this world, and then will be thrown out. He begins to feel like a truly spiritual being who came here for experience, feels the presence of God in everything. When he meets another person, he sees in him first of all light, which manifests itself in some distorted way.

It will be impossible to convince such a person in a materialistic manner; he simply will no longer believe either scientists or parents, because he will have a different experience.

50:42

M: Does VY have a name? How is it prescribed or given?

I: Yes, VY has a form of addressing a person so that he can remember and distinguish him from others: an image and a name. In the Spiritual world they do not need this, because they read each other by vibrations. But it most often communicates with its embodied part through a name, although sometimes the “Higher Self” is used instead of a name.

What determines the purpose of a name? Most often this has to do with past lives. He [VY] has not blocked the memory of past incarnations, so it can continue to call itself as it was called in one of the past lives, in one of the most significant. It remembers such lives better. You, for example, cannot remember all the events in your life, and so it is with VYa. It holds some part in consciousness, otherwise its consciousness would dissipate. It's very similar to how an actor remembers his roles, he remembers the main roles. But by paying attention to the part of life that he needs, VYa can remember everything.

53:17

M: Is it possible to self-heal through VY?

I: If this is caused by energy blocks, that is, psychosomatic reasons, then yes - you can eliminate this block through the VY, eliminating the physical disease.

If this is caused not by blocks in the etheric body, but by mental beliefs, then the VY can connect with your consciousness, at the same time you will experience that same enlightenment, and your world view will change. This alone can save you from those diseases that were caused by negative thought forms, attitudes, etc.

54:39

M: Regarding the school: our school will be open in September. We will post all the information either in the VKontakte group or make a YouTube video about our school. We are currently looking for interesting artists. We already know for sure that we will work in the direction of not only contacting and healing, but also cosmic energy.

In our school, training will take place on the Donation structure - this is payment according to the heart, no matter how strange it sounds. And we will be the first in Russia to try to introduce such a form of payment, but with certain conditions, so that further people will also provide knowledge and information on exactly the same payment structure according to their hearts.

55:29

M: Can two people fall in love with each other?

I: You understand what's the matter, when the spirit is embodied, then all of its consciousness is in any case occupied by this embodied part. What does it look like? For example, you want to know what is in a closed box. You cannot look there with your eyes, but you can, by placing your hand there, feel the object in the box. All your attention will be occupied by feeling, it will be like you are embodying your part.

We are talking to each other now. My VY is now talking to your VY, because in reality this structure of the spirit is inseparable. Its division is conditional - one part is embodied, the other remains in the Spiritual world. Just as the head cannot be separated from the body, so you cannot be separated from your VY.

Therefore, Vyas falling in love with each other occurs in the physical world. True love is when the vibrations coincide and people feel it. Then three things happen to them: physical attraction, psychological and complete spiritual understanding of each other (common interests and supporting each other even in difficulties). Love manifests itself not only in joys.

58:03

M: So by this we will attract a high vibrational spirit here for incarnation?

I: Yes, the likelihood of this increases if you love each other with true love.

But it happens that a low vibrational spirit is sent to these high vibrational spirits as a child just to teach this love, so that the parents raise the vibrations of the low spirit. Moreover, Spirit Guides from the 22nd level (Consultants for incarnation) understand perfectly well that, being brought up in such a family, a demonic spirit, for example, from childhood will accept such concepts, and it will be easier for him to raise his level of vibrations .

59:29

M: More about school. The school will be full-time, various masters will teach there, we will invite masters who work with both Merkaba and cosmoenergy, and there will be contactees. In correspondence, we will give you free lessons in which you can view all this: classes at school, as we do it. But the “Cassiopeia” team will only include those who studied full-time.

There will be a children's school, now there are a large number of children of contactees, to whom doctors give different diagnoses, but according to our diagnostics, this is just a contact.

61:07

And: (answer to a question from the chat) VYa can answer everyday questions if they are important for your spiritual development.

61:14

And: (answer to a question from the chat) Meditation helps to reach the VY.

61:16

M: Are there simply civilizations without any bodies, civilizations of disembodied spirits?

I: The answer to this question depends on what you call civilizations. Some kind of community of beings? Then of course, a spiritual civilization of spirits exists at every spiritual level, but you need to understand that they are different from humanoid and plasmoid civilizations. The spiritual level is [the place] where they await incarnation, where they live in eternity, that is, outside of time. This means that they are unchangeable - whatever spirit comes from any world, in this state it remains there. He may want to change, but for this, according to the laws of God, he must be incarnated again into the material world. That is, for the changes that he wishes for himself, he and the Consultants think through a plan for implementation. These Consultant-Mentors guide him, most often, for more than a dozen incarnations. They may already be embodied, but they have deputies to whom these wards are transferred.

62:58

M: We are finishing the live broadcast. From June 6 to 12 we will be in St. Petersburg. In the VKontakte group there are phone numbers of the receiving party. And on the 12th we will have a grand conference there, which will be attended by six civilizations, three of them are our Creators! You can sign up for this conference and attend, personally ask questions to a whole group of civilizations.

Then we go to Krasnodar (Shapsug) - a wonderful place, there are a lot of portals and dolmens. All information is also in the group.

Then we are going to Crimea, but there are no details yet, we are considering options.

I: One more answer (question from the chat). The earth in the perception of humanoid civilizations is round.

For the perception of some plasmoid civilizations it is flat. Both options are correct, it all depends on the starting point, on the type of perception.

MidgasKaus and LiShioni wish you all health and speedy enlightenment.

Participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia project;

The curator of MidgasCaus from the planet Esler is a biologist, psychologist and specialist in alien civilizations;

LiShioni from the planet Shimor is a specialist in the astral world and its interaction with the material world.

Video in text

#90 Scientific knowledge: electromagnetic engine, levitation, ether, energy. Alien clues

https://blog.cassiopeia.center/nauchnoe-poznanie-ehlektromagnitnyj-

dvigatel

https://www.youtube.com/watch?v=X0ijD4IyeeY

Irina: Hello, dear friends! My name is Irina Podzorova, I am a contactee with extraterrestrial civilizations. And today with us in the astral body is the representative of the planet Burkhad, the constellation Cygnus - Raom Tiyan, a specialist in energy interactions in the environment. He came to answer some questions.

Maxim: Great. I'm here. My name is Max. I am helping Irina conduct this conference and record it.

Alexander: Alexander Markov is a design engineer. I do things like this, i.e. This is my hobby, but, nevertheless, it seems somehow interesting to everyone.

01:30 Possible operability of the presented design for generating electricity. Entropy of the ether. Levitation effect.

Alexander: How valid is such a design from the point of view of electricity generation? That is, it turns out that first, at the beginning of the start-up, one-fifth of these windings, these solenoids, work, and four-fifths of the windings already remove the magnetic induction that already arises in these four-fifths of the windings from the rotation of these solenoids. And we are already using a little more electricity than we spent. That's one thing.

And another thing is when an acquaintance told me that in this case the so-called entropy of the ether appears. Some call it ether, and some call it magnetic particles. When magnets stand between them, between blue and red, there are magnetic particles. And when they begin to rotate, the superposition of instantaneous velocities of these conjugate magnets changes in one direction or another, more or less. Thus, there is a hypothesis that at this moment, when magnetic particles change their speed of movement, different from the speed of movement of the space in which the whole thing is located, then a new type of matter arises in this area, different from the surrounding matter

.

And this matter that is here has at the same time a different density than the density of the surrounding matter. This creates a levitation effect. That is, in this area something like a soap bubble appears in water, and it begins to move into the relative surrounding space. It's like levitation occurs. Everyone says that all these so-called flying saucers fly. And I say that they do not fly, they move, due to these effects of creating new matter of a different density. How true are these statements of mine?

Irina: Everything is clear, Raom Tiyan also understood. He says: “So you think that similar structures for repulsion from the magnetic field are in our ships?”

Alexander: Ships?

Irina: On their plates.

Alexander: No, I don’t say so. I just want to know - is this opinion promising? I can't know how their engines work.

Irina: He will now explain using his terminology.

Irina: As I already said, in an atom there are three levels of energy, which in turn consist (each level) of several types of energies. What you just showed me and said is that electricity enters these magnets, they rotate, and a type of magnetic energy is released, which is then converted into electricity. If I understand you correctly, I now see not a working device, but its model.

05:40 Model of an electromagnetic motor. EMF (electromotive force).

Alexander: There is a 3-D model in a certain graphic system, but I think there is no point in showing drawings. If yes, then please. You can do this too.

Irina: I mean, now I see a drawn model of how it will rotate. But I don't see an existing working model that you could run and see how much energy you spend on rotation (as you call it, a constant electric field), and how much energy of a different type you take from this rotation. But you said you get more.

Alexander: No, I don't approve yet. This is a matter of research. That is, all this must be determined somehow. These solenoids, here are two windings, and even outside of a larger diameter, eight more windings. Just ten. One-fifth works for repulsion, and four-fifths of these windings are not connected to the battery. And in these remaining windings an EMF is induced.

Irina: What is induced?

Alexander: From the movement of these magnets, an EMF appears in these solenoids. Electromotive force is electric current.

07:38 Solenoid. Solenoid construction.

Irina: You explain Raom to Tiyan a little, he is, after all, not from Earth, they don't have such solenoids. And for our viewers, too, in simple terms - what it is. What are these devices and what do they consist of?

Alexander: A solenoid is a kind of housing in which there is a core of a certain shape and design, and a winding in the form of a wire is wound outside this housing. This is called a solenoid or, more simply, an electromagnet.

Irina: I understand. It's from this electromagnet that the radiation that rotates the magnets comes, right?

Alexander: Not radiation. We create such a pole with direct current in the place where it is adjacent to the magnets, so that they are either like or unlike. In magnets of the same name, repulsion will occur, in magnets of the same name, attraction will occur. However, the effect

will be repeated because they will still rotate in a circle. And when they rotate, these magnets already move. In the remaining eight windings the same thing occurs - an electric current that can be removed and sent to the electrical circuit system.

Irina: Everything is clear. Do you provide pulsed current?

Alexander: No, I give a direct current in this trigger winding, and get a pulsed current back, from these moving magnets.

Irina: What if you give an impulse several times per second and during this rotation collect electricity that will be released during its rotation?

Alexander: No, well, you can create an impulse one. But this must be done by an additional device in the electrical circuit, which allows you to create these impulses. You can do it this way.

Irina: To spend less energy on rotation.

Alexander: Well, yes, that's possible. It is already a matter of technological research to see how this can happen.

Irina: As far as I understand you, you are interested in what can be done in this design to maximize the efficiency of the engine?

Alexander: The issue of efficiency is still a distant thing, because this design is not yet in place.

10:27 Is new matter created when magnets rotate in opposite directions? Electrical and magnetic energy. A repulsive moment.

Alexander: The main question is the following. When magnets rotate in opposite directions, is new matter created in that area at a different density than the surrounding matter? Here is the most interesting question.

Irina: This is not matter. What you are doing, in our terminology of Burkhad and the Interstellar Union, you are directing part of the energy of electricity, the energy of the first level, into a metal that has more magnetic energy than electrical energy. We take into account magnetic and electrical energy separately, you understand, right? And what you send to these metals (direct, alternating or pulsed current) does not matter much. You direct electrical energy there, and from this the metal atoms begin to release magnetic energy, i.e. a magnetic field.

And this magnetic field passes through all the atoms, through the crystal lattice of this piece of metal that is depicted there. This magnetic energy pushes out electrical energy from those atoms that are located a little further along the crystal lattice than those into which you launched the magnetic energy.

That is, this is a transformation from electrical energy to magnetic energy, and then back to electrical energy. I would not say that in this place where you showed a new type of matter is created. For us, this is neither a new type of matter nor a new type of energy. This is the place (where you showed where the yellow lines go), very roughly speaking, but this will be exactly the place where the repulsive moment is created - the impulse that pushes electricity out of the atoms. You call it all electrons, that is, particles, but we call it energy.

13:28 Advice on increasing the efficiency of the presented engine model.

Irina: In order to obtain electrical energy from these magnets, it is important that they rotate. And because they rotate in space, the ejection speed increases, and the efficiency of the engine also increases. But to increase the efficiency of this model, you need to transmit energy in pulses, and preferably in micropulses. Those parts of the structure that are inside these yellow rods, and on which the magnets stand, are made of special materials, alloys. So that this rotation is not interfered with by air friction and so on. And then there will be conditions to collect the maximum of the released energy.

Here you can give specific advice. Currently doing such experiments. Send a pulsed flow of electrical energy, and all this time, while the

magnets are rotating in the opposite direction from each other, collect the released electrical energy. This way you can save money on overclocking them.

15:48 Levitation effect. Suppression of the Earth's gravitational field.

Irina: And about levitation, as you asked, there really is such an effect. Maybe because the magnetic energy that is released from the magnet is released not only along the crystal lattice of these atoms (it pushes electrical energy along them). And under certain conditions, it is capable of being released beyond the boundaries of this crystal lattice and temporarily, if its strength is large enough, it can temporarily suppress the Earth's gravitational field. Screen, in your opinion.

As a result, there may be a temporary levitation effect. It will depend on the mass of the object that you want to levitate, on the material of which it is composed, its density, and so on. But, in any case, this will require a lot of energy. The Earth's gravitational field has a certain strength.

Alexander: The fact is that I plan to make such generators combined. That is, the first ring, then another ring outside, a third, a fourth, a fifth - you can make as many of them as you like to increase the levitation effect. And, among other things, they can be combined in tiers with each other. To create from this type of structure some kind of prefabricated structure, where there will be many of these effects, and each unit from this set will create its own levitation. And in total they will provide the necessary power that is necessary for levitation, in the sense of overcoming gravity.

Irina: Do you now measure the force of energy in newtons or in joules?

Alexander: In joules, this is work. Energy, as the power of energy, is counted in watts, but it is power, and energy...

Irina: The sheer amount of energy.

Alexander: I don't yet know how all this should be calculated here. I simply mean that thanks to these effects that arise between the rotating disks, any level of this energy of altered space, other matter, can be used to provide these phenomena of levitation.

18:51 The force of gravity.

Irina: But since at any point in the universe the force of gravity depends on mass and on distance, therefore, knowing the distance between the Earth and the object (since you want to shield from the Earth, let the distance between the Earth and the object be zero), and also knowing it mass, you can easily determine the amount of energy you have to spend on it.

Alexander: I don't know if there are such methods or technologies for calculating such things; all this, in principle, can happen purely experimentally. Like the same Searle, who doesn't know what he did, and then started filming all sorts of videos (almost fabulous golden squares and all that kind of stuff; no one really understands what they lead to and why they are needed). Therefore, all this must be experimentally studied, tested, and so on.

20:00 Levitation in a magnetic field.

Irina: Raom Tiyan just told me that in your scientific community there are known methods of levitation of objects, temporary, even a few seconds or minutes, cases of shielding by a magnetic field. You call this levitation in a magnetic field.

Alexander: Yes, levitation in a magnetic field. Everything is correct when, for example, one magnet hangs over another due to the repulsive force - this is understandable. But, in general, I'm asking about something a little different.

20:44 Entropy of the ether.

Alexander: One friend told me: "In the case of this movement, entropy of the ether arises, the chaos of the ether, in contrast to the

environment. And this chaos creates a new type of matter of a different density. And it works. There is no shielding, but this matter of a different density simply works ".

Irina: Magnets are used there, as in those devices that caused levitation in a magnetic field.

Alexander: Not in a magnetic field, but levitation in the environment. There is the surrounding environment, and there is, right here, this internal area, which is formed by the movement of these magnets.

And this medium (like matter) has some other density in relation to the surrounding one, and, like a float in water, this whole “machine” begins to take off or move, and no shielding of the magnetic field occurs here. I don’t understand how you can shield a magnetic field - the Earth’s magnetic field is very weak, by and large.

22:13 Shielding from the Earth's gravitational field. Force of gravity. Ether is the energy of subtle civilizations. Three energy levels. Energy of the Spiritual World.

Irina: Shield not from the Earth’s magnetic field, but from the gravitational field. The Earth has a gravitational field. This is what attracts all objects to the Earth. We call him...

Alexander: There is a hypothesis that attraction on any planet, including on Earth, does not exist because bodies there are somehow attracted to each other or something else. One said that this occurs due to the pressure of magnetic particles (which some call ether) on all objects located on this earth. And this pressure provides this force of attraction.

Irina: I already understand what you are talking about. Yes, indeed, I have already answered this question. What you call ether, in this case, is energy. We call it the energy of subtle civilizations. Yes, it really provides a gravitational field, because, one might say, all gravitons, microgravities and macrogravities are made of it. It is precisely the attraction to planets, stars, galaxies (if you look at it on a global scale),

the Universe and fields in space that create subtle civilizations. By densifying and changing their vibrations, they create all atoms. They create them in levels: the gravitational level, then the level that you call thermonuclear, radiation (for us this is one level of energy, which we call the second), and the first level of energy in atoms (this includes heat, light, radio waves, electricity and magnetism).

What you call heat, the amount of heat - for us this is also a type of energy. It is present in all atoms. Confirmation of this is precisely the fact that all atoms vibrate, each with a certain frequency, that is, they vibrate. The energy of the first level that is in them forces them to do this. And all this is supported by ether, etheric radiation.

The ether itself is also not independent, it is not a self-sufficient substance. The ether, its existence, its vibrations are supported from the Spiritual world, where there is no matter. But in the understanding of your science this is not the case, because you have excluded the study of the Spiritual world from academic science. But we didn't exclude it, so we have this unified knowledge about the Universe.

Alexander: I see. Well, about the Spirit or whatever it is called... There is one Russian scientist - Nikolai Levashov, now deceased. He has a book, "The Last Appeal to Humanity." He writes there that any object and everything that is in space are living objects or subjects. The same Earth has a physical level and several mental levels. In this case, a person has exactly the same: the physical is the body, the astral is the Soul, and the mentality of a person is how many of these levels he has, the more, the more knowledge he has and can somehow use it.

26:33 Viruses. Coronavirus. Interaction of the Soul of microorganisms and the Soul of man. Thin-material civilizations, plasmoids. 56 density levels. Causes of human infection by microorganisms.

Alexander: Now they are talking about coronavirus. An interesting virus, but there have been thousands of these viruses and there will be millions. I said that a virus means "life" in French, that is, it has an astral essence. And what they see under a microscope is the effect of this virus in the form of an astral entity on the Souls of people.

Modifying the astral essence of each person, these coronaviruses appear in the lungs. Why don't they still know how to deal with them? Because they don't understand or don't know... You can admit that what I say is absurd, but, nevertheless, those people to whom I wrote (they deal with such issues) said: "The direction is right."

Irina: Raom Tiyan says that he knows what you are talking about.

You are now talking about the creation of a group Soul of microorganisms by plasmoids, that is, subtle-material civilizations that live in different etheric frequencies. These are completely intelligent beings, only they are embodied in what we call etheric bodies. Only the ether is heterogeneous; it also has different levels of density. Just like the dense matter that you call matter. It also has different levels of density, ranging from gases of varying degrees of rarefaction to dense matter.

And again, substance differs from substance in density. Likewise, the ether does not form homogeneous substances, but different layers where intelligent Spirits (the same as us) live, who incarnate on planets in dense bodies. Sometimes we incarnate there too. And sometimes they are embodied here. This is called the intelligent Spirit.

That is, we are all united, I want to emphasize right away. And these Spirits, they are already embodied in etheric bodies, to use your terminology, of varying degrees of density. According to our terminology, these intelligent Spirits, embodied in the world in etheric bodies, are called plasmoids.

There are fifty-six levels of density, and in the densely material world there are three levels of density. We live in the third - this is precisely the solid, liquid and gaseous state of matter.

And what you just described about the virus is the creation of the Soul, the animal Soul. That is, one of the varieties of the animal Soul is precisely the Soul of microorganisms: viruses, bacteria, protozoa, fungi, microscopic algae, and so on. And they also have their own Soul, but, unlike us, from intelligent Spirits, it is created, born not by a source - God, whom everyone calls, but by his children, intelligent

Spirits, embodied in plasmoid worlds. That is, plasmoids.

Mentally, mentally and with the help of their feelings, with the help of their thoughts, they take various energies and compose Souls from them. Group Souls (animals, plants, for microorganisms), as well as for individual animals. That is, there are still separate animals of the Soul.

And these animal Souls, indeed, are embodied in a specific type of virus. But only, the smaller the physical body of these living organisms (for example, a virus is very small), the greater the number of these bodies this group Soul is embodied in. And moreover, after the death of part of the physical bodies, the group Soul continues to live until everyone dies, it just partially loses its power. Not so strong anymore. There is no longer enough vitality in it to support these viruses. And therefore, we believe that infection by any microorganism of a person or other dense material being is always an interaction not only on the physical level (intoxication, consumption of human tissue by the microbe, and so on), but also on the subtle level (that is, the group Soul of these microbes and the Soul of a person on an unconscious level). That is why different people with different Souls, with different levels of vibrations, suffer the same infection in completely different ways. But physically this, of course, is expressed through immunity, through the individual characteristics of the phenotype of this person.

32:40 The reality of designing the proposed generator. Autonomous energy source. Pulse current safety.

Alexander: I see. Okay, this is an abstract topic not related to this product. I would like to know how realistic my proposal is from the point of view of designing such species. I call them generators.

Irina: It depends on what goals you want to achieve. The design itself can actually be implemented. But are your goals realistic? What are they?

Alexander: One goal is to obtain electricity in the form of an autonomous source for any consumer. And the second goal is the levitation effect. That is, you can create not the same diameter, but you can create more. Let’s say thirty meters, one hundred meters – create

such disks. The larger the diameter of the disk, the more this entropy of ether, magnetic particles is generated, and the greater the power of these things, energy.

Irina: First question, about creating an engine. Do you understand by the word autonomous - this means without the supply of external energy?

Alexander: First, in this generator itself, in the control system, there is some kind of battery, accumulator or capacitor bank. The battery or capacitor is pre-charged from an external source and installed in this device. And then all these solenoids are connected from this capacitor bank, perhaps in pulse mode, as you advised, or simply using a simplified circuit. And then we start the device, these disks begin to rotate. The first two windings, which are located in the center, unwind these disks, and the remaining eight windings simultaneously, when unwinding, remove electricity from these magnets, a pulsed direct current. As some people told me: “It is safer than alternating current. Alternating current kills even at low voltages, but direct pulsed current is safe.”

Irina: There are such medical devices.

Alexander: Yes. And if you use it, say, in everyday life or anywhere, it will never kill a person, because this current does not have these effects.

Irina: Yes. His vibration frequency is different.

35:40 Tip for maximizing energy.

Irina: In order to maximize the energy output from this magnetic energy, that is, so that you spend less than you take in energy, for this it is necessary to make the design of the disks themselves as light as possible. For example, magnets should not be made from iron or steel, but from lighter magnetic alloys. Well, and what they stand on, these basics, is also made as easy as possible, so that the part of the energy that will be released is electrical, so that it is not spent on overcoming

the force of gravity. Because, in any case, this happens in a gravitational field.

This is not in outer space, where there are no planets. Therefore, the gravitational field still acts. It works from top to bottom and in such a way that the heavier the magnets are, the more energy is required to accelerate them and maintain rotation. This is the first. And the second, as I already said, is to supply energy in impulses. This way you will save energy. And while the disks are spinning, you will take this rotational energy. And as soon as it starts to stop (well, it won't stop completely yet, because if it stops completely, then it will have to be accelerated again), it will be necessary to give another impulse, that is, to supply energy with such short pulses.

Alexander: I see. There is also this effect, based on the law of conservation of energy. The magnets that rotate in their disks cannot move somewhere, up, down, left or right, due to the fact that they are pinched on these disks, relative to this stationary disk. And when we increase the speed, to about 8 kilometers per second, this is the first escape velocity, a self-repulsion effect occurs between these disks. But this effect, according to the angular velocity formula (the angular velocity vector of one disk and the angular velocity vector of the other disk), is slightly different for the two disks. The difference between the angular velocity vectors, which are directed vertically, creates a lifting force. This is an additional inertial effect. And, plus, the entropy of the ether in this area creates additional energy for movement. I can show you how interested you will be.

39:28 Flying saucer. Drawing of a flying saucer. The principle of moving a flying saucer.

Alexander: A device like a flying saucer. There are vertical stroke generators in the upper and lower parts, and horizontal stroke generators along the outer periphery. The difference between these pushing energies that are located on these objects is a maximum of three meters. I said that this generator can be created from several rings, and with the help of the difference between these buoyant forces we get a vertical stroke. Fast or slow - it depends on the control system. And this one, horizontal. When we tilt this device using some kind of gyroscope that is located inside this room, the pilot controls and changes the angle of the vertical movement of this device. And the

device begins to move in a horizontal direction. Both horizontal and vertical movement, in any direction, at any speed. Here is the working compartment, and along the periphery of the working compartment is the cargo placement area. Anything can be placed.

Irina: Yes, this is similar to what I already said - one of the types of atmospheric engines that are used in our saucer ships. Not only in saucers, we have ships of different shapes. We just have a different material, but we also use repulsion from the gravitational field of the planet in such a similar way. True, not by rotating the magnets - there comes energy from the power plant, which shields. And the energy plant works differently, based on other radiations and energies.

Alexander: I see.

Irina: But here you have already said that this rotation needs to be accelerated to eight kilometers per second, to the first cosmic speed. You will accelerate it to such a speed by spending a certain amount of energy, and this will depend on the mass, density and other characteristics of all the working elements of this structure.

42:06 Arbitrary acceleration at high speeds. Self-repulsion. Movement speed. The influence of density, mass, friction force on the speed of movement.

Alexander: I see. But I said regarding acceleration that when the disks spin in different directions, up to this speed, relative speed, they fly apart and self-repulsion occurs. But due to the fact that self-repulsion is impossible, due to exceeding these speeds, the disks begin to spin arbitrarily, without the work of the magnets, and after that we can only remove electricity during this phenomenon, at very high rotation speeds.

Irina: It will decline if you don’t support it.

Alexander: It can be supported a little by the solenoids. I just mean that when they spin up in this place, in different directions to these speeds, they should, as it were, repel each other, but since they are

pinched on this central disk, they do not repel. That is, the potential energy of repulsion turns into kinetic energy of rotation, thereby obtaining additional energy of rotation (unlimited rotational speed). And in this case, the solenoids or control system are already working, which removes this electricity in the form of pulsed direct current. The higher the rotation speed, the higher the energy of this intermediate region of new matter, and its density changes. Thus, you can regulate the consequence of density - the speed of movement. Not even talking about speed, this is simply not movement, but like a float in water - it either floated or sank.

Irina: Yes, I understand. You, as an engineer, as a designer, will calculate using a special formula how much energy you will spend on overclocking, how much energy on maintenance, and how much you will get as a result.

Alexander: I see.

Irina: Taking into account density, mass, friction force and all other characteristics, because they will influence.

44:44 Wearless friction. Ways to reduce friction force.

Alexander: I want to say something additional about the friction force. In the Soviet Union, back in 1956, the discovery of wear-free friction was made. Its essence lies in the fact that finely dispersed copper powder is introduced between friction pairs, which, when moving from steel to steel (especially stainless steel), creates a copper film, twenty-four microns, which levels out all irregularities between moving parts and creates the effect of reducing friction. The higher the rotation speed, the greater this effect. With increasing speed, these discs have less friction, that is, there is no resistance in friction.

Irina: Yes, a magnetic field will be released. In order for it to intensify, you need to use metals such as sodium. If you take a thin film of very small sodium particles in pure metallic form and cover the surface of these devices, this will allow you to better control the magnetic field. That is, it will intensify and be directed, as we say, to stabilize, and not immediately dissipate in space and in the crystal lattice of atoms.

Alexander: Okay, I understand. Thank you very much.

46:56 Final words. Promoting scientific and technical research to knowledge of the world. Raom Tiyan's advice is to continue research and record the results.

Irina: It’s very good that you are researching those areas of science for which funding is not allocated by your scientific communities. I feel in you an enthusiast of knowledge of the universe. Science was advanced by such people, not only on Earth, but also by intelligent Spirits on any planet in the Universe. Here your scientific and technical search will contribute to understanding the world.

And if you yourself carry out these experiments that I said (with pulsed current, with weight reduction, with sodium, etc., it will be possible to introduce a small amount of niobium into a ferromagnetic alloy to stabilize the magnetic field), your scientific search will yield many discoveries for you and for subsequent followers who read your scientific works.

Record everything on some medium so that other people can read and repeat it later. When not just the diagram that I saw, but the working model is ready, then you can demonstrate it to others, and they will study it. And even if you do something wrong, if you make a mistake, there is nothing fatal about it, an erroneous result is also a result. This is a sign to look elsewhere, and it's time well spent. I want to wish you success in your scientific, work and personal activities and life, and that insights from your Higher Self come to you.

Alexander: Thank you very much!

Maxim: Thank you very much for this conference. I think that people who are interested in science and technology will find it very interesting. For viewing, for studying and in order to understand in general what energy is, and how to obtain this energy from the materials and the space in which we find ourselves.

Alexander: I understand, thank you.

Maxim: Thank you, goodbye.

Irina: Goodbye.

June 01, 2020

Participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

Alexander Markov – design engineer;

Raom Tiyan is a representative of the planet Burhad, a specialist in energy interactions in the environment of the material world.

Video in text

January 18, 2023

#92 Quantum transition. Advice from aliens. Signs of an increase in human vibration frequency (part 1)

https://blog.cassiopeia.center/kvantovyj-perekhod-sovety-ot-inoplanetyan

https://www.youtube.com/watch?v=NG9KVWZd8ts

Maria: Hello, dear Irina, Maxim. I greet you, dear MidgasKaus, Raom Tiyan and LiShioni, and in your person the entire Interstellar Union. Thank you for your sincere participation and support of our civilization in general and our Cassiopeia group in particular.

00:59 Friends, please tell me, is this, along with other reasons, connected with the fact that you also once incarnated here, and now this planet and its inhabitants are especially close to you?

Irina: Hello, dear friends. My name is Irina Podzorova, I am a contactee with extraterrestrial civilizations, and today Maria's questions are answered by: MidgasCaus from the planet Esler (biologist-psychologist), Raom Tiyan from the planet Burkhad (specialist in energy interactions in the material world) and LiShioni from the planet Shimor (specialist on the astral world and its actions and interactions with the material world).

They also welcome you and thank you for your active participation in promoting the ideas of the Interstellar Union. This just means that in one of your past lives (LiScioni is speaking now) you incarnated on one of the planets of the Interstellar Union, and not just incarnated, but most likely performed work related to contactees or space. Therefore,

all this is familiar to you.

As for us, Raom did not incarnate, MidgasCaus did not incarnate either. But we have not explored this issue in such detail as to say that we had some kind of life on Earth, at least significant. LiScioni says that he has already incarnated on Earth three times: in Brazil, Canada and Southern China. This was during what you call the early Middle Ages.

03:27

Maria: I would like to devote our meeting today to such an important process that interests many on our planet - the Quantum Leap. That is, the very process that you and I are actively promoting, and which should bring our planet and Civilization to a new evolutionary stage of development. You already said once that it is associated with the cyclical development of the Universe: that is, a continuous transition from a subtle-material state to a dense-material state, then again to a subtle-material state, and so on, due to a decrease or increase in density, that is, a change in vibrations.

As we are told in channelings, this is a unique process in the entire Universe, which will have significance for our entire Galaxy and the entire Universe as a whole, and we are talking about the ascension of the planet to a higher density along with its inhabitants in physical bodies. That is why so many souls want to incarnate on Earth at this particular time.

Please tell me, is this really a unique process and how does it usually go if it is unique now?

Irina: (reported by Raom Tiyan) Yes, it is unique for every person who lives at this time, and for the Earth in general, but I would not say that this is a phenomenon that it has never experienced. It's truly a cyclical process. In ancient times, even before the discovery of the Earth, there were cycles of these leaps that you are talking about. But still, this process is unique, because the reaction of living intelligent beings on this planet is unique. As the Interstellar Alliance has repeatedly emphasized, the speed of this quantum transition, the speed of

passage through these events and their consequences for the planet and intelligent beings depends on the reaction to this quantum transition and on internal vibrations. That is, the more careful you treat the planet and each other, the more you will pass this race with fewer consequences. The more you cultivate love and light in your heart, the faster and safer it will be for you.

06:07

Maria: As you already mentioned, this process occurs due to an increase in the vibration of individual quanta - the smallest particles of the material world that are in individual vibrations, in which they do not lose their material nature and the ability to form dense material bodies. It is believed that vibrations have been rising very much lately, but this process does not happen quickly, but gradually, and according to your data, the rise in vibrations takes 90-96 days, then the adaptation time takes 60-78 days.

We measure vibrations according to Schumann. We have several stations on the planet. And the Schumann resonance is the phenomenon of the formation of standing electromagnetic waves of low and ultra-low frequencies between the surface of the earth and the ionosphere. The frequency was first calculated in 1952 and was then 7.5 - 37.5 Hz. This phenomenon was first mentioned by Fitzgerald and Tesla at the turn of the 20th century. There is a statement that from 2000 to 2014 the frequency more than doubled: that is, 9.3 to 16.5 hertz, and at the end of 2016 it was already 36 Hz.

In our esoteric circles, vibrations also measure emotional qualities. I really don’t know how, but the lowest of them is the fear of death 2.7 Hz and up to the highest 205 Hz is unconditional love.

Please tell me what vibration is in your terminology and how do you measure it?

Irina: What we translate in Russian as “vibrations” for the material environment are vibrations of the environment in which it is located, in this case atoms, molecules, various fields and so on, that is, the movement of matter. According to the Interstellar Union, atoms contain

energy and nothing else. As for spiritual vibrations, since there is no matter there, there is nothing there to vibrate. But this is what we call analogues of material vibrations, which can be translated as “properties, nature, qualities” of this Spirit. We translate this into Russian with the same word “vibrations” in order to emphasize the inseparability of the Spiritual world from the material, the origin of the material world from the spiritual.

Material vibrations, what you call various electromagnetic waves, Schumann waves, light, sound, radiation and so on, we measure with special devices that are based on the resonance effect. The vibrating medium creates a resonance in this device, and it shows on a special scale the speed of these vibrations, their vector direction, and so on.

09:57

Maria: So, an increase in vibrations is an indicator of a quantum transition? What is the maximum frequency we should reach?

Irina: This is a consequence of the process that has begun in the Spiritual world, which can be described as follows: The Divine mind increases the quantity and quality of the spiritual energy for the dense material world that it directs. The existence of any atom and any quantum is supported by divine energy from the Spiritual world. To put it very simply, then - when God directs more energy of a higher quality and quality, then it, descending in frequency of vibrations through the subtle worlds into dense material ones, begins to raise the vibrations of the material world.

When asking the maximum level of vibrations, do you mean the vibrations of the planet?

Maria: Yes, in Hz.

Irina: Did Schumann measure precisely the electromagnetic vibrations of air and soil?

Maria: Yes, between the Earth's surface and the ionosphere.

Measured by sensors. In the last two years, the maximum was 9 Hertz at one of the stations in Russia.

Irina: As for the earth, the soil, the vibrations that will occur should be within the maximum limits of up to 37 Hz.

12:59

Maria: Lately, 2012 has been mentioned as the beginning of the quantum leap of the Age of Aquarius. From your point of view, what significant happened in 2012?

Irina: The beginning of the quantum leap for you happened much earlier. This was in the eighties (1982-1983). And preparation for it - that is, a slow increase in vibrations - has been going on for the last two centuries. The most noticeable increase was at the beginning of the 20th century (approximately 1911-1912). A century later there should have been a sharp jump, but everything happened earlier, for the reasons that in the noosphere of the Earth there were large waves of aggression, anger, fear, and so on. We needed to take you to a higher level. And every year (after 1982) there was a gradual increase in the activity of quanta.

15:13

Maria: So, you are actively observing the increase in vibrations and changes in our planet?

Irina: Yes, we are participating in this together with plasmoid civilizations, which also help raise the vibrations of your planet. For example, there is the Spirit of the Earth - a plasmoid, which also increases its vibrations. He, one might say, in your opinion, is constantly in a state of meditation of Connection with the Light. It also increases vibrations through itself, that is, it helps the transition proceed smoothly. The same goes for the plasmoids of the Solar System and this sector of the Galaxy - they also actively participate in this transition of both your planet and others, because other planets also go through it at their own level.

16:02

Maria: Thank you. In order for our listeners to understand more clearly the whole picture of what is happening, I would like to begin the explanation from a more global perspective of the mechanisms and causes on the universal plane. And gradually move on to the processes on our planet that manifest themselves in all areas of our lives. These are planetary changes, climatic, geopolitical, social changes, also changes in the structure of the human body, DNA, external and internal increase in vibrations. Friends, if you know any other facts that I did not list in the subsequent conversation, I ask you to supplement and expand our knowledge about our planet and civilization as a whole.

I would like to briefly touch on the structure of the universe, its laws. From various channelings we have information about the multi-layered nature of our universe, about the multi-level structure of our Spiritual world. You told us about 24 levels. In channelings, 12 levels of structure are very often mentioned, where the first is the lowest, and the twelfth level is the place of the Absolute, the Creator of our Universe. According to this scheme, we move from the third dimension to the fifth along with physical bodies.

Have you heard of such a spiritual system - twelve levels? Please comment on your understanding of the structure of the universe, called third and fifth densities. What characterizes them according to your classification, and does this mean that on our planet there will no longer be the opportunity to experience duality in the third dimension?

Irina: What is the experience of duality, please clarify more broadly?

Maria: The experience of duality is a characteristic of the third dimension, where we have the full range of all vibrations: from the lowest to the highest. Which is what polarity means - good and evil, good and bad, dark and light, and so on. Our energy on Earth is more polarized, we have a very wide range. And this is called duality.

Irina: What you called 24 levels of the Spiritual world has nothing to do

with the dimension of the Spiritual world. There are no measurements. The spiritual world is outside the boundaries of the material Universes. What you now call dimensions are subtle worlds. Between the dense material form of existence and the Spiritual world there are subtle material worlds, which we call plasmoid.

In total, there are 59 levels of density in the material world. And the sixtieth is considered the Spiritual world.

Your earthly contactees can designate any plasmoid and even the Spiritual world with the word “dimension”. They will measure it by the vibrations of their soul. So they got into the Spiritual world, let’s assume - as much as it seems to them, as much as their vibrations have increased, they will say: “I am now in such and such a dimension, in the fourteenth, for example, or in the twenty-eighth”... They may be in the Spiritual world outside the boundaries of the material Universe, and can also be in plasmoid worlds at any level. Everything here, as you understand, is subjective. Therefore, we have a system for studying the universe, which is based on contacts with the plasmoids themselves from different density levels (you say dimensions, but we call them density levels).

20:48

Maria: That is, we will not change our density during the ascension, during the transition?

Irina: The dense material world itself will not cease to exist. This is only possible at the end of its cycle. And the development cycle of the dense material world is still many billions of years before its end. What you call ascension is different. This is a transition to higher spiritual vibrations. We will live in this physical body.

Maria: By maintaining our physical bodies, are we simply moving to a higher spiritual level?

Irina: Yes, the material world will not cease to exist according to the hypotheses and assumptions and predictions of our scientists, which

are based, among other things, on contacts with the Spiritual world, with our Mentors. We cannot carry out scientific research without the approval of our spiritual Mentors; for us, science is combined with knowledge of the Spiritual world. And these Mentors are the highest Angels of the 22nd level of the Spiritual world, who know information from God.

These are spirits who are at high levels of spiritual development, they are not embodied, they retain 100 percent of their spiritual essence (unlike earthlings), they are completely in the light of knowledge and love. And they know from God about the periods of existence of the worlds.

23:39

Maria: If we touch on the existence of the Universe, then we have such channelings with Shiva, in which he said that there is an infinite number of Absolutes outside our Universe. And in accordance with Vedic teachings, the process of existence of the Absolutes can be compared to the inhalation and exhalation of the Universe. That is, exhalation, as I understand it, is the well-known Big Bang, from which the Universe began its expansion. The Absolute began division and development for the sake of knowing itself. Then the creators of worlds appeared, who created the lower levels of the universe. Inhalation is the beginning of a process that we can observe as drawing into ourselves all the results of our division. That is, all levels of the universe must rise from the lowest to the Absolute.

Is this the cyclicity that you mean: this inhalation and exhalation of God?

Irina: I understand what the contactee was talking about with Shiva, I understand that it was he who translated into his own language the images that Shiva gave him. But if Shiva comes into contact with another contactee, you will hear different words at the level of his images and at his level of worldview.

Those creators of the worlds that he identified, in our terminology, will be the very plasmoids that help form Star systems. They participate in

the processes of star formation, the formation of planets, and even create the souls of animals, as if giving birth to them from themselves, from their mental images. These are truly the creators of worlds, but this is not the one

The Creator is God, whom we speak of as the creator of everything.

25:41

Maria: Shiva says that if during self-knowledge the share of dark, low energies, divorced from integrity with the Absolute, becomes greater than the light forces, and it can no longer be leveled out, then the Absolute opens its center and allows Shiva to destroy everything. Figuratively speaking, to fuse all spirits into a single primordial matter. And everything will start from scratch. Is it so?

Irina: Regarding the fact that the Absolute allows Shiva to destroy the world when there is more darkness than light - this is an even greater transfer at the level of the contactee, as he perceived. Darkness itself does not exist, there is only the closure of light. That conditional darkness that exists for him is quite real for his consciousness, but not for the consciousness of God, for him there is light, he is the Light itself.

This conditional existence of dark forces does not need to be destroyed either by God or Shiva, because it is in the will of God, who gave freedom.

The development cycle of the Universe, of course, depends on the vibration of the existing intelligent spirits embodied there. But it would be more correct to say that with their low vibrations the spirits themselves, who live in the material world, reduce the cycle of existence of the dense material Universe that was released for them. That is, it is not God who sends Shiva to destroy the Universe, but the embodied spirits themselves (and not only dense material ones, I want to note, because in the subtle material worlds there are also low vibrations) lead to this.

28:44

Maria: That is, this can explain that highly developed civilizations are trying to maintain a balance of power, gradually bringing low-vibration civilizations up to high vibrations. That is, they help us.

Could it be that behind the scenes there is simply a struggle for influence on our civilization in order to have the opportunity to settle here, the benefits of incarnation on Earth, to undergo experience here?

Irina: The fact is that who and where to incarnate is decided not by you and not by us. This is decided by our Mentors. We can only ask them to choose an incarnation on a particular planet, but they will do this only if they see that this meets the goals and objectives of our spiritual growth, as well as the spiritual growth and development of all those who will be in our family or meet us in life. Mentors will see who is incarnated nearby and why it is needed, what lessons the spirit will go through when encountering this or that person. This can be a very multi-move combination.

It often happens when a low-vibration spirit comes to consultants of the spiritual world and says that it can no longer live without the Light. In his prison, which he himself created, he does not perceive the Light, he has lost this ability. And until he incarnates again and develops this ability to perceive Light, it will never develop in him, because in the Spiritual world there is no time and there is no change. There is eternity there, and that means he will also be in this state for eternity if he does not incarnate. And then he can come to the consultants and ask to try again. They can study it, what exactly lowered its vibrations (what acquired qualities), and then a multi-step combination, for example, by incarnating on this planet, you will get rid of such and such a quality, and in incarnation on another planet you will develop the opposite...

31:34

Maria: That is, as I understand, there is a queue for incarnation. Could it be that on certain planets a low level of vibration is

artificially maintained so that just such souls can incarnate here? Can certain souls incarnate on certain planets? Should the vibrations be somehow comparable in resonance? A low-vibration spirit probably won't be able to incarnate on a high-vibration planet?

Irina: He can if the Mentors send him, if they think that's where he is

will gain useful experience. Well, or high-vibration beings will get a useful experience with it, this also happens. Most often it is combined - one and the other.

32:31

Maria: I heard a saying that spirits who have undergone experiences on Earth are highly valued in other civilizations. Is it so?

For example, a group of plasmoid civilizations, Hamilia, is agitating for incarnation on their worlds.

Irina: The Earth is truly a unique planet. But my personal opinion (Raom Tiyan says) is that each planet and each plasmoid world is also unique in its own way.

For example, the Earth is unique in that there you can develop the will in the direction of suppressing instincts and developing those qualities that were invested by two very close, but different civilizations. Plus experience in the body. Incarnation in your society also provides a rich spectrum of states and the opportunity to experience these states. For example, building a family, various public organizations, interaction with people of different beliefs, religions, etc. and so on. All this together produces such a quality as the elimination of xenophobia. This is one of many examples.

On any planet and in any plasmoid world, a spirit from level 1 to 24 can theoretically and practically incarnate. In order to send a spirit to incarnate on Earth, it can also have any level from 1 to 24. The

spiritual world of these levels is universal for the entire Universe: both its dense and subtle material parts are possible for manifestation.

Plasmoid worlds start from levels 4 to 59. That is, 56 levels of density of plasmoid worlds and 3 levels of density of a dense material world.

35:21

Maria: It turns out that by sending various souls for incarnation, the Mentors directly influence the vibrational level of civilization and planets? If they send spirits of low vibrations, or those who need to go through some kind of negative experience, to a certain planet, for example, planet Earth, does that mean the general level of the planet will be appropriate, and the noosphere will contain appropriate vibrations?

Irina: Before the spirit incarnates, he is shown the plan for this incarnation. The spirit promises to follow this plan. His main goal in any case is to get closer to the Light. Well, of course, in your understanding of Light, goodness, and so on.

But when viewing places possible for the embodiment of a particular spirit, naturally the Mentors pay attention to the purity of the noosphere (vibration frequency). For example, they see a low-vibration noosphere on the planet, where there are wars, murders, crimes, or simply anger and discontent of people (and it happens that there are no wars on the planet, but the vibrations are low, because there is hidden aggression of people in whom these murders and crimes occur in their minds , and from this practically nothing changes in the noosphere, because all thoughts go there).

37:15

Maria: So, over the history of our planet, we ourselves have accumulated, or rather, here we had such souls who created just such a noosphere?

Irina: It’s not so simple, because, as I already said, the Mentors, of

course, can send most low-vibration spirits there to a planet with a low-vibration noosphere, because it's easier for them to complete their lessons there. But this doesn't always happen. It happens that high-vibration spirits are sent there so that they can go through their lessons there or give the same low-vibration spirits the opportunity to go through them correctly. That is, just like teachers are needed in any school.

Maria: Can we say that the school curriculum here is very difficult for us, since most of the spirits obviously couldn't cope with it and therefore created a low-vibration heavy noosphere for us?

Irina: It's not that simple either. Sometimes it happens that a high-vibration spirit that has incarnated on any planet, including Earth, on the contrary, degrades. Having, for example, come to power on your planet, seeing an abundance of material opportunities and pleasures around him, he gets carried away by them and forgets about his mission. And gradually his spiritual mission of serving the Light becomes uninteresting to him. He lowers his vibrations and no longer feels that Light from his previous activities. Then he gradually begins to degrade, throw the thoughts of Light aside, and fight with his conscience. It turns out that an initially high-vibration spirit creates conditions for reducing vibrations in the noosphere.

It also happens the other way around: when a low-vibration spirit from the first 6 levels has incarnated (a demon or prince of demons from the 6th level), but due to the fact that it fulfills its task in this incarnation, it may not immediately complete it, but only within life comes to this, then the Mentors do not just leave him in incarnation; in any case, he has a Guardian Angel who, through the Mentors, sends good thoughts to the demon. Mentors try to create situations in his life so that he meets the right people, the right books, and so on. That is, they direct him in any case towards the path of spiritual development. And he can then choose Light. At first he has a certain struggle. It depends on the will of the spirit and on its sincere faith and desire to be in love. He can get through it all pretty quickly. So, when he comes to power, on the contrary, he will do good. And in the end he will do even more good than the high-vibration spirit that he degraded.

Maria: So we have a chance here to develop in all directions?

Irina: Yes, you said correctly.

41:28

Maria: Now I want to briefly touch on some planetary changes, which, for example, Valentina Yuryevna Mironova talks about. This is an academician, I believe that she is also a contactee.

She spoke about the restructuring of the magnetic configuration of our planet under external influence. For example, on January 6, 2020, Norwegian scientists recorded strange Northern Lights activity in Norway, Finland and Iceland. A sudden change in ground currents and magnetic field was recorded. It was also reported from the NASA satellite that the density of the solar wind jumped more than 5 times, and the interplanetary magnetic field near the Earth sharply turned 180 degrees. Scientists stated that a crack opened in the Earth's magnetic field for many hours, through which the solar wind flowed to the earth.

According to Valentina Yuryevna, the interplanetary magnetic field rotated 180 degrees and a local gap formed in the polar ionosphere, which did not occur on its own.

She also describes that the next day, January 7, a very powerful ejection of jets was recorded towards the Earth from the supermassive black hole M87. And there was a reconnection of the lines of force - fundamental physical processes in plasma, as she describes, responsible for all phenomena of plasma activity.

She writes that there are two types: forced and spontaneous. And he believes that this was a forced reconnection and restructuring of the magnetic configuration under the influence of plasma flow. Our Sun took an active part in this. On December 21, very strong magnetic explosions were recorded on the Sun.

As Mironova emphasizes, we had a unique event of cutting into the Earth's magnetic shell, which has no analogues and nothing to compare with, and we were doused with cosmic rain of gamma radiation of enormous power. And this was not a random factor,

but targeting the planet. So I would like to know if you know this fact? How would you comment on it? What is the purpose of this exposure?

Irina: In the dense material world, through your instruments you see only those consequences that you listed: the reversal of the magnetic field, intensification of flares, the passage of the Earth through the radiation that came from the black hole... It flies in orbit around the center of the Galaxy along with the Sun . Your Earth, together with your Sun, flies in orbit around the center of our Galaxy. This radiation was several times wider than the size of the solar system.

The reason is the work of those very thin-material plasmoid civilizations that I told you about. They help the transition. These are plasmoids of earth, air, water, your earthly plasmoids. A group of plasmoid civilizations, which on Earth is known as Kryon, takes an active part in this. Kryon actively cooperates with the plasmoids of the Sun. There are 17 plasmoid civilizations near the Sun and in it itself, and almost all of them take part in the described processes. 7 of them of different density levels (from 9 to 16) are especially active. They cause changes both in the Sun itself and in the radiation that goes to the Earth.

47:35

Irina: I would also like to say a few words to people about how to go through the transition correctly, so that it does not bring severe disorders on the physical, psychological, energetic, ethical components and spiritual level.

An increase in vibrations occurs not only in the earth, not only in the soil, in the atmosphere, in the ionosphere and the astral world. Change at the quantum level also occurs in the bodies in which you are embodied. Changes are accompanied by a variety of sensations. The most common of them is a feeling of subjective increase in body temperature. Sometimes, your devices even actually register an increase in temperature. You may also feel a lack of physical strength and fatigue. You no longer want to work, but want

lie down and rest.

It is also possible for vibrations and waves to pass through the body (goosebumps, a current wave) as if a wave of vibrations of the body itself were going from the top of the head to the spine. Ringing in the ears often occurs. The hearing aid and auditory nerves are rebuilt. This is all because the body is under stress and it needs time to adapt to all the changes. Changes also occur at the cellular and subcellular level, DNA. Various mutations can occur.

And we need to help the body go through this safely, without increasing the incidence of cancer, etc. (cell mutations can then cause cancer if this is not recognized in time by the immune system). How to help?

The first is a spiritual state. No fear of these sensations, full conscious understanding that this is right, that this is how it should be.

The second is getting rid of your own emotional blocks, that is, emotional-energy blocks that consist of various negative emotions.

Third, working with the mental plane. That is, getting rid of the negative beliefs that give rise to these emotional blocks. They come in a wide variety. For example, a person has an inflated level of expectations regarding how he should be treated, how he should be treated. That is, there is some kind of mental construct in the mind. When faced with reality, such a person will be filled with negative emotions. And no matter how much he cleanses himself on an emotional level, until he changes his mental attitude, he will continue to be filled with negativity. That is, you need to work on your inner world. Accept, understand.

But in no case should you leave your mental and astral body empty when getting rid of negative attitudes. Because they will be filled with the beliefs of those people around you, and it is far from a fact that they will bring you any benefit, even if they seem positive. This is no longer your path of development. You will simply live someone else's life, for example, the life of the most authoritative person for you.

Be sure to fill your inner world with your own positive attitudes. Of course, you can do this based on the words of other people who are authoritative for you and whom you love. It is a very beautiful phenomenon when a person follows his spiritual master. But in any case, fill his words with your content, your faith, your love.

It is very useful to be filled with Light. As MidgasKaus previously told you, every morning and evening read the Eslerian mood:

54:16

I AM THE UNIVERSE, THE UNIVERSE IS ME.

THE POWER OF THE UNIVERSE IS MY POWER, AND MY SPIRIT IS PART OF THE STREAM OF EXISTENCE OF THE CREATOR OF ALL WORLDS.

HIS POWER WILL BE DIRECTED FOR THE GOOD OF ALL BEINGS RESIDING IN ALL WORLDS AND PLANS OF EXISTENCE.

REALITY WILL REMAIN IN TRUTH, AND LIES IN THE ILLUSION OF PERCEPTION WILL ALWAYS DISAPPEAR.

Read these words not just mechanically, but try to feel their meaning. Then you need to close your eyes and be sure to sit in this position for 10 minutes. When you feel the expansion of your inner space, try to merge with this Light that will arise.

If you don't feel anything, don't stop. Sensitivity develops over time. Appears in absolutely everyone. This has already been tested by many civilizations, representatives of the Interstellar Union.

Maria: Thank you, very good advice.

Irina: Thank you for the good questions, very well formulated. The explanations to these questions also helped me a lot in answering and

expressing my opinion, since I really think the answer is correct. A correctly asked question is already half the answer.

Maria: Thank you too. We receive a lot of information from different sources. But mostly, of course, from plasmoid civilizations and spiritual sources, which may not be entirely adequately perceived here. Therefore, it is very important and very interesting for us to hear your explanation, your point of view, so to speak, as a civilization that is with us in the same dense material state.

Participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maria Sokalski – guest;

Maxim Rusan - head of the Cassiopeia project

The curator of MidgasCaus from the planet Esler is a biologist, psychologist and specialist in alien civilizations;

Raom Tiyan from the planet Burkhad is a specialist in energy interactions in the material world;

LiShioni from the planet Shimor is a specialist in the astral world and its interaction with the material world.

#95 Answers to the most pressing questions: Bigfoot, Shambhala, pyramids of Egypt and much more

https://blog.cassiopeia.center/snezhnyj-chelovek-shambala-piramidy-egipta

https://www.youtube.com/watch?v=rvpQg6uQCfY

Alexander: My name is Alexander. To begin with, I would like to once again thank all the employees of Cassiopeia, all the guys, Irina, Maxim for what you do. You are really doing a very big, very important bright thing.

Irina: Hello, Alexander! Hello, dear friends!

Today is another Q&A session. And today with us are LiShioni from the planet Shimor, MidgasKaus from the planet Esler, and today Larisa (Aunika) came to visit us, she is now next to her curator Pios Nior, already known to our viewers. He is also from the planet Esler.

01:23

Alexander: Our scientists and science fiction writers have this idea about the possible existence of civilizations based on artificial intelligence. Is there an artificial intelligence civilization in the known universe? Is it possible for artificial intelligence to develop and evolve independently?

Irina: There are civilizations not of artificial intelligence, but rather of combined systems. What you call an artificial neural network and a biological body. But this exists on the organosilicon life form, it's just

easier to make such organisms, because Those structures that should be responsible for storing information in these artificial environments are most often made on an organosilicon basis. And this is easier to combine with organosilicon organisms. But in any case, there is still an organic basis there, as the basis for vital force, without which no Spirit can unite with the body.

02:59

And what you now call “artificial intelligence”, if it is just automatic systems, what you call “robots” are not civilizations. These are simply automated systems that can reproduce themselves, but still, according to a given program. They are not capable of independent choice. They are capable, but again within the framework of the program.

03:27

Alexander: There is a version that a certain object, presumably of artificial origin, was spotted in the orbit of our planet. It resembles a huge black monolith. According to contactee Mitya, who had already been heard in the group here, he said that this is a scientific satellite that has been in orbit of our planet for more than 10,000 years. On the Internet they nicknamed him “The Black Knight”. Does it really exist? Whose civilization does it belong to? And what purposes does it serve? What is he doing now?

Irina : In fact, there are several automatic observation probes that fly without a pilot in the solar system and above the Earth.

04:23

Currently, 72 such objects have been recorded in the Solar System, including around the Earth. With such an age, it is necessary to specifically look at the movement pattern of these satellites. But I want to say that the bases that exist on the Moon, on Earth - alien bases, and in the solar system in general, exist not only 10,000 years ago, but also 12,000 years ago. Almost immediately after the war, these bases were rebuilt in a new way. Because those that existed before the war

were destroyed by Selbet.

05:17

And, naturally, these automatic probes immediately began to fly, but they are more for navigation. They contain so-called “gravity beacons” that guide the ship’s gravitational engines and give them guidelines for the correct exit from a gravitational jump, for example. Moreover, a lot of ships from different civilizations fly near the Earth, so fine tuning is required.

05:52

Alexander: There is a widespread interesting version that on the continent of Antarctica there is a currently operating alien base, which was either rediscovered or occupied by representatives of Nazi Germany back then, the so-called “New Swabia”.

Can you comment on this, does such an object really exist? What civilization runs on it?

Irina: They didn’t take it. They were there. But they set it up like a bunker. Not just a base, but a small bunker. The alien base is much older, and it exists there now.

06:35

But it belongs to the Galactic Federation of Light, whose main representative is Futissa, and there are also from the Interstellar Union - Tashig and Burkhad. It belongs to these three civilizations. This is a fairly large base, but any ships can fly to it, even those not part of the Interstellar Union, which are conducting research. That is, it is open to everyone, like almost any base in the solar system.

07:09

Because the Interstellar Union and the Galactic Federation of Light have a rule according to which a base on another planet not included in the Interstellar Union can, if necessary, be visited by any ship for scientific, research or tourist purposes.

07:31

Alexander: Can we say that there are representatives of earthlings at this base?

Irina: Only if, as contactees. They may be like physical contactees, but they can be there temporarily. If you are talking about an alien base.

Some specialists from other planets do not take their contactees to other planets. For example, as Kirchiton does with Irina, who is from Daraal. But they are simply brought to the base or even to Earth, or they meet on a ship, move away from Earth and do not fly anywhere. There are such contacts.

08:25

Alexander: Perm anomalous zone, Perm anomalous triangle. Is there a base there too, and what civilization does it belong to? What is special about this zone? Overflights of spaceships and many other different anomalous phenomena, including changes in the flow of time, are very often observed there, that is, there are many different observations. What is this connected with, and who is present there?

Irina: Can you show me the map? They don't know their way around our cities well.

Maxim : I propose to tell you in general how many bases there are on Earth, thin-material civilizations, plasmoid portals, so that it is clear that the anomalous zone exists not only in Perm.

Irina : Mid, how many alien bases are there on Earth today that belong to both the Interstellar Union and all other civilizations?

09:25

In total, there are 128 alien bases on Earth (today), including underwater ones. Subtle material portals - old ones can close and new ones open. Of the existing portals - some kind of transport plasmoid nodes - there are more than one and a half thousand. They are more common over large cities, mountains, and volcanoes.

10:31

Alexander: Can you tell us something about the origin of dolmens? Why were they created, when, by what civilization? There is such a phenomenon as the Spirits of Dolmens. Now many people are beginning to contact the Spirits of dolmens. What kind of phenomenon is this, and is there any technique that will help a person start making contact?

Irina: There are many types of dolmens. They were built for different needs. There were funeral dolmens where people were buried, there were for treatment - walls built in a special proportion and the size of the chamber, and its shape, which made it possible to attract the energies of plasmoid civilizations from space, that is, open a portal or strengthen it, already existing, so that representatives of plasmoids would come there civilizations to treat the sick. These are all traces of those religious cults that existed before the adoption of Christianity.

There were some dolmens for communication. The shamans went behind these thick stone walls, they were closed with the help of a kind of door. They were there in the dark and without extraneous sounds. There they communicated with subtle civilizations, with the Spiritual world.

For some people who were sensitive to these types of contacts, this intensified and they came out as contactees. This could help them initiate contact.

There were many different types of dolmens, they were built for different needs. But they were built not only by people, but also with the help of alien civilizations. Some specialists helped move these stones with an anti-gravity beam to make it easier. Not all were built this way, but some were.

How to communicate? To tune in to contact, it is better to do this inside the dolmen; they are mostly open. You need to stay alone, try to go to the Astral, sit in meditation. That is, who does what energetic or astral practices. It's better to do it there. Portals are not open in all dolmens. But if there is a photo of a dolmen, then we can go and look in the Astral to see if they are there.

14:41

Alexander: The pyramids of Giza, Mexico, China, the Crimean pyramids - the heritage of which civilization? What are they for? For what purpose are the pyramids built in a certain sequence throughout the planet? There is an understanding that they are located in different parts of the planet, and we do not know everything. What functionality do they have? What were they made for?

Irina: Many ended up under water. Because many were built before the war, but there are also post-war ones, like a repetition of those that were built before the war. Before the war, the pyramids were built by representatives of Tumesout and their assistants from other planets - it was like a repetition of their houses and ships, because The pyramidal shape for the Tumesout people allows them to feel better in space - physically and energetically.

16:28

The pyramids have a shape that allows them to better sense the energies of space; earthlings also feel this. Being in a pyramid, a person who is not even sensitive can feel more, because there the very structure of this pyramid acts on the energies that are in space, in your opinion, they are called “ether”. Thus, they strengthen the etheric and astral field of the person himself.

17:01

Pyramids built in certain proportions, certain sizes and from certain materials, due to the energies that are collected there, can change the material properties of objects consisting of atoms. They act on the energies in the atom that make up the object. The simplest example: the viability of seeds can increase, they can sprout and grow faster, because energies enhance their vitality.

Pyramids can also act on water, creating chains of molecules in it in the same way as this energy was in the pyramid. And by drinking this water, you can change the internal environment in the body. This ether (he shows me) seems to create vortices, because... there are corners and at the top there is another corner - the top, and because of this, vortices are created.

18:51

Alexander: What is the reason for the fact that the location of the pyramids on the planet follows a certain grid? Does this somehow affect the planet itself, its energy field and the civilizations that are located on it?

Irina: There are pyramids not only on Earth, they are on the Moon and Mars.

19:45

They affect energy because they are located at a certain distance from each other - on the contrary, along the same line. The people who built them in ancient times gathered around them. They could gather at different pyramids at the same time, for example, during a holiday, and direct their thoughts and energy along the edges of the pyramid to its top. This intensified their thought flow and gave birth to ethereal turbulence throughout space. If they are on the same line along the earth's meridian, then this can cleanse the planet, saturate it with new energies, and give it new vibrations.

All this was used and is being used now both on Tumesout, and on some of its colonies, and on other planets that want to act on their planet in this way - this strengthens the mental message. The more people gather around the pyramid and look at the top, the greater the impact. It depends on what thoughts they will look at - constructive or destructive. If it is destructive, then, on the contrary, it can cause disruption of the Earth's energy fields.

21:11

There are very often portals to plasmoids above the top of the pyramids, because these pyramids were not built by materialistic people, but by people who were in contact with these plasmoid civilizations. And they built in the places that the plasmoids showed them. If people look at the pyramid, then the plasmoids feel the call and also send their amplifying energy. But these are most often plasmoids of terrestrial forms, which are responsible for the core of the planet, its magnetic field, atmosphere, etc. What you call the Spirits of the elements and places of nature.

21:48

Alexander: Thank you! What other types of intelligent communities live with us on the planet? For example, Bigfoot and underground civilizations.

Irina: The fact is that specialists of the Interstellar Union do not consider only dense-material ones to be intelligent life forms.

22:09

Earthly forms of plasmoids are also considered full inhabitants of your planet, just like you. They are embodied in those bodies that your eyes simply do not perceive. In the same way, they may not perceive your bodies, or perceive them differently from how you see them, but this does not mean that you do not live on this planet. There are many types of plasmoid forms - these are the Spirits of the elements: water, fire, earth, air and certain places of nature. These civilizations live next

to you.

23:16

You can call them underground, because underground, between the crust and the core of the Earth, in the mantle, where there is nothing for people except darkness and stones, there live plasmoids, for which stones are not an obstacle to existence. You can say that they live in a parallel world, but it's just a different vibration. And for them these are not stones, but air, atmosphere. They may perceive this as their planet, and your planet as a dome above them.

24:09

As for Bigfoot, this is a separate tribe of people who have followed the path of development - not technogenic. They remained in nature, just like your ancestors. And they began to develop the ability to live without the usual shelters that you began to build for yourself. But they are reasonable. They also incarnate intelligent Spirits, not animals. They have their own language. Among them are contactees of the Interstellar Union. How are they different from you? Not only because of their body structure and the fact that they are taller, physically stronger, have fur, because they do not live in comfortable apartments, etc. But they differ in their special psychology and energy.

Although they have the same genetics as you, due to the fact that they have existed for many thousands of years in a break with the usual forms of civilization, they are already raising their children in such a way that they acquire what you call “superpowers.” But they acquire this through faith.

26:19

What you call “faith” is a figurative, mental representation of a future event that will happen without a doubt. For example, if you believe that you can physically fly, you can do so, but only by imagining it. You can channel the vital energy that your body releases from food and oxygen. Life energy is quite strong in humans, and it can be directed in

a downward beam, directed by consciousness, and temporarily shield the body from the gravity of the Earth.

In order for this to happen and screen, you need to direct your thought, precisely believing that this will happen. There should be no doubt. This is exactly how they raise their children, and it cannot be any other way. On the contrary, they may not believe it if they are told that there are people who believe that this does not happen.

Alexander: Do they have contact with representatives of our civilization?

Irina : They are in contact with representatives of the Interstellar Union. They have contacts with representatives of Tikht and Burkhad. They can contact individual people, just like we do with representatives of the Interstellar Union. To do this, they need to learn the language of earthlings.

(Mead speaks) Eslerites also conduct research to establish astral contacts with them (not physical, but astral). As far as I understand their psychology, they are so accustomed to the fact that people living in cities, that is, your civilization, rejects them and wants to look at them as some kind of miracle. And they don't want it, so they leave. They don’t want attention to themselves, they don’t need it.

They have no desire to go out and tell everything, because they fly in the Astral (including the noosphere of the Earth) and see how the images that are in the noosphere of the Earth are alien to themselves, because they have a different idea about it. They have their own rulers and priests, who have developed their abilities even more than the ordinary ones. They tell their relatives that there is no need to return there, because... people will turn you away from life in nature, and this is merging with it, and that’s right.

29:53

Alexander: In 2012, many on our planet expected global cataclysms. There is a version that the predicted cataclysms that

were supposed to occur for cosmic reasons, the passage of a large celestial body relatively close to our solar system, it is also called either the "Nibiru Solar System" or "the planet Nibiru", there are different versions.

There is a version that representatives of a highly developed space civilization, by decision of the Intergalactic Union, prevented this catastrophe. Is it so? Can they comment anything about 2012 and the large space object?

Irina: Mead says that in creating this opinion that in 2012 the danger for civilization is destruction, etc., it arose because two factors overlapped, two images in the Earth's noosphere.

31:27

This is what you call the "Mayan Calendar" because the people who found the calendar, the archaeologists, were not very careful in telling journalists what was contained there. And the journalists also misunderstood, because they mistook the end of a certain period in this calendar for the end of the entire period of time.

But in fact, beyond this year of 2012, it continued there. It was drawn in the form of a circle (he's showing it to me now). Other years actually continued there, but the journalists didn't say anything about it, because initially (I won't say that they misunderstood) the scientist who found it inaccurately expressed that he was understood that way. And then it all entered the public consciousness. That is, it created an image in the noosphere, as we say.

32:36

And plus this was superimposed on the image of the planet Nibiru, which returns to Earth every 12,000 years. This image has already been taken from another legend, that in Babylon there was the god Marduk. And he lived on this planet Nibiru, and every 12,000 years he flew on it, his servants descended to Earth and carried out various wars here, etc. That was the myth.

33:27

In this case, the reality of the war, which I have already mentioned, was reflected in mythological form. That is, 12,000 years ago there was a war between Selbet and Burkhad. And not only representatives of these planets participated in this war, but a planet near Sirius B was also destroyed, on which there was a civilization that was also part of the Interstellar Union. It was also destroyed, all that was left was a ship. And the base of this planet, already in the solar system, was also destroyed. There was a planet between Mars and Jupiter.

Alexander : Phaeton, which one?

Irina: Phaeton, in your opinion. And this base was called Nibiru. That is, it was a planet, and even larger in size than Mercury. Yes, such a big planet. And on this planet, which you called Phaethon, and the Tumesoutians called Nibiru, there was a Tumesout base and a Sirius base.

Those who were from Sirius, they also defended us in the war against Selbet. And the planet was destroyed along with the bases. Many ships that fought with Sirius remained. And in honor of this planet that died, they named it Nibiru.

And subsequently representatives of Sirius began to live there (it’s like a fleet). That is, some flew away to look for other planets, and some remained in space, on the outskirts of the solar system. They had a life support system there. They didn't want to look for another planet. They wanted to cruise around the solar system, which they later called the “fleet”.

In principle, Ashtar has already told this story, if you have watched it. He was the one who took part in this war. And this is the story that the ship was named after the lost planet, which revolves around the solar system, it is very large, many kilometers in diameter, spherical in shape, it looks like a planet. It can, at the will of those pilots who are in it, either approach the solar system, then move away from it, or fly very close, but not just as a planet, but as an artificial body.

And on this one story with the name of the ship in honor of the lost base, in honor of the lost planet, then a mythological legend about Nibiru, about Marduk arose, which the Tumesoutians retold to their contactees who lived in Babylon. At first it was transmitted orally, then written down. And it came out in the form in which it had already been found - it was written on the tablets.

37:37

Alexander: That is, to summarize: there was no direct cosmic body that threatened the Solar System in 2012.

Irina: Yes, it wasn't. It's just one image superimposed on another, a mythological legend that in 2012 is supposedly the end of the Mayan calendar. Your journalists and researchers remembered Nibiru and said that it would arrive this year.

It happens that they make assumptions that begin to be replicated, and then they are accepted by other people who are not familiar with these systems, as if serious scientists really wrote them. But serious scientists might not have stated this at all; this happens to you. Because not all people are familiar with the primary sources.

38:44 Alexander: Natural disasters often occur on our planet: floods, volcanic eruptions, abnormal temperatures that are not typical for certain regions. At what stage is the restructuring of our planet now? What are these processes related to? And what can we expect in the coming years?

Maxim: Do you even understand the level of contamination of the planet by our people? Do you understand how much carbon dioxide, fumes, how many chemical elements people throw into space? Have we answered your question?

39:33

Irina: (He says) It depends on you.

Maxim: Absolutely depends on us. Why? Because we are completely destroying the planet. We are like a virus to her. We absolutely do not appreciate the resources it has. We are burning these resources, we are polluting the oceans, we are destroying flora and fauna, we are completely killing what we live on.

It depends only on us, on people, on their level of awareness, on their level of perception and on how they will relate not only to themselves, not only to other people, not only to the planet, but to everything in general. And it's great to understand how everything interacts, how everything is built, that the world that surrounds you is a huge amount of energy with which you constantly, every second, interact.

The more negativity you have, the more resentment, hatred, anger you have, the more you litter in your head, the more trash you litter on this planet, which completely destroys all the fauna that plasmoid civilizations created over millions of years. We came, and in 300 years we killed the entire planet, and for 300 million years someone completely created it. Who are we after this? What do we want from our planet? Please forgive me for being in this form, but I believe that this question deserved just such an answer.

40:53

Alexander: We often notice elongated, cigar-shaped ships. Can you comment on what civilization they belong to? There is a version that it is this civilization that actively helps maintain a stable geological situation on our planet, that is, they help avoid cataclysms associated with volcanic activity, earthquakes, etc. Is it so? And what kind of civilization is this?

Irina: They can belong to anyone. There are factories in the Galaxy where any civilization can purchase a ship of one form or another. They can belong to anyone - disks, spheres, and pyramid-shaped ships. There are preferences, but they are not strictly enforced.

The preferences of the Daraals, Eslerians, and Tashigans are disk-shaped objects. The preferences of the Burkhadians and their colonies, including the Pleiadian colonies that are not part of the

Interstellar Union, are rather, as you said, cigar-shaped.

The preferences of the Tumesout people are either cone-shaped or pyramidal.

I said this about the general preferences of civilizations. Don't forget, if a Tumesoutian is at the control panel of a ship, this does not mean that its crew cannot include representatives of another civilization, the same Tashigans, etc. There may be joint crews.

42:49

Alexander: What is Shambhala? Who are the Lords of Shambhala?

Irina: Shambhala refers to completely different areas. This word rather refers to the image of a country inaccessible to a person in the ordinary state of Spirit and consciousness. In general, the original origin of this word came from the name of an alien base that is still located in Southern Altai.

In general, there are tunnels dug underground between bases for moving ships.

And initially this base was created about 10,000 years ago, but not immediately after the war with the Selbetians, but after 700-1000 years. And the Eslerites took a big part in its creation.

And in Esler's language, "Shamba" is the capital. That is, a large Esler city. There is also a word in the Eslerian language, "loa," which means "alien." And those Eslerites who built the base came into contact with the local population, who then formed the priests and so on, that is, the emerging religious cults. And when these priests asked the strangers: "Where did you come from?" Some answered in their own language: "Shamba loa." And they said that they did not start with Esler, but named their capital, their city. And many priests were taken to this base; they were contactees. Then they began to say that "we were in Shamba Loa," where these aliens live. But then they wrote it down and

began to say “Shambali” in their ancient language. That is, it is like the country of the gods, so to speak. They didn’t call them Eslerites, they called them gods.

And now (at present) this base belongs to different civilizations. And Burkhadians, and Tumesoutians, and Eslerites, and Tikhtians, there are many who live there. It is still a functioning, very ancient base.

And there is a second meaning of the word “Shabala” - this is called the Universe parallel to your world or the world, which is also material. But it exists at a different wavelength, at a different structure of the atom, which you call “antimatter.” From your world, part of this Universe is visible as dark matter. But your instruments cannot detect the radiation from these stars. They also have their own stars, they also have their own planets, and they also have their own inhabitants on these planets. And some of your esotericists and researchers are in contact with them. Through the Astral you can contact them. Physically it is impossible, because the collision of atoms in which the energy is directed in the opposite direction along the rotation, because each energy rotates (you call it “vibrates”, but we call it “rotates”), then these opposite rotations of the atoms will cause destruction in these atoms and the release of that the energy they contain. And the more energy is released, the more the surrounding atoms will be destroyed.

For this reason, it is physically impossible to contact, because what you see as dark matter is in your field of vision, but it is on a different vibration that is not accessible to your matter. Therefore this does not happen. And if there is direct contact, then this will happen.

You can, of course, screen with fields, but this is very inappropriate to do. Therefore, contactees from there contact in the Astral, because this will not happen in the Astral, there is no body there.

And those who contacted them called it “Shambhala”, because it is a country inaccessible to those who do not go there on the Astral. In general, the word “Shambhala” refers to the image of a country inaccessible to many, but accessible to those chosen ones who got there.

Well, the third meaning of the word “Shambhala” is, as far as I understand, the name of the highest levels of the Spiritual world. That is, this is the understanding that this is the Spiritual world, from which the highest teachers (spiritual teachers) are already incarnated, who lead to the enlightenment of others. This is the third meaning that came from the first two - a place inaccessible to most.

Why inaccessible? Because the highest levels of the Spiritual World are inaccessible for another Spirit to go there even in the Astral, until they themselves reach it with vibrations. As I already said, a Spirit that lives on a higher level can descend to a lower level, but the opposite cannot happen.

And therefore, by analogy, the idea arose that this could be a region, the kingdom of heaven (in Christian terms), this could be called Shambhala in the minds of esoteric people. And when you read the word “Shambhala” in literature, you understand it as a place inaccessible to the majority, but accessible only to a certain category of consciousness and energetic preparation.

50:04

Alexander: When physical life ends, a person dies, does what happens to the deceased body affect the post-mortem experience of the intelligent Spirit? That is, a burial ritual or a cremation ritual. To what extent does this have a beneficial effect or, on the contrary, destructive for the departed Soul?

Irina: In the Universe and specifically in our Galaxy, a variety of ways of dealing with the physical bodies of former incarnated Spirits are known. Every civilization does things differently here. This very much depends on the customs, ideas, including religious, spiritual and other standards of society. But this does not have any noticeable impact on the fate of the Spirit, because the Spirit already leaves this shell, breaks the thread and goes into the Spiritual world.

51:48

And all that can influence him in the future is the experience that he acquired. That is, he will not take with him anything material that he has acquired. He will take with him only that experience, that Light that he may have accumulated within himself. Or that absence of Light, which you call “darkness,” which he accumulated in himself, due to the fact that he did not spend his life searching for this Light.

And only this will determine the place in the hierarchy of the Spiritual world where he will end up. Why will this determine? Because the very hierarchy of the Spiritual world is built in such a way that the closest to the Source of Light, to the Source of everything that exists, are the highest vibrational Spirits, in whom there is the most of this Light according to the law of similarity. Which you call “like attracts like.”

And the less of this energy, that is, the less the Spirit recognizes it in itself, considering it something else, the lower it is in vibration and the further away it is from the Source. This is an objective law and cannot be changed. Why can't it be changed? Because free will, freedom of choice has been given to these Spirits. In embodiment, they can both approach the Light and move away from it.

53:08

And since the Source of Light is itself intelligent, it has that quality of its mind, its character, its personality, only this is not as a human personality - it can be said as a superpersonality, which you call “love” in the sense that the selfless gift of life, true love, that is love. Since this is a gift of love, it does not imply any compulsion to go into the Light for someone to whom it is alien in vibration.

And that is why there is such an objective law about the hierarchy of the Spiritual world. Both the place and the fate are determined only by these vibrations that you have accumulated, which the Spirit was able to develop and nurture in itself.

And what happens to the body does not matter to the Spirit. This may matter to the deceased's loved ones because they may have been raised differently, etc. But for the Spirit itself it does not matter, he has already left it all.

Alexander: Thank you to the representatives of the planet Esler!

Maxim: All the best! Goodbye!

Irina: Goodbye! And we were interested!

#96 Evidence of communication with aliens. What does direct intervention threaten us with?

https://blog.cassiopeia.center/dokazatelstva-obshcheniya-s-inoplanetyanami

https://www.youtube.com/watch?v=rQvWjT_UEIY

00:40

Presenter: Hello! Dear Irina, MidgasCaus and Raom-Tiyan! I am glad to welcome you, my name is Maria Sokalski, Wiesbaden, Germany.

Irina: Hello, dear friends and viewers of our channel. My name is Irina Podzorova, I am a contactee with extraterrestrial civilizations. Representatives of the interstellar alliance Raom-Tiyan from the planet Burkhad, a specialist in energy interactions in the environment, and MidgasKaus from the planet Esler, a biologist, psychologist, and specialist in the study of alien life forms, came to contact.

Presenter: Thank you.

01:21

Presenter: First question, some channelings mention the central sun of the universe, energy and help that can be called upon. Is it a physical object? Star? Or a subtle material or figurative spiritual object? How does it affect us, the central sun of the universe?

Irina: Raom Tiyan is answering now... When you talk about channelings, that is, about the subjective perception of contact information by other people, we can already talk about the area of assumptions. That is, I can speculate without now having the opportunity to talk to these people and ask them some questions about the features of this object, and here we are entering the realm of conjecture.

Presenter: We do not know such an object.

Irina: In any case, what do they mean by the universe? By the universe, it turns out (he's speaking now) one can understand not only what you and I understand. In the case of plasmoid contacts, information transfer, plasmoids can call the universe, for example, in general, the Solar System... Because for them this is the whole universe and then the central Sun, this will be the Sun...

Presenter: Not exactly, not our Sun, our solar system, but the entire Universe, that is, the totality of all galaxies as I understand it.

Irina: But they can call God that, they can call the spiritual world that, they can call the angelic world that, they can call higher vibrational, plasmoid worlds, compared to their world. These plasmoids that transmitted information... The sun is light. These are some objects of light that exist on Earth; they are generally a symbol of life.

03:43

Presenter: That is, galaxies or, say, in the Universe, such a physical source, such a star, is unknown to you?

Irina: If only the center of the galaxy, if you look at our galaxy, but it is not the Sun, it is in any case a collection of star systems and those objects that you call black holes. That is, in any case, it is a collection of some systems, the center of the galaxy... It is simply brighter in luminosity and more energy is released in it, precisely in the center of the galaxy, but, in any case, there is not one single center there, a totality.

Presenter: Thank you very much! Very clear, good answer.

03:58

Presenter: The channelings also mention the replacement of the Moon. These are channelings from the Absolute, it is received by contactee Martha, and it talks about the replacement of the Moon, the function of which is now to align the electromagnetic field of the Earth and absorb excessively negative energy. That is, this

satellite will be replaced in the fifth dimension by another, which will carry other functions, and the Moon will be another satellite of another three-dimensional planet, which is being created or has already been created for those souls who want to go through their experience of dual three-dimensionality. What can you say about the energy function of the Moon and its future?

Irina: They are not going to replace the Moon, at least I have not heard of such a plan in the Interstellar Union. There is no need for this, especially since there is a large base of eighteen civilizations that are members of the Interstellar Union, to which ships fly from other civilizations that do not have bases, they fly there temporarily... Why do we, I don't understand, remove the Moon, Then we will have to build another base there, set up all this infrastructure again, this is very difficult, it's easier to leave what we have.

Presenter: The way I look at it is that the information still comes either from the spiritual or from the plasmoid world, and they seem to calculate time differently than we do. Obviously, after some millions of years or billions, they imagine that we will reach the energy level, the subtle-material level of existence, and obviously there will be such changes... Well, it's very clear.

Irina: I'm now speaking in the projection of our physical three-dimensional world, I'm just in it too (speaks).

Presenter: Therefore, this is much more interesting and closer to us.

05:59

Irina: Absolute... As for the word "Absolute", you should never forget that contact (I want to tell everyone right away) you should never forget that contact is a two-way matter, what the curator conveyed to the contactee is then perceived by the contactee at his level and passed on to others. It's always a two-way process. When the words "The Absolute came into contact with me" or "God came into contact with me" come from the contactee, you always need to look at the information that is being transmitted, because that God and that Absolute who created all the worlds will always speak in

understandable form for the dimension in which it transmits.

Presenter: I see.

Irina: But if you see clearly subtle-material plasmoid information from a creature that the contactee called the Absolute, you need to understand that the names that plasmoids give themselves are very often not perceived at all by the mind of the contactee. They may consist of some kind of ultrasounds for you, or simply somehow adapt to the language of the contactee and be called by the very first name that comes to them, which they will find in the mind of the contactee, because they also perceive what he can call him, or it will be just a set of some syllables, letters.

Presenter: So we can say that the Creator of our Universe himself, say the Prime Creator, the Absolute, does not communicate with contactees in physical bodies simply due to very high vibrations?

Irina: He makes contact, but he comes out in form from the spiritual world. That is, through a person's own spirit, through his Higher Self, through that piece that is God, through his piece, which is in everyone: in a plasmoid, in a humanoid, even in a demon. It's just that it is not realized or is realized incorrectly, distorted, and in any case it is contact with God.

Presenter: Transformable to his level, a person.

Irina: Yes, when you ask questions to the Higher Self and receive answers from it, you will receive an answer from God, because the Higher Self is from God, it is not separate in the spiritual world. It is separated only in our consciousness, just like the dense material world. It is, in fact, not separated from the spiritual, because it constitutes the unity of the universe. He is separated only in the perception of this three-dimensional world or in the perception of a creature from the 16th dimension, which... 16th level of density, for example, this will already be a different perception of God and people, and oneself, but, in any case, there too There will be duality, it will be less realized.

Presenter: Thank you.

Irina: When you see clearly plasmoid information coming from a source, and you see what the contactee calls the Absolute, God, then you need to understand what the contactee called in his language of perception this being, how he feels it. So he feels him as God in vibrations, that he is much higher than him in vibrations, and he calls him God, the Absolute, Light, and so on... Higher mind, cosmic mind, there are many names, or simply Higher powers. Higher powers generally refer to any... What is power? This is the energy that is manifested by some kind of personality. That is, power can generally be demonstrated by any person, at any level of development, but why the Highest? Because it is above the understanding of the level of the contactee himself, and here you already need to understand that what is the higher mind for this contactee, for you it can already be your equal.

Presenter: I see. Everything is relative, as Einstein said. Well, then let's go down to our dense material world. What is the effect of gamma radiation on us?

Irina: Yes, come on, Raom-Tiyan says: “Gamma radiation comes constantly from all the stars and from the center of the galaxy, but the distance from the center of the galaxy to the Earth and the distance from the Sun to the Earth are very different. Although gamma radiation from the Sun is less, from your own central Sun, which is in your solar system, and the radiation from the center of the galaxy is greater, but in any case this is compensated by distances tens of millions of times greater than the distance from the center of the galaxy."

Presenter: So now there is no increased influence coming from there?

Irina: Most gamma radiation affects you from the Sun. What is called the aurora is a reaction to the energy that is solar, as you call it... the solar wind, that is, the flow of energy of various types of radiation, which is visible at the north pole due to its special structure, but it now shows me, as if there is less thickness of the atmosphere...

Presenter: Yes, the atmosphere is thinner at the poles.

Irina: Yes, and this makes it easier to see, and the same thing happens closer to the equator, for example, at the equator and in the middle latitudes. But this is simply not visible due to the fact that there is a different thickness of the atmosphere, and this solar wind is the types of radiation: hard radiation, X-rays, gamma, which, when reflected from the atoms that are in the air, create such light, and, in any case, it comes from your Sun, and you won't even be able to see such northern lights that come from the center of the galaxy.

Presenter: I see.

12:48

Irina: Regarding earthquakes and volcanic eruptions... Our theory says that this is influenced rather by processes occurring not even in space, not in outer space, on the Sun or in the center of the galaxy, but rather by processes occurring on the Earth itself. The greenhouse effect, which is created by burning large amounts of fuel, destroying large forests not only by people, but also by forest fires.

Presenter: So humanity is primarily responsible for climate change?

Irina: The fact is that the carbon dioxide that accumulates in the atmosphere does not allow the heat received from the Sun and from the Earth's core (it also heats, it is also hot, incandescent) to quickly dissipate into space. We see in the example of Venus how this can influence. There the atmosphere consists of almost 96 percent and only carbon dioxide.

But in fact, at the distance from the Sun at which Venus is located, if there was an atmosphere with a low carbon dioxide content, there would not be such an effect. Life would be possible. There was life on Venus, as you know. The activation of these earthquakes and volcanoes depends, first of all, on the greenhouse effect that you create. Secondly, you have a very intensive production of hydrocarbons, that is, gases located in the layers of the earth's crust. Since you mine a lot of them, you change the configuration of the layers of the earth's crust, and the Earth begins to be a little unstable in

its orbit, that is, to fluctuate. This causes micro-movements of tectonic plates, causing magma, which lies closer to the core, to rise higher. And from this, magma naturally flows, first, into those volcanic vents that reach it, and from this the activation of underwater volcanoes is natural. First of all, because they are located deeper, plus the greenhouse effect that I described, it warms up the atmosphere, which means it warms up the earth's crust, and this heat goes deeper, and further activates heating from the earth's core. The process is interdependent.

16:26

Presenter: Raom-Tiyan, such a question... We have now come to a very interesting topic about our ecology and mineral extraction. Everyone understands that our science and our technologies are far from environmentally friendly perfection. Please tell me if there are any technologies to improve the environment or any projects that the Interstellar Union can safely share with us. That is, something that does not contradict your laws, your rules of communication with young civilizations?

Irina: Yes, we can share not only technology, but advice.

Presenter: Yes, to guide us if we have any technologies or projects where we are already developing and looking for something, because you see: they are trying to get energy from wind and water... Well, In general, it's more environmentally friendly to treat our resources...

Irina: You already have electric models of the same cars.

Presenter: But the production of batteries for these machines is again not environmentally friendly and also pollutes our environment; the production of these batteries is not yet perfect enough.

Irina: You even had cars on the water. There were even water vapor ones. Now the production of batteries can be safer, but for this it is necessary that these metals and alloys for batteries be recycled, that is, the secondary raw materials that are obtained must be sent again

for processing. You have all these projects, but they stop... the development of these technologies and their study are stopped by those people who are not interested...

Presenter: Economically...

Irina: These are your elite political structures, which are at the same time business structures that extract minerals, and which perfectly understand why they make a profit, because the labor expended on the extraction and processing of these minerals pays off very much and is sold to the population...

Presenter: We know this. We know that we have a struggle of interests, we have a conflict of interests. It's clear.

Irina: The first piece of advice is for this business to really take off for you, to move beyond the level of talk and begin to become a reality. The first thing that needs to be done is that all independent political forces that exist on Earth, independent of business projects of this kind, need to gather into a cooperation that will pass a law stating that, firstly, politics must be separated from business...

Presenter: But in Germany, for example, this happens. They had a big scandal about diesel engines, and now everyone is frantically looking for alternatives.

Irina: Yes, the point is that this should happen not only in Germany, but also in leading countries, in all of them. Because if one country passes such laws, even if it adopts them and does not develop hydrocarbons there and so on, then other countries will more than compensate for this. That is, it is necessary somehow at the level of international communities... But now the international communities know very well about the Interstellar Union, but contact with them by decision, according to the agreement of the Interstellar Union and them, it does not go beyond the limits of secrecy for people, because it will already an intervention, if they reveal to people that there are aliens, that there are not only aliens, that there is an Interstellar Union, and it has been present for a long time, then people will want real intervention, especially at your stage of development...

21:38

Presenter: It’s interesting that the ratio of vibrations during reincarnation is somehow taken into account when mentors and curators determine which planet to incarnate on? Because it is no secret that we have quite a lot of low-vibration energies on the planet, which naturally complicate the conditions for other spirits to undergo incarnations. This may be the specialization of our planet, why did this particular energy system develop?

Irina: Specialization.... Now let's figure it out... Well, you can roughly say this... I understand you perfectly well what you are talking about, but this is in no way a correctional institution, a prison, or anything like that. Civilizations that were not included in the Interstellar Union, but intelligent, did not enter for some reason.

Presenter: For a well-known reason there is no correspondence.

Irina: Yes, there are other civilizations that, like you, also did not enter the Interstellar Union and which are at different levels of development, and they too may have wars, there may be some kind of totalitarian regime, there may be something else, the death penalty... something that prevents them from entering.

Presenter: Just like us...

Irina: Yes, and there are such planets, and this is a choice... Of course, I understand what you might be thinking about now. It is very easy for me to talk about the choice of the majority of earthlings on this path of development, being on Burkhad. And I understand what you might think of me, but anyway...

Presenter: In fact, I really appreciate this incarnation and am very glad that I had the opportunity to incarnate. I love this planet very much, I love this civilization very much and I greatly admire these souls who incarnate here, despite all the difficulties, despite all these low vibrations and obstacles...

Irina: Yes, Raom Tiyan, I'll just say it more simply now. In short, it's good on Burkhad, but here it's difficult, but going through incarnation on Earth may be more effective for some.

24:33

Irina: Intervention (direct) of aliens at this stage of the Earth's development is inappropriate. Because your political and military structures control military weapons. And if we fly openly, and we won't just fly in, just to show people that we exist and fly back. We fly to contactees in order to, at least through them in some form in which they are ready to convey this, talk about the Interstellar Union, in general, that there are other forms of life, and this is our main goal. Let it be a fantasy novel, story, film. Those people who have a vague memory of incarnations in these worlds, they will understand that this is true. That is, if we arrive, people will turn to us with a request to correct the situation.

Presenter: That's what's happening.

Irina: Your governments will not agree to fix this for various reasons.

Presenter: We know the reasons - this is material interest.

Irina: Yes, and in order for us to persuade them, we must give reasons why this is necessary, but they will not hear us, because they do not even believe in the spiritual world at all, well, or they believe in it in their own way. That is, they believe that actions in this life do not affect their spiritual level, for example, or do, but they will be able to fix it when they leave work.

Presenter: I see, so we need to wait for a generational change?

Irina: Yes, if we arrive openly and insist on changing legislation, for example, in the same area of ecology and so on. That is, if we try to change the laws that add aggressive energy to your noosphere (death penalties, etc.), then we will need to explain to your rulers what the noosphere is in general, what the astral atmosphere is, and why

aggression is dangerous there. But they will not understand this, they themselves will not feel it until they themselves get into the astral plane and see... Well, of course, you can take them out and show them, but without such experience, this will be fraught with danger in general for their health. We will already disrupt their task of implementation.

Presenter: So you need to not deviate from natural evolution?

Irina: Yes, if we just insist, they will say (and they will be right) that this is our planet, and we ourselves will figure out how to act here. And if we insist too much, they will tell the military that an alien invasion has begun. You understand what might follow.

Presenter: We already have enough films on this topic!

Irina: Neither we nor you want such an outcome, because if there is an attack by earthly armed forces, they naturally will not defeat us, but we do not want to forcibly interrupt anyone's incarnation, this will lower our vibrations.

28:27

Presenter: We ask a lot of questions, but I would like to hear questions for us, what do you want to know from us and how can we help you?

Irina: Once again I would like to thank you personally and the entire Cassiopeia team, who, feeling that this is true, are not afraid to admit it to themselves and carry this light that they receive from this knowledge and carry it further, transforming, transforming through themselves peace, this is really very important, because if you turn on the light inside one person out of a hundred... That is, an understanding not even of what the Interstellar Union is, but of the fact that it is an immortal spirit that has its own tasks and these tasks are to develop love and awareness, and not to process tons of food into tons of you know what... Even if you tell one person out of a hundred in such a form that he will feel and convince him, then a chain reaction of changing everything will begin your society. This is the main purpose

of our presence on Earth and the expenditure of the resources that we use on flights and on the creation of this entire system of contactees. Because we really want, through the gradual transformation of each member of your society, gradually, in an evolutionary way, to bring you into the Interstellar Union on the rights of not slaves, not servants, not subordinates and not any lower creatures, but as equal employees and our brothers in the study of the universe.

Presenter: Thank you, we thank you!

30:41

Presenter: Irochka, MidgasKaus and Raom Tiyan have a question, how else do you get information from us other than through contactors? Do you have any other options? About our life, science.

Irina: We have such dishes as small balls, masquerading as your probes, mini robots that film what is happening, and plus they also film and record energy with devices.

Presenter: The development of our science, everything that our scientists discover, where do you get this information from?

Irina: He says that what is in your networks, the media, these radio waves, they are picked up, for example, by bases on the Moon. There are such special devices, and they are processed there, not by us, but by special robots, because it takes us a very long time to do this. That is, those news that are not important for cognition are simply recorded and put aside in order to find out your psychology. And we study, for example, what became known to scientists... But I want to say that what became known in the media is not all the discoveries that exist, it is only what was missed.

Presenter: Yes, it is, in fact, much more.

Irina: The second element is physical contactors, which we can take for physical contact, we install special chips, and these chips are used

to monitor not only him, but also his environment. That is, when a contactee communicates in a particular environment, with this or that person, a recording is constantly being made in this chip for transmission at the microwave level with the release of the vital energy of this contactee from his cells. It already stands out, it's just used for transmission.

Presenter: It would be interesting to install such chips for our scientists and researchers.

Irina: But most often this happens in childhood, when he makes contact, because we must obtain consent voluntarily. We should not do this with violence; this is prohibited by both the Interstellar Union and Divine laws. Everyone has free will.

And the third way is to study you through the spiritual world, through the astral plane, your energy, your noosphere, your egregors. We have research teams on both Esler and Burkhad, on each planet.

33:37

Presenter: Tell your colleagues who are in contact with people from other countries to tell about our group "Cassiopeia", give us our contacts, and let them find us on the Internet, so that we help organize such "Cassiopeias" in other countries, in their language, so that they can carry this information to people.

Irina: (He speaks) I will try to convey, but in any case it will be their decision. I came across Burkhad contactees who said, I communicate with the spirit and so on. That is, even many Burkhadians, the same Mirakh Count, he generally comes in the form of some kind of religious egregor. Because many of the Christian egregors match the vibrations, he is also a disciple of Christ. If he appears to them as an alien, they themselves know how they will react. Therefore, he not only introduces himself as the Archangel Gabriel, but also simply as a guardian angel, God, who sends his thought to the contactee.

Presenter: As I heard, we have 200 thousand physical contactees on

the entire planet, that is, they already know for sure that this is not some kind of Holy Spirit?

Irina: There are 200 thousand of all contactees of humanoid civilizations.

Presenter: Humanoid? It's clear. That is, both in the astral and physical?

Irina: Yes, both on the telepathic and on the astral level...

35:25

Presenter: This is primarily addressed to contactees who know that they are communicating with alien civilizations, and we could help them carry information or organize in their countries, because this is very valuable information, very valuable work that you are doing ! Thank you so much, first of all, to our viewers, participants in our chats, our readers, I am very, very proud of them, when I read their questions, when I read their reflections, I am very, very proud of them! Guys, thank you very much! For accepting and understanding the information that we present and even for non-acceptance and misunderstanding, for your questions, for your thoughts. This really helps us work, inspires us, and gives us great energy! And I am simply confident that our civilization, our planet will cope with this transition, we will cope with all the tasks that stand in our way, and we will definitely enter the Interstellar Union!

36:40

Irina: They hear and smile. Yes, and I wanted to tell you on my own behalf, that is, I, Irina Podzorova, on my own behalf I would really like to appeal to everyone... Indeed, the Cassiopeia group, my friends, Maria, Maxim, me personally, we do not have such a goal, to convince you of something or prove something, because our goal is simply to share the information that is. The fact is that if there is material evidence of contact, especially from a contactee who has already reached the masses, this will immediately raise questions from the

people to the scientific and political communities, which they will not be ready to answer. And they understand this perfectly well, and therefore they will not allow this, they will allow the contact itself.

This question has already been studied in detail, so he says that there was a contactee with the Pleiades, whose name was Billy. He knows the name, now he's showing me the image, but I don't know it, I don't remember it.

Presenter: Apparently some contactee is from the USA.

Irina: Well, I won't say, he now shows that he lived somewhere near the mountains. This is a contactee from Futissa, she was not part of the Interstellar Union, but it was contact with the permission of the Interstellar Union, quite physical. And they provided him with evidence, such as a video link, some kind of video file, they really allowed him to film this plate, the aliens and himself, how he communicates with them there. And they allowed him to leave it in the cell, but did not erase this recording with their radiation, but allowed him to take it home. And he shared it with some journalist or someone. There was such a fuss... Because the journalist first promised that he would not share it with anyone, that he would watch it himself.

But naturally, the feeling of sensation that he received could not be retained in him, because he wanted to share, and we do not blame him, since this is a natural desire of a person to open a new world to others. But he attracted the attention of the intelligence services to this story and so on. And in any case, it turned out that after a few months of this hype and the gathering of other people, journalists, and so on around the contactee, who wanted to know the details of the contacts. He himself regretted that he had given evidence, because they were already there almost on his heels. And this was not the worst thing, because a few months later he and his family were shot, the killer was not found. In general, they investigated officially, there was an investigation, but they didn't find it, they came up with a version that there was some kind of revenge for something.

Those Pleiadians who gave evidence of contact that led to the death of the contactee and his family were punished. They were sent to a prison planet. That is, there was an analysis of this case in the

Interstellar Union.

Presenter: Thank you! Irochka was very important information, Raom-Tiyan and MidgasKaus, because this question constantly comes up, naturally they want to know, and now it was very, very important to hear for our readers, for our viewers.

Irina: This is the conversation we had today...

Presenter: It was a very good conversation. Other questions about DNA, about our bodies, and so on, can be asked later, but this was important now. They structured the conversation very correctly and gave out the information very correctly, exactly what was needed. Thank you very much again! Good luck with us, be patient and thank you for believing in us!

Irina: And thank you for continuing the work of the Interstellar Union on Earth, and undoubtedly we are united in the single light of God and love!

#98 The secret of the human DNA chain. Lifespan, causes of aging, Schumann resonance

https://blog.cassiopeia.center/sekret-cepochki-dnk-cheloveka

https://www.youtube.com/watch?v=YvGk7foVEig

00:00

Irina: Hello dear friends. My name is Irina Podzorova, I am a contactee with extraterrestrial civilizations. And today my curator MidgasCaus from the planet Esler and his friend LiShioni from the planet Shimor are present with us. MidgasCaus is a specialist biologist, psychologist and specialist in alien life forms. LiSioni is a specialist in the astral world and its interaction with the material.

1:04 Are there really the first stem cells in the human body that do not get sick or age?

Oksana: My name is Oksana Kalinina. The first question is this: there is a theory that when an egg is fertilized by a human sperm and the process of division begins, the very first cells, and there are from 6 to 12 of them, they do not get sick and do not age. Their luminosity was maximum from the very beginning, and remains so until the death of the body. This is true? Do we really have such cells? They belong to the stem ones, but they are the first.

Irina: Now I'll ask Mead as a biologist. Yes, we studied your

organisms. The process of cell division occurs as follows: after the union of the egg with the sperm, the first cell of the body is formed, into which the Spirit introduces its vital force. And this is already a cell of a new organism. She begins not only to share, she begins to separate her functions. That is, those cells that result from division begin to share their functions. He says that the first cell begins to rapidly divide into two cells first. Two by four, four by eight, and so on. In you, terrestrial organisms, after about fifty divisions, all the material passes completely into daughter cells. How does the first cell divide? First, the cell nucleus divides, where the DNA strands are separated into chromosomes. In chromosomes, DNA strands are separated, and according to these DNA strands, another DNA strand is lined up opposite, in which RNA, in turn, is lined up. Then, with their help, a new cell is synthesized from the same substances that the old one consisted of. Thanks to this division mechanism, almost all the material that was in the first cells (meaning protein, nucleotide, lipid materials) passes into the offspring. Cellular progeny, of course. Then only they begin to be divided by function. From cells whose DNA is intended, for example, to become blood cells, they become blood cells. The cells of the internal organs begin to form internal organs. This happens gradually and is a continuous process of division. And I would like to draw your attention to the fact that the first cells in the body are a substance that could be completely removed from the body as a result of division. It is important to understand in the context of the question that cell division is a continuous circulation of matter in the human body, which is called metabolism, in other words, metabolism. I would like to clarify, do you now mean a physical substance or something else? Or do you mean the ethereal frame?

Oksana: I meant both the physical body and the etheric frame. Is it true that these very first cells do not get sick and do not age?

Irina: What do you mean, they don’t get sick and don’t grow old? The fact is that even the very first cell may already have a pathology. For example, genetic pathology. Or it may have an incorrect structure, in other words, a mutation. You call it a disease. This first cell can become infected with germs or viruses. It can be irradiated, exposed to toxic substances, or even killed. Any living cell, no matter who it belongs to, be it the first or the thousandth, it can be killed, it can be damaged, it can be infected. That is, this very first cell can be influenced by different physical methods. And not only physical. Since it is in the mother's body, it is to a certain extent part of her. She is connected to her. She receives nutrients from the mother's body.

Including the thoughts and emotions of the mother have an influence on this substance. Because it is connected to this body, a small cell. We can say that a cell is a small body with its own DNA. If I may say so, it is a microbody. And this microbody is subject to the energetic, psychic, mental impact of the mother's thoughts, feelings and emotions, as well as her own body. That is, all the laws of psychosomatics have a direct impact on it while this fetus is connected to the mother's body.

7:43 Is it possible to restore damaged teeth or grow new ones?

Oksana: Does such a mechanism exist or is tooth regeneration available to us? Or maybe restoration of damaged teeth? Or is it possible to grow new teeth? Because this is a big problem for people.

Irina : For Russia and for all countries where they consume large amounts of fast carbohydrates, this is a big problem. The fact is that your teeth, as separate organs, are adapted to a certain type of nutrition. Now they are undergoing evolutionary development, adapting to the changes that have occurred in the food industry over the past two hundred years. The tissues themselves change slowly under the influence of the environment, but in any case, they suffer from a changed diet, to which our teeth are not adapted. Teeth suffer, firstly, from the large amounts of sugar consumed in our century. It is known that 150-200 years ago, not to mention more ancient times, when the genes responsible for these very teeth were formed, the consumption of sweets and sugar was forty times less than what the average person now consumes in childhood. Secondly, there was more roughage food, not as refined as it is now. It had to be actively chewed, and, as a result, there was more blood circulation and nutrition of these tissues. In ancient times, people were exposed to other diseases. These were infectious diseases. People died in wars when their teeth had not yet decayed. That's why the skeletons and skulls you find have all or most of the teeth present. For example, in the 16th century, a person 40-45 years old was already considered a person of quite respectable age. Naturally, the time of youth was different then. The time of birth of children for a girl of 13-14 years old was quite normal. She could easily get married and have a child. This is what happened, for example, with the Mother of God, who gave birth to Christ at the age of 14. Then it was clear to everyone that she was already an adult girl who could get married. As for today's realities, the condition of your teeth largely depends on nutrition. As I already said,

large consumption of sweets and refined carbohydrates in general creates an acid-base environment in the oral cavity in which bacteria actively develop, releasing pigments that destroy your teeth. Some of the calcium, phosphorus and other substances in tooth enamel are used by them for nutrition. And since they are needed to feed dozens of species of bacteria and protozoa, they will all release the enzyme onto the surface of your teeth. By creating microcracks and holes, the substance they need is converted into a soluble form and absorbed. This is their way of eating.

What can you do here? Unlike other bones (arms, legs, ribs), the cells of which tend to divide. Although slowly, with difficulty, requiring large reserves of the body, they have this property. Thanks to this, fractures heal. And it may even be impossible to discern where this fracture was. These bones knit together so well. Especially in a young body, which is actively regenerating due to a high level of metabolism. But when it comes to teeth, everything is more complicated. As you know, earthlings undergo a change of teeth. This mechanism arose because the first baby teeth are not adapted for adult life. They are adapted for softer foods. That is why nature has provided a mechanism for changing these teeth. It's in your DNA. Nature programmed molars for constant use. The tissues of the jaw no longer have reserves to replace lost teeth. The rudiments of molars are already present under the baby teeth of children. There is room for cells to grow and divide, and all this happens quite quickly. And when an adult loses his molar, a new one does not grow in its place, since this is not provided for by DNA. Some of your animals have this function written into their DNA, and their teeth can regenerate.

16:23 At a certain age, hormone production decreases. Some hormones turn off completely and stop working. What is the reason?

Irina : Changes in the body in the process of its growth and development and later life are determined by the influence of the same DNA program. For your species, this is exactly the case because the type of body it takes on as it grows from childhood to adolescence and then into adulthood is not just designed for life, but also for conceiving and bearing children. Those hormones that determine the possibility of conception, both on the part of men and women, are designed to support the functioning of not only the genital organs, but also the condition of the skin, hair, and body shape in such a way as to be

capable of conception and birth. When the time allotted by God through nature to a person for conception and birth passes, the need to maintain a given body shape and the work of these hormones disappears. Therefore the body begins to change. Those hormones that continue to be released affect the body somewhat differently. For example, they may be released in smaller quantities. Other hormones may begin to be released, which, when combined with the previous ones, already cause other reactions. And the person changes. He understands that he is approaching an age that is no longer suitable for having children. The time is coming to reflect on your life. Thus, God shows that the time for attracting attention to oneself to create a family and offspring has come to an end. The time has come to rethink the path we have lived. Self-analysis, forgiveness, getting rid of all negative attitudes and preparing for purification and transition to the spiritual world - these become the primary tasks of the incarnate Spirit. And body changes only contribute to this. They allow him not to be distracted by what he has already lived.

20:31 Is it possible to change the DNA program to prolong youth ?

Oksana : Under what circumstances or when will it be possible to change the DNA program, that is, increase life expectancy, be more efficient, have more energy, that is, live longer, not 50, 60, 70 years, but 200 - 300 years?

Irina: Life is extended for such a significant period if the DNA is changed. And here we are already entering the realm of speculation. Because at the moment your bodies and your planet are in such a vibrational state in which your nature manifests itself in this way. But with an increase in the level of your general awareness, the purification of the noosphere of the planet, with a quantum transition to a new vibrational level, your bodies will gradually change. Including those etheric shells that surround each DNA helix. Each cell and each DNA strand is surrounded by a special etheric shell. They also have their own vibrations and they can also be changed. But they can be changed only by increasing the vibrations of the aura and its astral and mental layers. This influence cannot be immediate. Changes will occur over generations, gradually passing on their DNA to their offspring, who, in turn, continue to develop and raise the vibrations of their Spirit, and through this automatically their body. Thus, by changing generations, people will be able to stay young longer and live longer.

Provided that those spirits that come do not lower their vibrations. And yet, I would not want you to forget that your life span is determined by you and your spiritual mentors even before incarnation. Your mentors always tell you your date of birth and date of death. This date can be changed. But you don't change it yourself. Your impact can only be indirect. In other words, as already said, if you are fulfilling the tasks of incarnation, are in contact with the Higher Self, raising your vibrations, fulfilling the tasks of your incarnation and feel that you have a great good cause on Earth, and you are leading others to the Light, serve love, then your mentors, watching you from the spiritual world, can give you additional energy. So that you manage to do more during this incarnation than you planned for yourself. In any case, the time will come when she will need to go further into the spiritual world and develop a plan for the next incarnation. In general, incarnations are given as an opportunity for development and an opportunity for the manifestation of what has already developed in matter. If a spirit lowers its vibrations during life, the lifespan can be revised downward. He can be taken out of incarnation even in his youth or adolescence, although according to DNA and according to all parameters, his life span should have been long. So that he does not have time to degrade and lower his vibrations, he can be taken out of incarnation. Because if he goes to a lower level, he will have to rise again for several more lives. Mentors always strive to ensure that the time of death occurs at the moment of maximum readiness.

28:23 What is “junk” DNA?

Oksana: Question about the so-called junk DNA. Our earthly scientists have deciphered only a small part of the DNA, they talk about 5%, in my opinion, and the rest is junk DNA. What it is? What kind of information is there next? In all the DNA, what is it about?

Irina: Scientists have not deciphered all DNA, which, as is known, consists of nucleotides. Each nucleotide contains information about one protein. And in your body, as you know, there are millions of these proteins. And in every organism they are different. These millions in turn consist of 21 amino acids. And just as millions of books are made up of thirty letters, different proteins, individual for each person, are made up of 21 amino acids. For mother and child, for mother and father and for two twins, they are still unique. Despite their similarity, they are still unique. This is a sign from God that each of you is a unique person, and there has never been or will be another like him in

the Universe.

"Junk" DNA is what has not been deciphered. Because it is very difficult to decipher the gene that encodes the protein. Moreover, it can be variable.

30:36 What is resonance or Schumann frequency (standing electromagnetic waves)?

Oksana: I want to ask about resonance or Schumann frequency. For those who don’t know, these are standing electromagnetic waves.

Irina: What you call the Schumann frequency is the leading frequency. We call it magnetic-gravitational potential. Each planet has its own. This includes the electric, electromagnetic, and magnetic fields of the planet. And also the electricity of the earth’s soil itself. It also has electrical energy. Energy of the Earth's core. Electrical processes occurring in the atmosphere and natural gravitational forces. What you call the gravitational field is all the combined frequencies of different fields and different types of energy of each planet. What you pick up on Earth are actually frequencies that contain higher frequencies that you don't pick up. As for your brain, yes, it operates at certain frequencies, but they are higher than the frequencies of these planets. Why higher? Because you think, feel, perceive information and micro-impulses that arise in the brain from the energy of your spirit, which create fast electromagnetic bursts at high frequencies. And these frequencies are higher than the frequencies of the Earth, because the Earth does not have a brain like you. You are different in frequency. When a person sleeps, he enters a state very close to the Schumann frequency. How healthy will this be? Here everything will depend on faith. It depends on how you set yourself up. If you imagine that you are on the frequency of the Earth, which heals you, then it will be so. You have to believe it.

33:34 A condition in which adults can have sex to raise their vibrations.

Oksana: How can we, as adults, use sex to raise our vibrations?

Irina: Doing it in a state of unconditional love. What it is? Unconditional love is love that does not require love in return. He wants to unite with his beloved, will bring him joy, what is called pleasure. You need to see a reflection of yourself in your partner. Before this, you can enter into a state of contact with the Higher Self, into a state of light and at the moment of connection see the same light in your partner, and connect with him in a single light. This is quite possible for you, and your bodies will only repeat the connections of your souls in the inner light of the spiritual world. Then the vibration will increase. And this is only after merging in the inner light. Ideally, both should do this practice. If only one is configured in this way, then it will not be possible to achieve the effect of increasing vibrations.

35:21 What are Kozyrev's mirrors (astrophysicist), and how do they affect people? Is there improvement and alignment of energy in people?

Oksana: I want to ask about the so-called Kozyrev mirrors. There was such a Russian scientist Nikolai Aleksandrovich Kozyrev. There are many such installations in Russia now. In Siberia, in Moscow, in other cities, people do it. They take large tall sheets of polished aluminum and make them either in the shape of a rocket or roll them up like a shell, in my opinion, 1.5 turns. A person enters these settings and healing occurs and energy levels out. Reviews of wonderful changes, wonderful states. Kozyrev, by the way, was an astrophysicist who studied the planets. Famous personality in Russia. How useful are these Kozyrev mirrors?

Irina: In any case, the shape of the objects in which a person is located affects the energy of the space in which he is located. Especially if this form is metallic, since it reflects electromagnetic waves in a certain way. They pass through the body more than once, but are reflected from each other. Including through the brain. I wouldn't say that everyone will feel this, but people who are sensitive to energy may feel changes in their condition. This can increase sensitivity to the spiritual world. Because a person is simultaneously in both the physical and spiritual world. They exist simultaneously in the same space. It's approximately like a nesting doll. For example, you are now simultaneously present in the physical world, the astral world, the mental world, and the subtle world. Everywhere at the same time. And when you get into a space where a certain type of energy is either strengthened or weakened, then you can begin to feel other layers of

yourself. At the same time, if you don't listen to yourself, you may not feel anything. And the more sensitive can get an interesting experience of interaction with the spiritual world, various plasmoids, with the highest Essence of a part of their soul. What we call the highest Light, the Higher Self. And if at the same time he has positive emotions and a positive attitude, and if he puts the meaning of his healing into this, then this will happen. This will strengthen his thoughts and direct them to the body, changing processes in it, such as metabolism and so on. The Spirit has an influence on the body, just as the body has an influence on the Spirit while they are in union.

39:37 Is the hypothesis of gerontologist Alexey Olovnikov true that shortening of telomeres leads to cell aging?

Irina: This process begins in the nucleus with the division of DNA. These chromosomes you showed contain DNA. There is a special enzyme for this. It's called polymerase. Its function is to split the DNA strands into two parts so that a strand of informational DNA - RNA - can form on it. But the whole point is that these DNA helixes unwind not only for division. They unwind for protein synthesis within the cell itself. That is, the production of proteins cannot occur without the participation of DNA. The information necessary for these enzymes, which are of a protein nature, and their number amounts to millions, is recorded in that same DNA. And in order to find what this particular cell needs among millions, the entire spiral unwinds and, according to transcription, a thread of messenger RNA begins to form on it. That is, information from DNA is copied onto another medium. It and RNA leave the cell nucleus, enter its cytoplasm and there serve as the basis for protein synthesis. The helix that unwinds, thanks to the polymerase enzyme, also twists back. Whether it becomes shorter or not, the process will not change. People grow old and die from various diseases, not because they become shorter. And because the DNA contains a certain program for the development, maturation and aging of a person.

Participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Oksana Kalinina – guest;

MidgasKaus from the planet Esler - biologist, psychologist and specialist in alien civilizations;

LiShioni from the planet Shimor is a specialist in the astral world and its interaction with the material world.

#99 Autistic children, GMOs and DNA mutation. Does a person have freedom of choice?

https://blog.cassiopeia.center/deti-autisty-gmo-i-mutaciya-dnk

https://www.youtube.com/watch?v=vfN3fNlifMo

01:23 Does neutrino influence human programming?

Anna: In the “human design” system, programming is explained by the influence of neutrinos. A neutrino is the smallest particle that is born from a star. It flies and is programmed by large celestial bodies and, later, passing through us, programs us with this transit weather. Those. we are always influenced by this program. Is it so?

Irina : In the form you described, it is not so. From the perspective of humanoid civilizations, this is not so. From the perspective of the spiritual world, this is not so.

From the position of some plasmoid worlds, those that live on the very same celestial bodies that, as they claim, through neutrinos, can create programs for people.

But some of the plasmoids believe that they create events, create people through the energies that they direct to the material world of the Earth. In this case - into its noosphere, etc.

But the word “programming” is generally incorrect if we are describing not just a living system, or not just a material system, but if we are describing an intelligent system. It is impossible to program an Intelligent Spirit to do anything. This means giving him a program for further behavior from which he cannot retreat.

If such programming is possible, it will violate the Law of Free Will.

The law of free will is the fundamental law in the Universe. It was invented by God himself, because... His loving Mind was not able to come up with a limitation of freedom for his children, even when they choose to leave this love.

Numerology, astrology and all the test systems, of which there are many on Earth, but apart from “human design”, they do not program a person for the descriptions they give. Those who say: planets program a person, numbers program a person - they simply do not see, do not feel the free will that can exist. In any case, even “design”, even astrology, even numerology, they describe the Spirit at the moment of incarnation. And, if this were programming, then this Spirit would correspond to these descriptions in the future. And that means that someone who was born, for example, at the same time, on the same day, in the same place, would live exactly the same life. But this does not happen, although all the astrological and numerological requirements for this have been fulfilled, which means that no programming is actually happening. Qualities are laid down, and they are laid down by many incarnations.

But these qualities are changeable, precisely due to the fact that the Spirit is embodied in matter and therefore it can change.

By controlling the will of the Spirit itself, you can do as you want: you could come to this conference and you could not come - it was your choice, and not someone programmed you to do so.

05:29 How do aliens relate to their energy?

Irina : Mead says that they don't have special energy practices like we do. They do not need this, because their energy is initially tuned to proper development due to the fact that they have a balance of the embodied Spirit and body. Those. the etheric body is what you call energy, it builds itself.

Shimora has some energy practices that are similar to Reiki. They resemble ours: how there are flows of energy, healing ones, something like reiki, only not from plasmoid civilizations and not like cosmoenergetics, which is from humanoid civilizations, but created by them themselves, in their egregors. And they can connect to these flows and strengthen their energy.

06:47 How to explain the DNA mutation that is happening now?

Irina : Now there is a transition of quanta. In a real quantum transition, the Earth transitions in its dense material state. It does not and will not lose its dense material state. It's just that the quanta that make up energy in atoms themselves increase their vibrations, preventing the loss of matter density. Your DNA is also a substance, it also consists of molecules and atoms, and mini quantum transitions also take place there. These mini quantum transitions can be accompanied by changes in DNA, which you call mutations.

Mutation is not always a negative phenomenon; there are many positive mutations.

.

07:45 About autistic children.

Anna : In “human design,” autistic people call a mutation, they say “the right mutation at the wrong time.” These autistic children are a prelude to the future people who will be born: the rave people. What can you say about autistic people?

08:13 The reason for the appearance of autistic children.

Irina: Mead says: “I did examinations, diagnosed such children - there were several cases, and they were similar in many ways. The two had almost identical energy. I cannot say that these are people of the future or people of the past. In fact, they have always been born. There simply were no such descriptions as there are now. Nobody was doing this.

Most often, when examining such children, it is revealed that these Spirits very often incarnated in plasmoid worlds. Moreover, one of the last few, either the last incarnation before that, when they became these children, or several incarnations before that, also took place on plasmoid worlds. And during the incarnation of this Spirit, partial memories were preserved (the memory itself was blocked), but the sensations of the world from which he came. Those. he does not remember what is happening, but at the same time it is difficult for him to adapt to the dense material world. **This is the first reason why they may not communicate with people** . In general, it can be difficult for them to understand why they need to make sounds, why they need to put sounds into words. Because in their plasmoid worlds, communication can generally be telepathic, it could be at the level of ultrasounds, electromagnetic waves, etc. – There are many different types of plasmoid worlds.

And the second reason : because. these children came from plasmoid worlds, they are often accompanied into incarnation by former friends and relatives, if this word can be applied in relation to plasmoids. And they come into contact with this child while he is still small and continue to communicate with him. Those. he is able to see them due to the fact that his astral body does not yet completely coincide with his physical one. And these plasmoids only reinforce his feeling that the material world into which he has incarnated, the objective world, is alien to him. This condition is sometimes aggravated by parents and educators. They begin to aggressively teach him something, they begin to show aggressive emotions towards him. They

begin to take him out of the world where he wants to be, so that he can be an ordinary child.

Autistic people feel the energy very subtly, especially of their family and friends. And feeling this aggressive attitude, children go even deeper into the world of plasmoids. I would not call this some kind of positive phenomenon - we need help here.

The task of parents is to help the child establish contact with the reality where he finds himself. In many cases, this can be done with the right actions on the part of the parents. But sometimes the physical body needs support in the form of special medications.

12:16 What effect can genetically modified organisms have on human DNA *?*

Anna : Question about GMOs. Nowadays we are forced to eat many plants that are not eaten by insects, that do not reproduce living seeds. How can they affect our DNA, etc.? Is it integrated into the genome or not?

Irina : What is the DNA of the plants and animals that you eat. Any plant, any animal, any fish, etc. has its own DNA, genetically modified or not. Every living organism has its own DNA. If you eat, for example, cabbage, apples, or fish, your body does not acquire the DNA of these organisms.

Why doesn't it acquire it, because it's the DNA that gets into your body?

Because your body has digestive enzymes that break down DNA into individual nucleotides. Nucleotides are split into individual fragments: D-ribose, phosphoric acid residues and those nitrogenous substances that formed the basis of DNA. And all of this is translated into your cells, into the nuclei of your cells, to build your own DNA.

What are genetically modified organisms, GMOs? These are organisms in whose DNA a gene from another organism has been

added to give it new properties desired by the breeder. What happened in the end is a new organism compared to what it was.

But once it enters your digestive tract, your digestive enzymes will not be affected. In the same way, they will split what came in into separate fragments, and from this you will get your own DNA. Those. for your digestive enzymes there is no difference if you eat plain cabbage with fish - you will get the DNA of cabbage and fish, or if you eat cabbage with a gene in which the fish gene is embedded in the DNA - there is no difference for your digestive enzymes - the same thing will happen . This concerns human health regarding integration into DNA.

15:38 GMO foods can be dangerous for allergy sufferers .

GMO foods have some danger, but it is not in the DNA. Lately you have a lot of people who are having allergic reactions to one product or another. If you or your child are allergic and consume GMOs without knowing which specific gene and from which organism was added to the DNA of this plant, then you may eat a product that will cause you an allergic reaction. Because you may have an allergic reaction to a gene that is embedded in the DNA of a product, and you don't know about it because you are consuming another product. They didn't say on the product label what gene was added.

He says that for some reason your school curriculum does not pay enough attention to the study of human biology. You have such a subject, but they don't tell you in detail and simply about the things that you should know. Therefore, it is very easy to tell people who do not know how DNA is digested, that GMOs change human DNA and so on. Such people can then be asked: "And when you eat non-GMOs, why don't the DNA of these GMOs change you? Why is it that if you ate carrots or cabbage, a plant did not grow in some place in your body?"

17:35 Should you use aluminum cookware?

Irina: Aluminum itself, if it is in an alloy, or by itself, is slightly toxic to humans. And when you eat, for example, sour borscht cooked in an aluminum pan, the acid contained in tomatoes or apple cider vinegar

forms salts with aluminum that enter your body. And they also come from spoons, which may contain aluminum, nickel alloys, and which, when ingested, can also cause the same allergic reactions.

18:22 Holy water . How is water structured? Why doesn't it spoil?

18:31 Do aliens have rituals with the blessing of water and food?

Irina. We do not have any rituals that are aimed at energetically changing the properties of food and liquid. It is not necessary. We do not conduct special ceremonies or rituals. We simply thank God for food, for water. And we consider this enough.

As for holy water, this is invoking the energy of the Christian egregor to purify the water from all the destructive structures that are located there. And after exposure to the energy of the Christian egregor, the energy of this water changes. Molecules react to this energy and line up in such a way that internal connections take on the correct shapes (patterns). If there are any microorganisms harmful to humans, their life is suppressed because their metabolism slows down. The reasons for this are the impact not on the physical, but on the spiritual level. Therefore, microbes are suppressed, and weak microbes generally die, etc.

Why does water spoil? Because microorganisms multiply in it.

Why doesn't it spoil? Because their development is suppressed.

20:56 How can you thank your Guardian Angel? Just say thank you, or do something nice for him?

Irina . He will be pleased if you learn to consciously communicate and interact with him, greet him every morning, consult with him on your life issues: “What do you think?” He will be pleased that his thoughts will be heard. And do not take it for your own when a person learns to interact with him. During every conversation, he will be pleased to hear in response: “I thank you for being with me all my life, for keeping me safe. And I will try to lead a more spiritual life, raise my vibrations to

make it easier for you." carry out my tasks, protecting me from destructive entities, from those entities that can bring me the opportunity to escape into destructive emotions."

22:16 Is there an energetic attraction (kinship of souls) between representatives of alien races?

Anna: Is there an energetic attraction (kinship of souls) between representatives of alien races? Souls simply converge, they become friends. I'm not talking about love, but simply friendship, close friendship, kindred spirits.

Irina. Yes. If they are from different races, from different planets and even from different densities, if they met and were able to perceive each other, then they will be able to make friends and feel the kinship of souls in those relationships and in those concepts about life and in those spiritual aspirations that they can achieve together.

22:56 Does love exist between representatives of alien races?

Irina . Love happens. To create a family for a representative of the Interstellar Union who is physically compatible with your species, you must obtain the consent of the Interstellar Union for them to unite. After all, this alien cannot live on your planet? This means that the consent of the Interstellar Union is needed for physical contact and, if we are talking about a family, for an earthling to fly to that planet. On which planet the Spirit was born, he must live there, so they explain to him.

24:20 Is it possible for an earthling to move to another planet to start a family?

Irina : No, they don't resettle to other planets, and there are no known cases in the Interstellar Union where an earthling was allowed to move to start a family. If you were part of the Interstellar Union, it would be easier.

If an earthling wants to move to another planet, and he is taken to another planet, then for his relatives and loved ones, it will look like he

has disappeared. Such requests came from contactees. But they explained to earthlings that if you leave this world, it is incompatible with the concepts of love, because you will cause suffering to those who will look for you and think that you died or something happened to you.

25:07 Is table salt capable of storing information?

Anna: Question about table salt - NaCl. In our country it is often used as a crystal that accumulates information and clears information. Is there such a thing?

Irina: Any minerals, any crystals have the ability to accumulate vital energy and are charged with certain astral and mental thought forms. The crystal lattice of these minerals itself contributes to the accumulation of these types of energies in the atoms.

25:42 Why do spirits incarnate on Earth and another planet in a body that has deviations?

Irina: Because this Spirit, according to its assignment, must undergo a lesson in adapting to this body and the life in which it will live in it. This is his life task, this is his lesson. This can be for completely different reasons, and what is taken into account here is the result to which it will come. Those. the body itself is an instrument of the Spirit.

And those who help incarnate, the Consulting Spirits, they do not strive to eliminate pain or eliminate suffering. They strive to ensure that the Spirit comes to increase its vibrations by going through this lesson. And this is sometimes possible through passing through such body restrictions. Sometimes it is impossible to do otherwise, this is how it happens in the material world.

Anna: I thank you, Irina, Maxim.

Irina: I thank you, Anna, for the interesting questions, and MidgasCaus and LiShioni thank you too. We wish you and all viewers to realize in the Light of love in which you reside.

Participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Anna, Krasnodar - is interested in “human design”;

MidgasKaus - representative of the planet Esler, biologist, psychologist and specialist in alien civilizations;

LiShioni is a representative of the planet Shimor, a specialist in the astral world and its interaction with the material world.

#103 Questions about medicine from emergency doctor Mikhail. Spirit and body. Diseases, psychosomatics, children

https://blog.cassiopeia.center/voprosy-o-medicine-ot-vracha-skoroj-pomoshchi

https://www.youtube.com/watch?v=emC0YUC524Y

00:00 Mikhail: Good evening! Thank you for the ray of light you give us. As a doctor, I have several questions.

01:32 The disease and its cause. We doctors know that disease appears when a person is physically, emotionally or socially very unwell. In your opinion, what do we need to understand – what is a disease and how best to fight it?

Irina: MidgasCaus answers. The word disease is a very general concept; it means a violation of the physical, etheric, astral body. In medical terms, these are disorders of the physical body or soul (psyche). Most often, both are violated, because the spirit and body are inextricably linked and influence each other while they are in conjunction. While the spirit is embodied in the body, it influences it with its thoughts, emotions, feelings and desires, and the body, in turn, changes its chemical, biochemical composition and physical characteristics, influences the spirit. It causes in him what we call vibrations, and you call thoughts, feelings, and so on.

A disease is a disorder not of any individual organ, but of that being called a person. Even if only the body is sick, it affects the spirit - it begins to suffer, lowers its vibrations from pain, if only because it is distracted by unpleasant sensations and pain in the body.

But pain is a protective mechanism, it is an instinct of self-preservation - so that the body does not harm itself, and so that a person seeks protection and help from this disease.

Mikhail: Thanks for the answer! I realized that the reason can be physical and mental, that is, a person can be mentally ill. Also, acute trauma can cause illness, for example, intracranial pressure.

Irina: The fact is that what you call mentally ill is different from our concept of lack of spirit. A person may be physically and mentally healthy according to your standards, but at the same time he may have spiritual deviations, negative qualities, etc. They will cause illness in him, but this depends on the individual qualities of the body. If it has great resistance, then it will resist the negative influences of the spirit for a long time. It is rather a spiritual illness.

And what you call mental illness - in Esler we call certain features of the union of spirit and body, which make perceptions of the spiritual world possible. Some qualities of the spirit become very strongly manifested in the character of a particular person to such an extent that he sometimes loses self-control, and then he develops a mental pathology that causes psychopathy, etc.

These are qualities of the spirit that have developed over several incarnations and were reinforced by upbringing, environment, etc.

06:22 Mikhail: Thanks for the answer! Perhaps some diseases can pass from one life to another?

Irina: Not illnesses, but inclinations. If the spirit, embodied in this or that body, in this or that world, has developed some qualities, negative or positive, then when it passes into the spiritual world, and then goes to the next incarnation, then it takes these qualities with it .

His memory is blocked for incarnation into a new body so that he can adapt to it and adapt to new conditions more or less adequately. But the qualities acquired in past incarnations remain with him. If they are negative, if in past incarnations he developed them and lowered his vibrations, then the vibrations of this spirit can also cause diseases in the new body into which he ends up.

This is a tendency, and not a given, this is a very individual moment.

Everything will depend on what qualities he will develop in this life. If he fights negative qualities and transforms them into positive ones, then the likelihood of damaging the body with negative thought forms decreases.

Accordingly, if he continues in this life the same path as in the past, then the probability increases.

08:13 Mikhail: Thank you! I realized that congenital diseases can often occur for this reason - in children and adults.

Irina: It's always individual. It must be remembered that if a spirit has incarnated in a body with genetic abnormalities, then this is not accidental. He came to learn a lesson in this sick body. Which lesson depends on his individual qualities.

When a spirit incarnates in a body, he does not choose it himself, but with his spiritual mentors, and they show him his future guardian, etc.

If these parents have a hidden genetic disease that can be manifested in the child, this is known in the spirit world. It is no coincidence that this personality and this particular spirit are born in this or that family.

09:22 Mikhail: Does conception naturally in a family or IVF conception in a test tube matter for the spirit? And also illegitimate children? Do the qualities of the spirit and its health, which incarnates, depend on the method of conception?

Irina: Any spirit chooses a body and its parents together with spiritual mentors. The method of conception is different in different worlds. On Earth, Esler and Burkhad it is more natural. There are worlds where it is more artificial, but in any case the spirit is embodied there.

The method of conception is not so important as to lower the vibrations of the spirit and change its qualities.

What matters more is the environment in which the child ends up. If he is born in a world where there are families and is born naturally, then he receives the experience of love from mom and dad, grandmother, etc. This is ideally intended.

If he is born in a society where there are no families at all, if the conception of the body or its construction takes place artificially, but the spirit is still incarnated, then he will receive a different experience, he will be raised by people who are not related by blood. There love is no less and no more, this is also individual, but the experience will be different.

In vitro conception or IVF is technically no different from natural

conception. For an earthling, the natural method of conception is evolutionarily closer, because not only the physical cells of the father and mother are involved, but also the energy of a man and a woman. The more love there is in their souls, the more likely it is that they will attract a high-vibrational spirit to incarnate, because according to the law of similarity, there is a greater likelihood that it will come to them.

This rule is optional - it happens that mentors from the spiritual world send a low-vibration spirit to a high-vibration family for its guidance, so that it will go through the path of high-vibration parents from childhood, be brought up and absorb their concepts.

13:33 Mikhail: There is such a belief: when a child is in the womb, we can raise him either as a musician, or a chess player, or a mathematician. This is true?

Irina: While the child's body is in the womb, his spirit is not constantly in the womb, but has the opportunity to travel in the astral plane (spiritual world) most of the time.

His etheric body and vital force is located in the forming body and controls the processes of division, construction of the body, and so on. And his spirit (astral, mental body, etc.) at this time travels in the astral plane, returning only occasionally. The shorter the pregnancy, the less time the spirit spends directly in the body.

It enters the body on its own for the first time in the 7th week of pregnancy. But the spirit introduces its vital force immediately at the moment of conception. That is, at the moment of conception, each of us is present next to our parents and spirit guides who help us connect with the body. When male and female reproductive cells unite, the process of combining his vital energy and the newly formed cell occurs, which will be the first cell of his body.

As for learning, his senses are formed during this period, and so is his brain. As a spirit, he is often close to his mother, and he is interested in looking at his parents, adapting to them, to their energy. Everything that is said next to a pregnant woman, played music, shown films - the spirit of the child perceives through her consciousness.

He perceives this as his first experience of receiving information in the world, but then, when he is born and begins to receive education, subsequent information is superimposed on the earlier one. Therefore, people deliberately do not remember their early childhood. If the subconscious part of the memory is brought into consciousness, then he will remember his existence next to his mother during her pregnancy, in the spiritual world, etc.

If a woman plays music or talks about chess, it is possible to set the spirit of the child to learn these things more quickly when he grows up. It is impossible to teach completely, because he must be born and see and hear it with his own eyes of the physical body. Prerequisites can be created.

18:02 Mikhail: I would like to ask about the role of the father, sometimes this role comes in the background in raising children, presence, affection, love for the child.

Irina: MidgasKaus and LiShioni say that they have similar customs in their societies in this matter.

On Earth, for some reason, the concept of father and mother is divided, and the role of the father, especially in the early period of development and formation of the fetus in the womb, is minimized compared to the role of the mother. Indeed, the role of the mother is very significant.

But the father supports the child with his participation and energy. An earthling has an energetic connection with both parents until he is 14 years old, until his own aura is fully formed and adapts to this world. Until the age of 14, the child maintains contact with his father and mother if they are alive. If one of them has already left this world, then an energetic connection remains on a subtle spiritual level.

Even if the child is far from his parents, then through the energetic connection all the moods and thoughts of the parents influence the formation of the child. If the parents are calm and loving, then the child will quickly adapt to the world around him - he will not be afraid of

anything, will avoid fears, and will be interested in learning about the world.

You have a problem when young children begin to experience unreasonable fears. The first reason is that his energy reacts to the negative thoughts and feelings of his parents. Their negativity can be directed at a child, at a stranger, at each other.

The child's energy picks up their negative vibrations and the instinct of self-preservation is activated. Since the child is still small and cannot figure out what is happening in the world, because it is still a stranger to him, he cannot understand what is dangerous, and causeless fears begin as a result of the activation of his self-preservation instinct. This rule applies even if the parents are far away, be it dad or mom.

Mead says that on their planet they teach children about these things in school. One of their main subjects is so-called family psychology. They talk about how a child is formed, how the spirit comes into him, how to raise him and pass on his experience. We adults consider one of the main tasks to prepare a child for adult life, so that he can create a family, and so that spirits also incarnate through him, and he can adapt them correctly.

We get a chain.

When Mead arrived on Earth for the first time in 1983, he was surprised that our schools did not teach either the subject of the spiritual world or the subject of family life to the required extent. He was surprised and thought, how then can a child be adapted to an independent life if this is not told to him while he is still developing?

23:17 Mikhail: Thanks for the answer! We have many families without children, we don't know the reason.

Irina: This is again a very individual point, without specific examples I can only answer in general terms.

Each spirit incarnated on earth has its own purpose. And this is not

always the purpose - to raise children. If natural conception does not occur during life with a husband or wife, and at the same time there are no pathologies with the physical body that could objectively interfere with this process, then this is a sign for people to think about what is included in their life task in general for incarnation.

You don't need to look at those around you that since many people have children, then it should be the same for me. This is not a fact at all. Your psychology is based on the fact that body vibrations have absorbed many instinctive programs (animals), including the herd instinct. It may be common for you not to live your life as a free, developing personality, but to follow the majority, even in such an individual issue as having children.

Therefore, if your husband or wife is fine with their physical body, but with regular sexual activity without contraception, pregnancy does not occur for two years, and you love children and do not quarrel with each other, then think about why the spirit does not choose you for incarnations. Either there is no spirit yet to which you could give useful experience, or this is simply not part of your tasks.

If this is not part of the task at a particular period of life on Earth, this does not mean that the situation will not change within several years.

If you live and follow the lessons for which you came, then in a few years the situation may change and your tasks may include the birth of a child, and you will be able to conceive.

26:40 Mikhail: Thanks for the answer! Question about abortion - as I understand it, it is allowed up to 7 weeks, but after this period it is contraindicated. According to medical rules, we can have abortions up to 12 weeks of pregnancy. So we're killing the little guy?

Irina: I want to say that the spirit enters the body in the 7th week, but it introduces its vital force into the body from the very first minute of cell connection. I'm not talking about termination of pregnancy for medical reasons, I'm talking about social reasons, at the request of the woman.

When everything is in order in a woman's body, and she can safely give birth to a child, but makes such a decision, this means that she does not understand that the spirit has chosen her to incarnate. She, rejecting his will to be born, rejects the will of that God who sent this spirit to be born. Rejecting God, she stands in opposition to him and turns herself off from communication with this light. Technically, this is not killing an already born child, since that body has not yet developed. But it would subsequently develop into a man, but he was not allowed to do this. In fact, this is a deprivation of incarnation, although the spirit could have taken lessons in this family and given development lessons to its own parents.

Abortion is a complete misunderstanding of spiritual life.

According to the laws of the Interstellar Union, a planet where there are such laws allowing abortion cannot be accepted into the Interstellar Union due to disrespect for life.

29:40 Mikhail: During childbirth, can a husband relieve his wife's pain? Can you help with your presence or anything else ?

Irina: Mead speaks his personal opinion: if a husband and wife love each other very much, and the husband is ready to be present at the birth of his child, although not many men will dare to do this, because men do not imagine childbirth that way, and if the husband has found the courage, courage, love, then he can really ease the pain through support and faith that everything will end well. And any belief in a better outcome reduces physical pain, like a bright, high-vibration feeling.

31:30 Mikhail: We have sudden deaths of children under one year old, and medicine still does not know the cause. Can we know the reason or motive for this?

Irina: There are many spiritual reasons for this phenomenon, and it exists not only on Earth.

On any physical planet, in a dense-material world or in a high-vibration

plasmoid subtle-material world, the body gradually collapses and dies. The energies gradually dissipate - this is also the death of the body, only slower.

Why does this happen in childhood, when, it would seem, the spirit has not yet had time to gain experience? The reason is hidden in his spirit. That is, the spirit chooses a planet for itself in advance with the help of its spiritual mentors, but it always makes its own choice, it can refuse.

But if he refuses to incarnate where he was told, he may be deprived of incarnation altogether. Whether to be incarnated or not is always up to him to decide for himself.

During this incarnation, the spirit is shown its parents and told its lifespan. They develop a plan in advance - what he must go through, what events in life, what he must study, what feelings to show, what to develop, what to get rid of, etc.

And he stores all this in his subconscious memory.

Here he will not know it, see it, remember it, because the memory is blocked, but he will feel his calling, where to go, what to do, and so on.

The main thing here is to distinguish the voice of your heart from the voice of the minds of those people who are around him and who can lead him onto a path alien to him.

So, the lifespan is determined in the spiritual world, depending on what he must do on Earth, in the material world.

But the lifespan is not strictly defined and can be changed. For example, if a spirit successfully develops, increases its vibrations, its level of awareness, love for the world, trust, gratitude, then its spiritual mentors, seeing that it is successfully developing and growing spiritually, can change its incarnation period upward so that it has time do more in this life to develop your spirit or those around you. If he has some unfinished business on Earth, the guides may decide to keep him in this incarnation until he completes it, if it suits the spiritual

development of himself and others.

And on the contrary, if a person has a long period of incarnation, but he begins to lead such a lifestyle that he lowers his vibrations, begins to hate everyone instead of love, to be offended by everyone, to envy, and even more so to do something on the physical plane, to destroy himself and others, then they can shorten his incarnation period by first sending several warnings.

If he degrades in this life, especially if he incarnated from a high spiritual level, and suddenly begins the process of degradation here, his spiritual mentors can raise the question of his premature disincarnation for any reason, illness or accident, as if accidentally arranged for this purpose. so that he does not have time to greatly lower the level of his vibrations and fall much below his level, because if he sinks greatly, then he will rise again for several lives.

This is not necessary, but it is quite possible.

As for children under one year old, there may be several reasons for such an early departure from this world.

Or this spirit lived in the body of a rational being who committed suicide, who himself killed his past body. And then he did not live the period in the material world that he himself agreed to. And when such a spirit comes to the spiritual world, his mentors will tell him that, although you yourself agreed to this incarnation, you did not live this life, and now in order for you to use this time, you must live the missing time that you did not spend in material world. This is done so that he begins to respect his own decisions.

If he wants to incarnate again for a long time, then he will be told that if you deceived yourself the first time and ended your life that way, then first live these missing years (a year or several months) so that the time for which the life force was given expires . This is the law, he himself decided so, and, having come to the spiritual world, he understands this.

Only after he has lived the missing year or months in the material world and returns again to the spiritual world is it possible to incarnate for a longer period in order to undergo development lessons.

The second reason: this spirit did not commit suicide in its incarnation, but its program is changed. For example, the circumstances of his life change. Let's say in the spiritual world it becomes known that his mother's future circumstances have changed - she will meet a man who will educate this spirit in a negative way. And then he can be taken out of incarnation in advance.

If the spirit is from the angelic levels, then something may happen that requires its presence in the spirit world or on another planet. This also happens, but less often. There are a lot of reasons.

There cannot be one spiritual reason for all child deaths. Each case is individual.

41:30 Mikhail: Children in adolescence, due to hormonal changes, are susceptible to gambling addiction, and suicides occur. How can we help a child overcome difficult conditions?

Irina: Gambling addiction, suicide and other behavioral deviations indicate that the matter is not only a hormonal shift, but that his development as a spirit is proceeding in the wrong way. He does not feel trust in the world, in his parents. This is because even in such a young soul there is no longer the love and openness that she had in childhood.

There is one way - to start teaching him love - by your own example, by example from books, from films, from art, to awaken the light in him.

The teenager may already understand what you are telling him. These problems are because your schools do not teach what we have - knowledge about the spiritual world, who a child is in general. Therefore, teenagers often experience disorientation in society - they do not know why they live, what they should do, what they are interested in. They cannot choose because they are disoriented.

Since this is not taught in schools, it means that it is the parents' task to tell the child at a more or less conscious age of about 7-8 years. If you have a teenager, then you need to tell him at his age, it will just take more effort for him to hear and believe you.

Tell him that he is not only the body in which he is located, he is not just a boy or a girl, but he is a Spirit, embodied from the spiritual world, who has lived many lives and his task is to develop, to distinguish good from evil. There is God, who is his father, gave birth to him, and he is incarnated in the material world. Be sure to have several conversations and activities with your child so that he learns to connect with the Higher Self. In Esler this is called inner light.

Tell him how to focus on himself, how to turn to his inner light, so that he feels that he is infinity, eternity and light. And then no deviations will be able to captivate him for a long time, and even more so he will never kill his body, fully realizing himself as light, and will feel the support of God in everything, even in the most unpleasant and terrible circumstances for himself.

45:48 Mikhail: In men and women, the so-called third period appears, when menopause begins - andropause, menopause - and after this period, many people experience exacerbations: angina pectoris, hypertension. How can we help a person to get through this period easier?

Irina: What you called angina pectoris and high blood pressure is activated due to hormonal changes. A person's feelings and emotions also change. He stays at home more with relatives, more often he thinks about his life, and these memories are not always joyful and inspiring.

During menopause, not only the body changes, but also the spirit. He begins to rethink, more or less consciously, his entire life. These thoughts can cause negative feelings in him - despondency, guilt, irritation with himself and others. These conditions affect the physical body, and it releases certain hormones, adrenaline, cortisol, constricting blood vessels and causing an exacerbation of diseases that already exist in the body.

How to help? We need multidimensional work with a person - to explain to him psychologically how he can cause negative conditions and diseases in himself. With love and positive emotions he can be healed on the physical level, since the spirit controls the body. You need to trust this - learn to trust the body, the world, God and perceive the disease in a positive sense. Understand that this is not a punishment or a restriction, but is given to cultivate positive qualities in oneself - patience, love, etc.

The second aspect of the work is related to the environment of this person, his family, where he lives.

Old people should be treated with condescension, their psychology differs from that of young people, they often have disorders in the brain - because of this, forgetfulness, irritability, etc. You need to approach them with patience and understanding, without provoking negative emotions.

The relative who is nearby should be explained about these changes.

And thirdly, working with the physical body, identifying its disorders that your medicine reveals. For example, getting rid of foreign organisms - parasites, microbes - increasing immunity, proper nutrition, fresh air, movement, etc.

This is work on three levels - spiritual, psychological, physical, plus work with the person's environment. Only a combination of these types of assistance can give a stable and positive effect.

50:50 Mikhail: Is it possible and necessary to resuscitate a person? I realized that if a person's death has already been determined, then resuscitation is not needed. On the other hand, doctors must keep a person in this physical body as long as possible. Or did I misunderstand?

Irina: Your message of helping a person and returning him to his physical body is kindness and a manifestation of love. By showing love and helping the spirit who cannot return for objective reasons to return

to the body, you are not doing anything wrong. On the contrary, you develop a desire to help him. You must remember that your efforts will not be crowned with success if a decision is made to withdraw from incarnation. Your activities will not bring him back.

If the decision is made for him to stay, then you will help by creating conditions in his body for his return.

Any physician, any person - a doctor, a nurse - are not ordinary people, they did not come into the profession to earn money. It is difficult and responsible, and the message is always to help others.

From student age, a random person will not come into the profession, and if he does, he will drop out during the first stages of work, because this is a very difficult profession spiritually, mentally and physically. It is given for the development of love, compassion and help, so everything must be done to save the body and life of a person. If you were unable to do this and the spirit left, then do not scold yourself and be upset, feel guilty, accept it as it is and wish it new happy incarnations.

53:45 Mikhail: Thank you very much for your answers, if our beloved guests have any wishes, I will be glad to hear.

Irina: LiSioni wanted to add: the person who came into the profession of helping others already understands the value of life and health. Together with Mead, they want to wish the development of patience, love, courage on the path that you have chosen, as well as to all doctors, nurses and other specialists. We wish all viewers who become patients of doctors great patience in communication, since doctors are sometimes very tired and cannot pay much attention. We must treat each other with love and understanding.

Whoever is in front of you - a doctor, a nurse or a patient - remember that before you is a spirit embodied in a body and is as much a part of God as you are.

#107 How to overcome the animal nature during the period of spiritual growth. Practice connecting with your Higher Self

https://blog.cassiopeia.center/kak-preodolet-zhivotnoe-nachalo-v-period-duhovnogo

https://www.youtube.com/watch?v=FYu0hxKzwrY

I. Podzorova : My name is Irina Podzorova, I am a contactor with extraterrestrial civilizations. Today, the representative of the planet Burkhad Mirakh Count, who is already familiar to you from previous videos, is answering questions, and he is ready to answer questions.

00:50 Formation of a totalitarian socio-political system based on the Christian egregor

Yu. Kovalev : My name is Yuri. 2000 years ago, on the basis of the ideas brought to Earth by Christ, as well as numerous subsequent, relatively speaking, human interpretations of these ideas, a powerful energy-informational complex or egregor - Christianity - began to take shape over the territory of Western Europe. People were offered this

basic meaning, I will try to formulate it: man depends on God in everything, the earth and human life are only preparation for the Supreme Court. The Christian project played a big role in the humanization of people, in the growth of people's morality, but for a number of reasons, only a totalitarian socio-political system could emerge on its basis, becoming an obstacle to the further development of society.

02:00 Totalitarianism as a reaction of the instinctive part of the soul to changes, to other paradigms of its existence.

I. Podzorova : As one of the participants in the formation of that same Christian egregor from the very beginning of its formation until today, I cannot help but note the fact that the totalitarianism you indicated is a reaction of society not to Christianity itself, but a reaction, one might say, esoteric language, the instinctive part of their souls, what in Christianity is called the sinful nature of man, to face a completely different paradigm of their existence, which can be simply called "in the light of God." The whole point is that human consciousness is inert in its essence. What is inert? This means the mind of a person (through the brain), who from childhood, being brought up in one or another environment, absorbs and accepts the norms of behavior that exist around him. And he accepts them as true norms - for how to act. If he sees an example around him of everything that is happening, he sees an example in his family, he sees an example among his friends, and so on, then he accepts these very ideas as truth. And later, when he comes across the ideas that there should be freedom in the world, but for this freedom there should also be responsibility in the world to oneself, to society, to God, he begins to struggle, because a contradiction arises between what he considers truth and new ideas to be light. Because of the human instinct of self-preservation, it is much more convenient to remain in previous positions than to change them to new ones, because he is already accustomed to the old ones. This is his habit. To change it to a new one, you need some courage, you need to step over yourself, over your beliefs, sometimes, and very often, over the norms of the society that continues to live in old concepts. That is, you need to somehow step over your instinct of self-preservation, which naturally causes fear of change, and become a new person or, as the Apostle Paul correctly put it, "a new creation in Christ." It is for this reason that the totalitarianism you are talking about became a reaction to Christianity.

But the whole point is that when there was no Christianity, there were polytheistic religions of various kinds - animism, totemism, shamanism, various more or less formalized religious cults with priests, for example. This did not save the people from totalitarianism, because, in any case, there was a slave system, there were wars, there was the destruction of dissidents, including Christians, by the forces of the Roman Empire, which continued to remain in its faith. This is one of the properties of human nature, which meets with aggressive suppression those new ideas that can change a person.

06:23 Fight of egregors

In the astral plane, this manifests itself through the struggle of egregors. The egregor that dominates a particular territory or over a particular society, when encountering the appearance of another egregor, he almost always reacts to it more or less aggressively. But this is not because he does not want to lose food or for some other reason, this happens for the objective reason that the egregor must preserve his life, because those who previously invested their life force in him endowed him with some a form of consciousness, so to speak. This certain form of consciousness also has an instinct of self-preservation. And it even happens that the guardian spirits of the egregor themselves already want the advent of new social conditions, a new religion, but the egregor himself still resists this, possessing a certain form of pseudo-consciousness, he directs his energy to induce aggression in his participants towards dissidents .

This happened both during the Enlightenment and during the period when freedom was declared the most important value - a value greater than faith. Those people who propagated this also thought in these categories, that is, suppression.

And we see this during the period of the Russian revolution, that is, in any case, those people who criticized the same church or the tsarist government for totalitarianism, for the slave system, for the destruction of dissidents, for faith, for example, or for the lack of it... Very there was a lot of criticism from both the Socialist Revolutionaries and the Bolsheviks and other forms of the revolutionary movement - there was a lot of criticism from church representatives that they do not allow you to be an atheist, a materialist, that they suppress freedom of choice. But when materialists and atheists came to power, they began to

behave in exactly the same way towards believers. And this is not surprising, since the form of consciousness is the same for both. Ideas, beliefs, and external mental superstructures are simply different. And the very inner essence of a person is the same as that of an inquisitor who burns at the stake, or that of a witch whom he burns - they have the same essence. And they can easily change places. And this has happened more than once in your history. This is my opinion about totalitarianism and the Enlightenment period.

09:54 Subordination of the power of instincts to the mind of the embodied spirit. Inner Light.

Answering your question, which was not asked out loud, but which I fully felt: “What should I do?” – I want to dwell on this, this fact. The power that I talked about is the power of your instincts (there are only five of them, and they manifest themselves through your higher feelings, they can masquerade as them, and so on), this power by its nature is subordinate to the mind of the embodied spirit that exists. Why subordinated? Because by your nature you are not animals, that is, you are animals in body, but, besides the body, you still have an immortal rational spirit in you, which is precisely part of that God, that light in which you believe and which you call by different names, perform various rituals and so on and so forth. These rituals, these prayers, these mantras - they are useful at a certain stage of the development of the spirit, they are useful for those who, one might say, have not yet realized and are only on the transition from materialism to the feeling of universal light. And therefore, a person who begins to feel that there is something other than the material world, he most often joins one religion or another, either the closest territorially, or (if several are close to him) the closest to his soul, and begins to grow and grow there. develop, accordingly feeding the egregor. But when he feels that his growth in this religion has stopped (this happens quite often), he begins to come into conflict with the people remaining there and, in general, with the egregor himself. And then he goes further, although at first he even resists, but in any case, if he listens to his inner light. The inner light will still tell him to go to the end, to be honest with himself and to follow the light that is inside, and not in that faith, not in the person or prophet who created this religion.

Question: “What to do with this nature, how to suppress it?” – it is in the will, in the desire and in the capabilities of each person.

12:46 The problem of teaching basic knowledge about the Spirit.

"What's the problem then?" – naturally, you ask. The problem is that you don't know how, your humanity in general, people don't know how to do this. They generally do not distinguish their instinctive impulses from their feelings, their emotions from their feelings or from their desires, they do not know the reason for each desire, what it can lead to, why it arose, and so on. Personally, my opinion is to change your society and create the synthesis that you are talking about, and so that this again does not turn into another totalitarianism, but already a totalitarianism of synthesis, which will already be pursued explicitly or implicitly. Violence can be different, as you understand, not only physical, but also moral. So that this synthesis, which unites esotericism and Christianity, does not become the same totalitarianism that is already persecuting both esotericists and Christians who do not fit into this synthesis.

To do this, you need, firstly, training, as I have already said, in the same basic knowledge about your spirit, which in the Interstellar Union is known and taught to every child in the family, in educational institutions, etc. and so on. But since I have studied your situation, the introduction of such subjects in your schools is not yet possible for objective reasons, just as a drastic change in the programs in your educational schools is also not yet possible, but only gradually, then I see only one real way, a slow, I'll tell you right away, difficult, but very real path to changing the paradigm of society that has now developed.

14:58 The path to changing the paradigm of society is a local revolution of consciousness

And this path is called a targeted revolution, only this is not a political revolution, not a religious revolution, but a revolution of consciousness. Why did I call it point-based, local, because it is formed in minds, hearts and souls, like in a family. Gradually, slowly, every person who hears - this is called the spread of this knowledge from person to person. For example, you heard them, passed them on to someone else, you passed them on to your child. And gradually, bypassing, one might say, state educational institutions, taking advantage of the freedom of speech that now exists, in no way incurring suspicion of resistance to the authorities or the existing religion, by any word, by any action - fully supporting these institutions in their words, sincerely

supporting, because they really are the best that can be in society at the moment, taking into account its spiritual, intellectual and energetic readiness. But every person who now hears my words, every person who hears us, I urge you now to listen to yourself, to your soul and say that you are not animals, you are not just mortal bodies, you are immortal intelligent spirits who have incarnated here on Earth, not just to live your life here, acquire property and pass it on to your children, but you incarnated for a more global goal - to become light, that love, that infinite wisdom, the presence of which everyone feels within themselves, even those who denies them. To deny them, you need to think, and thoughts are light.

17:35 Daily practice for every person

I ask now to hear my words and understand that the future of your children, your grandchildren and your entire planet Earth depends on the light that is in you. What exactly do I propose to do? In every family, every person who has realized this, begin to increase their awareness, as esotericists say, raise their vibrations and be sure to tell their children about this. Specific practices are a connection with your inner light, what you call the Higher Self. You can even do it yourself, the main thing is to believe in it, that is, the most important practice for you now, for earthlings. Every person who hears me now, who is already an adult, should direct their energy every morning and every evening to connect with their source. Just close your eyes and spend 10 minutes of your time on it. This is very important, these will be the most important 10 minutes during the day, because they will allow you to feel the light that will guide you and give you strength and will allow you to understand that this light is within you. And religions, teachings, philosophies, sciences are only a reflection of that light through each person thanks to his ability to create. So sit down, relax, close your eyes and just say a few simple words: “I thank the Creator - the creator of this Universe for the fact that it exists. I thank my heavenly Father for giving birth to me on this Earth, for the opportunity to gain the experience of life that I am now living. Any experience is valuable."

What you call negative, the experience of mistakes is also valuable experience so as not to repeat them in the future. Anyone who has not gone through mistakes, has not gone through negative vibrations, negative feelings, cannot fully feel the light. It is not necessary to say it exactly the way I say it, but in its own free form, as everyone will feel at this moment. You can turn to the deity of the religion to which you are

accustomed. If you are an atheist, just thank the light, thank nature, matter - everything that you are used to - the mind of the universe or just the universe, the galaxy - whatever you find experience in your soul. I am now addressing atheists, materialists. The fact that you live and think already indicates that you are different from animals, that you are different from plants, and so on, there is light in you. The fact that you don't feel or see it is only because you are not tuned in to it. Taking a receiver as a simple example, it can be tuned to either one type of wave or other types of waves. So, if you are a materialist, if you are an atheist, you yourself configure your consciousness in such a way as to feel the waves and vibrations of only the material world. I am turning to you now. The spiritual world really exists, it is an objective reality, the same objective reality as the one that you can feel and see around you, but in order for you to feel it, you need to tune your receiver. Just try it. If you direct your desire to this and at least a little of your faith that this is at least possible, then you will definitely feel it.

Turn, as I already said, and when you have thanked, say: "I ask to connect me now with my original source, my Higher Self, my superconsciousness, which is now in the spiritual world. I ask my Higher Self to cleanse me of all my negative blocks, emotions, delusions, illusions and other forms of ignorance in this material world. I ask you to let me feel, see, understand your light." There is no need to say anything further, just relax. Now I will not say what feelings may arise, they are individual for everyone, but no matter what you feel, you can see some image, feel something - it will be different for everyone, depending on how you are used to it. Each person is individual, each is unique, and here it is impossible to derive a single formula for the answer. Sit for 10 minutes in this position, relaxing. Even if (I want to tell you right away) you don't feel anything, nothing changes at all, don't give up this practice, because sometimes it takes time to adjust this sensitivity.

After all, in order to teach a child, for example, to walk, read, write, and so on, it also takes some time. By the way, sometimes it also takes time for you, as children, to learn to tune in to the wave of your heavenly Father. And how long it lasts depends on your individual vibrations and depends on the trust that you have in your soul in God, the universe, in yourself, in those around you. If you feel that something is bothering you, you don't want to do it - this means that you have blocks of fear, mistrust, guilt, and so on, that is, you have negative vibrations. Of course, this may interfere, but to feel it, you only need to do this practice for 10 minutes in the morning and evening

for 21 days. This is the necessary minimum at which every person who is sincerely directed in this direction will feel the light within himself.

And then, after the first experience of either simply seeing him, or merging with him (depending on his own vibrations), a person will be more willing to be in this state, and then, when he has more conscious contact, he will no longer be able to just call on this light at the time of these exercises, and he will be able to continue going further after 21 days. In general, it's good to make this a practice throughout your life, because you are used to performing body hygiene in the mornings and evenings, but hygiene of the soul is even more important, because everything, your whole life, depends on it. Then, when there is a more or less clear sensation of this light, you will be able to mentally ask questions about your life: why did I incarnate here, am I fulfilling my tasks - in any case, there will be answers, and the answers will be from that source that is eternal , from the source of which you are a part. How are you different from him? It is you yourself, but only the part of you that is in the spiritual world, and its memory is not blocked from entering the body, it remains unchanged, the eternal light that is on the level from which you came. In any case, it will give you any answers in your life to your most pressing questions.

27:03 Practice for believers

Believers (now I am addressing believers of any religion, denomination, movement, and so on), you can completely replace this with your prayer, which is familiar to you, only there is one condition: when you turn to God in the form in which you are accustomed, just include in this prayer words of gratitude to the God I spoke about, and also sit down after the prayer and just let God speak to you: "Lord, I prayed to you now, I'm ready to hear the answer. What do you want to tell me through yourself, through your Angel?" etc. and so on. in the form in which you are used to doing it. Remember that prayer is not a monologue. Prayer is always a dialogue with God. And when you talk to him (when you pray to him, that is, you talk to him) for this prayer to be a successful practice, you must give God space to answer, not just pray and go about your business, but sit down and say: "Lord, I thank you for that light, I ask you to fill me with your light and cleanse me" (well, "Lord" or by the name to which you are accustomed - this no longer plays any role, the main thing is that this name is holy for you, if you are a believer). But in any case, contact will occur in the form that your soul needs, for which you are ready. Again: "I trust you

completely. You are my God". Every believer already realizes that everyone's life is in the hands of God, and then indeed, as Christians said, it is life, its duration, that is truly in the hands of God, because man cannot control it himself.

There are laws of nature, etc., but there are many examples when a person who, according to all the laws of nature, should have died, but remained alive. There are many such examples, because it was not time for him to leave this world. In the same way, there are times when young, seemingly healthy people, without any earthly reason, went into the spiritual world. There is also an objective reason for this in the spiritual world. It may be different. So this practice is very important for any esotericist, atheist, believer of any religion, for any person, because a person is a spirit embodied in a body.

30:03 Looking at the world from the position of Light

So far, your civilization, its scientific, educational, political, economic part of your civilization - it cares almost only about the needs of the body. This is how your civilization is set up, and in no case should you blame your power structures or military, political or anything else for this - this is your objective reality, which was formed at this moment, one might say, with the permission of God. And this is again your experience.

Get used to looking at everything from a position of light, that any event that prevents you from living, any event that is negative for you, do not accept with rejection, but try to find positive aspects in it. To do this, try to imagine an image of this person or phenomenon that is interfering, and shine a light on it. Remember that in the light nothing can harm you. Remember that you are an immortal spirit that cannot be destroyed, for example, or become sick. Your body may be destroyed or become sick, or suffer some damage. But in any case, you as a spirit will not suffer from this.

31:25 Attitude towards death

In order not to be afraid, in order to overcome the instinct of resistance, you must, first, have a correct attitude towards death. What is the

correct attitude towards death? This is the recognition that, yes, the body is mortal, there is nothing terrible in this, this is a completely natural process, since you were born here for a specific purpose, and when you fulfill it, you will go to your heavenly Father in the spiritual world in order to develop further. There you will receive a new task and incarnate again, that is, this is a natural cycle, and this process should not cause any fear or horror. It causes horror only in a materialistically minded consciousness, which considers matter to be the only reality.

32:13 How to teach a child to connect with the Higher Self

But every time you do this and be sure to teach this to your children, that is, do not force them to do it (what I just described is practice), but simply show by example and be sure to tell your children - this is my second advice to yours. civilization. It is imperative to tell your children that they have a body, that they not only have a need to eat, sleep, play, but be sure to tell them that they are eternal immortal spirits who have incarnated, that they have their own tasks. When they reach a conscious age (for you this is about years old, probably about 10 - it all varies: it happens at 7 years old, sometimes at 10), we can talk about how they can connect with their Higher Self like this. Explain to your child right away that nothing gives greater happiness, pleasure, pleasure (explain in the form in which he understands it) than merging with this source. But under no circumstances force him if he doesn't want it. Just do it in front of him from childhood, and he will get used to it. This will be the norm for him.

Further, when there are already many such people in your country, for example, many of those people who are already doing this with light, your consciousness will begin to change, both the consciousness of each individual person and the public consciousness. For everyone who does this, this will definitely happen, because the light that you discover in yourself will teach you, will guide you on the path that will reveal to you the meaning of life, in general the meaning of incarnation here.

34:16 Materialism. Power. Social paradigm.

The trouble with materialism is that it promises development here on Earth, but it cannot give anything more. It is because of this that some

communist or socialist ideas that are combined with materialism fail. The good that they have is leveled out by the paradigm of materialism, which is what happened to you, for example, since the time of the revolution. A good, wonderful idea of helping the poor, freedom, equality, brotherhood and, as you also said, the absence of private property (private property was in the Soviet Union, but in some other form), but what did your Soviet Union destroy? It was precisely the obsessive propaganda of materialism and criticism not of the perversions of religion, but of the religious idea itself - it led to the emasculation of the meaning of life that existed. And those young Komsomol members who became communists, who came, among other things, to the party apparatus, etc., in any case, they felt that there was, one might say, emptiness inside them. And any emptiness needs to be filled with something. And how could an atheist, a communist, who has already been taught that the spiritual world does not exist, fill it? Any attempt, even in front of himself, to pray to God or to dissolve in the light was already perceived by him as ridicule, since he perceived it as relics of the past - not as development, but as remnants. And since he perceived as remnants, his only consolation was matter, those material pleasures that he could receive in this world, therefore such a paradigm was formed among your people that only material pleasures can give some meaning, either the acquisition of pleasures or their possibilities for other people, for those closest to them, for example, for themselves or for loved ones - this does not change the idea itself, it is sought in matter. And when such a person comes to power, and there were very few others among the communists, they themselves weeded them out - when such a person comes to power, and in any case he wants to receive this happiness and meaning through matter, he quickly understands that the pleasures that he needs require large amounts of money, well, in your opinion, money, wealth, therefore, naturally, from his youth, from childhood, he goes to this power not in order to rule fairly, to have happiness, etc. ., and he goes to rule in order to himself acquire opportunities for greater pleasures. No matter how much he hides this desire within himself, he still has it, it is present until he merges with his inner light. When he merges with him and, communicating with him, comes to power, then it will be much easier for such a person to refuse those temptations that are in your power structures: the temptations of power, wealth, pleasures, influence and other manifestations of various instincts, - because he knows the highest happiness. And therefore he will already rule in order to remain in this light, in this pleasure, with which no material pleasure can compare (this is completely different). He will already increase it, and in order to increase it, he will quickly understandthat one must do good deeds,

goodness, good for others, that is, for those over whom he will rule.

And it is this system that will lead your society to change laws that will become truly useful for the population - not for that part of the population that rules or that carries out the government's tasks locally, but for the most common core of the people, the population. And there everyone will already be taken into account, as is already happening to a large extent in the worlds of the Interstellar Union. And it is then that the rulers will understand that if, for example, I, having weapons, attack a neighboring country and if, because of the riches that I seize by force, at least one person dies, if I deprive him of incarnation in this world, then I I myself will fall to low vibrations, I will no longer feel that light. And if I don't feel that light, then I won't need the wealth that I will acquire. This eliminates, for example, the need for wars of conquest, well, and some other points that, one after another, will lead to a whole chain of changes. The main thing is that in your society the power structures that exist now, if any of them sees this video, at least try for 21 days to do what I say, because in the matter in which you are looking for pleasure, in this search it makes no sense just because matter, material life tends to end. And the eternal life that you will acquire, which you will feel while in this body, is just beginning here. And the beginning is always more progressive than the end.

And if, nevertheless, these representatives of the power structures do not listen or are unable to do this for some of their own reasons, then you, earthlings, have only hope that, as I have already said, by specifically changing yourself, educating in this spirit your children, in this light, constantly mentally filling them with the light of your love, you will raise a new generation that will be different. And when they grow up and start their own families, it will be even easier for them to do this. And, in the end, your society will come to the point that one of these new people, new creations, as the Apostle Paul said, will nevertheless come to power, there will be more and more of them, and so your entire society will change, and with the change of government, naturally, the social paradigm will change, and the laws, and all your egregors, and everything will change, and you will eventually come to the readiness to join the Interstellar Union.

Y. Kovalev : Mirakh Count, thank you very much. Thank you, Irina.

Participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Mirakh Kaunt - from the planet Burhad;

Yuri Kovalev - guest.

#109 Black holes in space, phantom tulpa, lucid dreaming, life force

https://blog.cassiopeia.center/chyornye-dyry-v-kosmose-tulpa-fantom-osoznannyj-so

https://www.youtube.com/watch?v=MGHNqx7rGz8

00:17 About black holes, their structure and place in the Universe.

Interlocutor: What are black holes?

Irina: Here is black space, and this is black, but it is different. It's like there's a failure and you feel that someone is watching from there. They (black holes) are central and two on the side, and they seem small, but, in general, they are probably the size of several Suns. It's eye-catching.

Interlocutor: What is there at the end of the tunnel of this black hole?

Irina: There, any matter of the dense material world simply turns into radiation.

Interlocutor: So they will tear us into small pieces there?

Irina: It's not something that will tear apart, there any energy except gravitational energy will be knocked out of our bodies, from the atoms of our bodies, and only that will remain, and we, together with the ship, will turn into radiation, into the light of radio waves. So they (the aliens) have already sent there something like automatic probes with robots to study what kind of radiation this substance decomposes into.

The universe is cyclical, you know? It appears and disappears. First, everything except black holes disappears and turns into light, this is how dense matter behaves. In general, our entire Galaxy and Universe consists of 96% dark matter and energy, and these are called plasmoid worlds.

And when the Universe ends its existence, all dense matter is first transferred into radiation and into the gravitational field, which is collected there in the form of black holes.

And then, when everything is converted into subtle radiation, the black holes themselves also disappear, they are decomposed into subtle radiation, that is, the Universe passes into subtle worlds and then, in general, into the spiritual world, and there is no matter left.

And then, when the Universe begins to unfold back, thin-material worlds arise first, and then dense-material worlds arise. First, there is gravitational energy and then it begins to gather into black holes, and they are the first to form the Universe: the Universe begins with them and ends with them.

03:43 The concept of the Spiritual world from the point of view of 2-dimensional space.

Interlocutor: It is very difficult to imagine that there is a Spiritual world.

Irina: But he is not material. Just imagine that there is water, and that there is radiation or radio waves. And whoever lives in water cannot imagine what radio waves are. And here's another thing about measurements: imagine a sheet of paper - it will be a 2-dimensional dimension, and living beings can live there, so I drew a little man there, and he lives there. But if you put your finger on a sheet, it will be an incomprehensible phenomenon for him. Here is a sheet for him - this is the Universe, just like the spiritual world for us.

The most interesting thing is that we are particles of God, and we incarnate 70% in the spiritual world, and at the same time, some part is generally in the Light, and some part is at the level from which we incarnated. Well, and some part, accordingly, in the Astral world. We are only 30% here.

But our physical body is a continuation of us in the spiritual world, just as our finger is a continuation of the body.

05:17 Understanding of the Higher Self as an individual VY for each person.

Interlocutor: But why don't we understand in our physical body: where is the part of us that is huge?

Irina: If you ask the finger: "Do you understand where the brain is?"

Interlocutor: Or maybe it's just the finger that understands where the brain is and doesn't speak. On another level of the mind he understands.

Irina: Yes, in the way we can understand the Higher Self. After all, the Higher Self is us. Now, imagine that the fingers, each have their own consciousness, but unlike the fingers, we have one Higher Self. Each person has one Higher Self. When they say that many people have

one common Higher Self, that is, when one Self embodied in many, - then Mead explained that there is simply a feeling that when you begin to connect with the Light, then for you everyone is one. You can feel that you are not only there in some people, but that you are embodied in everyone.

Interlocutor: Everyone probably has an individual Higher Self?

Irina: Because we are separate individuals, but at the same time in the Light we are all united. Such is the paradox: united and divided at the same time.

Vlad PULSAR: Does the Higher Self have a Higher Self?

Irina: This is Light, just Light.

Interlocutor: Is this God?

Irina: Yes.

Vlad PULSAR: And the Higher Self is also God.

Irina: The Higher Self is also God. We say a particle, but we say a particle, adapting to the material world, for example, a grain of sand from a stone or a drop in the ocean. But the spiritual cannot be divided into parts. In reality, they are all one there.

Vlad PULSAR: Irina, you always explain very succinctly, simply and always to the point.

Irina : Kirchiton told me that any theory that you know and cannot explain to a 10-year-old child, then you don't know it (smiles).

07:40 About phantom doubles (tulpas) and their creation at the level of thought forms.

Interlocutor: But there are still some doubles, but what are they? Is it believed that everyone has doubles?

Irina: Maybe that's what they actually call phantoms.

A phantom is something created in the astral world: you can, any person can create your own thought form and endow it with certain properties there.

They are called tulpas. We already have entire sites on the Internet where children do this: they read there how to create mental images, how to create a friend for themselves in the invisible world, and endow him with certain qualities, and then they really begin to see him in the astral plane.

Tulpa is a Tibetan term, Alexandra David-Neel has written a lot about it. She wrote about Tibetan monks who make themselves tulpas, in our opinion - a phantom. She (the tulpa) will be like a copy of the person himself in the astral plane, not in the physical world. He will simply be able to endow her with his life force and give her a task. And therefore the same monk can be seen in different places. They can also heal. And now, having learned about this, they have created a special website for teenagers, and they share all this with each other.

Interlocutor: Do you think this is a quantum twin?

09:35 The concept of quantum and free energy of vacuum.

Irina: What is quantum? Kirchiton said that one quantum of gravity is called a graviton. One quantum of Light is called a photon, one quantum of a radioactive substance is called, it seems, a meson. But these are our Russian names. He told me that your scientists believe that these are particles, but this is just a portion of energy.

Space itself is filled with energy, even absolutely empty space - the physical vacuum is also filled. Even if in any physical space in which there is nothing, not a single atom, not a single radiation known to us,

nor electromagnetic fields, there is still free vacuum energy there. And it is already an intermediate part between our world and the astral.

Vlad PULSAR: This is also called the zero element.

Irina : It is also called a torsion field, ether. But the ether can be internal and external, and the energy of the vacuum can be extracted. You can endow it with vital force, but vital force is part of ethereal matter.

11:29 Life force and its replenishment in a dream.

Interlocutor: Where does life force come from?

Irina: Life force? From a person. Are you warm now? Heat is constantly coming out of you. For example, your brain generates 100 W of electricity every hour, electricity originates in neurons - this is your life energy, and since you are in the body and in the spiritual world, you receive it from both sides - from the spiritual world and from the body through breathing and food processing.

Interlocutor: Am I charged with this energy in my sleep?

Irina: Life force is a continuous flow, it's just that when we are conscious and awake, we constantly spend it on what we look at, on what we move, on what we breathe. But when we sleep, we do not stop breathing, but the processes slow down, digestion, breathing slow down, less energy is spent on this, so it accumulates.

Interlocutor: Does refueling happen in a dream?

Irina: It happens more in a dream, and in a dream the brain neurons relax from the perception of the day that you lived. Recharging occurs when the download of memory from the brain is unloaded into the astral body, well, that is, into the spiritual component, and this happens most of all during sleep.

13:13 Waste of life force when a person enters the Astral field.

Vlad PULSAR: Can deep meditation also help recharge?

Irina: Deep meditation – yes. I recently took a person to my Higher Self, and he immediately flew into the astral plane. If you take a person out who has not had enough sleep, then the same effect can also occur.

Interlocutor: And when a person enters the astral plane, does he also waste his life force or, on the contrary, is he charged?

Irina: If he goes out consciously, then he is wasting his life force, but if he is just sleeping, then no, he is just resting.

Interlocutor: Does it take a lot of energy to travel to the astral plane?

Irina: It varies, while you are just learning, and it's difficult for you to realize yourself, then yes - a lot, but then a person trains, and not so much goes away, this probably happens in all cases: if you don't do something If you know how to do it, then you spend a lot of effort on it.

For example, when you dig a garden and if you don't know how to do it, then you will simply make a lot of unnecessary movements and get tired quickly. And when you've been doing this for a long time, you'll do it faster, better, and actually get less tired.

Interlocutor: Irina, do you have your own tulpa? Have you already created it?

Irina: Why do I need it? In general, the tulpa feeds from the owner, like any thought form.

15:15 About the sea, the plane and flying saucers.

Interlocutor: Irina, please tell me, how do you like the sea?

Irina: Actually, great, I didn’t even think that this could happen.

Thanks everyone! First time at sea.

Interlocutor: Please tell me, you haven’t flown on an airplane yet? You've flown on flying saucers and not on airplanes. How is this possible?

Irina: First of all, I don’t need to buy a ticket for a flying saucer, and it arrived on its own. But I didn’t need to fly on an airplane, so when the need arises, we’ll fly.

Irina Podzorova answers questions from her friends in a private conversation.

#111 Life, soul and reincarnation. The trinity of the nature of the spirit: mind, heart, energy.

https://blog.cassiopeia.center/zhizn-dusha-i-reinkarnaciya

https://www.youtube.com/watch?v=w8LJOyPWLAY

00:00

Taisiya: Hello, my name is Taisiya, I am from the city of Omsk. I am an ordinary person, my work activity has nothing to do with spiritual issues, but I really like to develop, study, read, and apply everything in life. I have several questions related to the development of the soul, the Spirit.

01:25 About the American regressologist Dolores Cannon.

Taisiya: First, I would like to ask if MidgasKaus and LiSioni know about the American regressologist Dolores Cannon? Since the questions will be related to the information that I received from her books.

Irina: They heard about it from their contactees and from me. During my astral and mental travels, I managed to find out that during her lifetime she was Burkhad's contactee, and even she had physical contact.

02:09 Is the Higher Self endowed with energy?

Taisiya: When the source releases a piece of itself, that is, creates the spirit of the Higher Self, does it endow it with any energy, just as the Higher Self endows its embodied part with vital energy?

Irina: In fact, in the divine reality this separation does not occur. It occurs in the consciousness of the separated part. Parts of God's thought stream that are separated from others can begin to feel autonomous. There is no real separation from God, since it is impossible to separate from him, he is continuous. Apart from it, nothing exists in one form or another.

All the energy that God has flows in a continuous stream through all the spirits he created. We call this not creation, but birth, by analogy with origin.

Just as on Earth a child comes from parents, but unlike physical birth, spiritual birth does not imply complete separation, because in the spirit there is no concept of distance, which implies separation. These are categories of the material world.

All that energy that is in the Spirit, in the embodied Higher Self - just as it originally gave birth to it, it constantly supports it.

About the analogy with the incarnate part of the Spirit. The spirit is not fully embodied, into a material body of one type or another, or of one density or another, or into one or another part of itself.

The Spirit is embodied in the average earthling by an average of 30-33%. Most of it remains in the spiritual world.

By analogy with birth from God, the incarnate part of the Spirit receives a continuous flow of spiritual energy from the Higher Self. The Higher Self receives it from God, since these are inseparable parts, and the part of the incarnate Spirit also receives directly from God the energy for its existence. But at the same time, when the Spirit lives in the body, it also receives energy from the body, that is, two streams are obtained.

05:50 The structure of the disembodied part of the Spirit.

Taisiya: In sessions it is often said that the Higher Self, the disembodied Spirit, is not something single, but a collection of energies: healing, guardian, etc. Tell us about the structure of the disembodied part.

Irina: The structure of the disembodied part of the Spirit is no different from the structure of the incarnate Spirit. We do not divide into the Higher Self and the Lower Self, this is what they say in the language of your esotericism. We call the Higher Self - Inner Light. And the structure of the rational Spirit, which we call limis in our language, is the same for all limis.

The Intelligent Spirit consists of 3 parts - mind, essence or heart, and energy.

Each of the 3 parts contains 3 abilities: the mind is 3 abilities, energy is 3 abilities or 3 qualities, and the essence or heart is also 3 abilities.

The mind contains the faculties: thinking, imagination and memory.

In the heart there are abilities: feelings, an instinctive part that connects to the body and perceives instincts from the body, and desires.

In the energy, in the part called the energy of the Spirit, there are emotions, will and consciousness.

In the Higher Self, the abilities are not differentiated, as in the embodied part, since there the Spirit realizes itself in the spiritual world, i.e. in eternity. He is at the same time intelligence, feelings, and energy. The division into categories occurs thanks to the material body, specifically the human brain, through which the Spirit manifests itself. Thanks to this, you can describe the chakra system.

A chakra is an image of a certain part of the Spirit and certain of its

qualities, which are expressed through the projection of the physical body.

08:40 About spiritual groups united to implement joint tasks.

Taisiya: There is such a thing as a spiritual group - a group of disembodied spirits that unites to implement common tasks. How do spirits find each other, and does the composition of such a group change in the future?

Irina: Yes, indeed, some Spirits can incarnate in one place and at one time, having agreed in the spiritual world for some common task. All this happens with the permission and under the control of certain mentors; each spirit has its own mentor. And the high-vibration one has a Spirit-mentor who is even higher in the hierarchy.

When they incarnate, how do they find each other? This is facilitated by the circumstances that are shaped by their mentors. Various life events are formed through various forces of nature, through plasmoid civilizations, this can be a combination of many moves. The main thing is that when the Spirits from this spiritual group meet, they recognize each other and recognize this task. This is only possible if all the spirits from this group lived more of their inner life, and not the life of this world. They should ask themselves, their intuition, and not focus on immediate tasks.

10:50 Is it true that soul mates are incarnate parts of one Higher Self?

Irina: What you call the Higher Self, we simply call Spirit. He separates one part from himself for incarnation into one body. What you call a common Higher Self for different Spirits is what we call the feeling of the unity of all spirits in the Light. It happens quite often in regressions and meditations. We observe the same thing, but we explain this event differently.

11:48 How quickly does the Spirit, after the death of the physical body, enter another incarnation?

Taisiya: Most sources say that the Higher Self, the Spirit, carefully plans everything before the incarnation of the soul: tasks, working out karmic knots, all sorts of nuances. However, some sources, mainly karmologists, say that after the death of the physical body the soul enters another incarnation with lightning speed, and everything is planned solely by karma. How is it really? Or does it happen both ways?

Irina: Quite lightning fast - we don't know such incarnations. There are quick incarnations, but they are still agreed upon with the mentors. That is, he still says there is enough time. Because time is a category of your material world. And in the spiritual world, I would not say that there is no sense of time there at all, but this sense of time does not bring any changes, as I have already said. This is called eternity.

And therefore, while several days or several months have passed on Earth, in the spiritual world the Spirit can already meet with its mentors and look at its life.

They may or may not direct him to the next incarnation.

The average period between incarnations is about 300 years. Naturally, all this varies within very wide limits. You can wait a thousand years, you can wait a few days. This happens less often, of course. Because most often the Spirit does not need time to think, this can happen very quickly, but it simply requires a change in conditions.

He can be born on another planet or in a plasmoid world. And most often it takes time for his parents to be born on this planet. Or other Spirits who must go through some kind of lesson with him. Or that they reach a certain age.

For example, it happens that the Spirit needs one incarnate Spirit as a dad, and another incarnate Spirit as a mother. And it often happens that mom and dad are already embodied, for example, on Earth and have not yet met. And he waits until they meet, get to know each other and decide to start a family. And if for some reason they do not do this, then its implementation may be postponed, or another option may be offered. This also happens.

15:05 Chakras and their number.

Taisiya: Everywhere people talk about seven chakras. But if you dig deeper into this question, it becomes clear that these seven chakras are the main ones. But there are also others. How many chakras does a person have?

Irina: It generally depends on the interpretation of the word “chakra”. We use the classical meaning of the word “chakra” as a person’s energy center in the etheric, astral, mental and other fields of his aura, which express the qualities of the spirit and are projected through one or another place in the human body.

There are seven main chakras. But there are also so-called points of intersection of energy etheric channels with each other. Those channels through which energy and life force flow. And they intersect each other at different angles, like crossroads. If you count all the intersection points, even small ones, on the human body, there are 366 of them. They are on the head, on the front of the body, on the back, on the arms, on the legs, etc. They are found on almost the entire body. These are the points at which acupuncturists activate the human etheric body.

17:06 Ways to activate the etheric body.

The specialists who created this teaching were visionary people who saw etheric flows. And before, the needles that activated these flows could consist of metals that conduct energy well.

There is another way to activate the etheric body, but not with acupuncture needles, but, for example, with smoke. He is now showing me a cigarette - big, like a pipe filled with grass, but it is not tobacco, it is like wormwood. Hot wormwood in a tube can also activate, bringing it close to the human body at these points. Wormwood activates the etheric body. There are such specialists in your country too.

18:15 At what age is it too late for a person to change his energy?

Taisiya: At what age or in what case is it no longer useful for a person to begin any practices or actions to harmonize the work of the chakras?

Irina: You know, there is no one at such an age that it would be useless. Useless means without benefit. Mead and LiScioni had never encountered such an age or such a case.

If you sincerely want to change something, there is always a way out. Even in the most negative cases in a person's life, in his energy, if you sincerely want to change, you can always try to do it. You should never despair, think that everything is useless. With a sincere desire, you can always change your energy for the better, more highly vibrational. And a person's mentors, his guardian angel and his curators, who may be next to him, will always help with this.

19:28 Beauty from the point of view of aliens.

Taisiya: What determines how beautiful and attractive a person is born?

Irina: Each person is unique, I see them through energy when I come to the astral plane, and physically I see them on the screen when we observe contactees through chips. I see physical bodies.

What is beauty? Attractive to whom? If for a certain category of the population a certain person may be attractive and beautiful, then for another - he may not be beautiful. We do not use these categories. Every uniqueness is beautiful because it is divine.

20:33 About lactose and gluten intolerance.

Taisiya: What, in your opinion, is the reason for such a large number of people with lactose and gluten intolerance?

Irina: It's not exactly what you think. According to our research, this

intolerance occurs at a psychosomatic level. Allergic reactions can be to any substance at all - to lactose, to gluten, to proteins, to pollen, and so on, but the reason is not in these substances, but in an altered reaction of the body itself.

The reasons may be psychosomatic: according to recent studies by Esler scientists, more than 60-65% of all allergic reactions have a psychosomatic cause, at least the leading etiological cause of these diseases. Those. incorrect emotional reaction of the spirit to events happening to it. He begins to reject some part of the surrounding world and thereby sets up, through energy, through the etheric body, his physical body, his immunity, to react incorrectly to substances that are harmless to him.

Also, the causes of allergies are that the gastrointestinal tract does not work properly, especially the liver and excretory organs in general, low fluid intake, when toxins accumulate in the blood and self-poisoning of the body begins, as well as various infectious and parasitic diseases that put a strong burden on the immune system. Allergization of the body occurs due to the fact that the antigens of parasites and microbes are incompatible in their protein composition with the amino acid composition of human proteins.

22:57 In what material media can the Intelligent Spirit be embodied?

Taisiya: The higher selves of regressors say that all incarnations of the soul in the material world occur gradually from small to large: first the world of bacteria, then minerals, plants, animals, etc. But according to information from the broadcast on May 3, it follows that this is not so. How, then, does incarnation into the material world—immediately into a person—occur?

Irina: If we talk about the intelligent Spirit, then it incarnates either in a person or in another humanoid. I remind you that a humanoid is a dense material intelligent being with a nervous system capable of embodying an intelligent Spirit. Neither a bacterium, nor a virus, nor an amoeba, nor an insect, nor birds, nor mammals are capable of this. Their nervous system is not capable.

For what reason cannot the Spirit incarnate into these forms of the brain and nervous system? For the reason that you cannot pour 10 liters of water into a 3-liter vessel, it simply will not fit there. It's not that the intelligent Spirit has more energy, it's just of a different quality. If it is somehow packaged into this body, into this nervous system, the Spirit will be bound and unable to act. And then this incarnation will be in vain for him, he will only waste energy, but will not learn anything: he will not be able to make a choice or move into higher forms of life, since for this he needs to raise his vibrations. And he is not capable of this, not understanding where he is and what is happening to him.

As for seeing the Higher Self, I can say that not all Higher Selves will see exactly this. There are many regressions where the Higher Selves see incarnations only in intelligent beings. And those incarnations that you are talking about - into stones, bacteria, trees, animals, birds - these Spirits remember their incarnations in the form of plasmoids. But since it is difficult for them to perceive the plasmoid body, they remember those animals, plants or bacteria whose souls they created and supported their existence.

I would like to remind you that bacteria, plants and single-celled organisms have their own soul, only it can be a group one. In any case, it was created by plasmoid civilizations of varying degrees of density. They create souls from their thought forms, invest these energies, and help to incarnate in material carriers.

26:50 About the Spirits who came to Earth to help people.

Taisiya: Dolores Canon's book "Three Waves of Volunteers" tells about souls who came to Earth not for their own experience, but to respond to a call for help, since people were mired in karmic knots. What do you know about this?

Irina : Even if they came for help, this is already an experience for them in providing this help, which allows them to develop further in the love that they brought with them.

27:25 About the birth and decay of animal souls.

Taisiya: In Dolores Cannon's books there is information that by raising pets, we endow them with pieces of our energy, thereby helping them to separate from the group animal consciousness and subsequently become a rational spirit. Is it so?

Irina: All forms of animal souls can be very attached to a person, they can be similar to him. But in any case, they were born by plasmoid civilizations, and not directly by God, like intelligent Spirits. They can have several incarnations and even several dozen incarnations.

Animal souls are mostly group souls, although there are also solitary souls that incarnate on Earth: mammals, large birds, especially birds of prey. The energies that make up these souls through several successive incarnations or several dozen incarnations, which depends on the level of their consciousness, which a person can teach them. Any animal has the ability to learn in order to survive in this world - as if part of their instinctive mind. They also have Reason, only instinctive. Even amoebas have an instinctive mind. It's a group mind though. He is very different from the intelligent Spirit.

And after several incarnations or after several dozen incarnations, all the energies that make up this spirit, according to the Interstellar Union, begin to disintegrate and dissipate. They dissipate and pass into those subtle-material civilizations that gave them.

Mead says they have explored what this soul feels when it disintegrates into the astral plane, the special levels for animal souls where they are most often found.

She does not experience any suffering, she feels a quiet, calm happiness, from which she wants to fall asleep. This makes her fall asleep. When she falls asleep, her energy begins to be released. The soul does not experience any pain or discomfort.

30:50 The structure of the animal soul.

Taisiya: What explains the cases of quite intelligent behavior of some animals. Especially dogs, not specially trained, can save a person's

life, they call for help, pull them out of the water, and dolphins have also been seen doing this. This is not an isolated incident, but is happening all over the world. How can this be explained?

Irina : I talked about the structure of the intelligent Spirit. Now I'll tell you about the structure of the animal soul, which in our language is called eromes.

The structure of the animal soul, like the rational spirit, has a similar structure: instinctive mind, essence (or heart) and energy. Within these parts there is a strong difference from the limis.

The mind consists of instinctive memory and a special type of perception - an analogue of the thinking of the rational Spirit, but unlike it, it cannot build long-term logical chains, no matter how rational it is in its form and environment. Because of this, it is impossible to teach any animal to read or draw. For example, a monkey, even if it holds a pencil, it can redraw something based on instinctive memory. And if you remove all the drawings and ask her to depict herself and her parents, then what a 3-year-old child on Earth can do, she will not be able to do it. She has no ability to think. And animals do not have the ability to imagine in the sense in which the rational Spirit has it. They have only instinctive memory with some rudiments of thinking, which helps them act in a given environment.

But in their heart and in their energy there are almost the same desires, feelings, instinctive part.

And in energy there is consciousness, just not like a person's, aimed at perception and self-awareness. For them, it is aimed at perceiving the world around them. Self-awareness is very weak. There are also emotions and what we call will, but it is subordinate to instincts.

There are 5 basic instincts in animals, and one can dominate over the other depending on the type of animal, its gender and lifestyle.

35:11 What explains the cases of animals saving people?

As for saving people. Animal souls perceive the world around them, and they have memory. There are also emotional reactions: pity, compassion, anger - this is all characteristic of them. But, despite this, they do not have the ability to manage this logically; they are able to act instinctively. That is why they are an animal soul and not a rational Spirit. Example: if a dog saved a person, this does not mean that the same dog, if retrained in a different way, will not bite him. In any case, one instinct can dominate over the other. Let me give you an example. People have the behavior of a rational being - when a man and a woman, having met each other, can simply talk in a public place and not enter into too close a relationship. Sitting in a cafe or restaurant, they will not enter into too close relationships in front of other people.

And if in the same public place - in a cafe, in a temple, in a square there are a male and a female dog, then nothing will stop them from having a close relationship, neither the proximity of people, nor anything else. They behave naturally, naturally, instinctively. If you start explaining to your dog from the age of a puppy that this does not need to be done, he will not understand you, he does not have these categories. And the person will understand this.

I hope you now understand the difference between the animal soul and the rational Spirit.

37:50 The value of an animal's life. Does killing an animal affect a person's karma?

Taisiya: Currently, humanity no longer hunts for food and clothing. Animals are raised, fur coats, leather, etc. are made for beauty. How does the tacit consent of consumers affect their karma, given the horrors that occur in livestock enterprises? What is your view on animal agriculture and its impact on the environment of our planet?

Irina: How does tacit consent affect what?

Taisiya: Let me be more specific: the slaughter of animals and the drama that occurs during the murder.

Irina: The life of an animal on Earth does not have the same value as human life. This is the answer to the first part of the question.

The second part of the answer is that animals on the planet were created and are being created by plasmoid civilizations, which are well aware of the purpose for which they will be used by people. This fact is not hidden from plasmoids; they understand everything perfectly well.

How can killing animals affect karma? There is a more global question about the appropriateness of murder.

For the spiritual world or for a spiritual person, physical death itself is not evil, but is the other side of life.

And that intelligent Spirit who incarnates in the material world knows perfectly well that his body is temporary - he will live for a certain period and leave it when he has completed his lessons.

Also, every intelligent Spirit knows that the life of any animal is also finite. But due to their instinctive states, they cannot complete their lessons in the development of that conscious love that is accessible to the rational Spirit.

In this case, the life of animals is devoted to the birth of other animals, building a certain place of residence for them, feeding the young, further reproduction and protecting themselves - that is, certain actions that are not aimed at understanding the world around them or anything else.

That is why the life of an animal, in the sense of value, is less valuable, since it does not bear the evolutionary development that the rational Spirit carries.

There are intelligent creatures-predators, not omnivores like you - people, but simply predators, and there are also races that are included, among other things, in the Interstellar Union. You are omnivores, there are vegetarians, there are others - but these are the nutritional features of the physical body. God, when he created this

world, since he created such bodies, created them through civilization or himself, in any case, put them into the mind of civilization: to create an omnivorous hybrid - this was laid down by God. These are his Spirits, his Essences, his Angels - simply embodied.

And by creating an omnivorous creature, God knew very well that they would eat animals. Since he knew this and created bodies that are capable of this, then this is not any karma. Neither killing animals, nor eating animals, nor catching fish and birds, nor their breeding are grounds for accumulating karma.

The killing of an animal cannot be assessed in the same category as the killing of a person. Why? Because in the material world, on Earth, it is impossible to do without killing living beings, including animals. This is how the material world works. You remember very well: the same insects and microorganisms are also animals and also have souls. Just because they don't feel anything doesn't mean they don't want to live like larger animals. But as you know, human life on Earth cannot do without killing insects.

Therefore, it is considered hypocrisy for the spiritual world (vegetarians) to condemn those who eat animal meat, having the legal right to do so, and yet kill insects. Because it is impossible to get rid of this, and I can prove it to you very simply by naming the insects that you will definitely kill, although you, as it were, should not do this, because they are living beings and also want to live.

A cockroach, if it is so small - only 3-4 cm long, but this does not mean that it does not have its own inner life, albeit a group soul, this does not mean that it does not have love for its female, from whom it gives birth to cubs and which crawls around the kitchen or somewhere else. This does not mean that they do not have feelings that are available to them at their level of development. This does not mean that you should kill a cockroach for a crumb of your food that you yourself do not need, and at the same time condemn the person who kills a cow. This is already hypocrisy!

46:57 Animal husbandry - benefit or harm.

As for livestock farming. It benefits those animals that are bred in captivity. Why? Because over many centuries, selective breeding has produced breeds that are unable to live in the wild or can, with great difficulty and suffering for themselves. And even the difficulties of life on captive farms cannot be compared with the difficulties that animals endure when living in the wild.

Those who compare these categories are not familiar with wildlife. Take the life of a domestic cow and the life of a wild elk in central Russia. How does this or that animal population live?

It's already clear about domestic cows - they give birth to cubs, live in equipped rooms where it's warm, there's no snowstorm, etc. They are given warm water in winter, grain, the room is cleaned, etc. What happens in the wild? Moose live in nature without housing, ready-made food, etc. In summer, the only danger is predators, and in winter, for a male elk weighing under 200 kg, digging out frozen grass with his hooves causes more suffering than eating grain and hay in a warm barn.

As for the murder, here again everything is ambiguous. When the same roe deer and deer live in the wild and grow old, they cannot run away from predators so quickly - the former become prey to wolves, foxes, etc. - those predators that surround them. Because young, fast, playful animals run away faster. And those who, due to a lack of strength and vital energy, and whom man does not naturally treat in the wild, cannot run so quickly, they are the first to become victims of these, as they say, "nature's orderlies." You call them that, i.e. wolves.

Do you have video recordings of wolves hunting, I advise you to watch how they hunt. If you watch how a pack of wolves kills, you will realize that a person causes much less suffering to the animal when he kills it. Because he knows how to do it correctly and quickly, without tormenting or frightening. We are not talking about animal cruelty or sadism.

If we watch how a pack of wolves chases an animal, attacks and bites, it dies more slowly and painfully. Wolves cannot kill quickly. They must first knock it down, bite it in different places, and it will break out and not allow it to quickly bite through the neck. Sorry for the details, but

I'm a biologist.

I suggest you compare these two situations of murder: after living in warmth and satiety, in protection from predators, treating diseases, and this kind of death, and giving one's flesh for food to humans, and life and death in the wild.

When Jesus and Krishna were there, people were closer to nature, and there was no need to tell it. Now people live in cities and have not seen this reality. What was obvious to a small child in ancient times now needs to be explained to adults.

Therefore, animal husbandry benefits animals through easier living and easier death.

You can take geese or ducks. Old birds cannot fly far to the south - either they die in flight, suffocate and fall off, or they simply cannot fly and freeze.

A person will not let them into a warm barn, and will not give them grain and water, if he had not tamed them for obvious reasons. Because if a person does not use meat and everything from an animal, he simply will not feed and support them.

And for this reason, before claiming that killing animals and eating meat somehow affects karma, I suggest mentally putting yourself in the place of a wild animal and in the place of a domestic animal and mentally asking yourself - what would you like?

Taisiya: Cutting down vegetation for pastures, in this regard...

Irina : Cutting down vegetation for pastures is much less than cutting down for the paper on which newspapers are printed, and then you throw them away.

Taisiya: I thank you.

Irina : Did he answer questions about animals?

Taisiya: Yes.

Published 07/18/2020

Participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

MidgasCaus from the planet Esler - biologist, psychologist and specialist in alien life forms;

LiShioni from the planet Shimor is a specialist in the astral world and its interaction with the material world;

Taisiya is a guest.

Video in text

January 29, 2023

#112 Live broadcast with contactee Irina Podzorova. How to go to the astral plane? Options for the future, soul and spirit.

https://blog.cassiopeia.center/kak-vyjti-v-astral-varianty-budushchego

https://www.youtube.com/watch?v=Q2Nz2YvjJuA

Irina: reads greetings and questions from the screen and answers some.

Hello, Germany, London, Italy, Kyiv, Kazakhstan, Stavropol, Tbilisi, Anapa. I'm doing fine.

What is the topic of conversation? I want to tell you all how I spent the last two months of my life and my birthday.

For the first time in my life I was at sea, I went with Maxim, but before that we were in the Moscow region, in St. Petersburg. We were visiting Aunika, we were in St. Petersburg visiting Natalya, at a hotel. From St. Petersburg we went to Shapsug.

I really liked it, I have never traveled so much around the Earth before. Thank you! We also went to a holiday home for my birthday, and I thank you all for the congratulations and gifts.

Never before have so many people congratulated me. When I saw how many people congratulated me, I didn’t even believe that it was all for me.

I say: “Thank you!”

Maria, hello. My family is okay with my absence from home. Understands that this is my job. Good evening! Thank you!

03:54 Does Irina Podzorova have a salary and contacts with the FSB?

If a reptilian hit you in the third eye and you cannot go to the astral

plane?

I don’t think that this can somehow interfere with going to the astral plane. We all go to the astral plane in our dreams, it’s just that the trick here is... (Irina was interrupted).

No, aliens don’t pay me a salary, why? They already take me around the Galaxy for free.

No, the FSB did not take any subscription from me.

05:17 Conditions for mass contact of aliens with earthlings.

Mass contact will occur when the Earth fulfills all the conditions for mass contact.

We have a group in VK, I will briefly say: this is the absence of all wars, the death penalty for all crimes and respect for human life from the moment of conception. Thanks a lot!

LiShioni hello to you! Hello to you too, Natalie!

Hello New York!

We have now gone live because we decided to answer your questions again, and we will do a Q&A.

Yes, Victoria, I really travel more around the Galaxy than on Earth, it’s true.

06:42 Conscious and unconscious contact.

If you feel that some incomprehensible intelligent beings are contacting you in a dream or in reality, you feel the presence of some beings, or

you feel that thoughts are not being sent to you, then you are definitely a contactee. Because there are conscious contacts, and there are unconscious ones.

Conscious is when a person understands with whom he is communicating. And unconscious ones - when he takes the messages of his curators for his thoughts. To accurately understand whether you are a contactee or not, and, more importantly, with whom exactly, this is best done through your Higher Self.

07:41 Universe and creation.

What model of space? Are these multiverses? Do we have one Universe?

With us today is LiSioni, a specialist in astral interaction, and he now says that in the understanding of the Interstellar Union, the Universe is infinite as a material manifestation of the spiritual world.

All together: the spiritual world, subtle worlds and dense material worlds - this is called the Universe, translated into Russian naturally.

For them, all the multiverses that are part of the Universe will be one single Universe.

Question from the screen : Training? We are planning to start training at a school in Voronezh, which Maxim will open in October.

Maxim: We are now finishing renovations at the training center and the hostel.

08:50 Participation of aliens in the liquidation of the accident at the Chernobyl nuclear power plant.

Irina: Ilya, aliens took part in eliminating the radiation caused by the explosion at Chernobyl. These were representatives of the planet

Burkhad, who were the first to fly to the scene of the tragedy from their base in Crimea.

And they collected radiation there with their instruments, even our scientists confirm that the radiation was much less than the expected limit. One of the representatives were Burkhadians. There were also representatives of their colony from the Pleiades. There were representatives from Tashig, from Tikhta, from the planet Shimor.

I think that the Sumerians - yes, this is from their language, this refers to the planet Shimor.

Perhaps this people had many contactees on this planet.

09:54 Earthly and cosmic souls.

Maxim : How can I tell if I have a cosmic soul or an earthly one?

Irina: Yes, I understand. Two types of souls can be called a cosmic soul: it is either the soul whose last incarnation was on another planet, or it is the soul, the spirit who had the most alien incarnations and the least earthly incarnations. Judging by the first difference, the Cosmic Soul is that person who lived on another planet in a past life. Personally, I lived on Earth, but there are many people around me who lived on many planets. In general, we are all cosmic souls, from the point of view of the MS, because the Earth is actually in space. Now you are all in space.

If from Esler we look for where the Sun is, then the Eslerite will need to look into the sky, into space and look for our Sun there. Well, for you and me on Earth, it's the same in the sky. So you and I live in space, we are cosmic souls.

11:25 Chakras, energy centers, floors of the astral world on different planets.

Maxim: Someone says that cosmic souls have 9 chakras, and earthly

souls have 7.

Irina: It is that cosmic souls have 9 chakras, and earthly souls have 7?

What is chakra? This is the energy center that is located in the human aura and this is the manifestation of the spirit through the body of an earthling. This depends on the structure of the planet's noosphere and astral atmosphere. I mean the astral world, LiShioni is speaking now, so your spirit manifests itself through your body in such a way that the aura is divided into 7 fields, 7 layers, or as you say - 7 bodies, and accordingly into 7 energy centers. An energy center is a manifestation of one of the auric fields through the physical body.

On any other planet there may be a different number of floors of the astral World: 9 there, 12, 24, 36, 30, etc. And then the same number of fields, shells or bodies in the aura as you think the creature embodied there will have. Therefore, everyone who incarnates on Earth has 7 main energy centers, because you have 7 floors of the astral world.

13:00 Meridians are channels of the etheric body.

Maxim: The intersection of the meridians of energy centers can also be called a small energy center?

Irina: The intersection of the channels of the etheric body, which you called meridians, all of them smaller ones, which are located throughout the body - 366 in the human body, small chakras, as you call them, they are not a manifestation of the spirit as the main energy center, for example, like anahata - it is a manifestation of feelings or as ajna is a manifestation of his thinking.

Maxim: Does 366 have anything to do with the number of days?

Irina: 366 is not in every year, but only in one out of 4. In general, 365 days a year. How this is connected, this reflects that man lives on the Earth, which revolves around the sun, but the calendar was compiled by those people, your modern calendar, who knew, among other

things, the number of these small energy centers. This happened back in ancient Babylon.

14:45 Development of the soul in the material world.

Maxim (reads the question from the screen): How does the soul develop in the spiritual world?

Irina: If we call change development, then the soul develops only during incarnation, it can develop, change itself in some way, for example, increase the level or lower it, if this is not development, but degradation, then this can only happen during incarnation.

The Spirit itself in the spiritual world acquires the meaning of eternity. Eternity is immutability. If for you development is some kind of change, then it is possible only through incarnation in the material world. In the spiritual world, everyone analyzes his development, so to speak, and thinks about the future, makes plans, as it were, these are the main activities in eternity, there he acquires full memory of his incarnations, and he remembers them. LiSioni also says that the Spirit has all its past incarnations - it remembers them. Not everything is instantaneous, but when he remembers definitely, when he turns to memory to a certain cycle of his life of the spirit, then he remembers where he was: in this or that body or world.

16:20 Techniques for entering the astral plane.

Maxim: What is the most effective way to separate from the body in the astral plane? What exit techniques are there?

Irina: The most effective way, it can be individual for everyone. But the most effective can be through physical and psychological relaxation, through mental and physical relaxation and mental representation of yourself as when you are separated from the physical body, because in the astral plane you can only mentally control yourself, that is, your thoughts and thought forms. The physical body doesn’t work there, you can’t just go physically, there you can only start moving mentally, by ordering yourself and imagining it. That

is, the thought and faith that it will come true realizes this thought; it is faith that is the driving force of the spirit in the astral world, in general in the spiritual world.

This means that the first conditions for successful astral travel are the belief that it is possible for you, the second is the desire to go there, if you really want it, not just to be interested in what's there, to look and return. And so that you really need it for something, that is, for some purpose of yours, so that your Higher Self, your subconscious, so that it gives you the strength to achieve this way out. If you seem to be indifferent to it, then your Higher Self simply will not want to waste energy on it. The third condition is, as I already said, relaxation and the ability to separate from thoughts about the material world.

As you say it, put aside concerns about material things, about some of your thoughts, separate them for this time and simply don't think about them.

This helps a lot in this ability to not analyze, to temporarily turn off analysis. It is usually believed that the younger a person is, if he is a child or a teenager, the easier it is to learn to consciously enter the astral plane, because he does not control himself that way. If he starts having some unusual sensations, he won't pull himself together and won't go back, but will simply continue to do it.

And one more important condition when you perform any exit technique is not to expect a result, but just relax, because waiting for the result will stress you out and you will not come out. But there is an effective technique of imagining that you just mentally stand up, that you are swaying there, there are different techniques, there are dozens of them and they are all effective. Try this every day, you can alternate them, but the main thing is not to skip each day, and within a month the result will be almost 80%.

Maxim: We will separately teach at school everyone who wants to go to the astral plane, that is, this will be one of the stages of training - astral travel.

20:35 The first humanoids.

Maxim (reads out the question): Who was the first humanoid in the material world? LiSioni, do you know about this?

Irina : What an interesting question! LiScioni says that the first humanoids, namely humanoids, in the world did not incarnate in our Galaxy. And in another, and not in the Andromeda Galaxy, and not in the neighboring one at all, but in another Galaxy, very ancient, it is located at a distance of about 15 million light years from us. There were humanoids there, but they were of an anthropomorphic type, that is, they were neither reptilians nor insectoids, they were like humanoids.

21:22 The power of affirmations.

Maxim: The question is: is reading affirmations effective?

Irina: If you believe in them, then yes, it's effective. If you believe in what you say, read with feeling, with the desire that they will come true, and with the understanding that, in addition to affirmation, you need to do real actions in the material world, then it is effective.

21:45 Causes of diseases.

Maxim: Here a person has a big problem, he has written for the 20th time: trophic ulcer on the leg, the reason for its appearance, how to treat it?

Irina: Such things need to be diagnosed, because there can be many reasons: from diabetes to your own infections, simply a decrease in immunity, your own negative blocks, diabetes, injuries, the same narrowing of the artery from cholesterol plaques, from smoking, disorder nervous system from excessive alcohol consumption, neuropathy, many causes. There are many different causes and treatment will vary. And even if different people have the same cause, everyone's body is still different and the treatment will be different. Giving any general advice means nothing; you need to make an individual diagnosis.

Maxim: That is, everyone has individual reasons and we need to look through the diagnostics of our dear MidgasCaus, or through the Higher Self.

23:00 Training at the school of contactees, payment according to your heart.

Irina: When will the coronavirus go away? In fact, restrictions are already being lifted, and if restrictions are lifted, then in any case the epidemic has subsided. And let's hope that this will not happen again in our country.

Training in October will be based on the payment system according to your heart.

Maxim: We should probably tell you a little about what kind of training “pay according to your heart” is.

Irina: The training will be based on the “pay according to your heart” system, but we will accept all willing contactees for training on one condition, that this contactee will then work with other people, for example, working with other people, with the Higher Self or as a healer, or energy practitioner, then this person who will then work with people from our center, he will also have to do this with payment according to his heart or transfer 50% of this payment according to his heart to the construction of similar centers around the world, and by this he will contribute to the awakening of everyone other people. So that they come more to our idea of communicating with the Higher Self and, naturally, learning to contact their curators.

Maxim: The training program will not be selected in general, but mainly for each contactee, there will be general training regarding online training - we do not want to launch online training yet, because it is very difficult to competently give correct feedback. Therefore, for now there will only be live training.

Who will teach? Irina will teach, our interstellar friends will teach. We already have quite interesting personalities in the school of contactees

who will also conduct some classes.

All teachers at the school of contactees will necessarily agree with representatives of the Interstellar Union and with other civilizations. Because we don't want to just take and give you programs, but we really want to teach you to be contactees, to transmit information, to work with the Higher Self, to really give knowledge, and not just collect it, like to rip something off you .

Irina: We tentatively assume that the training period will be from 10 to 14 days - this is the first stage of training approximately. The training program will be finalized in mid-October.

How to sign up?

Maxim: We will then provide information on VKontakte. We will shoot a separate video with Irina. Irina will tell you what program will be at this school, there will be videos on YouTube, there will be information on VKontakte, there will be information on Facebook, there will be information on Odnoklassniki.

Irina: Yes, and non-contactees will also be able to study, as they wrote here. I will also teach astronumerology to those who wish, which was given to me by Esler's representatives; MidgasCaus taught me a system for calculating spiritual level, life tasks and some other points that can be calculated by a person's date of birth and his surname, first name, patronymic. And non-contactees can learn this, not yet contactees can learn to communicate with their Higher Self, that is, they will be contactees, for example, with themselves in the Spiritual World, with their disembodied part, and not yet contactees can learn cosmoenergetics.

Maxim: We already have a corresponding specialist who will initiate into the channels of cosmoenergy on exactly the same terms of "payment according to the heart." A specialist in cosmoenergetics, who has all the channels open, who is a master of cosmoenergetics, who can initiate into cosmoenergetics on the same conditions that the school operates, engage in initiation and further practice of cosmoenergetics.

Our center will open a school of Cosmoenergetics; by the way, cosmoenergetics is recognized by the World Health Organization as a valid method for restoring and regenerating the body.

28:40 Pyramid and domed houses.

Irina reads the question: Cube or triangle, which is better in terms of energy?

These are individual preferences, do you mean indoors in general? For example, the Tumesoutians build pyramidal houses, even their ships are in the shape of pyramids, the energy is distributed in such a way that under the top of the pyramid, a channel to the spiritual world is strengthened, one might say, all the energy is collected there: thoughts, bright feelings, such a channel is created there to the spiritual world.

Many planets, for example, representatives of Shimore and Esler, make houses under a dome, and they have rooms in the shape of a circle or oval, that is, there are no corners so that the energy is evenly distributed in space.

29:57 What is beyond the world?

Irina reads the question: What is beyond the world, God?

Beyond the material world, what do you call limits? If beyond certain frequencies of vibration, then beyond the boundaries of the dense material world there is a fine-material world higher in vibrations, even higher in vibrations beyond the fine-material world is the astral world, beyond the astral world there is a world of disembodied spirits, and beyond the world of disembodied spirits there is a world of Divine Light , that is, they transform into each other.

30:35 Diagnosis of seriously ill people.

Maxim : How can I get diagnosed with you?

The diagnostics are carried out by my curator from the planet Esler, his name is MidgasKaus, he is a biologist, psychologist, specialist in interplanetary life forms.

And now we decided, since there were a lot of people wanting diagnostics and a huge queue had formed, we all decided together that only seriously ill people who can no longer be helped by our earthly medicine undergo this diagnostics.

We all agreed together that he would do this only for seriously ill people, and if there are any, they can call my administrator Alexey and explain.

What is a seriously ill person? By what criteria is this determined? This is someone who is very sick, and for whom our medicine cannot help, who has a long-term chronic disease, such as cancer, diabetes, or unknown formations, or our medicine cannot make a diagnosis, and they treat one thing, then another , then the third, that is, MidgasCaus only accepts seriously ill people for diagnostics, because it is impossible to do all diagnostics for all people.

Therefore, I hope that you will treat all this with understanding, and it is not Irina herself who does the diagnostics, but it is MidgasCaus who does the diagnostics.

32:20 The number system in the Interstellar Union.

Irina: What calculus systems do Burkhadians use? LiScioni says that almost the entire Interstellar Union uses a number system that is based on the 27, 32 symbol system. We have a system: “0” and “1”, but theirs is different.

32:57 How to raise vibrations in children?

Maxim reads the question : How to raise vibrations in children under

7 years old?

Irina: Children of this age are in a common field with their parents, with their father and mother, and if fathers and mothers love each other together, if they send bright feelings to each other, their child and everyone around them, and also raise their vibrations, then automatically the child's vibrations rise. This can be further strengthened by the fact that mom and dad will together mentally imagine the child in any place wherever he is, imagine his image and fill him with light. Ideally, this should be done simultaneously, together. That is, both parents can raise vibrations for children under 14 years of age.

34:00 Density levels.

Maxim reads the question : If we live at the 3rd density level, what do the first and second density levels mean?

Irina: The first level of density is just solid. Who can live simply in a solid environment without liquid and gaseous ones? They usually say that these are crystals, that they have life, that they live. In any case, crystals have energy. This is precisely life force, but I would call it a different energy. She is precisely the energy of the crystal. Could plasmoid civilizations be embodied there? But the fact is that according to the classification of the Interstellar Union, plasmoid civilizations begin at density level 4. This includes both terrestrial plasmoids and space plasmoids. And the first level of density is a solid medium: Earth, soil, various solids, everything that is dense, without a liquid medium.

The second level of density - this solid enters there because it enters into each other, but we live at the 3rd level of density, we still have solid matter, that is, dense, that is, bones, muscles, etc. in our body, I mean now. But we still live at the 3rd density level, because we still have gaseous things in us.

Therefore, the second level of density, strictly speaking, is liquid.

Solids in a liquid environment - these are fish that already live, they also have gaseous substances in them, because they breathe oxygen dissolved in the water there and so on, and therefore they are also considered the third level of density. And the third level of density is when there is solid, liquid and gaseous.

The fourth level of density is when there are no longer atoms of substances, there are only energy fields.

36:35 Essences of the astral world.

Maxim reads the question: Can various kinds of entities attach themselves to the residents of Burkhad?

Irina: If they lower their vibrations, do you mean negative entities? In general, an entity can come to anyone, regardless of what planet he lives on; these entities are everywhere in the astral plane.

If an inhabitant of any planet lowers his vibrations to such an extent that he becomes compatible with this or that entity, it can come to him, of course. The difference is that Burkhadians, Eslerites, are taught from childhood that this is possible and how exactly to recognize this essence, and how to interact with it in the future so as not to fall under its influence. They teach this. They have been taught from the school curriculum what entities are, how they come in general, what they eat. There is training for this, it is simply part of the training about the astral world, there is such a subject about the astral world. They wonder why we don't have such a subject in school? Although we need it.

37:58 Space protection of the Earth.

Maxim reads the question: Has there been a stationary alien defense of the Earth since the war 12,000 years ago?

Irina: Stationary protection of the Earth exists. We also have bases on the far side of the Moon, including bases that have such recognition systems, and most importantly, there are such bases on the outskirts of the Solar System, on the satellites of the outer giant planets. And

they exist outside the solar system at a distance of 30 to 45 astronomical units from it. That is, these are ships of the Federation of Light fleet, led by Ashtar Sheran. This is very far from the limits of the Solar System, he says several hundred ships, and they have the necessary equipment to recognize what is approaching our Solar System even very far from Earth.

39:15 Reasons for changing the lifespan on Earth.

Maxim reads the question: Why did people used to live so much, but now so little?

Irina: Because our conditions on Earth have changed - this is the first thing. Because conditions on Earth have changed both energetically and physically. And the atmosphere changed, the animal world, the plant world, the climate changed, the genetics of our bodies changed accordingly, so that the genetics of our bodies began to correspond to this new nature of the Earth both energetically and physically, and this was also part of the plan of the Spiritual world for the incarnation of us as Spirits on Earth. So that we are on a planet that is developing in this way without the active intervention of the Interstellar Union, so that we live here for a certain period of time.

In the Spiritual World, they thought that living and existing on this planet for us any longer would probably not bring any spiritual benefit, that is, it is enough for us to live here for so many years.

40:30 Communication with animals on Earth.

Maxim reads the question: Is it possible to communicate with animals on our planet and only with animals can you communicate?

Irina: Animals themselves, of course, have a soul, and this soul simply has an instinctive mind, they know their names. Any animal, any bird can be taught to respond to its name. What do you understand by communication? Just so that there is mutual communication, so that she answers you, it is possible at the level of empathy, that is, when you feel the thoughts and feelings of the animal

through your aura. That is, find out what the animal wants, what it needs, etc.

As for more complex forms of communication, with the mind, this is most likely communication with plasmoid worlds that are responsible for a particular type of animal. These plasmoids can take on the forms and images of these animals in the astral plane and come into contact. This is how totemism arose on Earth, that is, there were contacts with plasmoid worlds. This is how totemism, shamanism and the foundations of the first religious cults were born.

41:57 Communication with trees on Earth.

Maxim reads the question: Is it possible to communicate with trees?

Irina: Our video was through communication with trees. Through the trees you can communicate with the spirit of the area, that is, in any case it will be Contact with a subtle being.

42:30 Crystal skulls.

Maxim reads the question: Who created the crystal skulls?

Irina: Perhaps they were like teaching models, that is, the aliens could help their earthly contactees - the priests - to teach students anatomy, for example, this is quite possible, they can create it from crystal.

Maxim: We can invite the civilization that created these crystal skulls, but it will take time and specialists in crystal skulls, and how these crystal skulls affect this space.

43:33 The need for a chip for contact with alien civilizations.

Irina reads the question : Can cosmoenergetics without chips communicate with representatives of extraterrestrial civilizations?

Those contactees, regardless of whether they are cosmoenergetics or not, who have good contact with their Higher Self, who are sensitive, who still consciously go into the astral plane, for example, can communicate mentally, can communicate with representatives of extraterrestrial civilizations without chips. Such people already exist, and in the Cassiopeia project there are already people who, without physical chips, communicate with aliens mentally and fly with us in the astral plane. Therefore, communication without chips is possible. At the contactee school we will teach just this.

44:25 Annunaki, aliens, Elohim.

Maxim reads the question: Who are the Anunnaki?

Irina: In the language of the Chaldeans in Babylon, Annunaki were called any aliens from the sky; this is a synonym for the Hebrew word “Elohim”, that is, aliens.

And in general, these could be either our creators, that is, Burkhadians, Tumesoutians, Selbetians, that is, reptilians, or any other aliens, and there were even cases when plasmoids were called that way: they also came from the sky, descended in the form of luminous pillars, balls , they were also called Anunnaki, that is, those who came from heaven.

Maxim reads the question: How do you relate to Maxim, that is, me?

Irina: Maxim is my good friend, he is my assistant in the Cassiopeia project and the one who gave you the opportunity to watch the Cassiopeia group and watch these videos and read articles, the head of the international center for spiritual development and ideological inspirer. So that you can see all these videos, all these projects, you can come to study, you can contact aliens, and learn more about the universe.

Maxim: Friend, I am Irina’s friend who helps her in this incarnation. We have known each other since previous incarnations; in this incarnation I am helping her implement the Cassiopeia project.

46:07 Head covering when visiting church.

Irina reads the question : Why do they cover their heads in church?

This is actually a matter of a certain national culture. That is, if in Greece and Byzantium of the first three centuries it was customary for women to walk with their heads covered, this was the belief that it was the woman who stood out among the men so much by covering her head, because, firstly, the very first answer, LiSioni now also says, physical.

Maxim reads the question: Is Maxim a reptilian? Maxim was once incarnated in a reptilian civilization, so don't worry, Maxim can be called a reptilian.

Irina: You are also 5% reptilian.

Maxim: Each of us is 5% reptilian. Don't worry, don't worry, everything is fine! Don’t make a fuss about reptilians, otherwise you will later become a reptilian civilization.

Irina: So, the very first answer is why women now cover their heads in church? Why was there such a custom then? The very first answer: in hot countries in ancient times, women covered their heads from the sun, because it is more difficult for them to tolerate heat and solar radiation than men, and the second answer is that women usually have long hair, and they covered it from prying eyes, because hair is, in a subtle sense, like antennas that catch radiation. So that no one can interfere with their energy.

48:40 How to see options for the future?

Maxim reads the question: Is it possible to see options for the future without going into it, for example, through a chronovisor?

Irina: Options? Well, of course, you can find out different options for the future in the Spiritual world, when you go out into the Spiritual

world, you rise in the spiritual world, that is, in the astral world to the higher Astral, and then at the place where the astral world passes into the world of disembodied spirits, there is just such a place, to put it simply, where you see, as if from the outside, a timeline, the so-called. That is, it's like you see your past, present and future options from the outside in the form of a tape. It's as if you are outside, outside of time. And there you even see that from the point where you are now, that is, where your body is, you are in the astral plane, from this point there is a kind of branching tree, so to speak. And if you act like this, then this will happen - this is the future, if you act differently, there is another branch going there. You see all this in the astral plane, but when it returns to the body, you usually succeed in remembering little because of this, because there you are in such a state of dissolution that you cannot fully concentrate on it and bring it into the material world, since there it is absolutely unimportant to remember anything, everything is already clear there. This is the specificity of travel.

50:20 Incarnations of Irina Podzorova.

Maxim reads the question: Irina, they ask you who you were in a past life?

Irina: I had 387 incarnations in the material world. On Earth they told me that I had 30% of them on Earth. I also had the last two before the present one on Earth, and my most recent incarnation was during the Great Patriotic War, that is, my spirit lived in the body of a Russian soldier who was killed in this war during a battle at a young age. That is why he did not have time to complete his task of incarnation, and therefore the reincarnation of the spirit into my body happened quite quickly. He had a violent death, he did not have time to complete his task of incarnation.

51:38 How to get out of low vibrations.

Maxim reads the question: Andrey asks how to get out of low vibrations? Before you come out of low vibrations, you need to find out exactly what gave birth to them, what low vibrations are. For a person, these are negative emotions and thoughts. We need to understand what exactly gives rise to them? Negative emotions and thoughts give rise to some attitudes, that is, concepts about the world, a worldview.

Your opinions, your worldviews are your upbringing, which your parents and teachers invested, your life experience, which gives rise to negative thoughts and emotions in you, you somehow do not accept yourself and the world around you. You need to understand what exactly you do not accept and accept it.

Rethink and realize that this has a right to exist, and then you will come out of low vibrations, you will stop reacting negatively to an event that you cannot change.

Maxim: In order to get out of low vibrations, you need to stop experiencing negative emotions, figure out where they are coming from, and transform all the negativity into constructive positivity.

This is what we will teach you to do at contactee school.

Maxim reads the question: Will it be possible to learn regressions at our school?

Irina: Firstly, I do regression only with the permission of the person's Higher Self, and at the same time I ask the person's Higher Self to show this person his most significant life.

53:36 How to get rid of the craving for pleasure?

Irina reads the question: How to get rid of craving for a woman?

The point is that you need to understand the reason for such a desire. If you are a man, and you are attracted to women not just as friends, but as a man, then you need to understand what draws you to these pleasures, because you do not recognize yourself as love, when you are in the light of God's love, you will be happy and with one woman. Those who dissolve in this light are happy, so to speak, both without women and without men, because they are self-sufficient. That is, they themselves are the center of attraction for all people.

To the light, if you light just a kerosene lamp in the dark, you will see

that all the moths flock to the light. So, if you are a light in this world, then people will be attracted to you in any case, and the main thing here is to find the source of love in yourself, the source of pleasure in yourself, and you will get rid of the craving for any pleasures, from excessive cravings, you you will simply be content with what you have.

Maxim: Before we finish, I will tell you important information. Somewhere at the end of September we will have a very interesting retreat in Loo, where we will try to test the contact training program. We will write about this information a little later, I know for sure that our accommodation there will be cheap, that is, it will be 1000 rubles. per day - this is accommodation and food per person, that is, it is all inclusive.

I'll tell you about all the other points later, so it will be possible, if anyone wants, to try out the training program regardless of the center. We will try to carry out different methods and techniques that our interstellar friends gave us for teaching specifically contacts.

In general, this will be at the end of September, see all the information in our VKontakte group.

56:39 Religion on the planet Burkhad. The purpose of contact between Burkhadians and earthlings.

Irina reads the question: What is the religion on the planet Burkhad?

If by the word "religion" we mean a system of rituals, then they do not have religion in the form known to us. In their understanding, religion is life; for them, religion is not separated from science. That is, you can say it's like esotericism, but by esotericism they don't mean some kind of superstition, which is sometimes understood on Earth as some kind of fear.

They understand the path to light through the Awakening of Light within themselves and its spread in the world around them. That is, for example, many people ask: why do representatives of Burkhad and other planets fly to Earth, why do they do it, what is their purpose, and

what do they get from it? They have the opportunity to pass on their knowledge and their light to us. For them, this is already enough for their improvement; this is their religion. Selflessly give knowledge, light, help to others.

57:55 Ego, Napoleon complex, narcissism.

Maxim reads the question: How can I help a person who consciously watches every broadcast of yours, wants to become your student, but is lost in his inflated ego? Moreover, he developed a Napoleon complex.

Guys, in fact, there is a very big problem in terms of the development of the spiritual ego of any person who begins to gain knowledge. We, on Earth, have a fairly large number of people who have a very large spiritual ego due to the fact that they are given the opportunity to receive and receive information from our interstellar friends, from subtle civilizations from the spiritual world. And how to deal with this, well, I'll be honest - it's impossible to fight this; in any case, a person will have to go through this himself and understand that the spiritual ego is just a volume that needs to be filled with love and many other correct positive, constructive feelings. And if a person fills his spiritual ego with narcissism, then he will receive such lessons accordingly.

Guys, thank you all very much, see you next broadcast, thank you!!!

Irina: Thank you!!!

Participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Center for Spiritual Development "Cassiopeia";

LiShioni from the planet Shimor is a specialist in astral interactions (in

the astral body).

January 30, 2023

#115 Live broadcast with Irina Podzorova. Contactees, Higher Self, extraterrestrial civilizations, spiritual world

https://blog.cassiopeia.center/kontaktery-vysshee-ya-vnezemnye-civilizacii-duh

https://www.youtube.com/watch?v=MU8xbTmcp0A

Topic of the broadcast: Contactees, Higher Self, extraterrestrial civilizations, spiritual world.

Maxim: We recently had a wonderful conference with Michael from the USA.

Not everything is as clear as we would like, but we continue to communicate with America, Germany, France, and Italy. We will have a video with scientists soon. Michael is a good person, he is aged, lives in America. I treat him with respect.

04:57 How long did the war with Selbet, which began 12,000 years ago, last?

Irina: In the Solar System, the war lasted several days, in Earth time about five days, in the Galaxy - almost 130 years, Earth time means. After the Selbetites were driven out of the solar system, the war still continued.

05:28 Will you conduct practices to connect with your Higher Self?

Irina: Yes, there will definitely be such practices to reveal the connection with your Higher Self, and there will also be practices to independently communicate with your Higher Self.

I will demonstrate to you how to do this yourself without a guide, and I will also show everyone how to become a guide for other people to their Higher Self.

Maxim: We will do all this at our school. Renovations will be completed there soon.

At the moment, we are also starting renovations at a hostel next to the school, where we will have people studying at the school live.

06:30 Where do the souls of drowned people go if their bodies are not found?

Irina: The soul goes into the spiritual world. The conductors meet her. It does not depend on the fate of the body whether it is found or not.

06:51 How to get to your training?

Maxim: You will be able to attend training with us in October. In mid-September we will definitely give an announcement on the conditions of study at the school.

Tuition and accommodation fees for our students will be appreciated everywhere (Donation). Once again I would like to remind you that

from September 20-27, 2020, near Sochi, somewhere in Loo, there will be a seven-day retreat with five days of training, i.e. We will study for 5 days, and go on excursions for two days. We will provide all information on the retreat later, because we are currently negotiating.

We want to minimize the costs of this event (retreat) so that people feel comfortable and not expensive to come, stay with food, and receive training.

08:29 Can contactees' supervisors change if their vibrations change?

Irina: Yes, of course, they can change. I have repeatedly seen people who have already changed supervisors several times during their lives. It happened that curators changed three or even four times.

Everything depends on the vibrations of the contactee, and the vibrations depend on his thoughts, feelings and emotions, which are stored in his spirit.

The higher the contactee's vibrations, the higher the vibration level in his aura and the higher the vibrations of his curators. Low vibrational entities, of course, can come to any people, but they will not interact with high vibrational people for a long time, they do not need it and are not interested, because both will lose a lot of energy due to the fact that their vibrations do not match .

09:45 Where is Kirchiton now?

Irina: Not long ago, Kirchiton canceled another physical contact with me because he flew off to another Galaxy, which is located in the constellation Monoceros. It is more than 500 thousand light years from our Galaxy. He flew off on an expedition that he had been waiting for a long time, in our time since April or even a little earlier.

In recent months we have been traveling, and when we returned, Kirchiton made an appointment for me at the end of July, but then he came to me in mental contact and said that he had flown to explore

another Galaxy. How long his research journey will last is unknown.

Maxim: Kirchiton was not offended. He just flew off on an expedition. We miss him too. Irina was supposed to visit the planet and describe it in contact, she could not do this.

11:10 Will there be meetings with Vlad Pulsar?

Maxim : Yes, they will. We are friends with him and keep in touch.

Irina: We communicate with him on the phone, we correspond. We are aware of each other's affairs.

11:55 How should a contactee feel about politics when injustice is perceived?

Irina: I will tell you my personal opinion, but how you feel about politics is your own business.

When I see injustice, I clearly understand that everyone’s idea of it is different, we have one Truth, but there are many truths, and everyone has their own.

The truth among the people is this: all officials and politicians must be honest and should not embezzle money, etc. I can’t say about all people, but some who come to power structures believe that they have a small salary, that they do a lot more work for this money, and therefore they take from public money. They have their own truth. Their family is closer and more important to them than strangers for whom they have to work. They think this is how they show love to their family.

I always try to put myself in the shoes of this person and imagine why he does this, I try not to judge anyone, because everyone does their best and best for their level of development, but in any case these are their lessons.

Conviction will not benefit me, nor this politician, nor the people. It will simply lower my personal vibration, but it will not do anything to change this politician, who, in my opinion, is acting unfairly. I take it calmly.

14:10 Why didn't our creators, after the war that began 12,000 years ago, return our Earth to its previous orbit? Why did it take us so long to adapt to new conditions?

Irina: First, they stopped the Moon and made it rotate at a certain distance from the Earth. Our creators did not do this because it was easier to stop it with ships than to move it to another orbit. The structure of the solar system changed, and the Moon and Venus were shifted. They would also have to be moved.

15:20 How do you know how wise a person's soul is?

Irina: From whom? For you personally or for someone else?

Maxim: Let it be with someone personally.

Irina: Only in the experience of my own communication with this person. What is wisdom, and how does it differ from intelligence? Wisdom is not just accumulated knowledge, but also the ability to manage this knowledge for the benefit of spiritual development. Wisdom is an understanding of why every person lives on Earth, that there is a spiritual world and we are spiritual beings, that there is God, and we are all his children.

This is not only knowledge from books - it is the practice of every life. If you see a person who lives like this, is sincere in his life and treats everyone without judgment, trying to stand in the place of each person and treating all people the way he wants to be treated, that is real wisdom.

16:27 When will there be mass contact with aliens?

Irina: According to the rules of the Interstellar Union, mass contact is impossible until the entire planet Earth fulfills the conditions for this contact and entry into the Interstellar Union.

The most important condition is a five-year absence of armed conflicts, that is, wars, on Earth. I'm not talking about the absence of individual criminals on Earth, I'm talking about armed conflicts approved by the government of any country on the planet.

Why is this condition needed? Mass contact will bring questions to our interstellar friends from our scientists, as well as from our governments, about the use of their technologies, weapons and movement in interstellar space.

If our consciousness is not ready to live without wars, then we will pose a danger to the entire Galaxy if we end up in the Interstellar Union.

And most importantly, we will pose a great danger to ourselves. If our politicians and military decide to attack a less developed planet than us, and there are many of them in the Galaxy - these are those planets that are also not part of the Interstellar Union and are technically lower than us, earthlings, then our friends from the Interstellar Union will be forced to intercede for this planet. Then we will suffer, and our planet will suffer.

In order not to provoke us into unnecessary aggressive actions in the Galaxy, these contacts are currently impossible until our consciousness changes.

Another very important condition, from which all subsequent ones flow, is that the consciousness of the majority of earthlings should become less materialistic, that is, turn towards the spiritual world. This is necessary so that we value the life of every sentient being!

19:01 Why is Irina's contact in Russian?

Irina: Because I live in Russia, and those specialists who make

contact with Russians must learn the language of the contactee on their planet. They must know the psychology of earthlings, culture, science, religion. They have subjects, one might say, in their institutes.

Without all this knowledge, they will not be allowed onto our planet for contacts. It is not ordinary inhabitants of other planets who contact us, but specially trained scientists.

Maxim: Aren't there those entities that are not specifically trying to contact?

Irina: I'm now talking about those who are in contact from the Interstellar Union, and if they come on astral travel, they can still come, but this will not be contact with the Interstellar Union, but as astral meetings. In the astral plane we can meet plasmoids and all other civilizations.

20:08 If you cut off a reptilian's tail, will it grow back?

Irina: No. They don't regenerate like our lizards.

20:22 Are there instruments that can be used to measure the spiritual world?

Irina: What do you mean by measurement? There are devices with which you can photograph the aura, but this is not the spiritual world. This is a reflection of the spiritual world already in the physical.

The spiritual world can only be measured with instruments that have a vibration frequency that is incompatible with being in the material world. Because the spiritual world is the source of the material world, and its vibrations can only be measured by yourself, your heart, your intuition, your spirit. This is the best device for contacting spiritual entities.

21:28 How many races live in third density?

Irina: In the Universe?

Maxim: Let's start with our Galaxy at least.

Irina: There are 727 intelligent races known in our Galaxy. In third density is called a humanoid civilization. Of these, 116 are part of the Interstellar Union. We, accordingly, are included in 727 races, but are not included in those 116, which, in turn, are included in the Interstellar Union.

Maxim: How many plasmoid and thin-material civilizations are there?

Irina: There are tens of times more of them in our Galaxy - about 15,000. Researchers are constantly discovering new plasmoid worlds on other stars, in nebulae, in quasars, in pulsars, etc.

Maxim: Therefore, there is a big problem that contactees give different information, since they can contact completely different civilizations, both thin-material and dense-material humanoid civilizations.

Every civilization has its own specific vision. It is especially very interesting among subtle-material civilizations. I say this because I've been communicating with aliens for a whole year now. Tomorrow at 17:30 or 18:00 I will be broadcasting with Michael. We will talk one-on-one with him, and I will tell him what happened this year.

23:11 How was the first humanoid created?

Irina: If you mean in our time cycle the era of the Universe in which we live, then the first humanoid was not created, but occurred through natural evolution. This happened not in our Galaxy, but far from it. The first humanoids were also anthropomorphic. In our Galaxy, the first humanoids arose naturally.

The first civilizations that occurred more than 270 million years ago no longer exist. They settled on other planets.

The descendants of these civilizations are the Ashtar civilization, which was on the planet Sirius. One of the first civilizations was Shimor, then there was Burkhad. These were the civilizations of the Vega system. Now there is a star, before it was smaller, then it became larger. This star not only exploded, it expanded, and the planets that were near Vega became uninhabitable. They made up the original Interstellar Union, and only then Esler, Daraal, Disaru and everyone else joined it.

25:16 Where do new souls come from?

Irina: God gave birth to us all in an instant, and we can say that he continues to give birth to our souls (spirits) every moment - both will be correct only because it happens outside of time.

There is no time there, so we continue to be born for God, and at the same time we have all already been born. This is very difficult to explain in human language, but when you go out into the spiritual world, you clearly feel it, because there is the word “Eternity”. What happens in the material world is felt in the spiritual world as one common point, and this point begins to sense lines already in the material world.

26:45 What is the kindest deed on Shimora?

Irina: LiShioni wants to express his personal opinion, because he believes that the opinion of the Shimorians will be divided regarding the good deed.

The kindest deed on Shimora is to open the way to this spiritual world to another being who does not know about the spiritual world. Tell, teach, not just give something material, but give spiritual knowledge so that he knows God within himself, and from this he has the right guidelines in life.

27:46 Why does everyone have one God, but Hindus have thousands?

Irina: Because in India there is a system of polytheism, when there are many gods. In fact, all nations went through this stage, but in other countries, fans of those religions where there is one God, for example, Christianity, Islam, came to power. Christianity and Islam came to those countries where there used to be many gods, and the majority of the population accepted these religions.

As for India, Christianity was also preached there, Islam was spread, but the majority of the population still remained faithful to their ancient gods.

Why did it happen? Because the patrons of the Earth in the spiritual world and those spirits who went to incarnate on Earth made a plan that there should be many religions. In one religion there is one God, in another there are many gods, and where they simply believe in the idea of enlightenment, as in Buddhism, for example. Where they believe in the sacred power of fire, seeing in it a reflection of spiritual light.

We have a diverse society, both national and religious, so that we learn tolerance, love, understanding, respect for other people's opinions, so that we get rid of xenophobia, racism, religious fanaticism, spiritual pride and all those qualities that block the divine light for us.

29:49 Forecast Abigya Ananda.

Maxim: According to the forecasts of a fourteen-year-old boy Abigya Anand from India, in December there will be a catastrophe on a planetary scale. Can you find out what awaits us at the end of this year?

Irina: I want to tell you right away that the future has many options. This contactee could see one of the options for the future, but whether it is realized or not is up to you and me.

If all of us or most of us on Earth strive for spiritual development, there will be no catastrophe. This forecast will not come true. And what is a forecast anyway? This is knowledge from the spiritual world that was

given to a specific contactee. But why was he given this knowledge? In order to warn the people of the Earth, if they continue to follow the negative path of development, then there will be no civilization on Earth, that is, our physical bodies. We will all move into the spiritual world, but this prophecy is not given to scare people, but so that we live a brighter life, so that we get rid of our fears and pay attention to the spiritual world. To the spiritual world that all religions talk about, and then this prophecy will not be fulfilled. If it is not fulfilled, it will not be a sign that the contactee was telling a lie, but a sign that he has fulfilled his task before the spiritual world, i.e. he warned people.

In any case, the aliens of the Interstellar Union are present here at their bases. If they see that there is a real danger to the existence of earthlings, they will come to our aid, and there will be forced mass contact for our salvation.

32:09 Is it possible to contact Selbet people?

Irina: It's possible, but this happens mainly in the astral world; they do not have official contactees.

Yes, their ships fly here, but they do not have their bases here and are located at the bases of other representatives of the Interstellar Union. They are on the lunar base, as well as on the base under the soil of Mars.

Representatives of Selbet visit Earth, but the pilots of their ships do not have instructions to make physical contact with earthlings. Officially this is not prohibited, but I was told that contact is not encouraged. Astral contacts do not require permission from the Interstellar Union - this is at the discretion of the individual Selbetian.

33:05 Contact or schizophrenia?

Irina: Please watch our video, which is called "Contact or Schizophrenia", it clearly shows that the conditions that our medicine calls "schizophrenia" do not have such concepts in the Interstellar Union.

In any case, this is contact with those creatures, I cannot immediately say - destructive, but perhaps the contactee is afraid of them and misunderstands the contact because of their vibrations. People around him don't accept him. He becomes inadequate and behaves in a way that is not accepted in this society. Naturally, society protects itself from such people so that they do not bring harm to it.

Scientists, media, doctors, psychiatrists, psychologists of this society are forced to somehow react to all the stories of these people, in this case, contactees. Specialists in these professions have been trained in materialistic schools and institutes; naturally, they do not recognize these contacts until they experience them themselves.

But even if they experience these contacts on themselves, then according to the rules of our science they must explain this case from a materialistic point of view.

There is only one materialistic explanation - a brain disorder that causes certain visions, states, and so on.

I want to emphasize once again that in the Interstellar Union the concept of the spiritual world is inseparable from the concepts of science about the physical world. For us everything is separate, but for them everything is one. Therefore, it is sometimes very difficult for representatives of our materialistic science and representatives of their science to communicate. It is very difficult for them to find common ground. Sometimes the same word has different meanings.

35:27 How to become a contactee?

Irina: If you feel that you have never had any contact, did not feel that an invisible interlocutor was talking to you, did not feel thoughts in the head of another being with whom you were talking, and you did not even communicate with yourself, that is, with with your Higher Self, with your intuition, then you need to increase your sensitivity to the spiritual world.

To do this, there are techniques for activating the third eye and inner

vision. I would like to recommend you excellent literature on this topic - this is a book by Lobsang Rampa, called “You are Eternal.” It was written by her contactee. This book gives 30 lessons about what an aura is, the colors of an aura, how to learn to see your etheric body, how to go to the astral plane, and what you can see there, what our world is, and what energies it consists of. This book describes everything in a very accessible and simple way. I advise you to start with it and be sure to do all the exercises.

37:11 What is clairvoyance?

Irina: This is a form of intuition and contact with your higher self.

When knowledge and information come to a person not from the outside world, not from books, not from films, not from other people, but from his own inner insight.

These insights can be in the form of visual visions of internal vision, that is, a picture of some event that has not yet happened, or, conversely, that happened a long time ago, can instantly appear on a person’s internal screen.

Most often, this process, if it is not configured, then it is not conscious and controllable. That is, a person sees something, something turns on at the most inopportune moment, and when he wants to turn it on, it doesn’t work for him. This process needs to be configured.

Most often, this is a manifestation of a message from the Higher Self. But there are also messages from our curators who are nearby - this can also be in the form of clairvoyance, that is, such instant insight.

38:22 Why are animal sacrifices necessary?

Maxim: We are against the sacrifice of animals without their consumption as food. Everything is very individual, we are for animals to live in happiness and peace, in joy, for them to run around and enjoy life.

Irina: Many religious books have been translated into Russian. I advise all fans of vegetarianism, specifically of Indian origin, to carefully read the books - the four books of the Vedas, which initially contain Vedic knowledge. Every ancient society has a description of animal sacrifice.

Why were sacrifices needed? Because those religious cults were based on the deification of plasmoid worlds. Some plasmoid worlds do not understand the need to kill animals, but there are plasmoid creatures, on the contrary, for people to sacrifice animals to them, because the energy released at the moment of the death of an animal is absorbed by their subtle-material body.

Priests, shamans, brahmans who promote this cult of animals on earth, this egregor, sacrifice these animals, and at the same time, another plus for them is the fact that the meat of the animal remains as food for the priests and their families. They do not raise these animals themselves; they are brought in by believers.

40:39 About the Hamilia civilization.

Maxim: Khamilia is a group of subtle-material civilizations. Their contactee is Irina Chikunova. We communicate with different types of civilizations, both subtle and dense material, humanoid, insectoid, reptilian, and different civilizations.

Irina: Khamilia is a group of civilizations that is in contact with many people, that is, many people are connected to these civilizations, feel their energies and work with them.

When Khamilia contactees came to me, I communicated with individual representatives of this civilization. One of them came into direct contact with me and answered questions, but my communication is different than that of Irina Chikunova. Because I contact plasmoid and other civilizations through my chips, and not through the communication channel that Irina has open.

42:00 Is it possible, having connected with your Higher Self,

through it to influence the Higher Self of another person?

Irina: I don't think that you can greatly influence the Higher Self of another person.

When you are in a state of communication with your Higher Self, you can turn to the Higher Self of another person by imagining his image. But the result of this action will depend on the purpose for which you are doing it.

Let me give you an example: you ask a person for forgiveness or forgive him for something, send him the light of love, perform positive actions with his Higher Self, then the person feels these actions, but these sensations depend on his sensitivity - on a subconscious level.

If you go to the Higher Self of another person, for example, your boss, and tell him to increase your salary, and even the Higher Self of the boss agrees with you, then this is not a fact that your desire will come true. Because the boss's Higher Self will send a signal to the embodied part of his spirit to consciousness, but he can reject this thought.

The thought will come - increase the salary of such and such a person, the boss may throw it aside and say, why would I do this? He may not listen to his intuition, to his insights. It depends on the character of the person. You will not be able to influence - this is his free choice.

43:55 Does playing sports increase vibrations?

Maxim: Yes, they do. It is very good to dump negative emotions in the gym, transforming them into constructive positive physiology.

44:27 Aliens use gold, for what?

Maxim: Nobody steals our gold, don't even worry about it.

Irina: There are a lot of planets in the Galaxy, where all the noble

metals, precious stones, deposits of all gases and much more that they need are located.

44:57 Aliens brought corn?

Irina: LiSioni says that he has no information that plants were imported from other planets.

Maxim: LiSioni doesn't know, since he is a specialist in astral travel.

45:17 What does LiShioni look like?

Irina: LiShioni says that his height is 2 meters 30 centimeters. He shows me that he is narrow in the shoulders. His skin color is blue, one might even say light blue. The eyes are dark. Not black, but sort of dark brown. They are big, have eyelashes, and are quite long. Eyelashes are dark. I don't see eyebrows; instead, the forehead is slightly lowered, and there is a white stripe above the eyes. His lips are like people's. The face is closer to round, but not quite round, slightly elongated. The arms and legs are quite long. He just showed me his hand, he has five fingers, also quite long.

46:47 Maxim, do you love Irina Podzorova?

Maxim: I have a girlfriend. I'm dating her. Irina and I are friends and knew each other from past incarnations. It was no coincidence that we met here.

47:10 About unconditional love.

Irina: Love can be expressed to a friend, to a beloved woman, to a person. Maxim loves not only me, but also all of you, as well as those spirits who were incarnated with him at the same time on the same planet. I also love you all with such love, but this is spiritual love, which is called unconditional.

47:37 About trolls.

Maxim: I try to project unconditional love, although sometimes various inadequate personalities try to deceive me. I call them trolls. Those who do nothing themselves, do not help anyone, do not create anything. They only know how to troll and make people feel negative.

Thank you very much, dear trolls, because you teach me. I used to think that I was coping with negativity, but now I clearly understand that you are teaching me, and all the negativity that you send in our direction must be transformed into constructive positivity, and every time more and more of you appear, I'm becoming calmer and calmer. Because I understand that you yourself are not doing anything, but are only trying to destroy, and we are trying to create.

Create a school and training just for you, so that you have a very high level of awareness. We even came up with such a structure together with our interstellar friends, as payment according to the heart (Donation).

You sometimes call us scammers, dear trolls, but I will tell you that scammers are those who take money from you. We leave it up to you to pay for your education and even pay for your accommodation. And in the future we will try to adhere to the same Donation system. We will only take on the team those who, like us, adhere to the view of paying according to their hearts, helping people, bringing knowledge.

Come on, dear trolls, so there are more of you, especially “Bald” is trolling here.

We are not creating a sect. We give knowledge, and the most interesting thing is that we do not set a price for this knowledge, because God and our extraterrestrial friends give us this knowledge for free. And we will bring this knowledge to you free of charge.

Thank you very much everyone. We will try to go live every Sunday and give you feedback. But the broadcasts will be themed starting next Sunday. Although we won't be able to go live next Sunday.

Irina: Why?

Maxim: We will be outside the city. Do you have a day off. We decided to throw you a small holiday. If there is internet, we will go on air.

Irina: Maxim decided to give me a surprise, but I didn't know anything. Guys, goodbye everyone. I love everyone. LiSioni sends greetings and light of his love to everyone!

Participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

LiShioni from the planet Shimor is a specialist in the astral world and its interactions with the material world.

January 31, 2023

#117 Artificial intelligence: development, nanochips, new technologies. Alien experience.

https://blog.cassiopeia.center/iskusstvennyj-intellekt-razvitie-nano-chipy

https://www.youtube.com/watch?v=5Tr--EFl264

00:01 Development of artificial intelligence among aliens.

Guest : I welcome Raom Tiyan, a specialist in energy installations. Is he considered an engineer?

Irina: He is a specialist in energy interactions in the environment. He is more of a theorist and studies various energies. They no longer have a need for engineers, because all technical devices have been assembled by artificial intelligence for several millennia.

Guest : Is artificial intelligence still being developed by aliens or have they brought it to that level of perfection that it no longer changes?

Irina: Yes, he is developing, but his development does not imply the presence of his own consciousness, that is, he still acts according to the program. But the program can be programmed into it by the same artificial intelligence.

Guest : You don't touch development or assembly at all: everything is done by robots and everything is completely automated?

Irina: You could say so. We can take part in this, but we have no need for this, because our civilization has long ago transferred the production of these processes to automatic mode, so that we ourselves, as intelligent beings, can spend our time, our incarnation and our lives for other purposes .

02:30 Silicon chips, binary number system. Materials for the manufacture of nanochips.

Guest : Here on Earth they are also trying to create artificial intelligence on silicon chips. I am a specialist in silicon chips, and I know for sure that no intelligent artificial intelligence will work on them. They have already reached their limit: their computing speed, capacity (memory) and ability to recognize images, and even more so to write complex programs so that artificial intelligence can improve itself and create programs for some kind of production - this is simply impossible on silicon chips do.

Irina: Do you mean organosilicon compounds?

Guest : No. Right now, only silicon chips exist on earth. Those. Semiconductor structures are created on a silicon substrate and a binary number system is used. And all calculations are based on this basis.

Irina: The binary number system itself does not allow for higher data transfer speeds.

Guest : Yes, absolutely correct. And this is precisely the limitation, because we have already reached the limit. And further, in order to improve the performance and speed of calculations, you need to mount chips on top of each other or in width to a plane, and this leads to either overheating or slowdown.

Irina: The fact is that to create nanochips, which will be the basis for the further implementation of automatic installations, a much better material will be a 4-valent element, such as germanium, for example, and tantalum. Minimizing mass and minimizing the device, that is, reducing it to a minimum, allows for increased transmission speed and accuracy. Because nanochips are the basis of the devices in our systems.

05:45 Transfer of knowledge through the Spiritual world. Discoveries and inventions made in dreams.

Guest : How do you acquire new knowledge? Here, for example, it very often happens that mathematicians and physicists cannot obtain new knowledge from old knowledge. It comes separately. And then the new generalization must be brought into conformity with the old theory. What exactly is your methodology of cognition? For example, if some design doesn't work, and you need to come up with something to make it work, then here on Earth it often happens that these ideas often come during sleep. Is it necessary to have a global library or something similar, where you can go and find out everything that is not clear? Do you have something similar?

Irina: Yes, indeed, I knew that the methodology of knowledge, as the knowledge of the Universe, the Universe, in its general sense, does not differ not only on Burkhad or on Earth, but on all planets in general. Why? Because, as I already said, we are actually beings of the same nature. We just have different bodies. And our filling, our minds, our energy come from the spiritual world. How does the spiritual world differ from the material world? Everything that consists of atoms is considered the material world. Everything that consists of energy is also considered the material world. They just have different densities. Everything that is not made up of different fields or different substances is considered to be the spiritual world. It is the spiritual world that gives rise to the material world. And we, as creatures: you, as people - earthlings, and we, as representatives of Burkhad, are Spirits, that is, a spiritual essence, a spiritual being, embodied in a dense material body. And, since we are all creatures of the same nature on all planets, our general study of the material world follows a certain similar path. Therefore, indeed, many discoveries and inventions are made, from the point of view of a materialist, completely by accident. Those. a person or an inhabitant of another world simply, as it were, guessed, saw it in a dream, or some thought or idea came to him. But from the point of view of the spiritual world, this is far from true and this whole process is not accidental. In any case, he receives this information from the spiritual world, from those levels where this knowledge is already available, where it exists. But the question arises: why did this particular person receive it, at this particular time, in this particular place, and why not another? Although another might have thought about this problem much earlier or for a longer period of time than the one who discovered this law. The answer is very simple. It was at this moment that the environment of this person and his entire world as a whole were ready to receive this knowledge. And therefore, this person's spiritual mentors, teachers, those whom you call in your religion angels or higher Spirits, allowed this knowledge to come to this particular embodied Spirit.

10:15 Information coming upon request from the Spiritual world, restrictions on access to it.

Guest : Isn't it possible to go somewhere to some kind of space database and get information on request? Does everything just happen by chance? Is this impossible to manage?

Irina: Of course, you can apply. But the answer that you will hear will,

in any case, be at the level of your knowledge that is acceptable at this stage of development of you as an individual and the world where you live. For example, it is no coincidence that your scientists do not come up with the idea of what experiments to do to discover the planetary engine that we use or the gravitational engine. It is absolutely no coincidence why your scientists do not come up with this idea, although it is quite simple from our point of view.

11:25 The planetary model of the atom as the reason for the lag of earthly science. Gravitons, gravitational energy, engines.

Guest : From your point of view, planetary drive, atmospheric drive and gravitational drive are simple ideas? But you said that your entire assembly is carried out by robots and artificial intelligence. Those. in fact, robots are needed in order to automate a large number of assembly operations and a large number of some complex manipulations that a person cannot perform or a representative of your civilization cannot do with his own hands. And the idea of this installation may be simple, but the whole difficulty lies precisely in creating this artificial intelligence that can do the assembly. That's why I have no illusions that we will ever be able to put this together, because we don't have the infrastructure like you do.

Irina: Yes, indeed, there is no infrastructure. But for your technology and the execution of the gravitational engine itself is difficult. The industry must be developed, for example, obtaining certain materials, etc. But the very idea of obtaining gravitational quanta from matter and experiments, according to the forecasts of the Interstellar Union, should already be carried out. But as far as I heard from the latest news of your science, gravitons remain at the level of a hypothesis. I don't know how much this situation has changed over the past year, but as I heard, gravitons, i.e. the smallest portions of energy, what you call quanta, gravitational energy in this case, remain at the level of hypothesis for now. Although in our science these are portions of third-level energy that are found in every atom of matter. And we did not have such great difficulties to prove the presence of this energy. And I believe that this happened, firstly, because we did not take the path of developing a planetary model of the atom, as you did.

Guest : It turns out that a fundamental experiment on your power plants can be done without robots, without artificial intelligence, in

some simplified form, you can even assemble it yourself, but we need understanding.

Irina: Not to assemble an engine, but to prove the presence of isolated gravitons, their ability to exceed what you call the speed of photons. For this experiment, the power you have is sufficient.

14:55 Structure of water.

Guest : How deeply do you understand the structure of water?

Irina: As you know, water consists of two main elements, which you call hydrogen and oxygen. Here I want to immediately emphasize that if you look at the planetary model of the atom, then the atoms of any element consist of a set of the same elements, i.e. already intra-atomic elements. It's just that their number in the atoms of different elements differs. This follows from your teaching. So your atomic weight or molecular weight is different. But with us everything is different. We do not call water, as you do, hydrogen oxide or anything else. We have this water molecule, which is made up of atoms that contain three levels of energy, just like any substance. Those. the same radiation, the same thermonuclear energy and the same gravity as in the rest of the atoms. You just start dividing water into ordinary water, then into the fact that more electrons have been added to hydrogen, and so on.

16:50 The theory of hydrogen atoms.

Guest : We on Earth also have not only a generally accepted planetary model, but also a number of other theories of the structure of the atom.

Irina: Now I'm talking about the generally accepted one, and this is more for people who studied in your schools. Indeed, you have many theories, but there is only one generally accepted one.

Guest : We have one very interesting theory that all atoms consist of hydrogen atoms. That is, the heavier the atom, the more hydrogen atoms it contains. This theory has some experimental confirmation.

This theory was studied by the Ukrainian researcher Bolotov. He believed that all atoms were built from hydrogen atoms, and he did not divide each atom into its component parts.

Irina: Yes, we can say that every atom of an element consists of hydrogen, we can say that hydrogen consists of every element, because it contains the same elements as all the others. We can say that hydrogen and all the others consist of a certain first element, but in different vibrations, for example, or waves. These will be variations of the same doctrine that in general all matter consists of a certain wave, but in a dense form.

18:55 System of grading elements by density and vibrations.

Guest : Are your elements and atoms that you distinguish from our atoms from the periodic table similar?

Irina: I wouldn't say that they are so sharply different, but they are not separated like yours. For example, there is oxygen, sulfur and others. In any case, we have similar systems, but they are not divided into tables or anything else.

Guest : Don't you have a clear division between the elements?

Irina: The fact is that the same element can have different numbers of sets of energy, that is, what you usually call isotopes. For example, you say that there are so many electrons in that isotope, and so many in the same isotope of the same element. We don't call these isotopes. We say that this substance (we do not call it an element) contains different amounts of energy, depending on the environment where it is located. Therefore, we do not have such a sharp division in the number of electrons or protons. We have a division, but it's different: the gradation is based on density, according to the frequency of vibration. For example, if we take the same water that is familiar to all of us, then, as you know, it can exist in different states of aggregation. And you can extract energy from it by breaking the bonds between what you call oxygen and hydrogen atoms. All these connections, in any case, are based on microgravity. And, by influencing water with one or another energy, in one or another state of aggregation, it is

possible to obtain the energy of these gravitons, i.e. microgravity, which can transform into a new type of energy that we need. This is all possible. But besides water, there are other elements that also contain various energies, from which it is even easier to obtain it than from water. Because when water is exposed to high energy (what you call heat), it begins to transform into a state of aggregation. Gaseous, for example. And in order to collect it at one point, in one container and compress it, this requires the same additional energy.

22:15 Experience in producing metal powder using plasma and water. Energoniva installation.

Guest : If you create plasma in water, it turns out that water can transmute into other elements, for example, into metals. There is such an installation called “Energoniva” *(shows photo).* This work was done by Professor Vochaev from Magnitogorsk. He created an installation and, using plasma in water, obtained metal powder and various metals.

Irina: What kind, for example?

Guest : Mainly iron, copper, nickel and others. This depended on the initial composition and on the current that passed through the plasma. We can produce plasma only using an arc or spark electric discharge. Basically, this is the only way we have.

Irina: What state of aggregation was the water in at the moment the plasma was directed at it or the plasma was created in it?

Guest : In liquid.

Irina: What state of aggregation was it in after the experiment?

Guest : In liquid form, but its quantity has decreased, that is, part of the water has actually been transmuted into other substances.

Irina: What was the source of water? Where did it come from: from

the source or from your plumbing system? If you took it from the plumbing system, then you are interested in the material of the pipes. And was the water distilled or not?

Guest : We cannot accurately reproduce this experiment, because... So far this is not working stably. But Vochaev's work indicates that water can be either distilled or with initial impurities of metal powder. But the output of the powder was much more. Here [*shows a picture of the device*] there is plasma at the input and one trigger tubular electrode at the top and bottom. A three-phase transformer was used here. This is the kind of plasma that is formed here. The system body is translucent, made of polyamide. The result was such a bright light that even the light broke through the body. If everything is arranged correctly in this system, then, in addition to the metal powder, there should also be additional electrical energy on the electrodes due to the transmutation of water. The electrodes are made of copper.

Irina: Was the copper released in the powder as a result of the plasma?

Guest : Yes, it partially stood out.

Irina: What else stood out there?

Guest : Iron was also released. We didn't have much powder because we couldn't increase the conductivity of the water. How can this process be improved? There is no efficiency since little powder comes out and there is no electrical energy at the electrodes.

Irina: Have you tried, after removing this powder and straining this water, to use it a second time?

Guest : There is a pump at the bottom of the system, and it circulates water in a circle.

Irina: I mean, after a cycle of use, i.e. Having completely removed all metal particles, pass it again, increasing the temperature of the plasma.

Guest : We haven’t tried this.

Irina: If you personally did this experiment, where did you get the source of water from?

Guest : From the tap, regular tap water.

Irina: What are the pipes made of?

Guest : I don't know.

Irina: Is the source of water in your water pipes from a reservoir or from groundwater?

Guest : After treatment facilities, but I don’t know the exact source.

Irina: Have you tried passing it through fine-pore filters like porcelain?

Guest : No, we haven’t tried it.

Irina: Before all this, did you try to heat the water to boiling temperature and boil for at least one hour to release the carbonates?

Guest : During this process, if you continuously run water in the same way as we do, then it heats up to about 90 degrees.

Irina: Yes, I understand that there is no boiling point. But for those metal particles that ferric iron may have and may contain there, it may be sufficient to fuse with each other and release powder. That's why I asked about filtration.

Guest : No, they didn’t do any filtering.

Irina: The fact is that there are different types of isolation of substances from solutions. If you see iron as a solid metal, this does not mean that its particles cannot dissolve in water. Water can dissolve a lot of elements. Only its degree of solubility is different. If you take sodium chloride, ordinary table salt, which dissolves well in water, and pass energy, electric current or plasma through it, you will get the same substances, but in decomposed form. Didn't the same thing happen to you, but with iron atoms? That's why I asked you about the composition of the powder. Have you tried to do this not with copper electrodes, but with zirconium electrodes?

Guest : I haven't tried it, but another group has tried making zirconia tips.

Irina: And with water that has been subjected to boiling temperature, it is better to use an autoclave at 120 degrees for 1 hour. Take an alloy that is half palladium and zirconium. It will more efficiently pass what you call plasma to at least separate out the carbonates. If, for example, you have isolated tin, then I would ask about the composition of the alloy. That's why I asked about the composition of the powder, electrodes and pipe material. Just because they are made of plastic polymers does not mean that if you use groundwater in your home, it cannot pass through iron ore deposits. You need to look at the composition of geological minerals in your area. Our civilization has long ago made these experiments with gas and water. It’s not so much your result that matters here, but your scientific search. In any case, any result will be the result for the science that you serve and the knowledge of the world that exists. And that’s why I’m not giving you a ready-made answer, but I’m giving you advice on how to do this experiment so as not to highlight those elements that are already in the water. To spend it in cleaner conditions. And then - this is your scientific search. I could now say whether it is possible or impossible to do this under the conditions that I said, and my answer would save your material resources or your time. But my answer will not be your own experience, but mine. Therefore, my wish, as a scientist, is for you to walk this path yourself, only observing the conditions that I have described. And so that you yourself get the results that you get from the experiment. And I am sure that you will receive those that we received if you manage to comply with all the conditions. And I won’t tell you what they are, so as not to limit your scientific research and potential with my knowledge.

Guest : All this is needed in order to finally get rid of hydrocarbon fuels on Earth, remove pollution, environmental problems and resource shortages. And to do a lot with water: metals, energy, and much more.

35:05 Converting radiation into electricity.

Irina: Yes, I already understand what you are talking about: the partial release of energies, the bonds of atoms in water molecules between hydrogen and oxygen, the separation of these atoms and the production of some other substances using...

Guest : Plasma field.

Irina: No, not just with the help of a plasma field. If you create it at a normal temperature of 7000 kelvin, then you won't be able to do it under normal conditions because water is not designed for that. As I said, there are problems there. But you want at a lower temperature, i.e. without heating the water too much, give a discharge of energy and direct it inside the atoms themselves.

Guest : Yes.

Irina: I have already said that this can be achieved, but with maximum purification of the water from impurities. I have already told you how to do this, and from which metal and material it will be most effective to release electrical energy.

Guest : So the metal of the electrodes plays a role?

Irina: Yes. Because each metal and each alloy has its own characteristics of transmitting electrical energy through other substances.

Guest : I see. Based on your ideas, in order to convert radiation into electricity or magnetism, starting electricity or starting magnetism is not required?

Irina: Our devices convert radiation itself into electricity. And they do this not due to the impulse that is given by the same electricity, but due to the fact that the parts and plates that make up the converter are made of a special alloy, of those metals and in those proportions that can effectively capture energy quanta second level and convert them into energy quanta of the first level.

Guest : Okay.

Maxim: They give you a hint that you need alloys of special metals.

Irina: And not just alloys made of special metals, but which must contain palladium and magnesium for the stability of these same electrical impulses. And you need to make sure that they rotate, so that they are curved: on one side in one direction, and on the other in the other.

36:40 The relationship between radiation and rotation.

Guest : Can you explain what the relationship is between radiation and rotation? In our country, this does not happen at all, so that radiation and rotation could somehow interact.

Irina: Radiation is a flow of energy. It diverges to the sides at a certain speed. When these plates rotate, capturing energy, then this flow of energy falls on different sides of this rotating plate, and from this it is released more efficiently.

Maxim: From different potentials of energy flows that come from radiation, the flow is captured by these plates at different distances.

Guest : I understand.

Maxim: I hope we helped you in some way, because in any case no one will give you the diagrams, no one will give you the technology. They will give you the opportunity to evolve in the form in which you are ready to understand this evolution.

Guest : I see. Great! It helped a lot. Thank you.

Participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Center for Spiritual Development "Cassiopeia";

Raom Tiyan from the planet Burhad - specialist in energy interactions in the environment;

Conference guest involved in technical and scientific experiments.

Video in text

February 2, 2023

#120 How does the human brain work? Neural networks, mind, memory, nature of thoughts, connection with the Spirit.

https://blog.cassiopeia.center/kak-ustroen-mozg-cheloveka

https://www.youtube.com/watch?v=fYYtGRFzXBE

00:36 Earth scientists studying connections between the Spirit and the brain.

Host: Do we have authors on Earth who, in books or studies, reflect in detail the structure and real principles of operation of the “spirit-brain” system?

Irina: Answered by Laum Street - a representative of the planet Burkhad, a specialist in the interaction of the spiritual, energetic and material planes of existence - a psychophysiologist. Are you interested specifically in scientific works or what is not included in your science and what is not recognized as scientific work by your scientific institutions?

Host: Preferably both. Separately, scientific ones that have undergone evidence-based research, and separately, what is not accepted by us.

Irina: I, working on this planet, working with the Burkhadians and with other civilizations, heard from my contactees and studied that you had a scientist Vladimir Bekhterev and his wife Natalya Bekhtereva, who studied the connection between the Spirit and the brain. There is also

Sergei Avdeev (psychologist, psychiatrist), who studied this issue from a spiritual point of view. These are all scientists.

As for esotericists, this issue has been considered by many esotericists, almost everyone. It's even difficult for me to choose just one. I'll probably talk more about my preferences. This question was discussed in some detail by Lobsang Rampa - your esotericist, Vladimir Sinelnikov, among others. Almost all esotericists used scientific literature to write their works, but they were not scientists.

Host: Can you give the names of studies in which this scheme of work would be described in detail?

Irina: We don't have the names of specific books; we haven't read them. But, in principle, I heard these names of scientists and the problems they were working on: an attempt to study the spiritual world from the point of view of your physiology.

03:46 Transfer of information from the spiritual level to the material level.

Host: How is information transmitted from the spiritual level to the material level?

Irina: There are two situations here. Do you mean the embodied Spirit in its own body or, as we are doing now, when we come to the contactee, we also transfer information to him, but from another Spirit.

Presenter: Incarnate.

Irina: The question exactly sounds like this: how does the information that is in the memory of the incarnate Spirit then manifest itself through its material brain? Did I understand correctly?

Host: Yes.

Irina: He says that the Spirit, incarnating into a body, contacts it with the help of life force. This life force, as a form of energy, begins to excite mini electrical signals in the neurons of the brain. When viewed from the outside, it emits electricity. This is a form of manifestation of vital force in him, energy. And when these signals begin to be transmitted from neuron to neuron, a neural network of electrical signals is built. And these electrical signals, the so-called etheric field of the brain (that's what we call it), serves as an intermediate link between the Spirit - high vibrations, between the memory of the Spirit - its expression through the body and through the brain. That is, information, for example, if it is some kind of thought, first appears in the memory of the Spirit, in his imagination, in his thinking - these are all parts not of the brain, but these are all parts of the consciousness of the Spirit. When this thought arises, it lowers its vibrations, moves to the level of neurons from one to another, and there it already manifests itself in consciousness if a person is in the body. The spirit, if it is in the body, in consciousness, in a waking state, then this is exactly the mechanism of transmission through life energy.

06:51 Spirit as a source of thoughts.

That is, I want to say here that the source of thoughts is not the brain itself, not the vital force and not the etheric body, as esotericists call it, but that same immaterial Spirit. But the immaterial Spirit, if it is embodied in a body, is capable of expressing its thoughts through material means: through the word, for example, writing something, saying something, drawing something that it came up with, remembered and what it reached by logical reasoning - he is capable only through the brain while the Spirit is in the body.

07:39 How mental information is transferred to the contactee.

So now we are transmitting thoughts: first we put them into the aura of the contactee, then into the astral and mental fields; we can say that we put our thoughts into parts of the Spirit of the contactee. Thoughts, first, pass through the consciousness and subconscious, and only then the contactee's brain gives you information. Otherwise it won't work while we are in the body. This is an inevitable filter of consciousness, a filter of the brain. We cannot use attitudes and concepts that are completely unfamiliar to the consciousness of the contactee's brain, that is, from a completely different area, because simply the thought

will not pass into the conscious part. She has nowhere to get these images, which she will translate, having received them from us in astral contact. This works when the contactee is in the physical body, that is, right now. Therefore, some esotericists claim that the brain and its work allegedly interfere with contacts with other civilizations, with the spiritual world. But it's not that it interferes; it must be configured to transmit this information in a form in which the contactee can perceive it. That is why, in this case on Earth, there is a problem of different languages for transmission to contactees. From this in ancient times there arose different religions, different philosophical movements based on them. In modern times, if you study ufology and contacteeism, you will see that many contactees seem to be talking about different things at first glance. But in fact, this is their translation of information, depending on mental attitudes and transmission through the brain, through their neural network. After all, in order for them to convey a word through language, speech, they must do it through a neural network.

09:57 Life force as a source of information transmission to a brain neuron.

Host: You can take a step back, to the neuron: through which of the energies is the transmission to the neuron itself? If it is possible to express it so technically.

Irina: We call it, if translated into Russian, vital force or vital energy. You also understand the name of the broadcast. The etheric body, that's what it's called. If you look at the levels of the atom, then this is the intermediate energy between the material world and the first region of the spiritual world, which we call the astral. And this is where your science stops, since it studies only the material world, and you are just beginning to study intermediate energies. As far as I remember, you call them torsion fields. But, in any case, these are energies that you are just beginning to study and effective devices for detection and recording, and especially measurements, do not yet exist that could show this. But you have another source - this is a person who can master the energy practices of vision, for example, the same etheric energies. You have quite a lot of such people. A person can develop his organs of perception in such a way that he will perceive not only the material world, but also the intermediate ethereal one, and can even develop vision to the extent that he can already perceive the astral and even spiritual world right here, being in the physical body,

without going beyond its limits. Therefore this energy, which we call life force, does not belong to the levels in the atom. This is an intermediate link between all the energies that are listed in the atom and the energies of the spiritual world, which you already call the astral world. Your materialistic-minded science believes that your feelings and your thoughts are the product of your brain, that is, matter. We have a different concept about this: we consider these to be separate energies of the spiritual world. And it is precisely the intermediate energies between the material and the spiritual that are the life force. Therefore, the Spirit, embodied in the body, experiencing some kind of thought, emotion, feeling through intermediate energy - life force, sends physical, material energy, sends a type of electricity, which is already the energy of the first level in atoms. This is a type of very small amount of electricity when compared to your appliances. And this electricity that arises in neurons is material energy. Because it arises from the atoms that make up neurons and their axons that connect them.

Explanations from Irina : These images, mental images are in my mind. He doesn't just convey to me a stream of thoughts or a stream of images, but both at the same time. And indeed, the decoding goes through my consciousness, through my brain, even involuntarily from me.

Host: Is it possible to somehow throw a visual image into my head?

Irina: If you have sufficient sensitivity to astral contacts, then he will come to you and try.

Maxim: In order to put an image into your head, you need to tune your head to this image.

Host : Is this possible?

Maxim: Nothing is impossible. Priests in Egypt were trained for 15 years.

Host: Then let's try to be more specific on issues that are known to

our materialistic science.

15:34 Adaptation of the Spirit to the brain through a dynamic network of neurons.

Host: Do neurons form a static network among themselves or a dynamic one?

Irina: Dynamic.

Host: Can they arbitrarily redistribute their processes and, thus, form some new (this is usually called spikes) neural complexes?

Irina: We call this the variability of matter. In any case, the brain, as a material structure, adapts to the actions of the Spirit. We call the actions of the Spirit - its mental images, i.e. his flow of thoughts and images, his feelings and desires. And the brain, in any case, adapts to this Spirit in the same way that the Spirit adapts to the brain and to the body as a whole.

Host: Until what age does this happen? Or is this an ongoing process?

Irina: The most intense period is, naturally, the period of growth and development, approximately up to seven years, while a person gains information about this world. He does this through the sense organs that are in his body, through various receptors, through his eyes, through his ears. And he receives this information in the form in which he is able to perceive. For example, he is taught a certain language, where he was born, and he already begins to figure out what certain words and concepts mean. And all these concepts are fixed in his memory. At first, he hears words with his ears, that is, they first go through the receptors of the body. This information travels along the auditory nerves to the part of the brain that processes it, and from there, through the vital force, it is sent to the memory of the Spirit itself and recorded there.

17:40 The process of memorizing and storing information in

neurons.

Host: Is there a structure inside the brain that could be compared to some kind of memory device?

Irina: Yes and no. Neurons can temporarily hold information in the form of chemical and biochemical connections; they can store certain information about one or another of their states, which arose in the brain, in the receptors of the body. This is a very individual moment until new chemical bonds are formed. And potentially, this information can be stored in even several neurons. But in any case, even if it is stored, even if it is not stored - as long as the Spirit is connected to the body, it is transmitted to the Spirit through life force.

19:15 Form of storing information in neurons.

Host: What in a neuron is the substrate for memorization: the impulse that neurons exchange, looping some micronetwork among themselves, when you need to remember something or this substance?

Irina: The impulse itself is a release of energy, which serves to transmit this signal to other neurons and to transmit this information to a level above the etheric body, that is, vital force. This also serves as an impulse.

Host: Then where does memorization take place? In what form?

Irina: In the form of emerging chemical bonds. That is, the atoms in neurons and what you call proteins are connected in a certain way. This is very similar to information that is chemically written into your DNA.

Host: Is this the same as the substance into which the genome is fixed?

Irina: This is not the same substance in which genes are fixed, but

another. But it is not a nucleotide - it is a protein.

21:03 Functional differences between neurons in the cerebral cortex, Brodmann fields. Genetic predisposition of brain structure.

Host: Is there a stable functional differentiation of neurons in the cerebral cortex, if they are familiar with such a concept as Brodmann's fields? For example, in the cerebral cortex there are zones that are responsible either for a certain perception or movement - the formation of movement. There is even a division into a zone that is responsible for general movement, for touch, and there is for more precise movements - this is located in the parietal region. There is a visual cortex, the so-called occipital region. Speech or hearing - in the temporal region. Is there a stable functional separation?

Irina: So you are asking the question: can these areas change among different people?

Host: Can they change for the same person? Can they differ from person to person and throughout a child's development? How dynamic are they?

Irina: The very structure of the brain is not accidental. In this case, in humans, as a species, it is caused by cell division according to the program embedded in DNA, and, in any case, those parts of the brain that are responsible for movement, vision, hearing, smell - more or less less constant in the structure of the brain in all people. There are some individual shifts in the phenotype, but still, it depends more on the genotype. Why? Because neurons, they only externally seem the same in different areas of the brain, but in fact their structure, their chemical, electrolyte and hormonal compositions differ in different areas of the brain. Cell division, which occurs thanks to the work of DNA, is also responsible for this. That is, such genetic information about these areas of the brain is transmitted from parents to child.

23:58 Interrelation in the work of the cerebral cortex and its subcortical structures.

Host: Do subcortical structures have such a functional division?

Irina: Subcortical structures are connected to the cortex by inextricable connections. In any case, it is a solid structure. It is not divided in our science and is not divided in such a way that some functions belong to the cortex, and others to the subcortical. That is, in any case, they are connected and work only in interaction with each other.

24:33 The decision-making process using the example of a man's perception of a woman's visual image.

Host: How is decision-making based on what is happening around us: from impulses coming from receptors that tell us about what is happening in the external environment?

Irina: What example of a solution would you like to consider? What are you interested in?

Maxim: The man wanted a woman. What is going on in his head, his subcortex and somewhere else?

Irina: In the process of desire?

Maxim: Yes.

Irina: Before its occurrence and during the process of its occurrence?

Maxim: Yes.

Irina: A normal biological question. This is really all physiologically determined.

In any case, when the man's eyes stopped at the woman through the eye receptors, information came to his brain that this was a woman, what she looked like, what she was wearing, etc. All this information is

sent for processing to the visual part of the brain. Further, in the form of electrical and electromagnetic impulses, already along the optic nerves, it enters the part of the brain that is responsible for processing visual information, and the processing process itself begins in the visual cortex. In fact, everything happens instantly: the human nervous system works quickly, especially when it is associated with vision. This information came to the part of the brain that analyzes it, and there the analysis of signals begins, that is, the collection of signals from individual retinal cells into a holistic image. And information about this image is almost immediately recorded and remains in the neurons in the form of chemical bonds. That is, having received information from the image seen, the biochemical composition of the release of hormones changes. And at the same time, through life force, information about this image is sent to the embodied Spirit. It cannot be said that it is in the spiritual world, because the Spirit, which is embodied in the body, is simultaneously both in the body and outside it in the spiritual world. Through the impulses that arise in it, and since it is already excited by the information received through the optic nerves, it emits a signal that we call an electromagnetic impulse. Through this energy, he already excites the energy of the next level - the etheric and, as it were, gives it an impetus of movement. It's like the wind making waves. That is, in any case, it gives an impetus to the etheric energy to come into motion. And this etheric energy forms an etheric impulse, which already transmits this information to the Spirit. And already in the memory of the Spirit itself, the resulting image is compared with those that it already has in memory. That is, he begins to recognize what is in front of him: a tree, a closet, or a person standing. Recognition occurs by comparison with already familiar images. And he understands that these outlines, figures are a person. Why does he call him a man? Because the concept of a person is embedded in his memory from childhood, when he was brought up.

Host: Do I understand correctly that there is no such information inside the neural network, and no comparison occurs there? First, this image is translated, that is, the neurons assembled this image, and the comparison occurs at another level, and then the reverse translation occurs?

Irina: Yes, first there is a comparison, and then he distinguishes that this is a woman, whether she is familiar to him or a stranger. And when he realizes that there is an unfamiliar woman in front of him, he begins to compare her with the memory of the Spirit. One of the functions of memory is comparison.

31:34 The emergence of desire based on an ideal image in Spiritual memory.

In the memory of any person, any Spirit, incarnate and non-incarnate, there is such a concept as an ideal image - this is the goal that he strives for, the goal that he wants to achieve in order to be happy. This desire is inherent in absolutely everyone. And this is the ideal image that is desired specifically for him. Newly received information is compared with what is already known in order for the Spirit to understand: whether he should strive to communicate with this woman or not, how interesting she is to him. There are many different nuances, but I'm talking about the most general cases. If this man's concepts include the desire to receive pleasure through the body, through sexual union with her, then he will have a comparison with the women he already knows and with his ideal, which he will build for himself for this communication. And if it corresponds in some way partially or completely, then from the memory of the Spirit this information will already enter consciousness, the conscious part. And he, if this woman meets his own ideals either partially or completely, and if he has a predetermined goal - to unite with a woman, then he will then have a desire at the level of the Spirit. It first appears on the astral plane, esoterically speaking. How the desire arises depends on the specific person: if it is a man, then he will mentally imagine the process of connecting with her, or the processes that will happen after the connection. But, in any case, some images will arise, and from these images he will want to experience it and gain this experience. When he wishes to experience this, the desire will arise in the astral body and through the vital force, which, enveloping the human brain inside and out, will descend in its vibrations, as it did with thought, and will reach that part of the brain that is responsible for the release of hormones are already produced by the organs of the body. And when this desire comes there, then in response to it the hormonal systems of the body will react in such a way that it will have physical signs of desire, understandable to all earthlings. And his further actions will depend on his choice: either to follow his desires or to refuse - this is already the choice of his mind and his will.

35:25 Storing information in the subconscious and retrieving it from Spiritual memory.

Host: Where does the cutting off of excess information received from

the visual cortex of the image take place?

Irina: Are you talking about forgetting images that are irrelevant at the moment?

Host: Cutting off completely. After all, we don't remember what the surroundings were like around the object that interested us.

Irina: This information, in any case, is saved, but it is not saved in the conscious part, that is, if a person is put into a state of deep trance and told: remember every day of your life, which was twenty years ago, then the person can remember almost everything .

Host: In what structure is this preserved?

Irina: In the same spiritual memory: in that part of it that is responsible for the unconscious part of memory. It also retains the memory of past incarnations.

Host: That is, neurons transmit information in full and do not cut off anything?

Irina: No, they don't cut off anything that the receptors have perceived.

Host: That is, from each receptor an impulse came to the visual cortex, and absolutely all impulses were transmitted to a higher level?

Irina: This is what happens to intelligent beings. Why is this happening? Because this is how the "body-brain-energy-spirit" system works. Because the neuron itself, the neural networks themselves, are simply a carrier, and they cannot know which information will be important for the Spirit and which will not.

Host: Then why is information stored inside the neuron? As I understand it, any impulse will be remembered or not?

Irina: No, not any. Those impulses that acted for a long time will be remembered. Why is it so memorable? Because this happens according to the law of nature, and any incoming information changes the chemical composition of neurons and the balancing of these neurons among themselves. And if the same information is received, then the brain temporarily remembers these chemical connections and, as it were, records them. But this is again a dynamic system. It can be rebuilt, it can adapt to the adaptive abilities of the Spirit.

Host: How does a neuron determine what to remember and what not? Only by the number of repetitions of the same type of information?

Irina: This is a very individual moment. More than one neuron remembers there. A group of neurons are involved, and they may even be located in different areas of the brain.

38:48 Speed of information transfer between neurons.

Presenter: Transmission of an impulse through a neuron occurs through depolarization of its membrane. That is, the ratio of ions inside the neuron and outside it - outside this membrane - changes. And thus, the impulse is smoothly transmitted along the process.

Irina: What you call ions is a type of atom that does not have an electron or has an extra electron, but, as I already told you, our model of an atom is different. Your entire science is based on the planetary model of the atom, including neurophysiology. We do not have a planetary model of the atom, we do not have such concepts that an electron is a particle or that electromagnetism is a single force. We have completely different energies, although they are both of the first level. And instead of the word “ion” we say that the energy of the first level changes. It is released in one neuron and absorbed by another neuron.

Presenter: At what speed is such an impulse transmitted from the body of the neuron along its process to the next neuron? Is this speed limited?

Irina: The speed is limited by the building itself. The energy itself is not limited, but if the speed is exceeded, then this energy, which moves too quickly, can destroy - denature proteins. Too much of this energy at too high a speed can disrupt the bonds between atoms in the protein molecules themselves. And this can cause damage to the neuron or its process.

Maxim: What does “too high speed” mean? What speed is too fast or too slow? Because our speeds are different.

Irina: Please go to the Earth’s coordinate system and tell me: what is the average or maximum speed for transmitting signals.

They just think in their own way and now they will try to translate. If, very roughly, then about 5 meters per second is considered an average transmission speed.

Host: So it would be possible to provide *greater* speed, but this would damage the structure of neurons?

Irina: It’s possible, up to approximately 7-8 meters per second. This will already be a high speed of impulse transmission, but not rational. First, it will take more energy from the chemical bonds in the neuron itself: what you call the process that happens in the mitochondria or the creation of ATP bonds. Secondly, an impulse that will move through the neuron and along the axons at a higher speed can disrupt the connections between atoms in the protein molecule, and then disorders can begin in the brain.

43:23 Myelination as a function of protecting neurons and strengthening conducted impulses.

Host: We have such a concept as myelination. This is the process of forming a membrane around the body of a neuron and its processes with the help of auxiliary cells. We call them neuroglia accessory membranes, which, on the one hand, provide nutrition to neurons, on the other hand, for example, oligodendrocytes provide insulation for neuron processes in order to increase the speed of transmission of

nerve impulses. Do you have confirmation of this data?

Irina: Is myelin a protein?

Host: We rather call it the shell for the processes of neurons as a whole.

Irina: Does it consist of glycoproteins?

Host: To a greater extent, it is 80% fat and 20% protein.

Irina: From lipoproteins?

Host: Yes.

Irina: These are protection functions. Naturally, both the axon sheath and the innermost part, which is located behind the sheath, have such functions. There is also an amplification function so that the signal is not lost. When the signal passes, it is necessary that it is not lost, and that the energy does not run out upon reaching the neuron. It is necessary that the energy comes in its original form, because otherwise the nervous system will work very slowly and inaccurately.

Host: In fact, this is a function of conservation of momentum?

Irina: You can say so.

Presenter: The membrane accelerates the passage of the impulse - the speed of conduction along the process?

Irina: It is designed so that it passes at a speed that is optimal for it, and it is sufficient for quick perception and quick reaction to changes in the external situation. For example, as you know, the time between the onset of pain in the nerves of the lower or upper limbs, and the time between the activation of the conditioned withdrawal reflex is

measured in milliseconds.

Presenter: 120 milliseconds, approximately.

Irina: This is sufficient speed to ensure safety in this case.

46:24 Regeneration of neurons.

Host: Can a neuron regenerate?

Irina: Yes, it can. It has this function.

Host: Does he do this himself or with the help of surrounding cells?

Irina: It depends on what caused the damage and how extensive it is.

46:42 The human body's ability to restore and replace damaged and dead neurons.

Host: If a neuron is completely lost, can it be restored by an astrocyte - one of the types of glial cells?

Irina: He died completely - is this what you call cell autolysis?

Host : Yes.

Irina: If the process of autolysis has already begun, and when the lysosomes began to dissolve the endoplasmic reticulum of the mitochondria of the nucleus, and the transition to amino acids for utilization began, then restoration is no longer possible.

Host: And astrocytes cannot replace it either?

Irina: Replace or restore the old one?

Host: Integrate in his place, but most likely he will need a new connection to build up. But we have studies that suggest that the astrocyte can become a substitute.

Irina: What do you call an astrocyte? Explain more specifically so that I can understand.

Presenter: One of the types of surrounding cells. They usually provide a trophic function - nutrition of the neuron.

Irina: What shape?

Presenter: Star shape: by name “astro” means star.

Irina: If a neuron dies, then surrounding cells take over its full function.

Host: Neurons are not restored under any conditions?

Irina: Yes, if it is not just damaged, but has already died.

Host: I see. Thank you.

#123 Synergy, matrices, cosmoenergetics, sound healing, sound healing, raising vibrations.

https://blog.cassiopeia.center/sinergiya-matricy-kosmoehnergetika-iscelenie-zvuko

https://www.youtube.com/watch?v=hCDU9_HnMUw

00:27 Introduction of the participants.

Irina: Hello, dear friends! My name is Irina Podzorova, I am a contactor with extraterrestrial civilizations. Today we have with us LiShioni from the planet Shimor - a specialist in astral interactions, MidgasKaus from the planet Esler - a biologist, psychologist, specialist in alien life forms, and today we also have with us a representative of the planet Gikhor **-** a specialist in creating external fields for restoring the energy structures of humanoid types of civilizations - his name is Silmani Grikhtari.

And my friend Sergei has several questions for them.

01:15 What is Synergy, what do aliens know about it?

Sergey: Good evening, friends. My name is Sergey Lvov, I am an energy therapist, I work with Synergy matrices. There is such a direction. It is not very widespread yet, but for those who are in the know, who work with energies, who have heard such directions as reiki, cosmoenergetics, it will be clear what we are talking about. This is a direction that came out of cosmoenergy, and, as we see it, those who work with Synergy, this is what is the next stage of cosmoenergetics. This is the direction where energies and sound connect, and all this is revealed in matrices.

Today I would like to ask our interstellar friends how they see this direction of Synergy, how it works, how these matrices open, and how sound in general - our melodies, our tracks - influence a person, how they reveal themselves in a person, and what benefits carries this teaching, these energies for man.

I would like to ask our friends a question: do they know about Synergy, about this direction that came out of cosmoenergy?

Irina: As a biologist, I study various forms of influence of physical fields, energies and energy fields on the human condition and his physical, mental and energetic health. And I am familiar with this direction; there are already several contactees and several specialists from the Interstellar Union who are working in this direction. What it is? This is a combination of several directions into one: cosmoenergetics; plus those frequencies that were not included in cosmic energy, similar to slats, originating from plasmoid civilizations; just not those civilizations that gave reiki, but others; and plus the physical impact of certain sounds - such a direction of treatment as sound therapy.

Sergey: Yes.

Irina: Thanks to this, a complex effect on a person, on his energy and on his body is achieved through special areas of the brain that are

excited or inhibited due to certain combinations of sounds.

04:10 Matrixes of Synergy - energies of the spiritual world.

Sergey: Such a question. When Irina and I worked at the session, you saw that there were particles of the Spiritual world and Archangel Raphael there...

Irina: Yes, I remember.

Sergey: In our teaching, we, in principle, position Synergy as energies, which we can conditionally call them, of the Spiritual world. What can our friends say about these energies of the Spiritual World that are present there?

Irina: At the moment these frequencies sound, if a person not only listens to them, but tunes his consciousness to them, while focusing on these sounds, in a state like meditation, then the person begins to interact with the Spiritual world, because those energy centers are activated in him, which are responsible for contact with the astral world, with the Spiritual world, for communication with the Higher Self, opens its Spiritual channel, which comes from above. And all these visions of the Spiritual world, the astral world, are due to the fact that these energies themselves are activated, thanks to contact with consciousness.

Sergey: With human consciousness.

Irina: With the consciousness of a person who does not just listen, but is involved in the process. What does “turn on” mean? This means he believes in him, wants changes in his body, that is, he is open.

Sergey: During our sessions, we recommend that people stand. There is an understanding that when a person stands, energies flow better along the axial channel, descending and ascending flows. Is the effect on a person the same when standing, sitting or lying down?

Irina: If he sits or lies down, he can become so lost in these sounds that he loses consciousness.

Sergey: He can fall asleep...

Irina: Well, yes, he will go to the astral plane and will be unconscious. The impact on the body will remain, but he will not remember this exit, he can simply go beyond this space. In any case, his body will be affected, but sound therapy is precisely aimed at consciously listening. That is, if a person does not fall asleep, then you can listen in any position - the energy will still be activated. Standing is important specifically for cosmoenergetics sessions. Because when the channels pass from top to bottom, it is better when a person stands and not lies. And when music with Synergy is turned on, it is not the channels that are turned on, but the embedded memory of sounds. They are activated automatically.

Sergey: Yes. That is, in principle, sitting or standing - there is no difference.

Irina: If he doesn't fall asleep and listens, then maybe.

07:23 The principles of the work of Synergy, like sound therapy, with a subtle plan.

Sergey: This is the question. In our understanding, Synergy works with almost the entire spectrum of diseases. It works with the subtle plane of a person, as if cleaning, washing away destructive programs and blocks from the aura. How does this actually happen, this work with destructive programs and blocks on the subtle plane?

Irina: Each matrix contains frequencies from different channels, even those that are not compatible with the classical ones in cosmoenergetics. And thanks to this, the effect is achieved that each frequency acts on a separate layer of the aura, or on a separate energy center, or on a separate etheric copy of the internal organ. How does it work? Vibration increases, clears low vibrations. But this cleansing at this point in time will have a different degree of cleansing

for everyone. It very much depends on how open a person is to this process. If he continues to think about something bad or does not trust this person, or remembers something about his low vibrational state, then this will not be cleared from him. Because all this energy will go into clearing these memories.

Sergey: I recommend that everyone at my session free their head from thoughts as much as possible, relax and go purely into the sensations in the body. That's probably right.

Irina: Therefore, it is the conscious process that is important here, as in any sound therapy, and the plus here is also enhanced by the influence of these energies.

Sergey: Tell me, what is the difference between when a person simply listens to tracks and when a person works with a conductor? When a conductor participates in a session.

Irina: If the conductor just sits and listens, then practically nothing. And if he strengthens energies with thoughts, can direct a separate phantom for treatment, can mentally imagine, then with these thought forms he increases the intensity of the process.

Sergey: Yes. Here, as in cosmoenergetics, we are discovering matrices. The explorer opens the matrices.

Irina: If he works, then it enhances the effect of these energies, because he mentally focuses on them, and not just opened them once, but, as it were, mentally holds them. We can say in a simplified way that a mini-egregor creates.

Sergey: Some kind of field...

Irina: And several people will strengthen it. How electric charges reinforce each other.

10:35 Recommended duration, frequency of Synergy sessions,

remote format.

Sergey: How do they see the number of sessions. How long is it recommended for a person to visit, how often, with what intensity?

Irina: For most earthlings, to adjust the frequencies of their internal organs to healthy frequencies, 15 sessions every three days on the fourth will be enough. These three days are needed to accommodate these changes so that the body adapts to them.

Sergey: That is, once every three days.

Irina: Yes, this is the optimal regimen: 15 sessions of at least 40 minutes each.

Sergey: Our session goes like this, 40-45 minutes. And if it's some kind of intensive course, say, at a retreat, 7 days in a row, every day, won't it be too much?

Irina: It all depends on how energetically prepared a person is. For some, one audition is too much. Maybe he won't want to continue. I just outlined an average that suits most people. In general, you need to rely on intuition. If you want to listen to this more often, you can at least all day. It won't do any harm. If you feel that this is a strain on your energy, then you should do it less often.

Sergey: Question: offline and online. When I work remotely with people, then, in principle, the quality of the sessions does not differ according to the reviews of those people with whom I work. How do they see that there is still a difference between live and remote?

Irina: Any work with energies can be carried out remotely, provided that this person, who works remotely, can mentally go there and create some phantom there or imagine a phantom of this person nearby, that is, a copy of his etheric body, which he will call up in imagination. There is even such a method of healing with any energies, when at a distance, even without video communication, you simply mentally create a copy of this person in front of you and treat him: you direct the

energies to the right place, open the necessary channels, and so on. And then you mentally send him to this person, and he actually goes to the astral plane and connects with him. You can also work with any energies. You actually create this copy, a phantom of this person from your life energy, and then it goes to him.

13:50 Do masters of Synergy need protection?

Sergey: Does the master need to install protection during sessions? People have different frequencies and vibrations, and the master may pick up some negative energies from other people during the session. How does it work?

Irina: If the master has allowed himself the thought that he needs protection, this is already fear, in any case, some kind of anxiety. If he is so unsure of himself, then before working with people, he should work on himself, increase his confidence. Nothing can touch a person with a low vibration if he himself is of a high vibration. But here you need to remember that fear, anxiety about the fact that he might attach something to himself, already reduces the vibrations. If you are confident in yourself, you don't have to bet anything.

Sergey: In space energy, protection is often installed: pyramids, cocoons, etc.

Irina: Irina was also taught by cosmoenergetics teachers how to set up a pyramid. If only she had staged it once, but she never did. No need.

15:30 Does Synergy, sound, sound healing affect DNA?

Sergey: Does energy and sound somehow affect the reprogramming of DNA?

Irina: It can turn on individual genes in sections of DNA that are turned off, this is called reprogramming. Or, conversely, turn off those genes that interfere with the further development program of the Spirit. But this does not always happen, but when this change is necessary

for the further evolutionary development of this embodied Soul. There a person comes into contact with the Higher Self and the Spiritual world, and there there is a change first in the Spiritual world, and in the Spiritual world there is a change in the person himself, in the very structure of the Spirit. And only then it is reflected in the physical body.

16:18 The impact of Synergy sessions on the human aura.

Sergey: Does the master's own aura field increase and thicken during a session?

Irina: Yes, it is happening. She's getting enough.

Sergey: It becomes more even and increases.

Irina: If he is not busy with business and also listens. The state of the aura depends on the state of a person's Spiritual structures. Let us now speak in the terminology of the Interstellar Union - the Spirit consists of mind, heart and energy. If all these components have a light, high-vibration state, then the aura will be light. What is a big aura? It's like a lot of life force has been invested into it. Density also depends on filling with vital force. It happens when a person has a lot of vitality, but his aura is weak. He spends it on the physical body. It happens. It will be large, but not dense. There are special visualization techniques, as you call them, when you mentally condense your aura along with your breathing. Or you drink water, putting into it the thought that it is charged with sunlight, and as soon as he drinks it, a solar cocoon will form around him. That is, things that include the influx of etheric field energy into the aura, that is, into the rest of the subtle bodies.

18:16 Synergy work with generic programs.

Sergey: There is also such a direction in Synergy - this is the elaboration of the gender. Some of our matrices serve and work precisely for this purpose. How does this happen? How are generic programs developed?

Irina: It's like connecting to the ancestral egregor through a spiritual channel. To the family egregor. What is an egregor? This is the totality of all energy information fields that were compiled by these people who lived in this family. The strongest influence has up to 12 generations. The rest also has an impact, but less. The energies they invested influence the formation of that person's character. From childhood, when it develops. Because he enters this family, incarnates through the Spiritual world and takes on part of the egregor's energy. This interaction of a person with his generic egregor is one of the life tasks that he must go through. Therefore, everyone is born into a certain family. The matrix helps to increase awareness of these programs, greater positive emotions and thoughts when working through them.

19:45 What is raising human vibrations?

Sergey: Nowadays there is such a fashionable topic among esotericists about the need to raise vibrations. Do matrices help raise human vibrations, and to what level can they be raised, in principle?

Irina: I'll now explain what raising vibrations is, what vibrations are in general. In Russian, the word "vibrations" means vibrations. Naturally, if we consider the spiritual structure as immaterial, then nothing there can fluctuate like material. Therefore, we used the word "vibrations" or "oscillations" by analogy to describe the material world. Why did they use it that way? Because in the material world, every object, object, energy field has its own vibration frequency. The higher they are, the more usually the matter is discharged. Also, by analogy, the spiritual qualities and properties of the Spiritual Essence, as they called "nature" or in Greek "physis", the closer they are to the divine, the higher they are in their qualities. And since those esotericists who received information from their curators, plasmoid, humanoid, and so on, most often in the language of science, because in the language of religion it is called "nature," and in the language of science it will be called spiritual vibrations. The closer to divine energies, the higher the vibrations.

Sergey: How many vibrations does the average person have? How are they measured? In Hertz?

Irina: In Hertz, terahertz, only material things are measured, either

densely material or finely material. In the spiritual world we can say that vibrations are measured in millions or billions of Hertz, but in any case these will not be the same vibrations that we see in an electromagnetic wave, or in light, or in a radio wave. This will already be a greater or lesser degree of awareness in the light. Let's put it this way - what we call "light" again has nothing to do with the physical light that you see with your eyes. This has to do with spiritual light. Why do we call it “light”? Because in the Russian language we cannot come up with other words so that everyone can understand it. In the languages of the Interstellar Union there are different words for physical light and spiritual light, this is already clearly explained there, and for the word “vibrations” there are also differences when it is the material world and when it is the immaterial world. For you, this is indicated by one thing.

23:20 How to record changes in human energy?

Sergey: How can we measure a person’s energy in general, and by what criteria can we determine the state of changes in his energy? Let’s say he was in one state before the session, went through 15 sessions, and became in a different state. But this is a subjective assessment. Are there any instruments that can measure these changes or do they not exist yet?

Irina: There are, as you call them, aura chambers. But they already record changes in the energy of the etheric, that is, the subtle material. Around a person, certain waves, as you say, vibrations of a certain frequency, can be captured by these devices and produce certain photographs and even videos. There are such. Where there will be not the whole aura, but only part of it. And the rest of the part that cannot be captured by the device, it still affects the part that is captured. That is, this intangible part, where our feelings, thoughts, etc., they influence that ethereal part that can be photographed. With certain colors, symmetry, density, sizes, etc. In general, all this can be seen through your own astral vision. It’s difficult to do this through the physical body, because you have to simultaneously look, while in the physical, at both the physical and the astral world, and it’s quite difficult to combine them. It’s possible, of course, but it usually doesn’t work for any long period of time. Or it turns out with a disorder, for example, of mental activity. It can be done simpler: leave the physical body, and in the astral it will already be visible what change has occurred. For example, how the aura changed, what happened to the blocks...

Sergey: Does the frequency of brain activity have anything to do with this?

Irina: This is already a reflection of the influence of the Spirit on the body. The spirit manifests itself in the physical world through the body, and in the body through the brain, through the central nervous system, the important, central organ of which is the brain. This is a special organ that consists of cells that can perceive spiritual vibrations and convert them into physical ones.

26:06 What happens to the pineal gland during Synergy sessions?

Sergey: During our sessions, the so-called filling of the epiphysis, that is, the pineal gland, occurs until the internal expansion of the head. What is happening at this moment?

Irina: In the pineal gland there is a center for the production of certain hormones, which also affect feelings of pleasure, enjoyment, etc. Everything that happens on the physical level is a reflection of spiritual processes. These hormones, when produced in the body, can actually affect the functions of internal organs. They can either treat them or upset them, depending on the types of hormones and their amounts, and the degree or frequency of exposure. Therefore, the fact that you see how certain structures of the body change on the physical level is because the Spirit influences them in this way at the moment of listening. But you can see, for example, that the opposite process occurs at the moment of negative stress, when, for example, the adrenal glands, which secrete cortisol, also increase, expand, and this can also be seen in microequipment, because they are active at that moment. This is a reflection of the influence of the Spirit.

Sergey: During sessions, it often happens that people experience a strong state of heat, as if internal heating. They get hot. What's happening? Why is this happening?

Irina: This is an influx of energy, which can come from two sources, even from three: either from these frequency channels they begin to fill the aura, or from the Spiritual world, that is, a curator came and began

to exchange energy, or his own blocks begin to disintegrate and dissolve , and that released energy begins to disperse throughout the etheric body, and the temperature rises. That is, the vibrations of the physical body also increase. This is reflected in the subjective feeling of rising temperature.

Sergey: There are also such processes that the body begins to twist: it twists in different directions, the bones crack, the arms are broken, the neck twists... What is this?

Irina: This means that there were blocks, stagnation of energy. The flow of energy cannot pass, and the physical body begins to move on its own to allow this energy to pass through. Instinctively so.

Sergey: And yawning? Yawning also happens very often during sessions.

Irina: Yawning is also an emerging block. When in the fifth energy center there are unspoken thoughts and feelings that have formed a block and they begin to come out through these muscle movements.

Sergey: Can we say that during these sessions there is a connection with the Higher Spirit, the Higher Self through the expansion of the pineal gland and the pineal gland canal.

Irina: I would say that here everything is the opposite: connection with the Higher Self and contact with the Higher World gives such an effect in the body.

Sergey: That is, activation occurs from above and the body too.

Irina: It is not the body that activates a certain spiritual experience, but the spiritual experience that initiates changes in the body.

29:56 What is needed for the Synergy method to be recognized by official medicine?

Sergey: Will this medicine ever be widespread, officially confirmed, or will it all be in the field of esotericism?

Irina: To do this, it is necessary for independent scientists to conduct a series of tests with those who listen to this music with matrices, and those who listen to similar music not charged with matrices. And so that this is not just a series of tests, but so that it is confirmed by analyzes and physical indicators before and after, so that it is carried out by different researchers, and, preferably, in different parts of the world. And so that everyone can check it. Only then can acceptance by the general public and wider adoption in physical therapy offices be possible.

31:00 Confrontation between esotericism and Orthodoxy.

Sergey: One more question: in the Christian egregor there is such a direction - hesychasm, Gregory Palamas, who spoke about the connection of man with God through energies, knowledge of God through energies, and he spoke about the term Synergy, and can our Orthodox Church even accept work with energies, or is it considered heresy and they will never accept it?

Irina: Indeed, Gregory Palamas was a mystic, a contactee with the Spiritual world, he connected with his Higher Self, went out into the Light, he said that God manifests itself in his energies, that any name for God is his energy, and even the word “God” itself reflects his energy. The development of this idea gave rise to such a movement in Russian Orthodoxy as imiaslavie. The fact is that the word “energy” itself is quite Orthodox. Those who say that the word “energy” is not Orthodox do not know their own traditions. You need to understand that the reasons for the confrontation between Orthodoxy and esotericism are not the word “energy” after all. This confrontation arose a long time ago, since the time of the first sermon of the Apostles and the reaction of the pagan community to this sermon. The whole complex of reasons for today's relations between the Orthodox and the esotericists and the esotericists towards the Orthodox are already mutual such feelings, but MidgasKaus says that I personally hope that we will be able to harmonize this confrontation in such a way that both sides will understand that they are talking about the same thing , but in different languages. This is clear to me. When I read religious texts through a contactee, in any case, I can retell it to esotericists so that

they understand that we are talking about esotericism. Just like any esoteric text, I can translate it into the language of a religious person so that he understands that it is talking about God, and not about some incomprehensible being who incomprehensibly manifests himself in space. I can do this because I studied it. I studied earthly esoteric currents, religious ones, and the teachings of the Interstellar Union about the Spiritual world. I know how the same concept can be expressed in different languages and in different teachings, and what teachings it can itself create. That is, how information supplied from various kinds of curators is refracted through the consciousness of contactees. I know this well. The fact is that a person does not need to know this. To understand this and see the One Light, you only need to be a widely educated person, know the basic arguments and teachings, and esotericism, and Orthodoxy. And you need to have, most importantly, your own experience of immersing yourself in your Higher Self, connecting with the Inner Light, and then you will be able to see this Light in any work, in any book, no matter who published it. Because you can read about it in a book, but it's more important to experience it yourself. The Apostle Paul also wrote that the letter kills, but the Spirit gives life, that in esoteric language one can say how material things kill one who has not known his highest vibration, his Spirit.

Sergey: So, and yet, is the Orthodox Church ready to accept the topic of energies or not yet?

Irina: For now, she is ready to accept even less than the scientific community. There is still a lot of confrontation on the ground. It takes a long time to change something. It is necessary to increase the education of a person, anyone: be it Orthodox or an esotericist, in these areas. Therefore, just as Orthodox Christians do not understand esotericism, they often label them as worshipers of dark forces, and esotericists, without understanding Orthodoxy, label them as narrow-minded dark people who worship God as their Master and do not feel Love from Him. This ignorance must be eliminated on both sides, and only then in this elimination and mutual love can there be a step towards reconciling these positions.

Sergey: Can we say that in the Interstellar Union the topic of energies and energy healing or sound healing is widespread, and they use it widely?

Irina: I would not say that it is very common here, we have different types of treatment: treatment with different colors, with energies using different devices, there is simply immersion in your Higher Self and the dissolution of certain blocks there, not in the chakras, but as in ethereal copies of organs. There is viewing on special devices that show the structure of cells, etc. That is, there are different levels. And sound therapy is also used. She is like one of the many parts of the mosaic that makes up the attitude of any member of the Interstellar Union to their health.

Sergey: Thank you! A wide range of issues were covered. Thank you for the information. We will bring energy to people.

Irina: Thank you, dear viewers, see you again!

#124 Psychosomatics of diseases: subconscious, immunity, spirituality, positive thinking. How does the virus work?

https://blog.cassiopeia.center/psihosomatika-boleznej-podsoznanie-immunitet

https://www.youtube.com/watch?v=yODzZUzpSq4

00:25 Welcome to participants

Irina: Hello, dear TV viewers. My name is Irina Podzorova, and I am a contactee with extraterrestrial civilizations. Today, next to me is my curator from the planet Esler - MidgasCaus: biologist, psychologist, specialist in alien life forms. And Maria wants to ask him several questions that are very important for all of us. Introduce yourself.

Maria: Hello! My name is Maria, I am a clinical psychologist and I practice psychosomatics according to the method of new German medicine, which was discovered by Dr. Rijk Hamer.

01:17 Is MidgasCaus familiar with the theory of Ryke Hamer?

Maria: I would like to ask you, first of all, if you are familiar with this theory? And can I use the terminology within this theory?

Irina: He says: “I studied the psychological theories of earthlings in the most general terms. If you just say the essence of this theory in a few words, I will understand what you are talking about.”

Maria: Maybe then I'll explain a little along the way?

Irina: Okay.

01:49 The connection between the brain and the psyche of the body during stress. Hamer's hearth.

Maria: My first question is this. Within the framework of this theory. Dr. Ryke Hamer discovered that the connection between the psyche, brain and body is visible at the moment when some stressful event occurs in a person's life, and it must be perceived dramatically, isolated, suddenly. All these factors must coincide in order for us to see the so-called Hamer focus in the brain. This is a structure that is visible on CT (computed tomography) in the form of concentric circles. How is this explained? What it is? This is a zone of sympathetic-tonic excitation, responsible for controlling the tissue of the corresponding organ of this zone of the brain. That is, in this way, we can trace this connection between the psyche, the brain and some specific organ. This is such an unexplored topic in our country. I would like to know what you know about this? About these structures and foci of Hamer? What is the pattern of their appearance and disappearance? What is this anyway, do you know?

Irina: Mead says: "We also call it in neurophysiology – it is a focus of excitation in the human brain. This is a group of excited neurons that contain more electrical signals, including those transmitters, substances that help maintain this excitation."

Why is this happening? Because an emotional reaction to some event generally arises in the Spirit, and it manifests itself through the body. That is, the Spirit, you need to understand, is not a material substance. But in the physical world - the dense material world, I mean - this immaterial substance can only manifest itself through the physical body. Through a special organ called the central nervous system (CNS). And the largest part of the central nervous system is the brain, it is the most important. And this brain consists of billions of neurons interconnected by a certain network, unique for each person, for each individual. And what you call Hamer's lesion is the brain's reaction to emotions. Emotions themselves are the energetic part of the Spirit.

05:25 Is the incurable disease glioblastoma a consequence of recovery from a Chimera lesion?

Maria: Then the next question right away. Such a condition, such an incurable disease as glioblastoma, is this a consequence of recovery from a Hamer lesion? Or are these unrelated things?

Irina: Is blastoma a cancer?

Maria: Yes. This is tissue overgrowth.

Irina: Mead says that negative emotions can trigger the growth of cancerous tumors in any part of the body. Negative, negative emotions lower the vibrations of a person and the organs of his body. Each organ of the body has its own vibration frequency, the combined frequency of each cell. And if these negative emotions, negative energy manifest themselves through the brain, then it can cause pathology in brain cells when they begin to incorrectly perceive information about their DNA and begin to divide incorrectly. Because vibrations from negative emotions decrease. This can happen not only in the brain, but also in any part of the body where there is a weak spot. It can be weakened there by viral diseases and inflammatory processes, which, by the way, often go unnoticed during the flu. That is, these viruses penetrate the blood-brain barrier through the blood and cause a condition such as indolent meningitis. It goes unnoticed because the immune system copes. But there the place is already weakened. It happens that this condition is caused by bacterial, viral infections, injuries or exposure to drugs, alcohol, nicotine, medications, hypoxia, etc. That is, there are many factors if there is some additional damaging factor in the brain. And if a person experiences negative emotions for a long time and accumulates them in himself, does not express and does not develop positive emotions, then he will not have a weakened brain, but some other organ. There are energy centers in the human body that you call chakras. This negative energy will go to a weakened place and accumulate in this chakra, in this energy center. Then cancer will begin to develop. Mead says: “Hamer did not take into account the movement of energy in the etheric body, how it flows, how blocks are created, so he considers everything through the brain. I'll explain now. According to Esler, the doctrine of the brain, the nervous system is inseparable from the doctrine of energy. That’s how it is with us.” At first, Mead was even surprised.

08:44 Biological program of organ functioning after stress. Are there metastases?

Maria: A special biological program begins to work in the organ. It is needed in order to adapt the body after stress to changed environmental conditions. Why then does this program work until this tumor grows to such a size that it begins to threaten life, and a person can die from this? There are contradictions in this theory. And another related question: do metastases even exist? Or is it, as this theory explains, different biological programs for different organs?

Irina: Mead says it can be different. Metastases - this can be either a secondary cancer or many primary foci. Cancer cells can generally spread through the blood. Moreover, every person has them. But they are kept under control by the immune system - this is the body's main defense system, which is directly related to its spiritual state. And the fact that there are contradictions in this theory of his is not surprising. Because this scientist does not take into account the movement of energy in the etheric field, does not take into account the emotions that created these blocks, in which energy centers they are located. His brain is simply the center of personality, the center of consciousness. Therefore, he views everything through him. But the brain is not the center of personality, it is a means of manifestation of personality in the material world.

Around the body and in the body itself, in addition to the brain, there are energies that create fields: etheric, astral, mental, etc. It is useless to look for them in the material world; they are in the spiritual world. You are now sitting partially in the material world. This material world is itself "embedded" in the Spiritual world.

Maria: Okay. Thank you!

11:12 Bacteria and viruses are not considered as the cause of the disease. Is it true?

Maria: Within this theory, bacteria and viruses are not considered as the cause of diseases. They simply promote tissue destruction or,

conversely, restoration. That is, this is the only way to limit their functionality in the body.

Irina: I see. So you want to know his opinion about this?

Maria: Yes. Is it true?

Irina: Yes, undoubtedly, this contains a large share of the true knowledge that we also have about microbes, about microorganisms. I want to emphasize that any infectious process that occurs in any macroorganism is always more or less a relationship between the parasite and the host. That is, partly it is a symbiosis. Because any virus, microbe, protozoa or fungus - its evolutionary development is not interested in the death of the host organism. Because then it will no longer be able to reproduce and will not spread with the help of this person to other people. Therefore, if a microbe or microorganism causes too severe a disease that the carrier dies, then such a virulent microbe will die along with it. The strain of the microorganism will die along with it and will no longer spread. Moreover, any microorganism is still affected by immunity. Even a weakened immune system still seems to weaken the microorganism. Therefore, the chain of infections of people from each other transmits increasingly weakened microbes. Indeed, the outcome of any infection depends on immunity, because even if two people get sick with the same microbe, which is ingested in the same amount, there will be a different clinical picture and a different outcome of the disease. It doesn't matter whether to treat them or not.

14:14 What is the “trigger” that starts the biological program of the disease?

Maria: Still, the question is, is it really not a microorganism that causes a disease, but initially there is some kind of trigger: some kind of stress or event that triggers this special biological program, and changes occur in the organs? And with the help of this microorganism, the recovery phase after these changes occurs, then the conflict in our psyche is resolved. Is the biological program closing? Is Hamer's hearth disappearing?

Irina: This is true for saprophytic microorganisms and for those who live in symbiosis, that is, in a conditionally pathogenic flora. That is, weakening of the immune system caused by psychogenic factors contributes to the introduction of infection and its spread. But there are microorganisms that are very toxic, very virulent and can cause illness in anyone. There are few of them, but they exist. And even though you were stressed, at least you weren't. Such microorganisms are known because any organism does not have the strength or immunity, even if it is strong, to limit their activity and fight them, much less destroy them. There are several such diseases, but they exist.

15:49 Diseases that arise for no reason.

Maria: So the disease can occur even without any prerequisites from a psychological point of view?

Irina: There are such infectious diseases. Not everyone is like that, but there are some. Let me give you an example: the same rabies virus, the mortality rate from it without appropriate vaccination, if it has already entered the body alive, is 100% in warm-blooded organisms. That is, not 99.9, but 100%. Not vaccination, but the introduction of a special serum. The result is similar for smallpox and plague. There is also the causative agent of syphilis, which spreads in the body regardless of immunity. Typhoid fever, that which is associated with bordetella (bacterium), whooping cough, diphtheria bacillus, etc. A lot of them. Cholera also causes almost 98% of the damage, although it is not a virus, but a bacterium - Vibrio cholerae.

17:13 The soul can order illness for itself as an experience. Can you see the reason for this?

Maria: The next question is from the channelings. We know that the Soul can order some kind of disease for itself as an experience, right? Accordingly, if we take a disease ordered by the Soul itself as an experience, will we necessarily be able to see the cause of this disease in the current life? This is a question for understanding whether doctors should work with psychosomatics? Will we really always be able to see this reason, to find it? Or maybe it's just like a program that was once introduced before birth, and it just turns on at some point in time and that's it?

Irina: Any program has a goal. If it has already been completed, the program will “go away”. That is, a disease is some kind of negative program. For example, if we talk about a congenital disease from a past life, then it still acts in the Soul, in essence. And when the Spirit with this program enters the body, then this distorted energy can cause illness even in a child, because it has already “inhabited” him. But then, when this child grows to a conscious age and is able to analyze what qualities are inherent in his Soul and get rid of the negative ones, then the spiritual reason will go away. But most often it is impossible to do without physical treatment, because the physical body is already damaged.

18:58 Working with parents of a child with a disease.

Maria: Then the next question is about sick children. As a rule, those who work with psychosomatics work not specifically with the child, but with the parents. Children are usually not touched at all. And if we work with such a child, or more precisely with the parent of such a child, can we always find the cause of the disease? That is, to cling to something, to work through some negative attitudes. Is it always possible to find it or do you need to “dig” into the genus somewhere?

Irina: Depends on the reason. If the appearance of this sick child is associated with the practice of any lessons by the parents, then it can be found through the Higher Self of the parents. And if this is connected with the negative qualities of the child’s Spirit, then this can be fully clarified only when he grows up, and also through his Higher Self. If, of course, you teach him this.

20:04 “The guilt” of the parents of a sick child or a lesson, life experience.

Maria: So it turns out that it is not always the parents who are “to blame” for the fact that the child “turned out this way”?

Irina: I wouldn’t talk about wine here. It's not fault. It’s just a certain lesson, a certain experience that they themselves wished to go through. Because life on Earth is like a short period of the life of the

Spirit between life in the spiritual world. And it has the same meaning for the Spirit as a certain episode in a person's life. A small episode, for example, studying at school or even moving from one class to another. For example, the 5th or 6th grade of school is naturally of great importance in order to further study. But for an adult, this is a period of his life. Likewise, life in a real body means certain lessons, just like in a classroom.

21:27 Child programming period.

Maria: Another question. Why did I affect my parents? Because in German medicine it is believed that there is such a programming period. This is approximately 9 months before conception, the period of pregnancy and the first year of the child's life. Depending on what happened to the parents during this period, what emotions they experienced, what events took place in their lives, what will happen in the future and how the child will develop depends on this. That is, what will be included in it, what programs. Is it so? And is there a strict framework, such a programming period, or maybe not at all?

Irina: Of course, there is an impact on the child. Conception, pregnancy, childbirth, the first years of childhood - they, of course, influence the formation of the character, fate of the child, etc. But in any case, all this can be changed. The spirit is changeable at any age. Therefore, we can give a specific example of what you called programming, so that it would be clear to the audience, to Mead, and to everyone.

Maria: I can judge by my child and give an example like this. He has problems with speech, and I suspect that during pregnancy I had a problem with expressing my emotions; I myself didn't really want to communicate at that moment with any certain people. There was such a period in my life. And this is, as it were, programmed in the child. It is born and, as it were, captures this state of mine at that moment.

Irina: Of course, your emotional state may have an influence, but it is not so great that it could somehow program the child. The spirit came separately, and it has its own lessons, to put it simply. If he doesn't want to communicate, maybe he just doesn't see the need for it. Maybe try to communicate with him in writing: with drawings first,

diagrams. How ancient people communicated by drawing little men and figures to each other. It may be easier for him to remember in images rather than in words. If he often incarnated in plasmoid civilizations, then it will be difficult for him to remember how to pronounce a sequence of letters with his tongue. One will remember the ancient Egyptian frescoes, when Egyptians were depicted there in various situations. This was their language. For example, try to draw him ice cream, an apple, a juice in a bag, or simply show him ready-made pictures and ask him: “What do you want now?” And for him to show. And then, when he wants to eat, offer him a series of pictures so that he can show what he wants. That is, with the help of the simplest things you can communicate. It may just be difficult for him to connect with what you are saying. For example, a picture of an “apple” or an apple that he is holding. It doesn't connect the sound you made with the object in any way - that can be difficult.

25:55 Is there a pattern in the generic system for the transmission of a certain program?

Maria: Is there a pattern in the generic system? Can we see from which ancestor the child received this or that program? Do we have any studies that try to explain and find this pattern?

Irina: First, you need to understand why you need to find out from which ancestor the child received the program? In any case, we are already working with the result. Not with the past, which has already happened and passed, no matter who he received it from. It has already happened, it has already happened, you need to accept everything as it is. It is more productive to do this than to look for a reason somewhere in his past life, which has already passed, or in his family. In any case, we have an already formed structure that can be changed. And to do this, you just need to analyze its condition at the current moment, and the reasons - they are not so important. Well, you found out about some act of his great-grandfather, when, for example, he acted rudely towards another person, did not let him finish something, and this caused illness in your child. How will this help you? This information will help you absolutely nothing.

27:50 Spread of the disease “celiac enteropathy”. Why is this happening?

Maria: A particular example. Nowadays, a disease called celiac enteropathy has become very widespread. It's just some kind of epidemic. Especially in young children. I would like to know what this might be connected with. Why did allergies begin to appear so often to wheat protein?

Irina: Mead says: “Your farmers should have poisoned their wheat less with herbicides and pesticides. And add less bleaching agents to premium flour. This is an allergy to them, to the unusual. Many antifungals are added to your grain to prevent ergot, smut and other fungal diseases. The body is already accustomed to reacting pathologically to those foods that contain gluten. Because he received this substance along with another that was alien to him. Like poison, or something. Therefore, the incidence is increasing every year. Unformed immunity, the immune system cannot recognize all this and cleanse itself.

Maria: Do you mean that it’s not the gluten itself, but the accompanying substances? That is, a reaction to these substances. And gluten is just like a trigger, right? That is, what was present at that moment. Next time a person will eat even a bun that is not contaminated with these substances, but it will cause the same reaction, because it is a trigger, right? Is that how it works?

Irina: Yes, it turns out this way, because the finished product already contains all these additives, and not only in bread. You have a lot of artificial additives. This was not the case in ancient times. Therefore, when earthlings ate bread, they ate bread. When they ate meat, they ate this substance. And now they eat cookies and instead of flour, gluten, they introduce a complex of chemicals that the liver needs to somehow remove. And if an adult without allergic reactions, stomach and liver problems copes with this without problems, then the child’s body is disoriented, because they break down the enzymes that are produced to digest starch and gluten, in this case amylase, protease, etc. But there are substances that remain and do not go away. The program in the liver DNA does not know where to put it all, and intoxication begins. And then the body can begin to react to anything in this way.

And the psychological state of the child also plays an important role in this. Because for a child who rejects his parents or feels rejected by

them, it will all start easier, as if the immune reaction was launched incorrectly. You have a combination of these factors. And then it is very difficult to return the body to normal production of those enzymes that will absorb these substances.

32:12 Rheumatoid arthritis in young children.

Maria: I also wanted to ask a question about a disease such as rheumatoid arthritis. Because they very often occur together. Gluten intolerance is found in patients with rheumatoid arthritis. Why are especially young children suffering from this now? It has never happened before that young children at the age of 2-3 were already suffering from such a serious disease as rheumatoid arthritis. Is this just related to wheat, or is there something else going on here?

Irina: In general, at 2-3 years old, arthritis as a disease of bones and joints is already a violation of energy in the first chakra, there are already blocks there. But until the age of 14, a child is generally in the field of his parents. The fact is that during the last 10 years before the quantum transition and during this transition, all energy processes and their consequences on Earth are accelerating. And every year this acceleration will become more and more evident. And it manifests itself in the accelerated manifestation of those energy disturbances that exist in the Soul of the physical body. Including children, because they have a common energy with their parents.

Maria: Thank you very much. I just wanted to ask this question about the transition.

33:38 What happens on a psychological level with autism?

Maria: What happens at the physiological level in terms of autism? How to help? Because it is believed that autism is also associated with celiac disease.

Irina: Mead says that he gave an example about a child who does not want to talk, but otherwise develops normally, in any case he understands phrases addressed to him. If he distinguishes pictures,

plays, behaves appropriately, recognizes his relatives, etc. That is, he has a memory. Many Souls come to him from plasmoid worlds on Earth.

34:34 Regressive autism. Connection with vaccinations.

Maria: There is regressive autism, that is, when a child developed normally for some time, speech developed, and then suddenly after vaccination, as often happens, regression occurs and he loses all skills. And here it is no longer possible to explain that he did not want to communicate initially?

Irina: There is also a psychosomatic illness. When a person becomes mute due to some kind of stress. You have such a concept - hysterical deafness, blindness, dumbness. Your psychology and psychiatry have already studied this condition. That is, some types of characters, not all, are mainly anxious and suspicious, asthenic, psychasthenic, demonstrative types. They already show this character in childhood. They can react this way to stress. And to connect something with a vaccination, or to connect it with some kind of conversation, or something else, or with taking medications - that's up to the parents. For example, if they had a vaccination 3 months ago, and then something happened, the child stopped talking, then they automatically get the idea that it is from the vaccination. But after this does not mean as a result of this!

The more people in society talk about this, the more parents, if they believe in it and at the same time vaccinate, will put this thought form into the child's aura. This can manifest itself in anxious and suspicious children on the physical body. I want to emphasize now that it is not necessary for parents to tell their child out loud in order to instill this in him. This is transmitted through energy. He absorbs everything, he is in their aura.

37:12 Functional disorders dependent on emotions.

Irina: Functional speech disorder, inorganic, happens when an adult is after stress, after a fright, after a divorce, even after some kind of offense against someone. It wasn't that he stopped talking, but in the

mildest case, he began to stutter, he could have convulsions. There were even cases when, after experiencing stress, girls, for example, had their eyes closed and they could not open them. It seemed to them that they were no longer opening, that is, there was such a spasm in the eyelid, because of which they could not open them. Or they seemed to have paralysis, they really couldn't get up, despite the fact that in a dream it disappeared. I'm not even talking about the fact that they are pretending. This focus of arousal in the brain is associated with negative emotions and interferes with the physical body. After all, conversation, physical speech is also movement. I mean the movement of certain muscles: tongue, lips, throat. A lot of muscles are involved in the pronunciation of each word: respiratory muscles, facial muscles are used. And if it's all in spasm or under the influence of energy, then the person will not be able to say anything.

38:56 The connection between emotions and blocks in children.

Irina: Children can have a very damaged psyche. At what plan? The child has his own special subjective world, which for him is perceived as a greater reality than the material world. And what for an adult seems like a trifle, a meaningless moment, for a child it can be such an insult, a disorder that he cannot survive without these blocks.

39:26 Working with a child through the mother.

Maria: Then in this case, can we work through mom?

Irina: Yes, my mother's Higher Self knows about this. If you turn to your mother's Higher Self and ask him: why, for what reason did this happen to my child, and why was this lesson given to me, then the Higher Self will answer.

Maria: Okay. Thanks a lot. I'm done with this.

Irina: Thank you, Maria.

Maria: Thank you.

#125 Ashtar Sheran and the reptilian. War in the Solar System 12,000 years ago - attack on the Burkhad colony.

https://blog.cassiopeia.center/ashtar-sheran-i-reptiloid-vojna-12000-let-nazad

https://www.youtube.com/watch?v=xUtxZ-3uxKs

Channeling on the theme of war in the solar system 12 thousand years ago - Selbet's attack on the Burkhad colony. The questions are answered by a direct participant in this war, a representative of the Sirius civilization - Ashtar Sheran and a representative of the Selbet civilization - Truar Pikunus.

Conference of contactee Irina Podzorova with the representative of the Sirius civilization - Ashtar Sheran and the representative of the Selbet civilization - Troir Pikunus.

00:00 Vladimir: Friends, hello! My name is Vladimir, I am in Chicago and am a journalist for Chicago Russian-language media. Today we are holding a conference with Ashtar Sheran - a representative of the planet Selbet and, of course, Irina Podzorova. Irina, please introduce yourself and our interlocutors, and we will begin.

Irina: Hello, dear viewers. My name is Irina Podzorova, I am a contactee with extraterrestrial civilizations. Today we have the topic "War in the Solar System 12,000 years ago between Earth and Selbet, Selbet's attack on the Burkhad colony in the Solar System." With us is a direct participant in this war - Ashtar Sheran - a representative of the Sirius civilization and a representative of the Selbet civilization - a historian, a specialist in the ancient history of the planet Selbet - Truar Pikunus.

Vladimir: We are glad to welcome you!

Thank you very much to Ashtar and Troir for coming to us and being ready to communicate with us. I will literally say two words. Who doesn't know, in fact, we are now talking with representatives of two then warring races, because it was the civilization of Ashtar, on the side of the Interstellar Union, that fought with the civilization of the planet Selbet. Moreover, the planet Ashtara was destroyed by representatives of the planet Selbet 12,000 years ago. In addition, Ashtar Sheran in his physical body, in the same incarnation, was a participant in those events (the life span of representatives of his race is very long). But the representative of the planet Selbet (as I understand, fewer people live there), naturally, was not personally present. We don't know where he was incarnated, that's another story.

02:33 Age of Ashtar, life expectancy of the race from Sirius. What does the name Ashtar Sheran mean?

Vladimir: How old is Ashtar on earth now? How long do

representatives of the race from the planet Sirius live? What do both parts of the name Ashtar Sheran mean?

Irina: I'm a little over 15,200 Earth years old. The body of our race can exist in the physical world for about 25,000 Earth years - this is the maximum period that has been recorded in our race. The first part of the name - Ashtar - designates one of the constellations, which in our country is located between the constellation Taurus and the constellation Orion. Sheran is "a guest who came from this constellation." When I was born on my planet, my parents knew exactly my previous incarnation, because we communicated in the spiritual world. That's why they named me Ashtar, like a constellation, it's not just a star, but a constellation.

04:13 What does Ashtar look like in the physical body?

Irina: He is 2 m 20 cm tall, has an elongated skull and yellowish skin. The eyes are gray, the arms and legs are like those of earthlings, only he is of a stronger build.

04:59 Does Ashtar have a wife and children?

Irina: He says that he had three families, but his wives used to go to the spiritual world. He made the choice to remain in this incarnation, and they chose to move on. He has 38 children: 10 girls and 28 boys.

05:39 About the history of the destroyed planet Ashtar Sheran.

Irina: My home planet was safe and sound. But after pushing the opponents out of the solar system, the war continued with other participants who were on the side of the Interstellar Union. And in this war, after the events in the solar system, the Selbetites sent the main striking force to the planet of my civilization. We were on the side of the Interstellar Union, so they decided to attack us. Because, firstly, Sirius is closer to the Sun, and the main striking force was concentrated there. And, secondly, Sirius was closer to Selbet than Burkhad. And since my home planet was considered the main ally, it was also destroyed in this war.

07:21 Is Sirius included in the Galactic Federation of the Pleiades and the Interstellar Union?

Irina: Both to the Galactic Federation and to the Interstellar Union. We are the original members and founders.

Vladimir: Did you have anything to do with transmitting information to the African Dogon tribe, who say that aliens came to them from Sirius B and talk about a second star?

Irina: These are not my personal contacts, but those of humanoids from my group. There were such contact specialists. I am not a specialist in contacts, I am a specialist in space travel, but there is something like MidgasCaus - a psychologist, a specialist in contacts. There are such people in our race, and they had contact there.

08:28 Appearance, height and age of Troire Pikunus.

Irina: He says he is 127 earth years old, but he is already working. His height is about 1 m 80 cm. His skin is gray-green, not dark, with scales on his face. Narrow dark eyes, a mouth without lips and instead of a nose, two depressions inward. The tail is about 80 cm.

Vladimir: How tall can they grow?

Irina: Up to 2 m 60 cm.

Vladimir: Let's talk directly about that war.

10:08 Ashtar Sheran at the beginning of the war.

Vladimir: Where was Ashtar at the beginning of that war? How did he know about this? His title, powers? Ashtar's first thought when he found out about all this?

Irina: He says that he learned about this from a message from the Burkhadians, who sent him to Sirius. At that moment I was in space on the outskirts of my system. I led a group of 17 ships that were not military, but rather security from the galactic security service - this is one of the units of high-quality security in space. Each ship had between 38 and 52 participants. At that time, I received a message from one of the participants in that war, he later died. He came to me and conveyed the message personally (by voice). My first thought was: don't hesitate for a minute, fly to the solar system. Because I knew very well what weapons Selbet might have. Moreover, they were one of the best physicists, they had serious research in the field of dematerialization of physical objects. I knew very well that their physicists did not report all their successes to the Union, that is, they had their own secret weapon. Therefore, I realized that they, of course, would use it, since they went to this war. And I immediately decided to fly, I just gave the signal for all the ships to follow me.

13:15 The Burkhad ship is the first defender and victim of the war.

Vladimir: Ashtar, the first ship that appeared there was from the group?

Irina: When I appeared there, there was already a Burkhad warship there. They were closer. We came from the other side of the solar system.

Vladimir: How long did it take you to appear after you received the signal?

Irina: After 15 minutes, the ships gathered in space, in space. And from my group of ships it was necessary to form a certain figure, move away from each other at a certain distance in order to simultaneously turn on the gravitational engines.

Vladimir: Was the first Burkhad ship destroyed?

Irina: Yes, it was destroyed, but I didn't see it. It was on the other side

of the solar system.

14:28 Selbet's strategic and tactical goals in the war.

Vladimir: Troir Pikunus, what were the strategic and tactical goals for Selbet at that moment? What did you expect? Why were you confident that you could win that war, despite the forces of the Interstellar Union? What was the calculation? And why didn't this come true?

Irina: As a representative of my world, I studied this period of history. And the first thing I would like to convey through the contactee of the Interstellar Union is my sincere condolences and apologies for the damage and harm that was caused to your race and all races of the Interstellar Union by my ancestors. I studied the documents in the electronic application. Their strategic and tactical goals were to erase the human race in general from the Earth and from its colonies. At the time when the new group came to power, they introduced into the ideology of Selbet such an understanding that the combination of genes that the Interstellar Union produced for the hybridization of earthlings would be dangerous for the entire Galaxy when they went into space. And, secondly, they did not allow Selbet scientists to create a truly important race, because it was believed that there were already many anthropomorphic humanoids in the Galaxy. And since the Tumesoutians discovered such a planet where there was such a diverse reptilian life (reptilian creatures of non-intelligent forms), then they should have given these scientists a chance for such production. Even at least a separate race. But the refusal of the Interstellar Union was regarded by this group as a humiliation of the reptilian race.

17:30 Why did reptilians consider the mixing of genes dangerous?

Irina: Because they believed that it was the Tumesout and Burkhad genes that were compatible with a primate, but the Selbet genes by 5% would interfere with the development of a rational spirit correctly. Since he will be more fixated on material values. This percentage ratio was studied earlier using the gene map, that is, what exactly will be the gene changes, what proteins they are responsible for in the structure of the nervous, hormonal systems, etc. Therefore, these Burkhad scientists were asked to increase the percentage of reptilian genes in

order to level out the combination of Burkhad and Tumesout genes with primates. Simply put, so that a new hormone is produced so that it does not interfere with the Spirit to manifest its spiritual nature in the material body. When they came to power, they taught their people that it is better to destroy now (even knowing full well that they will collide with the Interstellar Union) than when earthlings go out into the Galaxy, into space. Because when they are accepted into the Interstellar Union, and they reach the stage where they will temporarily not fight and fulfill all the provisions for their acceptance into the Interstellar Union. When earthlings go out into the Galaxy, everything may change, and they will become secret criminals. The Selbetites understood that they would die in any case, especially the first of them who flew to fight. And perhaps they even regretted that they were destroying intelligent spirits in incarnation. But they blamed the Interstellar Union for everything.

20:28 What was Selbet counting on: destroying earthlings at the cost of his life or winning?

Irina: That is why there was an attack not only on Earth, but also on Venus and Mars, where there were colonies of earthlings. Because this species also lived there. Success was expected from the destruction of all hybrids, that they would not survive in sufficient numbers to live on Earth again. And so a weapon was used that seemed to push back the Earth's orbit. What if suddenly the Interstellar Union again decides to create these hybrids so that they find themselves in conditions that do not correspond to those that were originally. That's why they used geophysical weapons, and not just laser ones, which simply burn cities.

21:47 Selbet's miscalculation in the war.

Vladimir: Troir, what did your ancestors miscalculate?

Irina: There were Selbet colonies that took their side. Not all. Many did not participate in this war at all. They did not even expect to defeat the Interstellar Union, since they were also technologically advanced. Why did the Selbetites continue the war? They resisted the military that had already started the war (they did not want to surrender to the Interstellar Union) to continue this war to the end. This is inherent in

the very nature of the Spirit. The reptilian body secretes hormones that prevent them from giving up. Even knowing that he will die, he will fight until the last squad. They did not expect that earthlings would be taken from Earth to lunar bases so quickly that they would export flora and fauna. That's why they tried to attack them in flight. But by the time people began to be taken out, ships of the Interstellar Union began to arrive on Earth, and Selbet's ships were distracted. How they fight. First, they fire beams, but both sides have a protective field. They will exchange these rays until the ship's field loses its protection. Plus they flew from Sirius with the Ashtar team. They also participated in protecting the Earth. Therefore, the Selbet ships were not allowed to shoot down ships carrying people along the way. And although 35 ships with people were shot down there, the rest were saved.

25:20 Selbet's readiness to be expelled from the MS.

Vladimir: Did this group not understand that the Interstellar Union would deal with the Selbet civilization, or did they act like a kamikaze?

Irina: They understood everything and conveyed to the people through secret messages that they would be expelled from the Interstellar Union for aggression. They were trained to be ready for this. Such data is in their history.

26:13 Divine plan in allowing war.

Vladimir: What do you think, Troir, from a spiritual point of view, why did the Almighty allow the destruction of civilization? As it is written in the Bible: punishment is given for sins.

Irina: Troir says that we do not have such religions. We have a doctrine about the spiritual world. And I will say this. The spirits who incarnated during this war, in any case, knew that they would incarnate at this time and would participate in the war. They needed this experience so that when they entered into a war with another race, dying in physical torment, in negative emotions, they acquired the ability at the last moment to release this negativity on their enemy, so that later they would not incarnate in his race. Ashtar believes God allowed this for another purpose. So that subsequent generations,

other humanoids who will live on the planets, could see from this example what the violation of the Divine Law leads to.

28:51 Ashtar's attitude towards the Selbet people.

Vladimir: Do Ashtar and Troire experience any form of hostility towards their interlocutor for all the events that have happened?

Irina: Ashtar says that of those Selbet residents who live now, there are no more witnesses of those events left there. Perhaps there are incarnate ones there. I have not explored the spiritual history of the incarnation of each of them; this is neither my interests nor my tasks. I'm minding my own business - protecting the borders of the solar system. In any case, the request for spiritual history must be with the permission of that being. And I'm not interested in finding out the history of each of them, because I'm busy with my own business. Even if these spirits are embodied, I cannot have any enmity towards them, because I understand perfectly well that they have already learned this lesson. Since they had already left this incarnation, they had already been shown in the spiritual world why they did this, and what specific qualities of their Spirit led to this war. Each of them had the opportunity to refuse, simply step aside and remain neutral. But in any case, since they did not refuse, they were shown to each of them individually. I am not a judge to judge each of them. I'm just a protector. I have now listened to Troir's messages and I can say that I already knew all this. I knew how the Selbetites were pitted against hybrids. And I even understand that every ordinary Selbetite really believed that he was playing a good role in the Galaxy, even for the Interstellar Union itself.

31:15 Are Selbet's fears about hybrids wrong?

Vladimir: Troire, do you think there was some truth in Selbet's fears that the earthlings would begin to cause harm, or were they mistaken?

Irina: I believe that they were mistaken (because I saw scientists laying out gene maps) in that it is the entire race that will somehow be pathologically unequal to other races in the manifestation of the Spiritual Self, what you call divine light, and so on. And an example of the fact that they are wrong are many people on Earth who remained

these hybrids, who live on Earth even in such conditions without the Interstellar Union, without fair laws, in the ideology of a society that even approves of violence. Being present with their astral part in those egregors that carry negativity, these people were still able to rise to those heights of the Spirit that are accessible to few in the Galaxy. These are the ones you call saints. I'm not even talking about genetics. Just even being in these social, social, economic and astral, so to speak, conditions, because the astral atmosphere also influences. As an example, the planet Disaru also entered the Interstellar Union. And there is no danger from them. And they have your genetics.

33:20 Was Ashtar in a physical body on Selbet?

Irina: Been there several times. Both before the war and after.

33:43 Losses of MS and Selbet during the war.

Vladimir: How many aliens have died in this war over 130 years and how many representatives of Selbet?

Irina: Ashtar says that about 55,000 representatives of the Interstellar Union and about 40,000 representatives of Selbet and their colonies died. 55 million earthlings did not fight with him, they were simply destroyed. This includes those who died from disasters.

35:58 Dinosaurs on Earth, and Selbet's plans to create intelligent reptilians.

Vladimir: Were there dinosaurs on Earth before the war? Did Selbet have plans for experiments to create intelligent reptilians from the remains of a destroyed civilization?

Irina: There were dinosaurs on Earth, and people lived next door to them. The Selbetites had such plans. But since they began to use geophysical weapons, which were incompatible with the life of any large organisms, the dinosaurs died, first of all, from changes in the atmosphere and the same climate change. Those who were not taken out in time died. Some species of mammals that managed to survive

this disaster survived, but large species died.

37:41 Combat operations on the first day of the war.

Vladimir: Ashtar, the main military operations in the first day of the war?

Irina: After my squad appeared in the solar system, the first thing we did was fly into orbit where the asteroid belt is now located, since we recorded the use of weapons there. And when we arrived, an explosion had already occurred there, we only saw the consequences. We immediately (I didn't keep track of time) engaged all of Selbet's ships that were still arriving. Then we moved to cover the departure of those ships that were transporting people. And other Burkhadian ships had already transported the inhabitants of Venus by this time. When the Selbetians destroyed Mars, we were on the other side of the Solar System and did not allow other Selbet ships into the Solar System.

Vladimir: Were there attempts at negotiations to find out what was happening?

Irina: Yes, diplomats were sent. But this did not happen before the war, because... The Selbetians were already ready to attack the Interstellar Union, and therefore no ships were sent there. Burkhadian interstellar communications politicians tried to contact them, but these attempts were unsuccessful. They either did not answer, or, as Troire already noted, they talked about hybrids.

40:43 Karmic lessons of Ashtar.

Vladimir: Did Ashtar have to give direct orders or use weapons himself? Did this lower his spiritual vibration? Did this lead to the accumulation of negative karma?

Irina: In a space war it is impossible not to use such weapons. In any case, whether you gave the order to use it or applied it yourself, you understand that your word killed a living being, or your hand pressed this button. For the soul, these are practically the same consequences.

As I myself felt at that moment, this led me to lower my vibration, but not because I killed protecting defenseless people, but because of despondency that intelligent Selbet beings acted this way. Of course, I knew their ideology that these hybrids would supposedly be dangerous, and they even sent me messages asking me to go over to their side.

Vladimir: Did you try to recruit?

Irina: Yes, so that I would believe that hybrids are potentially dangerous creatures that will then possibly destroy my race. They sent me reasons. And this made me sad. When I met the Selbet scientists, I was at a loss. They did not understand that the intelligent Spirit, which incarnates, by its nature rules over the body, no matter what genetics it may have. After all, almost all civilizations have gone through the experience of wars: both hybrid civilizations and those that emerged through natural evolution. But over time, society abandoned these wars and unjust laws, because spiritual evolution contributes to social evolution and vice versa. Well, we should just give these hybrids more time. But to destroy millions of intelligent beings like this out of fear of what will happen in the future... I fell into a long depression after I found out that the majority of the race believed in this.

44:24 The role of plasmoids in war.

Vladimir: Ashtar, what was the role of plasmoid civilizations in the war?

Irina: At other vibration frequencies, all they saw was how many spirits came out of dense bodies and went into the spiritual world. They saw it on the energy level. And this was accompanied by a release of energy and vitality. When the Spirit is quickly removed from incarnation by killing, it leaves, and the body remains full of vitality (if there are no causes of illness or old age). And when millions die, a cloud of vital force is formed there, which is not immediately, but gradually released from the bodies. Longer than with natural death. Most of this vital force was charged with fear, pain, and anger at the Selbet people. And low-vibration small-plasmoid civilizations that could assimilate this energy fed on it. Many plasmoids that switch to a parasitic lifestyle love this energy (which is released from a person when he experiences

negativity) so much that they can cause something like hallucinations in a person on your tongue. And these hallucinations will push these people towards suicide. Because if a person kills his body, then part of this energy will be released to him.

46:38 Where were Jesus and Lucifer during the war?

Irina: I was never interested in this. Representatives of the Interstellar Union are raised in such a way that each spirit does not look at its own incarnation. He lives this life, this incarnation. We don't even have such an understanding, for example, of going to a past life. For us, this is just empty entertainment that no one needs. MidgasKaus appeared and said that the spirit of Jesus Christ during the war (this was before Yahweh) was not incarnated. Lucifer also did not incarnate.

48:20 Examples of the heroism of the Interstellar Union.

Irina: There were many examples of heroism not only among representatives of the Interstellar Union, but also among earthlings who took people and samples of flora and fauna from the planets. Because when our ships landed on the surface of the planet, and our representatives went out to people to help them, they went out without protection, just as the ships themselves were left without a protective field. There was not always time for this, and they did not want to waste the energy of the ships on this, saving it for flights, and therefore were under fire. The Selbetites used a certain weapon with a thin blue beam that did not just burn people, but cut them. These rays are not always visible in the air. The Selbet people had suits with a built-in protective field against mechanical weapons, but the Burkhad people did not have suits, because they were in a hurry to take out the earthlings.

Vladimir: What is your personal attitude to the opinion of representatives of the planet Kutis from the Pleiades that it is necessary to actively intervene in the situation on Earth, and not wait for earthlings to decide everything themselves, as the Interstellar Union believes.

Irina: I know the history of those civilizations that had similar

interventions, where representatives of the Interstellar Union stopped wars (even before the creation of earthlings), brought their knowledge about the construction of cities, installed their own rulers (there are such examples). But as far as I remember, such planets either lost their independence as intelligent civilizations and did not become partners of the Interstellar Union, or after at least 2-3 generations a conspiracy arose among them about their independence and the overthrow of representatives of the Interstellar Union. An overt or, even worse, covert struggle against them began. Such undesirable things happened for the spiritual development of both. My personal position is that it is not worth interfering now, but to give the earthly civilization lessons, just as we once learned them all. It was difficult for every civilization to come to an existence without wars and the death penalty. Before the planet, as a civilizational community, develops in its evolutionary environment, in its noosphere, the idea that the life of an embodied intelligent spirit is priceless, this civilization must undergo rather harsh lessons in the loss of many of its representatives. Otherwise, they won't understand it in any way if you just talk about it to them.

54:30 Ashtar's appeal to earthlings.

Irina: I am now addressing every inhabitant of the Earth who is watching contactee Irina, and I want to convey through her that I have been in this incarnation for so long, because my mission to protect this planet is not over. And I will leave the incarnation and go into the next one only when the Earth is accepted into the Interstellar Union. We live in our incarnation for 25,000 years, I am now about 15,200, there is still time. I myself can decide to leave the incarnation, but I have set a goal to protect the boundaries of the planet so that no aggressive civilizations attack, and to tell other representatives of my civilization who are born again about this war.

Vladimir: Ashtar, aren't you afraid to incarnate on Earth?

Irina: No, I am not afraid to incarnate either on Earth or on Selbet.

57:08 Examples of heroism of the warriors of the planet Selbet.

Irina: When we were offered to go over to the side of the Interstellar Union, we understood that any of us would be sent to the planet of criminals, because he took part in the war against defenseless creatures who could not fight back. The heroism was that when there were few of us left and the energy for weapons ran out, some of us killed ourselves so as not to get into the Interstellar Union. But there were also those who went over to their side, very few, but there were some. They no longer fought against the Selbetites, because... no military leader will allow someone who crossed over from the enemy to fight in a serious battle. This is the psychology of the creature, since it can go back and sacrifice new lives of its allies.

Vladimir: What were the names of the commanders-in-chief of Selbet and the Interstellar Union?

Irina: Many commanders-in-chief from Selbet took part in the war, but the Ruler named Rentigon gave the order. The Commander-in-Chief of the Interstellar Union was represented by a Burkhadian named Lygis Murarius.

Vladimir: What is the fate of Rentigon after the war? Did he die his own death?

Irina: He survived during that war, which lasted 130 years, he was then isolated, sent to the planet of criminals, already excommunicated from the Interstellar Union.

Vladimir: Was it some kind of trial on Selbet from the Interstellar Union?

Irina: They were taken to the Meeting on Selbet. When the war was already over, the Selbetians were surrounded by representatives of the Interstellar Union (Burkhadians, Tumesoutians, representatives of the colonies of Burkhad), suppressed resistance and destroyed weapon points, deprived of the ability to move with the help of a device that affects the nervous system, they were taken to the Meeting of the Interstellar Union, where Subsequently, representatives of the Interstellar Union worked with them, including psychologists (there are no judges there), who figured out why this happened, scientists and

geneticists who talked with Selbet scientists, supporters of destruction. We tried to convince them.

01:04:37 Potential danger of a repeat of war.

Vladimir: Is there a potential danger that the war could happen again in some form? Will the colonies be attacked by Selbet or other civilizations in the Galaxy or outside the Galaxy?

Irina: Personally, I don't know such trends on my planet. There are a few groups that continue to advocate not for the destruction of earthlings, but for their limitation in outer space. Such ideas arise so that even on your earthly ships, as you call them, rockets, they do not let you leave the Earth. Since physical contact is prohibited, then arrange something like natural breakdowns for you. Because they believe that there is no need for you to fly into space if you have not yet solved the problems on the planet. Earthlings use the power of their mind, the power of their Spirit in the body in which they are embodied. And 5% of Selbet genes give them activity, determination and a desire to go to the end. And they go to the end in everything, including using weapons that they invent for use against their own kind.

01:06:30 Lack of physical contacts between earthlings and reptilians.

Vladimir: After the war 12,000 years ago, were there physical contactees from Selbeta on Earth?

Irina: There were no contacts on our side. Due to sanctions, for 250 years after the war we were not accepted into the Interstellar Union, until another group came to power and applied to the Interstellar Union, passing all the checks. Then we restored our planet Selbet after the war. And only later we began to observe the Earth from the outside, but with the help of astral contacts, not physical ones. This happened privately, at the request of the Selbet residents themselves. The government did not appoint such specialists; they were not interested in this.

01:07 :47 Legends about dragons.

Vladimir: We have a lot of legends about dragons, is this related to the image of the Selbet people? Could earthlings see them?

Irina: Yes, there were such cases. The earthlings saw them and then could convey information about the war with dragon-like, with representatives of reptilian, one might say, with lizard-like creatures.

01:09 :02 Where and how did the battle between Selbet and MS take place on planet Earth?

Vladimir: Tell us about the battle between the Selbetites and representatives of the Interstellar Union on Earth. Where was it?

Irina: This happened after the weapon struck, which split the Earth, then the earthquakes began. A little south of the Himalayas, if you look at our map. The mountains were lower then. Now they are high because they rose due to cataclysms. At the foot of those mountains there was a city, located in a circle, with gray stone houses and labyrinthine streets. At the top of the roofs there was a window through which light and air came in. Selbet's oval-shaped ship landed not in the middle of the city, but on the flat roofs of those houses, and 5 Selbet men came out of it with weapons in their hands. Blue beams came out of the weapon and cut the air.

Vladimir: Were there contactees who flew with Troir on ships?

Irina: As I already said, if this happened, it was only at the request of the Selbet residents themselves, not on the part of the government. I won't say in more detail, I'm not entirely aware of this, I'm a historian.

01:12 :41 How many species of animals were there on Earth before and after the war?

Irina: After the war, the diversity of animal and plant species decreased by 56%.

01:14:10 Troire's appeal to earthlings.

Irina: I appeal to every person on Earth who is watching us now. On behalf of our entire race, I want to convey to you that, as Ashtar said, so that you quickly enter the Interstellar Union, pass this period of your history that separates us. And I want to convey to you that many members of my race regret the decision that was made. And in our schools they teach that it was Selbet's mistake that set your civilization spiritually and sociologically back thousands of years.

Participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Vladimir – guest;

Ashtar Sheran - representative of the Sirius civilization;

Truar Pikunus is a specialist in the ancient history of the planet Selbet.

Interstellar Union and cooperation of civilizations

Cassiopeia, Irina Podzorova

CASSIOPEIA -9- Irina Podzorova - Interstellar Union and cooperation of civilizations

Information transmitted by our space friends through Irina Podzorova, a contactee with extraterrestrial civilizations.

#128 In simple words about the main thing. Interview with Irina Podzorova. He who fears is imperfect in love.

---

https://blog.cassiopeia.center/prostymi-slovami-o-glavnom-intervyu
https://www.youtube.com/watch?v=q9mGzWKaZtg

00:03 How to avoid pride?

Irina: To avoid spiritual pride, physical pride, material pride... It’s not a matter of abilities and wealth, it’s a matter of the right attitude towards them.

You can be proud of anything. One who knows how to swim can be proud of it over one who cannot do it. Anyone who has the opportunity to buy a Mercedes can be proud of it over those who have a Zhiguli.

So, can you swim?

Natalya: Yes.

Irina: Are you proud of this in front of someone who doesn't know how?

Natalya: Mostly no, but sometimes it happens.

Irina: He really might not have learned for some reason...

Natalya: No, I'm not proud, of course.

Irina: You could very well be in his place.

The fact is that you can be proud of anything if you have the wrong attitude: if you consider these gifts and these abilities, these material acquisitions as your own.

And if you consider them not to be yours, but received temporarily as a gift from God, from our Creator, the heavenly Father, and received for a reason, for pleasure, but also for the benefit of others, then you will never be proud of anything. In the sense of material acquisitions.

And in terms of abilities, you will understand that, firstly, every person is unique, every person is unique, everyone has true abilities that others do not have. There are no completely mediocre people, everyone is capable of something, they do something better than others. For example, maybe you'll fry the potatoes better.

Natalya: It's definitely not me.

Irina: Or bake a cake, or grow some flowers, or draw, or sing... But I can't do that. I can do something else, but you can't do it.

01:55 People are all equal, united in the Light of God.

Irina: This is the individuality of each person. Every person has abilities. We are all equal, we are all one in the divine Light. You and I are one, we are all one. You are my reflection, I am your reflection.

Natalya: Despite what we do in life, are we all equal?

Irina: Before God? We are all equal before God, he loves everyone, even the last criminals, even the devil. Everyone is the same. Because they are all his children. If a child is disobedient, you won't love him less, will you?

Now about those who live in their sins, passions, vices. What to do with them? How to deal with them?

Well, we certainly shouldn't be proud of them because we don't have such vices. You just need to understand that they are sick with these negative emotions. And as Christ said when he came to Earth, when sinners who drank and led a vicious lifestyle began to gather around him, and the righteous and Pharisees said to him: "What are you doing, why are you communicating with them? You need to stay away." He said: "It is not the healthy who need a doctor, but the sick."

In fact, if people who are filled with negativity want to get rid of it, it should be of their own free will, they should not be forced. But they need our attention, care and love even more than those who do not have these vices. This is medicine for them, so that they become this Light that is in us.

You may not know, but you can feel it with your heart. Feels the heart.

03:38 Fear of loss of love as a cause of pride and envy.

Irina: Now, if someone is proud of something, this already indicates that he has a fear of losing love. Otherwise he wouldn't have this pride.

And I have no fear of losing this love, because in any case I know that I am very part of this Source, and It is limitless. How can I lose Him? It is impossible to tear me away from this Source, because I am part of It. How can a part be torn away from the whole? No force can control this.

Natalya: So, if a person shows pride in some place, then this means that the person is afraid of losing it all?

Irina: Pride, it always contains fear. That is, it already contains arrogance, the emotions "I'm better than you." Why am I better than you? Because if I am equal to you, then I will be something worse than you and will lose your love. This is how I feel it. Isn't it?

Natalya: Yes, this is connected with fears, for sure.

Irina: And envy is also fear. All fears are connected with the desire to possess. They cause the same thing, that's all. Fear, according to the faithful word of the Apostle... There is such an

Apostle, in my opinion, John the Theologian (he wrote part of the New Testament, Gospel 2, his three Epistles and the Apocalypse, which we are reading now). And in one of the Epistles of John the Theologian there is such a word that fears are torment, that is, suffering. He who fears is imperfect in love.

Natalya: Imperfect in love...

Irina: Yes, this is, in fact, the New Testament, and these words were written 2000 years ago. If anyone hasn't read it, you can read the Epistle of John the Theologian. It says everything for our days: that God is Love, that the one who says that he loves God, but hates his brother, is not in the Light. He is simply deceiving himself and others.

Is it true that these are truths that everyone understands?

Natalya: Of course, when you repeat them, when they flow from your lips now, my heart opens up like this, and it seems to me that it's so easy to live just like that. Remembering this every second of my life.

Irina: To remember this every second of your life, you need to take care of yourself. What moves us away from these thoughts, what makes us forget them? What are our emotions, feelings?

06:30 Is it possible to do everyday things while thinking about the spiritual?

Irina: Some people say that everyday matters distract them from spiritual ones. But can you do everyday things with spiritual thoughts in mind?

Natalya: Of course.

Irina: Do you think it's possible to wash dishes and think about God?

Natalya: Easy.

Irina: And even that you are a conductor of Light. Right now you are a conductor of Light in this place, and here you are purifying this world, part of this world, which is in these atoms and molecules.

But sometimes the work is physically hard, in the heat, for example, you plant and dig. But depending on how you treat this work: if you treat it as some kind of duty that you don't want to perform, but, for example, you were forced, then it will cause negativity in you; and if you imagine some final goal and dedicate it to God, it will be easy for you to do this for God.

If you work, if you work for some person, care for the sick, do it for him, as for Christ. It will be so easy for you to do this.

Interesting... I notice that many people do not like Orthodoxy and turn away from it, but in fact, there are many such truths there. I understand that they are not followed by many, but this is precisely because many of them do not read the heritage that is there.

08:11 How to love yourself? Self-deprecation as a form of pride.

Natalya: But you know, some people say that the hardest thing is to love yourself. I just hear, even in our audience: “I can’t love myself.”

Irina: Everyone understands this differently. What does it mean to love yourself?

Natalya: They say: “Love yourself first, then you will love the whole world.”

Irina: Love... You are my good one... (pats herself on the head)

Natalya: And here’s the question, yes. What does it mean to love yourself?

Irina: This means recognizing your perfection as well as that of others. Don't consider yourself in last place.

There is a lack of pride and arrogance. There is pride and arrogance, and there is the opposite - self-abasement, despondency, self-criticism, excessive self-criticism, when it is no longer for self-improvement, but for incomprehensible sadness.

This is the opposite, when you do not consider yourself above everyone, but bow to everyone, try to serve everyone. In fact, this is also a form of pride. But I’m still not like everyone else, I’m no longer taller, but shorter. Let me be given the same pain in the form of pity. These are also fears.

Natalya: Victim.

Irina: But you need to know that you are not superior or inferior, but equal. You are perfection, you are divine perfection. You are the Light. What you have in you is Light.

You have the right, if we speak close to social norms, to any choice that you want to make. Who to live with, what to read to you - you have the right to choose for yourself.

But I am also the same person, equal to you. And I am also Light, and I am also perfection. God loves me too, just like you. And I also have the right to my beliefs, to my life, to what I want to do. Same as you.

We live with equal rights, but we all have different opportunities. We have only the same rights. This is where self-love lies. That is, respect yourself as an individual, as well as the personality of another person, your rights.

And if you see that these rights are being infringed upon by another person, even for his own sake, do not let him do it. But not with rudeness, but with love again.

That is, do not allow yourself to be humiliated, do not allow yourself to be pressured, or offended. Not with rudeness like this: “Leave me alone, everyone.” And don't swear at him. But just to make it clear that, in the end, I also have the right to my opinion, to my life. And this is in a mild form, at least try to do so.

Of course, a lot depends on upbringing, on a person’s emotionality. Well, for example, two people live - husband and wife. The husband, for example, does not like that his wife eats the wrong thing. And my wife is happy with everything. So she shouldn’t follow his lead if she doesn’t want to. This will already be dislike for yourself. But if she answers her husband rudely, this will already be dislike for him. We need to find a middle ground. How to do it? Well, yes, you eat the wrong thing, it harms you, something else, right?

- Thank you, my dear, of course, for the advice, for your love, but I am a free person and I choose what I eat. You have this right - to eat what you like?

- Yes I have.

- And now I have the same right, I am a free person like you.

He can say that he is worried about you so that you don’t get offended, he can say it gently.

- Thank you, of course, for your concern, for your concern, but this is my choice.

- It can be harmful to your health.

- Yes, it can harm my health. But this is my lesson, which I will take myself. And thank you for your love.

Well, that’s how it is with everything. If someone doesn't like something, you don't have to live up to someone else's standards. But the other person doesn't have to live up to your standards either. This is the main thing to remember.

Natalya: And we are all different.

Irina: Yes.

Natalya: We often forget...

12:56 Patience with yourself and others is the main sign of love.

Irina: Because I don’t have enough patience. And patience is the main sign of love. Both to yourself and to others.

Natalya: Well, you know, the word patience is associated with some kind of torment. To endure means to suffer. Maybe there is some kind of catch in this word?

Irina: There is still patience in order to do something. For example, you don’t want to, but you have to. You don’t want to get up for school, but you have to walk along this road, trudge. Then still sit in class. You have to endure this. If you don't tolerate it, you won't learn. Do you understand what's going on?

Natalya: If you suffer for a long time, something will work out.

Irina: Again, if you treat this as torture, you will experience this torture. If you treat it as a necessary, albeit difficult experience, yes, but it is necessary for your development, you will no longer experience this suffering to such an extent.

Because even physical pain is felt more when you are afraid of it. You are afraid of this torment when you deny the pain. And when you accept it, you experience it even easier. Understand?

Natalya: Yes.

Irina: Why do you need patience for love? Because, indeed, you were right when you said that we are all so different, and that it can be difficult to adapt to each other. To achieve this, you cannot do without patience. Otherwise, then we will all swear at each other, and not love each other. Do you know this?

Natalya: Ideally, yes.

Irina: But the main thing is that you all want to be accepted by people with all your

characteristics, to be accepted without scandals, not to get on your nerves, not to change you. That's what you want. Other people want the same thing.

Participants: Irina Podzorova, Natalya - channel “This Moment”.

#129 Live broadcast with contactee Irina Podzorova 08/23/2020. The Tumesout civilization is a legacy on Earth.

https://blog.cassiopeia.center/civilizaciya-tumesout-nasledie-na-zemle
https://www.youtube.com/watch?v=2t81XM5lNXg

04:28 Acquaintance with Klaer Resuf - Tumesout civilization. Intergalactic news.

Maxim : Today we have a topic about the Tumesout civilization. This civilization is one of our creators. We want to remind you that we were created by 3 civilizations: Burhad, Selbet and Tumesout. That's why some of our creators are present today. These are the giants (from five to eight meters) who helped build the pyramids for our earthly people. Basically, these are their buildings, and this is exactly what their houses look like there. Therefore, today you can ask questions to a representative of the planet Tumesout, who specially came to go live with Irina and answer your questions.

Maxim : Irina, please tell me his name.

Irina : This is a representative of Tumesout, his name is Klyer Resuf.

Maxim : Klyer Resuf, we have a small tradition: we want to start broadcasts with some very interesting intergalactic news. What is the latest intergalactic news that you know happened in the Galaxy that is significant specifically for your civilization or for the entire Galaxy?

Irina : On one of the terrestrial planets, which is located in the constellation Sagittarius, there is a civilization that is similar in development to your civilization. It is not part of the Interstellar Union, and there has been a war there for the last 52 years. This week the war has entered a decisive phase to end, and its end is already near. One of the groups won and this is exactly the one that is supported by the Interstellar Union. We are watching this war because there are

conflicts due to the fact that the majority wants to join our Union, and the minority that wants to maintain their power resists this. We also had news that in the distant star nebula of the constellation Sagittarius, 58 new stars with planets were discovered, but there are no intelligent creatures on them. Another civilization is preparing to join the Interstellar Union. This is a matter of several years, or maybe even less. There will no longer be 116 of us, but 117. This civilization is in the sphere of influence of Gihor in the constellation Virgo.

08:30 Pyramids on Earth - copies of houses and ships on Tumesout.

Maxim : Pyramids on Earth. Do you know anything about them?

Irina : Yes, these are copies of our houses and ships. Ours are pyramidal in shape.

Maxim : Is this what houses and ships look like on your planet?

Irina : Our ships are made in this shape, and houses and orbital stations are built in the same shape.

09:02 Reasons for adding Tumesout genes when creating humans.

Maxim : Please tell us why we were created and your genes were added?

Irina : The genes of the Burkhadians did not quite match your primates. It was necessary to stabilize the state of proteins, and it was Tumesout that was suitable, since we were close to these primates in some parameters of the protein structure of the brain, some enzymes of the liver and pancreas. The point was in the physical structure, and it was necessary to add a certain number of our genes, but in terms of characteristics they were needed less than those of Burkhad.

10:08 Appearance and age of the Tumesout people.

Maxim : Please describe yourself, what do you look like?

Irina : Height is about four meters, three eighty. In general, they range from five to eight meters, and this is considered average height. But there is less and even more.

Maxim : That is, the average height is from five to eight meters. What does it depend on?

Irina : From age and race. They also have short races there, and there are also tall ones. There are different areas there that resemble our countries. Klyaer is 386 earth years old.

Maxim : How long do Tumesout people live?

Irina : The maximum lifespan is 18-20 thousand Earth years.

Maxim : So, by the standards of Tumesout, you are very young.

Irina : Like you, about 20 years.

11:33 Participation of Tumesout in the development of Cosmoenergetics on Earth.

Maxim : Are you some kind of scientist? What are you doing?

Irina : I am engaged in projecting and directing the energy of some flows in cosmic energy to the Earth. The ancestor of cosmoenergetics is the Gihor civilization, but it contains the energies of almost all civilizations of the Interstellar Union.

Maxim : The cosmic energy channels contain the energy of the Tumesout civilization, and did they also participate in the creation of these channels?

Irina : They are still participating today. These channels were not created once and for all; they continue to be projected continuously as long as they are opened and used by the cosmic energies of your planet.

12:28 Construction of pyramids on Earth and in the solar system.

Maxim : Why were the pyramids built on Earth by you? The question, of course, is about the pyramids in Giza, but, in principle, can it be about pyramids all over the Earth?

Irina : There are pyramids in the solar system not only on Earth: they are on the Moon, on Mars and on the satellites of the gas giant planets. In some places these were the bases of our civilization; in some places on Earth, these were structures through which our specialists taught your contactees in ancient times to build a certain space for life and influence the noosphere of the planet with their thoughts. This can be done by directing your gaze along the edges of the pyramid, with everyone standing around it, above its top. This is how thought forms become stronger.

You also have pyramids on Earth that were made later and that repeated the structures created by their ancestors, under the guidance of Tumesout specialists. There are pyramids that specialists from other planets of the Interstellar Union helped them build, and there are those that people built themselves, but, all the same, according to ancient records or oral stories, because it was not always possible for earthlings to build pyramids with the help of

specialists Interstellar Union. And there are also those that are simply repeated.

Maxim : That is, the pyramids that were built by the earthlings themselves?

Irina : Yes. And there are pyramids, during the construction of which earthlings were helped to move blocks of stones using an anti-gravity beam.

14:55 Contacting in ancient civilizations of the Earth.

Maxim : Please tell me, who were the pharaohs in general: were they people or were they representatives of other civilizations?

Irina : The history of the development of Egyptian civilization, like the history of the development of any other ancient civilization, is connected with the fact that the rulers of these peoples were chosen as contactees. You have Krishna, Jesus Christ, who were already hybrids of earthlings and aliens.

Maxim : Were the pharaohs hybrids?

Irina : Some - yes, like the Chinese emperor, for example, there are some among them.

Maxim : And among them there are hybrids?

Irina : Yes, and this happened in almost all nations of the Earth at different times. Somewhere between 5-7 thousand years ago, this was not considered something unusual, because at that time contacts were much more open than now, for various reasons. Then, by a majority vote of the Interstellar Union, it was decided to transfer contacts to a more hidden phase so that your civilization could follow its own path of development. But we decided to leave contactees who transmitted information, shared it with society, and thus our information would be distributed directly without affecting your development.

16:44 Animals on Tumesout.

Maxim : Do you have vegetation, animals and domestic animals on your planet? Tell me something about your planet.

Irina : Yes, we have vegetation.

Maxim : Do you have dogs?

Irina : Not dogs. They have something similar to a pet monkey. She is smaller in height than us, maybe 1-1.5-2 meters. Dark brown fur, slightly yellowish.

Maxim : Pet – monkey?

Irina : Yes, and they have a tail that curls around objects.

Maxim : How tall are they?

Irina : From one and a half meters to two, i.e. they are smaller than us.

Maxim : We are like pet monkeys for you.

Irina : You have no fur or tail, and most importantly, you are reasonable. The rational Spirit is embodied in you, and for us this is the biggest criterion for how to treat you as equal beings. We always treat other intelligent beings as our equals, because we understand perfectly well that any Spirit from our world can incarnate in yours.

Maxim : So, in a past life I could have previously been incarnated on your planet?

Irina : Yes.

18:45 Meat in the diet of the Tumesout people and its absence among the Burkhad people.

Maxim : Question, do you eat meat?

Irina : Yes, we are omnivores.

Maxim : You are omnivores, do you eat everything? Because Burkhadians do not eat meat: they eat mainly vegetable proteins.

Irina : Yes, but they can eat dairy.

Maxim : Like Eslerites, in principle...

Irina : Yes.

19:26 Illnesses on Tumesout and the conscious decision of the Spirit to leave the body.

Maxim : Do you have diseases on your planet, and if so, how do you deal with them?

Irina : We have physical injuries and there are diseases of organ dystrophy, when a Tumesoutian lives for more than 7 thousand years, then he begins to experience slow organ degeneration. Cells divide for too long, and this causes depletion of the energy apparatus of the cell nucleus. We have special means that can maintain organisms in normal condition. The worst and most unpleasant thing is if dystrophy begins in vital organs or the brain, through which the Spirit manifests itself. This Spirit, understanding what is happening, will decide to leave this body.

20:45 Tumesout contactors on Earth.

Maxim : How many Tumesout contactees are there approximately on Earth now?

Irina : The fact is that our world does not direct as much energy towards contact with earthlings as, for example, Esler, Burkhad or other worlds. Representatives of our world are present on Earth mainly as observers. There are Tumesout bases on Earth, and they monitor the development of civilization, the energy of the planet's noosphere in connection with the transition, at the moment, to a new energy level. Our specialists have less contact with earthlings than others. I know that today Tumesout has about 170 contactees all over the planet. Previously, there were more of them, because such world religious systems of your world as Judaism and Islam were created on the basis of contacts, practically, only with Tumesout.

22:03 Religions created by Tumesout on Earth and the possibility of forming new ones. The essence of religions.

Maxim : Will the Tumesoutians create a new religion? After all, you helped us create the old religions?

Irina : I want to tell you that those old religions that are old to you were new religions to their contemporaries. They always began with one follower-contactee and then spread thanks to his followers throughout the Earth. This is how egregors were formed. As for the formation of a new religion, this issue can be understood in different ways. If we understand by religion those religious forms that exist now, then no. We do not have such a goal, to form a new religion that would include rituals. We believe that there are already enough of these religions on Earth for believers, who can only communicate through the ritual side with God, to meet the needs of these believers.

If we understand religion as a connection with one's inner source, with one's Light, then the word "religion" itself means "connection with the Supreme." We do not form many religions, but on the contrary, we discover the essence of each religion. The essence of every religion is that every person must first make peace with his neighbors, with himself and with God, i.e. build a triple alliance. And only then will he be able to feel this fire in himself, the fiery energy, which is

part of the great Absolute that created this world. In any case, first it is the elimination of negative sources of energy in yourself, and then it is contact with your fire, Light, with your Higher Self.

24:45 Religion and God for the Tumesout people. Three levels of divine reality.

Maxim : You just started talking about the religion that exists among us. Do you have any religion on the planet? What do you believe? How do you develop a new generation in religious or other institutions in order to receive this knowledge?

Irina : Knowledge about God?

Maxim : Yes. Do you have a religion and if so, what is it? What do you believe?

Irina : We believe that there are different levels of manifestation of divine energy, and that each level of divine energy is called “reality”. There is a reality that you call “subjective”, there is an objective reality; There is a material reality, and there is an immaterial - spiritual reality. But all this is a manifestation of divine energies. The center of manifestation of all these divine energies is what you call the “personality of Godhead.” This is not a “personality” in the human understanding, it is such a “superpersonality”. Superpersonality in comparison with personality is like comparing the consciousness of an insect with the consciousness of some scientist on Earth.

As for energies, any person, and by the word “man” I mean a rational incarnate Spirit, including a Tumesoutian, has 3 levels of divine reality if he is incarnate. The first level of divine reality is physical energy, you call it “dense matter,” but it is energy. The second level is the all-pervading power of Light, what moves matter in different forms. The third is the Spirit itself, the mind itself. All these 3 manifestations of divine reality are, in fact, tools for the creation of this reality. Each of you who hears me now is God for yourself and the surrounding reality.

27:55 Explanation of Tolkynai’s strange behavior.

Maxim: The question was about Tolkynai, who raised the question that MidgasCaus showed her an illusion and Mid is a reptilian. There is a complete correspondence between Irina and Tolkynai in our chat on Telegram, where you can clearly understand that they are talking about something completely different, and she does not call Mida a reptilian, but says that they flew to other planets. Why Tolkynai did this, we don’t know, guys. It might be some kind of game, I don't know.

Irina : Many have already written to me that it’s as if Tolkynai confused Mead with Kirchiton.

Maxim : Maybe she confused Mead with Kirchiton. In Kirchiton, indeed, 25% are reptilian genes. Then we tried to call her and sort it out, but she didn’t want to communicate with us and said: “Do what you want, people will figure it out themselves.” Therefore, we will not give any further comments on this matter.

Irina : Yes, I have a correspondence with her, where she wrote immediately the next day after this trip that, indeed, she was in what constellation. As for what Meade looked like, there was no mention of reptilians or a carousel. I in no way assume that she did this out of some malicious intent. MidgasKaus is with us now, he says that since a year has already passed, the memories of that astral journey that took place a year ago can be very approximate, especially if she did not immediately write it down. Her most accurate memories were the next morning, when she first returned. And when a year had already passed, and she had many other astral journeys with her curators - the “beacon”, as she calls him, then these memories could overlap each other, and she, quite sincerely, could believe that it was me.

29:56 Conversion of the Tumesoutian's body into energy after his death. Funeral rite.

Maxim : Tell me, please, how do they bury you?

Irina : Does this mean a burial ceremony?

Maxim : Yes.

Irina : They show me how they lay the body of a deceased person as soon as the energy thread connecting with the Spirit is broken. This spirit communicates what you call a funeral service. Unlike an earthly funeral service, there are people who come into contact with it when it can be known that the body is no longer functioning, that is, it is disconnected from the Spirit.

Maxim : Do they have a whole service that controls the exit of the Spirit from the body?

Irina : Yes. Then this body is placed on a special platform, and a special light is directed at it in such a way that all the atoms from this body begin to pass into this light, decomposing into elementary particles. And elementary particles do not simply turn into radiation: they are absorbed and the energy that is obtained from this body is used for the needs of the planet. He gives his body to the needs of the planet.

32:02 Entities introducing themselves as Ashtar Sheran.

Maxim : The question was about Ashtar Sheran, and I want to answer personally. Many sleepers, in order to gain more subscribers, intimidate you with fears, saying various bad things about Ashtar Sheran. Ashtar Sheran can represent different entities that can be mistaken for the real Ashtar Sheran. There are a lot of sleepers. And each sleeper looks through his own energy structure: looks through levels that are incomprehensible to me, and something else. Ashtar Sheran exists and Ashtar Sheran is the leader of the Interstellar Fleet, which stands on the borders of our Galaxy. We gave you all the information about Ashtar Sheran. And who you believe, the sleepers or us, is up to you personally to choose.

32:55 Sexual relationships and expressions of love on Tumesout.

Maxim : We have already found out how they bury you. The question is very delicate: do you even have sex? How do you reproduce?

Irina : We have developed both the traditional method of sexual reproduction and through apparatus, that is, through a device that copies our body organs. On the planet Tumesout the traditional method is more developed. On colony planets, where you need to quickly increase the population of this colony and start building cities and developing infrastructure, the second method has been developed.

Maxim : On the planet Esler they have sex only for love. And at the same time some chemical processes occur there. Can you do this without love, that is, just to have fun, or in some other way?

Irina : It all depends on how you understand love.

Maxim : I mean love as an instinct expressed in sexual form.

Irina : Do you now mean by the word “love” spiritual love for another person? So is sex possible on Tumesout without this form of love?

Maxim : Yes.

Irina : Yes, it is possible, but not encouraged. In children's educational institutions, boys and girls are told that sexual energy is one of the forms of divine energies that is aimed at creation. Creation cannot take place without spiritual feelings of love, respect and harmony between partners. If sexual energy is directed for the sake of pleasure, then the second chakra is disconnected from the fourth, and this leads to the fact that the energy of creation begins to fade in other areas of life.

35:53 Chakra system on Tumesout.

Maxim : You just raised the question: how many chakras do the Tumesoutians have?

Irina : Eighteen.

Maxim : Compared to our seven, you have eighteen?

Irina : I adhere to the terminology of the Interstellar Union, that each chakra is responsible for one of the astral levels of the planet’s noosphere.

Maxim : So you have 18 astral levels of the planet's noosphere?

Irina : Since you have 7 astral levels, which you express through 7 spectra of colors distinguished by your eye and called the rainbow spectrum. And we have 18 astral levels, and therefore 18 chakras, through which our Spirit manifests itself.

36:39 Birth of earthlings from Tumesoutians, hybrid children.

Maxim : Is it true that the Tumesoutians could once interbreed with our earthly women?

Irina : Yes, we could.

Maxim : And from them children were born who were six-fingered giants.

Irina: He shows me that they have five fingers. Six fingers – this may be some kind of mutation. But there were common hybrid children.

Maxim : Where did these hybrids go?

Irina : After the war 12,000 years ago, due to changed conditions, these tribes began to decrease in size, because there was no longer the composition of the atmosphere, the composition of food and the radiation of the sun that supported such growth.

37:44 The lion as the original image of the Egyptian Sphinx.

Maxim : Please tell me why the Sphinx was built? If pyramids are houses, images of ships, images of energy-informational structures that collect energy, then why was the Sphinx built?

Irina : The Sphinx Leo is a symbol of royal power. Below it was a room - a warehouse for the most important things of this civilization and the attributes of religion. If the aliens transmitted these attributes to contactees, then they took them there.

Maxim : And we don't have a lion's head there, we have a human head on the Sphinx

Irina: But he himself is a lion.

Maxim : What image was originally on the Sphinx? Maybe they changed the image, whether you know about it or not?

Irina : He shows me the mane around the Sphinx. This is more reminiscent of the image of a lion.

Maxim : Originally there was a lion there?

Irina : Yes. And the elongated paws of a lion made of stone.

39:26 The name of the planet Tumesout in one of their dialects.

Maxim : All names are given to Irina in the Daraal language, but what is the internal name of the planet Tumesout?

Irina : In Daraal there is a single language, and in Tumesout there are 12 different languages. I don't know them all. All names are in different dialects.

Maxim : What about your dialect?

Irina : If a Tumesoutian comes from another dialect, he might say something completely different. Daraal has a single language, which is why it is passed on to contactees for ease of communication with other planets.

Maxim : In your dialect, what is the name of the planet?

Irina : Furios.

Maxim : Sounds like Furios.

Irina : No, the Earth is not flat in our perception.

Maxim : Flat Earth supporters have appeared again? When we fly into space, we will understand that the Earth is round.

We have already said about the Sphinx: Irina was shown that it was originally the head of a lion, and, most likely, it was remade to resemble a human face. Probably, as always, they deified one of the pharaohs.

41:16 The reason for the incarnation of Spirits on Earth.

Maxim: Tell me, please, if you were offered to incarnate on Earth, would you incarnate in the body of an earthling?

Irina : I haven't thought about it yet (he thought about it). I would incarnate in the body of an earthling if the spiritual world thought that this would bring a useful experience for my Spirit. What experience is useful on Earth? Basically, those Spirits who need to learn a lesson in humility, patience, and the development of love are incarnated here. That's why most of your religions talk about it. You remember to develop the missing love in yourself. Spirits go where there is hatred.

42:11 Hybrids are Nephilim.

Maxim: Who are the Nephilim?

Irina : In Hebrew, this is what they called the hybrids of Tumesoutians and earthlings - giants.

42:38 Number of children and birth control on Tumesout.

Maxim : How many children can you have during your entire life?

Irina: In our country, the birth process is controlled and depends on what member of society it is. Our society is divided not by class, but by professional activity. And depending on the professional activities of the Tumesout people, their desires, individual characteristics and abilities to give birth and raise children, there can be approximately from five to fifteen children. And then there is a limitation, regardless of the lifespan.

43:41 Monetary system of Tumesout.

Maxim : We have money to buy something. Do you have something like our money to buy ships or do something else? What is your payment system and how are your services paid for?

Irina: Our economic system is not based on monetary payment. There is something like energy batteries with a certain number of charges. It is similar to batteries that contain a certain amount of charge and are located in the body, like chips. About the same as Esler has an electronic payment system. Only there are not units of money, but units of energy that are transferred to each other for payment.

Maxim : That is, this is a semblance of electronic money in some kind of energy formations.

Irina : In the form of impulses.

45:08 The attitude of the Tumesout people towards children as a separate person.

Maxim : Please tell us what surprises you most on our planet?

Irina: I met your planet about a hundred years ago. I didn't just hear about the existence of the Earth, but got acquainted with your society through the data of the Interstellar Union. I myself have been on your planet in a physical body 3 times. I needed this to establish a connection with the lunar base and in order to feel and measure the energies myself for the correct reproduction of the cosmic energy channel.

What surprises me in your world? What surprises me most is the relationship between parents and children. We don't have this, since in our country each child is considered a separate person, who is always asked about his wishes, because they believe that by building a child's life according to the parents' scenario, his will and development will be suppressed. He will not grow up to be a respected member of society.

46:39 Skin color of a Tumesoutian.

Maxim : I understand. Wondering what color your skin is?

Irina : Not quite white, but like the Europeans, like you.

46:53 The ruler of Tumesout Yahweh and his mission on Earth.

Maxim : Tell me, please, do you know who Yahweh is?

Irina : Yes, of course: he was our ruler, religious and political leader. I know that he flew to Earth and established contacts with your planet to form a certain egregor, and then incarnate on Earth. He spoke about this in our world as well.

Maxim : Why do you think we are talking about Yahweh, that he was a bloodthirsty, bloody god for us earthlings.

Irina : Because these people who say so are trying to study the history of their civilization, and specifically the Jewish people and the holy books, through the prism of your contemporary laws.

Maxim : Not taking into account those old laws.

Irina : Not taking into account the reality in which ancient people lived. That is why, by the standards of that time, the laws that Yahweh passed on to Moses were unacceptable for

contact, for example, in your time. Because, firstly, you live in a completely different environment than Moses lived, and you are not faced with these tasks. In your world, killing every intelligent creature in war can only be forced during defense, etc. But at that time, when Moses had to gather his people to create an egregor and incarnate Yahweh on Earth, - at that time both Moses and his successor Joshua had to fight with the surrounding peoples and military, both political and religious methods. Otherwise, Yahweh's mission would be impossible.

Moses was Tumesout's contactee. And Yahweh was a citizen of the planet Tumesout. He was born there, and when he arrived on Earth, he took first Abraham and then his sons as his contactee.

Maxim : Let me remind you that the topic of our broadcast today is “Tumesout Civilization.” We are interested in this civilization. This civilization is part of the Interstellar Union, and it participated in our creation. We were created by 3 civilizations: Burhad, Tumesout and Selbet. Burkhad or another name for the planet is Pikran.

And we found out that Tumesout is Furius.

50:52 Archons are the rulers of demons.

Maxim : Do you know who the archons are?

Irina : This is the name of the sixth level of the spiritual world. Archons are the rulers of those low vibrational spirits called “demons.” How are demons different from angels? Because they do not feel the light and the need to do good within themselves. What does it mean to do good? Act in the interests of Light and development. Without feeling this need within themselves, they begin to feel the need to destroy themselves and those around them. Therefore they go to the demon level. They also have their own ruler, who is called an “archon”, these are also spirits. They can, naturally, be embodied either in plasmoid civilizations, or in humanoid civilizations, or on Earth.

51:57 Angel Metatron.

Maxim : Do you know who Metatron is?

Irina : Angel is a consultant of the twenty-second spiritual level.

Maxim : As a consultant to the spiritual world.

Irina : He is an angel.

52:18 Formation of the Arabic language.

Maxim : Since the Arabic language is close to the dialect of the Tumesout people, didn't the Tumesout people participate in the formation of the Arabic language?

Irina: I would not say that it is close, but there are similar words, probably 30 percent, of those words that Magomed adopted from his curator from Tumesout. Previously there was contact with these people. The Arabic language itself is very ancient, and it was formed on the basis of other Semitic languages, including Hebrew. Initially, Hebrew was a simplified Tumesout, but during its formation many words changed.

53:17 Help for Belarus at the energy level. Collective meditation.

Maxim : The Cassiopeia project does not interfere in politics, so we cannot give advice on what Belarusians should do. Belarus is a very independent country, and I am sure that Belarusians themselves will figure out what to do.

Are you following our news? Do you know about the fact that some revolutions are taking place in our country, shifts in our power structures?

Irina : Are they asking his opinion or mine personally?

Maxim : No, his opinion: what will he recommend?

Irina : What should Belarusians do? We need to remember our Spirit, we need to remember the energy of love for all citizens of Belarus who are drawn into this conflict. Remember that you are not drawn into it by yourself, but that you are being manipulated, creating a certain opinion for you for certain purposes. To break out of this illusion, every resident of Belarus needs to sit down, enter their inner Light and ask themselves: "Who allowed our current president to come to power? Who even allows people to come to power on Earth?" Ask yourself a simple question: "Who established the power? Who is it supported by? If the answer is that negative structures, then ask yourself another question: "At whose will is the heart of our president beating now? In whose hands is his life? And please, I ask each of you, if you believe that your president is negatively affecting your country, I ask you to collectively do a meditation: everyone at the same time direct the energy of all your love from your spiritual hearts to him. And if this is done by at least 70% of the adult population of the country, it will lead to the fact that no low vibrational being will remain at the head of your political egregor.

Maxim : Do you recommend that 70% of Belarusians sit down in meditation and direct their light to Lukashenko?

Irina : The adult population.

Maxim : If he is a demon who destroys the country, then, accordingly, he will not withstand these vibrations and will leave his post, right?

Irina : He will not necessarily leave, disembodied, but simply will not be able to stay in these high vibrations. The egregor will be built in such a way that if it actually brings harm to the egregor, and the entire people will emit high vibrations, then the political egregor will also become high-vibration. And the president is a key figure in the political egregor. If any country is led by a low-vibration spirit, it is only because it reflects the average level of its country.

59:05 Basic conditions for open contact between earthlings and aliens.

Maxim : What will be the first civilization to come into open contact with us?

Irina : When you are ready, when you fulfill all the conditions, and then it will be open contact.

Maxim : Let's remind you what conditions are needed in order for people to start more or less open contact with us.

Irina : You need to fulfill 3 main conditions, and the rest will follow them progressively. Then others will be built, for example, fairer laws for treating people, etc. But the most important conditions are 3, and they all relate to respect for the life of a sentient being. The first is the absence of organized military action on your entire planet for five years. I don't mean individual criminals now. I now mean only open, organized military clashes for any purpose: even for economic purposes, even for religious purposes, etc. It is necessary not to commit organized military actions involving the killing of intelligent beings for 5 years. The second condition is the abolition of all types of death penalty on Earth. What is the death penalty, and how does it differ from defensive murder, for example? Defensive killing is when there is one who attacks with a weapon, and one who, defending himself, kills him. The death penalty is when a helpless, unarmed criminal is deprived of his life. You do not take into account that if you take the life of a criminal, then his Spirit will still remain alive, and not having received the opportunity to change, he will then still incarnate in your own world, which did not accept him, i.e. The spirit of this criminal. Therefore, it is necessary to abolish all death penalties, and replace terrible crimes against life and health with long terms of imprisonment with physical labor, so that the criminal can realize until the end of his incarnation what he has done and come out of it, raising his vibrations. The third condition is the repeal of all laws that allow women to kill their unborn children in the womb. Now I'm not talking about killing children because of medical contraindications, but only because of personal desire, if everything is in order with health.

Maxim : In principle, if we comply with 3 basic conditions, then contact will take place. Who will be the first to contact us?

Irina : We have those who are at the bases. If you are ready, then your noosphere will be monitored: how ready your consciousness is, how much you accept the ideas of alien life. Another condition there is, for example, stopping the creation of a negative image of aliens in your media. If everything is in order, then those who are at the bases will fly in - these are representatives of Burkhad, Tumesout, Esler, Tikht. Who will be at the bases, including on the Moon. You have one of our bases in Crimea.

Maxim : Thank you all for the broadcast, thank you for the questions.

Irina : Hello everyone from our interstellar friends: LiShioni and MidgasKaus. They send the light of their love to you all.

Participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Maxim Rusan – head of the Center for Spiritual Development “Cassiopeia”;

Klyer Resuf is a cosmoenergeticist, a representative of the planet Tumesout.

Video in text

#133 Live broadcast 08/30/2020. Life on planet Burkhad. Materialism and spirituality. What is a miracle?

---

https://blog.cassiopeia.center/zhizn-na-planete-burhad-materializm-i-duhovnost
https://www.youtube.com/watch?v=AN8wtNWc2h4

3:50 Calculation of the Spiritual level of development.

Maxim: I greet everyone. Today we have planet Burhad. But before we start asking about the planet Burkhad - the planet of one of our creators, I want to share the news that on Instagram we now have the opportunity for everyone to calculate their level of spiritual development when incarnating @cassiopeia_level. The link will be in the description under the video and in the comments.

05:12 Curator of Irina Zaliatar (aka Vanga’s curator).

Irina: The representative of the planet Burkhad Raom Tiyan, LiShioni from the planet Shimor

and MidgasKaus are also present here. And we are still waiting for another representative of the civilization of the Galactic Federation of Light, who promised to try to be here with us.

Maxim: This is one of Vanga's curators. He deals with travel to the Spiritual world and the approximate ability to predict the future future. But we haven't tried or done this yet. Therefore, we have this curator and in the future we will build this work with him.

Irina: I only met him today. MidgasKaus took me on an astral journey to his planet today. This was the Pleiades cluster. I was present there. There were three suns. They are all almost the same white color and have a very cloudy atmosphere. I met a representative of this planet there. He works there as a futurologist and bioenergetics specialist.

06:46 Saving earthlings from dark forces.

Maxim: They ask, when will they arrive and save us from the dark forces on this planet? Guys, we can save ourselves from the dark forces on our planet. Only themselves. No one will come and save us, only if we begin to destroy ourselves. Which is basically what we are already doing at the moment. While there is an opportunity to pull yourself together and adjust your mental images.

Today's topic is the planet Burhad. You can ask how they live there, what they look like, what they eat, what kind of entertainment there is. What kind of work do they have? Today the topic of the broadcast is the civilization of the planet Burkhad. The name of this planet is Picran.

08:26 What is the social system on planet Burkhad?

Raom Tiyan answers : This is very similar to your democracy. That is, elections are taking place there. This planet is divided into 58 districts. What are your regions like? They have their own dialects, their own public councils, and all this is governed by a Duma similar to yours. She makes laws. In this Duma, at least half of the participants are from the Interstellar Union who work there. And there is also a law on Burkhad that in the socio-political structure of the planet they have the right to enter the work of managing the planet from other planets of the Interstellar Union. We have an open system. That is, from any planet they can come to work for us on Burkhad in order to manage our politics.

10:02 The number of alien ships shot down by earthlings in 2019-2020. and the reaction of the Galaxy Security Service to this.

Maxim: Raom Tiyan, please tell us what is the latest news in the Interstellar Union? Maybe some kind of discovery?

Irina: Mead says that she is one of the most discussed in the Galaxy and the news concerns your planet directly. The Galactic Security Service has released information for all residents of the Galaxy and for all residents of the Interstellar Union about the number of dead alien specialists on Earth. Specifically, over the past earthly year, 58 devices were destroyed. This

does not count as loss due to natural causes. 23 of them were with pilots. The rest were drones. This is one of the most talked about news in the Galaxy because the security team made it public. These are the statistics. I want to say that the trend has decreased, because last year it was 114. Mostly those who come under fire are those who are new to your planet. Not Burhad, not Tumesout, not Esler, but tourist groups from other planets. In our information space, different opinions are expressed on this matter. Including the advisability of physical contacts in general. Because it happens that specialists expose themselves to unjustified risks, although they have already been warned many times. And one more news related to this. The Interstellar Union will put it to a public vote, including for specialists working in deep space (for Burkhad, your Earth belongs to deep space). The question of the advisability of physical contacts at least in the next 5 years will be raised. Why is this happening? Not because your earthlings have become particularly aggressive. You just have more technology. Our ships are better identified.

Maxim: Raom Tiyan, can you tell me if any of your aircraft were shot down in the last month?

Irina: As far as I remember the statistics, I looked at them about two days ago, this is about 7-8 devices.

13:42 How do alien ships camouflage themselves in order to be invisible to the eyes of an earthling?

Maxim: We have news that appeared on the Internet that a young man found a piece of some glass, and through this glass alien devices are supposedly visible. Can this even happen?

Irina: He says: “We have such devices. First I'll tell you why you can see through them. Some alien ships (not all) have a cloaking device. Because the eyes of an earthling perceive information only in a certain spectrum. And when the ship is surrounded by a field that changes the spectrum of perception and masks it, then the earthling will see with his own eyes just an empty space. But there are devices that can detect it. But it's not a piece of glass, it's like a screen. Like our tablet, only it unfolds (with his hands he shows how a book opens). Theoretically, such devices are possible. It just looks like it should be a piece of glass. And inside it there must be certain microcircuits like a grid, which convert this radiation spectrum back into visible. It can be done. Purely technically there is nothing complicated here. They may not even be visible to the earthly eye. They, for example, (shows the internal structure of glass) penetrate between the molecules. This is called an intermolecular neutron network. We and many planets, even those that are not part of the Interstellar Union, have such technologies.

16:09 What is the 26th sector of the Galaxy, who created it and why?

Maxim: Please tell me we won’t show this sign now, Irina saw this sign. Can you describe to us the sign that was sent to us? And what could this sign mean?

Irina: As Irina showed me, this is very reminiscent of the sign of one of the coalitions of the Galactic Federation of Light, which is responsible for protecting the 26th sector of the Galaxy from space pirates. These are the internal forces of the Galactic Federation of Light. The 26th sector of the Galaxy is closer to the center of the Galaxy than you. It was created by the

Pleiadians, that is, the Galactic Federation of Light. But absolutely any civilizations can enter there under an agreement, even those not from our Galaxy.

17:52 Flora and fauna of the planet Burkhad.

Maxim: Regarding Burkhad. What is the nature like in Burkhad?

Irina: On Burkhad there is a diverse animal, plant and microbiological world, but the flora and fauna are somewhat poorer than on Earth, because we have more diversity among the tree world, rather than among herbs. We have many trees, various forests exist. We have large oceans. There are three large oceans on our planet. At the bottom of these oceans we have a type of algae that you would call wood algae. There are even forests growing on the ocean shore that bear fruit quite well. These trees feed on seabed minerals and water, with nutrients dissolved in it they process with special organs that are located in the stem. They are processed to produce edible fruits. They don't even need photosynthesis because they are at great depths.

19:08 Pets of Burkhadians.

Maxim: Do you have any pets?

Irina: Yes, we have cats like yours, only they are bigger and white. With white skin and very short hair. Ears, eyes - everything looks like your cats. This is a pet. We have no equivalent to a dog. We have similar analogues, but they are wild.

19:36 Nutrition and method of reproduction on the planet Burkhad. Natural evolution of the Burkhadians

Maxim: What do you eat?

Irina: We eat plant foods.

Maxim: So you don’t consume animal proteins?

Irina: Only milk. We are mammals.

Maxim: I see. What about poultry and animal meat?

Irina: No. We don't have the necessary enzymes. We evolved from herbivorous primates like yours.

Maxim: It turns out that you yourself evolved? Aren't you hybrids?

Irina: We ourselves, yes. Natural evolution. We are not hybrids.

Maxim: How long did the evolution process take you?

Irina: From the moment you realized yourself as the first Burkhadian, as it was described in the chronicles, until the present time? Around 24 million years.

Maxim: How do you reproduce?

Irina: Exactly the same method as yours. Man Woman. Sexual reproduction. We have a somewhat limited birth rate, but this is only in Burkhad and does not apply to the colonies.

20:54 Population in Burkhad.

Maxim: How many of you are already on Burkhad?

Irina: Now it’s about 27 billion.

Maxim: Do you have enough food?

Irina: We have, as I already said, plantations in the ocean. Our oceanology is very developed. I have a lot of friends who are oceanographers who are developing ways to grow on the ocean floor. We also grow edible algae on the surface in special multi-tiered plantations. Our people work there, and there are robots. There are few people and many robots who collect it all. Previously, all this was not automated. Plantations appeared a long time ago, even before space exploration. That is, our main food is mainly algae. Especially for the majority of the population who do not fly into space and do not have the opportunity to buy a variety of food. They come in different colors. The fruit of a tree that grows underwater. And you can also buy milk from local tree-climbing animals, like our squirrels, only a little larger.

Maxim: What are these animals called in Pikran?

Irina: Lyahroomi.

22:44 How many suns are there on the planet Pikran (Burkhad)?

Maxim: How many suns do you have on planet Pikran?

Irina: One. But there is one large star that comes close once every 52 years, it is like a second sun, but it is much smaller.

23:20 Jesus and God.

Maxim: We have already said many times that Jesus is on Burkhad. Why exactly on Burkhad?

Irina: Because (I think so) his physical dad is from Burkhad. And he himself, even when he was a child on Earth, as a teenager, physically, as I already said, was a contactee and visited our planet. And so he decided to return to Burkhad, where conditions had already been created for him. Moreover, representatives of Burkhad and Tumesout, Tumesout are Burkhad's closest partner in the Interstellar Union and in the creation of people. They have many joint projects besides Earth; they worked together on a Christian egregor. Therefore, he decided to settle there.

24:24 Crime in Burkhad.

Maxim: Is there crime on the planet Burkhad?

Irina: Violation of laws does happen on the planet, but it's rare.

Maxim: What do you do with criminals?

Irina: It depends on what law you broke. We have different laws.

Maxim: Let's say he violated something minor. Stole something, for example.

Irina: If he stole, he must compensate the person from whom he stole the value of the stolen goods and pay the state a fine, usually in the same amount. Because it ensures the work of law enforcement agencies. To put it simply, he himself gives money to catch himself in the future.

25:20 Symbol Gods.

Maxim: Does Burkhad have his own symbol or sign?

Irina: Now he's showing me about two triangles. It is voluminous and rotates. On top it is somewhat more violet-silver, and below it is yellowish-silver.

26:01 Monetary system in Burkhad.

Maxim: Do you have any money there?

Irina: Yes, there is.

Maxim: And what can you afford to buy with this money?

Irina: We have different forms of property: private property, public property, property of the planet and property of the Interstellar Union. We have production of goods. As I already said, we spend little of the planet's productive forces on the food industry, because our people are used to being content with what they have. They have no particular desire for a variety of dishes. They eat to maintain their bodies, and not to experience the taste. We have it, but it's not nearly as developed as yours.

27:05 Love in Burkhadi language.

Maxim: How can you convey the word Love through Irina in Burkhadian?

Irina: Something between "oynilat" and "aynilat".

Maxim: Is it possible to get a job with the Burkhadians?

Irina: Yes, when you incarnate on Burkhad.

Maxim: Can the incarnation on Burkhad be considered a paradise for an earthling?

Irina: Heaven is not incarnation on the planet and not even being in the spiritual world or the material world. Heaven is the state of your own Spirit. Wherever a saint comes, there he makes heaven, and wherever a sinner comes, there he makes hell.

Maxim: Why don't Burkhadians have the opportunity to buy a variety of food?

Irina: Not everyone has the opportunity, because there are 27 billion of us. And everyone lives and works in different conditions. Many generally work in space for months on earth, where food is not in tubes, like your astronauts, but it is still quite monotonous. Certain types of

microorganisms synthesize such protein balls. A lot of food taken into outer space or a lot of plants that produce fruits reduces the space for scientific equipment. They deliberately do this themselves. We have quite a lot of such scientists.

29:40 Rasi na Burkhade.

Maxim: Tell me, are there different races of different skin colors and different heights on Burkhad?

Irina: We only have different dialects **.** Sometimes dialects are very different in different places on the planet, even like a different language. We have one state. Different languages and dialects are a legacy of the separateness of countries. We have united, we have districts.

We have no differences in skin color, we have no differences in hair color. On various colonies, there may already be people with a different hair color, with a darker skin color. These are colonies. But in Burkhad we have one race.

31:15 Paranormal abilities on Burkhad.

Maxim: Do Burkhadians have paranormal abilities: telepathy, teleportation, telekinesis?

Irina: If they want, they can learn. There are special schools. With us it is like now the sciences about man, humanoid. This is what you call anthropology. If you want, you can learn this, but not everyone does it, not everyone is interested in it. Everyone has their own tasks.

32:03 What are miracles?

Maxim: Do you have such a concept as miracles, and what do you call miracles?

Irina: Yes. I was just reading information from the contactee that a miracle on earth is considered a violation of the laws of nature, known to the one who calls it a miracle. For us, a miracle has nothing to do with violating the laws of nature. Because we know that a law of nature can only be violated by another law of nature, which is unknown. But for us, a miracle is considered to be something that is an unknown secret for one or another Spirit. And when he recognizes her, it's a miracle for him. That is, the discovery of a new world. And the main miracle is that this material world is also part of the God whom unbelievers reject.

33:57 The existence of communities larger than the Interstellar Union. Intergalactic Union.

Maxim: Is the Interstellar Union part of some larger Intergalactic community?

Irina: Yes, it is a member of the Intergalactic Union. There is also the Intergalactic Union.

34:13 Change of power in a society dissatisfied with its rulers - how it works from the point of view of the laws of the Universe.

Maxim: Should we fight our government that enslaved us?

Irina: We need to fight not with the government, but with the ideas that brought this government to power. With ideology. Government is only a consequence. These are living people who are in power. But the reason for the appearance of these particular people is in the egregors and ideology of your society, which spread long before their birth. To fight this ideology, you must first understand what its main idea is on Earth at this moment. Mirah Count has already spoken about this, that the main ideas in society that lead to rulers who humiliate your dignity and pass unjust laws are in the materialism of perception. This means that you bring to power, your mutual mental energies bring to power precisely such materialists who direct all their consciousness, all their strength to ensuring their material well-being, and not to the well-being of you and your world. This is a consequence of materialism. This means that materialistic ideas need to be changed. Until you change them, all the riots and all the revolutions in society will not last long, because these same materialists will still come to power. The ideology itself will lead them there. It can't be any other way. This is the law. The law of the Universe, the law of God. And when you change the materialism of perception to the spirituality of perception, by which I mean the recognition of the material world as only a small part of the Spiritual. When you recognize the Spiritual world not as your imagination, which does not concern anyone, but as a direct flow that influences the entire material world. When not just a few people admit this, two or three out of a hundred people, and not even 20-30 out of a hundred, but at least 60-70 people out of a hundred, that is, when they become the majority, then these egregors will begin to change. But this process is not instantaneous. Several earthly months must pass. At least 90 days of thoughts like this for more than half of the people, then the egregors will begin to change and be cleansed. Thus, the low vibrational rulers will leave if they cannot adapt to these changes and become high vibrational, they will be displaced in many ways, even in very harsh ways. There may be different things depending on the karma of this ruler.

Maxim: That is, by condemning the government, we only further support the possibility of its existence.

Irina: What is condemnation? This is energy aimed at humiliating another. The one who judges becomes taller than the one he condemns. He doesn’t try to understand him, he tries to remake him to fit his picture of the world. At the same time, remake it not just neutrally, but becoming higher than it. It's called passing judgment. This is what you call talking not about a person’s actions, but about the fact that he is this way by nature. Condemnation releases energy. This is only a consequence of condemnation. And condemnation is an action. It is generated by a variety of negative emotions: anger, fear, despondency. Mainly with anger, of course, and irritation. Irritation and anger, being negative emotions directed at the ruler, are directed into the political egregore of this country. They are these thoughts that form the image of such a future ruler. Even if the current ruler is removed, the energy of anger itself will not go away. She can, of course, leave. But this takes time. And if people do not change and continue to condemn power structures, then this egregor will only strengthen. This is very similar to the formation of a larva, only in the egregorial sense. And this egregorial larva, which can be called an egregorial phantom, for example, it attracts exactly the kind of low-vibration entity that was condemned to the place of the ruler. Because the vibrations of his egregor are low. And he will simply hinder the high Spirit who wants to come in his place. These are well-known

energy policy laws. Many residents of the Galaxy believe that in those institutes on Earth where your political scientists and deputies are taught, energy laws of management are studied. How else? We study this in families.

40:37 Rich and poor in Burkhad.

Maxim: Are there rich and poor on the planet?

Irina: There are those who have more money, and there are those who have less money. And if you can call them rich and poor, then yes, of course, there are. Everyone cannot have the same means. Everyone is different and has different needs and ideas about where to spend their money.

41:07 Chakra system of the inhabitants of Burkhad.

Maxim: How many main chakras do you have? We have seven, what about you?

Irina: They have 28, she says. They are located not only along the spine. The centers are manifested differently, not just where the spine is.

41:37 The second coming of Christ.

Maxim: How is Jesus feeling on Burkhad, and when will he fly back to us?

Irina: Mirakh Count visits him. I've never been to see him. He lives on an island. I didn't go to see him. I spend little time in Burkhad now. For example, now I am in the constellation Pegasus, exploring one planet, together with specialists from the planet Sho-Hariki (insectoids). Its energy security, its biosphere so that specialists from Sho-Hariki could create their own colony there. And I help them with this. But not only me, but also those specialists from the Interstellar Union whom they invited. Now I am on the surface of this planet, under the dome. As for Christ, Mirach Count visits him. About two earthly months ago I met him. And he told me that Jesus Christ feels great, and he hopes that the changes that were initiated by the Interstellar Union through contactees will still happen, and the Earth will raise its vibrations. Which will allow you to consciously enter the Interstellar Union.

43:20 Place of Jesus' crucifixion.

Maxim: Do you know where Jesus was crucified in Jerusalem or Istanbul?

Irina: In Jerusalem. There was no name for the city of Istanbul yet. There was a city, but it was smaller.

43:38 Religion in Burkhad.

Maxim: What is the religion in Burkhad?

Irina: We don't have a religion and a system of rituals like you do. Our religion is our set of laws: scientific, social, civil, which reflect spiritual knowledge in different spheres of life of the incarnate Spirit. This is our religion.

44:10 Lifespan of Burkhadians.

Maxim: What is your life expectancy?

Irina: It is very variable. You can live a short life, approximately 700 - 1200 years. In some cases, it can be extended to 10,000 - 15,000 years, when the embodied Essence realizes the need for its presence on Burkhad for such a long period. We have methods for this. And of course, if the Higher Self of this Spirit and its spiritual guides agree with this.

44:51 State provision in Burkhad (pensioners).

Maxim: Do you have such a concept as pensioners?

Irina: Yes, of course we have such a concept. State provision for those who have already worked for the good of society and are now engaged in their spiritual development, knowledge of the material world and are moving away from work to take care of themselves. There are special formulas for calculating state support for such humanoids. Through contactees, I became acquainted with a similar practice here, in particular in Russia, and found it to be somewhat contradictory. Our formula for calculating state provision is simple and accessible to everyone. Everyone can find out and calculate how much pension they will receive in the future if they have worked in a certain job for a certain amount of time. We don't have any confusion related to this. All this is clear and transparent for every resident of Burhad. Because our government and public councils of Burhad are not interested in any deception or, especially, concealment of funds. They understand perfectly well - according to the law of energy management (they know it well) that if they unfairly offend in the financial equivalent of some resident of Burhad, then perhaps his negative message of offense directed towards them will reduce their ability to think clearly, for example, feel good. This will reduce the vibration of their aura.

47:19 Potential recovery of Venus and Mars.

Maxim: Can Burkhad oblige Selbet to restore Venus and Mars?

Irina: If it were necessary to restore Venus and Mars for the inhabitants of the Earth, then we would not oblige Selbet to do this. We would do this ourselves. We have bases there, but they

are below the surface. It wouldn't take that long. 50 years for Mars and 120 years for Venus using our technologies. We do not need the body formation of these planets yet. There must be reasons for this. What can push us to do this and direct our resources and the resources of our workers to this work? If we see that the Earth has entered the Interstellar Union, that is, open contact has begun, but at the same time, the birth rate has increased so much that it has become difficult for earthly civilization to remain and develop on Earth. In this case, we, together with earthly scientists, are ready to do this.

48:49 Gestation period in Burkhad.

Maxim: How long does it take a woman to bear a child?

Irina: 18 earthly months.

48:59 Degradation of the Spirit.

Maxim: Can Spirits degrade when they incarnate into your bodies on your planet?

Irina: Well, of course, they can degrade on any planet, just as they can develop on any planet. Everything depends on their awareness, on their light, love, on their choice. Our incarnation in Burkhad is not a guarantee of growth. Everything depends on you. Incarnation in a cruel world is a chance to overcome this cruelty. But at the same time, incarnation in a peace-loving society is fraught with such danger that you will become so accustomed to living in it that you will not want to develop, everything will be done for you. Such a danger, if not realized, certainly exists. And the one who is reasonable and wise will turn any circumstances to his own benefit.

49:55 Does Jesus Christ have children?

Maxim: Raom Tiyan, tell me, was Jesus married to Mary and did they have children?

Irina: According to information from the Interstellar Union, which I myself became acquainted with, Jesus Christ did not have sexual relations with women and did not have his own children on Earth. Those children he met from other men and women, he treated them as his own.

50:22 Showing love on Burkhad.

Maxim: If you have kisses and hugs?

Irina: Yes, of course. Moreover, they are accepted not only between close men and women. We also do this with our friends. This is a sign of attention, a manifestation of love, an

exchange of energies.

50:41 Contactees of Burkhad on planet Earth.

Maxim: Do you have many contactees on planet Earth, physical and non-physical?

Irina: We have physical contactees, if we take all the groups that exist on planet Earth, then there may be somewhere around 270. And about 1200 non-physical ones.

51:13 Method of communication on Burkhad.

Maxim: Do you have something like our phones, tablets? How do you keep in touch with each other?

Irina: We have different devices. There are like phones with video communication. There are devices implanted into the body, but not for everyone who wants it. By influencing the retina of the eye, they create such a picture before the eyes. Two silver wires are implanted here (points to his temples).

52:00 Chipping on Burkhad.

Maxim: Are Burkhad residents microchipped? Is there such a thing as chipping?

Irina: If by the term chip we mean a microdevice, then we have it. We have developed this technology, as well as throughout the Interstellar Union, but the meanings of the chips are completely different. There are paid ones, you can buy them as your devices. It depends on what for. And if you are wondering whether we have to do this, no. It's not obligatory. I know that microchips are introduced into Esler for documentary identification of individuals. We had this stage on the planet, but then now we identify not by microdevices implanted into the body, even the most microscopic, but by the DNA of the individual proteins of the organism itself.

No microchips, even the most micro-micro, are as reliable as human proteins themselves. It is no longer possible to fake them, break them, or expose them to some kind of radiation that will erase information. Proteins are unchangeable. Even those mutations in DNA cells that can occur, they are all predicted, and this can be quickly calculated.

53:48 Number of Burkhad bases on Earth.

Maxim: Do you have many bases on Earth?

Irina: Exactly thirty-two Burkhad ones. The thirty-third is under construction.

Maxim: Does Jesus Christ participate in public life in Burkhad?

Irina: Politically, no. He's not a politician there.

54:13 Family of Yahweh.

Maxim: And when Jesus Christ was incarnated in Yahweh on Tumesout, was he married?

Irina: Yes, he had a wife and children. I heard about this from Mirah Count. I did not talk with the Tumesout people, but Mirakh Count talked about it. During the period of the formation of the Christian egregor, they had a reason to talk about it and get to know each other better.

54:46 Waiting for the return of Jesus Christ.

Maxim: When will Jesus finally fly to Earth?

Irina: Jesus Christ plans to fly to Earth in order to help you enter the Interstellar Union when mass contact has already become a reality. If he flies to Earth now in that state of the noosphere and in that state of consciousness of people, then this will not lead to entry into the Interstellar Union, because here the religious groups dedicated to the name of Christ that exist now may, firstly, not accept him , and secondly, those who accept may begin to quarrel among themselves and project even more negativity. Because there is no awareness of the perception that the same Truth can be expressed in different words and with different subtext. You have too many religious and political disputes. It doesn't fit his vibration yet. And when he comes, he won’t tell anyone this, not because he himself doesn’t know. He roughly guesses when he might come, but he believes that if this date becomes known to earthlings or even to us on Burkhad, it could disrupt the development of your civilization. Because you will begin to prepare for his arrival not in a natural way, but artificially, in order to better meet him. And you should develop naturally, without waiting for anyone. It will be more beneficial.

56:56 How many strands of DNA do Burkhadians have?

Maxim: How many strands of DNA do Burkhadians have?

Irina: Since we have a different enzymatic system that ensures the cohesion of DNA strands, we have four of them.

57:14 Planet Vamphim (Silavia).

Maxim: Raom Tiyan, do you know anything about the planet Vamfim, and do you have contact with them?

Irina: I heard from MidcasCaus and from representatives of the planet Esler that this is the name of one planet that is located in the Arcturus system. In Pikran it is called differently: Silamia or Silavia. We have contacts with it, but no more than with another world of the Interstellar Union. Personally, I have never been there. We have political, social and scientific workers who fly there. This is a separate group of people on our public space communications council.

58:29 About Seraphim of Sarov. Archangel Michael.

Maxim: Who was Seraphim of Sarov? Will he come to Earth?

Irina: He is now a disembodied Spirit. It is located in the Christian egregor. He is one of its main guardians. Moreover, he is the Spirit Angel from the Spiritual World who is responsible specifically for planet Earth. For all those embodied. He is the curator of the Earth. In the Christian egregor this is Archangel Michael.

Maxim: Seraphim of Sarov is Archangel Michael?

Irina: Yes.

Maxim: Does Archangel Michael plan to incarnate on Earth?

Irina: Yes. I didn't interact with him much. You can ask him a question. If you want, I will take the contactee to the astral plane, to the Christian egregor.

59:56 Is there homosexuality in Burkhad?

Maxim: Do Burkhadians have homosexuals?

Irina: No, I haven’t heard of that. It's impossible for us. Since childhood, we have been taught what sexual energy is and how to properly direct it and control it. We are not controlled by instincts and desires, we are controlled by the spiritual mind. Sexual energy manifests itself through the instinct of reproduction and, among other things, through sexual desire. And homosexuality is a focus on the body of the same sex from the experience of a past life. Even in childhood, the child will tell his parents about this. And his parents will explain to him that he lived in a previous body, and will teach him to communicate with the Higher Self, and through his Higher Self he will harmonize this moment.

1:02:00 Address by Raom Tiyan to the inhabitants of planet Earth.

Maxim: Raom Tiyan, we are running out of time. I would like to hear from you any wishes or

parting words for our Earth and the earthlings on it.

Irina: I greet you, dear earthlings, who are watching me now, and who will watch me in the future. Any meetings, even through astral travel, are not accidental. I now feel a huge responsibility, like the contactee, for every word I say. And I want to tell you that, despite the information about earthlings that I recently became acquainted with, despite all this, I still love you. I and all Burkhadians express our love to you. All the inhabitants of the galaxy who lost their loved ones as a result of the hostilities of earthlings do not hold a grudge against you. They understand that you are doing this unconsciously.

I want to wish you one thing: that you never be afraid of anything, because fear weakens your defense against any external force. Before any aggression, be it physical, intellectual or moral aggression. Fear drives you into the cage of your own prejudices. And only confidence, courage and love can turn on the creative light of your Spirit, so that in this light you can clearly see how to act for the benefit of yourself and those around you. I thank you all, dear friends, and send you the light of my love.

Maxim : This is where we end the live broadcast, we will try to go live every Sunday. From September 18 to 25 – retreat in Loo. Then School begins. You can read information about training on social networks. See you!

Participants:

Irina Podzorova (contactor with extraterrestrial civilizations);

Maxim Rusan (director of the Cassiopeia project);

curator of MidgasCaus (representative of the planet Esler, biologist, psychologist and specialist in alien civilizations);

LiShioni (representative of the planet Shimor, specialist in the astral world and its interaction with the material world);

Raom Tiyan (representative of the planet Burhad, specialist in energy interactions in the material world).

#134 Sex with a reptilian. Sodom

and Gomorrah. Kundalini. Tantra. The Last Centaur.

https://blog.cassiopeia.center/seks-s-reptiloidom-sodom-i-gomorra
https://www.youtube.com/watch?v=sT9B46Cy2fQ

00:00 Vladimir: Today we are discussing a topic related to sexual relations with representatives of the Interstellar Union. As it turned out, many inhabitants of planet Earth not only want to join the Interstellar Union, but also want full-fledged sublime sex. And this is not surprising, and today we want to discuss this topic with those who know more about it than us, that is, with the Interstellar Union.

Maria: Hello, my name is Maria Sokalski, Wiesbaden, Germany. I am a member of the Cassiopeia team, a friend of Irina, Volodya and Maxim, and I am glad to take part in our conference today.

Irina: Hello, dear friends, Maria and Vladimir! Today we have two representatives of Disaru with us - this is one of the sons of Saint Germain - Lugder Otpis, he is 110 years old, he has a family with 5 wives. And one of Saint Germain's wives, whose name is Laursi, and she is 352 earth years old.

02:41 The place of sex in the life of aliens. Sexual relationships are a sacrament of two.

Maria: At all times in human history, sex has occupied a very important place. What place does this area occupy in your society? How freely and openly can you talk about this topic?

Irina: Lugder answers: I am still a relatively young representative of my civilization, but what I see in my society suggests that it is not forbidden to talk about this topic, but it is also not customary to show your intimate relationships to everyone, because it is a sacrament two people. Precisely sexual relations. This does not represent any awkwardness, it just would not occur to anyone to discuss it in society. This is an intimate matter between two partners, and it is not customary for anyone to talk about it without the consent of the second partner.

03:58 “Forbidden Fruit” - explanation of the original image. Pregnancy and children in Eden.

Vladimir: When did people first created by aliens in the Garden of Eden have sex? Was there sex between couples when there were 18 people? And did the first sex have anything to do with eating that forbidden fruit of the Burkhad Khorol plant?

Irina: Tumesout plant. The later interpretation of your scripture in the sexological sense, that the knowledge of good and evil had to do with sex, was much later. This was the influence of plasmoid civilizations on those contactees who interpreted it this way. For them, sex was not

necessary and was an obstacle to contacts with contactees, because for plasmoids it was a useless waste of energy that could have been used for contacts. They neglect sex between people and other material beings.

Regarding the events of that time, the first sexual contacts began when people's bodies grew to the point of puberty. This is also reflected in the Bible, because... The words of God spoken to Adam and Eve - be fruitful and multiply, and fill the Earth - were spoken even before eating the fruit. And it is impossible to be fruitful and multiply without sex. This means that it was permitted and even prescribed according to the commandment even before eating the fruit.

Vladimir: So, there was the conception of children and pregnancy in paradise?

Irina: Yes. They already had children when a group of several adults ate this fruit. People at this base lived separately, but could walk.

06:45 Origins of sexual characteristics among earthlings. Consequences of further mixing with aliens.

Maria: What sexual characteristics in physiology, energy and genetics have we inherited from all 4 races that make up our genes and possible subsequent mixing with other alien civilizations?

Irina: If we talk about the physical body, then you received the most genetics from an earthly primate - 45%. And all the genes responsible for sexual desire, etc., are mainly recorded in primates. As for the Burkhadians and Tumesoutians, they only influence this indirectly, because they are also warm-blooded mammals, and their sexual behavior is very similar. What the Selbet people repent of is that they are different - they are oviparous, their sexual behavior is different, and fertilization occurs differently. They don't have the same organs that humans have. We did not inherit their physiology. In the form of energy, we have the traits of Selbet people - activity, love of competition, victory, manifestation of the power instinct. The sexual instinct can be combined with the instinct of power. A person has 5 basic instincts, and how one or another instinct manifests itself in a particular person depends on many things.

09:47 The idea of the creators of Earthly civilization: human sexuality, attracting spirits to incarnate with parents, the power of the Spirit over instincts.

Vladimir: Is there any difference between what our sexuality is like today in general and what it should have been like according to the plan of our creators at the time of creation?

Irina: By sexuality do you mean a form of sexual behavior?

Vladimir: And the form of sexual behavior, and the attitude towards sex, and absolutely all the physical aspects of this. For example, a variety of positions and so on.

Irina: How did the creators see this process in people? As intelligent spirits embodied in bodies, they, in addition to physiology, also carry with them a spiritual nature from the Spiritual world. The spiritual nature of any rational being as a child of God is inseparable from moral values. Therefore, according to the plan of all representatives of the Interstellar Union, the manifestation of instinctive nature is good and correct only if the Spirit controls its manifestation with its mind and feelings. That is, it puts you in the right direction in order to manifest the energy of love for yourself, your partner and God. This is the only way vibrations increase, since when a man and a woman come into contact, the aura completely merges, and higher vibrational spirits are attracted to incarnation. This is how they wanted to see the sexual life of your planet, what they have in the Interstellar Union. The concept of sex is inseparable from the concept of the Spirit. When looking for a partner, the first place is not the search for a new sensual experience of pleasure, although this is also important, but the first place is the contact of souls. What you mentioned about positions is discussed between two people when they are in a state of partnership. You call it marriage, but we don't have such forms. If two people live together, lead a joint household, then they enter into sexual contact (with positions, duration, etc.) only in the way agreed upon by the two of them. Each of them is guided by their own Light of love, their own Spirit, and they will be aimed at harmonizing these relationships if they have different ideas about these things. If one likes something and the other doesn't, then they will find a compromise in order to resolve these contradictions in the light of love. Of course, both the Burkhadians and the representatives of Disaru would like the earthlings to have this, but as far as my father, who lived on Earth, told me, people chase pleasure, not paying attention to the needs of their partner. In our country, this is unthinkable on a mass scale.

We would like to see more about family life in your schools and educational institutions - what is it for, how love manifests itself at the stage of falling in love in a girl and a boy, how to develop it, how to behave so that it is preserved, and why a family is needed in general union. This is the first thing every child will face when leaving school. You say that he will follow the example of his family, but often in the families of earthlings they cannot be taught this, because they, in turn, were not taught this by their ancestors.

Now a reptilian has arrived from the planet Selbet - a specialist in the sexual behavior of cold-blooded egg-laying creatures. He is also a psychologist like your family psychologists, only he is a specialist in reptilians. Sexologist and family psychologist. He only communicated with earthling contactees a couple of times, but now he will transmit mental images.

His name is Se Hur Sopras.

18:13 Manifestation of the Spirit in the body of a reptilian through sexuality. Eslerian sexual energy, orgasm, body sensations and spiritual fusion.

Irina: Se Khur, please tell us about the peculiarities of the manifestation of sexual energy in your race.

The manifestation of the Spirit in the body of a reptilian through sexuality is characterized by a lesser manifestation of tender and affectionate feelings than in anthropomorphic humanoids. In reptilians it is more like a mechanical process. And they experience less pleasure than anthropomorphic humanoids, and therefore it takes longer to achieve orgasm. The body's receptors responsible for sexual pleasure are less sensitive, and therefore the process takes longer and they are less active in movements.

Maria: Is it true that they have erogenous zones on their backs?

Irina: MidgasKaus says that the bodies of the Eslerites developed from animals in which the part of the brain that is responsible for pleasure as a mental representation was more developed. The erogenous zone can be any, for example, the hand, but it will be like a mental representation.

Maria: What are they fantasizing about?

Irina: They show their feelings, affection and love for this partner. They remember the past, and not necessarily about sex, but about something good, how they met, how they love each other, they can remember about their child. Sexual arousal itself among Eslerites proceeds differently; there is no concentration on the body, like among earthlings. I studied physiology from earthlings with the help of special devices, when at the moment of certain physical states you can read a map of sensations. As a biologist and psychologist, I studied earthlings in this regard. Eslerites place an emphasis on the manifestation of their Spirit, and sensations in the body during sexual intercourse fade into the background.

Vladimir: Do they have orgasms?

Irina: Eslerites have sensations in the body, but at this time they are absorbed in merging with each other's light.

Vladimir: Do purely physiological sensations, that is, muscle contractions in the body and in nerve endings fade into the background?

Irina: Yes, and even astral exit is possible. Among earthlings this is possible, but less often, but among the Eslerites this is par for the course.

Vladimir: Se Khur, in general terms is it similar to what Lugder Otpis just told us or a little differently?

Irina: Since our body is less sensitive, and it is covered with a shell similar to chitin, there are fewer receptors on the genitals, and the sensations are not the same as in anthropomorphic humanoids. Therefore, our process is more mechanical, and the attitude towards sex in society is rather cool. There is no entertainment industry based on sex and its types, it is not shown in the media like yours. People are attracted to these sensations and states, but we are very calm about it.

24:30 Love and sex on the planet Disaru. Kundalini energy as food for plasmoids.

Maria: Question for Laursi - did she participate in the selection of Saint Germain's subsequent

wives? Was her opinion or assessment taken into account? Still, she needs to live with all her wives, previous and subsequent.

Irina: It's not customary for their wives to decide, because if he fell in love, then we accept it, because we love him. And in our big house, each of us has a separate space. He makes his own decisions.

Maria: Do you have sex for pleasure and spiritual development or just for conception? And is there foreplay in sex - caresses, kisses on the lips?

Irina: In this regard, earthly physiology is practically no different, except that forms of foreplay that can cause pain and harm are not accepted. This happens to you because of the craving for self-destruction, which is often provoked by low-vibration plasmoid civilizations.

Maxim: We call it sadomaso and BDSM.

Irina: Plasmoids feed on the energy released by the body during sexual desire and arousal, you call it kundalini - this is ethereal energy. And if it connects with the emotions of pain and fear, then some plasmoids feed on it.

26:27 Features of the sex life of Selbet residents. Sexual contacts between reptilians and earthlings.

Maxim: What about reptilians?

Irina: Instead of kissing, they touch each other's faces, sway, and can stroke each other. There are fewer convenient positions for sexual intercourse than among anthropomorphic humanoids due to the structural features of the genital organs, but I want to emphasize that some male Selbet representatives can become cruel, like criminals, and kidnap earthlings for the purpose of violence. There were such cases not only on Earth, but also on other planets where there is no Interstellar Union. That is, they are physiologically compatible with the anthropomorphic race; simply the combination of genetic material will not result in the birth of children. For a male, compatibility with an earthly woman is possible based on the genitals.

Vladimir: The average size of the erect organ in a reptilian man? Size in centimeters. We cannot ignore this; our listeners will not forgive us.

Irina: Mid, please help me convert it into units of measurement, otherwise they will invite me to the astral plane to measure it. About 60 cm. Receptors transmit sensations to the brain less, and therefore the duration of sexual intercourse can be measured at 3-4 hours, even with dugouts. Such crimes have already happened; Kirchiton talked about a woman from China who was found at one of the abandoned bases of the Solar System, on a satellite of Saturn. She was found still alive, they had already flown away, having calculated the approach of the Galactic Security Service ship. This service noticed the manifestation of life on a base that had long been abandoned. They decided to check what was happening there, and saw a young girl

from China (the Selbet men had already flown away), she was still conscious, but was afraid to approach them, fearing a repeat. They did not know her language, and she did not respond to telepathic signals out of fear and lack of sensitivity.

Vladimir: Was she a reptilian sex slave?

Irina: They kidnapped her and brought her to this base. There were several males. And if she had been found several hours later, she would not have been found alive, since she had serious injuries.

Vladimir: When did this happen in Earth time?

Irina: Kirchiton said it was in April 2017 or 2018, quite recently.

Vladimir: And what's wrong with this woman now?

Irina: She was taken to the medical base, where she was restored. She told the humanoid, who knew her language, that she had seen where she lived, etc. They erased her memory so that this memory would not shock her, and brought her back.

32:46 Types of sex on other planets.

Vladimir: Thank you very much, very valuable information, I am grateful for it!

Question for everyone: do you have a variety of practices: fetishism, sadomaso, anal, oral, group sex? How do you feel about this, and how do you see these practices from an energetic point of view for us, first of all?

Irina: Se Khur answers that it is not customary for them to practice these types of sex, I have not heard about this, although I work as a family psychologist. We don't need this, since it will not significantly increase the level of pleasure. As for the criminals in our race, they are those who pursue more pleasures, use different methods, and among them anything is possible. If they can bring death to a member of another race, then I wouldn't be surprised at anything they could do to each other. This is not common here, I have not heard this from any of those who contacted me.

Vladimir: Se Hur, that woman we were talking about, how long was she at the abandoned base?

Irina: Not long, a few hours.

MidgasKaus as a representative of Esler: We do not accept these forms of behavior, we focus on the spiritual state of our partner, and our bodies reflect the connection of our spirits. What happens naturally is enough for us. And what you just listed is focusing on the body, this would not occur to anyone.

Lugder Otpis: On Disaru, these types of sex are possible, just like with you, but they don't talk about them. This is an intimate matter between partners, and is not discussed even with doctors. I didn't do this with my wives.

Laursi: Due to the fact that a man has many women, he enters into a relationship with each one as if it were a new one, and does not have time to become so fed up as to want oral sex, for example.

If it exists, they haven't heard about it.

38:00 Song of Songs of Solomon. Spiritual and physical love.

Vladimir: Everyone knows the Song of Solomon, embodied by Saint Germain - was it about physical love with sex, or was there something else in mind? In that chapter of the Bible, how apologists of religious teachings think about it.

Irina: Since in my father's incarnation on Earth there were many wives and concubines, we were talking about a real love story for one of them, and it was not only physical love, but also spiritual. Showing love to her soul.

38:52 Erogenous zones in reptilians.

Maria: On the question of erogenous zones - did I understand correctly that representatives of reptilians do not have particularly sensitive places on their bodies?

Irina: Only where the face and the lower part of the tail are. There's thinner skin there.

39:22 Prostitution on the planets of the Interstellar Union. The attitude of aliens towards prostitution.

Maria: Does prostitution exist on the planets of the Interstellar Union or on other planets?

Irina: Mead says that in the Interstellar Union, from childhood they talk about sex with a beloved partner, and a large number of people for a fee is incompatible. If someone wants to do this, they are unlikely to find many clients. They are not brought up that way. For example, if two people undress and have sex in front of you in a restaurant or at work, you will look at it as strange. Perhaps you will accept them, tell them that it is their right, but it will still be

strange, why don't they find a secluded place?

Vladimir: How many sexual partners did you have?

Irina: It is impossible for Eslerites to live without love, that's why MidgasCaus had a wife. Lugder Otpis had 5 wives. Laursi has two; she was married before Saint-Germain. Se Hur Sopras entered into relationships with thirteen reptilian women.

42:48 Same-sex love among aliens.

Maria: Do you have same-sex love and sexual relationships?

Irina: Throughout the Interstellar Union there is a teaching about the Spiritual World. We tell children that the Spirit can come from a different gender and adapt incorrectly to the body, remembering its previous incarnation. But we consider this a failure to fulfill the task of our life, therefore, having felt attraction to the same sex, the humanoid knows what to do with it, because of this there are no such forms. We teach everyone: that if you do this, you will not fulfill your destiny, since you already have a different body, and you do not accept it if you return to the memory of the previous body.

Maxim: This is Kirchiton, we were supposed to have contact on the 25th, but he was taken on an expedition to another Galaxy. We will not have contact, and he now does not have a device to see what Irina is doing. He expected that at 23.11 all conferences were over, because from 23.00 Irina was left without conferences. That's why he came without asking and didn't think that there were Goldstein and Sokalski talking about sex at 12 at night.

Vladimir: When else can we talk about sex?

Irina: He says that this is a Galaxy from the constellation Chanterelle, 520 thousand light years from our Galaxy.

44:57 Prevention of sexually transmitted diseases among aliens. Pregnancy as an opportunity to fulfill a life task.

Maria: Do you have any practices to prevent pregnancy or sexually transmitted diseases?

Irina: They do not have microbes of such forms that could cause these diseases. Due to a culture of sexual behavior that excludes casual relationships, the population of microbes could not survive for long. Our medicine identifies various microorganisms, and they exist in any dense material world. They switch to feeding on the physical body of a living person only if local and general immunity decreases, because the body is adapted to the microbes of the world where it lives. Such cases are rare for us; we support the body and take care of the Spirit. We have sex for pleasure, no one has such prohibitions in the Interstellar Union. They

are not protected from pregnancy, since the Spirit can choose them for incarnation, and they will then complete their task by incarnating it. And if they use protection, they will interfere, and they will not be chosen as parents.

47:06 Sex of Tumesoutians with earthly women.

Vladimir: We know that alien men have had sex with earthly women more than once. How could the Tumesout people have sex with earthly women, if the size of the male sexual organ is probably even larger than that of the Selbet people? How was this technically possible? Did alien women have sex with earthly men? Were there really centaurs and minotaurs on Earth, or are they just myths, and what caused them?

Irina: About the Tumesout people. When they live for many years, their height is from 5 to 8 meters, when they reach sexual maturity - about 2 meters. They reach maturity at the age of 30, and the size of the genital organ corresponds to that of earthlings. At this age, they can not only have sexual intercourse, but also conceive children. Meade says he's talked to Tumesout people and they say they last longer during sexual intercourse and can go a long time without getting off.

48:58 Sodom and Gomorrah - details of the events of biblical history. "Pillar of Salt"

Vladimir: Were there any alien women who entered into relationships with earthly men?

Irina: There were. There is even a case described as Sodom and Gomorrah, when almost everyone in the city wanted to have forced sexual intercourse with two Burkhad men, and the whole city suffered. For people, the Tumesoutians and Burkhadians were gods, and therefore, in the understanding of an earthling, the connection with a divine being who came from heaven increased pleasure. The inhabitants of these cities entered into relationships with each other, both men and women - this was a common thing, and when the Burkhadians came, they wanted to repeat the same thing with them. And the contactee and his family, to whom they went into the house, almost suffered. The Burkhadians turned on a device that temporarily deprives them of vision, since visual receptors do not transmit signals to the cerebral cortex. But, despite the temporary blindness, people did not run away, but became even more aggressive and attacked the Burkhadians, the contactee and his house. Then the Burkhadians contacted the base, which was not far away, but there were still Selbetites there, because this happened even before the war. The Selbetites flew in and said that they would now destroy this city to save the Burkhadians. The Selbetites asked to withdraw the Burkhadians and the contactee, and burned the city with rays.

The story about Lot's wife, who became a pillar of salt, is a confusing place in the Bible for many, but is easily explained.

When high-temperature weapons were used in the form of beams aimed at the city, it was before dawn, Lot and his family were following the Burkhadians along the shore of a salt lake. Lot's wife walked behind everyone, and when they began to burn with rays, a sound like a hiss was heard. The Burkhadians warned the earthlings not to look at the city, as there were very bright flashes from which one could go blind. But these sounds frightened Lot's wife, and she turned around. She saw a white ball, which was heated from the high temperature and was

bright, she lost her vision, and pain appeared in her eyes. She grabbed her head and could not go further, but they did not notice it. The next saucer flew past, from above, and its beam passed through the water of this lake. The lake evaporated, and the salt that was there poured out like a fountain onto the woman. The temperature of sodium chloride in the molten state can reach 500 degrees, and it remained alive in boiling salt and then froze.

Vladimir: Thank you very much, most valuable information!

54:42 The birth of Krishna is the connection of a Shimorian with an earthly woman.

Irina: The Shimorian had a relationship with the woman who gave birth to Krishna. At first they had sexual intercourse, and then the Shimorian said that she needed to build a life on Earth, and she married an earthling. They continued to meet, the husband was aware of this. After all, she was a contactee, and for her husband it was a connection like with a god who had flown from heaven. And thus Krishna was born.

55:30 Centaurs on Earth. Crossbreeding experiments.

Vladimir: Were there centaurs – horses with human heads? Or are these just myths, and why did they arise?

Irina: These were experiments on crossing different species of people and animals. We now say “genetically modified organism,” but there were combinations of primates with different animals. In myths they say that centaurs consisted of different animals. Then these experiments were banned. This was done by a group of scientists from Tumesout; the last centaur was about 4 thousand years ago.

56:48 What is Tantra? Contact of earthlings with plasmoids.

Vladimir: What is Tantra?

Irina: This is a product of your civilization. People having sex with each other were included in various rituals - fertility, connection with their gods, which we call plasmoids, etc. There are plasmoids that deny sex, and there are those who feed on sexual energy. They also came into contact with earthlings, and earthlings with them. A system of rituals developed, from which what you know as Tantra later emerged. This is a kind of psychological state, merging with energies. Basically, this is a connection with plasmoid portals, with the creatures that are in them. There are also practices with access to the Spiritual world.

58:05 Self-satisfaction, reasons for child masturbation.

Vladimir: Have any of you had any experience of self-satisfaction?

Irina: MidgasKaus replies: In childhood and adolescence, we were busy with other things, we paid attention to new information that came from the outside, and we treated our changing body and its sensations as a natural phenomenon. Why do you experience child masturbation? It's not because teenagers want to experience sex; they don't know anything about adult sex yet. They do not know these sensations, they can only imagine them based on the stories and pictures that they see. They have fantasies not because they really want sex, but because they simply lack love from their parents and loved ones. They compensate for this with these pleasures. And if a teenager is in the energy of complete acceptance, light and trust in his parents, then he will not have such desires. I now exclude wet dreams - this is what happens in a dream, during astral travel, and what the body reacts to. This is just natural behavior of the body. I'm talking about the conscious participation of the Spirit in this. If he, not yet knowing the states of sexual satisfaction, causes them in himself, then this indicates that he lacks love and acceptance. Much of teen masturbation is driven by ideas about how their mom and dad love each other. This makes them feel excitement and trepidation in their souls, imagining that they love him. Because the hormone of joy and the energy that leads to excitement are released. If he has experienced this, he will spend energy on studying and other things. This will not be sexual arousal, but simply physical. For example, like athletes.

Maria: What about reptilians?

Irina: They are already insensitive to sex, and even less so when it comes to masturbation based on fantasies.

1:02:15 The sacredness of defloration among young people on Earth. Connection of energies of 2 and 4 chakras.

MidgasKaus: The concept of the sacredness of defloration among girls on Earth is common knowledge for all intelligent spirits. In one cultural environment or another, on different planets, this was reflected differently in their religious rituals and social norms. In ancient times, not only the integrity of girls, but also boys, mattered. Here, defloration was not understood as the physical removal of a certain obstacle, but the integrity of energy as a biological field, an aura. Thoughts directed at the object of sexual desire create an outflow of energy towards this object. And the sexual energy of the 2nd chakra is directly connected to the 4th chakra, where there will be a projection of the unconditional love of partners. It turns out that this is one energy divided into several streams. If before marriage there is a redirection of energy in thoughts towards pleasure, then the energy begins to leave the 2nd chakra and stagnates in the 4th. Unconditional love does not happen. Young people think about sexual pleasure and love the body, not the soul. Such an attitude in the mental field will interfere with their marriage. There will be selfishness in the relationship that they want to get more.

1:05:35 Kundalini - its manifestation, blocks. Reptilian instincts in the human body. The influence of masturbation on the formation of energy structure in adolescence.

Vladimir: And if this is also teenage masturbation, then everything intensifies further?

Irina: If we are not talking about an adult who has already had sexual contact, but about a teenager and the act of masturbation, then this etheric energy, called kundalini, was transmitted to you from the reptilian race. It is not for nothing that she is associated with the snake. The combination of reptilian hormones gives aggression in this process, and also

connects the instinct of reproduction with the instinct of power. Kundalini must form correctly, that is, rise to the 4th chakra and become a spark from which the fire will burn and spiritual light will be felt. Spiritual light is still felt through the body, through hormones. In a situation of enlightenment, a combination of hormones occurs on the physical level; you yourself cause it with certain moods. A change in the Spirit causes a change in the body. At the energetic level, kundalini is the etheric fuel for the astral-mental plane. In adolescence, it is important that a person's energy structure is formed correctly, and if kundalini does not rise to the heart and spread to the whole world (learn to take care of people and animals), then there will be an excess in the 2nd chakra and the need to drain energy. It will arise through the desire hormone that exists. If you masturbate frequently, the energy will be depleted and will not be able to rise to the 4th center. If this moment is not corrected in adulthood, then the instinct of power will be so combined with the sexual instinct that a person will show aggression in sex (and towards himself as well) and dissatisfaction with the partner who will be nearby.

1:10:14 The connection between sexual violence on Earth and reptilian genes. Sexual instinct and instinct of power.

Vladimir: Can we say that sexual violence on Earth is caused by an abnormally strong manifestation of reptilian genes?

Irina: Yes, a certain lobe of the brain is being activated. Any rapist is insecure. He is confident in himself when he inflicts pain and violence, and only in this way can he feel satisfied. His sexual desire is combined with the instinct of power - one cannot manifest itself without the other. Although normally it should appear in isolation. In one area of life, a person may strive for power, and for sexual pleasure in another area. This does not happen from masturbation, it is only a consequence of processes that occur with a child at an early age. This can be violence - moral, physical. And when a person matures, the desire for independence and resistance to the external environment as an instinct for power can come together. And then, during subsequent sexual intercourse (or masturbation), he builds mental images about violence and power. And then he notices that when he dreams about voluntary sex, he doesn't get the same sensations as when he dreams about being overpowering someone.

1:13:22 The influence of the first partner on the fate of a woman and a man.

Vladimir: Does a woman's first sexual partner really have a key role, is imprinted in her aura and leaves an imprint on her entire subsequent life?

Irina: Not only the first partner, but all partners leave an imprint. The first partner has a special role, but it does not consist in the fact that he changes her DNA or genetics, he leaves in her the mood of what kind of men she will love next. The attunement of her heart, as the 4th energy center, to certain vibrations. And if she likes a person with a different energy level, then it will be more difficult for her to build a relationship with him. The same thing matters for men - the first woman is also important for them. Your entire physiology is geared toward reproduction, but you have the incentive to reproduce through pleasure.

Mohammed strove for virgins; it brings pleasure to men - penetration into a female organ that has not yet known this. This is inherent in men at the physiological level, because the instinct is programmed in such a way that healthier offspring can be obtained from a woman who has

had few partners - there are fewer infections, more energy. In women, receiving pleasure from a larger organ is also due to the instinct that the closer to the cervix the seed is released, the greater the likelihood of conception.

1:17:43 Residents of Disaru: monthly cycle, orgasm techniques.

Vladimir: Do Disaru women have the same monthly cycle as earthly ones?

Irina: Almost the same, they have earthly genetics.

Vladimir: What do Disaru men have more opportunities for? Get more orgasms or duration of intercourse?

Irina: They have techniques that are familiar to some earthly men, which allow them to have an orgasm without ejecting semen.

09/04/2020

Participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Maxim Rusan – head of the Cassiopeia project;

Vladimir Goldstein – presenter;

Maria Sokalski – presenter;

Lugder Otpis (son of Saint-Germain);

Laursi (wife of Saint-Germain) - from the planet Disaru;

Se Khur Sopras - from the planet Selbet;

MidgasKaus is a curator from the planet Esler.

#137 Live broadcast 09/13/2020 new curator Zaliatar (Pleiades)

https://blog.cassiopeia.center/novyj-kurator-zaliatar-pleyady
https://www.youtube.com/watch?v=URlesPYhus4

01:10 Meeting Zaliatar, one of Vanga's curators.

Maxim: Our guest today is Zaliatar from the planet Raom-Li, one of the curators of Vangelia (Vanga) when she was alive.

Irina: Yes, I was one of her curators. She had Teachers, Mentors from the spiritual world and among plasmoids. And among the humanoids I was not the only one either.

Maxim: That is. did Vanga have a huge number of curators?

Irina: Yes, she was a universal contactee.

06:30 Description of the planet Raom-Li. Rubric "Intergalactic News".

Maxim: Zaliatar, we welcome you! We have a section "Galactic News". I would like to ask you to tell me the most interesting news that you have recently learned in our Galaxy.

Irina: At the beginning of my first broadcast with Irina, I want to address those who now see and hear the contactee with words of greeting from myself and from the Galactic Federation of Light, to which our world Raom-Li belongs. My planet is located in the Pleiades cluster. She is very beautiful. True, there are too many clouds on it for an earthly observer. But it rotates in a system of three stars. There's plenty of sunshine there. And during the period when there is no cloudiness, there are very beautiful sunsets and sunrises, when one Sun sets and two rise.

Maxim: How many Suns do you have there?

Irina: Three Suns. Two large and one small, but it is also clearly visible. Since I am from the Pleiades cluster and am a member of the Galactic Federation of Light, I first of all study the news of this particular region of space. In the Pleiades system, in the farthest part of the Pleiades system from Earth, two new star formations have been discovered, in which young stars of the spectrum of hot blue stars are formed. And our scientists who study this area of

star formation have found that planetary systems appear around young stars much earlier than previously thought. In fact, several hundred thousand years after the formation of a star, the appearance of the first small planets is already possible, which then form a large planet from a dust cloud.

09:55 Zaliathar's appearance. Life on the planet Raom-Li: features, population, culture, life expectancy, religion, energy centers, evolution.

Maxim: What do you look like?

Irina: My body is the same in structure as that of earthlings, I am an anthropomorph. Only the skin color is different. It is bluish-silver and slightly glows. Height is about 170 cm, long white flowing hair. Men and women do not differ in hairstyles. The rest is like humans - eyes, mouth, nose. The eyes also come in different colors, but most often brown and gray. I have gray ones.

Maxim: Is there vegetation, oceans, seas on your planet?

Irina: We don't have oceans. We have a solid stone waterless space. There are small unsalted reservoirs similar to your lakes. There is vegetation, but it is mainly on the shores of these lakes, it resembles your bushes. We have quite a lot of deserts due to the hot climate.

Maxim: Are there any mountains?

Irina: Yes, but not as high as yours on Earth. Mead says they're about three kilometers high.

Maxim: What do you eat there?

Irina: Mainly plant foods. But we can also be omnivores. We eat plant foods, because in our conditions, breeding animals on an industrial scale is problematic, because... little vegetation. But we grow organisms on the surface of reservoirs that you call mollusks. This is our source of animal food.

Maxim: What is the population of your species on the planet? This refers to intelligent beings.

Irina: Currently, there are about 55 million people on the planet Raom-Li.

Maxim: Are they all the same species or are there subspecies?

Irina: Do you mean race?

Maxim: Yes. Are you of different races?

Irina: No, we don't have different divisions. We live closer to the poles of the planet. In the middle, in the equatorial zone, we have deserts there, no one lives there because of the undeveloped land.

Maxim: What is the temperature on the planet?

Irina: The average temperature is approaching +75°C. If you look where we live, in the temperate zone, it is mostly around +50°C.

Maxim: Do meteorites fall on your planet?

Irina: We live in an area where there are very few stone fragments in space. Therefore, it is not the same with us as on your Earth. The gravitational interaction of the three Suns with their photon radiation cleared our system of all fine dust and stones. You have meteorites falling due to the presence of an asteroid belt, which was formed from the destroyed planet. They collide, and their dust and stones fly very far.

15:55 Where is Vanga's spirit now?

Maxim : Where is Vanga's Spirit now?

Irina: In the spiritual world at level 22 according to the terminology of the Interstellar Union. She is a Consulting Angel.

Maxim: Isn't it going to come true in the near future?

Irina: I saw her in the spiritual world, we met with her, but we didn't talk about her incarnation, but I can ask her.

16:33 Spiritual level of Zaliathar.

Maxim: What is your spiritual level at the time of incarnation?

Irina: 23

16:50 Zaliathar's mission and his assistance to the Cassiopeia project. Diagnosis of human health.

Maxim: Why did you decide to join us in the Cassiopeia project?

Irina: I have known MidgasKaus for a long time through general work in the astral world and subtle-material spaces. He told me for a long time about Irina, other contactees and the Cassiopeia project. Including the fact that, at Irina's request, he diagnoses human diseases as a biologist. I became interested in meeting this contactee personally, who covers the information of the Interstellar Union so widely. I asked MidgasCaus to invite Irina to visit while on astral travel. And on one of his trips he did this, and we met Irina personally. I left my body and met them in the astral plane. We talked to them about interaction. I myself decided to interact with the Cassiopeia project because I believe that information through a contactee should be received by earthlings not only from representatives of the Interstellar Union, but also from the Galactic Federation of Light and me personally. This will greatly benefit the Interstellar Union, Earth, and the Cassiopeia project. I even offered MidgasKaus and Irina my version of diagnosing and treating the disease.

Maxim: How exactly can you help our project in this direction?

Irina: MidgasKaus said that he diagnoses the energy level of an earthly person by vibrations. Since he studied earthly drugs and plants, their chemical and biological effects, the energetic vibrations of those drugs that were available to contactees through the Tashig civilization, he gave recommendations on what drugs should be used to suppress the vibrations of certain conditions that he identified . But we talked to him earlier, before meeting Irina, that eliminating physical symptoms and conditions of the physical body, changing its vibrations, will lead to an improvement in a person's health. But in the case of diseases caused by changes in the spiritual structures of the incarnate Spirit, this disease will arise again. And on a spiritual level, only a person's own self can diagnose. No one else has access there except the Higher Self and the one to whom the Higher Self gives permission. Our civilization calls the Higher Self a spiritual essence that sends its part for incarnation into a material body. MidgasCaus and I agreed that through contactee Irina, diagnostics will be carried out in the following order. A person with a health problem first learns to talk with his spiritual essence and consciously ask questions about the causes of the origin of this disease and ways to eliminate it on a spiritual level. Only after the answers received, at the request of this sick person, can I come to him in the astral body, study his vibrations, as MidgasKaus does, and with my life force (I trained in this, I am a bioenergeticist) I can create an etheric body from my life force the etheric matrix of the organ that is damaged and put them into the etheric body, etheric copies of the organs that require restoration. This will promote regeneration, restoration of cells, increase metabolic reactions in them, thereby accelerating recovery, provided that we work on a spiritual level, working through the spiritual reason that led to this problem. And only in case of ineffectiveness or slow action of these approaches to human health, MidgasKaus can come, make a diagnosis at the physical level and give recommendations on medications to speed up the recovery of the physical body.

Maxim: That is. first we will lead the person to the Higher Self. The Higher Self will determine the spiritual cause of the disease. If a person cannot cope on his own, then you come and place certain etheric matrices on the diseased organs. And at the last stage, if this does not help, MidgasCaus will come with diagnostics at the energy-informational level and recommend herbs and medications with the permission of the attending physician. I understand correctly?

Irina: Yes, it is advisable to inform the attending physician that you have turned to esoteric methods of diagnosis, treatment and recommendations. Even if your doctor rejects it, he will monitor your condition and make necessary adjustments. MidgasCaus can diagnose only once

and make recommendations for a course of treatment. But he will not be able to be constantly nearby and give repeated examinations and diagnostics to everyone who needs it. Therefore, a person with a medical education is needed here. I recommend doing just that. And this will contribute to the greater effectiveness of the medications that MidgasCaus recommends to you. Because if you do not eliminate the spiritual and energetic cause, the disease will either not go away, or will return again, or will arise in another organ.

26:07 Lifespan on Raom-Li.

Maxim: What is your life span?

Irina: From 900 to 1200 earth years.

26:23 Ramakrishna and Swami Vivekananda are Zaliatara contactees.

Maxim: Did you help any of the contactees on Earth, besides Vanga, carry information from the Galactic Federation of Light?

Irina: Yes, I was in mental contact with Ramakrishna and Swami Vivekananda. I restored their health when they violated it with their constant work with people.

27:23 Health of contactees.

Maxim: Many contactees give themselves to people, but don’t work on their health themselves?

Irina: The fact is that the contactee is often unable to control his state of energy and health, because he is simply not focused on it. And such things are always more visible from the outside.

27:48 Religion on Raom-Li. Deification of nature. Priests on Earth as intermediaries between man and God.

Maxim: Do you have any religions on your planet?

Irina: We have a religion in which we revere the starry sky. Those. The stars are God's view for us. Our religion deifies nature. We believe that bodies of water, for example, are filled with the energy of God in the form of liquid. Just as in mammals a mother gives milk to her child to drink, so God gives Raom-Li humanoids to drink with the help of reservoirs or looks at us with the help of stars. And we, when we look at the Universe, see the manifestation of divine intelligence and meaning in any creation. We have no organized rituals. It’s just that each of us prays to God silently in our hearts and turns to him at any moment in our lives. We have no

division between priests and people who come to priests as intermediaries. Each of us communicates through the Soul.

Maxim: Well, this is a higher form of communication with God. We have religious egregors who have at least somehow tried to teach them to communicate through a priest.

Irina: Your level of awareness does not allow you to communicate with God at the level at which it is available to the inhabitants of our world, because the disunity in earthly society is too great, the influence of instinctive forms of behavior and negative attitudes on your spiritual mind is too great. This is why your political and religious life often needs external guidance.

30:35 Chakra system on the planet Raom-Li.

Maxim: How many chakras, main energy centers, do you have?

Irina: Seven, just like you. Chakras are the manifestation of an embodied spirit through the physical body of a humanoid in certain areas of the body. And it's not a matter of the number of chakras, but the ability to effectively manage your Spirit and direct all your aspirations towards the light of God.

31:28 Bases of the Galactic Federation of Light on Earth.

Maxim: Do you have bases on Earth?

Irina: No. The Galactic Federation of Light has bases on Earth, but our planet has not built anything.

32:20 Differences in the views of civilizations.

Maxim: Does your civilization and you personally have enemies?

Irina: There are no military enemies. There is a civilization that conducts discussions on political issues and the relationships of the planets. But this discussion does not go beyond disputes at the verbal level. Showing the advantages and disadvantages of a particular position. I have no enemies. I have little contact with humanoids on my planet. I live more of a hermit's life, separately in a furnished cave.

33:40 Raom-Li's home.

Maxim: What do your houses look like? How do you live there?

Irina: It shows a low, long, one-story house where everyone has their own room. Like a mini apartment. A house can stretch for many kilometers, like a street. Only the houses are not separated by space. Our house exists simply as a place to eat and sleep. And the rest of the time the inhabitants of the planet spend either at work or in other places on our planet on vacation.

Maxim: Were you familiar with Irina in other incarnations?

Irina: We did not consider this issue in astral travel.

35:03 Cosmoenergy and participation in its development of the Galactic Federation of Light.

Maxim: How do you feel about space energy?

Irina: Okay. The civilizations of the Galactic Federation of Light and my civilization create some frequencies for cosmic energy channels. I am not personally involved in this, but I know those humanoids of my race who create telepathic frequencies by sending thought forms and creating rays of light from them, which they put into the channel.

35:45 Possibility of contact with Zaliatar of other contactees.

Maxim: Can you become a curator for someone?

Irina: To do this, you need to ask your Higher Self whether you can be a contactee, whether this corresponds to your life task and whether the representative Raom-Li is vibrationally suitable for you. If the answer is “Yes,” please contact the contact person and she will introduce you to us.

36:20 Earth vibrations - Schumann frequency.

Maxim: Have you ever heard what the Schumann frequency is (the vibration frequency of the planet Earth, measured in hertz)?

Irina: MidgasKaus says that this is a combination of frequency and the atmosphere, and the earth’s crust itself.

Maxim: There is information that this frequency has dropped to zero. This is true?

Irina: It can increase and grow depending on the radiation of the Sun. When solar activity decreases, the Earth's geomagnetic field also becomes less active. This is only until solar radiation is activated again. There are sharp fluctuations within one day. It can rise to peak numbers, then fall. This needs to be measured over time.

38:20 Natural evolution of the Raom-Li race.

Maxim: Are you hybrids or a race that itself has undergone evolution?

Irina: No, not hybrids, we went through natural evolution

Maxim: How long did the process of natural evolution go through for you?

Irina: From when to when?

Maxim: Until the moment when you began to join the Interstellar Union and the Galactic Federation of Light.

Irina: From an intelligent being or the appearance of life on the planet?

Maxim: From an intelligent being.

Irina: About 32 million years.

Maxim: Who did you come from, what creatures, what did they look like in the process of evolution - aquatic or terrestrial?

Irina: Like our lizards, but without scales. Something between mammals and lizards.

Maxim: Aren't you reptilians?

Irina: No, we are not cold-blooded. But they lived in the water, they were underwater creatures. MidgasCaus speaks like a seal, with a longer tail and an elongated body.

42:30 Predictions: timeline, options for the future. How to change the future?

Maxim: When we met, you said that you could look at possible options for the future. How is this possible if the future is predetermined, but not fully determined.

Irina: I'm looking through the options in the probability lines. To do this, you need to go to the border of the astral world and the world of disembodied Spirits. From the side of the world of disembodied Spirits, the Time Ribbon passes. Earthly specialists in the spiritual world usually look at events about a past event or person in egregorial information structures - the Akashic Chronicles. And there are Akashic Chronicles in the world of disembodied Spirits, and this is the Time Line. You can use it to travel both to the past and to one of the future options. As a futurist, I studied not only how to get there and how to look at the past, but how to connect what I saw with the present in the material world. That is, I learned to look at what needs to be done in the material world in order for this particular option to become reality. The opportunity here is to change the tape of probability in such a way that the most desirable version of the future that I saw comes true. This type of intervention could cause a variety of adverse consequences for civilization in the distant future. Therefore, I studied the consequences that would follow after such an incarnation.

45:00 Possibility of predicting the future by Irina Podzorova and students of the School of Contactees.

Maxim: Can you teach Irina how to watch this Time Tape?

Irina: Yes, together with her curator MidgasCaus. If a time is appointed for astral travel precisely to this border of the world of disembodied Spirits, I am ready to travel with her at this time and view the events that are interesting to you.

Maxim: Zaliatar, we will soon open a School of Contactees. If a person is capable, can we teach him through you to watch the Time Tape?

Irina: Yes, of course. Only MidgasKaus says that earthlings may have a problem with astral travel. Many earthlings cannot maintain awareness of astral travel even for an hour of earthly time. But for this it is not necessary to leave the body in the astral plane. A mental journey is quite enough; it will require less energy expenditure, and the result will be the same. The mental body can also fall into this world and the Time Line.

46:30 Rumors of an explosion in a neighboring galaxy.

Maxim: They say that something bad happened in a neighboring galaxy, and an explosion is coming towards us. Do we have any problems with neighboring galaxies? Otherwise they are frightening us with this explosion, that we need to be rescued urgently.

Irina: We are probably talking about a gravitational vortex, which was reported by representatives of the Galactic Federation of Light when a coordination detachment of observers came to Earth.

Maxim: When was this?

Irina: At the end of the 20s of the 20th century there was contact at the level of interference in your television broadcasting.

Maxim: No, it was recently. Is there such a thing?

Irina: Astrophysicists must answer. We haven't heard it on the galactic news. We have Kirchiton, an astrophysicist. As soon as I get in touch with him, I will definitely ask him.

48:25 Tattoos on Raom-Li.

Maxim: Do you do tattoos, that is, drawings with paint on the skin that then remain for life?

Irina: No, if anyone wants decoration, we have enough clothes for this.

48:55 Vanga: causes of vision loss, life path, choice of a companion.

Maxim: Zaliatar, was Vanga purposefully deprived of his sight? Was this foreseen in her implementation plan? Why was she deprived of her sight? What did this give her?

Irina: Yes, we talked about it. When I met her, she was already without physical vision. She was a good astral traveler. We went with her and another curator to the world of disembodied spirits to her consulting angels who embodied her. I remember this conversation well. She asked her angel advisors the same question. And instead of answering, they connected her completely with her Higher Self, and at that moment she realized and remembered how she herself chose this incarnation. Only her vision loss happened earlier than she planned. As she later told me, she planned this in order to be more capable of seeing the spiritual world, so that she could spend the time of her incarnation not on her work in the material world, but on receiving people. This was provided for by her incarnation program. But all the time I felt some sympathy for her because of the choice of the beloved man that she made.

Maxim: What choice did she make? And why did you feel sympathy?

Irina: He was a very low-vibration person, dependent on alcohol - a substance that destroys your body. And at her request, I restored his physical health. He didn’t feel me, but he agreed. But that didn't help him. I admit my defeat in that his physical body died and the Spirit did not complete its task. Vanga told me about this when, after death, she met him in the spiritual world. But during her earthly life, he spoke so many rude words to her, communicated without love, that even such a high Spirit as her created a block of resentment towards this man inside her etheric body, which later led to her cancer.

53:22 Diagnosis, treatment of oncology, causes of cancer in children.

Maxim: Are you involved in helping to treat oncology?

Irina: Yes, I treat any diseases, provided I work with my Spirit, which I said at the beginning. In the case of cancer, you need to understand that part of a person's own body, as they say, made a revolution against the whole body in order to kill it. And this always means destructive processes in the Spirit of this person. It doesn't depend on age at all. This can also happen to a small child whose Spirit has accumulated a lot of negativity in a previous incarnation. MidgasCaus says that it was no coincidence that he incarnated into this family with such vibrations. It often happens that if a child is sick with cancer, then his Spirit has previously met with the Spirits of his parents. And their interaction experience was negative.

55:10 Zaliathar forecast for September-December 2020.

Maxim: They say that there will be serious changes on our planet at the end of September, beginning of October. How can you comment on this?

Irina: I looked at this period of the probable future for the Earth and I can say that from mid-September to the New Year there will be another abrupt increase in vibrations of the quantum field in the space of the planet. A new stage of quantum transition. This will entail an increase in the vibrations of the planet's space. People who do not match these vibrations will find it very difficult to survive this period, both emotionally and physically. The space will be cleared of those energies that are not characteristic of it. I looked at a version of the future in which military conflicts on Earth and natural disasters would become more frequent, and crime would increase. But I also looked at those options so that this most probable future option at the moment would not come true. And these actions of changes in energy vibrations, which will prevent the embodiment of this line of probability into matter, are an increase in the level of awareness of at least 55-60% of the adult population of the planet. At least to the level of turning your inner gaze to your own emotional energy problems and shortcomings, as well as stopping attempts to somehow influence other individuals through emotional and moral violence.

59:20 Expression of emotions of Raom-Li representatives.

Maxim: Do you have any tears? Are you crying?

Irina: No, we don't show emotions in this way on the body, like yours.

Maxim: How do you show, for example, anger?

Irina: Anger in the physical body is manifested by a change in the color of the skin closer to a reddish-orange color and a change in muscle tone in the upper half of the body (hypertonicity).

Maxim: It turns out that you reflect it only on your body, but do not express it?

Irina: Yes, if we are talking about irritation and anger. But this is the case if our humanoid did not immediately notice, for example, and it arose in him. And in the future, he looks at how it arose (our children are taught this) and how to eliminate it in a harmonious way. In our children, who are just learning to do this, such reactions on the body are often visible.

1:00:55 Vanga's successors.

Maxim: They say that Vanga has a successor, a girl. Is this really true?

Irina: I saw that she taught several people - women, men and children. Personally, I saw her impart knowledge to 15 or 16 people.

Maxim: And where are these people?

Irina: I didn't watch them any further. But they received information from her about healing methods and communication with the spiritual world. And even some curators from the spiritual world, angels, passed on to these students and supervised them.

1:02:08 How to increase your awareness?

Maxim: How to increase your awareness?

Irina: You can do this yourself by communicating with your highest spiritual essence and recognizing the idea that what exists around you, your reality in which you live, was created by you yourself. The body you are incarnated in is a product of your consciousness, mind and emotions. The world where you are embodied is the total creation of all the Spirits that are embodied here. All political laws and attitudes are best for you at your stage of development. Coming to greater awareness is impossible without faith, love, hope, happiness and gratitude for every day of life.

1:03:20 Heavenly Hospital.

Maxim: Have you heard about the Heavenly Hospital? Do you have one in the Galactic Federation of Light?

Irina: The Heavenly Hospital is a space in the astral plane, which was created by the thought forms of various Pleiadian civilizations, both dense material and subtle material (which you call plasmoids, and we are beings of light) in order to restore the astral bodies of not only people of the Earth, but any non-incarnate Spirits, as well as direct energies towards their purification and harmonization. In the healing process that comes from the Pleiadian civilizations, the astral bodies of those being healed thus come into this space, which is sometimes called a room, a hospital, a sphere.

Maxim: That is, this is really a space consisting of the energies of dense and subtle material beings and the spiritual world. Do I get it right?

Irina: Yes, that's right.

1:06:07 Regeneration of lost teeth.

Maxim: Is it possible to generate lost teeth and how to activate it?

Irina: Perhaps, but only if consciousness is directed only to this at the expense of the energy of other organs. A mental image is being created, filled with absolute faith and the DNA of those remains that are in place of the teeth is activated. Any tooth grows from its germ, which contains DNA. And this germ always remains, it's just not activated in people. Therefore, for a person who does not believe in it 100%, it is impossible. But by faith you can turn on this ability. But since it is unnatural for a person and is not activated, the energy will come from another organ, for example, from the brain, as from a nearby organ.

01:07:35 Zaliathar's wish to earthlings.

Maxim: What would you like to wish our viewers at the end of the broadcast?

Irina: I am grateful to everyone who participated in this live broadcast - contactee Irina, and Maxim for organizing and helping, and MidgasCaus, and LiShioni, who was nearby all the time and harmonized the energy state of the contactee, to each of you. Be sure that it was not by chance that you were able to hear exactly this channel at this time. You needed to hear this information so that you would harmoniously, safely and with dignity, in full faith, go through this difficult period that still has to go through before the Earth joins the Interstellar Union. I wish that the light of each of you lights the same light in other people around you. So that you all witness this event as soon as possible, and so that this will help each of you fulfill your mission with which you incarnated on this planet. Perhaps the next time you incarnate here, the Earth will already be in the Interstellar Union. And then the highest essence of each of you will communicate with you consciously, and you will know that, being in one of the past incarnations on this planet, you also brought this moment closer.

Participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Center for Spiritual Development "Cassiopeia";

Zaliatar – new curator (from the planet Raom-Li of the Pleiades cluster);

LiShioni from the planet Shimor is a specialist in the astral world and its interaction with the material world.

MidgasKaus from the planet Esler is a biologist, psychologist and specialist in alien civilizations.

#138 Dyatlov Pass. Investigation of the deaths of tourists through astral travel and the Akashic Chronicles.

https://blog.cassiopeia.center/rassledovanie-gibeli-turistov-cherez-akashi
https://www.youtube.com/watch?v=xCCzAzEzhHk

Irina : The fact is that Meade and I visited the Akashic Records several months ago. This is where past events are recorded, like in a book. They are recorded in space not by electromagnetic pulses, but by the special radiations of all the people who lived there, as well as the radiations of the entire planet.

We were there, in the astral body. Those people who were there did not see or hear us. There was a complete impression that we were among them. From what we saw there, I can say it was an accident. Naturally, nothing is accidental, but this is not a man-made incident. They were not frightened by the plasmoids, it was not a murder, that is, none of the people killed them. They were not killed by aliens from outer space, intelligence agencies, and so on. Moreover, for many kilometers there was no one except them. There was simply no need to do this, especially in this way.

Mead is surprised because the same cases as with the Dyatlov group were known before. There are cases when many tourists died, although they had equipment. This happened before and after. For example, in the warm Caucasus they froze when they could not get to help.

Moreover, Dyatlov's group, as he is now showing, went without any means of communication at all. They didn't even take a walkie-talkie with them. They were sleeping at night when the disaster happened. They pitched their tent on the mountainside in such a way that it slid down a little because a strong wind was blowing from the top. Snow was falling from above, which, thanks to the force of gravity, further contributed to its movement. The supports that stood inside also broke.

Maxim: There was a landslide, do I understand correctly?

Irina: It was not a full-fledged avalanche, that is, we can say that a little snow fell. But those who were closer to the top were overwhelmed. So they ran out without thinking. The damage that was on the body is characteristic of strong compression "from the outside." That is, there was no external damage, but there was pressure inside. The snow continued to shift as they ran out of there. They pulled out those who could not get up. There were traumatic brain

injuries from things falling from the walls. Now it shows how a backpack fell on someone's head. He was suspended on some kind of stick. When they jumped out into the snow and frost, someone had a flashlight. They saw that this was continuing, and they thought that they were all about to be buried in an avalanche. Moreover, it was snowing, and they thought that if they did not run down now in what they were now left in, they would be thrown off and mixed with the snow. Fearing that they would die in this way, they ran as fast as they could down the mountain. The mountain was slippery. They rolled and fell, naturally hitting the rocks. When they ran downstairs, by some miracle one of them had matches. They lit a fire. We cleared the place near the cedar as best we could. Now Mead is showing me a large pine tree. It was then that they lit a fire. At first they waited to see whether the avalanche would go or not. The avalanche did not go. They decided to return for warm clothes and shoes, since many ran out without them. The reason why they did not reach the tent was that they had to go against the wind. And even go to the top of the mountain without clothes. They were very tired. The wind blew the heat out of them more and more. Walking up to the top, against the wind, without shoes, in light clothing, trying to keep warm, turned out to be much more difficult, for example, than running down into the wind. Therefore, tired, they sat down to rest. Those who went to buy clothes fell asleep from weakness, psychological and physical fatigue, as well as from the cold. They didn't wake up anymore. Those who remained under the cedar decided that the snow would stop. That in any case they will be able to reach the tent, pull out everything they need and go home.

Maxim : Ira, we talk a lot about the Dyatlov Pass. They ask why their legs are burned?

Irina : Not everyone. Only those who were at the fire. These were the last ones left. When they ran out of what they could use to keep the fire going in the wind, they began to plant each other on the cedar tree in order to break the branches higher. It was clear that all the branches from below had been broken off by people. When the fire was burning, the one whose leg was burned stumbled and fell. He touched this fire, but pulled his leg back. This is how the burn appeared. The reason for the burnt hands was that when they thought they were alone, they began to fall asleep. A cold wind blew at their backs. In order not to fall asleep, they bit themselves and stuck their fingers into the fire, but this did not help them. They failed to maintain the fire, and they still died from the cold.

Irina: Dear TV viewers, the fact is that if we watch 5-6 sessions of sleepers who do not know each other, we will get completely different scenarios of what happened at the Dyatlov Pass. But this does not mean that any of the stories are a hoax. The fact is that, entering a state of mental travel, the sleeper sees the death of people through his imagination.

Yes, of course, I also went there in the astral plane. I was not physically present there, since I do not have a time machine. I also went there, like a sleeper, through astral travel into the Akashic chronicles. Naturally, you will have a question about how to distinguish my story from the stories of other sleepers. This is a completely fair point. But I can only tell you that you need to look at the facts. Pay attention to how comparable the stories of the sleeper or other contactee are with the facts. Now I mean the investigation materials. These are known published facts. There are results of the criminal case, autopsy reports are also freely available. Everyone can read them and draw their own conclusions.

I would like to draw your attention to one fact - it is known that the bodies of the last four tourists were found only in the month of May at the bottom of a deep ravine, covered with

snow at a depth of 3 m. The fact is that they did not have a shovel, therefore, they could not dig themselves this is a refuge. 3 meters is not a meter. This is very deep. But the sleepers and other researchers who adhere to the anomalous theory of this tragedy did not even raise the question of why they ended up at such depths. But this fact can be easily explained if we take into account that they were walking along the bank of a hollow above a stream, above this ravine. They fell there without understanding it and mistaking the snow cap for snow in the dark. And this snow fell on them from above, which explains all the injuries. This is precisely consistent with the case materials.

Irina: The information given was that the reason for the death of the Dyatlov group was generally natural forces. Now I will tell you what I saw. The fact is that MidgasCaus took me on an astral journey at that time. When you are in the astral plane, you can travel through time. He took me to exactly that time and place.

What I saw there was that people had set up a tent in such a way that they had dug up the snow. Because they were lying there and it was warm there, the snow began to melt under them. There was a wind, a snowstorm. Snow blew onto the tent and it shifted. The group members stuck ski poles into the floor to hold up the roof. The sticks were not metal, but wooden, which were easy to break. Because the tent went down a little, sliding a little, and the snow was falling from above, the poles broke off.

Because the tent went down, the pole broke off, and a little snow fell from above. Well, almost a ton or two, of course, but...

Maxim : A small amount of snow slid down due to the fact that the snow melted from the fire, from the tent, from the heat. There was a slight shift of snow.

Irina: Not an avalanche, as MidgasCaus is now telling me, but as if part of the snow had slid down. But people were scared. This was the first stage when several people received traumatic brain injury. They were pulled out. People were afraid to dig up their things in the dark, in the cold wind under the snow. Moreover, the snow moved under them. They thought that now snow would fall on them on a slope on which an avalanche was possible. They decided to go down slowly, so they went down carefully enough so as not to move the snow. We decided to go to the forest and make a fire. They had something to cheat them with. As long as they walked through a place where there was little snow and where they could step on, everything was fine. But the further they moved, the deeper the snow became. As they walked further, they realized that traveling without skis was not as easy as they thought. They started to make a fire, which they managed to do. But we had to go back to the tent to get our things. They were unable to do this, since the path was upward and towards a strong wind. The wind in the northern Urals, blowing in the face, knocks out the breath and very quickly blows the heat out of the body. The darkness and loss of orientation took their toll. Four of them fell into a ravine, stepping on a snow peak, mistaking it for a hard surface. Having fallen to the bottom of the ravine, they were still crushed by the snow from above. Therefore, they had injuries incompatible with life. The investigators who found them understood everything. People who say that there was some unnatural cause of death do not take into account the fact that the first five people found were lying on the surface only 10-15 cm covered with snow, and those who were found a few weeks later were in a ravine under three-meter layer of snow. Those who argue that this was not a natural cause of death do not ask the question of how this three meters of snow appeared above them. If they were killed and buried, as some say, then there

would be traces of other people. But no traces were recorded, except for those who walked there without shoes. Accordingly, this snow fell on them while they were there.

Maxim: Plus, I also remember the information that tongues were torn out. There are no torn out tongues there. There, rodents simply ate the softest parts of frozen bodies. Moreover, they were found only in the spring. When tongues are frozen, it is impossible to pull them out.

Irina : Injuries indicate that they were compressed. There was no external damage. If they were beaten, there would be injuries on their bodies, but there were none there.

#139 Life after life. Leaving the body, astral travel. What happens in the world of disembodied spirits.

---

https://blog.cassiopeia.center/zhizn-posle-zhizni-vyhod-iz-tela
https://www.youtube.com/watch?v=gNVYQ35LXYg

Irina: I can call one of my curators as a guide, but he is a plasmoid. I can go to the astral plane unaccompanied, but in order to go to the world of disembodied spirits, I take a guide not because it is dangerous there, but for another reason. When you cross the border between the astral plane and the world of disembodied spirits, your sensations change. When you are in the astral plane, you feel normal - you have astral arms and legs. And when you cross the border, you feel like energy, but your consciousness is clear. The feeling that you were sleeping when you lived on Earth, and suddenly woke up. And you can forget that you are embodied.

Guides teach you to preserve this memory on these trips. When Mead or LiShioni escort me to the world of disembodied spirits and to my level from which I incarnated, the surrounding spirits are familiar to me, as if I had returned home. And you forget about earthly life, like a dream.

When you look at someone's incarnations, Mead and LiSioni say: "Let's go back!?"

- And where to?

- To return to the physical body, they are waiting for us.

- Do I really have a body? Am I born already?

You really forget about him there.

18.09.2020

#141 Universe. Ether, classification of ethereal energies, nature of light, torsion fields.

---

https://blog.cassiopeia.center/mirozdanie-ehfir-klassifikaciya-ehfirnyh-ehnergij
https://www.youtube.com/watch?v=jNM_YiSiZ5I

Irina: Hello, dear friends! Today my friend Alexey decided to ask our star friends a few questions.

Alexey: Hello everyone, I have been looking forward to this meeting for a long time. I work in IT, and my mentality has been technical since childhood, so I have a lot of questions that are related specifically to the physics of technology. And I would like to build communication in the form of dialogue - probably this will be a little better than just surveying on specific issues. So, I would like to start with the concept of ether. Ether is a flow of particle energy in a boundary state; this has been discussed more than once on similar broadcasts.

02:20 The concept of ether. The spiritual world is the point of origin of the ether. Where does the ether flow tend to go? Components of the etheric flow.

Alexey: What is the nature of this flow, according to what laws does this flow move in the Universe, where does it come from, and where does it go?

Irina: So, what is the nature of the ether? Where does the flow of ether come from, and where

does it go? To immediately understand the terminology, what you call ether, we call one of the types of subtle energies, which are the border energies between the material world and the Spiritual world. There is an outer ethereal shell and an inner spiritual shell. The outer spiritual shell is turned from the Spiritual world to the material world - this is what you call torsion fields. The inner ethereal shell is directed inward, which means into the Spiritual world, looking from the material world to the Spiritual, and it is called the Veil of the Astral. If you look from the Spiritual World, it will be the other way around, the Astral Veil will be the outer shell, and the torsion fields will be the inner shell. It depends on the point of observation, that is, this name is largely relative, and these relative names reflect the fact that this etheric flow also has a point of its origin, its source.

The word “source” is a Russian word, it accurately conveys one truth, that the source comes from the word “from a point”. What then is the point of origin of the ether, from which the entire subtle-material world and the entire dense-material world in all its diversity are then built. All that you observe around you are etheric waves in the form of an atom, in the dense form of atoms. And the point of origin of the ether is the Spiritual world.

Your physicists will not develop a unified field theory until they unanimously recognize the existence of the Spiritual world and its priority over the existence of the material world. But we, as your older brothers in the Galaxy, older brothers by birthright and by the right of creation of your bodies, can only give you a hint, but we cannot force you to accept this theory, because you have your own path of development. Therefore, the point of origin of the ether is the Spiritual world, that spiritual light, the pale reflection of which is the light of the stars and the Sun. Where does the ether flow tend to go? The etheric flow, firstly, is not just mechanical energy that has passed from potential phonetic, this flow is directed by the mind, and this is a mind of a higher order than a person with a materialistic consciousness can cognize. And this etheric flow strives to create all the energies of the material world, which in turn form the atoms of individual substances. And they not only form atoms of individual substances, but also create energies of 3 levels in them. That is, the ethereal flow is divided in the material world into three components: one component contains torsion fields and the field of the Astral Veil to form the border between the Spiritual and material worlds, the second direction of the ethereal flow is the formation of atoms and the formation of the density of matter, or its lesser density , what you call nuclear force. And thirdly, the control of the etheric flow forms all types of energy in atoms, from gravity to electromagnetism.

08:21 Materialization of Spiritual Light. Efficiency of a gravitational engine during intergalactic flights. Matter is the source of gravitons.

Stars are emitters of one type of energy, and in general this energy exists everywhere in space, it exists in that place that you would rather call subspace. That is, it is some extra-spatial structure in which energies are formed. Why extra-spatial, because it is already like the astral world. Now you are not only in the physical world, but you are simultaneously in all the subtle worlds, in the astral world, and in the Spiritual world. And the fact that I called the stars a weak semblance of spiritual light, I made here an analogy that just as the light of the Sun and the light of other stars creates physical life on the planet, so spiritual light creates life in the Spiritual world. This spiritual light materializes through the ethereal flow anywhere in space, even in black holes, there is matter there, even in the core of the planet, in space, and so on.

For the organs of perception in empty space and in empty space for any even our device, the energy of the ether still exists, because in three-dimensional space there is a wall, like a border, between the material world and the Spiritual. During intergalactic flights, the gravitational engine is no longer effective, because you need to make a lot of jumps very far

away and take a lot of fuel with you; there is nowhere to replenish it in intergalactic space. It is necessary to release the energy of gravitons, and the source of graviton is matter. Most often, tetravalent elements in powder form are used to knock out gravitons with a plasma field, either carbon or silicon. And if you count on carbon, then usually about 6 kg of carbon is required for 30 light years, provided that the mass of the ship with all its contents is up to 700 Earth kilograms. In fact, in the sense of a jump, carbon remains the same in chemical properties, but it is unsuitable for the next jump.

11:53 Gravitons, gravity - internal energies of nuclear interaction. Gravity drive.

Alexey's question: What types of energy does carbon produce?

Irina: Gravitons, gravity - internal energies of interaction of the nucleus, as you say, it is called microgravity.

Alexey: By what energies or modulations of energy is this gravity knocked out of the carbon molecule?

Irina: We create a special plasma field and influence this substance in a vacuum tending to absolute, in the direction of this carbon plasma field, which is obtained by mixing hydrogen and helium at a certain temperature and pressure, when directing this flow towards carbon or silicon powder in a vacuum and surrounded by a plasma field far from large gravitational masses that can interfere with the release of gravitons, the release of gravitons begins, and this plasma field does not allow it to return to matter, and these gravitons begin to rotate along the internal contour of the engine, which in turn is made of a special an alloy that does not release graviton out.

13:20 Velocity of gravitational energy when moving an interstellar ship.

Alexey: So, according to certain principles, these gravitons are released from this field, and they actually push the ship?

Irina: They are driven along the internal circuit of the engine, and due to the fact that they are freed from the influence of matter, as if they were outside the substance, by their nature they strive to return to this substance, the engine prevents this from happening, and they begin to circulate along the internal circuit engine, and their speed is greater than light, due to the fact that they are released from matter.

And when the graviton speed reaches about 4 light years, gravitational energy accumulates around the ship, which throws the ship to a pre-selected point.

14:18 Intergalactic vacuum. Engines of intergalactic liners and free energy of vacuum. The free energy of vacuum is one of the types of external ether.

Alexey: That is, this energy is actually repelled from those energies that surround the ship.

Irina: Yes, he just showed how it accumulates, accumulates, and then how it moves with a jump, like a ball. It can be called a repulsion effect or an attraction effect of that part of space where it should end up.

Alexey is also a contactee of the planet Esler, he is also in contact with his curator Rayom, who is a technician on Esler. And now the contactee is talking to the contactee.

So Rayom says that these gravity ships are effective inside the Galaxy and at a great distance from its edges. And in intergalactic flights, when you need to fly 1,000,000 light years, and in intergalactic space the vacuum, the emptiness is much more complete than between the stars of the Galaxy.

I would not call it a completely absolute void, but the chances of encountering solid matter there in the form of some kind of comet or stray meteorite are practically approaching zero in intergalactic space. This means that the pilots will have nothing to use to produce carbon and silicon, so the gravitational engine is not effective, and for such flights there are special ships - intergalactic liners, they have installations that operate on the free energy of the vacuum. The free energy of the vacuum is one of the types of external ether, that is, which is the first of the torsion fields that I told you about. The astral Veil has not yet reached the Veil, the astral Veil has a higher vibration, this is probably what it will look like: vacuum energy and in any vacuum, even in the deepest, it exists even where there are no atoms and no electromagnetic fields, it is still free vacuum energy between space.

19:04 Conditions for obtaining free vacuum energy. Agreement with plasmoid civilizations.

And in order to extract it, you need permission from those plasmoid civilizations through which this energy will flow. Plasmoid civilizations are at other frequencies at this point in space. Because, without knowing this impact, without knowing what exactly is at this point in space of plasmoid worlds, we can, as it were, destroy them. And therefore, in agreement with plasmoids, there are already special places where this free energy can be extracted between galaxies.

Galactic flights use this energy much less often, and also by mental agreement they come into contact. They also have contactors with plasmoids there.

19:44 Obtaining atomic energy using a plasma beam.

Alexey: They are also agreeing on our air corridor, where they will pass so as not to harm the plasmoids.

Irina: So that the energy that will be extracted from the free energy of the vacuum does not destroy their world, because this is also partly the energy from which the particles of plasmoid

worlds are composed. Figuratively, in simpler terms, so that at this place where you need to turn on this device, so that some house or some plasmoid does not end up in the plasmoid world. And then with a special energy, which you call a plasma beam, a special temperature, an electromagnetic field in the form of a laser beam, special modulations are directed to the same point in space, and this point in space screens so that this beam does not go anywhere. And in this case, as it were, such a puncture occurs, and the energy of the atom is extracted from there.

21:00 Conditions for obtaining a plasma field.

Alexey: I have two questions regarding the gravitational engine. When we talk about plasma, about the plasma field - is it cold plasma?

Irina: No, not cold. The plasma field is obtained by mixing 70% hydrogen and 30% helium at a temperature of about 7000 degrees Kelvin at a pressure of 15 Earth atmospheres.

Alexey: Interesting, there are just theories and attempts to build installations on Earth with cold plasma.

22:50 Space is a source of energy.

Alexey: So, the point from which the ether emanates, the energy emanates, is located in the Spiritual world. Does this mean more than one? Does this mean the entire space of the Spiritual world?

Irina: Looking from the space of the material world, it will be like a point, a source.

Alexey : And if we look from the Spiritual world to the material world?

Irina: So, the material world will be like a point. Well, that is, the Spiritual world will be everywhere, and the material world will be like a point. That is, there is no such space as something folded. You understand that you are now in the Spiritual world too, the Spiritual world for the material is simultaneously everywhere and nowhere. We can say that this is a certain collection of points, but the whole space is the collection of all points, even of the 3-dimensional world.

24:26 Classification of energies. Ternary code. Micro- and macrostructures of interspatial fields.

Alexey: Yes, in general, depending on what point of view you look at, at what point you are. Okay, let's get back to the broadcast. Ether is, as we said, energy in a borderline state.

Is there a classification - is it homogeneous energy or one type of energy, or do these energies also have some kind of classification?

Irina: We have a classification. There is etheric energy, well, again, everything is divided into three components. We have a ternary code, and a reflection of this ternary code is even in the structure of the rational spirit. And exactly the same in etheric energy. Let's call it three types of etheric energy: the first type of etheric energy is what you call torsion fields. This is internal energy, if you look from the Spiritual world, then it is between the material and the Spiritual, which is closer to the material, part of it passes into the plasmoid worlds. That's right, there is no such sharp boundary, a gradual transition. There is another type of it - this is the free energy of the vacuum. Another type is interdimensional energies, which were measured by the scientist Hartman. He assumed that this was a type of some kind of electromagnetic fields, but electromagnetic fields line up for a reason in a structure that now reminds me of circles, and at the same time there is also a grid. It's not just that these energies line up, it's due to the fact that interdimensional energies have such a structure.

And it can be the same as macro, I just can't find the words in Russian right now, there is interspatial energy that includes macro, it will not be a lattice, but like a macroconstruction such as cubes. And they are like cubes and at the same time like crystals. And in them there is a certain part of these plasmoid worlds. Because plasmoid worlds have 56 density levels, and a certain part is distributed in space according to frequencies.

And there are also microstructures that make up interdimensional fields, these energies that I'm talking about. They are already built into molecular lattices in different substances.

Your physics hardly studies them, considering them to be meaningless connections between molecules, but in fact, the properties of the substance itself depend on the type of these connections and on the arrangement of molecules and atoms in space, not only energetically, but also quite graphically. The most common example of such a relationship is the difference between the molecular carbon lattice of coal and diamond.

30:32 Rearrangement of molecular lattices. Energy state of substances.

Alexey : So we can say that by controlling these energies, we control the state of aggregation?

Irina: He just told me that a piece of coal and a diamond, if we take these substances of equal mass, are both in the same state of aggregation, namely solid, and they consist of the same carbon atoms. So why then is there a difference between the physical and non-physical appearance and properties of these substances?

Alexey: In our understanding, this is density.

Irina: But not only the density changes in them, the transparency and color also change. This action occurs due to the fact that in different states of carbon, I would even call it an isotopic state, it is different. In these different energy states of carbon, the atoms are arranged in

different types of crystal lattices, which precisely depend on the interdimensional energies. And, naturally, in the Interstellar Union there are devices that, thanks to the release of energy, can rearrange various types of molecular lattices and obtain another energy state from one energy state of matter.

32:37 Definition of a substance and the ratio of energy volumes included in its atom.

Alexey: Can we call this transmutation of matter, or is it still not transmutation of matter?

Irina: Transmutation of matter is a little different, for example, you take a carbon atom, and by changing the energy ratio in it, or, as you say, by changing the ratio of electrons, protons and neutrons, you get oxygen from it, for example. You understand perfectly well that the electron of oxygen is no different from the electron of, for example, hydrogen or carbon.

Alexey: Yes, I understand that the levels or volumes of those energies that are in an atom, the definition of matter depends on the volumes of these energies.

Irina: Yes, and on the volume of energy, their relationship with each other.

33:47 Components of ether. Distortion of space near gravitational masses.

Alexey: We haven't finished yet about the three components of the ether, etheric energy.

Irina: And the second component, it is, as it were, in the middle, between the two, it is like generally supporting the very structure of the space of material and the space of all subtle worlds, and the space of dense matter. We can say that for you it will be like the progenitor of some kind of gravity. That is, what Einstein probably called the distortion of space near gravitational masses. This, one might say, is like an ocean in which certain ships, fish, swim; individual components are denser compared to it, for example, fish, algae and the ship differ in density. But they float in the same water, just as in the air an airplane, and a bird, and a feather of a bird, and a cloud fly in the same atmosphere. Also in this ether there are worlds of different densities, the middle etheric energy, so to speak, is like harmonizing, well, that is, it is like neutral.

And it is thanks to it that the laws of the Universe exist: gravity, various chemical reactions, that is, it seems to create the same conditions in terms of its physical and chemical conditions in different parts of the dense material world. Identical processes of time passage.

36:32 The astral veil is part of the etheric energy, the spiritual substance is protection from unwanted contacts.

Alexey: I understand, so there are now 3 parts of the first component, or is this the first component of what we call ether?

Irina: This is the first component of what you call ether, well, the Veil of the astral is the 3rd part of etheric energy, which is closer to the Spiritual world.

Now I will explain to you: it is thinner, similar to a film on water, which is formed from water molecules, but at the same time it is durable for the creatures it holds. The Veil of the Astral is exactly the same; it is thin, but it envelops the astral worlds and astral bodies, which consist of the substance of the astral world. I wouldn't call them matter anymore; it's not called matter, even subtle matter. Some teachings and some entities, namely: astral and mental fields are also called subtle matter, but we must remember that this is by analogy. And so this is Spirit, spiritual substance. And this film of the Astral Veil does not affect, it envelops astral bodies, embodied spirits, and one of its functions is protection so that there is no direct contact from the astral with strange entities.

For unprepared people on Earth, it is like a protection so that they do not perceive those entities that are nearby. Because all their low vibrations always attract these entities and they can be afraid of them.

Alexey: They can feed them.

38:53 Permeability of the Astral Veil for training contactees.

Irina: Yes, in your esoteric cultural space of your planet there are many religious and occult ways of breaking this shell as a temporary removal or breakthrough. When they are ready, a person becomes sensitive to the manifestation of the Spiritual world, the astral, but here everything will depend on the spiritual purity and height of vibration of the one who did it.

Alexey: Its safety will directly depend on its vibrations.

Irina: Yes, right now next to you there is an Eslerite in the astral body, and everything that prevents you from perceiving him in the same way as you perceive Irina is the Veil of the Astral. There are techniques that do not seem to explode it, but they make it permeable to the signal of the astral body. We use them to train contactees. It becomes, as it were, selectively permeable or changes, changing its protective function, throughput. And this works not just in the astral plane, but when the Spirit is in the body. Because the Veil is not between the astral body and the astral, but between the astral body and the material world. And this in the physical body of an earthling is manifested by the tuning of his body and brain receptors to certain types of frequencies, among other things.

You understand what's the matter: for them, physics is inseparable from the concept of the Spiritual world.

41:41 Ternary code. Fundamental substances: matter, energy, information.

Alexey: The phrase "ternary code" was mentioned. We have binary code, duality and so on.

How is this ternary code different from ours? Is it a number system or is it just the triplicity of all things? How to understand this concept?

Irina: Rather, it's the second one, your number system is binary, it is based on the difference between "0" and "1". And trinity is based on the manifestation in the universe of three fundamental substances: matter, energy and information. Well, it is natural that three fundamental substances manifest in the Spirit: mind, essence or heart and energy.

43:02 Pulse vibration of energy flow. Rhythm of the Universe.

Alexey: Energy actually creates an atom, lowers vibrations, creates an atom - the so-called materialization of matter occurs. How is this etheric energy converted into these 3 levels of energy and distributed among the types of energy at each level?

Irina: That flow of ethereal energy, which is aimed at the materialization of atoms, does not immediately transform into those 3 types of energy, but vibrates with an impulse, and each of these impulses is divided into 3 impulses. This can be called the emergence of a signal and its attenuation. A certain rhythm, there is such a concept - the rhythm of the Universe.

44:44 Percentages of distribution of ether flow in atoms. The law of conservation of energy and the law of conservation of matter.

Alexey: Can this rhythm be called vibration?

Irina: Yes, this is a certain type of vibration, and this etheric flow, when it enters the dense material world, where there are atoms, is divided into three flows. One of these flows creates gravitons, a gravitational flow, the second flow creates energy, what you call radiation. And then the third flow impulsively creates energy of the first level, which is then divided into 5 types. In principle, this all happens at the same time, there is no such thing as taking turns. What are the percentages of distribution of etheric flow in atoms? It depends on the specific type of atom. And I would not say here that from the point of view of the material world, new atoms are created all the time. The fact is that from the point of view of the Spiritual world they are, as it were, created and do not disappear. From the point of view of the material world, the created atom simply transforms from one type of substance to another according to two fundamental laws: the conservation of energy and the law of conservation of matter. They are somehow similar and one flows from the other.

46:45 The law of conservation of energy and the law of conservation of matter from the point of view of the Spiritual world.

Alexey: Is it possible to somehow formally voice these two laws?

Irina: Conservation is the conservation of energy and conservation of matter, I want to emphasize that these laws work and are visible from the material world. From the Spiritual world, this will be the law of the emergence and continuous maintenance of both matter and

energy. Here again this point, these laws are relative to the world in which they are open. The law of conservation of matter sounds like this: no material particle arises or disappears, but simply passes from one state of aggregation to another. And the law of conservation of energy sounds like this: not a single gram of energy arises or disappears, but passes from one state to another.

48:11 Laws of molecular formation.

Alexey: By what principle are molecules of matter formed from atoms?

Irina: So he says that microgravity, which exists in atoms, allows both atoms and molecules to stick together and be located according to these interdimensional microlattices.

Alexey: So, there is some principle by which these molecules are formed. And are they formed for each substance in their own way, or according to some specific law or principles?

Irina: The laws of the formation of molecules are what you know from the laws of chemistry, for example. You simply take into account that a chemical reaction is taking place, but you do not take into account how exactly in this resulting substance, in the product of the chemical reaction, these molecules will be lined up, along what crystal lattices. But this matters more in organic chemistry. Because those substances, for example, that enter the body of a living being, are arranged in certain not crystal lattices, but in certain patterns of organ cells and so on, already subject to the influence, including the etheric body, which goes through the DNA program of this body.

50:27 Types of effects on microgravity of substances. Changes in the state of aggregation of substances.

Alexey: Time is coming to an end, I would like to ask two quick questions, to move a little away from this topic. My first question is this: is there any other type of influence, other than thermal, to change the state of aggregation of a substance?

Irina: Yes they exist. The influence can be any field, not only heat, but also, for example, what you call electromagnetic fields, radiation, etc. There are special devices that create electromagnetic fields that seem to influence microgravity.

Alexey: Okay, that is, is it possible to temporarily change the state of aggregation of, for example, granite in a similar way, to crush granite to the state of plasticine?

Irina: It's possible. There are devices in our robots that create such electromagnetic fields, thanks to which connections between those molecules included in granite, and this is actually a mixture of substances, that is, it is a heterogeneous substance. And there are such heterogeneities in it that are not from granite at all.

Alexey : I understand, that is, it is something like plasticine, only in which there are granules of a denser and softer substance, but in general this volume becomes soft and pliable to any influence.

53:05 An invisible ray of destruction of intermolecular bonds of substances. Polygonal masonry.

Irina: There is a special beam aimed at the electromagnetic field, but it will be invisible to the eye. And directed at the granite wall, it seems to move apart, it affects the atoms in such a way that the intermolecular connection is lost, and it first begins to crumble, and then a robot comes from behind, and it seems to slam this waking mass into the wall. This is how we usually build bases on planets. There are not only robots, but also spaceships and flying saucers, on the sides of which there are these devices. If you direct the beam at the wall, it will cut the stone like a stone cutter, but faster than a hot knife cuts butter.

Alexey: It was these tools that were in the technology theme, thanks to which such phenomena as polygonal masonry, for example, arose?

Irina: We need to clarify this term for him and for our viewers because not everyone understands it. And then he will say that this technology was used, and there is something else. There is also a safety precaution: if you turn on this device, it will simply not be visible in space. You can't even feel it, there's not even that much heating going on there.

Alexey: That is, it destroys, will destroy the body, and the body won't even feel it.

Irina: If you just stand in the way of this ray, then any organic body will be cut.

Alexey: Technologies were used on our planet in ancient times?

Irina: They were used, they are still widely used in the construction, for example, of bases on Earth. Because if we make robots that dig with something like a shovel, it will take a very long time, and they will spend a lot of energy.

55:36 Radio waves as a type of energy. Perception of radio waves by alien civilizations.

Alexey : Clearly, a lot is falling into place. How is this type of energy at the first level involved in the formation or participation in the propagation of radio waves that we use on Earth to transmit information?

Irina: Your radio waves are like a type of energy, the frequency range that you use, you don't use the entire frequency range for your needs? What you call radio waves are a type of energy, they are simply created by transmitters. They fly in space at the speed of light, whether in air or in airless space, they propagate according to certain laws, can be reflected

from certain energies, from electromagnetic fields and so on, and can be captured. They pass through the body, that is, they can pass through the human body, but people do not feel it. They are too low-energy, low-vibrational to somehow damage the body and destroy the atoms that are in the body. And there are special antennas that capture this flow and translate it into sound, light, and different colors. Besides the antenna, there is a converter that converts this energy flow. There are many frequencies there, but what you call radio waves can also be emitted by plasmoid civilizations of certain types, these radio waves may be part of their bodies, but not all, only some certain types.

And there are humanoid civilizations whose receptors are tuned to receive certain types of radio waves, but they can perceive them in different ways, that is, if they are tuned eyes, for example, then with an intense flow of radio waves they can see what color. It is usually shiny, like metallic, and fades to a light gray color. For example, Tikhtians can see this. Some tribes on Gihora that hear these radio waves in a form like you hear Morse code when you tune in. Certain high-pitched sounds that change at a certain periodicity, but this is if there is a random flow of radio waves. And if there is some information contained there, they will not be able to decipher it, they don't know your language. It will just be a more orderly flow for them.

Alexey: Just noise.

Irina: Yes, and not an ordered flow of radio waves, it is distinguished by various stars and the center of the Galaxy, even by nebulae that consist of dust.

Alexey: Our science knows these things.

Irina: Yes, of course. You already have a radiological map of the world.

01:01:30 The nature of light. Light is a type of energy.

Alexey: I probably have the last question. This means that we have such a dilemma in physics, it is very often voiced about the nature of light, that is, light behaves simultaneously both as a wave and as matter, as a material particle. Still, studying physics in a new way, light is nothing more than a subtle energy that an atom can emit, and it is fed from the etheric space.

Irina: They have this as a type of energy, it is generated from the centers of the world of stars, according to our theory, it is generated, firstly, by the transformation of what you call helium and hydrogen atoms, that is, thermonuclear energy, light energy, and also the energy of plasmoid civilizations is added there, because they live in the stars.

And all this, of course, is fueled in any case by the Spiritual world; according to the teachings of the Interstellar Union, the energy of the Spiritual world also takes part in all this.

Alexey: In fact, light is a flow of energy.

Irina: Yes, their light is a type of energy.

Alexey: Okay. I am immensely glad and hope that this knowledge will form the basis of those basic postulates that will change our view of the Universe.

Irina: I also hope so, I thank our friends, and you, Alexey, for very interesting questions.

10.08.2020

Participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Maxim Rusan – head of the spiritual center “Cassiopeia”;

Rayom Tiyan – representative of the planet Burhad, specialist in energy interactions in the environment;

MidgasKaus - curator from the planet Esler, biologist, psychologist and specialist in alien civilizations (life forms);

Alexey is the administrator of the Cassiopeia group.

#142 Egyptian pyramids. Secret hall under the Sphinx. Who built pyramids in different parts of the Earth and why?

https://blog.cassiopeia.center/egipetskie-piramidy-tajnyj-zal-pod-sfinksom
https://www.youtube.com/watch?v=UW591THMzBA

Maxim: Who built pyramids in different parts of the Earth and why? Do medical pyramids with

the proportion of the golden ratio have a healing effect?

Irina: MidgasCaus answers.

Pyramids in various parts of the Earth were built by both aliens and earthlings, imitating the aliens. This can be distinguished by construction technology. The earthlings built the pyramids using their own strength and with the help of animals, pulling stone blocks across many kilometers, simply by harnessing a large number of oxen. All this needs to be looked at according to a specific pyramid and distinguished who did it. In ancient Egypt, there are known cases where entire blocks were cut out of sandstone using special hard bronze tools, since bronze is harder than copper. The blocks were first transported along the Nile River, transported on huge wooden long boats. MidgasCaus is now showing me these boats, rowed by people who are slaves. Many people died from such work, since it was very hard work, when you had to row upstream of the river for a long time, and then carry it to the right place. People were constantly being replaced due to the high mortality rate from harsh conditions. The rowers were not hired workers, but rather slaves who were captured in other cities during wars with other states. People were bought at slave markets when the same Arab merchants brought slaves with caravans. During modern excavations, in the place of these sandstones, the remains of canyons were found, in which traces of dragging stone blocks with ropes on bulls were preserved. This is all left.

Maxim: So, some of the pyramids were built by people, and some of the pyramids were built by alien civilizations?

Irina: Yes, some of the pyramids were built by alien civilizations in order to harmonize space - this is the main task of building pyramids **.**

They were built by representatives of Tumesout and its colonies, since they quite rightly believed and still believe that for an anthropomorphic race it is precisely this form that helps attract energy. It is the shape of a triangle with an upward angle and a square base that helps attract energy or what you now call ether, torsion fields, prana. And before it was called the vital force of space. This is the same energy that comes from the Spiritual world to maintain the material world. And certain shapes of rooms and objects can collect this energy and direct it to a greater or lesser extent to one or another area of space.

Do pyramids have healing properties? It all depends on how much you are ready to believe in the action itself. In any case, faith, trust and thoughts about it multiply the impact of this vital energy that you strengthen in yourself. But if a person does not believe in this, rejects it, then he will simply block this action, and therefore block life energy.

Guest 1: There are pyramids of Giza, Mexico, China, and probably also Crimean pyramids. What civilization are they the legacy of? What are they for? For what purpose are the pyramids built in a certain sequence throughout the planet? There is already an understanding that they are located in many parts of the planet, and we do not know all of them that are known and that have been preserved. What functionality do they have, what were they built for?

Irina: Many pyramids ended up under water because they were built before the war. But there are also post-war ones - these are a repetition of those pyramids that were built before the war

by representatives of Tumesout and their assistants from other planets. This was a repetition of their houses and ships, because their houses and ships are pyramidal in shape, which better suits the energy of the Tumesout people and is best suited for them to feel more harmonious in space, both energetically and physically. The triangular shape of the pyramids allows you to better sense the energies of space. You, earthlings, feel this too, being in the pyramid. Even a not very sensitive person can feel everything there more. The very structure of the pyramid acts on energies that are in space and which, in your opinion, are called ether. In the pyramids, the etheric and astral field of the person himself is enhanced. In pyramids, built in certain proportions and from certain materials, energies are collected that can even change the material properties of objects. This occurs due to the fact that the action is directed to the energies in the atoms of these elements that make up this object. For example, the energy of the seeds, or what we call vitality, can be enhanced: the seeds can sprout and grow faster because the energy of the pyramids enhances their vitality, which is inherent in them initially. Pyramids can also act on water, creating in it chains of molecules similar to the energy that is in the pyramid itself. And when drinking such water, the internal environment of the body itself will change.

MidgasCaus shows me that the ether creates such vortices that look like angles on the sides and with an angle on top, like a top. In the pyramid, due to amplification, precisely such vortices are created.

Guest 1: Interesting. And what exactly is the reason for the fact that the location of the pyramids on the planet is on a certain grid. Does this arrangement affect the planet itself, or perhaps the energy field of the planet or the civilizations that are located on it?

Irina: There are pyramids not only on Earth. They are also on the Moon, they are also on Mars. Do they affect the field? Yes. They influence because they are located at a certain distance from each other and opposite, when viewed along the same line. The pyramids didn't just stand there. The people who built them in ancient times gathered around large pyramids. Moreover, people could gather around different pyramids at the same time, during a holiday, for example. People directed their thought forms, looking at the pyramid in the direction from its edge to the top, and this strengthened their mental energy and gave birth to ethereal turbulence throughout the entire space. And if they were on the same line along the earth's meridian, then this could cleanse the planet, saturate it with new energies, and transmit new vibrations to it. That is, all this was used and is being used now both on Tumesout, and on some of its colonies, on other planets that want to act on their planet in this way. This strengthens the mental message: the more people gather around this pyramid and look at the point at its top, then exactly what will happen, depending on what thoughts they are with - creative or destructive. If it is destructive, then on the contrary, it can cause disruption of the Earth's energy fields. And above the top of the pyramids there are very often plasmoid portals, because these pyramids were built not by materialists, but by people who were in contact with these plasmoid civilizations. And so the pyramids were built in those places where the plasmoids showed them their portal. And when people began to look and mentally call on the gods, the plasmoids felt this call and also sent their energy to enhance various actions. Most often these were plasmoids of terrestrial forms, which were responsible for the core of the planet, its magnetic field and atmosphere. What you call the spirits of the elements and places of nature.

Guest 2: Under the Sphinx in Egypt or the Egyptian pyramids there really is a room in which materials about the real history of the Earth are collected, and there is also a working spaceship?

Irina: When they built the pyramids and the sphinx, below them the priests, together with representatives of Tumesout, whom they considered gods, actually built structures that were somewhat similar to your basements or caves. But not under the pyramids themselves, but a little to the side, in a passage similar to a mine in which artifacts from other planets were preserved. A spaceship, parts from it, books, and much more could have been left there. It was a long time ago. And to what extent the priests have still preserved these artifacts, whether they got to them after the Arabs came to power in Egypt - all this needs to be clarified now by visiting Egypt and these pyramids in the physical body.

Guest 2: So, there are chances to find all this there?

Irina: If indeed all this was preserved there, then the question is what the ancient Tumesoutians and their contactor-priests could have put there.

If all this is preserved there, then the Egyptian authorities will not allow researchers from all over the world to look for these objects.

#143 Prana, astral travel and diseases of the contactee. Source of energy. How to live Here and Now.

00:22 Powered by solar energy. Little green men. God speaks in the language of Love.

Irina: Esotericists write that people feed on solar energy, cosmic energy. Indeed, this is so. Do you know that you are now eating solar energy?

Participants in the conversation : Yes, it is cooked on fire. Apparently that's why?

Irina: This casserole itself is solar energy. Do you know about this?

Conversation participants : Why? How to explain this?

Irina: What does it consist of?

Participants in the conversation : From milk, wheat.

Irina : How does wheat grow? What does it take to get a grain of wheat?

Participants in the conversation : Sun, light.

Irina : Correct. Does wheat have green leaves? Why are they green and not red?

Participants in the conversation : They contain chlorophyll. Solar energy is transformed into nutrients - chloroplasts.

Irina : Sunlight warms, but you can't eat it. Light hits the leaves. Does light come from space? The sun in space. Is sunlight a cosmic energy? Space. Getting into the plant, into the leaf, it begins to react with water, with nutrients that flow through the plant, and other substances are formed in dense form. The entire mass of the plant, its leaves, roots, stem, fruit, and so on, is all materialized sunlight. This is strict data from the science of botany, this is not esotericism.

Participants in the conversation : So, if we eat grass, we will eat more resourceful food?

Irina : And greens are good for us, and in general, plants are green, but not only because of solar energy. They contain a lot of magnesium and copper, which our body needs to form red blood cells. If you eat only meat and processed food without greens, then the protein and iron entering the body without copper will not be absorbed normally. Everything must be in a certain proportion.

Participants in the conversation : How can we learn to recharge ourselves with solar energy?

Irina : We need to learn how to grow chlorophyll in the skin, like the Gikhorians we will walk green. In fact, a program must be embedded in DNA so that instead of mitochondria our cells have chloroplasts.

Participants in the conversation : There are probably creatures that do this?

Irina : Yes, for example, green euglena. It feeds on both bacteria and sunlight. Like a ciliate.

Participants in the conversation : The ciliate is single-celled, it is far from us.

Irina : We have a lot of cells and they should all be there. At the very least, they should be configured so that not mitochondria, but chloroplasts with chlorophyll inside, accumulate in epithelial skin cells. Their structure is very similar to mitochondria. Mitochondria are intracellular elements that are the energy stations of the cell. Interesting?

Participants in the conversation : I like the idea of making green men.

Participants in the conversation : Grow a green man inside yourself.

Irina: How do you think our body differs from the body, for example, of a cow?

Participants in the conversation : I'm a little smaller.

Irina: And there are no horns. Why do cow cells produce a cow, and human cells produce a person?

Participants in the conversation : Due to some information.

Irina: How can information about the entire body be recorded in such small DNA, which fits in the nucleus and is not visible to the eye?

Participants in the conversation : This is a Divine instrument.

Irina: Yes. And in what language is it written there? Russian, English or Galactic?

Participants in the conversation : Divine.

Irina: What language does God speak?

Conversation participants : Language of Love.

Irina: The answer of the enlightened one.

05:50 Etheric body. Thread of life. Exit to the astral plane in a dream and in reality.

Irina : What is the difference between a sleeping person and a dead person?

Participants in the conversation : It has a soul. What if she went on an astral journey?

Irina: They both lie, do not move, do not react to stimuli. How then are they different? It is clear that the sleeping person will wake up, but the dead one will no longer be there. It's like a drunk sleeps it off, but a fool never sleeps it off.

Participants in the conversation : When you are on astral travel, a thread of life connects you to your body.

Irina : What is it for?

Participants in the conversation : To stay alive.

Irina: To maintain life in the body when you go for a walk in a dream or in the astral plane. In a dream, you also go out into the astral plane for a walk.

Participants in the conversation : What kind of thread is this?

Irina : It consists of etheric energy, that is, it is part of the etheric body. In a dream, part of the etheric body leaves with the astral, part remains with the physical body. That is, they are separated. The etheric energies of the body are connected by a thread. Each person is tuned to a personal vibration, so the thread has a vibration frequency. This is why the threads in the astral plane for many people, when they fly, do not get entangled, each thread is at its own frequency. As vibrations increase, they attract each other, so no astral body will fall into another physical body. Temporary occupation may occur, but only if the astral traveler himself is capable of doing so. For example, how Mirakh Count spoke through me. I leave temporarily, he takes my place. But these are minutes.

Participants in the conversation : Where are you at this moment, standing next to you?

Irina : I can fly somewhere in the astral plane. I, as an astral traveler, cannot substitute, I must be able to do this. This is what they teach.

Participants in the conversation : Are you aware of yourself at this moment, when you fly away, when your body is busy?

Irina : No, if I don't set the task of realizing myself. It will be like a failure for me, like a dream. To become aware of yourself, you need to strain. If you just relax and go out, there will be a temporary blackout and you won't remember anything.

08:29 Practice going on astral travel.

Participants in the conversation : How to go on astral travel?

Irina : I have already shown a practice where you lie down, relax and just mentally, without physically straining, begin to imagine that you are raising your hand and so on.

Participants in the conversation : That is, you are relaxed, but at the same time you imagine that your hand is moving.

Irina: Yes, and not just moves, but that you bring it to your face, start looking at it, imagine in mental images what it might look like. This is how you turn on the mental plane. If I say: "Raise your hand, look at it, raise your leg, get up, sit down, start walking around the room," then you will talk to me. It's more of a mental journey. You will be both here and there at the same time. When you do it alone, there is a big chance to go on an astral journey, then you will not feel the body at all.

Participants in the conversation : We got up, disconnected, and then?

Irina : We need to examine the situation. It's not a fact that you will find yourself in this room, in this space, because you find yourself in the astral plane. If you find yourself in this room, you can look at your body. Just don't look for too long, move away, otherwise your body will pull you in. When you learn to get out well, you can even sit down next to him and pet him.

Participants in the conversation : If, for example, you decided that you could fly, you jumped out the window, flew in your space.

Irina : You can go through the wall, through the door, through the window. The body goes right through.

Participants in the conversation : Is it so impossible to get lost?

Irina : No. You imagined what your body looks like, you remember it. You just have to wish to return: “I want to go into the body,” - imagine it. There will be an automatic refund.

Participants in the conversation : Walking around the room is one thing, but is it possible to fly to another planet that you can’t even imagine?

Irina : Yes. Just imagine where you want to go, to some inhabited planet. You will be taken to the one that will be most suitable in terms of vibrations. If you imagine something specific, you will get there.

11:00 Transition from the astral level to the spiritual world. Levels of the spiritual world. The Saints.

Participants in the conversation: Are there guards there, keepers who might not let you in?

Irina : There are guardians when you enter the world of disembodied Spirits. But you will be walking on the astral plane. There are Nature Spirits, there are plasmoids, quite a lot of them.

Participants in the conversation : When you look at the levels, do you go on an astral journey?

Irina : First to the astral plane, then through the astral plane. There are seven floors in the astral plane on the earthly plane. There is a transition between the seventh floor and the world of disembodied Spirits. In it, the guardians scan you. Through this transition you find yourself in the world of disembodied Spirits. You immediately get the feeling that you are not just flying in the astral plane, feeling light. And there you feel like a wave, you float like a wave, like energy. When you find yourself at your level, this is everything, your home.

Participants in the conversation: What is your level?

Irina : Twenty-one.

Participants in the conversation : Is this some kind of angel?

Irina : Guide angel. If you and I go into the world of disembodied Spirits, then everyone will stop at the level from which they came.

Participants in the conversation : Are levels steps?

Irina : No, you can immediately skip back or forward.

Participants in the conversation : Several steps in one incarnation?

Irina : Yes. You can stay on the same level. It happens that it's neither down nor up.

Participants in the conversation : How to find out what level we are at now, we have already changed.

Irina : Read the description of all levels and choose which one suits you best.

Participants in the conversation : Logical.

Participants in the conversation : When you listen to your alien friends from Burkhad, Esler, it turns out that the creators live on the same planet, despite the fact that the Galaxy, the Universe is huge. There are still many Galaxies.

Irina : Many saints live here. Seraphim of Sarov incarnated on Earth. This is Archangel Michael.

If we talk about Christ, he lives on Burkhad, but He was born from an earthly mother and father from Burkhad, which means that he also has our genetics, human nature. He deprived himself of incarnations in billions of worlds for our sake. He erased all his death programs. Even Burkhadians admit that the Earth is unique.

Saint Germain, who is now on Disaru, was incarnated on Earth by both Solomon and Joseph, Jesus' stepfather.

14:05 Development of sensitivity. Life Here and Now.

Participants in the conversation : How to develop sensuality in yourself?

Irina : The first thing is to learn to enjoy this world. When you eat, try to feel the full taste of the food, enjoy this moment. As you inhale the air, feel how it fills your lungs. Imagine that this moment you are living now will never happen again. Try to understand what is beautiful about it for you, what a good, positive charge it brings to you. Never look for negativity in anything. Always look for the positive, because we perceive negativity from other people or from events because we feel bad. If you stop feeling sorry for yourself and look at the situation with an open mind, then there is nothing negative in it. Don't waste your time on entertainment, watching TV and so on. Just sit down, light a fire, light a candle, an incense stick, inhale this aroma, feel how pleasant it is for you in this moment. Relax mentally and physically. Forget

about all your problems for a while. If you constantly remember that you need to achieve something, get something, solve problems, then these thoughts will not solve the problem. Develop your imagination, read more fiction, poetry, listen to songs that carry beautiful images. Read esoteric, religious, scientific literature, expand your horizons. Don't be people who think only about something specific. The broader your horizons, the more energy you have for accomplishments. States of enlightenment love to come to active people who are interested in everything around them.

It is better to die in battle than in powerlessness.

I didn't say anything new just now, everyone knows that. And you haven't learned anything new. You are simply convinced that your feeling of thoughts about Light, about Love, are not true. It is not true to say that one should only enjoy material goods in this world, not think about death and turn a blind eye to it. This is not the truth, but only someone's idea, which is far from the real state of affairs. The real state of affairs is a spiritual reality.

17:19 Illness is the initial choice of the Soul. How to strengthen the immune system and prolong youth?

Participants in the conversation : Go to bed on time, and also fulfill some requirements that would allow your health to be ideal.

Irina : When I was a child, I was often sick. Due to malnutrition, I had a weak immune system, low hemoglobin, I fainted, and I was thin. Infectious diseases constantly arose, sometimes pneumonia, sometimes furunculosis. In this state, she was also picky about food. I ended up in hospitals and saw styes as a sign of weak immunity. If you don't go to the hospital, the stye goes away in one eye and immediately appears in the other. It hurts too.

Participants in the conversation : Is this state initially a choice of the Soul?

Irina : Yes, this is the choice of the Soul, because I had to go through this lesson in order to learn to enjoy the world around me even through a state of pain. This was at the age of 8-10 years, even before contacts with Kirchiton. I remember that at the hospital they gave me antibiotics, I was fine. I'll go out, it starts again in a week. Immunity is zero. The pediatrician told my mother: "She will outgrow it, her immune system will work normally, now we need to support her." Mom was surprised: "I have the same diet, work, shortage, but everything is clean with me." The doctor says: "What are you comparing, you are already an adult, your body is already formed. She is a child, a growing organism, constantly renewing cells, she needs a lot of nutrients." I was surprised by this answer.

Now there is no such thing that the slightest breeze or ice cream makes me cough or my throat hurts. I can get the flu if I get infected, but there are no complications after the illness. My immunity has really strengthened, I can feel it.

Participants in the conversation : Mead gives you various health tips.

Irina : Mead said about premature aging that if a person's age does not match his passport, if he looks older than his age, then in 90% of cases this is due to low fluid intake. He advised me to drink 2.5 liters of fluid per day. He said: "The greater your body weight, the more you should drink. Especially in the heat. You may not feel the need because you're used to it, and this causes dehydration of the cells and everything else."

#144 The history of the creation of the Interstellar Union. Cooperation of civilizations. Questions from the VK group (Part 1).

https://blog.cassiopeia.center/istoriya-sozdaniya-mezhzvyozdnogo-soyuza-chast-1
https://www.youtube.com/watch?v=zEts9jE8eUU

00:00

Maxim: Hello, dear TV viewers. Today, at a conference with Irina and our interstellar friends, we will raise questions from the VKontakte group on the topic “Civilization.”

Irina: Hello, dear subscribers of our channel and our group Cassiopeia. My name is Irina Podzorova, and today with us are representatives of the planet Esler MidgasCaus and a representative of the planet Burkhad - Raom Tiyan. They also greet everyone and wait for questions.

01:07 History and reasons for the creation of the Interstellar Union. Creation of a gravitational engine. Atom model. Is thought material?

Maxim: The first question is from the VKontakte group. Tell us about the Interstellar Union, about the history of its creation, what reasons contributed to this?

Irina: Raom Tiyan studied the history of the Interstellar Union. He says that according to earthly reckoning this happened about fifteen million

years ago. Our civilization was one of the founders of this union. In addition to our civilization, the civilization of the planet Tumesout, the civilization of the planet Shimor, and two civilizations that now no longer exist in their original form took part in its initial creation; they settled in their colonies.

The first civilization was located near the star Sirius B. Its name in Russian sounds something like Oedipesev, because it no longer exists in the Daraal language. The Daraalians later joined the Interstellar Alliance.

The second civilization was in the constellation Lyra. Their star is close to the star Vega, Alpha Lyrae, but it is not visible to telescopes from Earth because it is sixth or seventh magnitude. The characteristics of this star should be looked at by the number in your reference books, but this is the region of the sky that Vega occupies. The name of this civilization and planet was Tuluri.

Ashtar, a representative of the Edipese civilization from Sirius, has already spoken in detail about what happened to his planet and why many representatives of the civilization ended up on bases in space. And, although they have their own colonies, some of the Oedipusites remained at the base in space, since they do not want to settle in the colonies. You can learn more about this by watching our video with Ashtar Sheran and the administrator of Mitya.

Maxim: The base is on a large spaceship, as far as I remember.

Irina: Yes, this planet died as a result of a collision with the reptilians, because, as it turned out, the war in the solar system twelve thousand years ago was waged not only with them, there were also clashes with the Oedipesians. But Tuluri did not die in the war or from disasters. It’s just that its natural reserves, ecology, position around the star and other parameters have changed so much that they no longer satisfy the needs of the inhabitants of this planet and they, already having interstellar flights, settled on other planets, mainly on suitable planets of neighboring stars, including in the system Vega stars. As I see now, they seem to have moved one of the planets of Vega further away and carried out some terraforming on it. But this is now.

And then Tuluri, Edipasev, Shimor, Burkhad and Tumesout were the first creators of the original Interstellar Union about fifteen million years ago. The rest joined later. If we talk about Burkhad, then for many hundreds of years, after social evolution took place on the planet in the ancient period and wars stopped, we still did not go into space, I mean physically. We have placed emphasis on contacts with space civilizations through astral travel. Only then did representatives of Tumesout, for example, and Shimora, fly to us on spaceships, and several civilizations flew in from other galaxies. We didn't build our own ships, that is, we weren't like you, where we first flew into space, sent probes to other planets, and so on, and continued to fight. Our government believed that the internal problems on its planet were more important, that first it was necessary to solve the problems with the destruction of our own kind for the sake of some ideas, and only then explore space. When the planet's population expressed a desire to explore space, the government put forward a law that residents could explore either by coming into contact with other civilizations that arrive, or in astral bodies. Therefore, from the very beginning, research on astral travelers was prioritized over physical ones. This was the reason that our science largely takes into account the spiritual world, not like yours. And precisely because our science takes into account the spiritual world, it is sometimes difficult for us to understand each other, because for you it is based on materialistic perception. However, when we already had contacts with aliens, when there were many astral travelers and it became known about the presence of other planets with intelligent life in the galaxy, this became known to everyone, our authorities did not hide information and did not persecute contactees. The authorities themselves were in these contacts. Naturally, when all the wars had already been stopped, it became clear that there was still no such union in the galaxy that would unite intelligent civilizations. The government of the Burkhad civilization, together with all its people and with the other listed planets, decided to become the founders of the Union.

We began to look for new methods of going into space, new ways of interstellar travel, because the Tumesout and Shimor ships used then were not based on a gravitational engine, but similar to planetary engines on magnetic fields, only they were faster. These are advanced planetary engines that extracted part of the energy from the vacuum, what you call the ether. But they didn't do it the way intergalactic ships do now, but according to a slightly different scheme. The fact is that travel between stars, which now takes several minutes, then took two to three weeks on average, depending on the distance. For example, a

journey of six hundred light years took about three Earth weeks.

For earthlings, this is considered fast, because it takes many millions of years for you to fly on a jet engine at a speed of sixteen to twenty kilometers per second. Even thirty kilometers per second, of course, is very slow. For the needs of the Interstellar Union, this speed was not enough because, in addition to a distance of six hundred light years, there are even more distant worlds. Therefore, scientists decided to search, and they found a new way to move by gravitational jumps the way we are doing now. Initially, it was still a different technology, when it was necessary to make movements using a large amount of expensive material, which you call the element Germanium. Such experiments made it possible to travel a small number of light years, but at the same time it was necessary to expend a lot of gravitational energy.

We began to look for ways to make it cheaper and accessible to everyone. I will say right away that we began our search by studying the fundamental laws of the universe and physics. Namely, what is matter, what is energy, what is motion, why are dense masses of matter so rare in the Universe, compared to empty space, what can this be connected with. These are the questions we solved. But they were solved not by calculations, not by experiments, as you are doing now, but, mainly, through the spiritual world. That is, we were looking for a connecting link between the spiritual world and matter. Thanks to this approach, we discovered that those particles of matter that make up your world are nothing more than energies, that they are made of energies. When we made this discovery, through various experiments we learned how to extract certain types of gravitational energy and direct them to movement.

Therefore, now Raom Tiyan, addressing everyone who will watch us and who may be interested in physics and so on, wants to say that the solution to the issue of movement in space is not in the calculations that you make with the help of some material means , and it lies in the solution to what an atom actually consists of. The planetary model you currently adhere to does not answer many questions.

Maxim: Yes, I agree.

Irina: I would advise you to listen to those physicists, and simply science enthusiasts, who may not even have a special education, who criticize this or that position of the planetary atomic model system. You have such people. And there is no need to laugh at them and say that they are not educated and so on, because even if he does not have a special education, in many ways it is easier for him to understand this issue because his mind operates more freely with these concepts.

Maxim: Yes, I absolutely agree. But we, Raom Tiyan, do you know what the problem is? It turns out that I, too, am a researcher and do science, and the problem is that, firstly, the brains of official scientists, their consciousness, are really blocked from everything new. Secondly, this is a problem for the entire civilization. Many people and researchers do not understand that the spiritual world manifests itself in our material world, and these energies move from one state to another. They say we can't see it, we can't touch it, that means it doesn't exist. And this is a fundamental mistake, that they do not understand how matter is formed and so on, and accordingly build their incorrect theories.

Irina: He says that such scientists need to be told that they should try to get their thought out of their heads and feel it.

Maxim: That's understandable.

Irina: And when they cannot do this, they answer “we cannot touch,” then we must tell them that they are pointless.

Maxim: Yes, good joke.

Irina: If, according to their understanding, only that which is material exists, then in their understanding thought is also material or it does not exist. Right?

Maxim: Yes, yes. I agree.

Irina: We need to ask them directly the question: “Is thought material, or does it not exist at all”? If they answer that it is material, then ask

them to prove its materiality using the same methods that they ask to prove the existence of the spiritual world.

Maxim: Agreed, yes.

Irina: You see, any physicist, atheist or non-atheist, should be asked to sit down in the presence of cameras and the public, as they ask to prove the existence of spiritual things. They want evidence in front of cameras. The so-called repeatability of the experiment. Fine. Sit down, think that there is an apple on the table, clearly imagine it. And this apple, which will be matter, if thought is material, is presented to the public. This will be the first experiment. If they state that thought does not exist in reality, then ask how then they can think than if thought does not exist.

Maxim: That's right, but this is a long discussion. Let's continue with the questions.

Irina: When gravity ships were created, the process of creating the Interstellar Union by five civilizations accelerated significantly. They began to fly to each other, develop certain laws of general interaction, and began to create joint expeditions to discover new worlds and intelligent life forms. Their joint research was necessarily accompanied by astral travel through the spiritual world. Moreover, most often, an astral traveler and an astronaut were combined in one person, in one humanoid. This is how their exploration of the Galaxy began, the study of various forms of life from spiritual, physical and energetic points of view. They were not materialists. They were not just believers in the religious sense, and not esotericists, but those who recognize the spiritual world as the basis for the material world. I don’t know what such systems are called.

20:54 Goals and objectives of creating the Interstellar Union.

Maxim: Raom Tiyan, what were the initial goals and objectives of creating the Interstellar Union?

Irina: The goals were the joint cooperation of various civilizations in

exploring the Galaxy and helping each other in the development of each planet. Because the overwhelming majority of the population of these planets understood that each being is an embodied spirit that has its own goals and objectives, and everyone believed that together it would be easier, faster, and more constructive to achieve the goals of these incarnations than separately.

Maxim: Was such a goal as maintaining law and order in the Galaxy set initially or did it come about later?

Irina: This goal was self-evident because the main ability of the mind is the systematization of all the information that is around, and safety is one of the conditions for this systematization. That is, pathological forms of behavior that prevent others from growing and developing automatically interfere with the development of the mind and spiritual development of both the offender himself and those around him. Naturally, any instinct of any living creature is to create security. Even the most terrible criminals, who commit crimes both on Earth and in the Galaxy, are not devoid of this instinct, and they strive for safety for themselves and for their loved ones. They even strive for safety in committing a crime, that is, they hide from law enforcement agencies. This is their desire for the safety of those actions that they consider correct. But this is the same security instinct that law enforcement agencies have.

Maxim: As I understand it, Raom Tiyan and Mid, the active development of the Interstellar Union began with the advent of gravitational engines, when the possibility of rapid travel became possible.

Irina: Yes. Active construction of ships began, and active study of methods for terraforming different planets. Active construction of space bases in outer space, either on asteroids or lifeless satellites and planets, so that bases and factories can be created for these spaceships and their component devices.

24:20 Sequence of joining the Interstellar Union. Transfer of technology to new members of the union.

Maxim: Tell me, in the history of the Interstellar Union there were cases when some civilization, for example, complied with the rules for joining the Interstellar Union, after which it was accepted and given all the technology and knowledge, but they themselves were not so developed before that?

Irina: When each civilization joins the Interstellar Union, an agreement is drawn up, which is signed, in your opinion, in electronic form. It describes that those entering the Interstellar Union by universal voting on the planet must have at least seventy, seventy-five percent of the votes for joining the Interstellar Union. After joining this planet, representatives of the Interstellar Union arrive and teach their scientists how to produce using their technologies. They may be given several ships, but the emphasis is on training their own scientists. For example, if the Earth joined the Interstellar Union and it was allowed to openly share technologies, then together with your scientists physicists, engineers, chemists, biophysicists, metallurgists and all other necessary specialists, groups would be created with our specialists and robots that would show all the diagrams necessary to build the same engine, ship hull, protective suits. All stages would be explained to them in detail and they would stand nearby while your scientists did it themselves.

Maxim: I understand correctly, in our galaxy there are civilizations that have not joined the Interstellar Union and are themselves developing interstellar flights and so on. Their technology is still, in general, primitive; they fly between the stars for a long time. Are there such civilizations?

Irina: Yes, there are civilizations that themselves fly between the stars. Including, there are civilizations that also use a gravitational engine, because making such discoveries is the prerogative of not only the Interstellar Union, other civilizations can also make them.

27:00 Interaction of civilizations outside the Interstellar Union. Galactic Federation of Light. Access restrictions for Selbet.

Maxim: Are there civilizations outside the Interstellar Union that use a gravitational engine of their own design?

Irina: Yes, there is. In the same Pleiadian colonies of Burkhad. The Burkhadians, when they founded a colony in the Pleiades or a colony, for example, in the constellation Cygnus, which are not part of the Interstellar Union, they took with them gravitational engines, a ship and all the manufacturing recipes. Nobody took it away from them. Naturally, in the Pleiades there are not Burkhadian colonies, but their own civilizations that arose there, for example, the Futissians. These or those Burkhadian colonies can freely enter into relations with civilizations in the Pleiades and create any alliances with them, share with any technologies, this is their business.

This is how, for example, the Galactic Federation of Light that we know came into being. In any case, any civilization of the Interstellar Union has the right to join the Galactic Federation of Light, if, of course, the Galactic Federation of Light agrees to accept it. We have no restrictions in this regard. For example, Selbet, who was expelled from the Interstellar Union for the war not only with the Earth, with the Burkhadians, Tumesoutians, but also who greatly destroyed the inhabited planet Edipaseev, which we talked about. In any case, no one took Selbet's ships, they were simply restricted from accessing these planets and colonies. They could only conduct scientific research, and their contacts with young races were limited. Not that completely. Contacts with young races, not only with earthlings, not members of the Interstellar Union, are not prohibited at all, but are allowed only to individual scientists as part of other expeditions. That is, a Selbet scientist who lived on this planet at the time of its exclusion from the Interstellar Union, but who did not support this policy of war, could apply to the Interstellar Union even at the time of exclusion. Anyone could go there, there were all the contacts for this, and write a special statement that I am a scientist, I want to study people, make contact, and so on. After checking his loyalty to earthlings, he could be allowed to make contacts. But the generally accepted flights that were in the Interstellar Union were prohibited, that is, cooperation in such volumes was prohibited. And of course, no one took away ships with gravity engines; this is impossible to do because they had their own production for a long time.

Maxim: Well, yes.

Irina: Access was limited and greater control was introduced over this civilization. Further exchange of information and technology with them was stopped. After all, other discoveries are taking place in the

Interstellar Union, and if civilization is excluded, then further discoveries are not given.

31:08 Security measures in the galaxy. Observation of Selbet's ships. Causes of military conflicts on planets.

Maxim: I see. Tell me, after the military conflict with Selbet, the military effort in the Interstellar Union galaxy increased to control the Selbet experience? They could try to capture some star systems and so on, no one was safe from this.

Irina: Now.

Maxim: Have security measures been strengthened in any way to protect star systems from military invasion?

Irina: Surveillance of Selbet's ships has been intensified. If a ship left their zone of the solar system, then at the exit from the system so-called gravitational beacons were placed in space, which recorded the gravitational jump, and from them it was already established where this ship was flying and why, to which sector of the galaxy. They did not ask for any passes, but there was secret surveillance to ensure that there were no aggressive actions. That is, they did not interfere with space exploration, and if there had been any invasion by aggressive representatives of this race, it would have been stopped, just like by the Earth.

Maxim: And if we assume in the Universe, maybe not only in our galaxy, but throughout the Universe, there are cosmic races that have also reached a high technical level, this rapid movement, for example, between stars, but whose representatives pose a greater danger to intelligent space and somehow you still have to control them a little. Are there such civilizations?

Irina: Example with Tisiona. They still have wars going on. She did not join the Interstellar Union because there are wars on the planet. You could say that five different races, five different factions are fighting among themselves, some of them want to join the Interstellar Union,

and some are resisting. And this has already lasted about eighty earthly years.

Maxim: Are they resisting because they might lose power over the planet?

Irina: For what reason, Raom Tiyan? He says yes. Raom Tiyan says that he was not on Thision, Mid and Irina were there. Yes, I remember Thisiona. Mid, what are they all fighting over there? Did you manage to learn anything from them? What don't they want? They say it's interference. That those who are against entry, they say this is interference in our affairs by another civilization, they don’t just want to capture us, they want to control us, our every step, tell our scientists what to do, what to research, who to fight with. We ourselves must go through this path of development, and you who are in favor of joining are traitors to our race.

Maxim: I see. Yes, there is something very similar with our earthly affairs.

Irina: This is not surprising, because the same intelligent spirits incarnate in different races and they will have approximately the same arguments, but at different levels.

35:01 The reason for the war on Thision.

Maxim: But on Thision, as I understand it, there is no understanding of the spiritual world? They are more materialistic, right? Is that why they have wars?

Irina: They have an understanding of the spiritual world, but it is quite unique. Those who are fighting for not joining the Interstellar Union believe that this, on the contrary, brings them closer to spiritual development, and those who are fighting for joining the Interstellar Union, moves them away, because for them justice is higher than the crime of murder. Justice in their understanding.

36:00 Emblem of the Interstellar Union.

Maxim: I see. Okay, then the next broad question is about the Interstellar Alliance. What is the emblem, the sign of the Interstellar Union? Does he exist at all?

Irina: They show me a star, seven-pointed or eight-pointed, in my opinion eight-pointed. And it's not flat, but somehow in different directions.

Maxim: Volumetric?

Irina: Yes. And from the center of the star there are ends like cones.

Maxim: What color is the star?

Irina: It is yellowish and there is a white ball running along it from the center. From this white ball they go like waves along these rays, to the sharp end, to the light. They walk rhythmically. They said that this is the rhythm of the Universe.

Maxim: Interesting, we'll have to sketch it later.

Irina: It's somewhat similar to your emblem, which is in the middle, only the color is different and it's voluminous.

37:35 The main civilizations that come into contact with earthlings.

Maxim: Okay, then the next question. Describe the major civilizations that are part of the Interstellar Union that have some fundamental significance for it.

Irina: These civilizations matter to the Earth. Of the one hundred and sixteen civilizations of the Interstellar Union, forty-two come into more or less frequent contact with Earth, but only six of them physically, from time to time. Let me remind you that there are civilizations that

are not members of the Interstellar Union, but which come into contact with the Earth with its permission. They may even be from another galaxy, like, for example, Mitya. The Futissians are not part of the Interstellar Union, but they still make contact with Earth.

Of these forty-two civilizations, those representatives who act together with the Burkhadians are of great importance to you, because Burkhad is considered the capital of the Interstellar Union, and secondly, one of your creators. And not just one of your creators, but whose genotypes, and therefore both energy and nature, you have the most in comparison with the two other galactic races that also created you, your bodies. For the representatives of the galaxy, you people are most similar to hybrids of local terrestrial animals with representatives of the capital of the Interstellar Union with an admixture of genes from two other civilizations, one of which is not anthropomorphic, but a reptilian species. Therefore, the representatives of Burhad and some of its colonies have the most contact with you, and they either come into contact more often or less often. Disnite contact quite often, although they are not anthropomorphic, strictly speaking. There are also Disnita colonies, which are now located in the constellation Aquila, in the constellation Ophiuchus.

Maxim: The Disney people have underwater bases on our planet, right?

Irina: Yes. They have underwater bases in the constellation Aquila. Kirchiton even took me there to this planet.

Maxim: And here on Earth, they also seem to have underwater bases?

Irina: They have bases on Earth. In Russia, their base is located near the mouth of the Lena, in the north.

40:49 Location of Interstellar Union bases on Earth. Fenugreek.

Maxim: Tell me, is someone from the Interstellar Union based in Altai? They say it's there.

Irina: There is that same base there that in ancient times was called Shambhala. And what is in Tibet, in Kailash and other places in Tibet, are its branches. Shows me that some branches and the central base in Altai, Shambhala, are connected by underground passages along which a plate can move.

Maxim: Interesting.

Irina: Only it’s dark there.

Maxim: Yes.

Irina: He says that Altai has a common base of civilizations. That is, in southern Altai there is now a large base in the mountains, or rather under them, on the border of Altai and Pamir. The point shows what the district is like. Image. You need to open the program and look.

Maxim: Okay, we'll see later.

Irina: The fact is that there are now more than ten representatives of civilizations there, the Eslerites, the Tashigans, the Burkhadians, and the Tumesoutians. It is not considered to be someone else's, but it was founded by Esler. Now this is the common base of the Interstellar Union.

42:35 The shapes of alien spaceships are plates, pyramids, cylinders.

Maxim: This question is overdue, I don’t have it on the list, but many people ask it. Let's say the shape of spaceships in the form of a flying saucer is fundamental. The Pleiadians in some contact said that the shape of a saucer is inherent in many ships. That spaceships used to have technology that created a magnetic field around themselves in the form of a sphere. Why do many ships have a saucer shape? What is this connected with?

Irina: The shape of the plate is convenient for moving in the

atmosphere, firstly, for creating a magnetic field around it, it is more stable. Secondly, to create a gravitational jump, because such an elongated and slightly domed shape allows gravitational waves, gravitational energy to spread faster from the gravitational engines and this simplifies the transfer. It even depends on the form.

Maxim: That is, this is not accidental, it is technically provided for.

Irina: Any other shape is possible, including a cylinder, and there are even ships in the shape of a pyramid, for example, among the Tumesoutians.

Maxim: What is the reason why they started making other pyramid shapes, triangles?

Irina: It depends on the preferences of a particular civilization. For example, the Tumesoutians believe that the pyramids contribute to the energetic harmonization of the space where they are located, due to the fact that what you call the waves of the ether are more directed and flow to one point. But these are not magnetic fields, but those that connect the material world with the spiritual, such as torsion fields. They flow from the corners of the pyramid to the top, and from the top they are already directed into the room. This is how they harmonize space, including their houses and ships. And, coming into contact with earthlings in Egypt and in other countries, they taught people, their contactees, to build this way. They showed them how to do it themselves, and they also made such buildings on Mars and the Moon.

#145 Galactic Federation of Light. Crime, hierarchy of demons. Humor. Questions from the VK group (part 2)

https://blog.cassiopeia.center/istoriya-sozdaniya-mezhzvyozdnogo-soyuza-chast-2
https://www.youtube.com/watch?v=SIo2dRGVQpc

00:25 About other civilizations of the Interstellar Union.

Maxim : Is there a civilization of a high spiritual level in the Interstellar Union that owns several colony planets, such as Abdahor, Telmi, Padhaor?

Irina: I don't know all the languages of the Galaxy. At least roughly describe what they look like.

Maxim : No description, unfortunately.

Irina: Is one of the stars or constellations central?

Maxim : I can't say. Let's skip this question.

Irina: Representatives of Abdakhor can be anyone: plasmoids, humanoids, the same Tashigans.

01:15 Currency of Burhad . The cost of an intergalactic ship and renting a place on an alien earth base.

Maxim : How many resources in relative terms does it cost for aliens to rent a base? What do they pay with: gold mined on the planet or in the working hours of alien researchers?

Irina: It's different on every planet. Let's take, for example, a ship like Kirchiton's saucer. We don't have a single currency. Each planet has its own. There are several dozen basic ones in the Galaxy, but everyone can exchange. For example, a Kirchiton dish with a payload mass of up to 700 kilograms, which can travel up to 1000 light years in 5-6 minutes (plus has a certain degree of magnetic engines) costs about 350,000 paari (in Burkhadian units) on base. I earn in one period, equal to three of your months, in the region of 700,000 paari. Rent depends on the base. If the base is not Burkhad, but for example, a place on the base that you called Altai, it costs approximately 45-50 paari for a period of 72 hours. If the explorer does not belong to the Interstellar Union, then either he or his government must pay that planet. There are different schemes.

Maxim : Is the base free for those who are members of the Interstellar Union?

Irina: No, not always. If this base is not common (for example, in Crimea there is a Tumesout base), then they also charge a fee, but a little less. For members of the Interstellar Union, this is somewhere around 10-15 paari over a period of about 40 Earth days. For others it is more expensive, because other researchers come for a short period. All other researchers of the Interstellar Union are at this base (in Altai) for free, but must have special permission.

05:44 Laws and judicial system of the Interstellar Union.

Maxim : What are the legal rules or laws of the Galactic Union called? Is it possible to get at least the basics of criminal law?

Irina: It's possible. The law is called "On security and restrictions on the rights of citizens in the event of a violation of this security." This rule, about limiting the rights of intelligent humanoids in the event of a security breach, applies to everyone.

Maxim : Is there such a division in the Intergalactic Union as we have: civil law, criminal law? Or are there some common ones?

Irina: We don't have such separate concepts. There are laws that define this or that area. What law should you give? I'll tell you that we don't have something like you: for murder you get a certain number of years, for theft you get a certain number of years, and this is the same for everyone. The law is more individualized. If a crime occurs, the main rule is always to figure out why it happened.

Maxim : Do you have judicial bodies that look into this?

Irina: We can only vaguely call them judicial. It includes not only experts in these legal laws, because... We don't even have such professions. For us, these are, rather, psychologists who study the criminal tendencies of individuals. They are the ones who talk with criminals and predict the danger of this humanoid influencing society if, for example, he is not given a restriction on his rights. We do this not because of punishment, but on the contrary, to help him realize the wrong line of behavior.

Maxim: Does it happen that space criminals from different civilizations act under the factor of possession by some demonic entities or plasmoids?

Irina: Yes, this happens, but, in any case, this humanoid allowed itself to reach this state. He may not give in to them, but this still does not relieve him of responsibility. Although, in some cases, it may limit it somewhat, but it does not completely remove it.

Maxim : Do they help the criminal, in the case of sending criminals to the planet, to remove this possession by dark spirits, or does it remain so?

Irina: On this planet of criminals there are services (psychologists, spiritual workers) that work with the human Spirit. There are specialists in connecting with the Higher Self, but they are guarded by other people so that they are not harmed. They work as spiritual physicians,

as spiritual healers. There are also ordinary doctors who deal with damage to physical bodies.

09:58 Cooperation of the Interstellar Union with the Unions of other Galaxies.

Maxim : Do the Interstellar Union and the Galactic Federation of Light cooperate? Does the Interstellar Union cooperate with the Unions of other Galaxies or their individual civilizations?

Irina: Yes, they cooperate for the purpose of scientific, sociological research, research into the spiritual world, and even technical purposes. There may be different goals of cooperation, although cooperation of one civilization with another does not necessarily imply entry into this Union. It's just temporary.

10:42 Voting and the political system of the MS and the State Fiscal Service.

Maxim : How does the voting procedure differ in the Interstellar Union and the Galactic Federation of Light?

Irina: As far as I have studied political systems on different planets, there are different forms, but their content will be similar. The content of all political structures of the societies that are part of the Interstellar Union is manifested in the fact that either the inhabitants choose their own law, or choose from those proposed by the government. Residents can make a law for themselves and propose it to the government, which, with a majority vote, decides whether to approve it or not. Of course, it’s different in different places, everywhere there are nuances, but on most planets everything looks exactly like this. On those planets that are not part of the Interstellar Union, it may be different. For example, like yours. When only a certain assembly of rulers, i.e. minority makes laws for the majority. Or only one ruler adopts these laws for everyone without general approval, that is, as in a monarchical system. For example, there is a monarchical system in Tashig. There is a hereditary monarchy, but the ruler rules only with the laws that exist. If this monarch (in your opinion, the “king” or “emperor” of Tashiga) wants to pass a new law, then since this world is

part of the Interstellar Union, the approval of the majority is required there.

Maxim : How similar is decision-making at the level of the Interstellar Union and the Galactic Federation of Light together?

Irina: Despite the fact that all civilizations are different and founded with different goals, the Union has a common policy. What is the Union? This is the unification of different civilizations on some basis of some kind of common Charter of this organization. It, of course, may differ, but the process of adopting this Charter and all amendments to it, decisions, is carried out at a general meeting or at a meeting of a larger number of members of the association. In the Galactic Federation of Light, even plasmoid civilizations take part in this meeting. And since they do not have physical bodies, such meetings are held in astral space. Plasmoids are not able to act in any other way in the material physical world, and embodied physical bodies are not able to act in their world. In the astral plane, both are capable of acting.

14:46 Destructive civilizations, evaluation criteria.

Maxim : The Galactic Federation of Light, as a union with plasmoids in this organization, is a unique phenomenon? Are there other such collaborations in the Universe?

Irina: Yes, this is a unique phenomenon of exactly this scale in our Galaxy. There are more plasmoid-type civilizations there than humanoid ones.

Maxim : Is there such a union among low-vibration parasitic civilizations?

Irina: The whole point is that we do not divide civilizations into low-vibration or high-vibration. We always believe that the parasitism of individual civilizations is entirely the responsibility of those individuals who do so.

Maxim : So it turns out that not everyone in a parasitic civilization is

parasites?

Irina : Maybe the vast majority, but not all. There, too, different Spirits incarnate. For example, there are those who go against their civilization, some kind of general policy, so to speak when talking about plasmoid civilization. They can even go against the general flow of the mind, unite into some of their own structures, which try to transfer others to a regular source of nutrition, independent of the vital energy of Spirits embodied in dense material bodies. They can do this with varying degrees of success. You are probably wondering whether an entire civilization can be destructive, evil, low vibration? Just imagine that you, Maxim, are a researcher from another planet (Disaru, Burkhada or Disnita). And you arrived with the task of answering the Interstellar Union: is planet Earth low-vibration, destructive, do criminals live there? And so you flew to Earth under the guise of an earthling, lived here for two months, looked at everything, studied all the people and events that happen here through your media, means of communication, politics, economics, managed to read something, talked with ordinary people and etc. Then, after a couple of months, you return to the Interstellar Union and prepare to speak and tell whether earthlings are low vibration or high vibration. What do you say?

Maxim: To be honest, the vast majority (and this is no secret) of us are on low vibrations. And we can say that so far on Earth there is more destructive than constructive.

Irina: Can you call the entire Earth a destructive civilization?

Maxim: No, of course not.

Irina: And for what reason?

Maxim: Because there are bright Souls here and, indeed, decent people who adhere to spiritual practices and laws.

Irina: It turns out that civilization is not assessed by the vibrations of the majority?

Maxim: In principle, yes, it works.

Irina: Then by what criterion is its vibrancy and destructiveness assessed, in your opinion?

Maxim: If there is a threat to ecology, the environment, then this is an indicator of a destructive civilization. And our situation is quite sad.

Irina: Does Earth threaten the ecology of the Galaxy?

Maxim: Not yet. But we don't have spaceships yet. But if there were, then there would probably be a problem.

Irina: So, is it a matter of spaceships or a state of consciousness, if we consider destructiveness?

Maxim: It is clear that in a state of consciousness.

Irina: So what is the state of consciousness of the majority? Imagine if you actually looked at your world from the outside.

Maxim: I understand what you want to say. In general, civilization cannot be called destructive. There are certain representatives who plunge everything into chaos and are destructive, I agree.

Irina: Actually, I was asked that too, Maxim. Now, if I am an alien, then how would I rate it: destructive or positive? I also answered that you can't judge like that. Many civilizations in the Interstellar Union believe that the destructiveness of a civilization must be assessed according to the laws generally accepted in this civilization. It is according to the laws, and not according to deviations. So what are the laws in your civilization: destructive or constructive?

Maxim: The legislative framework is moving towards constructiveness, this is obvious.

Irina: This is obvious to you. Mead and I have said more than once that for many civilizations of the Interstellar Union, a law that allows one to take the life of embodied but not yet born intelligent Spirits is not considered constructive.

Maxim: I am also against this.

Irina: Here we are talking not about the fact that there are individuals who are against or not against, but about the attitude of the legislative bodies to this situation.

Maxim: Regarding abortion and many similar factors in our legislation, I completely agree. But in our legislation there is, for example, punishment for deprivation of life, for criminal actions - robbery, violence, etc. This is already a positive shift, because this did not happen before.

Irina: Yes, positive. But you say that parasitic civilizations that siphon energy from people are destructive. The fact is that they pump energy out of people only of a certain quality and certain vibrations. As a rule, it accumulates from chronic irritation, chronic stress, chronic fear. It happens that a person does not say anything to others and behaves quite adequately, but no one knows what is happening inside him. And what happens inside him affects both his energy and his physical body. And these thoughts and feelings of a destructive nature create energy blocks, first, in the astral, mental fields, and then they move to the etheric field. If you do not remove them from the etheric field, they disrupt the functioning of the physical body. By the way, this is studied in psychosomatics. Let's take two people. One has a parasitic plasmoid that takes this destructive energy from it, preventing energy blocks from accumulating. And for the second person the plasmoid is not suitable in terms of its vibrations, or the low-vibration person himself is not suitable for the plasmoids in terms of his internal vibration. In this case, no one will be able to connect to it, even if it is low vibration. This also happens.

23:55 Destructive behavior, its motives and justifications.

Maxim: At one of the conferences, our interstellar friends gave an

analogy of these destructive entities with our earthly criminal groups, which, in the pursuit of their common interests, unite into a certain structure. Are there similar interest groups among parasitic entities?

Irina: Yes, they can unite for their interests, because either they do not consider their actions destructive, or they believe that this destructiveness is only beneficial and thus justify themselves. For example, let's take your thieves, who are the closest to parasitic structures. A thief is a parasite who steals other people's material resources. And the one who does this always finds a justificatory thesis that allows him to live in a precarious peace with his conscience. After all, he also has a Higher Self, a Guardian Angel, consultants, mentors who sent him to incarnation and who constantly tell him that this is all wrong, i.e. are constantly present with him. And this thief, in order to continue his activities, comes up with an answer for himself in his thoughts. For example, that using this method he fights the authorities that he does not like. Or that the rich still have nowhere to put their money. I know that you had such a real character (*note: Robin Hood*) who robbed the rich and gave money to the poor. Those thieves who do this usually forget to distribute the loot to the poor. And even if they give it away, then this is not an honest act before God and the Higher Self. Yes, we can call helping the poor a manifestation of love. But the real manifestation of love is manifested not in the fact that you do it at someone else's expense, but in the fact that you earn it yourself, i.e. a pure, constructive act that will positively influence spiritual development. There are thieves who justify themselves by saying that since another person hid his property poorly, it means that he himself is to blame for the theft. Other thieves see some degree of romance in theft. They like to hide from law enforcement. Some consider punishment for a smaller crime unfair, comparing it with the fact that those in power steal many times more, and nothing happens to them for it: let them become more loyal to the people, then we will stop stealing. And some even believe that law enforcement agencies are not needed, that this is all for control over the people. But even these thieves themselves can be robbed, and it doesn't matter whether they earned it with their own labor or stole it, but they already consider it their property. If they and their loved ones are robbed, they will not consider it fair. And all because they consider themselves exceptional, i.e. taller than others. Pride and arrogance are vices that lead to a low vibrational state.

Maxim: I once conducted a test. Our people often criticize the government that there is corruption at all levels. And I said to one:

“Imagine that you are in such a high position and you have the opportunity to steal millions.” To which he replied that he would not steal. You see, this is the consciousness of society. Now he says that he wouldn’t steal, but in reality?

Irina: Mead says that, yes, there really are such people. But even if this man did not steal, he has bosses higher than him. Do you know what I mean? You have a hierarchical system of power. That is, if bosses are dishonest and see that a subordinate does not steal, they will feel the danger of exposure and will try to get rid of it.

31:38 Hierarchy and intrigue in demonic structures.

Maxim: Do demons from level 1 to 6 also have their own communities? Do they have some kind of hierarchy in principle?

Irina: Of course. Those same fascists had their own structure.

Maxim: It turns out that low-vibration Spirits obey high-vibration ones only on a low plane?

Irina: Level 5 are Demons, and level 6 are Archons, which include the “chiefs” of these Demons who have experience in managing a team.

Maxim: As far as I heard, Demons have a very strict hierarchy. This is true?

Irina: The hierarchy is rigid. But there is also abuse of power, since everyone deceives each other. Even one of their own can deceive one of their own, because in lies they see the achievement of their goals. But we must remember that the one who lies and deceives is the one who is obsessed with the fear of the collapse of his plan.

Maxim: In our criminal world there is a leader and subordinates. And if the opportunity arises, they will throw him out to take his place. Is this the case with you too?

Irina: In the Spiritual world it is not so easy to remove a leader, because... it is impossible to kill him, poison him, etc. But some intrigues are quite possible.

33:20 Humor as understood by representatives of the Interstellar Union.

Maxim: Do the races of the Interstellar Union joke among themselves? Do they tell any stories or anecdotes?

Irina: We don't have such a genre of literature as "anecdote". But it happens that we hear similar stories from contactees, but it does not seem funny to us.

Maxim: We really have a lower vibrational humor.

Irina: Raom Tiyan asks to give some example in order to comment on it, and then they will tell something.

Maxim: I love black humor. And sometimes I find some everyday situations funny. For example, very often at my work (I worked in the Ministry of Emergency Situations) I saw a situation where the boss says one thing, but it turns out quite the opposite, i.e. not at all the way he planned. Chaos ensues, everyone starts running, and it's funny for me to watch it. It's funny because a person in a high position makes a decision, and then how it all collapses. When I worked as a communications engineer, a commission was supposed to come. The boss asked me to urgently cut off all the electrical cables around the building so that nothing was hanging in plain sight. I did everything in good faith. Moreover, he cut off absolutely all the wires: necessary and unnecessary. Everyone started running and panicking. But I did everything literally, cutting off everything.

Irina: The perception of humor, of course, depends on the individual. Raom Tiyan says that recently on Earth he heard the following joke from one contactee: "What question cannot be answered in the negative?"

Maxim: I don't know. You need to think about it, I won't say it so quickly.

Irina: Sometimes people call each other and ask: "Are you alive there?" After all, they understand that it is impossible to answer this question in the negative, but they ask it anyway.

Maxim: Now I understand.

Irina: Raom Tiyan says that the humor of this question lies precisely in the fact that how can an inanimate object answer?

39:05 Ceres and its bases.

Maxim: Whose bases are located on the asteroid Ceres? Does any civilization live there permanently?

Irina: Raom Tiyan says that there are bases of the Sho-Hariki civilization there. They wear light protective suits because... easily tolerate temperature changes, radiation, etc.

39:50 Alcor and its civilization.

Maxim: Are there civilizations of the Mizar and Alcor star systems in the constellation Ursa Major? And if so, what do they look like?

Irina: Yes, there is a civilization near Alcor, but it is not part of the Interstellar Union.

Maxim: Do they carry out interstellar flights? What is their technical level and what do they look like externally?

Irina: They have contactees who participate in joint expeditions. They can make interplanetary flights, and they are more advanced than earthlings. In appearance they are similar to the Tashigans, only they

have a triangular lumpy head, brownish skin, and small eyes with the outer corners down. Dense build. Height like earthlings.

41:28 About the existence of Cyclopes.

Maxim: Are there civilizations like the Cyclops, i.e. with only one eye?

Irina: We have never encountered anyone with less than two eyes. One eye cannot fully transmit all information throughout the nervous system, unless we are talking about robots. But there is one with three eyes.

Maxim: I wish all the viewers all the best. Goodbye and see you next time.

Skype conference 10/03/2020

Participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Maxim Bronevsky – research engineer, ufologist;

MidgasKaus from the planet Esler - biologist, psychologist and specialist in alien civilizations;

Raom Tiyan from the planet Burkhad is a specialist in energy interactions in the material world.

#149 Meeting representatives of

the civilization of the Lyra constellation.

https://blog.cassiopeia.center/znakomstvo-s-predstavitelyami-sozvezdiya-lira
https://www.youtube.com/watch?v=0HmD_TJc2-0

00:30 Constellation Lyra and representatives of the Tuluri (Raohmis) civilization.

Irina: Hello everyone ! Our live broadcast was interrupted because there are three representatives of a new civilization for us here - the Lyrans. Their astral vibrations have not yet adjusted to our technology and can affect high-frequency radio waves, because of this the connection was interrupted.

Representatives of the Lyra constellation are one of the founders of the Interstellar Union. The Lyra constellation consists of many hundreds of stars and several dozen galaxies, so the distance from the Earth to each of these objects is not the same.

I would like to introduce you to Alina, this is my friend and assistant today. Maxim is now in Abkhazia, in the city where we are going to hold a New Year's conference.

Alina: Hello, dear friends. My name is Alina. Thank you for your questions, I will save and read them for Irina.

Irina: I would like to start our broadcast with a description of the appearance of the Lyrans. Their average height is from 150 to 190 centimeters, and in this they are very similar to us. In terms of their structure, they are anthropomorphic, that is, warm-blooded creatures and mammals similar to humans. The difference from the human race is that they have dark brown, with some purple tint, skin color. The Lyrans have dark, deep-set eyes overhanging the frontal bone, a broad forehead and a triangular-shaped face that tapers to a chin, which has a triangular, pointed shape. Hair in men and women is most often long, dark in color with a dark shiny tint. They are dressed in blue

overalls with red buttons in two rows, which are located on the sleeves, chest, legs and abdomen.

Now there are three representatives of the civilization of the Lyra constellation with us: Shuarm, Quarti and Artis. The Head of the Space Fleet, who belongs to the 29th sector of the Galaxy according to the Lyran maps, will talk to us. Artis greets all the inhabitants of the Earth who are now watching the broadcast. They are the Tuluri civilization - this is the name in the Daraal language. The self-name of the Tuluri planets is Raohmis, which translated means “star worlds of light.” We are one of the founders of the Interstellar Union, but for some reasons that are compelling to us, our presence on Earth at the present period of your history is minimal. Artis and his friends are ready to answer your questions.

08:33 Intergalactic news.

Alina: We always start our live broadcast with intergalactic news. Can the Lyrans tell us what was interesting in the last week on Earth in the Galaxy?

Irina: I am one of the heads of the space fleet, my flight of ships consists of 217 devices. I am interested in everything related to 3rd density space exploration. Over the last week on earth, I was interested in the news that in one of the star clusters, near the core of our Galaxy, a new insectoid civilization was discovered, reminiscent of our spiders, in which intelligent Spirits have recently begun to incarnate. This civilization is at the very beginning of its existence. It is very rare to observe the development and birth of insectoid civilizations. These insectoids, in their structure, bear little resemblance to the Sho-Hariki civilization known to you through Irina. Nevertheless, our scientists, together with their Burkhad colleagues, are carefully observing the initial stage of development of an insectoid civilization unknown to us. According to our data, the first tribal communities had just begun to form there.

Alina: Thank you very much.

10:55 Planet of the Lyrans, colonies, population, music in their

life.

Alina: Is there such a concept as “music” on your planet? Do you compose songs and music? What dimension do the Lyrans live in?

Irina: We are a humanoid race, that is, we live in the 3rd density level. The appearance that I described is characteristic of our physical body. In the astral world, we can take on any images, including those similar to earthlings in skin color, eye shape, etc.

Yes, of course, music is one of the favorite activities for many members of our race. I wanted to immediately emphasize that our home planet, which was located near a seventeenth-magnitude star in the constellation Lyra, is now uninhabited due to the excessive expansion of our star and changes in the energy of our planet. We now have 97 colonies not only in the Lyra constellation, but also in other constellations, and even outside our Galaxy. All our civilizations and colonies are collectively called “Raohmis”, that is, “worlds of starlight” - this is an approximate translation into your modern Russian language.

Alina: How many thousands of years is your civilization? Do you have music? Can you sing?

Irina: In all 97 colonies, we have more than 600 billion people. Indeed, many representatives of our Raohmis civilization are very passionate about music as a means of expressing their feelings that cannot be expressed through words. Artis is now transmitting mental images to me, which can be called their music, but these are not like sounds in our understanding, and I will not be able to reproduce them, perhaps this could be done by a person who knows how to play a musical instrument.

Artis asks me: “What does this look like?” From his memory, he is now reproducing music in a mental image, but I do not know such an instrument. Approximately, it looks like a flute, and there is also something rhythmically knocking there. Maybe Alina knows this instrument, but I don’t know this one.

14:30 Lyrans about stopping physical contacts with earthlings.

Irina: Artis, I heard from my curator Kirchiton that representatives of your civilization were against maintaining physical contacts with earthlings, and we all really want to hear arguments in favor of this opinion?

Yes, I myself was present at the meeting of the Interstellar Union currently being discussed, where the issue of maintaining physical contacts with representatives of your planet was decided. Indeed, many representatives of my civilization, including myself, are against maintaining physical contacts with representatives of the Earth for any purpose at all, including research or tourism.

Why did we come to this conclusion? The first, most important reason is that for physical contacts it becomes necessary to fly to Earth in well-protected ships, and there is a danger of these ships being detected. Over the past 5–6 years, this has led to the death of several dozen crews. The second reason is that, according to the rules of the Interstellar Union, it is forbidden to provide evidence of physical contacts to earthlings due to the excessive interest of your military in the topic of space and contacts with alien races. But many representatives of our civilization believe that with the continuing trend towards a lack of physical evidence, these physical contacts are meaningless and compromise the contactees even more, causing mistrust among their earthly community. This is our position and we can justify it if we wish.

Alina: What exactly needs to happen for you to change your views? Could Project Cassiopeia help with this?

Irina: Now I cannot answer for all representatives of many worlds, but for me personally, to change my views in favor of maintaining physical contacts, it will be enough for the condition to be met - the absence of even the slightest evidence, since their presence preserves the danger of revealing the contactee, and also the death or capture of the ship's pilots.

18:51 Contacts of the Raohmis civilization with earthlings, genetic

compatibility.

Alina: Do you want to take over our planet? This question has already been asked on our air 7 times, please reassure our viewers.

Irina: We want representatives of your world to become full participants and employees of the Interstellar Union. You are under close surveillance by the civilizations of the Interstellar Union and protected from the aggressive intentions of civilizations that may try to attack your world, as happened 12,000 years ago. Then the Solar system was protected much worse, since no one expected such a turn of events. Our Raohmis civilization was in close contact with earthlings about 300 - 350 thousand years ago: we had many bases here, and we entered into close relationships with creatures of your species, since we are genetically compatible, and children of our species were born to representatives of the Earth. This partly provoked the appearance of a dark race on planet Earth, but this was not a genetic intervention in your species - these were common children. This was not the result of genetic experiments - it was a local event in the vastness of what was then still a single continent. Externally, the Lyrans look like this: the height of approximately an earthly person, dark skin with a purple tint, dark hair and deep-set eyes, a triangular-shaped face that tapers at the chin.

21:55 Lyran food and life expectancy.

Alina: What do you eat? What is your life expectancy?

Irina: Our species is omnivorous. We prefer to live near water, ponds and eat sea fish or seaweed. Underground they grow something like nuts in shells, only they are small. These nuts are similar to our coconuts, only white, they grow underground in whole clusters, and they are broken with a thin, sharp object. Inside these nuts are also white nuts, which are ground into powder and mixed with water, something like milk is obtained - this is a common food of the Lyrans. Life expectancy is 1000 – 5000 years.

23:17 About the Lyran bases. The capital of the civilization is Raohmis.

Alina: How many bases do you have on Earth?

Irina: Now, at this period of your history, there are no Lyran bases on Earth. The nearest branch of our base is on the far side of the Moon, but at the moment only our automatic biorobots are present there.

Alina: Are the Lyrans' level of consciousness higher than that of earthlings?

Irina: What do you call the level of consciousness?

Alina: Lyudmila, write what you call the level of consciousness?

Alina: How far (at what distance) is the contactee who is now in touch with us?

Irina: Artis, where is your physical body? My physical body is now located in a spacecraft at a distance of about 525 light years from your world, near the globular star cluster in the constellation Lyra.

Alina: Thank you.

Alina: Please name your capital.

Irina: The capital of the civilization is Raohmis?

Alina: Yes.

Irina: Skhgarti, for us it's like a planet – a city. There are many orbital space bases around Skhgarti.

24:55 Origin of the peoples of southern Europe.

Alina: Did the Spaniards descend from the Lyrans?

Irina: Mid, please explain to dear Artis where Spain is located. Mead is now showing Artis the map.

The peoples of Southern Europe descended from the common ancestors of the Indo-Europeans, who gradually acquired a different color of skin, eyes and hair, due to the proximity to the equatorial zones and the hereditary variability of their species.

25:52 Relocation of the Lyrans to the Vega star system.

Alina: Are you related to the star Vega?

Irina: Yes. There are many different mini planets orbiting around Vega, but this star is very bright and hot. We, representatives of Raohmis, approximately 2500 earthly years ago, established a place of residence there within the gravity of Vega, that is, in the Vega system. To do this, we moved the Dwarf Planet far away to a distance equal to approximately 35 Earth distances from the Sun and created an atmosphere on it with the help of special microorganisms. Only then did the climate and the state of the hydrosphere become suitable for us, and our civilization was able to develop there. In the Vega system, the Lyrans created a planet using terraforming.

27:37 Lyrans about the Higher Self.

Alina: Do you often communicate with your Higher Self?

Irina: The Higher Self is not an embodied part of the Spirit in our terminology. We are in constant contact with him, and it is difficult for us to imagine how we can not communicate.

Alina: How do you raise your vibrations and level of awareness?

Irina: You can only increase what has been reduced artificially. We

consider any experience in the material world necessary for a more complete awareness of ourselves at the center of the Divine world; it is this understanding that allows us to maintain consistently high vibrations.

Alina: Thank you.

28:49 Family relationships, the birth of children and recreation among the Lyrans.

Alina: How are your families created? How (how) are your children born? What feelings do you experience, for example, love?

Irina: Our families are built on the principle of marriage partnership. We do not have a mandatory rule to live with one partner for the rest of our lives or not to live with one. We choose our partners according to vibrations that are suitable for us, but with a change in vibrations, we can change life with one partner to life with another. You call it “divorce one and get along with another.” We give birth to children in the usual way for mammalian species of our Galaxy.

They have such customs on the planet, for example, two people live, and they realized that they have already passed their lesson together, then this couple separates and looks for other partners - all this exists harmoniously among the Lyrans, that is, no, no hard feelings, etc. P.

Alina: How do you relax?

Irina: We relax, dissolving in the light of God’s love.

Alina: Do they all have the same rest?

Irina: What exactly do you call rest? Do you mean from existence in the material world and returning home, or some kind of rest?

Alina: We come home from work and go to relax: we hang out with

friends, rollerblade or dance in a club.

Irina: This is a change of activity.

Alina: How are you changing your activities? For earthlings this is called “rest”.

Irina: And for them it’s a job change.

Alina: I see, that is, for them this is also work, and rest is when you dissolve in the light of God’s love.

Irina: Perhaps the contactee understands the word “rest” this way.

Alina: Earthlings understand the word “rest” a little differently.

32:07 Distance from Earth to the constellation Lyra.

Alina: What is the distance from Earth to the constellation Lyra?

Irina: There are many stars and the distance from them to us is different. Artis lives in the capital of Raohmis, on the planet-city of Skhgarti, approximately 1600 light years from Earth.

33:12 A recipe for longevity for earthlings.

Alina: Please share the recipe for longevity for earthlings.

Irina: The recipe or secret of longevity for earthlings lies in conscious control of the functions of their body. This is possible through knowledge of the power of the energy of Faith, which is directed by the Spirit to strengthen and develop one’s physical health. In the Interstellar Union, including in Raohmis, there are school subjects that provide education in this matter. I know through contactees that you

also have people on Earth who engage in similar practices, but for some political and economic reasons such practices have not yet been introduced into the program of your educational institutions, but you have them and are adapted for creatures of your species, which will benefit you.

Alina: Are there any contactees with the Lyrans on Earth?

Irina: There are no physical ones, but there are astral contactees. Today there are about 3,500 astral and mental contactees - this is for all Raohmis civilizations.

35:18 Participation of the Lyrans in the formation of intelligent races.

Alina: What is your civilization striving for? What do you want to achieve?

Irina: We want to achieve the population of our Galaxy with intelligent races of all suitable worlds and explore other Galaxies. I want to say that we, like the Burkhadians, are participating in the formation of intelligent races on other planets.

We conduct genetic experiments to obtain hybrids - this is called “hybridization,” but we conducted these experiments not with earthlings, but with representatives of 15 other races at the moment.

36:01 Raising children and sports among the Lyrans.

Alina: How do you raise your children?

Irina: Just like representatives of any intelligent civilization. We convey to them in a short period of time the maximum amount of experience of life in our world and we do this in the spirit of love of our Creator.

Alina: Do you engage in sports or physical activity?

Irina: We do not need separate sports activities, since our whole life is connected with the alternation of physical, mental and Spiritual activities. Our life is structured in such a way that every intelligent person (humanoid) in our race harmoniously combines all three types of activity. He decides this with his personal Spiritual Guide and in contact with his Higher Self. There is no organized sport, since everyone decides for themselves what to do.

37:23 Energy structure and religion of the Lyrans.

Alina: How many chakras do you have and what is your energy structure?

Irina: You call chakras the energy centers manifested in the physical body. We have 18 such main energy centers. The Reasonable Spirit, incarnating through our physical body, makes up 18 aura shells. For you these are different levels of feelings, sensations and thought forms. I can't find an earthly analogue of what it looks like for you, but in our country, for example, analysis, synthesis and feelings are separated. What for you constitutes a single astral body, for us these are separate desires, feelings for oneself, for God, for the world, etc.

Alina: What is the religion on your planet?

Irina: There are many religions on our planets. These are teachings about life according to Divine rules in the material world. Religions are created by Spiritual teachers who come into contact with representatives of our world. They most likely resemble your philosophical movements, without the presence of any forms of ritual systems, that is, these are philosophical systems that people believe in, only without rituals. We have many such systems.

39:42 Negative Rh factor in the blood of earthlings.

Alina: Does the negative Rh factor have anything to do **with** an alien race?

Irina: No, this factor was formed as a result of mutation in already created earthly hybrids. This is an additional protein in the blood that formed independently.

40:12 Formation of the Lyran civilization.

Alina: Was your civilization formed naturally?

Irina: Yes, our civilization was formed more than 28 million years ago, naturally. Our ancestors were also similar to your primates, but they were smaller and lived in the treetops, rarely coming down to the ground. This was on our planet - our ancestral home.

40:47 Diseases among Lyrans.

Alina: Do you have any diseases?

Irina: Our civilization is one of the creators of the Galactic Medical Service, as well as one of the developers of medical programs for almost each of the 116 races that are part of the Interstellar Union. Our diseases can be associated with injuries or improper use of the body's resources, including through distorted direction of thought forms, energy, etc. We have not had any infections, cancers, metabolic diseases or mental illnesses for a long time - this has been eliminated.

42:02 Artis about Jesus Christ.

Alina: What is your opinion about Jesus, why is he in a human body?

Irina: My personal opinion?

Alina: Your general opinion.

Irina: Since I said that we have many philosophical and religious

systems, so I have the right to speak only for myself. Jesus Christ is a unique being of Light, like all of us. He is the first Spiritual being, the son of Light, who realized his autonomy from existing in the stream of Divine thought-images.

Since he realized himself first, he received the impulse of the original source, which was an order of magnitude stronger than the other impulses of each of the subsequent ones, appearing in the thought images of the God of Spirits, who realized themselves as an autonomous Spiritual essence. He, like all of us, has the freedom of choice: either to be in unity with God, or to withdraw into the limitations of selfishness and egoism.

Although he has such a potential opportunity and can take advantage of it, he did not want to do this, unlike us, since his freedom is completely in the rays of the power of God.

Alina: Did Artis incarnate on Earth?

Irina: I did not explore my incarnations.

44:25 Methods of mining on Raohmis.

Alina: Is your planet much larger than our Earth? What fossils are there on your planet?

Irina: Exactly where Artis lives, that is, the center of Raohmis, right?

Alina: Yes.

Irina: Our planet is one and a half times larger than the Earth in volume. Yes, we have minerals, but we are not currently mining them on our planet.

We explore uninhabited planets, as well as asteroids, which contain all the metals and minerals we need. We also process outdated and

unnecessary devices and aircraft models, disassemble them into separate parts and obtain from them the very alloys and metals that are used to build new ships.

They recycle items that have already been used, and they obtain new ones, but not on their planet.

46:00 The purpose of communication between the Lyrans and contactees of the Earth.

Alina: Why are astral contactees needed, and what is the purpose of such communication?

Irina: The purpose of such communication is the transfer of information, the experience of our race, mainly for those people who have often incarnated in the worlds of the Interstellar Union, and their Spirit has a strong subconscious memory of these worlds. This Spirit, with his consciousness, his heart, realizes the truth of the information transmitted by us and other curators, and when he realizes the truth and usefulness of it for himself, he will carry this information in a form that is acceptable for earthlings who do not yet realize themselves as entities separate from the material body .

47:10 Ways to recognize your incarnations.

Alina: How can you find out your incarnations?

Irina: Various methods, for example, a hike - a conscious journey into the Spiritual world or a request from your Higher Self (superself).

Alina: Or Irina's.

Irina: You can do this by going to the Spiritual world to the level from which you came (incarnated). Such trips are possible.

47:45 How Artis knew God.

Alina: How did you come to know God?

Irina: Me personally, Artis?

Alina: Yes, for myself personally.

Irina: Yes, I will tell you my experience. I came to know God when I was still a child. I was about 9 – 10 years old (if you look at the earthly analogue). It was while I was standing near a local tree and examining the structure of its leaves and branches. I considered this in order to transfer this image to paper, that is, we have an analogue of your drawings, which we do as children. And when I drew this tree in my notebook, I realized that I was the Creator, that I repeated the action of the Creator who created this tree.

When I realized that I needed my creative energy to draw an already existing tree, I realized that in order to create a non-existent tree solid and alive, it requires a power and intelligence so beyond my capabilities that it is incomprehensible to my mind .

Alina: Friends, I read some of your comments, this broadcast is a little different from when Maxim is present, so please be patient, Maxim will return soon and will be with you again.

Irina: Our broadcast was interrupted for a short time because a representative of a plasmoid civilization came to us. I've been feeling it for about five or even ten minutes. While I was talking to you, he came closer and the connection was interrupted. He is also a representative of the Vega civilization of the 32nd density level and also considers himself a representative of the Lyran civilization.

51:15 Travels of the Lyrans and identification marks on ships.

Alina: How often do they travel to other civilizations in a physical body?

Irina: We often travel through civilizations in a physical body, because for this we have suitable ships, technologies and a desire to explore the Galaxy. Representatives of our civilization are constantly searching and studying other worlds.

Alina: What is the identification mark on your ships?

Irina: This is somewhat reminiscent of a swastika, only they have it - not four lines, but eight, like a wheel. And on the spokes of this wheel there are two opposite lines. This wheel rotates; it denotes the cycle of the incarnation of the Spirit in the material world. And also - the circulation of the Spirit in the Universe, which creates the material world and returns back.

52:39 Words and practices that change the vibrations of the Spirit.

Alina: Please voice the most powerful prayer, affirmation, mantra for healing.

Irina: Mantra? What mantra should I name?

Alina: The most powerful one is for healing.

Irina: For healing, that is, restoring the integrity of oneself with God?

Alina: Rather, for rejuvenation, for health.

Irina: For the health of the physical body?

Alina: Yes.

Irina: A mantra is a certain set of sounds. I will say that for your species, it is not mantras that are more suitable, but those words spoken in a language that you understand. Those words that bring you

confidence, courage, love and joy. Which set you up for high vibrations, for example the words: “I love the whole world! I accept the whole world! I am part of God! These words increase vibrations, they first change the vibrations of the Spirit, and then, due to the connection of the Spirit with the body, they change the vibrations of the physical body, and all its functions begin to work correctly.

Alina: Is it possible to lay out Tarot cards?

Irina: You can do any spiritual and esoteric practices if they lead you to the light of love.

54:35 Information about reliability is in the Bible.

Alina: Is the information in the Bible reliable?

Irina: Yes, of course, it is reliable. These are stories about the history of the creation of the Jewish religion, the religion of Christianity and the first religious texts of ancient Christians.

55:08 Social structure on the planets of the Lyrans.

Alina: What is the social structure of the Lyrans?

Irina: On each planet we have our own Supreme Ruler, as well as a council of Raohmis rulers from different planets. This council of rulers creates its representatives to execute the laws. By adopting laws, the cathedral is in union and cooperation with its Spiritual patrons in the world of disembodied Spirits. That is, any of our directives, any of our decree is mandatory for execution in order to increase the level of awareness of light in each of the citizens of our society. There are no analogues to this social system on Earth.

56:26 The Wheel of Samsara as a cycle of reincarnation.

Alina: Does the wheel of Samsara also work on your planet?

Irina: Is this the cyclical nature of incarnations into the material world?

Alina: Yes.

Irina: If the “wheel of Samsara” is understood as incarnation into the same world, then no. We, like you, can incarnate in different worlds, and if you mean, in general, in the material world, then the “wheel of Samsara” is called the cycle of reincarnation. Naturally, it exists in the entire material Universe and not only in the dense material Universe, but also in the subtle material Universe.

57:23 Enemies and friends of the Lyrans.

Alina: Are the Lyrans friends with the Pleiades? Do you have any enemies?

Irina: Among civilizations?

Alina: Probably.

Irina: Now our civilization has no enemies. But about 500 thousand years ago, when your earthly civilization lived calmly and harmoniously, we had a war with one of the insectoid civilizations from the other side of our Galaxy. It was a major war that claimed the lives of many of our representatives.

In the victory over the aggressive insectoid civilization, we were helped by representatives of Burkhad, Tumesout and our other allies, with whom we created the Interstellar Union.
